## WORCESTER COUNTY, MASSACHUSETTS.

### TOWN HISTORIES.

#### CHAPTER CXVII.

##### BOYLSTON.

BY GEORGE L. WRIGHT.

*Territory and Surface—Situation—Geology—Population—Statistics—Public Library—Town Officers.*

THIS town is situated in the easterly part of Worcester County, about seven miles northeast from Worcester and about thirty-five miles in a nearly due west line from Boston. It is bounded on the north by West Boylston, Sterling and Clinton; on the east by Berlin and Northborough; on the south by Shrewsbury; and on the west by West Boylston. The boundary lines of the city of Worcester come within about one mile of the present town lines. The total area of the town is twelve thousand six hundred and eighty acres, of which eleven thousand seven hundred and thirty-seven acres are taxable, and three hundred and twenty-five acres are covered by water. The surface is broken and uneven, but not hilly. There are three swells or undulations of land extending through the town. One of them extends across the southeast part of the town and is a part of the range of highlands reaching from Bolton to Shrewsbury, and here, with another range of hills in the southwest part of the town, forms a portion of the water-shed between the Nashua, Assabet and Blackstone Rivers. The third range of hills is situated in the northwest part of the town, and extends into West Boylston and Sterling, and on this range, just over the town-line in Sterling, near the Waushacum Ponds, was once the Indian town and residence of Sholan, the sachem of the "Nashaways." On these swells are some of the strongest lands in the town, and they are especially adapted to grazing purposes. In the southwest part of the town the soil is lighter and largely plain land, well adapted to the cultivation of the different kinds of grain and market produce, and good crops are raised with comparatively little labor. On Muddy Brook there is a large tract of valuable meadow land, a portion of which, now covered with water, is known as the "Dover Ponds," and furnishes power for the saw-mill of Asa Bee at Scar-bridge.

On the intervalles of the Nashua River lies some of

the most fertile land in Worcester County, equally adapted for grazing or arable purposes, and producing abundant crops of the various productions common to this section. The soil in the remaining portions of the town is heavier and more broken, but is capable, under a proper state of cultivation, of producing large crops. The highlands are wooded with the different kinds of oak, walnut, chestnut and pine. Along the intervalles of the Nashua River the oak, walnut, maple, elm and buttonwood grow in luxuriance. The scenery from the highlands of the town is magnificent. On the north, Mt. Wachusett, with the picturesque village of Princeton nestling at its base and surrounded by the lesser highlands of Worcester and Middlesex Counties, terminating in the extreme northeast in the Monadnocks and hills of New Hampshire, and dotted here and there with pleasant villages, lakes, winding streams and wooded hills and valleys, offers a fitting background to a most charming picture of nature. From the highlands in the southern portion of the town a fine view can be had of the State Lunatic Hospital, at Worcester, Lake Quinsigamond, and portions of the Blackstone Valley, and from the easterly parts of the town fine views may be had extending over some of the pleasantest towns of western Middlesex County. There are four natural sheets of water in the town, the largest of which lies in the easterly part, near the Northborough line, and is called Rocky Pond, on account of the innumerable granite boulders with which the bottom is covered. This pond contains forty-five acres, according to a survey made by Gardner Smith under a resolve of the Legislature in 1830.

An outlet flowing southeasterly from this pond passes into Cold Harbor Brook, in Northborough, and thence into the Assabet River. Sewall Pond is in the southerly part of the town and is a part of one of the grants made by the General Court of Massachusetts Bay to Judge Samuel Sewall, after whom it received its name, and contains about eleven acres. This pond is noted for its great depth. Adjacent to it and flowing into it is Pout, or Mud Pond, which contains according to Mr. Davenport, in his history of the town, about twenty-three acres. An outlet flows from Sewall Pond southerly through a part of Shrewsbury into Lake Quinsigamond. On this outlet is situated a saw and grist-

mill, long known as Banister's Mills. Spruce Pond, the only other remaining sheet of water, is also situated in this part of the town, and contains about five acres.

The south branch of the Nashua River enters the town on the west, about one and one-half miles east of the confluence of the Quinsepoxet and Stillwater Rivers in West Boylston, and flows in a circuitous course nearly six miles, through the northerly portion of the town to the Clinton line. There are also numerous brooks and rivulets in every section of the town, the most important of which is Muddy Brook, called in the early records Malagasco Brook, which rises about one-half mile easterly of Boylston Centre, and flows in southwesterly, westerly and northeasterly courses into the Nashua River at Scar-bridge. Another brook rising within a short distance of the one above-mentioned, and called on the early records Spring Garden Brook, flows into Sewall Pond, near the house of Sumner Moore. On this stream was formerly a saw-mill, known as Locke's Mill.

Mill or French Brook rises in the easterly part of the town, in East Woods (so-called), and flows westerly, for a distance of nearly four miles, into the Nashua River. On this stream several saw and grist-mills have stood at different periods of the town's history. There are also several smaller brooks in the westerly, northerly and easterly portions of the town. The ponds are well stocked with fish, and the brooks furnish some of the best trouting places in Worcester County.

The geological formations consist of Merrimack schist, calcareous gneiss and the St. John's group. Sulphate of iron is found in different sections of the town. On Diamond Hill, about one-half mile southwest of Boylston Centre, are found large and beautiful specimens of crystallized quartz, and which, according to Rev. Peter Whitney, the historian of Worcester County, gave the name to the hill from their similarity in size and shape to diamonds. Coal, resembling that found in Worcester, has been discovered in the northwesterly part of the town. In the easterly part, about two miles from Boylston Centre, on the road to Berlin, extensive gold-mining operations were carried on under the lead of the late Rev. Andrew Bigelow, D.D., of Southborough, a native and former minister of Boylston. A shaft about forty feet in depth was sunk, and considerable quantities of ore taken out and transported to New York for analysis. The precious metal is said to exist in paying quantities; but the work was abandoned upon the death of Rev. Dr. Bigelow, in 1882, and nothing has since been done. In this section of the town, upon the farm of Israel L. Barnes, is a valuable quarry of building stone. Excellent clay for the manufacture of brick is found in several places, and a spot of clay ground on the farm of Charles G. Allen, about one mile from Boylston Centre, was set apart by the proprietors of Shrewsbury in 1728 for the common use of the settlers in the manufacture of their pottery-ware and kitchen utensils. The manufacture of brick is now quite extensively carried on by George Hazard, about two miles from Boylston Centre.

The town is well accommodated with very good roads; there are nearly fifty miles of highways within its limits. The Nashua River is spanned by three iron

bridges, all of which have recently been erected by the town at a cost of about \$7,000. The present county road to Clinton was built about 1860, at a cost of nearly \$4,000. Mr. Davenport, in his history of the town published in 1830, says the principal road at that time was the county road, which passes through the northwesterly, northerly and northeasterly portions of the town to Berlin, and crossing the Nashua River at Sawyer's Mills. At that time a stage passed over this road three times a week from Boston, and Mr. Davenport says the road was then thought to be the most direct and level route for a road from Boston to Northampton, and a petition was presented about that time to the County Commissioners for the location of a road from the line of Worcester County at Ware Factory Village through Barre, Rutland, Holden and West Boylston to the Middlesex County line,—a fact interesting as the beginning of the project of communications between Boston and Northampton now carried out by the Central Mass. R. R., and being the same route taken by that railroad, which passes through the town from east to west, and has two stations within the town limits,—one, called South Clinton, is in the northeast part, near the Clinton line; the other is known as Boylston, and is situated at Sawyer's Mills. There are two post-offices in the town, the older of which is known as Boylston, and is located at Sawyer's Mills, and supplies the postal wants of that village, the population of which is largely made up of operatives in the cotton-mills there and a few farmers in the northerly part of the town and the southeasterly part of Sterling. Thomas C. Sheldon is the present postmaster. The other and principal post-office is located at Boylston Centre, and supplies the wants of nearly three-fourths of the town. At this village is located the town-hall, Congregational Church, public library, etc., and it consists of about thirty dwelling-houses. John Tucker is the present postmaster. There is a small village situated in the southeast part of the town near the Northborough and Shrewsbury lines, called "Straw Hollow," and it was at one time largely the property of David T. Moore & Sons, who carried on extensive farming interests, together with a large cider and vinegar refinery. In 1878 there were furnished from this place for the Boston market, 55,224 quarts of milk and 17,603 quarts of cream, selling for \$6,165.13; 19,801 bushels of apples were made into cider, producing 866 barrels. The cider and vinegar refinery and the home buildings of the late D. T. Moore were destroyed by fire several years since and have never been rebuilt. A portion of the farm is now called the Adelpia farm, and is operated by Clapp, Moore & Co., who do an extensive creamery business.

In the northeast part of the town there is a tract of land extending into the southerly part of Clinton, known by the name of the "Six Nations," and so called according to the tradition of there having once lived families of six different nationalities at one time within the territory. In this section of the town is a high wooded, rough tract of land, called in the early records Rattlesnake Hill, and said to have once been a great haunt for these reptiles. It is said that the other sections of the town were much infested by them during the early settlement and that it was not

uncommon for them to enter the houses of the settlers. East Woods, a large wooded and rocky tract of land in the easterly part of the town, was said to be another favorite haunt of the reptiles.

It is perhaps known to but few of the present inhabitants of the town that a search was ever carried on here for buried treasure. Mr. Davenport, in his history, says, about the time of the incorporation of the town, in the autumn of the year, twenty or thirty persons from the towns of Northborough, West Boylston, Hubbardston and Brookfield, upon the authority of dreams, began to break the earth on land of Nathaniel Davenport, Esq., now belonging to the estate of the late Nathan L. Daggett, where they continued their labors, occasionally, for several weeks, until they had made an excavation eight or ten feet in depth, and perhaps forty feet in circumference. The labor was principally performed in moonlight evenings, with a table on the ground, with an open Bible and rusty sword upon it, one man at the same time sitting upon the bank, with *sweet apple-tree* or *witch hazel* rods in his hands, to inform the workmen in what particular spot the money was, as it was believed the money had the power of locomotion, and was, therefore, uncertain whether it would remain stationary for any length of time. The money was supposed by the searchers to have been placed there by pirates, and that some person was murdered and buried there to take care of it. To appease the manes of this person a dove was one day procured by one of the party and bled over the spot where the treasure was supposed to have been buried, and the blood sprinkled about the excavation. Profound silence was required to be observed while searching for the treasure. One evening a man, while at work alone, struck the point of a bar, as he reported, under the bale of the kettle which contained the money, and heard distinctly the sound of the specie, but hearing at that moment a discharge of musketry, looked and saw upon the summit of the hill an army firing upon him. Just then the bale of the kettle slipped off the point of the bar and could be found no more. This is said to have been the nearest attainment to securing the coveted prize.

From its high elevation Boylston is essentially an agricultural town, and offers but little opportunity for manufacturing or other industries, but as a farming town it takes a high rank with the other towns of the county, both in the industry and prosperity of its inhabitants and in the cultivation and appearance of its farms. From the assessors' returns for the present year it appears that the valuation of the town is \$523,573; rate of taxation, \$15 per \$1000. There are 160 dwelling-houses, 208 ratable polls, 224 horses, 820 neat-cattle and 147 swine in the town. Its dairy products are extensive, and it has some of the best orchards in the county. According to the Massachusetts State Census of 1875, there were produced in the town during the year ending May 1, 1875, 20,930 barrels of apples, valued at \$8,100; 4,639 bushels of

corn, valued at \$4,706; 18,689 bushels of potatoes, valued at \$11,847; 2,240 tons of hay, valued at \$37,053; 148,415 gallons of milk, valued at \$22,211; 43,500 pounds of pork, valued at \$4,521; 49,425 pounds of beef, valued at \$3,876. The total value of all agricultural products for that year was \$147,537. The only manufacturing interests in the town are situated at Sawyer's Mills, where there is a cotton-mill owned and operated by the Lancaster Mills Company, of Clinton. The resident superintendents of the mills have been Deacon Moses Brigham, Levi Holbrook, James A. Weeks, Edmund C. Forbes and Thomas C. Sheldon.

The people of the town have always been noted for their healthfulness and longevity. For a period from 1797 to 1830 there were thirty-four deaths of persons over eighty years of age. Miss Betsey Stone, a descendant of one of the oldest families, died June 30, 1868, at the great age of one hundred years and eight months. Abel Farwell, a pensioner of the War of 1812, died September 1, 1888, at the age of ninety-seven years, and was at the time of his death the oldest person in the town. Ezra Ball, now in his ninety-fourth year, at present enjoys that distinction, and is the oldest resident member of the Congregational Church, an honor which was enjoyed by his grandfather at the time of the settlement of Rev. Mr. Hooper in 1794, and by his father when Rev. Mr. Sanford became pastor of the church in 1832. The population of the town, according to the last census, is eight hundred and thirty-four, and it has not varied very much from this number at any period of the town's history. The greatest number of inhabitants at any one time was in 1808, the year of the incorporation of West Boylston as a separate town, when it was ten hundred and thirty. In 1885 there were fourteen persons in the town above eighty years of age.

There are six schools in the town. The number of school-children, between five and fifteen years of age, May 1, 1887, was one hundred and sixty-six. The total number of different scholars in the schools for the year 1887 was one hundred and seventy-seven, and the amount expended for all school purposes was \$2,228.07.

Boylston has an excellent public library, which was established by the town at its annual meeting, March 1, 1880, when the sum of two hundred dollars and the amount of the dog fund remitted from the county treasurer was appropriated for the purpose.

On the 27th day of the following June the Boylston Social Library—a library existing in the town, organized March 2, 1792, eighty-eight years previous, and consisting of three hundred and eighty-six volumes—was by vote, and subsequently by deed, added to the library. The library was completed by the donation of agricultural works to the amount of fifty dollars, from the Boylston Farmers' and Mechanics' Association, and twenty-five volumes from Mrs. John B.

Gough. The library contained, when open for circulation September 4, 1880, eleven hundred and ten catalogued volumes. It has since received many valuable donations, the more important of which have been from Hon. Phineas Ball, of Worcester, the late John B. Gough, Esq., the late Oliver Sawyer Kendall, the late Sanford M. Kendall, Miss Ellen Williams, of Northborough, Hon. George F. Hoar and others. In 1887 Miss Hannah E. Bigelow, M.D., of Marlborough, Mass., gave to the library one hundred and fifty dollars in books and money, in remembrance of her mother, the late Mrs. Levi Bigelow, of Marlborough, who was a native of the town. An interesting feature of the library is a collection of photographs of the present and former citizens of the town and the soldiers of 1861-65. The collection now comprises five large volumes and was the design of the late Oliver S. Kendall and has been largely carried out by his family. The library now contains about twenty-five hundred volumes. George L. Wright is the librarian, and has held that position since its organization. A library has also been established at Sawyer's Mills by the Lancaster Mills Company for the use of its operatives. There is also a large and flourishing Grange of the Patrons of Husbandry in the town, of which George A. Hastings is the present master. The following is a list of the town officers chosen at the annual town-meeting in March, 1888: Moderator, George L. Wright; Town Clerk, Henry H. Brigham (died June 19, 1888, and P. M. Brigham chosen to fill the vacancy); Selectmen, George R. Hastings, Penniman M. Brigham, Wm. A. Andrews; Assessors, Elmer Shaw, Lyman S. Walker, Wm. H. Hastings; Overseers of the Poor, Lyman P. Kendall, Nathaniel L. Kendall, Charles E. Smith; Treasurer and Collector, Benj. C. Lane; School Committee, George L. Wright, F. B. Willard, Thomas C. Sheldon; Trustees of Public Library, P. M. Brigham, A. V. R. Prouty, George L. Wright, Miss F. M. Whitcomb, Mrs. Everett Kendall.

## CHAPTER CXVIII.

### BOYLSTON (*Continued.*)

#### EARLY FAMILIES AND SETTLEMENTS.

OF the territory now constituting the town, about three-fourths belonged to Shrewsbury, the northerly and northeasterly portions were included in the original grant made to the town of Lancaster by Sholan, Indian Sachem of the Nashaways in 1643, and the remainder, a very small tract in the northerly part of the town, was derived from the Lancaster new grant made by George Tahanto, nephew of Sholan, in 1701. It is not certain when the settlement of the town began, but three large grants were made within its territory by the General Court of the Massachusetts Bay long before the actual settlement began.

One of these grants was known as the "Malden Farm" and was made to the church in Malden in 1655, and consisted of one thousand acres and lay in the southwest part of the town and partly within what is now West Boylston. This grant was the cause of a long and vigorous suit between the proprietors of Shrewsbury and the church in Malden. Another grant was that made in 1658 and confirmed in 1659 to Capt. Richard Davenport, commander of the castle in Boston Harbor, and consisted of six hundred acres laying in the northwesterly part of this town and extending along the Nashua River into West Boylston. The third grant was the Sewall farm, comprising within its limits one thousand five hundred acres, and was partly in Boylston and partly in Shrewsbury, and probably adjoined the easterly line of the Malden farm, and was granted to Chief Justice Samuel Sewall.

The first permanent settlement began in that portion of the territory taken from Lancaster by descendants of Thomas Sawyer, one of the first settlers of Lancaster, on the farm now owned and occupied by James E. Ball. Vestiges of the cellar of this house may now be seen a short distance south of the present buildings. The estate of the Sawyers included the farm now owned by Nathaniel L. and Everett Kendall, sons of the late Oliver Sawyer Kendall, and descendants of the Sawyer family, and extended to Sawyer's Mills village, where the Sawyers erected a corn-mill on the Nashua River. It is uncertain when they settled in that part of Lancaster now Boylston, but they were probably there as early as 1705 or '06. The Sawyer family were long and prominently connected with this part of the town. Lieut. Aaron Sawyer, a member of the family, was prominent in Lancaster affairs during the Revolution; was first town clerk of Boylston, assistant United States assessor in 1798, and a prominent land surveyor. The house erected by his father, bearing on a stone in its chimney the date 1745, is now standing at Sawyer's Mills, and probably the oldest house in the town. The settlement of that part belonging to Shrewsbury began about 1717. Among the early settlers are found the names of Bennett, Stone, Bigelow, Taylor; Ball, Hastings, Newton, Keyes, Temple, Howe, Bush, Davenport, Flagg, Andrews and Wheeler.

The Ball family was probably the second family that settled in what is now Boylston and came from Watertown. The family is descended from John Ball, who came from Wiltshire, England, and settled in that part of Concord now Bedford, where he died October 1, 1655. He had Ebenezer, Eleazer, John and Nathaniel; the last-named was the father of Caleb, and grandfather of Reuben, who married Experience Flagg in 1713, and had eight children, three of whom lived to be over ninety years of age. The sons of the first-named John Ball settled in Lancaster and Watertown, and were among the first settlers in those places. John Ball, probably a son of

the first of that name, settled at South Lancaster, where he, with his wife, Elizabeth, and an infant child, were slain by the Indians in the massacre of February 10, 1676, and two others of his family were carried into captivity. The portion of the family which settled in Boylston located in the easterly portion of the town, within the territory derived from Lancaster and very near the line which separated that town from Shrewsbury. The original farm is now occupied by Alonzo Ball, and has always been in the possession of the family since its first settlement. The family has always been noted for its longevity.

The Bennett family were from Lancaster, where George Bennett, a descendant of James Bennett, of Concord, and a nephew of Richard Linton, one of the early settlers of Lancaster, came some time previous to 1665. Bennett was killed by the Indians August 22, 1675. He left a widow and five small children, among whom was Samuel, born 1665, and who succeeded to his father's estate. This Samuel Bennett, Mr. Ward says, was probably the one who was in the Shrewsbury north part as early as 1723, and whose son Samuel was one of the permanent settlers in that part of Shrewsbury. The place where he resided included the farms now owned by Leonard Brewer and Augustus Flagg, situated about one mile east of Boylston Centre, on the road leading to Berlin. The site of the original house may be seen marked by a slight depression in the ground, on the left of the road, a short distance below the present buildings on Mr. Brewer's farm, and near where the brook crosses the road. This house was used during the early settlement as a garrison-house for protection against the Indians. The Bigelow family came from Marlborough, where they settled some time between 1690 and 1700, coming to that place from Watertown. The history of the family can be traced in England as far back as the time of Henry III., when the family name was written Bagulay, and was derived from the place where they dwelt. Richard was Lord of Bagulay in the time of Henry VIII.; Ralph De Bigulay was Lord of Ollerton Hall, and died in 1540. The name has also at different periods been spelled Biggeley, Bigulah, Bigloh, Biglo and Biglow in the early records. John Bigelow was the first of the family in New England, and settled at Watertown, where he married Mary Warner, October 30, 1642. His grandson, John Bigelow, settled at Marlborough. In 1705 he was taken captive by the Indians with Thomas Sawyer, Jr., and his son Elias, and carried to Canada. Sawyer offered to erect a saw-mill for the French government on the Chambly River upon the condition that he should obtain the ransom of the three captives. The Indians, however, refused to accept the ransom of Thomas Sawyer, and bound him to the stake for torture, when a friar excited the fears of the savages by brandishing a key, and threatening with it to unlock the door of purgatory and thrust them into its fires if they did not release their prisoner. They

immediately unloosed him, and, true to his promise, he completed the mill, which was the first erected in Canada. When Sawyer and Bigelow returned home, Elias Sawyer was detained a year longer to run the mill. Captain Joseph Bigelow, a son of this John Bigelow, settled in the north part of Shrewsbury about 1729, a prominent man there, and was the ancestor of most of the families of the name living in Boylston. Dea. Amariah Bigelow, a son of Samuel, of Marlborough, settled in Shrewsbury North Parish about 1747, in that portion now belonging to West Boylston, and on the farm now owned by George T. Brigham, Esq. He was a prominent man and had a large family of children. One daughter was the wife of Rev. Eleazer Fairbanks, the second minister of the Boylston Church.

There are several families of the name now residing in both towns. The Stone family probably came from Andover and settled in the extreme northerly part of the town. The Taylor, Keyes, Temple and Bush families came from Marlborough. Lieutenant Eleazer Taylor, first of the name in Boylston, was probably the first settler in the central part of the town. He resided on the place afterwards owned by Rev. Ward Cotton, and now in the possession of Henry V. Woods. He was the father of Anthony and David Taylor, both of whom were noted for their prodigious strength. The Keyes family came here about 1720 and settled in the south part of the town. They were prominent in church, precinct and town affairs. John Keyes, Sr., was the first magistrate in the territory now Boylston, and one of the first deacons of the churches in Shrewsbury and Boylston, first town clerk of Shrewsbury, a member of the first Boards of Selectmen, Assessors, etc., and Representative in 1746. Cyprion Keyes was also a deacon in both churches, one of the selectmen of Shrewsbury eighteen years, assessor fourteen years, town clerk seven years, etc. One of his daughters married Major Ezra Beaman and another was the wife of Jotham Bush and mother of Colonel Jotham Bush. Deacon Keyes died June 18, 1802, aged ninety-five years and nine months. His brother, Jonathan Keyes, was also a deacon in the Shrewsbury North Parish (now Boylston). The family name is now extinct in Boylston. The Temples settled in the southwest part of the town and on territory now embraced within the limits of both Boylston and West Boylston. Isaac Temple was the first of the name and appears to have been a very influential man in the early town and precinct affairs. His son, Lieutenant Jonas Temple, was a very prominent man in both Shrewsbury and Boylston and much employed in town affairs and Representative from both towns.

His residence was within the present limits of West Boylston, and when that town was incorporated, in 1808, he refused to be set off to the latter town, and the Legislature made provisions in the act of incorporation whereby he and his farm should remain a part

of Boylston until his decease, which occurred November 3, 1815, at the age of eighty-three years. John Bush was the first of that name who settled in Boylston, and was the son of Abial Bush, who settled in Marlboro', in 1690. John Bush settled on the place now owned by the estate of the late Charles Andrews, Esq., at Boylston Centre; he was prominent in both town and precinct affairs and was instrumental in the incorporation of the North Parish, their agent before the General Court and the first precinct clerk. His son, Jotham Bush, Jr., and his son-in-law, Rev. Ebenezer Morse, M.D., were royalists in the time of the Revolution; and Jotham Bush was compelled to leave his estates and flee the country; he was finally taken and sent on board a ship in Boston Harbor, where he died of small-pox in 1778. After his death his estate came into the hands of his son, Colonel Jotham Bush, where he erected a large and fine mansion, at the time one of the best in Worcester County. This house was destroyed by fire October 20, 1859; Colonel Bush resided there until his death, November 13, 1836, at the age of eighty years. He was an honored and influential citizen, devoting himself untiringly to the best interests of the town, and in return was honored with nearly every office within its gift. He was prominently identified with the movement, in 1786, which led to the division of Shrewsbury and incorporation of Boylston. Three of his daughters married clergymen and left descendants who were prominent in that and the medical professions, among whom is Dr. William F. Holcombe, of New York. One daughter, Mrs. Martha Dickinson, of Brooklyn, N. Y., widow of Rev. Baxter Dickinson, was living in 1886, at the age of eighty-eight years. One of her sons is Rev. William Cowper Dickinson, of Cincinnati, Ohio; another son, Rev. Richard Storrs Dickinson, was associate pastor of Rev. Dr. Barnes, of Philadelphia. Deacon Jotham Bush, son of Colonel Jotham Bush, died here in 1880 and was the last of the family in Boylston.

The Howe family came here about 1725, when Phineas Howe, then a young man, was sent from Marlboro' by his father to form a home in the then more unsettled wilderness; he settled on the farm now owned by George Hazard, and spent the first winter here alone. It is said that he found his way to and from Marlboro' by blazing the trees with an axe. He married Abigail Bennett, daughter of Samuel Bennett, one of the earliest settlers and his nearest neighbor, and resided here until his death. The family is descended from John Howe, E-q., who came from Warwickshire, in England, and was connected with Lord Charles Howe, Earl of Lancaster, in the reign of Charles I. There are many descendants of the family now living in the town.

The Newtons also came from Marlborough, and settled in the extreme southeast and northwest parts of the town. The Wheelers were from Watertown. Both of these families are now extinct. The Davenports were descended from Capt. Richard Davenport,

the commander of the castle in Boston Harbor, who came over to Salem in September, 1628, with Gov. Endicott. He was a prominent man in the Massachusetts Bay Colony, and was one of the guardians of Adam Winthrop, Jr., a grandson of Gov. John Winthrop, and was also much employed in the service of the colony, and received from the General Court, in 1659, the grant of land already mentioned, and where his grand-sons—William and Nathaniel—settled in 1736, and which remained in the family for eight generations. Capt. Davenport was killed by lightning, July 15, 1665. The family was also connected with the families of Dr. Isaac Addington, whose son of the same name was chief justice under Gov. Dudley, register and judge of probate for Suffolk County, etc. and also with the family of Gov. John Leverett. His grandson, Addington Davenport, was register of deeds and clerk of courts for Suffolk County, clerk of the House of Representatives and judge of the Supreme Court. The history of the family can be traced in England in unbroken descent from the time of the Norman Conquest, and was very highly and honorably connected. What relation Capt. Richard Davenport was to the distinguished Rev. John Davenport is not known, but the relationship, if any, must have been distant, as they were contemporary together, and were not father and son, as stated by Mathew Davenport, Esq., in his "History of Boylston." The Flaggs came from Watertown and Concord. Thomas Flagg was in the former place as early as 1643. Gershom Flagg was in Boylston in 1729, and was the direct ancestor of the families here of that name. This family has produced many influential men. The Hastings family came from Watertown, in the person of Daniel Hastings, who settled in the easterly part of the town, on the farm now owned by A. V. R. Prouty. He was a prominent man, and much employed in town and precinct affairs. It is said that when he settled here, in 1729, he traveled on horseback with his family and goods through an unbroken wilderness, and was several days in making the journey. This family is of Danish origin, and dates back to the early times, when the Danes made frequent incursions into that part of England and Scotland bordering on the North Sea. In one of these incursions Hastings, a Danish chief, made himself formidable to Alfred the Great by landing a large force of men on the English coast. He took a portion of Sussex, and the castle and seaport were held by his family when William the Conqueror landed in England, and held it for the crown many years. Henry was Lord of Hastings and son of William De Hastings, steward of Henry II. They were allied by marriage with the royal family of England and Scotland. Sir Henry and George Hastings, grandsons of the Earl of Huntingdon, became Puritans, and fled from England to the New World, and were the first of the family in this country.

The Andrews family came here about 1746, when Robert Andrews, a son of Robert Andrews, of Boxford, settled on the farm lately owned by the heirs of Willard Andrews and now occupied by Henry L. Shumway. This farm was in the possession of Robert Andrews and his descendants from its first settlement until 1887. He was a prominent man, captain of militia and during the Revolution was one of the selectmen of Shrewsbury. He was accidentally killed November 11, 1789. His wife was Lucy Bradstreet, of Topsfield, a descendant of Governors Dudley and Bradstreet. This family has furnished many influential men to the town. Of all the Boylston families, the Flaggs, Hastings and Andrews were the most numerous, and many families of each name are now residing in the town. It is not known that the early settlers were ever attacked by the Indians in hostile manner, but Shrewsbury and Lancaster were among the frontier towns put into a state of defense by the General Court in 1722, and garrison-houses or stockade forts were early maintained. One of these was at the house of Samuel Bennett, already described, on the farm of Leonard Brewer. Another was at the house of John Bush and the third stood within the present limits of West Boylston, about eighty rods from the present residence of George T. Brigham, Esq. The early settlers carried firearms into their fields of labor and many false alarms of savage incursions are believed to have taken place. One anecdote, said to be authentic, is that the wife of one of the settlers who came from Marlborough was preparing dinner, and putting her meat into the dinner-pot, hung it over the crane, when the family were suddenly alarmed and fled to Marlborough, returning in about a year. She found her dinner preparations in the same situation in which she had left them. Specimens of Indian arrow-points, stone implements, etc., have been found in different parts of the town, and the sites of some of their corn-fields and granaries, which were simple excavations in the ground, have been discovered.

## CHAPTER CXIX.

BOYLSTON—(*Continued.*)

### CIVIL AND POLITICAL HISTORY.

As early as 1738 it is evident that the inhabitants of the north part of Shrewsbury considered themselves sufficient in numbers and in strength to assume the responsibilities of a separate town government, and a bill was introduced into the General Court for the incorporation of the northerly part of Shrewsbury into a separate township. This passed the General Court, but was negatived by Governor Shirley for the reasons that the too rapid increase of new towns was injurious, since each town was entitled to one Repre-

sentative to the General Court, and every town having one hundred and twenty or more voters to two Representatives. Only Boston, Salem, Ipswich and Newbury, of all the towns entitled to send more than one, availed themselves of the law; some of the towns did not send any. There were one hundred and sixty towns, and only from one hundred and nine to one hundred and twenty Representatives were yearly sent to the General Court; but in a case of emergency the number could be doubled, and even trebled, and any matter introduced by the King's Governor which met with their opposition would be defeated, and he accordingly recommended the incorporation of precincts and districts without the right of representation. These matters were reported to the Royal government at London, and instructions returned to the Governor that no new town should be erected without the King's consent. Thus defeated in their plans to become a separate town, they soon after made application to the General Court for incorporation as a distinct precinct. In this they were successful, and on December 17, 1742, were incorporated as the North Precinct of Shrewsbury. At the same time the town of Lancaster voted to grant the request of Joshua Houghton and others to be joined to them by the following bounds: Beginning at Bolton (now Berlin) line, one and one-half miles from Lancaster (southwest corner); thence to run due west to the Nashua River, to the town line, excluding only the lands of Philip Larkin that might fall within the said lines. By this a strip one and one-half miles wide was given to Boylston. On the 19th of January, 1743, in obedience to a warrant from John Keyes, Esq., "one of His Majesty's Justices of the Peace," the first precinct meeting was held, and the following officers were chosen: Moderator, John Keyes, Esq.; Precinct Clerk, John Bush; Precinct Committee, John Bush, Joseph Bigelow, Dea. Cyprian Keyes, Joshua Houghton and Abner Sawyer. About the same time they relinquished their rights in the meeting-house to the town of Shrewsbury for £32 10s., to be paid when the new parish should have erected and covered a meeting-house. At the next meeting, held February 7, 1743, they "voted £26 8s., old tenor, to pay for preaching for eight days past," which probably included each Sabbath that there had been since they were incorporated; also "voted £50, old tenor, for preaching in the future," and Daniel Hastings, Abner Sawyer and Joseph Biglo (or Bigelow) were chosen as a committee to provide a minister; "voted, that the centre of the North precinct in Shrewsbury, that is, south of the Quinnepoxet River or the nearest convenient spot to the centre, be the place to set the meeting-house on;" "voted, that Capt. Flagg be the surveyor to find the centre of the North precinct in Shrewsbury," and Jonathan Livermore was chosen "in case Capt. Flagg fails this week." This was Deacon Jonathan Livermore, of Northborough, for many years clerk of that town, and who

lived to be over one hundred years old. On the 18th of the same month they voted to proceed to build a meeting-house forty-five feet long, thirty-five feet wide, and twenty feet between the joints, and that the house should be up and covered with shingles and rough-boarded around the sides by the 1st of the following June. The following year the house was nearly completed. This church stood on the present South Common, and nearly in front of the Old Cemetery, at the north end of which was the "Noon or Sabbath-day house," built in 1772, where the people were accustomed to retire between services for lunch and warmth, no fires being had in the meeting-houses. The stocks, for the punishment of petty crimes, was located near the cemetery gate. The Old Cemetery was purchased about the time of the erection of the meeting-house of Lieutenant Eleazer Taylor, and the first interment was made April 14, 1745, as appears from the following epitaph upon a head-stone near the gate:

Here lies ye body of Garner Maynard, son of Mr. Elisha and Mrs. Huldah Maynard, who died Apr. ye 14th 1745, aeg. 11 months and 11 days.

And on the foot-stone:

This is ye first body that in this burying-ground doth lie.

From this time forward the relations of the North and South Precincts were largely distinct save in town business.

September 16, 1751, Dr. Zachariah Harvey, Edward Newton and others, living in the extreme north-western part of the precinct, at what was known as the "Shrewsbury Leg," and near the present village of Oakdale, in West Boylston, petitioned the Shrewsbury North Precinct that the meeting-house might be moved more into the centre of the precinct, or else that they might be allowed to draw their proportional part of the money granted for precinct and preaching purposes from the treasury, so that they might have preaching by themselves, at least during the winter season. The precinct refused to grant the request, but voted "that the portion of the North Precinct lying between the Quinneboxet and Lancaster Rivers might become a separate town, district or parish by themselves."

October 9th of the same year Bartholomew Parsons, Mephiosheth Bixby, Daniel Wheelock, Jonathan Foster, Reuben Moore, Daniel Bixby, Josiah Cutting, Zachariah Eager, Daniel Allen, John Parsons, Edward Newton, William Whitney, Ezekiel Newton, Samuel Newton and Dr. Zachariah Harvey renewed the petition, alleging that the distance from the meeting-house was so great as to render their attendance upon divine worship inconvenient. At this time the precinct granted the sum of six pounds to pay the rates of the petitioners. This same year the town of Shrewsbury voted to allow those living on the north side of the Quinneboxet River, and between the towns of Holden and Lancaster, to be set

off and annexed to Lancaster. The annexation, however, did not take place until 1768.

Dr. Zachariah Harvey, named in this connection, seems to have been the most prominent resident in that section of the Shrewsbury North Precinct. In 1758 he gave, by deed, to the inhabitants of "Shrewsbury Leg" a lot of land for a burying-place and a school-house lot, and soon after removed into what is now Princeton, where he was the first practicing physician; and, upon the incorporation of the district of Princeton, was chosen moderator, clerk, selectman, assessor and agent to the General Court. The "Harvey" apple, well known in this section many years ago, was introduced by him.

By an act of the General Court, passed September 18, 1762, Bezaleel Howe, Josiah Bennett, Levi Moore, Daniel Albert, Frederick Albert, Edmund Larkin, Jonathan Goodenow, Mathias Larkin and Zebulon Rice, with their lands bounding by a line beginning at the northeast corner of the Shrewsbury North Precinct, thence running to the Nashua River on the north side of the house of Daniel Albert, and so on the river to the precinct line at Aaron Sawyer's (now Sawyer's Mills Village), were set off from Lancaster and annexed to the Shrewsbury North Precinct. April 25, 1774, the precinct voted to receive William Dunsmore and others, with their lands, from the First Precinct in Lancaster. About this time the inhabitants of the Shrewsbury North Precinct renewed their original intentions of forming a separate town organization, and at a precinct meeting held January 13, 1772, an article was inserted in the warrant calling the meeting, on the petition of Dea. Jonathan Keyes and others, "to see whether the inhabitants would take the proper and necessary measures to have the precinct, and such of the inhabitants of Lancaster as might be accommodated, erected into a district, and this passed in the negative." At the precinct meeting held April 25, 1774, the matter of separation was again brought before the precinct, when "they signified by vote their minds to be set off from Shrewsbury as a separate town," and a committee, consisting of Capt. Joseph Bigelow, Jr., Lieut. Jotham Bush, Benjamin Fisk, Ezra Beaman and Thomas Andrews, was chosen to present a petition to the selectmen of Shrewsbury for the above purpose, and to see if the town would grant their desire. This, it is supposed, the town refused to do, and in the impending political crisis of the Revolution which followed, all thought of an immediate separation from the parent town seems to have been laid aside. In 1780 Aaron Sawyer, Nathaniel Lamson, Frederick Albert, Silas Howe, John Dunsmore, Jacob Winn, Hugh Moore, Nathaniel Hastings, Oliver Sawyer, Silas Hastings, Samuel Bigsby, Micah Harthan, Joseph Sawyer, Ezra Beaman, Edmund Larkin, Levi Moore, Josiah Bennett, William Dunsmore, John Glazier, Phinehas Howe, Elijah Ball, Robert Andrews, Jr., and Nathaniel Davenport,

some of whom resided within the limits of Lancaster, and the others had lands there, petitioned the town of Lancaster that they might be set off and annexed to Shrewsbury. Some of them had already been joined to the Shrewsbury North Precinct, although in Lancaster, for town purposes. This request the town granted June 23, 1780. The line of division was the present north line of Boylston.

March 28, 1785, the precinct again voted to take measures to become a separate town, and a committee, consisting of Lieutenant Jonas Temple, Captain Joseph Bigelow and Ephraim Beaman, was chosen to again petition the town of Shrewsbury. This time they were successful, and, at a town-meeting held May 9, 1785, a joint committee from the two parishes was chosen "to perambulate the line and renew the boundaries between the precincts, as also to settle all matters relating to a separation of Parishes," etc., and Colonel Job Cushing, Captain Jonah Howe and Major Asa Rice were chosen on the part of the South Precinct, and Lieutenant Jonas Temple, Captain Joseph Bigelow and Major Ezra Beaman were chosen on the part of the North Precinct. At a subsequent meeting, held January 2, 1786, it was voted to set off the North Precinct as a separate town; and on the 1st day of March, 1786, the town of Boylston was incorporated. It received its name in honor of an eminent family of Boston and Roxbury, two of whom were skillful physicians in succession, and another founded the chair of rhetoric and oratory in Harvard University. This family, through Ward Nicholas Boylston, Esq., of Princeton, gave to the two churches a large pulpit Bible, communion cup and bell, and in 1799 the sum of forty pounds sterling, directing the town to keep it on interest until it should amount to a sum sufficient to erect some public building for the use of the town. In January, 1827, he died, and in his last will he directed that the sum of three hundred dollars should be added to that already given, and that the present Town Hall should be built, which was completed in 1830. The first town-meeting was held March 13, 1786, and these officers were chosen: Moderator, Lieutenant Ephraim Beaman; Town Clerk, Lieutenant Aaron Sawyer; Selectmen, Major Ezra Beaman, Lieutenant Jonas Temple, Lieutenant Timothy Whitney, Captain Jonathan Fassett, John Hastings; Assessors, Ephraim Beaman, Jonas Temple, Edmund Stiles; Town Treasurer, Captain Joseph Bigelow.

June 14, 1796, the westerly part of the town, with certain other lands, taken from the towns of Sterling and Holden, were set off and incorporated as the Second Precinct in Boylston, Sterling and Holden. Two years previous, in 1794, Major Ezra Beaman and twenty-seven others, living in this portion of the town, had presented a petition to the town, asking its consent that they might be set off and incorporated, either as a town, district or society. This petition the town had refused to grant, and application had

been made to the General Court, which resulted in their incorporation as a precinct. By the terms of the act of incorporation, those persons residing within the territory embraced within the limits of the Second Precinct, who should signify, in writing, to the clerk of the Second Precinct, within six months from the passage of the act, their choice to remain within the First Precincts of the respective towns from which the new precinct was composed, should thereafter be considered as members of said First Precincts. Among those from Boylston to avail themselves of the terms of the act of incorporation was Lieutenant Jonas Temple, who had been most prominently identified with the affairs of Shrewsbury North Parish, and thus far with the affairs of the town of Boylston, while most prominent among the seceding portion were Major Ezra Beaman and Captain Joseph Bigelow, Jr., both of whom had been very active in the affairs of the town and church. The new precinct had already erected their meeting-house three miles westward from the centre of the town, where the old church now stands on West Boylston Common. From this time forward the church and parochial affairs of the two sections of the town became separate and distinct.

The parish affairs of the old precinct were separated from the affairs of the town, and vested in the First Precinct in Boylston, which organized September 5, 1796, with the following officers: Moderator, Captain Robert Andrews; Precinct Clerk, Lieutenant Aaron Sawyer; Precinct Committee, Dr. Samuel Brigham, Deacon Levi Moore, Lieutenant Aaron Sawyer; Assessors, Captain James Longley, Lieutenant Jacob Hinds, Jonathan Fassett, Jr.; Treasurer, Captain Robert Andrews; Collector, Major Jotham Bush, and were so continued separate from the affairs of the town until the incorporation of the Second Precinct into the town of West Boylston, in 1808, when the parish affairs were again vested in the town, and so continued until 1823, when the organization of the parish was revived. That Boylston was in as prosperous condition at this time as most of the other towns of the period may be seen from the following extract, taken from the "History of Worcester County," published in 1793 by Rev. Peter Whitney, of Northborough. This reverend author says, "It may be styled a rich town, for they are not only clear of debt, but have several hundred pounds in their treasury. There are sure indications of wealth and prosperity among them. Here are some large and good farmers as perhaps anywhere in the country, who keep large stocks of cattle. The people raise all kinds of country produce, especially beef, pork and grain, butter and cheese; vastly more than they consume, and carry more into the market, perhaps, than any town of its size and numbers." Previous to 1808 it is said that not less than three thousand bushels of rye, with not less than the same quantities of corn and oats, were produced; and during the

winter seasons the farmers carried large quantities of rye meal to Boston, for which they received \$1.25 per bushel. Large quantities of cider were annually made, and at this time there were not less than thirty cider-mills in the town.

The division of the town into parishes did not, however, restore the harmony expected, and much opposition was continually manifested between the two sections of the town until 1807, when a petition, signed by Ezra Beaman, Jonathan Plympton, Paul Goodale and William Fairbank, as agents in behalf of the parish in Boylston, Holden and Sterling, was presented to the General Court, asking that body that "they might be incorporated into a District by some proper name and vested with all the powers and privileges which by law appertained and belonged to districts." This petition was received by the General Court January 23, 1807, and referred to the committee on towns, who thereupon reported an order that the petitioners serve the towns interested in the proposed district with a copy of the petition and order at least fifty days before the first Tuesday of the first session of the next General Court, which date was assigned as the time for the hearing of the petition and any remonstrances that might be brought against it. In reply thereto, Captains James Longley and Robert Andrews and Aaron White, Esq., appeared as agents on the part of the town of Boylston, and protested against the prayer of the petition, provided the proposed district was to be annexed to the town of Boylston. Another remonstrance against annexation was also presented to the Legislature by Jonas Temple and sixty-one others. Some time afterwards the agents of the town and precinct met and signed articles of agreement, the first of which was that "the precinct might be incorporated into a town," and January 30, 1808, an act passed the General Court to that effect, and the Second Precinct of Boylston, Holden and Sterling became a town by the name of West Boylston.

The history of the town of Boylston during the first century of its existence was, like that of most country towns of its size and situation, quiet and uneventful. As a part of Shrewsbury it took an earnest and active part in the events of the Revolution, and, with the exception of a very few, its inhabitants were ardent patriots and well-wishers for the independence of the colonies; and the North Precinct of Shrewsbury sent its full quota of soldiers into the Continental service. The town of Boylston was well represented in the War of 1812, and on its town records are spread some able memorials and papers relating to national affairs for the period between 1790 and 1812. It sent eighty soldiers into the War of the Rebellion, which was a surplus of one over all demands made upon it, one of whom was a commissioned officer. The first recorded action of the town relating to the war was taken April 29, 1861, when it was voted that "whereas the President has called upon the loyal States for

men to defend the integrity of the Union, therefore, it was the duty of all good citizens, forgetting all past differences, to rally and unite as one man to sustain the government and put down rebellion." A committee consisting of Captain Lambert Lamson, A. W. Andrews, and David T. Moore were chosen to consider the matter of providing uniforms for all persons in the town who should volunteer to form a military company, and that each volunteer should be furnished with a Colt's revolver and bowie-knife and be paid one dollar a day by the town while in the United States service and one dollar for every half-day spent in drilling previous to being mustered into service. It was also voted to raise the sum of two thousand dollars to carry above objects into effect. July 28, 1862, the town voted to pay a bounty of one hundred and five dollars to each volunteer who should enlist before the 5th of August to fill the quota of the town. August 25, 1862, this bounty was increased to one hundred and twenty-five dollars. August 15, 1864, the town fixed the sum of one hundred and twenty-five dollars as the bounty to be paid each volunteer enlisting to the credit of the town. The amount of money expended by the town for war purposes, exclusive of State aid, was ten thousand six hundred and fifty-seven dollars. The amount of money paid for State aid during the war to soldiers' families, and repaid by the Commonwealth, was \$6520.46.

At the annual town-meeting in March, 1886, the town voted to celebrate the one hundredth anniversary of its incorporation, and a sum of money was appropriated to carry this vote into effect. At a special meeting in month of April following the proper committees were chosen to carry out the proposed centennial gathering. The 18th of August was selected as the date. The day proved unusually pleasant and the features of the celebration were most successfully carried out. Very many of the residences in the town were elaborately and appropriately decorated and it was estimated that nearly five thousand people were present. A salute of one hundred guns was fired by Battery "B," Light Artillery, Massachusetts Volunteer Militia, under Captain Fred. W. Wellington. The music was furnished by the Worcester Brass Band. The address was given by Henry M. Smith, Esq., of Worcester, Mass., a son-in-law of Rev. Wm. H. Sanford, a former pastor of the Boylston Church, and the poem was read by Hon. William N. Davenport, of Marlborough, a native of the town. Hons. Phineas Ball and Charles B. Pratt, both ex-mayors of Worcester and natives of the town, were respectively president and chief marshal of the day. An interesting feature of the occasion was the presentation of a tablet erected in the town hall to the memory of the soldiers who fell in the War of the Rebellion by George A. Cotting, Esq., of Hudson, a former citizen of the town. This tablet is of Italian marble and bears the following inscription in gilt letters:

## THIS TABLET,

erected on the One Hundredth Anniversary of Boylston, by George A. Cotting, is in commemoration of the valor of its citizens who died in the great civil war of 1861, to preserve the unity of our country.

John R. Roberts, private, Co. K, 2d Regt. Mass. Vols.; killed at battle of Cedar Mountain, Va., Aug. 9, 1862; æ. 25 years. He was the first soldier enlisted from Boylston.

Elliot J. Flagg, private, Co. I, 4th Regt. N. Y. Vols.; killed at battle of Antietam, Md., Sept. 17, 1862; æ. 23 years.

James H. Wilson, private, Co. I, 21st Regt. Mass. Vols.; died of wounds at Fredericksburg, Va., Dec. 15, 1862; æ. 28 years.

Albert Hastings, private, Co. E, 21st Regt. Mass. Vols.; died at Camp Nelson, Ky., April 12, 1864; æ. 24 years.

John W. Partridge, private, Co. D, 25th Regt. Mass. Vols.; died at Andersonville, Ga., May, 1864; æ. 29 years.

George W. Brewer, corporal, Co. D, 25th Regt. Mass. Vols.; killed at Cold Harbor, Va., June 3, 1864; æ. 23 years.

Watson Wilson, private, Co. I, 36th Regt. Mass. Vols.; died of wounds at Washington, D. C., June 28, 1864; æ. 22 years.

John M. Forbes, sergeant, Co. C, 34th Regt. Mass. Vols.; died at Salisbury, N. C., Sept. 27, 1864; æ. 25 years.

Ferdinand Andrews, corporal, Co. D, 25th Regt. Mass. Vols.; died at Boylston, Mass., Nov. 26, 1864; æ. 25 years.

George C. Flagg, private, Co. F, Mass. Vols.; in Mexican War; at U. S. Hospital Barracks, New Orleans July 26, 1848; æ. 24 years.

AUGUST 18, 1886.

## CHAPTER CXX.

## BOYLSTON—(Continued.)

## ECCLESIASTICAL HISTORY.

THE church was gathered on the 6th day of October, 1743, Rev. Mr. Cushing and the church in Shrewsbury assisting, in obedience to a request from Deacon John Keyes and twelve others. The precinct made choice of Mr. Ebenezer Morse to settle over them in the Gospel ministry. They agreed to give him £400 (old tenor) settlement and £160 (old tenor) annual salary, for the first two years, and £5 (old tenor) additional every year until his salary should reach £180 (old tenor), provided that Mr. Morse should, when so desired, give to the precinct a quitclaim of the ministerial lands that were in the North precinct.

These terms were not satisfactory to Mr. Morse, and at another meeting it was voted to increase his salary £10 per year for the first two years till it became £200 (old tenor) a year, and so to be higher or lower, as the price of provisions should rise or fall; allowing, at that time, wheat to be twenty shillings per bushel, rye fifteen shillings, Indian corn ten shillings, oats six shillings in the North Precinct of Shrewsbury, and pork eighteen pence per pound and beef eleven pence per pound in Boston.

These terms were accepted by Mr. Morse, and he was ordained on the 26th day of October, 1743. It is said that at the time of the ordination the meeting-house was in an unfinished condition and had neither pulpit nor pew, nor floor laid, and neither windows nor doors.

Rev. Mr. Morse's connections with the people appear to have been harmonious until the beginning of

the Revolutionary period, when he and a few of his friends became royalists, and they were called to an account by the town of Shrewsbury, disarmed and forbidden to leave the limits of the precinct. This so excited the indignation of his parish, the majority of whom were patriots, that a meeting was called, early in the year 1771, to take into consideration the difficulties existing between them. At this meeting they voted, by a division of thirty-seven yeas to twelve nays, that the pastoral relations should be dissolved, and a committee, consisting of Daniel Whitney, Nathaniel Davenport, Jonas Temple, Frederick Albert and Silas Howe, were chosen to inform Rev. Mr. Morse that he was dismissed, and take measures to see that he did not enter the pulpit again as their minister.

The matters between pastor and people remained in an unsettled condition for some time longer, until finally the church voted to call an ecclesiastical council, which assembled and advised the precinct to reconsider their former vote dismissing Rev. Mr. Morse, which was done, and then, after a protracted sitting, dissolved the pastoral relations. Rev. Mr. Morse remained in the town, occasionally preaching to a few of his friends, until his death, January 3, 1802, at the age of eighty-three years and nine months. He was a native of Medfield, and was a son of Hon. Joshua Morse. He graduated at Harvard College, 1737. Soon after his settlement here he married Persis, daughter of John Bush, with whom he lived thirty-three years. He was a man of unusual ability, and, previous to his settlement, had studied law, with a view of entering that profession. He afterwards studied medicine and practiced that profession in connection with his ministerial work and after his dismissal. He also fitted many students for college; among the number was the late Rev. Dr. Thaddeus Harris, of Dorchester, Mass.

After the dismissal of Rev. Dr. Morse the church remained without a pastor a little more than a year, when a call was extended to Mr. Jesse Reed to settle with them. This call he declined, and, although urged to become their pastor, remained firm in his decision. In the following October the church invited Mr. Eleazer Fairbanks to become their minister, and he was ordained March 27, 1777.

The council met on the 26th of March, and that day was spent in hearing Rev. Dr. Morse's objections to his settlement, which were overruled, and he was ordained on the following day. His salary and settlement were the same as had been offered to Mr. Reed, viz.: £66 13s. 4d. salary, and £133 6s. 8d. settlement. His salary was afterwards increased to £70, and his settlement £180. Just previous to his settlement the church voted to dispense with the Half-way Covenant, so-called, and during his ministry important changes were made in the manner of conducting church music. During this time also the North Precinct of Shrewsbury was incorporated into the town

of Boylston; and the erection of a new meeting-house was undertaken, the location of which was the subject of a great controversy; several committees were chosen, both from this town and the neighboring towns. The town was surveyed to find the centre or in some way to fix upon a spot that would be satisfactory, but without success. Finally, upon the recommendation of a committee consisting of Nathaniel Longley, Esq., of Bolton, General John Whiting, of Lancaster, and Abraham Monroe, of Northborough, the location where the Centre School now stands was selected, and the meeting-house was completed in 1793, and the present Common purchased of the heirs of Eleazer Taylor and Colonel Jotham Bush. In December, 1792, Rev. Mr. Fairbanks asked his dismissal, which the church refused to grant, but afterwards consented, and he was dismissed April 23, 1793, after a pastorate of over sixteen years. He was born in Preston, Conn.; graduated at Brown University in 1775; he married Sarah, daughter of Deacon Amariah Bigelow, and after his dismissal removed to Wilmington, Vt., and then to Palmyra, N. Y., where he died in 1821.

November 1, 1793, the church voted to invite Mr. Hezekiah Hooper, of Bridgewater, to settle over them according to the Cambridge Platform. This call was concurred in by the town and accepted by Mr. Hooper. In the month of February previous to his ordination the church observed a day of fasting and prayer, and, in accordance with the usual practice of the times, invited several of the neighboring clergymen to unite with them and assist on the occasion. Rev. Drs. Reuben Puffer, of Berlin, Joseph Sumner, of Shrewsbury, Nathaniel Thayer, of Lancaster, Reuben Holcomb, of Sterling, and Rev. Peter Whitney, of Northborough, were present. They convened February 6, 1794, and were met by Rev. Mr. Morse, and an attempt was made to adjust the difficulties between him and the church. It was a delicate and difficult affair, and whatever may have been the result of the council, it is certain that the matter was not fully settled until some time after the ordination of Rev. Mr. Hooper. At the same time important changes were made in the church covenant, and the practice of receiving members on the Half-way Covenant, so-called, was renewed, which practice continued for more than twenty years afterwards.

The ordination of Mr. Hooper took place on the 9th of March, 1794; the churches in Shrewsbury, Northborough, Bridgewater, Holden, Sterling, Berlin, Marlborough and Lancaster assisted in the ordination. The council convened at the house of Deacon Daniel Andrews, and organized with Rev. Dr. Joseph Sumner, of Shrewsbury, as moderator, and Rev. Dr. Reuben Holcomb, of Sterling, as scribe. The inhabitants of the westerly portion of the town presented a paper to the council, signifying their intentions to form a new religious society by themselves, and manifesting their perfect neutrality in the proceedings of

the council and in the choice of a minister. A remonstrance was also presented by Rev. Mr. Morse and his adherents "against any person being ordained over him or the church, until he had been regularly heard in an ecclesiastical council, as he presumed he had never had a regular dismission." The first of these two papers was the result of the controversy between the two sections of the town in relation to the location of the meeting-house then recently erected, and is the first intimation on the church records of the intention of the inhabitants of the westerly portion of the town to form a separate church and precinct. The council, having voted that they considered neither of these papers as any bar to the ordination, proceeded to the public exercises of the ordination. When Rev. Mr. Hooper began his labors the church consisted of one hundred and eighteen members. His salary was £115 per year. He was a young man of much talent, and gave great promise of success in the work of the ministry.

The discordant elements in the church were united. Rev. Mr. Morse and his adherents returned and became members of his congregation, and he received the harmonious support of the church and town. His ministry, was, however, brief, failing health forced him to relinquish the duties of the pastorate and he returned to his friends in Bridgewater, where he died of consumption, December 2, 1795, having been the minister of this people one year, nine months and twenty-five days. During his pastorate he received into the church fifteen members on confession of faith and five by letter from other churches. Agreeably to the desires of the deacons of the church and the selectmen of the town, the 24th day of December, 1795, was set apart and observed as a day of fasting and prayer, that the death of Rev. Mr. Hooper "might be sanctified to the church and town, and the church and town might be directed to the choice of an able minister to settle with them in the work of the ministry."

After the death of Rev. Mr. Hooper several candidates were heard and several meetings were held to take action in regard to the settlement of his successor. On the 19th of September, 1796, the church made choice of Mr. Ward Cotton, of Plymouth, to settle with them, which choice was concurred in by the parish by a large majority, and the same salary granted him as was paid Rev. Mr. Hooper, viz., one hundred and fifteen pounds per year. This call was accepted by Mr. Cotton and he was ordained June 7, 1797.

The following October the church assisted in the ordination of the Rev. William Nash as the first minister of the Second Precinct. The town was now divided into two precincts, each having its own church and minister; this necessarily lessened the First Precinct in numbers and strength, but had the effect of restoring harmony to the two sections of the town, a result which could hardly have been hoped

for had both parishes remained together, and Mr. Cotton found himself the pastor of a church united both among themselves and in him as their minister. Mr. Cotton continued as the minister of the town twenty-eight years, until June 22, 1825, when he was dismissed by a mutual ecclesiastical council. His pastorate during nearly its entire period was characterized by a high degree of harmony.

In the early part of his ministry he inaugurated some important changes in the church policy and discipline, and in 1817 the custom of receiving members on the Half-way Covenant was discontinued. In 1818 the present Sabbath-school was organized. The only breach of harmony, which seemed to have occurred during his early ministry began about 1810, when several of the members of the church withdrew and united with the Baptist denomination. A church and society called the Shrewsbury and Boylston Baptist Society, was organized in 1812, holding services alternately in the two towns, and the following year, 1813, a church building was erected in Shrewsbury twenty-five by thirty-two feet, at a cost of four hundred and fifty dollars, and Rev. Elias McGregory was ordained, in 1818, as its regular pastor. This church soon became divided, and the services were afterwards occasionally continued in Boylston, Rev. Henry Archibald and others officiating.

During the ministry of Rev. Mr. Cotton ninety-eight members were added to the church in full communion; there were also four hundred and one baptisms, three hundred and sixty-five deaths and one hundred and sixty-seven marriages in the town, exclusive of those who were married by justices of the peace. After his dismissal Rev. Mr. Cotton preached for some time to a congregation of his friends and adherents at the Town Hall, and continued to reside in the town until his decease, November 15, 1843, at the age of seventy-four years.

Rev. Mr. Sanford says of him: "As a man, Mr. Cotton was amiable, with strong sympathies for those who were in affliction, obliging in his disposition, took pleasure in conferring favors and never sought to give unnecessary pain and trouble to those around him." He took a deep interest in the affairs of the town and especially in the education of the young. He was for many years a member of the School Committee, and for eight years represented the town in the General Court. He was a son of Rev. John Cotton, of Plymouth, and was born there March 24, 1770. He graduated from Harvard College in 1793. He descended from a line of ministers, illustrious in the religious annals of New England. His father graduated from Harvard College and was settled as the first minister in Halifax, Mass., in 1735, where he remained until 1756, when he resigned on account of ill health and returned to his native town of Plymouth, where he was chosen register of deeds for Plymouth County, in which office he died. His grandfather was Rev. John Cotton, Jr., born March 15, 1640, gradu-

ated at Harvard College 1657, and preached first at Wethersfield, Conn., and from 1664 to 1667 to a congregation of Indians and white people at Martha's Vineyard. He was settled as the minister at Plymouth June 30, 1669, and remained there until October 5, 1697, when he went to Charleston, S. C., and gathered a church there, of which he was the pastor until his death, September 18, 1699. His church erected a handsome monument over his grave. He was distinguished for his knowledge of the Indian language and the whole care of correcting and revising the second edition of Elliott's Indian Bible, published at Cambridge in 1685, was entrusted to him. His great-grandfather was the distinguished Rev. John Cotton, minister of the First Church in Boston.

After the dismissal of Rev. Mr. Cotton the church remained without a pastor for nearly a year, when, after having heard several different candidates, the church, by a unanimous choice, determined upon Mr. Samuel Russell. This choice was concurred in by the parish by a large majority and a call was extended to Mr. Russell to settle with them in the Gospel ministry at a salary of five hundred dollars per year. This call was accepted, and on the 21st of June, A.D. 1826, Mr. Russell was ordained by a council selected by mutual agreement. The examination of Mr. Russell was vigorous, the council frequently assuming the appearance of a heated theological discussion and "in it," says Rev. Mr. Sanford in his anniversary sermon, preached on the completion of the twentieth year of his settlement, in 1853, "were represented all the isms that distracted the Congregational churches of Massachusetts at that time," which was a peculiar crisis in the religious history of New England, and especially in Massachusetts, the condition of this church and people being similarly disturbed with the other Congregational Churches of all this region, and, in fact, through the whole of the New England States, by the conflicting doctrines which had for some years divided their harmony. Some of the church and parish looked for a new pastor from the liberal school, while others were more in sympathy with Calvinist doctrines. These conflicting doctrines and the lack of harmony resulting therefrom had been the cause of the severest trials during the last years of Mr. Cotton's ministry. His dismissal had by no means removed them and it was hardly within the bounds of possibility or reason that the next pastor should unite them. To this arduous and difficult task Mr. Russell had been called. He was at the time of his ordination twenty-seven years of age, having been born at Bow, N. H., September 24, 1799. He was the eldest child of his father's family and had early been intended for the ministry, and at the age of fifteen years had united with the church in Dunbarton, N. H., of which the Rev. Dr. Harris was then pastor. He was graduated at Dartmouth College in the class of 1821 and from the Andover Theological School in 1824. Soon after coming to Boylston he was united in marriage

to Miss Mary J. Howe, daughter of Rev. Nathaniel Howe, of Hopkinton, Mass. His religious faith and teachings when he entered upon his ministry agreed essentially with the Shorter Catechism of the Westminster Assembly. During his pastorate here the church covenant was changed and the present articles of faith adopted, to which all who should unite with the church in the future should be required to give assent, and to a large extent the entire policy of the church was changed.

While this same controversy was going on in the Congregational Churches of Eastern Massachusetts, the Evangelical Churches of New England experienced one of the most powerful revivals of religion which had been felt since the time of Rev. George Whitefield. This revival was felt in the Boylston Church, and many were added to its membership.

During Rev. Mr. Russell's ministry in Boylston one hundred and four persons were added to the church—ninety-nine on profession of faith and five by letter from other churches. There were also one hundred and nineteen baptisms, twenty-five marriages and sixty-three deaths in the town. February 13, 1832, Rev. Mr. Russell, by letter, requested his dismission, which was granted by the church and parish, and on the 17th of the following April the pastoral relations were dissolved. His ministry in Boylston covered a period of five years, nine months and twenty-six days. Soon after leaving Boylston he received a call to the church in Norwich, in this State, where he was installed September 5, 1832, and where he remained sustaining the most harmonious relations with his people until his death, which occurred from consumption, Jan. 27, 1835, at the age of thirty-five years. Rev. Dr. John Todd, of the Edwards Church at Northampton, in his sermon preached at the funeral of Mr. Russell, says of him: "In his manners and appearance he was simple, unaffected and kind. His judgment was clear, sound and discriminating. As a husband, a friend, a pastor and a brother he was respected and beloved. As a preacher he was plain in manner and plain in matter, but he was uniformly judicious and practical."

On the 9th of August, 1832, the church and parish, by a unanimous vote, invited Mr. William H. Sanford, of Belchertown, to become its pastor at an annual salary of five hundred dollars. This offer Mr. Sanford accepted, although at great personal sacrifice, and on the 17th of October, 1832, was ordained as their pastor. At the time of his ordination the church consisted of one hundred and forty-eight members. Soon after assuming the pastorate the present church edifice was erected, and was dedicated December 10, 1835. So harmonious was the condition of the church and society at this time that only eight parish meetings were held for the purpose of transacting the business connected with the erection of the house. When the first house of worship was erected, in 1742, not less than fourteen precinct meet-

ings were needed for completing the house, and the erection of the second house, in 1791, was the cause of about twenty town-meetings and a subsequent division of the church, parish and town. During twenty years of Rev. Mr. Sanford's pastorate, from 1832 to 1852, one hundred and thirty-five members were added to the church. There were also one hundred and forty-five baptisms, ninety-one marriages and two hundred and fifty deaths in the town. He had also preached one thousand and twenty-eight Sabbaths. He was dismissed on account of ill-health, September 15, 1857, after having been the pastor of the church a little less than twenty-five years.

Rev. Mr. Sanford was independent and fearless in his manner and preaching, never hesitating to proclaim what he considered to be the truth, and in all his ministrations was greatly beloved by his people. He ever took a deep interest in the affairs of the town, and especially in all matters relating to education. During nearly the entire period of his ministry he served as chairman of the School Committee of the town. In 1857 he represented the town in the General Court. He was a graduate of Harvard College in the class of 1827. Previous to coming to Boylston he married Harriet S., daughter of the late Rev. Ethan Smith, A.M., for some time city missionary of Boston, and the author of several theological works. After the termination of his pastorate in Boylston Rev. Mr. Sanford removed to Worcester, where he engaged in the book and publishing business, which is now carried on by his sons. He died in Worcester, November 27, 1879, aged seventy-nine years, nine months and thirteen days.

After the close of Rev. Mr. Sanford's labors a period of supply intervened, and several clergymen were acting pastors, among them the late Rev. William Murdock, of West Boylston, and Rev. Daniel Wight, afterwards for many years librarian of the Morse Institute at Natick, Mass., until October 17, 1861, when Rev. Abel Hastings Ross, a graduate of Oberlin College, Ohio, was ordained. During his pastorate the country passed through the great Civil War, and Rev. Mr. Ross was away from his parish for some time in the service of the Christian Commission. He was a minister of growing ability, and a talented and eloquent preacher. He resigned to accept a call from the Congregational Church at Springfield, Ohio, and was dismissed from the Boylston Church and Society January 16, 1866. He has been quite prominent in the Congregational denomination, and has received the degree of Doctor of Divinity. He has been for several years Southworth lecturer on Congregationalism in Andover Theological Seminary and special lecturer on Church Polity in Oberlin College. He is now located at Port Huron, Mich. Soon after the close of Rev. Dr. Ross' pastorate Rev. Andrew Bigelow, D.D., became the acting pastor of the church, and remained here until April, 1873. During his service the interior of the church was re-

*Andrew Bigelow*

paired and improved by the addition of a fine organ. Rev. Dr. Bigelow was a native of the town, and the son of Andrew<sup>1</sup> and Lydia Bigelow. He fitted for college at the Amherst Academy, under the care of Rev. Dr. Cotton, and graduated at Amherst College in 1838 in a class of forty-two members, nineteen of whom became clergymen. Before entering the ministry he was for two and a half years principal of Rochester Academy, Mass. He read theology with his brother, Rev. Jonathan Bigelow, and Rev. Dr. Thomas Robbins; was licensed by the Old Colony Association, and ordained over the church at South Dartmouth in 1841. He afterwards was settled at West Needham, West Hampton and Medfield, where he remained eleven years. His pulpit and parish labors were characterized by soundness of theology, spirituality of discourse, and boldness in proclaiming what he thought to be the truth. He took a deep interest in all educational matters, and served during nearly all of his residence here as chairman of the School Committee, and labored earnestly to bring the schools to a high standard. He was twice married—first to Emily Louisa, daughter of Hon. William Blackler, of Marblehead, who died at Medfield July 4, 1857, and second to Nancy J., daughter of Hon. Marshall P. Wilder, of Boston. After finishing his labors here he removed to Southborough, Mass., where he died September 23, 1882, at the age of seventy-two years, nine months. In his will he made provisions for the benefit of the Boylston Church. From April, 1873, to October 1, 1877, the pulpit was supplied by Rev. W. H. S. Packard and Rev. Francis F. Williams, and in 1873 the present parsonage was erected. October 1, 1877, Rev. Henry S. Kimball became the acting pastor, and remained until April, 1882. During this period the church debt was paid, largely by J. Avery White, Esq., of Framingham, Mass., and Thomas W. White, Esq., of Brooklyn, N. Y., sons of the late Aaron White, of this town, John B. Gough, Esq., and family, and Rev. Dr. D. O. Mears and others of Piedmont Church, Worcester. During this time, also, a deep religious interest took place.

April 29, 1884, Rev. Israel Ainsworth was installed as pastor, and remained until Sept. 21, 1887, when he was dismissed at his own request. He is now the pastor of the Congregational Church in South Peabody, Mass. Rev. Mr. Ainsworth is a native of England and came to this country about 1870, at the age of eighteen years, and had been for two years previous to that time a preacher in England in fellowship with the Methodist denomination. In 1875 he entered the regular ministry among the Methodists in the New Hampshire Conference, and for the last two years previous to coming to Boylston was pastor of the church in New Boston, N. H. On his change of denominational connection he became a member of the

Congregational Church at Amherst, N. H. He is a man of fine talent, and of independent thought and action, and a pleasing and eloquent speaker. During his pastorate the church building was repaired and thoroughly painted and beautified, and a neat and commodious barn erected for the parsonage by the young people of the parish. Many additions were made to the church membership and a large and flourishing society of the Young People's Christian Endeavor was organized. Rev. Austin Dodge, a graduate of Amherst College, 1861, and of the Andover Theological Seminary, 1866, came in December, 1887, and is the present acting pastor.

The following persons have served as deacons of the church: John Keyes, Esq., and Cyprian Keyes, chosen 1743, and were formerly deacons of church in Shrewsbury; Jonathan Keyes, chosen 1743; Amariah Bigelow to 1779; Levi Moore, 1770–1815; Jonathan Bond, 1779–1793; Jonas Goodenow, 1794–1811; Cyrus Houghton, 1794–1797; Daniel Andrews, chosen 1794; Jonathan Bond, Jr., 1797–1821; Joshua Stiles, 1809–1828; Rob't Andrews, Jr., 1821–1829; Abijah Flagg, 1829–1837; Dr. John Andrews, 1829–1837; Wm. H. Moore, 1837–1846; Jotham Bush, Jr., 1837–1844; Simeon Partridge, 1844–1865; Henry H. Brigham, 1846–1888; Harvey A. Stowell, 1867–1877; Preston P. Lane, 1877–1881. Lyman S. Walker, chosen 1876, and A. V. R. Prouty, chosen 1888, are the present officiating deacons. Of all the persons holding the office, Deas. Levi Moore and Henry H. Brigham held it for the longest period, about fifty years each. At the time of his death, June 19, 1888, Dea. Brigham had been town clerk for thirty-eight years and parish clerk for fifty years, and had represented the town twice in the General Court. He was a man of great usefulness, and in all his long service to both town and church labored with untiring zeal for their best interests.

## CHAPTER CXXI.

### BOYLSTON—(Continued.)

#### PROMINENT PERSONS, COLLEGE GRADUATES, ETC.

THE town of Boylston has sent forth many men of ability and influence who have honored the several professions and stations in which they have been called to act. Among the most prominent citizens of the Shrewsbury North Parish during the dark period of the Revolution, and one who afterwards became one of the prime movers for the incorporation of the town of Boylston and finally was influential in the separation of that town and the incorporation of the town of West Boylston, was Major Ezra Beaman. He was born October 16, 1736, in Lancaster, in that portion of the town which two years later became the town of Bolton. He came with his father, Capt. Jabez Beaman, in 1746 to that part of the Shrewsbury North

<sup>1</sup> Andrew Bigelow was a soldier of the Revolution, and the father of fifteen children, three of whom became ministers.

Precinct that is now included within the limits of West Boylston. Upon the death of his father in 1757 the homestead estate came into his possession, and upon it he resided until his death, June 4, 1811. Thus it may be said of him that he resided successively in the towns of Shrewsbury, Boylston and West Boylston without changing his place of residence. During the Revolution he was an ardent patriot and was continuously in the military service of the colonies. He repeatedly served the towns of Shrewsbury, Boylston and West Boylston in their most important town offices. A more extended sketch of his life will probably be given in the historical sketch of West Boylston. Among the most prominent of the citizens of Boylston soon after the incorporation of the town, and who were zealous opposers of Major Beaman in the separation of the parishes in 1795 and the ultimate division of the town in 1808, were James Longley and Aaron White, Esqs. James Longley, Esq., settled in Boylston soon after the close of the Revolution. He was a native of Shirley, in this State, and the son of a large family. At an early age he was apprenticed to a carpenter to remain until he should have reached the full age of twenty-one years. Under this master he received harsh and severe treatment, was coarsely and inefficiently clad and kept constantly at work without obtaining a single day's schooling. After obtaining his freedom he secured a teacher and began to study, and by patient effort gained such an education as enabled him afterwards to take an honorable and useful station in life. He served throughout the Revolutionary War in the service of the colonies, first in the marine, or privateering service, and afterwards with the land forces and was present at the battle of Saratoga, and also took an active part in the Shays' War. After coming to Boylston he was continually called upon to assume an active part in the affairs of the town; was captain of militia, magistrate and held almost every town office, and served as representative to the General Court for thirteen consecutive years. His family, like many other early Boylston families, were of honorable English extraction, and of high standing in Church and State. Several were clergymen of the Established Church, and one of whom became Bishop of Durham, Cardinal and Lord Chancellor. The ancestor of the American branch of the family embraced the Puritan doctrines, and came to New England, where he married a sister of Thomas Goffe, Deputy Governor of the Massachusetts Bay Colony.

Aaron White, Esq., was born in Roxbury June 9, 1771. His early education was such as the common schools of Roxbury afforded one hundred years ago. Evincing a fondness for reading, he had access to the old Boston Public Library, by the means of which he stored his mind with a good knowledge of English history and literature. At the age of twenty-one years, in 1792, he opened a store in the easterly part of Holden. There he remained five years, until 1797, when he removed to Boylston and engaged in

the tavern and store business, and afterwards in the store business alone, keeping a general country store until within a few years of his death, in 1847. He served for many years as a magistrate and in nearly all the town offices, and for several years represented the town in the General Court.

In 1798 he married Mary, daughter of Rev. Dr. Joseph Avery, of Holden, and by whom he had a large family of children, all of whom lived to grow up and have been very successful in the business, professional and other stations to which they have been called.

Among the natives and others who have received a liberal or professional education the following have honored the ministry :

MINISTERS.—Rev. Jonathan Bigelow, son of Andrew and Sarah (Fassett) Bigelow, graduated from Brown University in 1817, and at Andover Theological Seminary in 1820; married Eliza Tappan, a sister of William Tappan, the poet, and herself a ready writer. He was ordained and settled July 11, 1821, at Lubec, Me., where he remained until 1826. From 1827 to 1849 he was settled at Rochester, Mass., and at Euclid, Ohio, from 1850 until his death, which occurred January 26, 1854, at the age of sixty-one years. Rev. Ashael Bigelow, also a son of Andrew Bigelow, graduated from Harvard College in 1823, and subsequently from Andover Theological Seminary; he was ordained over the Congregational Church in Walpole, Mass., March 28, 1823, and, in 1850, was installed at Hancock, N. H., where he died August 16, 1817, after a pastorate of twenty-five years, and a ministry of forty-nine years. Rev. Andrew Bigelow, Jr., D.D., brother of above, was for several years the acting pastor of the Boylston Church. A sketch of his life appears in connection with the history of the church. Rev. Jonathan Longley, son of James Longley, Esq., entered Harvard College in 1812, but was forced on account of ill health to leave the University before completing his course. He studied theology with Rev. Nathaniel Emmons, D.D., and resided at Northbridge, where he died January 26, 1850.

Rev. John Flagg graduated at Harvard College 1816; ordained pastor of the Second Church in Roxbury February 2, 1825; died March 14, 1831, aged forty-one years.

Rev. William J. White, son of Aaron White, and a graduate of the Andover Theological Seminary, was ordained September 20, 1842, and is now residing in Worcester.

Rev. William D. Flagg graduated at Amherst College 1853; died 1859, at the age of thirty years.

Rev. William W. Whipple, A.M., graduated at Amherst College 1841, and is now settled at Yonkers, N. Y.

Rev. Frank D. Sanford, son of Rev. Wm. H. Sanford, is a widely-known Evangelist.

Rev. George S. Ball, of Upton, a well-known

Unitarian clergyman of Worcester County, and chaplain of the Twenty-first Regiment Massachusetts Volunteers during the War of the Rebellion and an ex-member of the Massachusetts Senate, is also a direct descendant of a Boylston family.

**LAWYERS.**—Hon. Asa Andrews, A.M., graduated at Harvard College 1783, studied law, and settled at Ipswich, Mass., where he was appointed by President Washington collector of the port, which office he held for over thirty years; he died in 1856. Mathew Davenport, Esq., graduated at Harvard College 1802, studied law and settled on the homestead of the family in Boylston, where he died in 1860. He was the author of a "Historical Sketch" of Boylston, published in 1830. James Sawyer, Esq., graduated at Brown University 1814, studied law and settled in Texas, where he died in 1823.

Aaron White, Jr., Esq., graduated at Harvard College 1817, studied law and settled first in Rhode Island, where he took an active part in the "Dorr's Insurrection." He afterwards settled in Connecticut and in Dudley, in this county. He died in Connecticut in 1887.

Thomas W. White, Esq., brother of above-named, studied law, and is now engaged in business in Brooklyn, N. Y. Hon. William N. Davenport studied law at the University of Michigan and at Hudson, Mass., and is now engaged in practice at Marlborough, Mass., which place he represented in the General Court in 1885-86, and has just been elected to the Massachusetts Senate. Asa Wellington, Esq., who studied law and practiced in Boston, is now residing at Quincy, Mass.

Among the physicians of the town have been Drs. Abraham Howe, who died October 19, 1779, aged twenty-one years; Amariah Bigelow, Jr., Uriah Bigelow, Eliakim Morse, son of Rev. Ebenezer Morse, M.D., who afterwards settled in Watertown, and died at the age of nearly a century; Samuel Brigham, Seth Knowlton, Thaddeus Chinnery, William Davenport, who died at Boston in 1816, aged twenty-two years, and John Andrews. The latter was the physician of the town for forty years, and a man of much influence and prominence in the civil, parish and church relations of the town. William S. Bigelow, M.D., graduated at New York Homœopathic Medical College 1884, and is now located at Phillipsburg, Pa. Charles A. Stearns, A.B., M.D., graduated at Amherst College 1881, and Harvard Medical School 1884, and is now located at Pawtucket, R. I. Dr. Fred Bigelow, now located in Maine. Rev. Ebenezer Morse, A.M., M.D., the first minister of the town, united in himself the three-fold offices of minister, lawyer and physician. Among others who have gone from the town and held prominent positions elsewhere should be noticed James Longley, Jr., who settled in Boston, where he was well-known in the hotel business, and afterwards largely connected with several manufacturing inter-

ests. He was twice elected an alderman of the city of Boston. In 1863 he gave the sum of five hundred dollars to the town for the benefit of the Old Cemetery.

Hon. E. Hastings Moore, of Athens, Ohio, for several years a member of Congress from that State.

The late Major-General Aaron Sawyer Gibbs, once prominent in the military circles of Massachusetts and New York, and the late General Lysander Flagg, a prominent capitalist and business man of Rhode Island, and formerly quartermaster-general of that State.

Hon. Phineas Ball, of Worcester, is a native of the town. He served the city of Worcester in 1865 as mayor, and was for many years city engineer. He is a well-known civil engineer, and for many years a partner of Elbridge Boyden, which firm built Mechanics' Hall, Worcester, Taunton Insane Hospital and the jails at Greenfield and Fitchburg. He planned and constructed the water-works at Worcester, Springfield and other places. He is now president of the Union Water-Meter Company. Hon. Charles B. Pratt, mayor of Worcester in 1877-78-79, is emphatically a Boylston man, coming to the town when very young. His early years were spent here. Mr. Pratt has been city marshal, alderman and, in fact, has held nearly all the city offices, and in 1859 represented the city of Worcester in the House of Representatives, and has since been a member of the State Senate. He is now president of the First National Fire Insurance Company.

Hon. Charles G. Reed, ex-mayor of Worcester, is also a descendant, on his mother's side, of another Boylston family. Boylston has sent many men of influence and note into the city government of Worcester. Hardly a year has elapsed since Worcester became a city, but what the town has been represented to a greater or lesser extent. It has also many representatives among the successful business men of the city.

For more than forty years this town was the chosen home of John B. Gough, the distinguished temperance orator, lecturer and philanthropist. Coming here in 1843, Mr. Gough married Miss Mary G. Whitcomb, and purchased a large tract of land, situated midway between Boylston and Worcester, where he erected large and fine buildings, constructed the finest avenues through his grounds, planted thousands of fruit and ornamental trees and developed his beautiful homestead of "Hillside," the mansion of which he filled to repletion with the bric-a-brac of all climes, and with a magnificent library of the choicest works, and one of the finest and most valuable private collections in America. To this beautiful home Mr. Gough came for recuperation and rest after his extended and successful lecture tours through this country and abroad, and here he delighted to gather about him the most distinguished and cultured of both continents.

The story of Mr. Gough's remarkable life is so well known to all, that an extended notice of it hardly seems necessary here. A brief sketch of it is, however, appended. He was born at Sandgate, England, a romantic little watering-place, about ten miles from Dover. His father was a veteran of the Peninsular War, and his mother was a schoolmistress of the village. When about six years of age he was sent to a seminary at Folkstone, two or three miles from Sandgate. About this time, attracting the attention of the visitors at the little watering-place, he was often sent for to read to the ladies and gentlemen gathered at a small reading-room in the place.

In 1829, when twelve years of age, he came to America with a family from Sandgate. He reached New York, after a voyage of fifty-four days, and soon after removed, with the family, to a farm in Oneida County, in that State. After remaining here two years, he went to New York City, where he entered the Methodist Book Concern as an errand boy and apprentice to the book-binding trade. After this followed the dark and discouraging period of his life, during which he drifted about to different places,—first to Bristol, R. I., then to Providence, R. I., and Newburyport, Mass., and finally to Worcester, Mass. This was during the Washingtonian Temperance movement, and, after coming to Worcester, he was induced to take the pledge, and, after a long and desperate struggle, overcame his appetite for strong drink, and entered the work as a speaker. From 1843 until the time of his death not a year passed without his entering the lecture field.

In 1853 he went to England at the invitation of the London Temperance League, and was absent two years, speaking throughout all parts of Great Britain. In Edinburgh alone seventeen thousand people flocked to hear him, and the London Temperance Society gave him a silver dinner service.

In 1877 he again visited Great Britain, and spent three years in England and Ireland, delivering in England alone three hundred and ninety addresses to five hundred thousand people, and secured twelve thousand signatures to the pledge. After his return to America he began to speak on other topics besides temperance. His published works have had a large sale,—one million copies of his lectures have been sold, and over one hundred thousand copies of his autobiography.

On the 1st of January, 1886, he had delivered eight thousand five hundred and sixty-seven lectures and traveled five hundred thousand miles. He was stricken with apoplexy while speaking at Frankford, Pa., and died there February 17, 1886, at the age of sixty-eight years, six months and twenty-six days.

PRECINCT CLERKS—*Shrewsbury North Precinct*, 1742 to 1786.—1742, John Bush; 1843-1748, Deacon Cyprian Keyes; 1749-1755, Daniel Hastings; 1756-1758, Deacon Amariah Bigelow; 1759, Deacon John

Keyes; 1760, 1761, Deacon Cyprian Keyes; 1762-1764, David Taylor; 1765, 1766, Deacon Amariah Bigelow; 1767-1772, Captain Joseph Bigelow, Jr.; 1773, 1774, Thomas Andrews; 1775, 1776, David Taylor; 1777, Deacon Amariah Bigelow; 1778 to December, David Taylor; December, 1778, 1779, 1780, David Goodale; 1781-1785, Dr. Amariah Bigelow.

TOWN CLERKS—*Town of Boylston*, 1786 to 1888.—1786, Lieutenant Aaron Sawyer; 1787-1799, Colonel Jotham Bush; 1800-1818, Aaron White, Esq.; 1819, Pitt Moore; 1820-1824, Aaron White, Esq.; 1825, Captain Eli Bond; 1826-1837, Nathaniel Davenport, Esq.; 1838-1849, John T. Cotton, Esq.; 1850 to June 19, 1888, Deacon Henry H. Brigham; June 25, 1888, Penniman M. Brigham.

REPRESENTATIVES TO GENERAL COURT—*Shrewsbury North Precinct*, 1742 to 1786.—1746, John Keyes, Esq.; 1747, 1749, 1756, 1758, Isaac Temple; 1783, Lieutenant Jonas Temple.

*Town of Boylston*, 1786 to 1888.—1787, 1788, 1792 to 1796 inclusive, Lieutenant Jonas Temple; 1789-1791, Ezra Beaman, Esq.; 1798 to 1810, inclusive, James Longley, Esq.; 1811, 1812, 1813, 1814, Deacon Jonathan Bond; 1815, 1816, 1817, Colonel Jotham Bush; 1818, 1819, 1821, 1822, Aaron White, Esq.; 1827, 1829 to 1835 inclusive, Rev. Ward Cotton; 1837, 1838, 1839, 1840, Captain Eli B. Lamson; 1843, 1844, 1845, John T. Cotton, Esq.; 1848-1880, Henry H. Brigham, Esq.; 1849, Nathaniel Davenport, Esq.; 1851, Captain John Andrews; 1852, Robert Andrews, Jr.; 1854, Oliver S. Kendall; 1857, Rev. William H. Sanford; 1860, Dr. John Andrews; 1863, Horace Kendall; 1869, Henry White; 1874, Henry V. Woods; 1884, Levi L. Flag.

DELEGATES TO CONSTITUTIONAL CONVENTIONS.—1788, Lieutenant Jonas Temple; 1820, Deacon Jonathan Bond; 1853, Rev. Daniel S. Whitney.

## CHAPTER CXXII.

### UPTON.

BY WILLIAM T. DAVIS.

THE territory constituting the town of Upton was occupied before the migration of the white men from the sea-coast to the interior by the Nipmuck tribe of Indians. Before the incorporation of the town, in 1735, it belonged to the towns of Sutton, Uxbridge, Mendon and Hopkinton. Among the first settlers on this territory were John Hazeltine, David Batcheler, Jonathan Wood, Israel Taft, John Sadler, William Johnson, John Bromly, William Green, Benjamin Perham, Samuel Nelson, Stephen Denny, Samuel Watkins, Marshal Baker, Samuel Work, Samuel Reeks, John Warfield, Willson Rawson, Robert Tyler, Matthias Taft, Peter Holbrook, Stephen Tenney and Thomas Palmer. Of these, Matthew Taft

was a settler as early as 1728, having bought his land of Harvard College. This territory included thirteen thousand and ninety-four acres. A portion of it, including about three thousand acres, formed a part of the tract of land belonging to the Hopkins Fund, which, during nearly a hundred years, was a source of trouble and vexation to the inhabitants. Edward Hopkins came from England in 1637, and settling in Connecticut, became its Governor. He returned to England and died in 1657, giving the sum of five hundred pounds out of his estate in New England to trustees, after the death of his wife, to be invested in houses and lands in New England, the income from which should be devoted to the support of students in the grammar and divinity schools at Cambridge, and to the purchase of books to be given to meritorious students at Harvard College. Anne Hopkins, his wife, died in 1698, and after a suit in Chancery the trustees obtained, in 1715, in satisfaction of the legacy, a verdict and payment of five hundred pounds, with interest, amounting to three hundred more. This money was invested in the purchase of Maguncog from the Natick Indians, which, with other lands, finally became the town of Hopkinton, one of the contributors to the township of Upton.

In 1716 the court gave to the Hopkins Trustees the province lands in Hopkinton, swelling their possession to twenty-five thousand acres. About one-half of these acres were leased for ninety-nine years, dating from March 25, 1723, and the remainder were reserved as common lands. Troubles ensued concerning the payment of rent and taxes; the courts and the Legislature were resorted to for relief by both trustees and tenants, and not until 1832 was peace restored. In that year the Legislature agreed to pay eight thousand dollars and the tenants two thousand dollars, and for this consideration the trustees abandoned their claim on the lands.

The territory of Upton is not specially attractive in soil or scenery. Its surface abounds in rocky hills, with here and there a plain of better land, like those on which the pleasant villages of Centre and West Upton are situated, while West River, the chief stream of the locality, finds its way through the richer meadows of the valley towards its outlet in the Blackstone River, at Uxbridge.

On the 31st of January, 1735, John Hazeltine and others, living on this territory, presented a petition to the Provincial Court to be incorporated as a township, and on the 14th of June the following act was passed:

An Act for dividing the towns of Mendon, Sutton, Uxbridge and Hopkinton, and erecting a new town in the County of Worcester by the name of Upton.

Whereas, the outlands of the several towns of Mendon, Sutton, Uxbridge and Hopkinton are completely filled with inhabitants who labor under difficulties by reason of their remoteness from the places of public worship in the said towns, and have therefore addressed this Court that they may be set off a distinct and separate township and vested

with all the powers and privileges that other towns in this Province are vested with;

Be it enacted by His Excellency, the Governor, Council and Representatives in General Court assembled and by the authority of the same:

SECT. 1. That all the outlands of the aforesaid towns of Mendon, Sutton, Uxbridge and Hopkinton comprised within the following bounds, containing in the whole twelve thousand nine hundred and forty-three acres, together with one hundred and fifty-one acres taken off Mr. John Rockwood's farm, bounded as follows, viz.: beginning at a pine tree, being the southeast corner of Grafton, and from thence extending north, bounding west on Grafton till it comes to the northeast corner thereof; and from thence bounding by Westboro' line till it meets with Hopkinton line; from thence extending southerly two hundred and twelve perch in the bounds between Sutton and Hopkinton; from thence south nine degrees east four hundred and ninety perch, to a stake and heap of stones; from thence south thirty-one degrees and thirty minutes east one hundred and forty perch; from thence south sixty-one degrees thirty minutes east two hundred perch to a heap of stones at Haven Meadow; from thence easterly one hundred and thirty-four perch to the north end of a pond called North pond and there bounded easterly on said pond till it comes to the place where the Mill River runs out of said pond; and thence bounding by said River till it comes to a wading place called Peck's Wading Place, above the lower North Meadow; from thence south thirty degrees thirty minutes west two hundred and seventy-four perch; from thence south forty degrees west ninety perch to Tyler's lane alias Marlborough road; from thence south fifty-five degrees west four hundred perch to Uxbridge, where Uxbridge and Mendon meet; thence bounding by Misco Hill Brook till it meets with West River so called; then runs north twenty-five degrees west ten hundred and twenty-two perch on Uxbridge line to a heap of stones at Hazeltine's goat pasture; from thence northerly to a pine tree; thence easterly to a stake in a meadow; and thence north twenty-five degrees and thirty minutes west one hundred and seventy perch to Grafton south line; and thence bounding northerly on Grafton one hundred and ninety-six perch to the bounds first mentioned; be and hereby are set off a distinct and separate township by the name of Upton.

SECT. 2. And that the inhabitants thereof be and hereby are vested with all the powers, privileges and immunities that the other towns in this Province are or ought, by law, to be vested with.

Provided,

SECT. 3. That the whole of Mr. Nathan Tyler's farm be and hereby is excluded out of the abovesaid township and he and it forever remains to the town of Mendon as heretofore.

Provided also,

SECT. 4. That the inhabitants of the said town of Upton do within three years build a suitable and convenient house for the public worship of God and settle a learned orthodox minister and provide for his comfortable and honorable support.

By an order of court passed June 17th John Hazeltine, as one of the principal inhabitants of the new town, was authorized to notify and warn the inhabitants to meet on the 28th of July and choose town officers. On that day the town met at the house of John Sadler and John Hazeltine was chosen moderator, Jonathan Wood was chosen clerk and Samuel Work treasurer. The condition of the town records is such that it is impossible to learn who composed the first Board of Selectmen. Mr. Work, the treasurer, died not long after his election, and on the 10th of November Jonathan Wood was chosen in his place.

The following is a list of persons who have served as selectmen in the years set against their names:

1736. John Hazeltine.	John Hazeltine.
Israel Taft.	Samuel Watkins.
Jonathan Wood.	1738. — Smith.
William Green.	— Taft.
John Sadler.	Jonathan Wood.
1737. Jonathan Nelson.	1739. Matthew Taft.

Stephen Tenney. William Green.	1764. Abiel Sadler. Ezra Wood. Nathan Tyler.	Simeon Holbrook. Thomas M. Baker. Nahum Warren.	Constant Hardy. Hezekiah Rockwood.
1740. John Hazeltine. Jonathan Wood. Robert Tyler.	1765. Abiel Sadler. Elijah Warren. Elisha Taft.	1789. Wilson Rawson. Benjamin Fisk, Jr. Abner Palmer. Enoch Batcheler. Jonathan Batcheler.	1805. Amos Bradish. Wilson Rawson. Constant Hardy. Hezekiah Rockwood. Stephen Taft.
1741. John Hazeltine. Jonathan Wood. Stephen Tenney.	1766. Abiel Sadler. Nathan Tyler. Ezra Wood.	1790. Ezra Wood. Elisha Bradish. David Chapin. Jonas Warren. Thomas Nelson, Jr.	1806. Wilson Rawson. Elisha Bradish. Amos Whitney. Daniel Fisk. John Sadler.
1742. Stephen Tenney. Jonathan Wood. Samuel Nelson.	1767. Nathan Tyler. Stephen Sadler. Ezra Wood.	1791. Ezra Wood. Elisha Bradish. David Chapin. Jonas Warren. J. Rawson.	1807. Wilson Rawson. Elisha Bradish. Amos Whitney. Daniel Fisk. Daniel Fisk, Jr.
1743. Jonathan Wood. Matthias Taft. Wilson Rawson. Stephen Tenney.	1768. Nathan Tyler. Wilson Rawson. Elisha Taft.	1792. Ezra Wood. Elisha Bradish. David Chapin. Silas Warren. Nahum Wood.	1808. Daniel Fisk. Daniel Fisk, Jr. Wilson Rawson. Elisha Bradish. Amos Whitney.
1744. Wilson Rawson. Jonas Warren. Robert Bradish. Benjamin Stewart. Ebenezer Fisk.	1769. Josiah Deane. Ephraim Whitney. Robert Taft.	1793. Same.	1809. Daniel Fisk, Jr. Ezra Wood, Jr. Elisha Bradish. Enoch Batcheler. Silas Warren.
1745. John Sadler. Jonathan Wood. Stephen Tenney. Benjamin Palmer. Jonas Warren.	1770. Abiel Sadler. Elisha Taft. Elijah Warren.	1794. Elisha Bradish. Thomas Nelson, Jr. Wilson Rawson. Paul Nelson. Amos Whitney.	1810. Daniel Fisk, Jr. Ezra Wood, Jr. Enoch Batcheler. Silas Warren. Jonathan Ward.
1746. Jonathan Wood. John Hazeltine. Wilson Rawson.	1771. Joseph Sadler. Robert Taft. Josiah Childs.	1795. Elisha Bradish. Abiel Sadler. John Taft. David Chapin. Ebenezer Stearns.	1811. Daniel Fisk, Jr. Ezra Wood, Jr. Silas Warren. Jonathan Ward. Stephen Taft.
1747. Wilson Rawson. Jonathan Wood. Jonathan Nelson.	1772. Josiah Deane. Ezra Wood. Benjamin Farrar.	1796. Ezra Wood. Paul Nelson. Thomas Nelson, Jr. Amos Bradish. Wilson Rawson.	1812. Same.
1748. John Sadler. John Hazeltine. Jonathan Wood.	1773. Elijah Warren. Abiel Sadler. Elisha Taft.	1797. Ezra Wood. Thomas Nelson, Jr. Wilson Rawson. Enoch Batcheler. Constant Handy.	1813. Daniel Fisk, Jr. Ezra Wood, Jr. Elisha Fisk. Jonathan Ward. Stephen Taft.
1749. Jonathan Wood. John Hazeltine. Jonas Warren.	1774. Ezra Wood. Ephraim Whitney. Benjamin Fisk.	1798. Ezra Wood. Wilson Rawson. Enoch Batcheler. John Childs. Daniel Fisk.	1814. Daniel Fisk, Jr. Ezra Wood, Jr. Jonathan Ward. Stephen Taft. Elisha Fisk.
1750. John Hazeltine. Jonas Warren. Jonathan Nelson.	1775. Josiah Deane. Stephen Sadler. Nathaniel Flagg.	1799. Ezra Wood. Elisha Bradish. Elisha Taft. Ephraim Whitney. Hezekiah Rockwood.	1815. Jonathan Ward. Ezra Wood, Jr. Ward Palmer. John Sadler. Ephraim Taft.
1751. Beriah Rice. David Wood. Ebenezer Fisk.	1776. Marshal Baker. David Nelson. John Taft.	1800. Ezra Wood. Elisha Bradish. Wilson Rawson. Ephraim Whitney. Hezekiah Rockwood.	1816. Daniel Fisk, Jr. Amos Whitney. Elisha Bradish. John Sadler. Hezekiah Rockwood.
1752. John Sadler. Beriah Rice. Francis Nelson.	1777. Josiah Deane. Stephen Sadler. Ephraim Whitney.	1801. Ezra Wood. Amos Bradish. Daniel Fisk, Jr. Ezekiel Stoddard. Peter Forbush.	1817. Ezra Wood. Amos Whitney. Elisha Fisk. Daniel Holbrook. Jonathan Ward.
1753. Marshal Baker. Benjamin Perham. Jonas Warren, Jr.	1778. Ephraim Whitney. Thomas Nelson. James Torrey.	1802. Ezra Wood. Amos Bradish. Daniel Fisk, Jr. Asa Childs. Wilson Rawson.	1818. Ezra Wood. Amos Whitney. Silas Warren. Daniel Holbrook. Josiah Rockwood.
1754. Marshal Baker. Matthew Lackey. Ephraim Whitney.	1779. Josiah Deane. David Kelly. Wm. Fisk.	1803. Ezra Wood. Amos Bradish. Daniel Fisk, Jr. Asa Childs. Nathaniel Flagg.	1819. Jonathan Ward. Amos Whitney. Josiah Rockwood. Samuel Forbush. Elisha Chapin.
1755. Jonathan Wood. Stephen Sadler. Wilson Rawson.	1780. Ephraim Whitney. Joseph Sadler. Ebenezer Walker.	1804. Ezra Wood. Amos Bradish. Daniel Fisk, Jr.	1820. Ezra Wood. Elisha Chapin. Ward Baker. Elisha Fisk.
1756. Matthew Taft. Abiel Sadler. Ephraim Whitney.	1781. Abiel Sadler. Thomas Forbush. Abner Palmer.

On the 10th of November, 1735, five months after the incorporation of Upton, the town voted to build a meeting-house on a part of the old burial-ground, about fifty rods north of the south road to Mendon and about one mile from the centre. It was to be forty feet long and thirty-five feet wide, and the sum of one hundred pounds was raised towards defraying its cost. From year to year small sums were raised to complete it, but it was never entirely finished. Twelve years elapsed before a pulpit was built and five years before all the windows were glazed. Dur-

ing the first three years the town-meetings were held in private houses, but after that time the meeting-house was so far finished that town-meetings were held within its walls. On the 18th of August, 1735, Rev. Thomas Weld, of Roxbury, and a graduate of Harvard in 1723, was invited to become pastor and was ordained January 4, 1738.

The sum of one hundred and fifty pounds, old tenor, was given to him as a settlement, and eighty pounds as an annual salary. He was dismissed in December, 1744, and was afterwards settled in Middleboro'. During the French War he entered the army as a chaplain and died in the service. Rev. Elisha Fisk was invited January 25, 1751, and ordained June 5th, with a settlement of one hundred and twenty pounds, and a salary of sixty pounds. Mr. Fisk was a native of Stonington, and graduated at Harvard in 1750. He married Hannah Forbes, of Westboro', and died August 6, 1795, having had nine children.

During the ministry of Mr. Fisk, in 1761, many of the people became dissatisfied with the location of the meeting-house, and three questions were considered: whether the old meeting-house should remain where it was and be finished at once; whether it should be moved; and whether a new house should be built. The territorial centre was found to be on the plain not far from the new burial-ground on the Westboro' road, and three sites were at various times discussed: the centre, the ground on which the meeting-house of the First Church now stands and a small hill, which was called Meeting-house Hill. Finding it impossible to come to any harmonious agreement, the town voted to refer the question to a committee composed of Captain Edward Davis, of Oxford; Hezekiah Rice, of Framingham; Colonel Oliver Wilder, of Lancaster; Major Daniel Hayward, of Worcester; and Captain Caleb Hill, of Douglas. On the 24th of June, 1761, the vote, however, was rescinded, and it was voted to let it remain seven years and then to move it to the spot on which the meeting-house now stands. On the 23d of March, 1768, at the expiration of the seven years, at a meeting of the town, action was had on the following articles in the warrant:

Will the town remove the meeting-house to the spot agreed upon June 24, 1761? Will the town divide into two parishes? and will the town choose a committee to report what in their judgment would be the best course to pursue? On the first two questions the town voted in the negative, and on the last in the affirmative. The committee selected consisted of Jonathan Livermore, of Northboro'; Samuel Reed, of Uxbridge; William Jennison, of Mendon; and Hezekiah Taylor, of Grafton. This committee at a subsequent meeting reported as follows: "Having taken into serious consideration your complaints and your different opinions, and after a very patient hearing of all parties so deeply concerned, we are of the opinion that it will be best for the inhabitants of this town to let their meeting-house remain where it now is, being fully satisfied that the town will be divided into two parishes before many years. All things, therefore, being duly considered, we thus Judge."

Notwithstanding this advice, two years later, in 1770, the majority voted to build a new house. In 1821 the church built in 1770 was repaired, a belfry

added to it, with a bell, and a clock was given by George Holbrook, of Medway.

In 1848 the present meeting-house was built on the west side of the Common, and dedicated January 3, 1849. The old house was sold to D. B. Fisk, and now stands on the easterly side of the Common, devoted to other uses.

Rev. Benjamin Wood was invited to settle as the successor of Mr. Fisk, December 17, 1795, and was consecrated June 1, 1798, with a salary which, at the end of fifteen years, was raised to four hundred dollars, and which, during his pastorate of fifty-one years, never exceeded that sum. Previous to 1812 the church had only a covenant, but in that year adopted articles of faith, and not until 1834 was the parish legally organized. On the 25th of June, 1835, Mr. Wood delivered a centennial address of much interest and value, and in 1848 an address commemorative of the fiftieth year of his settlement. He died April 24, 1849, at the age of seventy-six years, and at his funeral services Rev. A. H. Tracy, of Sutton, preached the sermon. He was born in Lebanon, N. H., September 15, 1772, the youngest of twelve children, and graduated at Dartmouth in 1793. An older brother of Mr. Wood was the teacher who, it is said, fitted Daniel Webster for college.

Rev. William Warren, a native of Maine, and a graduate of Bowdoin, was installed November 14, 1849, and dismissed April 29, 1856. His successor was Rev. Andrew J. Willard, a native of Vermont and a graduate of Vermont University, who was ordained April 30, 1857, and dismissed July 8, 1865. After the dismissal of Mr. Willard, Rev. Spencer O. Dyer supplied the pulpit from November 30, 1865, to November 30, 1870, and was followed by Rev. John E. M. Wright, who was installed November 15, 1871, and dismissed March 31, 1875. Rev. Frank J. Marsh was ordained January 26, 1876, and was succeeded by the present pastor, Rev. Almon J. Dyer. Mr. Marsh was a native of Leominster, and a graduate of Amherst.

A Baptist Society was organized in 1751, but was never vigorous, and, after a few years under the ministrations of Elder Abraham Bloss, it was dissolved. In 1787 a new society was formed, which at various times was presided over by Elders Ingalls, Simeon, Snow, Sawyer, Smith and Bullard. After the departure of Mr. Dexter Bullard the society was merged in the First Unitarian Society, which was organized in 1846. The last-mentioned society built a church on the easterly side of the Common, which was dedicated in 1848. The first pastor of the society was Rev. William Cutter Tenney, a Harvard graduate in 1838, who left in 1849, and was succeeded by Rev. George S. Ball, whose service has continued up to the present time, with the exception of two years (1857-58) when he was the settled minister over the First Church in Plymouth. During the War of the Rebellion, Mr. Ball served eighteen months as chaplain of

the 21st Regiment of Massachusetts Volunteers, and is remembered by all who come within his influence as a fearless soldier as well as a faithful minister of God. As a pastor he extends his sphere of usefulness beyond his church and his flock, and is universally beloved as a citizen, neighbor and friend. In 1873 Hon. William Knowlton built a church at West Upton, the use of which he gave to the Unitarian Society, and in 1874 the old church was sold to the bishop of the diocese for Catholic worship. The Catholic Society has been organized only a few years, but it is steadily gaining in strength and vigor.

A Universalist Society was incorporated March 9, 1825. Like the Baptist Society, it had no church, and when the Unitarian Society was organized the members of the two societies became united.

A Methodist Society was formed in 1873, and has a commodious and handsome house of worship at the southerly end of the Common, in Upton Centre. Its first pastor was Rev. N. B. Fisk, who served three years, and was followed by Rev. John Short, the Rev. Mr. Hubbard and the present faithful pastor, Rev. Wm. P. Blackmer.

In the latter part of the last century there was a respectable body of Quakers in the town, but no distinct society was ever organized.

With the incorporation of the town and the organization of its church, the municipal machinery of Upton was complete. Like all other towns in Massachusetts, in their earlier days, the town was the parish and the parish was the town. The town settled the minister, fixed and raised his salary, built and maintained the place of worship, and the collector of the town collected the precinct or parish tax. With one parish, with united and harmonious interests, and with an industry—that of agriculture—in which most of the people were engaged, the early life of the town was passed with no disturbance of the public peace to check its development and growth. Before many years, however, had passed away the French War checked for a time its advancing prosperity, and called on its sons to bear their share of the burdens of the strife. Exactly what part the town performed in the war it is difficult to learn from available records. From what can be gleaned from the archives of the State concerning its activity in some of the events of the war, it may be fairly inferred that in all its varying scenes it thoroughly performed its part.

The records state that the following Upton men enlisted "for the intended expedition, in 1756, against Crown Point, under the command of General John Winslow," and were attached to the regiment of Col. Richard Gridley:

James Stewart.	Nathan Tyler, captain.
Benjamin Jones.	Jonathan Pritchard.
	Thomas Rowel.

The following were mustered, October 11, 1756, in the company of Lieutenant-Colonel Irving, attached

to Colonel Richard Gridley's regiment, to march to Fort William Henry:

Benjamin Stewart.	Benjamin Jones.
James Stewart.	Ephraim Warfield.
	Jonathan Pritchard.

The following is "a list of training soldiers, March 23, 1757, in Upton, under command of Captain Jonathan Wood, alarm-man, and who stand in a body."

Moses Wood, sergeant.	Joseph Plumly.
Abiel Sadler, sergeant.	Daniel Wood.
Stephen Sadler, sergeant.	Samuel Taft.
Ebenezer Sadler, corporal.	David Nelson.
James Flagg, corporal.	Benjamin Perham, Jr.
Preserved Partridge, corporal.	Lemuel Perham.
Samuel Wright, drummer.	Benjamin Farrar.
Josiah Peas, drummer.	Moses Baker.
Josiah Peas, Jr.	John Wood.
Elijah Rice.	John Lackey.
Samuel Forbush.	Daniel Fisher.
Ephraim Whitney.	Ebenezer Walker.
Nathan Brackett.	Joseph Sadler.
Oliver Whitney.	Josiah Wood.
Wm. Johnson, Jr.	Elijah Tyler.
John Ward.	John Nichols.
Thomas Palmer.	Benjamin Rockwood.
David Palmer.	Aaron Warren.
Thomas Nelson.	Zacheus Stevens.
James Torrey.	Israel Taft.
Robert Taft.	Elisha Taft.
Wm. Green.	Ephraim Warfield.
James Taft.	Isaac Aldrich.
Nathan Taft, Jr.	Nathan Wood.
John Taft.	Adonijah Rice.
Daniel Fisk.	Joseph Cody.
Benjamin Fisk.	Moses White.
Samuel Fisk.	Thomas Rowel.
William Fisk.	Jacob Hill.
Josiah Fisk.	John Wilson, Jr.
Ebenezer Ober.	Benjamin Stewart, Jr.
Ebenezer Wood.	James Stewart.
Samuel Wood, Jr.	Jonas Warren, clerk.
Samuel Warren.	

A list of the alarm-men, at the same date, bears the following names:

Rev. Elisha Fisk.	Robert Bradish.
Descon Jonas Warren.	Thomas Newman.
James Bradish.	Samuel Wood.
Beriah Rice.	Alexander Cleaton.
Marshall Baker.	Jonathan Wood, Jr., miller.
Matthew Lackey.	Ebenezer Wood.
Hezekiah Ward, lieutenant.	Stephen Rice.
Wilson Rawson.	Samuel Wood, school-master.
Wm. Patten.	Francis Nelson.
Ralph Hill.	Elijah Warren.

The following men enlisted for the relief of Fort William Henry in August, 1757, in the company of Captain James Whipple, attached to the regiment of Colonel Artemas Ward:

Stephen Sadler, sergeant.	John Nichols.
Jonas Warren, sergeant.	Aaron Warren.
Preserved Partridge, sergeant.	Benjamin Farrar.
Samuel Wright, corporal.	Samuel Warren.
Samuel Fisk.	Josiah Fisk.
Samuel Wood.	Nathan Wood.
Elijah Rice.	Joseph Wilson.
Daniel Fisher.	Thomas Webster.
Francis Nelson.	Beriah Rice.

The following enlisted for the reduction of Canada in 1759, in the company of Captain Stephen Maynard, attached to the regiment of Colonel Wm. Williams:

Nathan Wood.  
Elijah Rice.

Benjamin Farrar.  
John Nichols.

The following enlisted for the invasion of Canada in 1759, in the regiment of Colonel Abraham Williams, under the command of His Excellency, Jeffry Amherst, general and commander-in-chief:

Wilson Rawson.  
James Long.  
John Wilson.  
Israel Taft.  
Michael Bond.  
Benjamin Stewart, Jr.

Nathan Wood.  
Samuel Wright.  
James Flagg.  
Daniel Fisher.  
Thomas Marshal Baker.  
John Watkins.

After the close of the French War the public mind of the Massachusetts Province became so soon agitated concerning the relations of the colonies with the mother country, and actual hostilities broke out after so short an interval of peace, that the small communities into which the province was divided had little time to shake off the burdens of one season of hostilities before they were called upon to enter upon another with burdens largely increased and much longer continued. It is not necessary to state in detail in this narrative the expressions of patriotism made at various times by the town in sustaining the measures proposed by the Boston Committee of Correspondence and of the enthusiasm with which Upton, in common with other towns, strengthened the arms and intensified the will of that committee in their advancing march towards a Revolution. Let a single extract from the town records suffice. On the 26th of March, 1770, at a town-meeting held for the purpose of considering the condition of public affairs, it was—

*Resolved*, That we will treat with contempt all those persons that do continue to import goods from Great Britain contrary to the non-importation agreement, and that we will look upon such men with detestation, who, for the sake of their own private interest, are willing to reduce their posterity and their country to a state of abject slavery.

*Resolved*, That we will not purchase or drink any foreign teas until the revenue acts are repealed, and that we will discountenance in our families the wearing of or using any foreign superfluities, and that we will use every lawful method in our power to encourage our own manufactures.

As far as can be ascertained from the records at the State-House, the following lists include the names of men who represented Upton in the military service during the war.

On the 19th of April, 1775, after the news of the battle of Lexington had been received, the following Upton men marched to Roxbury in the company of Captain Robert Taft, attached to the regiment of Colonel Silas Wheelock:

Robert Taft, captain.  
William Fisk, 1st lieutenant.  
Daniel Boyden, 2d lieutenant.  
David Nelson, sergeant.  
Benjamin Sadler, sergeant.  
Ebenezer Walker, sergeant.  
Micah Bates, corporal.  
Matthew Taft, corporal.  
Benjamin Fisk, corporal.  
Jonas Warren, Jr., corporal.  
Amos Wood.  
Henderson Walker, Jr.

Absalom Forbes.  
Jonathan Dwight.  
Josiah Tenney.  
Jason Batherick.  
John Morse.  
Seth Sadler.  
Wilson Rawson.  
Daniel Fisk.  
Jonathan Rawson.  
Elisha Wood.  
Solomon Taft.  
Samuel Lackey.

Daniel Wood.  
Edward Forbes.  
Thomas Barnes.  
Benjamin Batcheller.  
Joshua Felt.  
Eliphalet Felt.

Thomas Nelson.  
Wm. Putnam.  
Ephraim Whitney.  
Artemas Rawson.  
Jonathan Batcheller.

On the 20th of April, 1775, the day after the battle of Lexington, the following men marched from Upton to Roxbury in the company of Captain Stephen Sadler, attached to the regiment of Colonel Silas Wheelock:

Stephen Sadler, captain.  
Benjamin Farrar, lieutenant.  
Asa Hazeltine, sergeant.  
Levi Legg, sergeant.  
Sherebiah Baker, sergeant.  
Timothy Fisher, corporal.  
Perrin Batcheller, corporal.  
Benjamin Cotter, corporal.  
Jonathan Gay, fifer.  
James Torrey.  
Jonathan Rost.  
Jonas Warren.  
Jonathan Evans.

Samuel Wood.  
Ebenezer Wood.  
David Warren Leland.  
Josiah Flagg.  
Peter Holbrook.  
Aaron Hayward.  
Hezekiah Learned.  
Abraham Ball.  
Nathan Brackett.  
Samuel Brackett.  
Thomas Wilson.  
John Long.  
Abraham Boyd.

The following men enlisted for three months in August, 1775, in the company of Captain David Batcheller, attached to the regiment of Colonel Joseph Read:

Benjamin Farrar, lieutenant.  
Robert Taft, lieutenant.  
Sherebiah Baker, sergeant.  
Thomas Barnes, sergeant.  
Abner Stanford, corporal.  
Benjamin Clemons, corporal.  
Eliphalet Felt, corporal.  
Amos Wood.  
Jason Batherick.  
Benjamin Batcheller.  
Peter Brown.  
Benjamin Balch.  
Charles Hudson.  
Nathan Nelson.  
Josiah Torrey.  
Joseph Wood.  
Thomas Wilson.  
Henderson Walker.  
Nathan Brackett.

Samuel Brackett.  
Increase Daniels.  
Wm. Daniels.  
Absalom Forbes.  
Edward Forbes.  
Ichabod Fisher.  
James Flagg.  
Joshua Felt.  
Jonathan Gay.  
Aaron Hayward.  
Hezekiah Learned.  
Henry Chase.  
Moses Haven.  
Wm. Legg.  
Benjamin Powers.  
John Wood.  
Daniel Wood.  
Jonathan Wright.

The other enlistments in 1775 were Joseph Smith in the company of Captain Edward Crafts, and Joshua Felt and Jonathan Gay in the company of Captain Ezra Badlam, both companies being attached to the artillery regiment commanded by Colonel Richard Gridley, and also Joshua Tenney in the company of Captain Isaac Bolster, of Sutton.

The only enlistments in 1776, so far as the records show were those of Peter Holbrook, James Torrey, Benjamin Batcheller and Samuel Wright in the company of Captain Benjamin Richardson, attached to the regiment of Colonel Nicholas Dike, engaged for three months in service at Dorchester.

The following enlisted in 1777 in the company of Captain Robert Taft, for a service not stated in the records:

Robert Taft, captain.  
Thomas M. Baker, lieutenant.  
Asa Hazeltine, lieutenant.

Thomas Nelson.  
Thomas Bards.  
Enoch Batcheller.

Daniel Kelley, sergeant.  
Benjamin Patten, sergeant.  
Benjamin Clemens, sergeant.  
Jonathan Warren, sergeant.  
Stephen Nelson, corporal.  
Daniel Wood, corporal.  
Francis Boon, corporal.  
Thomas Forbush, corporal.  
Elijah Warren, fifer.  
Edward Forbes, drummer.  
Benjamin Farrar.  
Ephraim Whitney.  
Daniel Fisk.  
Daniel Boyden.  
Jonas Warren (3d).  
Enoch Forbush.  
Isaac Nelson.

Matthew Taft.  
Joseph Sadler, Jr.  
John Morse.  
Hezekiah Wood.  
Ebenezer Walker, Jr.  
Abner Palmer.  
Stephen Child.  
Oliver Whitney.  
Josiah Torrey.  
Benjamin Wood.  
Wilson Rawson, Jr.  
Aaron Hayward.  
Joseph Patten.  
Joshua Hicks.  
Jonathan Evans.  
Simeon Holbrook.  
Elisha Wood.

The following enlisted in Capt. Nelson's company in 1777:

Thomas Forbush.  
Aaron Hayward.  
Matthew Taft.  
Jonathan Warren.  
Ebenezer Walker.  
Ebenezer Taft.  
William Hall.

Josiah Flagg.  
Joshua Tenney.  
Eleazar Flagg.  
Stephen Warren.  
Jason Harrington.  
John Morse.  
Levi Legg.

The other enlistments in 1777 were Jona. Wright, Samuel Brackett, Lieut. — Long, Samuel Munroe, Frederick Nelson and Lieut. John Nelson, with another whose name cannot be deciphered, in Capt. Baldwin's company; and Benjamin Brigham, James Johnson, Prince Hazeltine, Abner Stanford (corporal), John Perry (sergeant), and John Green (sergeant), who enlisted in the Continental Army for three years.

The following enlisted for service in Rhode Island, in 1778, in Capt. Thomas Marshal Baker's company, attached to the regiment of Col. Benjamin Hawes:

John Darling, sergt.  
Jacob White, sergt.  
Daniel Wood, sergt.  
Oliver Fisher, corp.  
John Warfield, corp.  
Joel Turner, corp.  
Jeptha Clark, drummer.  
David Ellis, fifer.  
Jonathan Wright.  
William Putnam.  
John Flagg.  
Jonathan Evans.  
Grindley Jackson.  
Jonas Warner.  
William Potter.  
Benjamin Perham.  
Ichabod Albee.  
Ebenezer Taft.  
George Taft.  
Joseph Laurence.  
Samuel Warfield.  
Jesse Chapin.  
William Fuller.  
William Boyes.  
Samuel Lackey.  
Samuel Brackett.

Elijah Nelson.  
Benjamin Batcheller.  
Elisha Thompson.  
Gershom Twichel.  
John Nelson.  
Peletiah Gibbs.  
Ebenezer Walker.  
Stephen Kilborn.  
Seth Thompson.  
David Ward.  
Hezekiah Wood.  
Perrin Batcheller.  
David Wheelock.  
Nehemiah Nelson.  
David French.  
Samuel Twist.  
Joshua Thayer.  
Joshua Sprague.  
Thomas Nelson.  
Joseph Johnson.  
Simeon Lesure.  
Joshua Daniels.  
Grindall Taft.  
Samuel Washburn.  
William Bower.  
Jonas Twichell.

The following served at Dorchester three months in the company of Capt. Mark Chase, commanded by Col. Nathan Sparhawk:

Stephen Nelson.  
Ebenezer Taft.

Baruck Bolster.  
Eleazar Flagg.

The following were drafted in 1778 for nine months' service:

Edward Forbes.  
Abraham Forbes.

Isaac Johns.  
Ebenezer Buck.

The following recruits entered the Continental Army in 1778, under the command of Capt. Benjamin Farrar:

Benjamin Farrar, capt.  
Jonathan Gay.  
Abner Stanford.  
Jason Batherick.  
Timothy Batherick.  
Jotham Forbes.  
Joel Bolster.  
John Green.  
John Sullivan.  
John Perry.  
Prince Hazeltine.  
John Hopkins.  
Nathaniel Milliken.

Peletiah Harmon.  
William Harmon.  
Timothy Berry.  
Abner Harmon.  
Humphrey Tyler.  
Thomas Libby.  
Joseph Waterhouse.  
Robert Dodge.  
Jonathan Thomas.  
Thomas Middleton.  
Robert Shillingsford.  
John Sailer.  
Cato Fortunatus.

The following marched to Claverick, on the Hudson River, in 1779, in the company of Capt. Thomas Marshal Baker, attached to the regiment of Col. James Denney:

Thomas M. Baker, capt.  
Eliphalet Stearns, lieut.  
Increase Thayer, lieut.  
Frederick Taft, sergt.  
Jonathan Bacon, sergt.  
John Brown, sergt.  
Nathaniel Torrey, corp.  
John Whitney, corp.  
Baxter Hall, corp.  
Joseph Daniels, corp.  
Edward Forbes, drummer.  
Samuel Lesure, fifer.  
Amasa Aldrich.  
Francis Boon.  
Benjamin Batcheller.  
Samuel Clemens.  
Benjamin Cary.  
John Darling.  
Peleg Darling.  
Comfort Eddy.  
Nathaniel Fisk.  
John Flagg.  
Edward Hunt.  
Silas Holbrook.  
Peter Holbrook.  
William Hall.

Joseph Hayward.  
William Johnson.  
Grindall Keith.  
Jesse Morse.  
Jesse Marsh.  
Samuel Maynard.  
Stephen Nelson.  
John Pickering.  
Thompson Rawson.  
Benjamin Spooner.  
Benjamin Spear.  
Sylvanus Scott.  
Elijah Stearns.  
Solomon Stockwell.  
Thomas Streight.  
Joseph Torrey.  
Amos Thayer.  
Noah Tytus.  
Antipas White.  
Timothy Wood.  
Jonathan Wright.  
Nathan Nelson.  
Caleb Lamb.

Other enlistments in 1779 were Ezra Keys and Grindley Jackson, for two months in Rhode Island, in the company of Capt. Thomas Fisk and regiment of Col. Nathan Tyler; James Lackey, Jeremiah Batcheller, Abiel Taylor and Wm. Patten, under Capt. William Henry, for service at Castle and Governor's Islands; and, James Johnson, for the Continental Army.

The following marched to Rhode Island, in July, 1780, in Capt. Thomas Marshal Baker's company and Col. Nathan Tyler's regiment:

Thomas M. Baker, capt.  
Robert Taft, lieut.  
Daniel Boyden, lieut.  
Benjamin Sadler, sergt.  
Solomon Taft, sergt.  
Timothy Fisher, sergt.  
Daniel Wood, sergt.  
Simeon Holbrook, corp.

Joseph Jackson.  
Abram Knowlton.  
Samuel Lackey.  
James Lackey.  
John Morse.  
Alvin Munroe.  
Nehemiah Moore.  
Paul Nelson.

William Putnam, corp.  
 Silas Warren, corp.  
 Seth Sadler, corp.  
 Amos Wood, corp.  
 Ezra Wood, corp.  
 Nathan Brackett.  
 Enoch Batcheller.  
 Elisha Bradish.  
 Jason Batherick.  
 Benjamin Clemons.  
 Samuel Forbush.  
 Ebenezer Forbush.  
 Jacob Fisk.  
 Samuel Goldthwaight.  
 Nathaniel Gould.  
 Joseph Hill.

Benjamin Potter.  
 Jacob Perlham.  
 Matthew Taft.  
 David Taft.  
 Joshua Tenney.  
 Stephen Temple.  
 Samuel Wood.  
 Jonathan Wright.  
 John Wood.  
 Jonas Warren.  
 Amos Whitney.  
 Daniel Warren.  
 Ezra Whitney.  
 Stephen Warren.  
 Nahum Warren.  
 Joseph Wood.

The following enlisted in 1780 for six months' service at West Point:

Joseph Sadler.  
 John Brown.  
 Elijah Nelson.  
 William Potter.  
 Josiah Nelson, Jr.  
 Jotham Forbes.

Joel Bolster.  
 Nathaniel Hynes.  
 Asa Evans.  
 Joseph Batcheller.  
 Jeremiah Batcheller.

Others enlisting in 1780 were Samuel Laftin and Jacob Beyer, in the Continental Army.

The following enlisted for three months in 1781, in the company of Capt. Reuben Davis and regiment of Col. Luke Drury:

Joseph Jackson, corp.  
 Stephen Temp'e.  
 William Patten.

Asa Evans.  
 Paul Nelson.

The only other enlistment in 1781 was that of Abner Warren for four months in Captain Joseph Eliot's company and Colonel William Thomas' regiment.

After the declaration of peace, little else was at first considered by the people of the town beside the best means of meeting the pecuniary liabilities incurred during the exigencies of the war and of putting the town once more on the road to prosperity. The excitement attending the Shays' Rebellion disturbed, for a time, the public mind, but was allayed as suddenly as it rose. For many years the industry of the town was confined to agriculture; but, with the exception of the products of the dairy, the crops were held for home consumption, and furnished the farmer with little more than the means of support. In later years the growth of the shoe business in New England was shared by the town, and for a time seemed well-rooted and permanently established. At various times John Hill, Daniel Nelson, Josiah Pease, Jr., Adams Batcheller, Adam Wheelock, Reuben Eames, Millet Baker, Newton Warren, Amos Batcheller, Asa Wood, Eli Warren, Daniel W. Batcheller, Eli W. Batcheller, D. G. Rawson and Tyler Rawson engaged in the manufacture; but in Upton, as in many other small towns, the shoe business has been destroyed by the tide of centralization which has given to larger towns, with better facilities for obtaining labor, a rapid growth both in population and wealth. The absence of railroad communication with the world has had its effect,—an

effect which is now sought to be repaired by the construction of a line from Worcester through the westerly part of the town to Milford or some other adjacent point.

The tannery business, too,—once an important industry,—has disappeared with the shoe business, and, with the exception of the saw-mill and box-factory of L. W. Hill & Son, at West Upton, and the saw and grist-mills of P. P. Taft, E. C. Fisk, L. & H. Chase and others, the chief industry of the town is the manufacture of straw hats and bonnets. This business is conducted by three concerns,—Windsor Chamberlin, who makes ladies' hats and bonnets, Benson & Nelson, whose product is men's and boys' hats, and William Knowlton & Sons, at West Upton, about a mile from the centre, who are largely engaged in the manufacture of ladies' hats and bonnets. The plant of the Knowltons is a valuable one; its buildings are large, heated by steam and lighted by electricity, and a large number of hands are employed in turning out an annual product largely in excess of that of any other straw-mill in the country. The career of William Knowlton, the founder of this mill, is worthy of record in this narrative. He was born in Boston, June 29, 1809, and died in Upton, July, 1886. His parents attended the church over which Dr. Lowell was pastor, whose pulpit is now occupied by Dr. Bartol, and the impressions made by that distinguished clergyman on his youthful mind found their fruit in the later years of his life, when, out of the abundance of his store, he built a church, and gave it to the Unitarian Society of his adopted town. After the death of his father in Hopkinton, where he had removed from Boston with his family, he was, at the age of about twelve years, placed in the family of John Holmes, of Hopkinton, soon after which he was apprenticed to James Bowker, who was a farmer and cooper. At the age of twenty he bought a year's time, and went to Northbridge to learn the trade of bottoming shoes, and at the end of a year found his way to Upton, and entered the employ of Asa Wood, a shoe manufacturer. In 1832 he entered the store of Lyman Stoddard, of Upton, who kept a country store, and bought and sold straw braids made in the families of Upton and its neighborhood. While engaged in this business he attracted the attention of Colonel Elijah Stoddard, an older brother of Lyman, and Mr. Stoddard proposed to him a partnership in the straw business in which he was engaged. In 1833, at the age of twenty-four, the partnership of Stoddard & Knowlton began the business of a country store, to which were added the purchase of domestic straw braids and the manufacture of straw bonnets. The partnership continued until 1836, when Mr. Knowlton moved to West Upton, and, in partnership with William Legg, carried on the manufacture of ladies' goods in both foreign and domestic braids. Joseph S. Farnum, of Upton, succeeded Mr. Legg in the partnership, but

after a year left the firm, and Mr. Knowlton continued the business alone until his sons were old enough to enter the partnership. The four sons—William, Edwin F., George W. and Ebenezer F. Knowlton—since the death of their father, have conducted the business. The firm has salesrooms in New York, which are under the management of Edwin F. Knowlton.

Notwithstanding the engrossing cares of business, Mr. Knowlton felt a deep interest in the public welfare, and found time to make himself useful in its promotion. He represented the Fourth Representative District of Worcester County, consisting of the towns of Northbridge and Upton, in 1868 and 1872, and was a member of the Senate in 1878 and 1879. In 1880 he was a delegate to the Republican National Convention, and was a trustee and patron of the Massachusetts Agricultural College. He was also a director in the First National Bank in Milford, and held other positions of responsibility and trust.

Up to the time of the War of the Rebellion little occurred in the life of Upton worthy of record in this narrative, except what has been already incidentally referred to. In that war, as in the French and Revolutionary Wars, the town performed a creditable work. On the 11th of June, 1861, the town appropriated \$2000 for the families of volunteers, and on the 3d of March, 1862, \$1500 for the same purpose. On the 21st of July, 1862, the town voted to pay a bounty of \$100 to any volunteer enlisting after that date, and March 7, 1864, it appropriated \$4000 for further aid to families of the soldiers. On the 8th of August, 1864, it voted to pay \$125 in gold to any volunteer in the service. The writer finds on the books of the town, and on the records of the adjutant-general, the names of the following volunteers credited to the quota of the town. Many of those whose names are included in the following list enlisted more than once:

*Third Battalion of Rifles (three months).*

Harry T. Bradish.	George E. Childs.
Silas R. Dunn.	Charles K. Stoddard
Wm. H. Aldrich.	

*Seventh Regiment (three years).*

Chaudler J. Pike.

*Ninth Regiment (three years).*

Michael Reynolds.	Malachi Curling.
	Simeon Curling.

*Thirteenth Regiment (three years).*

Wm. R. Warner, sergeant.	Wm. R. Rawson.
Charles W. Comstock, corporal.	John H. Johnson.
Wm. Cordwell.	John D. Plummer.
David Brown.	Willard Wheeler.
John G. Thurston, musician.	Charles H. Wellington.
Warren E. Bruce.	

*Fifteenth Regiment (three years).*

Wilson B. Robbins.	Charles A. Reed.
Albert Davis.	Stephen Smith.
Wm. R. Dean.	George F. Wellington.
John Southland.	Thomas Horn.
Winsor Chamberlain.	Levi F. Jose.
John Claucy.	David J. Messenger.

Charles H. Stone.	Darius Murphy.
Benjamin S. Hill.	Edward O. Eames.

*Sixteenth Regiment (three years).*

Charles H. Burnham.	Amos A. Holbrook.
---------------------	-------------------

*Seventeenth Regiment (three years).*

Stephen S. Hall.

*Eighteenth Regiment (three years).*

Charles M. Fales.

*Nineteenth Regiment (three years).*

Thomas Flanagan.

*Twentieth Regiment (three years).*

Frederick Volt.	Albert Davis.
-----------------	---------------

Henry W. Brewer.

*Twenty-first Regiment (three years).*

George S. Ball, chaplain.	Charles K. Stoddard, lieut.
	Wm. A. Aldrich.

*Twenty-second Regiment (three years).*

James O. Wood.

*Twenty-fifth Regiment (three years).*

James W. Hanly.	Charles H. Brown.
George W. Wood.	Jonathan O. Fisk.
Charles E. Holbrook.	Lyman A. Leighton, Jr.
Wm. H. Holbrook.	Wm. A. Aldrich.
James A. Rockwood.	Charles W. Rogers.
George E. Childs, corporal.	Charles W. Aldrich.
Perry C. Alexander.	Davis Southland.
Harrison T. Bosworth.	Lowell Southland.
Charles Reed.	George H. Walker.
George J. Drake.	Henry A. Whitney.
Harrison R. Wood.	Leander Wood.
Edward J. Blood.	James W. Goodenow.
Joseph C. Rogers.	

*Twenty-eighth Regiment (three years).*

Stephen Martin.

*Thirty-second Regiment (three years).*

William W. Marsh, Jr.

*Thirty-fourth Regiment (three years).*

Charles W. Aldrich.	Loring A. Walker.
Alfred H. Hall, musician.	Charles L. Walker.

*Thirty-sixth Regiment (three years).*

Alonzo A. White, lieutenant.	Wm O. Davenport.
Lysander M. Perham, corporal.	Hezekiah Hall.
Stephen S. Rogers.	William Hall.
Judson Southland, corporal.	Alvah H. Johnson.
Wm. H. Bailey.	Luke Lerain.
George W. Bardwell.	Hosea D. Leighton, Jr.
Junius Bates.	John McGrath.
John A. Bosworth.	Isaac R. Potter.
Nelson H. Brown.	George A. Wood.
Lorenzo S. Chamberlain.	Junius D. Bates.
Orra Chamberlain.	Alverado Drake.
Myron W. Claflin.	

*Thirty-ninth Regiment (three years).*

William C. McNeal.

*Fortieth Regiment (three years).*

Sanford Bruce.	Charles O. Fairbanks.
----------------	-----------------------

*Forty-second Regiment (one hundred days).*

Edward H. Aldrich.	Alonzo P. Taft.
--------------------	-----------------

*Fifty-first Regiment (nine months).*

Ezekiel Packard, lieutenant.	Sylvanus W. Farrington.
Hiram M. Clark, sergeant.	Benjamin F. Gibson.
Rand Lord, sergeant.	Arthur Hutchinson.
John H. Slocum, sergeant.	Wm. P. Kent.
Levi Smith, corporal.	Curtis A. King.
Alonzo L. Benson, corporal.	Charles H. Nichols.
Curtis M. Harrington, corporal.	George A. Norcross.
Joseph F. Simpson, corporal.	Oliver Orr.
John Conlon, corporal.	James Orr.
Charles M. Hall, musician.	Hardus N. Rockwood.
William R. Drake.	James A. Rockwood.
Charles E. Brooks.	George W. Taft.
Frank A. Brooks.	Alexander A. T. Temple.

James A. Rockwood.	Daniel Tenney.
Thomas T. Watkin.	Thomas T. Walker.
Moses W. Hollis.	Elijah Ward.
Charles L. Chamberlain.	Wm. G. Wilmot.
Timothy Doyle.	Augustus C. Young.
<i>Fifty-seventh Regiment (three years).</i>	
Wm. A. Aldrich.	Albert C. Warren.
<i>Fifty-eighth Regiment.</i>	
Charles Jordan.	
<i>Sixty-first Regiment.</i>	
John Perkins.	
<i>Second Cavalry (three years).</i>	
George Bradford.	Alexander McDonald.
Arthur Maloney.	James Marks.
Thomas Watson.	
<i>Fourth Cavalry (three years).</i>	
Thomas Davis.	Edward Galvin.
<i>Fifth Cavalry (three years).</i>	
Thomas Dodson.	John H. Jackson.
Lewis Cooper.	Stephen Durben.
Charles Smith.	George Murphy.
<i>Second Heavy Artillery (three years).</i>	
Edward Burk.	
<i>Third Heavy Artillery.</i>	
Arthur S. Johnson, sergeant.	Charles H. Johnson, sergeant.
Lyman Leighton.	John H. Walker.
Wm. H. Potter.	
<i>Fourth Heavy Artillery (three years).</i>	
Joseph Andy.	Alonzo C. Southland.
Charles H. Benson.	Richard Dwinell.
Albert P. Clifford.	Charles D. Holmes.
Wm. E. Robbins.	Samuel Wilson.
Wilson R. Robbins.	
<i>Second Company of Sharpshooters (three years).</i>	
James O. Wood.	
<i>Second District of Columbia Volunteers (three years).</i>	
James Hill.	
<i>Veteran Reserves.</i>	
Louis Peters.	
<i>Drafted Men.</i>	
Benjamin S. Benson.	Eli W. Batcheller.
Daniel Fisk.	Thomas S. Brown.
<i>Regiment Unknown.</i>	
Charles H. Thompson.	Charles E. Haynes.
<i>Navy.</i>	
Henry Shaw, surgeon.	

The above list comprises one hundred and eighty-three volunteers, nine less than are claimed by the town as the number of enlistments. The remaining nine would doubtless be made up by double enlistments, only a few of which are included in the list. Of these, Harrison T. Bosworth, Charles E. Haynes and Charles H. Thompson died in Andersonville prison, the last on the 4th of July, 1864; David J. Messenger was killed at the battle of Ball's Bluff, Charles A. Rogers was killed at Newbern, Simon Curling was killed at Fair Oaks, J. Orson Fisk was killed at Newbern, and Lieutenant Charles K. Stoddard was killed at Annapolis Junction.

On the 25th of June, 1835, the town celebrated the one hundredth anniversary of its incorporation. Daniel Fisk presided on the occasion, assisted by Dr. John Starkweather and Mr. O. Walker, and Lyman Stoddard acted as chief marshal. A procession, numbering fifteen hundred persons, marched through the streets, escorted by a volunteer militia company,

commanded by Captain Wood, and seven hundred sat down at dinner. At the centennial service an oration was delivered by Rev. Benjamin Wood, and other parts of the service were taken by Rev. Mr. Fisk, of Wrentham, Rev. Mr. Long, of Milford, Rev. Mr. Johnson, of Grafton, and Rev. Mr. Forbush, of Northbridge; an ode, written by Mr. Charles Thurber, was sung, and the music was under the direction of Colonel Daniel Newhall.

A public library was established by the town in 1874, a reference to which must not be forgotten. This institution and the High School, which was established by the voluntary action of the people, are creditable indications of a public spirit and a regard for the cause of education not often found in the small towns of the Commonwealth. Various gifts have been made to enlarge the usefulness of the library, among which was one of \$500 by Wm. Knowlton, in 1876, and it receives an annual appropriation from the town. It was formerly kept in Waverly Hall, which was the old Congregational meeting-house when the hall was used by the town, but was removed to the Town House when that building was finished in 1884. According to the last report of the librarian, there were, on the 1st. of March, 1888, two thousand five hundred and eighty-eight volumes on its shelves, and six thousand four hundred and eighty-eight volumes had been delivered for circulation during the year ending at that date.

Previous to the erection of the present town hall, it has been already stated that the town held its meetings in Waverly Hall. Before that hall became available, meetings were held in the meeting-house in early times, and later, in one of the school-houses. In the autumn of 1884 the commodious building now in use was finished and dedicated. Its cost was \$19,945.87. On the occasion of its dedication, George H. Stoddard presided and after a prayer by Rev. George S. Ball, the keys were presented to the selectmen by Velorous Taft. After a poem by Mrs. M. A. Stoddard had been read, Hon. Elijah W. Wood, of Newton, delivered an address, and was followed by Hon. Elijah Brigham Stoddard, of Worcester, Stephen S. Taft, of Palmer, natives of the town, Hon. S. N. Aldrich, of Marlboro', whose mother was a native of Upton, and Rev. Fr. Boyle, of Grafton, in interesting remarks. The house was built on the site of the old Nelson tavern, on the westerly side of the Common, which was one of the ancient landmarks of the town. Ezra Perry, Joseph Perry, Sylvanus Aldrich, E. H. Fisk, Luther Pike and Judson Childs were among its landlords in days when country taverns were important features in every town.

In an earlier part of this narrative lists of persons who have held the prominent town offices have been given to show who among the inhabitants of the town were conspicuous in their day and generation. That this may be further shown, it will be proper to insert in this record the names of those who have at

various periods represented the town in the General Court. The first General Court of Massachusetts, after the adoption of the Constitution, was held in what is now called the old State House, on State Street, in Boston, on Wednesday, October 25, 1780. The writer has no record of the Representatives from Upton prior to 1786, but the following list covers the period from that date to 1889, inclusive:

Ezra Wood.....	1786	None.....	1823

On the 1st of May, 1857, the twenty-first article of amendment of the Constitution, which had been adopted by the General Court of the years 1856 and 1857, was ratified by the people. That amendment provided that a census of the legal voters of each city and town on the 1st of May shall be taken and returned to the Secretary of the Commonwealth on or before the last day of June in the year 1857; and a census of the inhabitants and legal voters of each city and town in 1865 and every tenth year thereafter. It further provided that the House of Representatives should consist of two hundred and forty members, which shall be apportioned by the Legislature to the several counties, which counties should be divided into Representative districts by the county commissioners, except in Suffolk County, where the division should be made by the mayor and alderman of the city of Boston. Under the apportionment made in 1857, Northbridge and Upton constituted the Eighteenth Worcester District, and were represented until the next apportionment as follows:

Henry D. Johnson, of Upton..... 1858

Charles P. Whitin, of Northbridge.....	1859
Henry D. Johnson, of Upton.....	1860
Joshua W. Morse, of Northbridge.....	1861
Henry Shaw, of Upton.....	1862
William Kendall, of Northbridge.....	1863
George S. Ball, of Upton.....	1864
Samuel J. Fletcher, of Northbridge.....	1865
Arba T. Wood, of Upton.....	1866

Under the apportionment of 1866, based on the census of 1865, Northbridge and Upton constituted the Nineteenth Worcester District, and were represented until the next apportionment as follows:

Jonathan C. Taylor, of Northbridge.....	1867
William Knowlton, of Upton.....	1868
George L. Gibbs, of Northbridge.....	1869
Adams Fisk, of Upton.....	1870
Davis P. Gray, of Northbridge.....	1871
William Knowlton, of Upton.....	1872
Emory A. Howard, of Northbridge.....	1873
Nahum B. Hall, of Upton.....	1874
Cyrus F. Baker, of Northbridge.....	1875
Wesley L. Fisk, of Upton.....	1876

Under the apportionment of 1876, based on the census of 1875, Mendon, Milford and Upton constituted the Second Worcester District, and were represented until the next apportionment as follows:

William H. Cook, of Milford.....	1877
Augustus S. Tuttle, of Milford.....	1877
William H. Cook, of Milford.....	1878
Charles A. Davis, of Upton.....	1878
Homer W. Darling, of Mendon.....	1879
Isaac N. Crosby, of Milford.....	1879
Isaac N. Crosby, of Milford.....	1880
Benjamin A. Jourdan, of Upton.....	1880
Silas W. Hall, of Milford.....	1881
Charles W. Wilcox, of Milford.....	1881
Silas W. Hall, of Milford.....	1882
Edward S. Leland, of Upton.....	1882
Thomas J. Hall, of Upton.....	1883
David M. Richardson, of Mendon.....	1883
James F. Stratton, of Milford.....	1884
Daniel Reed, of Milford.....	1884
James F. Stratton, of Milford.....	1885
Henry J. Bailey, of Milford.....	1885
James F. Stratton, of Milford.....	1886
Henry E. Fales, of Milford.....	1886

Under the apportionment of 1886, based on the census of 1885, Northbridge, Upton and Uxbridge constitute the Tenth Worcester District, and have been represented as follows:

Daniel W. Taft, of Uxbridge.....	1887
Rowse R. Clarke, of Northbridge.....	1888
Joseph Addison Partridge, of Upton.....	1889

But there have been other representative men who must not be forgotten, some of whom have passed away and some of whom are now living, reflecting credit on their native town in the places of their adoption. Among these may be mentioned Hon. George W. Johnson, who was born in Upton October 6, 1832, and became a prominent citizen of Milford, where he died respected by the citizens of his adopted town, and remembered with affection by his old townsmen of Upton as their frequent and liberal benefactor. Samuel Austin Nelson, too, who was born in Upton October 9, 1819, and died in Charleston, South Carolina, June 26, 1887, carried with him

to his distant home the seeds of his New England training, and developed into a successful, large-hearted Christian gentleman, who secured the respect and love of all who were so fortunate as to live within the sphere of his influence. Hon. Henry Chapin,<sup>1</sup> of Worcester, was born in Upton May 13, 1811, and died in Worcester October 13, 1878.

Nor must Colonel Elijah Stoddard be overlooked in this narrative, who, with the exception of a temporary residence at the South, where he had formed business connections, was a life-long citizen of Upton, and filled a large space in its social and business life. Though more than once he was a member of the Board of Selectmen, he never sought office, and only accepted it under the urgent pressure of his fellow-citizens. Colonel Stoddard was descended from Anthony Stoddard, who appeared in Boston in 1639. Through John, Daniel and Samuel came Jeremiah, the son of Samuel, who lived in Hingham and married Rebecca Bates, of Bellingham. Jeremiah Stoddard had a son Ezekiel, also of Hingham, who married Lucy Forrestall. Both Jeremiah, the father, and Ezekiel, the son, were soldiers in the Revolution. Jeremiah Stoddard removed to Milford, and his son Ezekiel in early life removed to Upton, where he bought a farm and carried on the business of a farmer until his death. His children, all born in Upton, were Elijah, the subject of this sketch, born in 1785; Lucy, who married Daniel Forbes; Polly, who married Asa Wood; Lyman, who married Effa Colburn; Lucretia, who married a Moors; Electa, who married William Hale, of Fairhaven; Hartford, who married Sarah Taft; Rebecca, who married Merrill Ruggles; and Ezekiel Bates, who married Sarah Starkweather. Colonel Stoddard married, in 1809, Zilpha, daughter of Isaac and Hannah (Fisk) Nelson, and Isaac Nelson, the father of his wife, as well as his own father, was a soldier in the Revolution. His children were Ann Maria, born in 1810, who married Charles H. Batcheller, of Grafton, and Lemuel Torrey, of Weymouth; Isaac Nelson (1812), of whom later mention will be made; Lucy Jane (1815), who married Sylvanus N. Aldrich, and whose son, Hon. S. N. Aldrich, is at present United States sub-treasurer at Boston; Lois Nelson (1817), who married Joseph S. Farnum, at one time partner in business with William Knowlton; Electa (1819), who died young; Electa Juliania (1824), who married David Atwood; Elijah Brigham (1826), of whom also later mention will be made; and Janette (1829).

Colonel Stoddard, soon after his marriage, became connected with business operations in Savannah, Georgia, but returned home at the outbreak of the War of 1812, and bought the Farmer farm, in the south part of the town, which he occupied and managed about six years. About the year 1820 he resumed his business connections at the South, locating

himself in Charleston, where he remained four years. Not long after his return he opened a store, in which he began the business of buying and selling straw braid, which soon developed into the hat and bonnet manufacturing industry. In those days the farmers about Upton brought their various products to the town stores for sale and exchange, and among these were straw plait, which their wives and daughters braided from rye straw. These plait were at first used for trimming purposes, but became, finally, the seed from which the large straw hat and bonnet business of Worcester County has grown. Colonel Stoddard and the firm of Fisk & Bradish were among the pioneers in this branch of industry. For a time Colonel Stoddard was a partner with William Knowlton, under the name of Stoddard & Knowlton, but after the removal of Mr. Knowlton to West Upton, he carried on the business alone for some years, and finally retired to his new farm on the Mendon Road, not far from the Common, where he died in 1865. He was a man of indomitable energy, of uncompromising integrity, and at his death was a considerable owner of real estate, the management of which divided his time with the usual routine occupations of the farm.

Isaac Nelson Stoddard, the oldest son of Colonel Stoddard, was brought up in the schools of his native town, and at the early age of fifteen years taught a school in Medford. He was born, as above stated, October 29, 1812, and graduated at Amherst in 1832, having during his college career taught school in Mendon, Upton and Holliston. After leaving college he taught a classical school in Medway, and in 1833 became teacher of the High School in Plymouth. In 1835 he went to New Bedford to teach, remaining there until 1837, when he returned to Plymouth and resumed his old situation, which he continued to occupy with success until 1841. The writer of this sketch was fitted by him for Harvard in 1838, and among his scholars at various times were Judge Charles G. Davis, William G. Russell, Esq., of Boston, and the late Thomas Drew, at one time a resident in Worcester.

In 1841 Mr. Stoddard was appointed by Harrison collector of the port of Plymouth, and held office until 1845, in which year he was appointed cashier of the Plymouth Bank as the successor of Nathaniel Goodwin, and succeeded to the presidency of the Plymouth National Bank in 1879. He married, in 1836, Martha Le Baron, daughter of the late Hon. John B. Thomas, for many years clerk of the courts for Plymouth County, and has a large family of children and grandchildren, one of his sons, Charles B. Stoddard, being the cashier of the bank of which he (Isaac N. Stoddard) is president, and William S. Morrissey, the husband of one of his daughters, being the cashier of the Old Colony National Bank in the same town. Mr. Stoddard has been successful as a business man, and in the various trusts confided to

<sup>1</sup> See Chapter II.

him he has always held the confidence and esteem of the community in which he has passed more than fifty years of his life.

Of his brother, Elijah Brigham Stoddard, it will be perhaps superfluous to speak, as the chapter on the Bench and Bar of Worcester County contains a sketch of his career. The writer will content himself with stating that he was born in Upton in June, 1826, and graduated at Brown University in 1847. He was admitted to the bar in 1849, and settled in Worcester, where he married Mary, daughter of Hon. Isaac Davis. Mr. Stoddard has held many offices, having been a member of the House and Senate in the General Court, a member of the Executive Council, a member of the staff of the Governor, and mayor of his adopted city. He has been a director in the Providence and Worcester Railroad Company, and now holds the offices of secretary of the Mechanics' and Farmers' Mutual Fire Insurance Company, and of president of the Quinsigamond National Bank, both in Worcester.

In closing this history of the town of Upton there is little to add. The schools of the town are in a satisfactory condition and in the hands of a committee devoted to their interests. During the year 1887-88 the sum of \$4840.62 was expended for their support. The other expenditures of the town for the same year were: For principal and interest of the town debt, \$5803.75; for roads and bridges, \$1993.59; support of poor, \$2256.79; Fire Department, consisting of an engine and a hook-and-ladder company, with their apparatus, \$352.59; town library, \$250; town officers, \$750.54; State tax, \$1102.50; county tax, \$655; State aid, \$270; military aid, \$288; and sundries, \$1243.88.

The town has no water works, but William Knowlton & Sons, of West Upton, are liberally supplied with water and apparatus, affording abundant means of protection to their own and surrounding property in that village.

The business of the town, aside from the straw industry and the farming industry, includes a machine-shop, conducted by A. H. Chapman; a jewelry store, kept by J. M. N. Barrett; general and retail stores, conducted by C. H. Bull, C. S. Temple, T. B. Hawes, H. L. Patrick, C. A. Wood, E. A. Willard, H. C. Child and Mrs. A. A. Wood; and a drug-store managed by Stephen B. Fisk.

According to the census of 1885 the following schedule shows the agricultural product of the town:

Dairy products.....	\$32,314
Poultry.....	8,619
Wood products.....	20,074
Cereals.....	3,450
Fruits.....	5,220
Hay, straw and fodder.....	29,507
Meats and game.....	5,075
Vegetables.....	10,133
Domestic animals (value).....	40,109
Animal products.....	8,811
Food products.....	1,852
Green-house products.....	585

Hot-house products.....	270
Liquors and beverages.....	1,392
Other products.....	200
	\$167,628

The population of the town in 1885 was 2265, showing an increase from 1880 of 242, and at the same date its valuation was \$880,247. Though the increase in population and wealth has been small, and the general business of the town has somewhat declined, there is reason to hope and believe that with the advent of a railroad, and the consequent facilities for reaching a market for products, the prosperity of the town will be secured.

## BIOGRAPHICAL.

### HON. WILLIAM KNOWLTON.

In the lives of active and prominent citizens of our New England towns may be found much that is very instructive and inspiring to the present generation, inasmuch as they generally achieve their positions and fairly win their honors. Hon. William Knowlton, long identified with the business interests of Upton and one of the most active business men of southern Worcester County, was born June 29, A.D. 1809, at Boston. As a boy he was susceptible of deep and lasting impressions. For, although so young, he had a deep reverence for the late Dr. Lowell, of the West Church at Boston, where his parents worshipped. Perhaps that impression might have come in part from the deep reverence in which the doctor was held by his parents, but he retained it to the last. His parents for some reason moved to Hopkinton, Mass. There were then three sons and one daughter, William being the youngest. Somehow the family were in reduced circumstances. The father died, leaving these children to the care of the devoted mother. Each one was called to help keep the wolf from the door of this fatherless household, and William, though small and not more than ten or eleven years old, was put into the family of Mr. John Holmes, of Hopkinton, who died a half-century ago. While here as a boy he made a deep impression upon the whole family; his intelligence and fidelity won their hearts. While living here, his two older brothers, then quite young men, were drowned together in what is now called Echo Lake, Hopkinton. His mother was so lonely after the death of his brothers she took her youngest son, William, home. She lived then in Hayden row, Hopkinton. But his energy and his mother's needs and wisdom soon apprenticed him to the late James Bowker as a farmer and cooper. He carried on a small farm, bought the staves and hoop-poles standing, and went himself with his help or apprentices into the woods to cut and split them for the casks he made. Here he remained until he was twenty years of age; then, honorably, he bought the remaining

Wm Knowlton

year's time of his apprenticeship and went to Adams' Corner, in Northbridge, where he learned to bottom shoes. His sojourn here lasted about one year, when we find him in Upton, in the employ of the late Asa Wood. His energy and faithfulness made a most favorable impression upon all with whom he had to do, but the work was too confining and hard. His health failed, and he went to recruit at the home of his sister, who had married the late Daniel J. Coburn, then of Hopkinton, afterward of Boston, and at one time sheriff of Suffolk County, and who died at his home in Malden a few years ago. It became evident to his physician that he must have a more active, outdoor life, and after recruiting at his sister's some time, he entered the employ of Lyman Stoddard, in Upton Centre, in the year 1832. Mr. Stoddard kept a country store, and in connection therewith bought and sold domestic straw braids. Here he was in the open air a large part of the time, as he traveled to purchase the braids, though in the intervals of such employment took his place in the store. He apparently regained his health completely. While thus employed he impressed the late Col. Elijah Stoddard as the man he wanted. He proposed a copartnership. There was no building open in which the new firm could operate. They at once set about building a store, Mr. Knowlton going into the woods with Col. Stoddard to cut and hew the timber for it. In 1833 the firm of Stoddard & Knowlton was in it. It was a country store in Upton Centre, and in connection with it they bought domestic straw braids and also manufactured these into straw bonnets. This year, on the 1st of January, Mr. Knowlton married Miss Caroline Taft, and they began housekeeping over the store occupied by the new firm. This partnership lasted until 1836, when Mr. Knowlton moved to West Upton and formed a copartnership with Capt. William Legg, doing a general manufacturing business of ladies' goods in foreign and domestic braids. Mr. Legg before many years withdrew from the firm, and the late Joseph Farnum, of Worcester, took his place. Mr. Farnum withdrew after one year and Mr. Knowlton continued the business alone. Under his talents and energy it grew into a large business. In the mean time his own sons had grown up, and were from time to time admitted to the firm, and under the name of William Knowlton & Sons the business has been most prosperous and successful. Mr. Knowlton leaves four sons and one daughter. Some years ago the family were saddened by the sudden death of a beautiful daughter in the bloom of womanhood and usefulness, and his wife has only preceded him a few months into the invisible land.

As a man of great public spirit he has held the town office of selectman, but found himself earlier in life too absorbed in business to yield to the desire of his townsmen to give him office. But, as a Republican, he has been a liberal member of that party, and represented later in his life his district in the State

Legislature, as a member of the House in 1868 and 1872, and in the Senate in 1878 and 1879. In 1880 he was a delegate to the Republican National Convention at Chicago, where he became a strong supporter of James A. Garfield. His interest in education was most marked. He early saw a need of higher education in agriculture, and as a member of the State Board he did what he could to promote it. When the Agricultural College started he was deeply interested in its success, and became a patron and trustee of it, giving to it most liberally of his means; and as a member of its executive board, rendered it in its time of need most valuable services. He also has been a liberal donor to the Worcester County Free Institute of Industrial Science at Worcester, and gave some five hundred dollars to the town library of Upton. As a charter member of the First National Bank at Milford, he was from its start made a director, and at his death was the last original survivor of that board. As a townsman he was always interested in the welfare of the town, and his liberality has been felt in all its departments. His most marked traits of character were untiring energy and perseverance. It built up and firmly established a business that has become immense, even against the obstacles of want of capital at first, and frequent and severe losses, but when defeat came that would have crushed one with less power and energy his faith never faltered. His word was as good as his bond in business transactions. In the year 1857 he lost largely but paid his debts at maturity. Soon after this, at the breaking out of the war in 1861, came another commercial panic. But amid his great losses he met all his obligations except those of four of his largest New York creditors, who, seeing his burdens, advised him to make a small compromise, but in a few years he paid them in full, dollar for dollar. Thus, honest and true, he has reared a noble monument of sterling character and a successful business enterprise. His own opportunity for an education was exceedingly limited, but his mind was quick to learn in the school of life. His business ability was somewhat remarkable. He would often decide almost instantly in great transactions involving thousands of dollars, and seldom make a mistake. Such a man, of course, was a man of vast executive power. He could, in his best days, conduct his manufactory, run his farm and keep his many workmen feeling the ubiquitous power of his master-mind. As he prospered in business he grew in benevolence. He never forgot his early poverty, and hence was most generous to the poor. In later years he has not sought to increase his estate so much as to distribute to the poor and to help the indigent, but in all so modest and reticent in his gifts as to hardly let his left hand know what his right gave. His patriotism through the war and since has prompted him to help the disabled soldiers and the families of such whenever he felt they could be aided by his gifts. Rarely are riches given to one more broad and generous. In his affec-

tions he was very strong. He never forsook or forgot a friend. The simplicity of his character grew in beauty and attraction as he grew old. He loved little children and they loved him. He rarely passed one without a smile and such a gentle, winning recognition that the little one was drawn to him. And this simplicity expressed itself in a reverence that made him a constant attendant at church, and in earlier days a worker in the Sunday-school. Never a sectarian, he worshipped with those with whom he happened to be. He, however, loved the Unitarian faith, and gave freely to promote its interests. Identified from the first with the Unitarian Society here, a few years ago he built a church at West Upton and gave its use to the society for purposes of worship, and followed it with interest as long as he lived. In his family, as a tender husband, father and grandfather, his character shone out with all its ripe beauty. When terrible suffering and pain came he bore it most patiently and with humble submission to God's will, and tenderly and gratefully, even when he could not speak, by his eye and smile recognized the blessed ministry of his own loved.

He passed to his rest Sunday, July 18, 1886, at the age of seventy-seven. Then his active life closed,—dust to dust, ashes to ashes,—nature claims her own alway, yet he lives in what he accomplished, in his acts of beneficence, in the hearts of the poor who bless his name, in the affections of his family, in the memory of little children who loved him and of his fellow-townsmen and friends, and in the mansions of the Father's house on high.

#### REV. BENJAMIN WOOD.<sup>1</sup>

Benjamin Wood was born in Lebanon, N. H., September 15, 1772. He was the youngest but one of twelve children, seven of whom were sons; of these, three became ministers of the Gospel,—Samuel, the eldest, known as Dr. Wood, of Boscawen, N. H.; Benjamin, and Luther, the youngest of the family.

Benjamin fitted for college with his brother Samuel, and entered Dartmouth at the age of sixteen. He graduated in 1793, commenced the study of theology with Samuel, completing his preparation for the ministry with Dr. Nathaniel Emmons, a noted divine of Franklin, Mass.

He preached as a candidate for the first time in Upton the second Sunday in June, 1795, and received a call from the church to be their pastor the following December. The town assembled on the 31st of the same month to see if they would concur with the church in giving him a call to settle with them, and the result is seen on the records of the town as follows: "Voted, unanimously, to unite with the church in calling Mr. Benjamin Wood to the work of the ministry in this place, and to give him two hun-

dred pounds for a settlement, and eighty pounds annually for encouragement and support to settle with us."

His reply was given in the affirmative the following March, and he was ordained and installed on the 1st day of June, 1796. Rev. Samuel Wood, D.D., of Boscawen, N. H., delivered the ordination sermon; Rev. Isaiah Potter, of Lebanon, N. H., gave the charge to the pastor; and Rev. John Crane, of Northbridge, the right hand of fellowship. He succeeded Rev. Elisha Fish, who had been settled with this church forty-three years. After Mr. Wood had preached fifteen years, finding his salary inadequate for his support, an additional settlement was made upon him and he was paid \$400 annually.

During the following year he married Betsey Dustan, a descendant of the famous Hannah Dustan, of Haverhill, Mass. Their union was blest by a family of eight children—six daughters and two sons—whose names were as follows: Betsey, Palmer, Fanny, Philena, Samuel Willard, Judith Maria, Lue Ann and Hannah F., who is the widow of Colonel David C. Wood, of Upton, and is the only one now alive.

Five of Mr. Wood's children made for themselves homes in Upton. Betsey married and went to Holden to live, Judith Maria to Westboro', and Lue Ann to Boston. Several of them became members of the church, and all were highly respected citizens of the town. Samuel Willard settled in Upton; died February 10, 1838, twenty-seven years of age, leaving a widow and one daughter. Lue Ann, wife of Clark B. Wood, of Boston, died about forty-five years of age, leaving a husband and three daughters. The other members of the family lived to an advanced age, and left children and children's children after them. Early in life Mr. Wood was interested in Free Masonry and was a member of Solomon's Temple Lodge of Uxbridge.

He was deeply interested in everything that concerned the welfare of the town. He served one term Representative to the General Court, and several years one of the Superintending School Committee.

His great province, which acquired him his fame, was preaching. He had all the qualifications of a fine pulpit orator. He was an able theologian, with a commanding presence, easy and graceful in manner, possessing a voice of rare excellence that charmed his hearers, and made him one of the most popular preachers in all the region round about. In the Harmony Association, of which he was a member, he commanded the highest respect, and was greatly beloved, being affectionately and reverently called by them "Father Wood."

He was not only a pleasant speaker, but a powerful sermonizer. During his ministry he witnessed eight seasons of special outpouring of the Spirit, and admitted four hundred members to the church.

He was apt and brief on all occasions, and was specially sought to officiate at weddings and funerals.

<sup>1</sup> By Mrs. M. A. Stoddard.

*Beng<sup>d</sup> Wood,*

*L. L. Warren*

June 25, 1835, when the town was a hundred years old, he delivered the centennial address,—the records say, “in a strain of lofty and touching eloquence.” This address, his ordination sermon and the first one he preached after his ordination, his farewell to the old meeting-house and the dedication of the new, with numerous other sermons, which were printed soon after they were written, are now preserved in a bound volume in the Upton Town Library.

He lived with the beloved wife of his youth and the mother of his children nearly fifty years. After her decease, September 16, 1845, he married Miss Almira Howe, who was a devoted wife to him during the remainder of his life, a space of about three years. He was well preserved physically and mentally, and able to preach till within a short time of his death.

He had preached in the old meeting-house more than half a century when the society began to discuss the need of a new one. He was very anxious to keep the church and society united and to see them located in a new edifice while he lived, and was gratified in the consummation of his hopes early in January, 1849, by the dedication of a large and commodious house of worship by a church and society in thriving condition. At the sale of pews soon after its completion there was a call for more pews than there were pews for sale. He did not preach long in the new church. His health began to fail. He preached his last sermon the last Sunday in March.

He was very fond of singing, and took great interest in that part of divine worship. During his last sickness he sent for the choir to come to his room that he might once more listen to their voices in a hymn of praise.

They assembled at his bedside and sung, at his request, in his favorite tune, “Concord”—

“The hill of Zion yields  
A thousand sacred sweets,” etc.

The love of his people was manifested in his last days, when they formed a procession and marched by the open door of his sick-room to take a last fond look of their much-loved pastor. The strong attachment between him and his people was mutual.

He died April 24, 1849, in the seventy-sixth year of his age, and fifty-third of his ministry. His funeral sermon was preached by Rev. H. A. Tracy, of Sutton. The inscription on his monument in the village cemetery sums up his life in the following touching tribute:—

“His works are his monument,  
The affection of his people his epitaph,  
His life of duty and devotion his obituary.”

L. L. WARREN.

L. L. Warren was born near Upton, August 2, 1808. His father, Major Eli Warren, a man of sterling worth and generous spirit, had been for many years identified with the interests of Upton, and had

given himself, with untiring energy, to everything that pertained to the public weal.

Partaking of this nature, the son, after completing his education at Amherst Academy, entered into business relations with his father, and prosecuted this vocation industriously for ten years.

In 1835 Mr. Warren married Mary A. Wood, of Upton, and soon afterward moved to Kentucky to secure the advantages held out by the rapid immigration pressing down the Ohio Valley. Before starting West, he had resolved to locate at St. Louis, but during his journey met a gentleman who gave him a glowing description of Louisville's future prospects, and urged him to alter his plan. Following this suggestion, he stopped at Louisville, which was then but little more than a village, and, after investigating the advantages offered, began the shoe business with a small capital. This business he continued uninterruptedly and prosperously for forty-eight years. His energy and prudence in business affairs soon established for him an enviable reputation as a safe financier, and marked him as a successful merchant.

During the existence of State banks Mr. Warren was, for several years, a director in the Northern Bank of Kentucky. In 1864 he organized the Falls City Bank, and, as president for twenty years, managed its affairs with his usual ability and success.

In the midst of absorbing business engagements, he took a deep interest in religious and educational affairs, and an earnest consecration of time, labor and means to their advancement characterized his entire life. His early taste for the advancement of educational interests clung to him through his long career. He represented his ward in the School Board of Louisville a number of terms, and for ten years, as chairman of the Finance Committee, his keen foresight and unerring judgment saved to the Board many thousand of dollars. He gave much thought to improvement in the methods of teaching in the schools, and was one of the first to advocate the introduction in Louisville of the training-school system. To familiarize himself with the subject, he visited the New England States, and made a thorough investigation of the systems at his own expense, and by continued effort succeeded in establishing training-schools in his adopted city.

As a friend and patron of *religious* schools, he was no less prominent. He was one of the founders of the large and flourishing Presbyterian School in Louisville, a director in Centre College and the Theological Seminary at Danville, Ky., and for many years attended to the finances of these institutions.

With various other movements of both a business and charitable nature he was prominently identified; but it was in his *church* affairs that his greatest efforts were enlisted. As an elder in the Presbyterian Church for over forty years, in the city, Presbytery and Synod, he was an unfaltering worker. He

was one of the founders of the old Chestnut Street Church in 1847, and in the erection of the magnificent Tabernacle at Fourth and Broadway, which was destroyed by fire soon after its completion, his zeal and liberality knew no bounds. It was his cherished desire to see the congregation with which he had been so long connected worship in as thoroughly an appointed church as could be built, and he advocated the step with untiring persistence. In the erection of so costly an edifice, the collection of the necessary funds to carry out the design was no inconsiderable barrier to the consummation of the task, and to many success seemed impossible. But Mr. Warren had enlisted all of his religious zeal in the enterprise, and his purse was placed at the command of the Building Committee. His subscription of twenty thousand dollars had gone into the general fund, and the church was erected; and when the committee appeared before the congregation to make their final statement, a debt of forty-three thousand dollars was reported. It was then that Mr. Warren reached a higher plane of disinterested devotion to his church, and proved his faith by his works, and wiped out the debt with a check for the needed forty-three thousand dollars. As a manifestation of its appreciation of his noble liberality, the congregation dropped the name of "Tabernacle," under which the church had been dedicated, and in honor of him called it "The Warren Memorial Church."

In public and business affairs he enjoyed the unwavering confidence of his associates, and his private charities were as freely distributed as those of any one in the history of Louisville.

Mr. Warren died, after a short illness, March 19, 1884, in his seventy-sixth year. A handsome monument marks his resting-place in Louisville's beautiful cemetery. It bears as his epitaph the memorable words that fell from his lips: "What I have done, I have done for Christ's sake." A wife and nine children survive him.

#### REV. GEORGE S. BALL.

Rev. George S. Ball, pastor of the Unitarian Society in Upton, was born in Leominster, Mass., May 22, A.D. 1822, and is the son of Micah R. and Rachel (Lincoln) Ball.

He is a fairly well-preserved man of sixty-six years of age. He received a meagre education in the common schools until the age of sixteen, when, obtaining from his father a release of his time, he devoted himself to the further study in the higher schools of his native State. He found it hard work to earn his bread and pay for his education; but he persevered, working, as it were, with a book in one hand and some instrument of manual labor in the other. This required energy and self-denial, but by faithful, continued efforts he graduated at the Meadville Theological School in the first regular class, that of 1847.

In the autumn of the same year the society at Ware

invited him to settle with them, and he was ordained October 13th as their pastor. He remained there two years, when his health failed, and he asked for dismission. After a rest, he was much better, and began preaching in Upton, and at the end of some months of labor here, he was, at their request, installed a minister in February of 1850. The connection thus formed has continued ever since.

Under this long pastorate, for modern times, he has become thoroughly identified with the town and all its interests. He represented it in the Constitutional Convention of 1853. In 1861 he was elected Representative, for the district composed of Northbridge and Upton, to the Legislature of 1862; but about the same time he was called to be chaplain of one of the Worcester County regiments, already in the field, the gallant Twenty-first Regiment of Massachusetts Volunteers. He was exercised to know which position to take. His love of his country and its pressing needs in the hour of peril persuaded him to forego the honor of the former, that he might do something to mitigate the sufferings of camp and battle-field, and thus do a little to sustain and maintain inviolate the government under which liberty and prosperity had come to this people. He accepted the post of chaplain, and went at once to the regiment, then stationed at Annapolis, Md.

In the first battle of that regiment, at Roanoke Island, he won the hearts of "the boys" by his brave and efficient aid to the wounded, and in the report of the commanding colonel to the general, a copy of which was transmitted by the colonel to Governor Andrew, he received warm approval.

The following paragraph is taken from the "History of the Twenty-first Regiment,"<sup>1</sup> which was written by General Charles F. Walcott:

In the thirteen months that he had been with us, he had shared with the regiment every peril and hardship which it had been called to face and endure, and had won the lasting respect and love of every man in it of whatever creed. Never losing sight of his duty as a Christian clergyman, he had been far more than a mere chaplain to us. Ardently patriotic, always hopeful, manly and courageous, he exerted a strong and lasting influence in keeping up the tone of the regiment in its soldierly as well as its moral duties. As our postmaster, no matter what inconvenience to himself, the mail was never left to take care of itself, when by his energy it could be forced to come or go. To our sick and wounded he had been, with unfailing devotion, a brave, tender and a skillful nurse. An honor and grace to his calling and the service, it was a sad day in the regiment when he left us.

So we may say Mr. Ball has been far more, in Upton, than a mere clergyman, a good man, a good citizen, never a strong partisan, but friend and minister to all who needed or would receive his help. For thirty-nine years he has labored in this field, save two years, when he was colleague with the venerable Dr. Kendall, at Plymouth, and the time of his service in the army. He served also as chaplain to the Massachusetts House of Representatives in 1863, and as a member from his district in 1864, and as a member of the State Senate in the years 1866 and 1867.

*George S. Ball*

On the 18th of June, 1848, while settled at Ware, he was married to Hannah B. Nourse, daughter of Caleb and Orissa (Holman) Nourse, of Bolton, Mass. They had eight children born to them, seven of whom are now living.

Mr. Ball's life has been very active in anti-slavery and moral reform of all kinds. But most marked is his influence on his own townsmen and the people of the vicinity, where his name is a tower of strength.

## CHAPTER CXXIII.

### GRAFTON.

BY WILLIAM T. DAVIS AND A HISTORICAL ADDRESS  
BY HON. FRANK P. GOULDING.

On either side of Quinsigamond River, which flows from the lake bearing that name into Blackstone River, are various ridges of land more or less extended, rising by easy ascent from the valley, and most of them cleared and cultivated to the summits. On the slopes of some of these hills, and on the higher table lands of others, and on the banks of the stream, are located the different villages of which the town of Grafton is composed. The territory included within the bounds of the town extends about five miles from north to south, and four miles from east to west, and is bounded on the north by Shrewsbury, on the east by Westborough and Upton, on the south by Upton and Sutton, and on the west by Sutton and Millbury. Few towns can boast of situations more beautiful or landscapes more attractive than those, which one after another greet the eye of a stranger as he enters its domain and wanders along its hillsides and through its valleys. Standing on the central village and looking towards the north, Brigham Hill, on whose eastern slope the hamlet of North Grafton seems to be hiding itself from the setting sun, bounds the horizon on the north and west, while along its base the river Quinsigamond is seeking its unconscious way to the sea, and in the distance Wachusett stands guard against the unwelcome blasts of a colder clime.

This was the territory known in early times as Hassanamisco, and inhabited by the Hassanamesits, a family of the Nipmuck tribe. It is memorable as having been one of the earliest fields in which John Eliot labored for the Christianization of the aborigines. Here the second Indian church was established, and here the Indian James the Printer lived, who aided Eliot in his work on the Indian Bible.

Of the Hassanamesits there is only one survivor within the town, Sarah Maria Cisco. She occupies about two acres and a half of the old Indian reservation, which she has inherited from her ancestors and which has never been owned by a white man. In 1887 the Legislature passed a resolve providing for

the payment of an annuity of two hundred dollars to this last representative of the old Hassanamisco tribe, to be paid by the selectmen of Grafton quarterly after January 1, 1887, during her life. It would be a fitting and interesting memorial if, after the death of the beneficiary, her land could remain ungranted and unoccupied and suitably enclosed to be preserved for all coming time as a memorial of the aborigines of our State.

Within the territory of Grafton is to be found also an interesting landmark, reminding us of one of the first, if not actually the first, schoolmaster in the Massachusetts Colony. Elijah Corlet, born in London in 1611, graduated at Lincoln College, Oxford, and came to New England while a young man. He was the first schoolmaster in Cambridge, and taught in that town from 1641 until his death, which occurred February 24, 1687. Owing to his efforts in behalf of education, the General Court granted him two hundred acres of land November 12, 1659, and October 23, 1668, five hundred acres. But these grants have no connection with Grafton. On the 22d of May, 1661, however, the Colony records state that "in answer to the petition of Mr. Elijah Corlet the Court judgeth it meet to grant the petitioner liberty to purchase of Netus, the Indian, so much land as the said Netus, said Indian, is possessed of according to law, for the satisfaction of the debt due to the petitioner from said Negus." Mr. Corlet had Indian scholars in his school, and it is thought by some that a son of Netus was one, and that the debt was owed for his tuition. On the 11th of October, 1665, Edmond Rice, of Marlboro', and Thomas Noyes, of Sudbury, reported to the court that the debt due from Netus to Mr. Corlet was seven pounds ten shillings, and that, as authorized by the court, they had laid out three hundred and twenty acres at the north end of Nepnop Hill for the benefit of Mr. Corlet. In 1685, Mr. Corlet sold the land to Alice Thomas, of Dedham, and on the 17th of October, 1716, the grandchildren of Mrs. Thomas sold it for two hundred pounds to Benjamin Willard, housewright; Joseph Willard, webster; Thomas Pratt, Jr., husbandman, all of Framingham, and Nehemiah How, of Sudbury. A description of the land may be found in the deed from these grandchildren in the Suffolk Registry of Deeds, Book 37, Folio 250. The land has been variously called Corlet's Grant, Willard's Farm and the Farms District.

But it is not proposed to include in this narrative any details concerning Hassanamisco before its settlement by the white man. They belong rather to a history of the Indian tribes than to that of a town whose birth dates only back to its incorporation and earlier occupation. When the territory forming the town of Sutton was sold to the English by John Wampus, the Sachem, he reserved four miles square for the use of the Indians, and these sixteen square miles constituted the town of Grafton at the time of its incorporation.

They were exclusively used by the Indians until 1718, when, with the approval of the General Court, Elisha Johnson, of Sutton, bought of the natives a tract within their limits. Other purchases soon after followed, and in 1728, no less than nine white families were living on the land. In 1726, in accordance with the petition of Samuel Chandler and John Sherman, in behalf of themselves and other persons living in Concord, Sudbury, Marlborough and Stow, for permission to purchase the territory of the Indians, a committee of the General Court, consisting of Nathaniel Byfield and Samuel Thaxter, of the Council, and John Chandler, Major Tileston and Captain Goddard, visited the territory and reported September 27, 1727, "that they had carefully viewed the lands proposed to be sold by the natives there, containing about seven thousand five hundred acres, about one-half whereof being good soil but very stony, the other half pitch-pine and shrub-plain; are of opinion, and have accordingly valued and estimated the land at the sum of twenty-five hundred pounds," and recommended that the purchase be approved on certain specified conditions. The result of the negotiation which followed was the execution of the following deed:

*To all people to whom these presents shall come:*

Ami Printer, Andrew Abraham, Moses Printer and Ami Printer, Jr., Indians of Hassanamisco, in the county of Suffolk, within his majesty's Province of the Massachusetts Bay, in New England, being owners and proprietors of one-seventh part each of and in the Indian native right of land in Hassanamisco aforesaid, Peter Muckamaug and Sarah, his wife, of Hassanamisco aforesaid (owners and proprietors in the right of the said Sarah), of one-seventh part of the said native right, and Christian Misco, relict widow of George Misco, late of Hassanamisco aforesaid, deceased, and Joshua Misco, of Hassanamisco aforesaid, son of the said deceased, being owners and proprietors of two-sevenths parts of the said native right—

Sendeth Greeting.

Whereas, The Great and General Court or Assembly of the aforesaid Province having been thereunto petitioned, as well by the Indian natives and proprietors before named, as by a number of English petitioners, did in their late session, viz.: in the month of December last past, in answer to the petition of Samuel Chandler, John Sherman and others, gave liberty to the petitioners therein referred to to purchase the lands at Hassanamisco by them petitioned for, containing about seven thousand five hundred acres, more or less, of the Indian natives and proprietors thereof for the settlement of forty English families of the petitioners or their posterity and no others, exclusive of the English and Indians upon the spots already, reserving for and unto the said Indian proprietors, each of them, an equal dividend in said land with each of the purchasers, to be laid out so as to comprehend and take in their present improvements. And also one hundred acres more of land there to be the present Indian proprietors', their heirs and assigns forever. And also the sum of twenty-five hundred pounds, to be deposited in the hands of trustees appointed, authorized and empowered by the said Great and General Court or Assembly, to receive and set out the same at interest, on good and sufficient security, and said interest to be paid to the said Indian proprietors, and the said Court shall from time to time order and direct, together with sundry immunities, privileges and enfranchisements, respecting the settlements and support of the ministry and school, as in and by the records of said Court (relation thereunto being had) doth and may appear.

Now Know Ye, That the said Ami Printer, Andrew Abraham, Moses Printer, Ami Printer, Jr., Peter and Sarah Muckamaug, Christian Misco and Joshua Misco, being the only surviving proprietors of the Indian right of land in Hassanamisco aforesaid, for the consideration before mentioned, have given, granted, bargained, sold, alienated, enfeoffed, conveyed and confirmed, and by these presents do fully, clearly and

absolutely give, grant, bargain, sell, convey and confirm unto each of the persons hereinafter named, being of the proprietors to whom such liberty of purchasing was granted as aforesaid, or otherwise admitted by and with the approbation or allowance of the said Great and General Court, one-fortieth part in common and undivided right of and in all that tract or parcel of land called or known by the name of Hassanamisco, situated and bounded by and with the township of Sutton, in the aforesaid county of Suffolk, and surrounded by said Sutton, excepting always, and reserving out of this present grant and sale, such parts and dividends thereof and therein unto them, the said Indian proprietors, and to their heirs and assigns forever, as is expressed and mentioned in a vote of the House of Representatives on the 9th of June, 1725, and accordingly reserved by the Great and General Court as is above expressed, excepting also and reserving out of this present grant and sale, all such other parts and parcels of said tracts of land as hath been formerly (with the allowance of said Court) granted unto sundry English people, to be holden of them, the said purchasers, their respective heirs and assigns forever, conformable to the votes, acts and orders of the said Great and General Court passed thereon in their aforesaid session—that is to say, to James Watson, of Boston, in the County of Suffolk, in the Province aforesaid, mariner, Benjamin Willard, gent, and Joseph Willard, husbandman, being both of or in the County of Suffolk, in the Province aforesaid, each one-fortieth part thereof to them, their respective heirs and assigns forever.

To Joseph Rice, Jonathan Morse, David Harrington, Samuel Biglo, Samuel Stow, Zerubbabel Eager, Samuel Brigham, John Sherman, John Warren, Nathan Brigham, Sen., Charles Brigham, husbandmen, Jeremiah Barstow, trader, and Elizabeth Harrington, widow, all of Marlborough, in the County of Middlesex, in the Province aforesaid, each one-fortieth part thereof to them, and their respective heirs and assigns, forever.

To Samuel Chandler, John Hunt, Joseph Merriam, Eleazer Flagg, Jacob Taylor, Ebenezer Wheeler, Joseph Barrett and Benjamin Barrett, husbandmen, all of Concord, in the aforesaid County of Middlesex, each one-fortieth part thereof to them, their respective heirs and assigns, forever.

To Samuel Hall, Simon Gates, Jr., John Collar, husbandmen, all of Stow, in the aforesaid County of Middlesex, each one-fortieth part thereof to them, their respective heirs and assigns, forever.

To William Rogers, gent., and William Rogers, Jr., bricklayer, both of Wenham, in the County of Essex, in the Province aforesaid, each one-fortieth part thereof to them, their respective heirs and assigns forever.

To Jonathan Rice and Richard Taylor, both of Sudbury, in the County of Middlesex, aforesaid, husbandmen, each one-fortieth part thereof to them and their respective heirs and assigns forever.

To John Jones, of Hopkinton, in the aforesaid County of Middlesex, husbandman, one-fortieth part thereof to him, his heirs and assigns forever.

To Jonas Houghton, of Lancaster, in the aforesaid County of Middlesex, husbandman, John Davis, of Ipswich, in the County of Essex, in the Province aforesaid, husbandman, and Thomas Weeks, of Shrewsbury, in the aforesaid County of Middlesex, husbandman, each one-fortieth part to them and their heirs and assigns forever.

To Thomas Pratt, of Hassanamisco, in the aforesaid County of Suffolk, husbandman, and Nathaniel Wilder, of Lancaster, in the aforesaid County of Middlesex, husbandmen, each one-fortieth part to them and their heirs and assigns forever. Together with all the rights, members, profits, privileges, emoluments, hereditaments and appurtenances to the said granted premises belonging or in any were appertaining, excepting only as before excepted. To have and to hold the said granted, bargained premises, with the appurtenances and every part thereof, except as before excepted, to them, the said James Watson, Benjamin Willard, Joseph Willard, Joseph Rice, Jonathan Morse, David Harrington, Samuel Biglo, Samuel Stow, Zerubbabel Eager, Samuel Brigham, John Sherman, John Warren, Nathan Brigham, Charles Brigham, Jeremiah Barstow, Eliza Harrington, Samuel Chandler, John Hunt, Joseph Merriam, Eleazer Flagg, Jacob Taylor, Ebenezer Wheeler, Joseph Barrett, Samuel Hall, Simon Gates, Nathaniel Hapgood, Phineas Rice, Simon Gates, Jr., John Collar, William Rogers, William Rogers, Jr., Jonathan Rice, Richard Taylor, John Jones, Jonas Houghton, John Davis, Thomas Weeks, Benjamin Barrett, Thomas Pratt and Nathaniel Wilder, and to their respective heirs and assigns forever, to their and each of their own proper use and benefit and behoof in manner as aforesaid.

And they, the said Ami Printer, Andrew Abraham, Moses Printer, Ami Printer, Jr., Peter and Sarah (Printer) Muckamaug, Christian Misco and Joshua Misco, for themselves, heirs, etc., respectively do, by

these presents, covenant, promise and grant to and with the said grantees or purchasers before named, and each and every one of them, their respective heirs and assigns in manner following, that is to say, that they, the said Ami Printer, Andrew Abraham, Moses Printer, Peter and Sarah Muckamaug, Christian Misco, Joshua Misco and Ami Printer, Jr., are the true, sole and lawful owners of all and singular the lands at Hassanamisco aforesaid, not otherwise heretofore disposed of in manner aforesaid, and they, the said Indian proprietors, and their heirs respectively, shall and will, from time to time, and at all times forever hereafter, warrant and defend in said granted and bargained premises, with the appurtenances and every part thereof, excepting only as before excepted, unto the grantees or purchasers before named, severally and respectively, and their respective heirs and assigns, against themselves and their heirs, and against the lawful claims or demands of any other person whomsoever, claiming, or to claim, the Indian or native right on property thereof, or of any part thereof.

In witness whereof the said Indian proprietors have hereunto set their hands and seals the nineteenth day of March, Anno Domini 1727.

AMI PRINTER (with mark).  
 MOSES PRINTER (with mark).  
 ANDREW ABRAHAM (with mark).  
 PETER MUCKAMAUG (with mark).  
 SARAH MUCKAMAUG (with mark).  
 CHRISTIAN MISCO (with mark).  
 JOSHUA MISCO (with mark).  
 AMI PRINTER, JR. (with mark).

Signed and sealed and delivered in presence of,

NEHEMIAH HOW.  
 JONATHAN ADAMS.  
 ISAAC WHITNEY.

Moses Printer signed in presence of us,

JOHN CHANDLER, JR.  
 JOHN MACKINTIRE (with mark).

Suffolk, ss.

HASSANAMISCO, March 20, 1727-28.

Ami Printer, Andrew Abraham, Peter Muckamaug, Sarah Muckamaug, Christian Misco, Joshua Misco and Ami Printer, Jr., then severally acknowledged this instrument to be their respective act and deed, before me,

JOHN CHANDLER, JR.; *Just Pucis*.

Suffolk ss.

Moses Printer then acknowledged this instrument to be his act and deed before me,

JOHN CHANDLER.

July 2, 1728, received and accordingly entered and examined by.

JOHN BALLANTINE, *Regr.*

Before the deed of purchase was made the committee of the General Court, in a report made to that body December 18, 1727, recommended the imposition of certain conditions, which they expressed as follows:

The committee having concurred the several articles and conditions on which the petitioners for Hassanamisco have liberty to purchase a tract of land commonly known by the name of the Indian proprietors thereof are humbly of the opinion that the petitioners, before the execution of their deeds, shall, each one for himself, respectively be bound to the trustees appointed for said Indians and their successors, with sureties for paying a — with part of the cost of building a meeting-house convenient for the public worship for themselves and nine English families already settled within the said Hassanamisco, and the Indian inhabitants of said Hassanamisco, as also for paying the same proportion towards building a school-house convenient for the teaching to read and write the children of the same inhabitants, as well Indian as English, and that they will set apart twenty acres of said land for the use of said school, to remain for said service forever, and also for paying the same proportion for and towards the settling a learned orthodox minister, and for settling for the said minister a lot of land, equal to other allowances, to be his own as soon as he takes office among them, and likewise the building for himself (Petitioner's accounts read) a dwelling-house and breaking up four acres of land in the lot on dividend that shall be apportioned and set off to him, all to be within the time and according to the limitation in the act of the Great and General Court relating hereunto in their present session.

And for as much there are nine English families already settled on lands within Hassanamisco that will be accommodated by the meeting-house, school-house, minister and schoolmaster in said Hassanamisco, as

above, the committee humbly propose that the said nine families be by special act of the Great and General Court required to pay each a fortieth part to and for erecting and finishing said meeting-house and school-house, and to and for the support of said minister and schoolmaster. And inasmuch as the maintaining a minister and a schoolmaster are to be from generation to generation, and consequently not so proper for condition in a bond,—The committee humbly conceive that in the aforesaid act of the Great and General Court the said forty petitioners, with the other nine English families, inhabitants shall be obliged, from time to time, forever hereafter to maintain a minister and schoolmaster for the Indians and their children without cost or charge to said Indians or their posterity.

The General Court subsequently passed the following act, entitled: "An act to oblige and require the forty petitioners for a tract of land at Hassanamisco, together with the English proprietors of the other lands there, to pay the charge of erecting a meeting-house and school-house, and of supporting an orthodox minister and schoolmaster in the place."

Whereas the court, at their present session, in answer to the petition of Samuel Chandler and others to the number of forty, whose names are subscribed to the said petition, did give them liberty to purchase the lands at Hassanamisco by them petitioned for, containing about seven thousand five hundred acres, more or less, of the Indian natives and proprietors of Hassanamisco, upon condition that forty English families shall be settled upon the land, which families are to be of the petitioners or their posterity, and no others, and yet within the space of three years they build and finish a meeting house for the public worship of God; and build a school house for the instruction as well of the Indians as English children, and settle a learned orthodox minister to preach the gospel to them and constantly maintain and duly support a minister and schoolmaster among them. And yet all the above articles shall be without charge to the Indian natives:

And whereas there are sundry English proprietors of other lands in Hassanamisco who will be accommodated by the said meeting-house, school-house, minister and schoolmaster, as well as the forty petitioners,

Be it therefore enacted by the Lieutenant-Governor, Council and Representatives in General Court assembled, and by the authority of the same, that the said forty petitioners be and are hereby required and obliged to pay each of them an equal part of four-fifths parts of the charge of building the said meeting-house and school-house, and that the said English proprietors of the other lands at Hassanamisco be and are hereby required and obliged to pay the other fifth part of the above-said charge to be apportioned and assessed by the trustees of the Hassanamisco Indians already appointed by this court upon the said English proprietors, according to their best judgment and discretion, they having regard unto the quantity of land and other estate in Hassanamisco belonging unto them, and to be collected by such meet person as they the said trustees shall appoint for that end. The abovesaid proportion of charges, together with the method of assessing and collecting the same, to be observed and pursued until the said petitioners and the other proprietors be invested with the powers and privileges of a township.

On the 22d of March, 1727-28, a warrant was issued by John Chandler, justice of the peace, on the petition of seven proprietors,—to wit, Benjamin Willard, Jonas Houghton, Samuel Chandler, Phinebas Rice, John Sherman, John Warren and Benjamin Barrett,—and directed to Benjamin Willard, of Hassanamisco, directing him to call a meeting of the proprietors of the purchased lands on Tuesday, the 9th of the following April. The meeting was held at the house of Jonathan How, in Marlboro', and Edward Goddard, Jonathan Rice and Joseph Rice were chosen moderator, clerk and treasurer, respectively. It was voted that a committee consisting of one from Marlboro', one from Sudbury and one from Stowe or Sudbury should be appointed to take a survey of the plantation of Hassanamisco and ascertain

the centre of the same, and Capt. Brigham, of Marlboro', John Hunt, of Concord, and Richard Taylor constituted the committee. It was also voted that the meeting-house should be located in the middle of the plantation "in case it be accomodable" and otherwise at the nearest "accomodable" point, the same to be decided by a majority of the proprietors.

It was further voted that four acres be set apart for the meeting-house and burial-place and training-field, and by a subsequent vote that the school-house also should be built on the same lot. A vote was also passed that a committee be appointed to confer with the trustees of the Hassanamisco Indians and to determine on some plan for "the setting out" of the lands reserved for them and to lay out the same. It was further voted that the committee lay out lots for the minister and school-master. The committee was also empowered to lay out and equalize the lots of land and meadow for the first division in eighty lots of upland, each lot containing forty acres with necessary allowance for quality, and also to equalize the lots of meadow after the same manner, so preparing the several allotments in two parcels of upland and two pieces of meadow to each proprietor for a lot on draught. Capt. Nathan Brigham, John Hunt and Richard Taylor were selected as members of the committee. Other votes were passed relating to assessments to defray the expenses of the proprietor, to the method of calling meetings and other less important matters and the meeting adjourned to the 19th of April. On that day the adjourned meeting was held at the house of Nehemiah How and went in a body to visit the centre of the plantation as fixed by the committee. It was not found to be convenient for a meeting-house and a spot was selected lying westerly on the northerly end of a hill called by the natives Assawosachasuck. Afterwards another spot was viewed and finally chosen, and it was voted to set the meeting-house by a white oak tree, about which a heap of stones was placed. The proprietors returned to the house of Mr. How and all questions concerning the dimensions of the meeting-house and school-house and the time when it would be expedient to begin to build them were postponed for future consideration. Capt. Willard, Samuel Biglow, Jonathan Rice and Eleazer Flag were added to the equalization committee, and that committee was authorized to "se-quester" lands for highways. The four acres thus set apart now include the Common and the street round it in the central village of Grafton.

The plantation of Hassanamisco, managed by its proprietors, possessed many of the attributes and functions of a town. It had no formal act of incorporation and no town officers. The proprietors, however, had their clerk and treasurer and assessors, laid out highways, built bridges, erected saw-mills, settled a minister, established schools, divided the lands, raised money by taxation, set out a burial-place, and

at their meetings did all that was needful in the administration of their affairs.

In 1730 the meeting-house was built on the lot now constituting the Common, and in September, 1731, it was voted to invite Rev. Solomon Prentice to settle as the minister of the plantation with a salary of one hundred pounds per annum. Mr. Prentice was ordained on the 29th of December, 1731, and on the day previous the church was formed. The history of this church will be more particularly referred to later on in this narrative. The management of affairs by the proprietors continued until 1735, when the town of Grafton was incorporated. The records of the proprietors containing a full statement of their doings, with a description of the lands allotted to its members in various divisions, form a part of the archives of the town and are full of matter of interest and value to the historian and antiquary.

On the 18th of April, 1735, the following act of incorporation was passed by the General Court, in response to the petition of a committee of the proprietors chosen to present it to the court in January, 1733-34:

An Act for creating a town in the County of Worcester at a plantation called Hassanamisco by the name of Grafton.

Whereas, the plantation commonly called Hassanamisco in the County of Worcester is competently filled with inhabitants who have built and finished a convenient meeting-house for the publick worship of God, and have settled a learned orthodox minister amongst them and have addressed this court to be erected into a separate and distinct township to hold and enjoy equal powers and privileges with the other towns in the province;

Be it enacted by His Excellency, the Governor, Council and Representatives in the General Court assembled and by the authority of the same:

SECTION 1. That the plantation at Hassanamisco in the county of Worcester, as the same is hereafter bounded and described, be and hereby is set off and constituted a separate and distinct township by the name of Grafton.

SECTION 2. The bounds of said township being as follows: viz., beginning at a pine tree on a rocky hill at the southeast corner and from thence extending north four miles with thirty-six perch allowance for loss of measure bounding easterly on Sutton to a heap of stones on a rock; from thence west by the needle four miles with thirty rods allowance to a heap of stones; from thence south four miles to a heap of stones ninety rods south of the river and a little southward of a small pine swamp northward of a little brook; and from thence to the corner first mentioned.

SECTION 3. And that the inhabitants thereof be and hereby are vested and endowed with equal powers, privileges and immunities that the inhabitants of any of the other towns within this province are or ought by law to be vested or endowed with.

And be it further enacted by the authority aforesaid,

SECTION 4. That such of the grantees as have not fully complied with the conditions of settlement be and hereby are subjected each one to pay a fiftieth part of all rates and taxes that shall hereafter be laid on the inhabitants of the said town as well as for the support of the ministry among them and other town charges until they have fully complied with the conditions of settlement. Passed and published April 18, 1735.

On the day of the passage of the act of incorporation the following order was passed by the court:

In the House of Representatives, April 17, 1735, ordered that Mr. Thomas Pratt, one of the prisable inhabitants of the new town lately made at the plantation called Hassanamisco, in the County of Worcester, be and hereby is fully authorized and empowered to assemble the

freeholders and other qualified voters to make choice of town officers to stand until the anniversary meeting in March next.

Sent up for concurrence,

J. QUINCEY, *Speaker*.

In Council April the 18th, 1735.

Read and concurred,

T. MASON, *Depl. Sect'y*.

A true copy. Converted to

J. BELCHER.

Examined,

THAD. MASON, *Dep. Sect'y*.

The name of Grafton was probably suggested by Governor Belcher in honor of Charles Fitz Roy, Duke of Grafton, a member of the Privy Council and a grandson of Charles the Second.

At the first meeting of the town Thomas Pratt was chosen moderator and Nehemiah How, clerk. The names of succeeding moderators and clerks up to 1879, as well as those of selectmen and treasurers, may be found in the history of Grafton, prepared by Frederick Clifton Pierce, and need not be repeated in this narrative. The names of Representatives to the General Courts, both from the town and from the various Representative districts of which Grafton has formed a part, are here given as perhaps more clearly illustrating the prominent men in the various generations of the town. From the years 1735 to 1755, inclusive, none were chosen. The following persons were Representatives in the years placed against their names :

Ephraim Sherman.....	1757	Nathaniel Adams.....	1799

Under the operation of the twenty-first article of amendments of the Constitution Grafton became in 1857 the Seventeenth Representative District of Worcester, and was represented until the next apportionment as follows :

Rufus E. Warren.....	1858	Wm. G. Scandlin.....	1863
Gilbert C. Taft.....	1859	Joseph M. Rockwood.....	1864
Charles Brigham.....	1860	Stephen R. White.....	1865
Wm. F. Slocumb.....	1861	S. Davis Hall.....	1866
Seth J. Axtell.....	1862		

Under the apportionment based on the census of 1865, Grafton and Shrewsbury constituted the Twelfth Worcester Representative District, and were represented as follows :

John McClellan, of Grafton.....	1867
J. H. Wood, of Grafton.....	1868
George K. Nichols, of Grafton.....	1869
Thomas Rice, of Shrewsbury.....	1870
J. S. Nelson, of Grafton.....	1871
George F. Slocumb, of Grafton.....	1872
George H. Harlow, of Shrewsbury.....	1873
Charles L. Pratt, of Grafton.....	1874
Thomas T. Gregg, of Grafton.....	1875
John F. Searle, of Grafton.....	1876

Under the apportionment based on the census of 1875, Grafton and Northbridge constituted the Third Worcester Representative District, and were represented as follows :

Henry B. Osgood, of Northbridge.....	1877
Lucius M. Sargent, of Grafton.....	1878
Francis E. Fowler, of Northbridge.....	1879
Henry F. Wing, of Grafton.....	1880
George F. Searles, of Northbridge.....	1881
Ashley W. Rice, of Grafton.....	1882
Arthur F. Whitin, of Northbridge.....	1883
Joseph A. Dodge, of Grafton.....	1884
Benjamin L. M. Smith, of Northbridge.....	1885
Luther K. Leland, of Grafton.....	1886

Under the apportionment based on the census of 1885, Grafton, Westborough, Northborough, Southborough, Berlin and Shrewsbury constitute the Twelfth Worcester Representative District, and have been represented as follows :

George B. Brigham, of Westborough.....	1887
Samuel L. Howe, of Shrewsbury.....	1887
J. Henry Robinson, of Southborough.....	1888
Albert L. Fisher, of Grafton.....	1888
Alden M. Bigelow, of Grafton.....	1889
Samuel Wood, of Northborough.....	1889

On the 15th of January, 1742, the following act was passed by the court, which should have a place in this record :

Whereas, the proprietors of Hassanamisco lands in the township of Grafton, by an Act of this Government passed in the first year of his

present Majesty's reign, are obliged to erect a meeting-house and school house and to support a minister and schoolmaster there; and four-fifths of the charge thereby arising was by said act ordered to be defrayed by forty persons, to whom liberty was granted to purchase said lands; the other one-fifth part by nine families before that time settled there, and that the aforesaid proportion of charges, together with the method there assigned for raising and collecting monies to defray the same, should continue to be observed until these lands should be made a township; and whereas said lands have since been erected into a township and that before the whole of the charges so incurred were collected in pursuance of said act; therefore, to enable said proprietors to collect the same,

Be it enacted by the Governor, Council and House of Representatives,

That the assessors of the propriety of Grafton, *alias* Hassanamisco, be, and hereby are, enabled to assess the several proprietors of the said tract of land purchased by said forty persons and settled or possessed by said nine families for all charges which may still be behind and unpaid and which arose or were occasioned by the compliance of said proprietor with the duties required of them by the aforesaid act; four-fifths thereof to be apportioned upon the present proprietors of the lands petitioned for and purchased by the aforesaid forty persons; the other one-fifth on the present proprietors of the lands which were possessed by said nine English persons or families before the said act. And the Collector on Collectors of the said proprietors of Grafton, *alias* Hassanamisco, are hereby enabled and impowered to gather and collect such taxes as shall be committed to him or them by the assessors as aforesaid, and upon the refusal of any of the proprietors who shall be assessed as aforesaid to pay such sum or sums as shall be set upon or required of them, the collector or collectors, to whom the said tax is committed, are hereby impowered and directed to make sale to the highest bidder of so much of the said proprietor's land who shall so refuse to pay as shall satisfy his part of said assessment, the overplus, if any there be, to be set to the said proprietor; and the said collector or collectors shall put up a notification in some public place in said Hassanamisco and also give notice of the intended sale in one or more of the public newspapers at least thirty days before the time appointed for said sale.

It has been stated that Rev. Solomon Prentice was invited by the proprietors of Hassanamisco to settle as the pastor of the plantation, and was ordained on the 29th of December, 1731. At the ordination the sermon was preached by Rev. Nathaniel Appleton, of Cambridge, and the church was organized the day preceding. The first members of the church were: Rev. Solomon Prentice, Samuel Cooper, Benjamin Goddard, Benjamin Willard, James Whipple, James Whipple, Jr., Thomas Pratt, Thomas Drury, James Leland, Joseph Willard, Simeon Willard, Nehemiah Howe, John Collar, Jonathan Hall, Jason Whitney, Abner Stow, Ephraim Brigham, James Cutler, Eleazer Flagg and Samuel Warren. The ministry of Mr. Prentice was disturbed by a controversy, having its rise in the excitement attending the preaching of Whitefield, and he was dismissed July 10, 1747. Mr. Prentice was born in Cambridge May 11, 1705, and graduated at Harvard in 1727. After his dismissal he was settled in Easton, but finally returned to Grafton, where he died May 22, 1773.

The second pastor of the church was Rev. Aaron Hutchinson, a native of Hebron, Conn., and a graduate of Yale, in the class of 1747. At his ordination, which occurred June 6, 1750, Rev. Mr. Pomroy, of Hebron, preached the sermon. His ministry continued until November 18, 1772, after which he retired to a farm in Pomfret, Vt., where he lived until his death in September, 1800.

After an interval of four years, Rev. Daniel Grosvenor was ordained October 19, 1774, and the Rev. Ebenezer Grosvenor, of Scituate, preached the ser-

mon. Mr. Grosvenor continued in the ministry until 1787, when he was dismissed. He died at Shrewsbury March 20, 1849. Mr. Grosvenor was followed by Rev. John Miles, a native of Westminster, and a graduate of Brown University in the class of 1794. He was ordained October 12, 1796, and continued in the pastorate until October 12, 1825. He was born in Westminster November 3, 1765, and studied for the ministry with Rev. Dr. Sanger, of Bridgewater. He died in Shrewsbury March 20, 1849. His ordination sermon was preached by Rev. Asaph Rice, of Westminster.

Rev. Mr. Searle succeeded Mr. Miles, and was dismissed December 3, 1831. At his ordination Rev. Samuel Green, of Boston, preached the sermon. In consequence of the dismissal of Mr. Searle, the church in a body, with a large minority of the parish, "withdrew and made provision for the preaching of the gospel in its purity, finding that there was no probability of their continuing to enjoy the labors of an Evangelical pastor while connected with the parish." The church having withdrawn from the parish, the latter having adopted the Unitarian creed, a new church was formed out of the parish August 5, 1832, and a meeting was held April 2, 1832, at which Pardon Aldrich was chosen moderator; Harry Wood was chosen clerk; Isaac Wood, Charles M. Pratt and Charles Brigham, Jr., were chosen assessors; and Henry Wood, Joseph Bruce, Royal Keith, Charles Brigham, Henry Parker, Samuel Wood and Leonard Wheelock were chosen a committee to report what disposition should be made of the old meeting-house. At a subsequent meeting the committee on the meeting-house reported that, "it is expedient to dispose of the old meeting-house, and cause the same to be removed from off the Common, and for the purpose to choose a committee to cause the pews in the old meeting-house to be appraised by three disinterested and discreet men and freeholders within the county of Worcester, afterwards to sell the same at public auction, giving suitable notice of the intended sale, to the highest bidder, on condition that the purchaser cause the said old meeting-house to be removed from the Common within such reasonable time as said committee shall direct, and to apportion the proceeds of the sale among the owners of the pews in said house according to the appraisement."

A new meeting-house was built, and a new church, now the Unitarian, called the First Congregational, was formed. The old meeting-house was sold and removed to the westerly side of the street, on the west side of the Common, where, in a remodeled state, it still stands, one of the oldest relics of religious edifices to be found in the State, and the present Unitarian meeting-house was built. The new church, organized in the Unitarian Society, consisted of Joseph C. Luther, Isaac W. Wood, Joseph Bruce, Harriet Bruce, Charles Brigham, Jr., Hannah P. Batchelier, Charles L. Heywood, Asahel Fairbanks

Susannah Wood, Azabah S. Heywood, Annah E. Brigham, Leonard Wheelock, Persis Wheelock, Catherine L. Heywood, Betsey Jackson, Rufus P. Chase, Deborah Keith, Tabatha Prentice, Sarah Lesure, Martha G. Holbrook, James Shepard, Elizabeth Shepard, Elizabeth Adams, Polly Knowlton, Augustus S. Heywood and Hepsebah Clisbee.

This church and society were formed under the care and direction of Rev. Edward Brooks Hall, who after a few months received a call from the First Congregational Society of Providence, and was there installed November 14, 1832. Mr. Hall was born in Medford, on the 2d of September, 1800, and graduated at Harvard in 1820. In 1826 he was settled in Northampton and afterward in Cincinnati. Mr. Hall was the father of Rev. Edward H. Hall, now settled over the Unitarian Society in Old Cambridge.

Rev. Rufus A. Johnson followed Mr. Hall, and was installed October 16, 1833. His pastorate continued until March 12, 1838, and he died in Upton in 1860. Rev. Cazneau Palfrey succeeded Mr. Johnson, and was installed April 25, 1838. His pastorate continued until April 25, 1843. Mr. Palfrey was born in Boston August 11, 1805, and graduated at Harvard in 1826. Previous to his ministry at Grafton he was settled over the Unitarian Society in Washington, where he remained six years.

Rev. Edward B. Willson followed Mr. Palfrey, and was ordained January 3, 1844. His pastorate continued until July 1, 1852, when, at his own request, he was dismissed. Mr. Willson was a native of Petersham, and born August 15, 1820. During his pastorate the question was raised, and probably not for the first time, as to who were the rightful owners of the records of the First Church. As has been already stated, in 1832, at the time of the settlement of Mr. Hall, the parish became Unitarian, and the church seceded in a body, carrying the records with them. The seceding church, being unanimous in its action, claimed still to be the First Church, while the old parish claimed that the church emanating from and attached to the First Parish was the First Church, and owned the records. Soon after the secession of the church an application for the records was made by the Unitarian Society, but refused. Now a new application was made in the form of a compromise, which was granted in the same friendly and Christian spirit in which it was made. The controversy was settled by the loan of the first two volumes of the records for the purpose of having copies made by the Unitarian Parish, and by the gift of a copy of that part of the third volume which contained the records of the old church previous to the secession. In the present resting-place of the controversy, the seceding church holds the original records and the First Parish holds the copies. It is of little consequence which is called the First Church and which the Second, provided each adheres to the spirit in which the old church was founded, and per-

forms faithfully the Christian work for which it was originally established.

After the resignation of Mr. Willson the church was without a pastor until 1858, and during a large part of the interval its pulpit was supplied by Rev. Farrington McIntire, a native of Fitchburg, and a graduate of Harvard in 1843. In 1858 Rev. William G. Scandlin, a native of Portsmouth, England, and a graduate of the Meadville School in 1854, was called. He was installed June 23, 1858, and his pastorate continued until his death, March 17, 1871. In the early days of the War of the Rebellion, in response to his offer of service, he was appointed chaplain of the Fifteenth Regiment of Massachusetts Volunteers, and received a leave of absence from his people. During a subsequent service as a member of the Sanitary Commission he was taken prisoner and confined for a time in Libby prison. His services, both as chaplain and dispenser of the bounties of the Commission, were widely known and gratefully acknowledged. During his pastorate his meeting-house was burned, in 1862, and immediately rebuilt. His death was universally lamented both by his own society and his fellow-citizens of all denominations, and the day of his funeral was observed in Grafton as a day of mourning.

Rev. Charles H. Tindall, a native of New Brunswick, N. J., where he was born October 17, 1841, succeeded Mr. Scandlin. At first a Methodist, he finally entered the Harvard Divinity School, from which institution he graduated in 1872. He was ordained at Grafton on the 5th of the following September, on which occasion the sermon was preached by Rev. Charles Carroll Everett, of Cambridge. After three years of service Mr. Tindall resigned, and in August, 1875, was settled over the Unitarian Society in Fall River.

Rev. William Smith Burton, a native of Norwich, Vt., succeeded Mr. Tindall. He was born September 29, 1832, and graduated at the Norwich University. He had seen service in the war as a cavalry major, had engaged in the business of farming, and had been settled over the Unitarian Societies of Athol and Clinton. He was installed at Grafton in January, 1876. The present pastor of the society, settled in 1887, is Rev. Edmund Quincy Sewall Osgood, a native of Cohasset and a graduate of Harvard, who had previously been settled for several years over the old First Parish in Plymouth.

After the dismissal of Rev. Mr. Searle in 1831, to which reference has already been made, the seceding church and some of the members of the Old Parish formed a new parish, and built the meeting-house now standing on the west side of the Common. The first pastor of this society was Rev. John Wilde, a native of Dorchester and a graduate of Middlebury College in 1827. He was installed over "The Evangelical Congregational Society," as the new society is called, June 20, 1832. His pastorate continued until

1839, after which time he resided in Conway, N. H., West Falmouth and Topsham, Me., Stamford, Conn., and Alexandria, Va., in which latter place he died, February 10, 1868.

Mr. Wilde was followed by Rev. Thomas Curtis Biscoe, born in Cambridge, July, 1810, and a graduate of Amherst in 1831. He was ordained July 18, 1838, and dismissed July 26, 1868. Rev. John H. Windsor succeeded Mr. Biscoe, and was installed September 29, 1868. The present pastor of the society, whose pastorate has now been extended four years, is the Rev. B. A. Robie, and under his as well as preceding pastorates the condition of the society is one of union and prosperity.

The next religious society to be mentioned in the order of its birth, assuming that the Unitarian Society and the Evangelical Congregational have a common date of origin, is the First Baptist Society, which, with the two societies already mentioned, is planted at the central village. It was formed in 1767, and in 1773 had for the first time a minister of its own. From that year until 1775 Rev. Mr. Winchester served, and in 1779 Rev. Mr. Eustick began a three years' ministry. In 1784 Rev. Mr. Ingalls became connected with the society; but at the end of three years his ministry terminated, and the society gradually faded away. After the dissolution of the society, those holding to the Baptist faith held meetings at private houses until the year 1800, when, on the 20th of June, the present church was organized with the names of sixty persons signed to the Articles of Faith and Covenant. Early in the next year a meeting-house was built which gave place in 1880 to the edifice now used by the society. After various temporary supplies, Rev. Thomas Barrett was ordained June 12, 1816, and remained until 1821, and, after an interval of two years, Rev. Otis Converse was ordained June 25, 1823, and resigned March 31, 1836.

Rev. John Jennings was installed August 10, 1836, and resigned in 1842 to take charge of a church in Worcester. In the year of the resignation of Mr. Jennings, Rev. Calvin Newton assumed the pastorate, and in the next year he also resigned. Mr. Newton was followed by Rev. Benjamin A. Edwards, who was ordained March 19, 1845. After a pastorate of four years, he was succeeded by Rev. Mr. McGear, who remained only a short time, and was followed by Rev. Joseph Smith in May, 1851. In 1857 the pastorate of Mr. Smith terminated, and in the same year Rev. J. M. Chick began a three years' ministry. In 1861 Rev. Gilbert Robbins became pastor, and remained until 1868. In the following year Rev. De Forest Safford was installed, but remained only a few months. In August, 1872, Rev. A. C. Huzzey was ordained, and was followed by Rev. Frank J. Bartlett, the present pastor.

The Second Baptist Church, located at North Grafton, was formed in 1836, by members from the

churches of the central village and of Shrewsbury and Boylston. In 1838 Rev. Minor G. Clarke was settled over the church, and in the next year a meeting-house was built. Mr. Clarke was followed by Rev. William C. Richards in 1841, Rev. Alfred Pinney in 1844, Rev. William C. Richards in 1846, Rev. William Leverett in 1849, and at later dates by Rev. Joseph M. Rockwood, Rev. J. D. E. Jones and Rev. L. M. Sargent.

The Free-Will Baptist Church, in that part of Grafton called Farnumsville, began to hold meetings in Saundersville in 1838. In 1839 the church was organized with thirteen members, and in 1840 Rev. Benjamin D. Peck was installed as pastor. He was dismissed in 1846, and followed by Rev. George T. Day, who was installed in December, 1846. Rev. Joseph Whitemore was installed April 1, 1851, and dismissed April 5, 1852. During his pastorate the church changed its location to Farnumsville, where it now holds its services. Rev. Joseph Thayer was installed in 1852, and, after a season of languishment, followed by a reorganization, the society settled Rev. B. F. Pritchard in 1862, who remained until 1864. Rev. M. W. Burlingame was installed March 21, 1865, and dismissed the next year. Rev. G. W. Wallace followed in 1867, Rev. Daniel C. Wheeler in 1870, Rev. A. M. Freeman in 1871, Rev. Francis Read in 1876, and Rev. Andrew J. Eastman in 1878. The present pastor is Rev. Mr. Sherwood, who succeeded Rev. W. H. Ward.

St. Philip's Church was established in 1848, in which year a small chapel was built in the central village. Until 1858 it was a mission church, and attended by Father Sheridan and other pastors from Blackstone. In 1858 it was annexed to St. Ann's Church of Worcester, and attended by Father Powers of that church until 1869. In July, 1869, it was joined with the Millbury Mission, and made a parish, under the pastorate of Rev. M. J. Doherty. In October, 1869, the Grafton Mission was made a parish, to which that of Upton was joined. Rev. A. M. Barrett was appointed, in 1869, resident pastor, and was succeeded by the present pastor, Rev. James Boyle. There are also Catholic societies, more recently formed, at North Grafton and Fishersville.

The Saundersville Congregational Church was formed in 1860, with sixteen members. Its first pastor was Rev. William Miller, who continued his service from that year until April 6, 1862. He was succeeded by Rev. Simeon Waters in 1863, who remained about three years. Rev. James E. Hall followed in 1867, and remained one year. His successor was Rev. Alvan J. Bates, who was installed June 22, 1869, and who was followed by Rev. Harvey M. Stone, whose installation took place December 18, 1878. The present pastor is Rev. B. F. Perkins.

A Methodist Episcopal Church was organized at North Grafton in 1842 and reorganized in 1866. Its present pastor is Rev. E. H. Tunncliffe.

The town of Grafton was not destined to a career of peace when its act of incorporation was secured. After a few years the French and Indian War broke out, and in Grafton and vicinity a company was formed to aid in the relief of Fort William Henry. Of this company thirty-six belonged to Grafton, and the commander of the company was Captain James Whipple, and its march began August 16, 1757. In 1758 twenty-three more enlisted for the service, and in 1759 nineteen additional. A list of the soldiers engaged in this war belonging to Grafton may be found in "Pierce's History," already referred to.

In the War of the Revolution Grafton was not behind her sister towns in patriotic efforts to establish the American Union. At a town-meeting held February 1, 1773, in answer to a letter from the Committee of Correspondence in Boston, the town voted, "that they would defend their rights at all hazards; that they would not suffer their property to be taken from them in an unconstitutional manner, and that they were ready to co-operate with their brethren in Boston and other places in any measures to obtain a redress of grievances." With regard to the importation of tea, the town resolved, "as the people of this town, that any one individual, or any body of men, that shall encourage, aid or assist in importing or receiving any such tea, or any other article, while subject to a duty, the sole purpose whereof is to raise money to appropriate to any sordid measure, or any use whatever, contrary to our just rights of distributing our own property, wherewith God and nature hath made us free, can but be viewed as criminal to our country, as well as to the mother-State, and must be so viewed by us." On the occurrence of the battle of Lexington, on the 19th of April, 1775, messengers were sent throughout the State of Massachusetts, and on the same day two companies marched for Boston. These companies were followed by continued enlistments during the war, and the names of those engaged in the war may be found in the history of Mr. Pierce, who has made an exhaustive search of the archives at the State-House, in order to make the lists complete. It is not necessary to repeat these lists in this narrative. It is sufficient to say that Grafton bore her full share of the burdens of the war, and furnished her full quota of the soldiers necessary to bring it to a favorable conclusion.

Neither the French War with England at the close of the last century, in which the maritime towns severely suffered, nor the War of 1812, materially affected the interests and welfare of Grafton. Her interests were at that time chiefly agricultural, and the annoyances of war failed to reach her borders. Her people were at that time also initiating manufacturing enterprises, and the home market they sought was the more thoroughly secured by the distracting influences of the war on foreign trade. It is by no means certain that the foreign complications, which began with the French Revolution and closed with

the peace of 1815, did not serve to establish on a firmer foundation the manufacturing enterprises of our country, than could have been secured with the channels of trade clear and unobstructed.

Between the War of 1812 and the War of the Rebellion little occurred to demand the services of the pen of the historian. The town enjoyed a peaceful country life, gradually enlarging its population, steadily increasing and perfecting the means of educating its people, constantly extending its manufactures, and the better sustaining its people by honest labor in their search for a more thorough enjoyment of life, by the cultivation of their social and intellectual powers. While in a condition of prosperity never before experienced, the War of 1861 came on. Though the premonitions had been unfavorable, yet on the whole the war was a surprise, and consequently the news of the attack on Massachusetts troops in Baltimore on the 19th of April, 1861, took the people by surprise. On the 20th of April, the day of the reception of the news, the selectmen called an informal meeting of the town to be held on the afternoon of that day. The selectmen at that time were, Jonathan D. Wheeler, H. S. Warren, George W. Estabrook and John McClellan. Charles Brigham was chosen moderator, and James W. White, secretary. Prayer was offered by Rev. Wm. G. Scandlin, and a committee, consisting of Esek Saunders, Wm. F. Slocum, W. D. Wheeler, J. S. Nelson and Thomas C. Briscoe, was chosen to prepare business for the meeting. Benjamin Smith, an old Revolutionary soldier, ninety-eight years of age, was seated on the platform. At this meeting it was resolved that "we, citizens of the United States residing in Grafton, do pledge to our country in this hour of trial and need, our property, our lives and our unconditional support, and that we will do all in our power to defend our country against the dangers which threaten its existence." It was also resolved that "we will encourage the organization of a company of volunteer militia in the town of Grafton, to be equipped, drilled and ready for service at their country's call, and that it is incumbent on us to see that the families of those who may be called into service are supplied during their absence." It was further resolved that "we recommend the holding of a legal town-meeting as soon as may be, and that it is the sense of this meeting that the town should appropriate the sum of four thousand dollars, or so much as may be needed to defray the expenses of organizing such company of volunteer militia, and to render such aid to the families of those who enlist as may be needed." A committee of seven was appointed, consisting of Rufus E. Warren, Esek Saunders, Alfred Morse, C. M. Pratt, W. D. Wheeler, L. M. Sargent and Wm. F. Slocum, to procure the enlistment and charter of a volunteer company. At the close of the meeting the selectmen at once issued their warrant for a town-meeting to be held on the 29th of April, and on that occasion S. D. Hall was chosen moderator.

Rev. J. M. Rockwood offered a prayer, and a committee of fourteen was chosen to have a general oversight of military affairs. The committee consisted of A. M. Bigelow, Winthrop Faulkner, Rufus E. Warren, Chandler M. Pratt, Jasper S. Nelson, Alfred Morse, Levi Rawson, Esek Saunders, S. P. Champney, J. B. Adams, Charles Brigham, Lawson Munyan, S. J. Axtell and A. M. Bigelow. At this meeting it was voted to appropriate four thousand dollars for the purpose of organizing a company, and to pay one dollar per day to each volunteer who engaged in drilling. It is not necessary, however, to repeat here the different votes of the town passed at various times. The town furnished three hundred and ninety-three men for the war, ten of whom were commissioned officers. The whole amount of money expended during the war was \$68,001.09, of which the sum of \$28,650.86, expended in State aid, was repaid by the Commonwealth.

The following list of persons who enlisted or were drafted into the service during the war is taken from the "Report of the Selectmen of Grafton" for the year ending March 5, 1866:

Thomas D. Allen, three years.....	15th Regiment, band
Thomas D. Allen, three years.....	20th Regiment, band
Benjamin F. Allen, three years.....	36th Regiment
Bradford E. Aldrich, three years.....	15th Regiment, Co. G
Albert D. Amisden, three years.....	Cavalry, Capt. Reed's Co.
Joseph K. Axtell, nine months.....	51st Regiment, Co. E
Seth J. Axtell, Jr., nine months.....	51st Regiment, Co. E
Ira C. Aldrich, nine months.....	51st Regiment, Co. E
Cyrus B. Axtell, one year.....	Heavy Artillery
Charles Apel, three years.....	
Charles M. Batchelder, three years.....	15th Regiment, Co. G
Henry S. Ball, three years.....	15th Regiment, Co. G
Adelbert L. Brown, three years.....	15th Regiment, Co. G
A. T. Bryant, three years.....	15th Regiment, Co. G
Joseph Bonner, three years.....	15th Regiment, Co. G
Charles W. Berry, three years.....	15th Regiment, Co. G
Thomas M. Bigelow, three years.....	15th Regiment, Co. G
George M. Bigelow, three years.....	34th Regiment, Co. A
Harvey Bassett, three years.....	15th Regiment, Co. G
Gilbert E. Balcom, three years.....	15th Regiment, Co. G
Lucius Boyden, three years.....	15th Regiment, Co. G
George R. Brown, three years.....	25th Regiment, Co. A
John S. Burns, three years.....	34th Regiment, Co. A
Joseph Bardsley, three years.....	15th Regiment, Co. G
Thomas C. Bryant, three years.....	34th Regiment, Co. A
George E. Burns, three years.....	15th Regiment, Co. G
Abel H. Balcom, three years.....	36th Regiment
Peter Barnes, three years.....	Butler's Brigade
Joseph Buxton, three years.....	36th Regiment, Co. C
John W. Bigelow, nine months.....	51st Regiment, Co. E
Arthur G. Biscoe, nine months.....	51st Regiment, Co. E
Willard Balcom, nine months.....	51st Regiment, Co. E
Daniel C. Brown, nine months.....	51st Regiment, Co. E
George A. Bartlett, nine months.....	51st Regiment, Co. E
George A. Bartlett, one year.....	Heavy Artillery
Edward Bonner, three years.....	Heavy Artillery
B. F. Barney (drafted), three years.....	1st Provost Guard
Joshua Brewer, three years.....	Heavy Artillery, Co. A
Thomas H. Brewer, three years.....	Heavy Artillery, Co. A
Mercus M. Bryan, three years.....	58th Regiment, Co. F
Edward E. Bigelow, three years.....	4th Cav.
Herbert Bond, three years.....	15th Regiment, Co. D
Wm. Blodgett, three years.....	15th Regiment
H. C. Brown, three years.....	15th Regiment
Marcus M. Bruce, one year.....	1st Heavy Artillery
John Brophy, one year.....	1st Heavy Artillery
Job D. Ballou, one year.....	1st Heavy Artillery
Alanson E. Burns, one year.....	Heavy Artillery
Marcus D. Balcom, one year.....	Heavy Artillery
Ambrose Boynton, one year.....	Heavy Artillery
Alden M. Bigelow, one year.....	Heavy Artillery
John Chappel, three years.....	15th Regiment, Co. G
Charles Clafin, three years.....	15th Regiment, Co. G
Charles Clafin, three years.....	14th Cav., Co. G
Charles L. Caswell, three years.....	15th Regiment, Co. G
Willard G. Clafin, three years.....	15th Regiment, Co. G
Curtis Cady, three years.....	15th Regiment, Co. G
Andrew J. Copp, three years.....	1st Bat., M. V. M.
Harrison J. Clisbee, three years.....	15th Regiment, Co. G
Julius A. Clisbee, three years.....	15th Regiment, Co. G
Preston A. Champney, three years.....	25th Regiment, Co. D
Samuel G. Champney, three years.....	25th Regiment, Co. D
Leroy S. Currier, three years.....	25th Regiment, Co. K
Leroy S. Currier, three years.....	25th Regiment, Co. K
Lorin S. Clark, three years.....	34th Regiment, Co. A
Villard Clapp, three years.....	34th Regiment, Co. A
Donald A. Campbell, three years.....	15th Regiment
Franklin T. Coburn, three years.....	15th Regiment
A. M. Cole, three years.....	39th Regiment
Edward F. Chamberlin, nine months.....	51st Regiment, Co. E
Edward F. Chamberlin, one year.....	Heavy Artillery
Moses Caswell, nine months.....	51st Regiment, Co. E
Wm. A. Copp, nine months.....	51st Regiment, Co. E

### The following soldiers were killed or died in the service :

Albert D. Amsden.....died at New Orleans May 13, 1862  
 Henry S. Ball.....died December 6, 1862  
 Adelbert L. Brown.....died June 19, 1862, of wounds  
 A. T. Bryant.....killed at Antietam September 17, 1862  
 Joseph Benner.....died May 13, 1864, of wounds  
 Gilbert E. Balcom.....died December 12, 1862  
 Lucius E. Boyden.....died August 26, 1862  
 Joseph Bardeley.....killed at Gettysburg in July, 1863  
 George E. Burns.....died November 6, 1862, of wounds  
 Peter Barris.....died December 19, 1862, at New Orleans  
 Charles L. Caswell.....died December 15, 1862, of wounds  
 Curtis Cady.....killed June 4, 1864, at Cold Harbor  
 Harrison J. Clisbee.....killed September 17, 1862, at Antietam  
 Preston A. Champney.....died in Andersonville Prison  
 Samuel G. Champney.....died October 10, 1864  
 Leroy S. Currier.....killed July 19, 1864  
 Donald A. Campbell.....died in prison February 16, 1865  
 Horace Day.....killed at Ball's Bluff  
 Orin L. Davis.....killed at Antietam September 17, 1862  
 George Davis.....died in 1864  
 Reuben A. Ellis.....died in 1862

 Lyman A. Walcott.....died June 17, 1863  
 Joseph C. Webb.....died July 30, 1864

It has been stated in the early part of this narrative that the original Indian reservation of Hassanamisco was four miles square. This territory of four miles square was what was purchased of the Indians by the Hassanamisco proprietors, and the town of Grafton when incorporated was limited to the same. At some time after the incorporation of the town, and before 1793, a strip of land a half-mile in width was set off from Shrewsbury on the north and the same

amount of land set off from Sutton on the south and both were annexed to Grafton, making that town five miles long instead of four, as it originally was. The dates of these annexations the writer has not been able to learn and he only knows that they were before 1793, because they are mentioned in the "History of Worcester County," written by Peter Whitney, and published in that year. The original boundaries of the town have experienced three other changes besides those referred to. By an act of the General Court passed June 14, 1823, it was provided—

That Abel Willard and John Willard, with the following described gore of land, be annexed to the town of Grafton, to wit: beginning at the northwest corner of the town of Grafton on Millbury line; thence on said Millbury line to the northeast corner of said town; thence on the same course north two degrees west to Flint's pond (so called); thence bounding down said pond to the outlet thereof; thence down the thread of said outlet until it meets little Blackstone river; thence down the centre of said river until it intersects the line of said Grafton; thence on said Grafton line to the first bounds; and that in future the said Abel and John shall be entitled to all the privileges and subject to all the duties incident to the inhabitants of said town of Grafton.

By an act passed March 3, 1826, it was provided:

That Tarrant Merriam and his family, together with a certain tract of land situated in the town of Shrewsbury, containing about one hundred and eighty-six acres more or less, chiefly owned by said Merriam, and bounded as follows, to wit: On three sides by the town of Grafton, and on the fourth side by a line beginning at a point on the boundary line of said Grafton, where the corners of one Jasper Rand's land and of the said Merriam's land meet, and on the east side of one Elijah Brooks' land, and thence running east ten degrees south thirty-seven rods to the road leading from said Grafton to said Shrewsbury, thence easterly on said road until it comes to said Merriam's land on the north side, thence east twenty-seven degrees north one hundred and twenty-five rods, thence east eight degrees north to a corner of the north boundary line of said Grafton, be and the same are hereby set off from said Shrewsbury and annexed to said Grafton, and they shall forever hereafter be subject to all the duties and entitled to all the privileges of inhabitants of said Grafton; provided, however, that said Merriam and the other owners of said tract of land shall be holden to pay all taxes that have been lawfully assessed upon them by said Shrewsbury previous to the passing of this act.

By still another act, passed March 3, 1842, it was provided that:

So much of Sutton as lies northerly and easterly of the following boundary lines, to wit: Beginning at the northwest corner of North-bridge, thence south eighty-two degrees west two hundred and twelve and one-half rods to the northeast corner of the school-house number ten in Sutton, thence north four degrees and nine minutes west to Grafton line, two hundred and eighty-seven and one-half rods to Grafton line, is hereby annexed to Grafton; provided, however, that all persons so annexed shall be holden to pay all taxes now due in the same manner as if this act had not passed.

It has been stated that four acres of land were set apart in 1828 for a meeting-house, a school-house and a training-field. A school-house was built in 1731 on what is now the Common, and there remained until 1832, when it was removed. It was twenty-one feet long and sixteen feet wide. Up to 1737 it continued the only school in the town, but in a very few years after that date the school became, as it was called, a "moving school," and was taught in five different districts in different parts of the year. It is not necessary, however, to follow the development of the school system along its devious way to its present useful condition. A high school was established in the town by means of the incorporation of a High

School Association in 1850, by whom a building was erected and leased to the town under an arrangement which continued until 1867, when the town bought the building for three thousand five hundred dollars and the association was dissolved. In 1869 the old school district system was abolished, and under a central management the schools have become more vigorous and useful. According to the report of the School Committee for the year ending January 31, 1888, there were at that time in the town a high school and twenty-one schools of higher grades. Of the twenty-one schools, five were located at the central village, four at North Grafton, two at Saundersville, four at Farnumsville and Fisherville, and the remaining six were the Waterville, Brigham Hill, Farms Precinct, George Hill, Keith Hill and Merriam Precinct. The High School enrollment numbered 69, and that of the common schools 994. The school appropriations for the year covered by the report were: For the High School, \$1600; common schools, \$7000; fuel and janitors, \$1350; books and stationery, \$800; School Committee, \$1350; and repairs and fixtures, \$300—making a total of \$12,400. The other appropriations, which it may be well to mention here, were: For town debt, \$6600; Fire Department, \$850; highways, \$3000; support of poor, \$5000; Town-House Sinking Fund, \$1360; Memorial Day, \$100; Common, \$50; library at the Centre, in addition to the dog fund, \$250; library at North Grafton, \$50; library at Farnumsville, \$25; library at Saundersville, \$25; water works, \$2500; street lights, \$300; town officers, \$1740; town-house expenses, \$750; State aid, \$150; miscellaneous, \$450; road damages, \$100; and liquor cases, \$300—making a total, including school appropriations, of \$36,000.

The Free Library mentioned in the above list was established in 1866, when Joseph Leland, a native and citizen of the town, gave the sum of one thousand dollars for the purpose, on the condition that the town would appropriate an equal amount. The gift was accepted with its condition and the library is kept in the town-house and receives the benefit of the Dog Fund and an annual appropriation of money. At the date of the last report of the trustees the library contained five thousand seven hundred and fifty-three volumes, of which two hundred and sixty-seven, including nineteen bound magazines, had been added during the previous year.

The industries of Grafton are distributed among the various villages of which the town is composed. A mill at the Central Village; another at Saundersville, on the Blackstone River; another at Farnumsville, also on the Blackstone River; a mill at North Grafton, formerly called the Grafton Mills; the Fisher Mills, at the junction of the Quinsigamond and Blackstone Rivers, and the lower mill at North Grafton, are engaged in the manufacture of cotton and fancy cloths and emery, and furnish occupation for a numerous and busy population. Besides these in-

dustry the manufacture of shoes is carried on at the North Village by J. S. Nelson & Co., and gives employment to nearly two hundred hands. The business of currying is also largely carried on and is an important feature in the industry of the town. A full description of all these industries is given in Pierce's "History of Grafton," and to that valuable work the reader is referred.

Among the institutions in the town are the Grafton National Bank, incorporated in 1865, as the successor of the Grafton Bank, established in 1854, with a capital of one hundred thousand dollars; the First National Bank, incorporated in 1864, also with a capital of one hundred thousand dollars; the Grafton Savings Bank, incorporated in 1869; the Franklin Lodge of Masons, established in 1852; the Sprague Post of the Grand Army, organized in 1866; and the Good Templars, established also in 1866. The town has a Fire Department, established by law in 1853, and an abundance of good water supplied by the Grafton Water Company. The population of the town does not largely increase. In 1875 it was 4442 and in 1885 had only increased to 4498. Such a sluggishness of increase cannot long continue. Its proximity to Worcester, which is fast becoming a populous city, in connection with its own admirable situation and desirable locations for residence easily accessible from that city and yet away from many of the annoyances which necessarily attend a bustling and noisy place of business, must in time attract to it a wave of immigration and give to it a healthy and prosperous growth.

Among the men who have been prominent in Grafton at various periods since its incorporation may be mentioned: Thomas Pratt, the moderator of the first town-meeting and of nine other town-meetings before 1750, and a selectman several years; Joseph Willard, a selectman eight years before 1748; Joseph Merriam, a selectman fourteen years before 1764; Nathaniel Sherman, a selectman nine years before 1752; Samuel Warren, John Goulding, Joseph Wood, Royal Keith, Joseph Bruce, Jonathan Wheeler, Charles Brigham, Phillip Wing, Edward Bigelow, A. M. Bigelow, James W. White, Jonathan D. Wheeler, John W. Slocumb, Jonathan Warren, and others, both dead and living, too numerous to mention. Of those natives of Grafton who have distinguished themselves outside of its borders in wider fields of labor may be mentioned William Brigham, Frank P. Goulding, Henry A. Miles, Samuel D. Warren, Sherman Leland, Phineas W. Leland and John Leland.

William Brigham was the son of Captain Charles Brigham, and was born in Grafton, September 26, 1806. He graduated at Harvard in the class of 1829, which was probably the most distinguished class of which the alumni of the college can boast. A list of its eminent men is almost a catalogue of the class. Among them were Rev. Joseph Angier, Chief Justice George Tyler Bigelow, Hon. William Brigham,

Rev. William Henry Channing, Rev. James Freeman Clarke, Hon. Francis B. Crowninshield, Hon. Benjamin R. Curtis, justice of the United States Supreme Court; Hon. George T. Davis, member of Congress; General George H. Devereux, Hon. William Gray, Dr. Oliver Wendell Holmes, Rev. Samuel May, Professor Benjamin Peirce, Rev. Chandler Robbins, Hon. Edward D. Sohler and Judge Joshua H. Ward. In such a class as this Mr. Brigham found no difficulty in taking a good rank. After admission to the bar he opened an office in Boston, which he retained until his death, which occurred July 9, 1869. His occupation as a sound and successful lawyer was diversified by antiquarian study, and the various historical works of which he was either the author or editor attest the accuracy of his mind and the diligence of his research.

A sketch of Mr. Goulding will be found in an appropriate place at the end of this narrative.

Rev. Henry Adolphus Miles is a descendant from John Miles, an early settler of Concord, where he was living as early as 1637. He was born in Grafton, May 30, 1809, and graduated at Brown University in 1829, receiving an honorary degree of Doctor of Divinity from his *alma mater* in 1850. After graduating at the Harvard Divinity School in 1832 he was settled for a time in Hallowell, Me., and from there went to Boston to assume the duties of secretary of the American Unitarian Association. At later dates he was settled in Lowell and Hingham, at which latter place he is now living, though not in the service of his profession. Dr. Miles is a man of large intellectual capacity, of original thought and deep and earnest convictions. As a public speaker he has always commanded the earnest attention of his hearers, and in social intercourse his genial disposition and warm heart and rare conversational powers win to his side all who come within their influence. If the writer may be permitted to introduce personal feeling into an historical narrative, he cannot refrain from saying that there are few men whom he holds in such affection and respect as the subject of this imperfect sketch.

John Leland, the son of James and Lucy (Warren) Leland, was born in Grafton, May 4, 1754. From 1775 to 1791 he was a Baptist preacher in Virginia of considerable note. From 1792 until his death, which occurred at North Adams, January 14, 1841, he was settled in Cheshire, Mass. His autobiography was published in 1845.

Phineas W. Leland was the son of David W. Leland, and with all the Lelands of Grafton was descended from Henry Leland, who died in Sherburne in 1680. He was born in Grafton, October 4, 1798, and after leaving Brown University without graduating, studied medicine in Boston and settled at Medfield. In 1834 he removed to Fall River, where he held the office of collector of the port for nearly twenty years. He was a prominent and active mem-

ber of the Democratic party, and when that party came into power in the State in 1843 he was that year a member of the Senate and chosen its president.

Sherman Leland was the son of Eleazer and Elizabeth (Sherman) Leland, and born in Grafton, March 29, 1783. He was admitted to the Worcester County bar in 1809 and settled in Eastport, Me. In 1814 he took up his residence in Roxbury and opened an office in Boston. From 1817 to 1822 he represented Roxbury in the House of Representatives and was a member of the Senate four years, two of which he was its president. He was also for many years judge of probate for Norfolk County, and in this position, as in all others, he won and retained the confidence and respect of the community.

With these few sketches and with an acknowledgment of the aid which the writer has received from the "History of Grafton" by Mr. Pierce, to which reference has several times been made, this narrative must close.

## CHAPTER CXXIV.

GRAFTON—(*Continued.*)

AN HISTORICAL ADDRESS.<sup>1</sup>

THE love of kindred is a sentiment large enough to include and account for that reverence and affection which we feel for those of our ancestors whose forms vanished from earth long before our own time. That sentiment is not altogether dependent upon personal presence, nor upon the mutual exchange of kindly offices, but abides with us as a permanent and elementary principle of our nature. We find it impossible, therefore, to repress a feeling of deep and intimate concern in the history of a community of which our ancestors formed a part; and if, perchance, the characters with whom we are dealing were cast in a heroic mould, or were great and happy in their fortunes and achievements, they become in a peculiar sense,—

The dead, but sceptered sovereigns, who still rule  
Our spirits from their urns.

One hundred and fifty years have now passed since the incorporation of this town. You select this as a fitting occasion to recall the memory of the fathers who laid the foundation of these institutions into which you were born. You would revert once more to the early scenes in which they played their part; would remember their virtues; would sympathize with their patient toils, and admire the courage and fortitude with which they encountered the perils and endured the hardships of frontier life; would applaud

the clearness with which they saw, and the dauntless resolution with which they maintained their rights; would recognize, with gratitude, their steady and unswerving devotion to the principles of civil liberty, and the constancy with which they persevered, against every discouragement, in establishing those principles upon the secure basis of public education and public morality. But, upon this occasion, the historical theme which irresistibly attracts, at the same time, from obvious considerations, strongly repels me. The field has been so recently traversed and so amply covered, that, in attempting to recite anew any part of the familiar story, I shall appear to repeat a thrice-told tale. In 1835, at the centennial celebration of this event, an eminent native of the town skillfully gathered the scattered and scanty materials which constitute its original early history, and presented them in an address, which is at once the best authority upon the subject it treats of, and an able and statesmanlike survey, not only of the historical facts of the period covered, but also of the underlying forces and principles which made possible the great progress it recorded.

And, at the centennial celebration of the nation's birth, in 1876, another son of the town reviewed the same ground, and, in fluent narrative and eloquent speech, brought down the history to the present time, and rendered superfluous any further treatment of the subject. And, later still, in his excellent history, composed for the county history, in 1879, Rev. Mr. Windsor told again the simple but interesting story and placed in permanent and easily accessible form all that can be known of the events which marked the dawn and early progress of civilization within the territory of Grafton. Besides these treatises there remain the fine historical discourse of Rev. Mr. Wilson, preached in 1846, covering the ecclesiastical history of the town—no unimportant part of the early history of any Massachusetts town which can boast a hundred years of life—as well as the town history of Mr. Pierce. From these various essays in the annals of this venerable municipality you must have derived such familiarity with the initial steps and later advance of this community that I shall feel at liberty to select such parts of our history, without regard to consecutive narrative as shall seem best to subserve the general purpose I have in view, to wit: to attempt some estimate of the character and environment of the early fathers of the town, and to assign some of the causes which made them what they were. But it may be of interest to repeat some portion of the history of the region prior to the settlement by the English.

At what time the first white man's eye ever gazed upon, or the first white man's foot ever pressed this territory, abounding in "rich land and plenty of meadows," it is wholly impossible to tell. It certainly requires some exercise of the imagination to conceive that Governor Winthrop and his party, who, on

<sup>1</sup> The following interesting historical address was delivered by Hon. Frank P. Goulding at Grafton, upon the one hundred and fiftieth anniversary of the incorporation of the town.

January 27, 1631, ascended a high rock only eight miles westerly of Watertown, "where they might see all of Neipnett and a very high hill due west about forty miles," could see from that point any part of the present territory of Grafton; and as for the supposition that the company of English who, in 1635, emigrated from Massachusetts Bay to Connecticut, traversed this territory, the probabilities are strongly against it. For the road to Connecticut, soon after existing, certainly lay to the north, though near the territory of Hassanamesitt, and passed north of Lake Quinsigamond, and there is little reason to suppose that, when that road was established, a new trail was struck out, instead of following the route of the first explorers.

But, however that may be, the territory emerges out of the darkness of barbarism into the view of history many years before its corporate name was conferred upon it, in honor of the second Duke of Grafton. In the middle of the preceding century, when the royal grandfather of that nobleman was skulking, crownless, on the continent of Europe, and before he had formed his scandalous alliance with the beautiful but profligate Barbara Villiers, Duchess of Cleveland, who was our namesake's grandmother, and while the imperial sceptre of England was held in the firm grasp of Oliver Cromwell, the General Court of the province, on the petition of Eliot, set apart the territory of Hassanamesitt for the use of the Indians. Here was formed the third of the towns of the praying or Christian Indians, Natick and Pakemitt or Punkapoag (a part of Stoughton) being the first two; and here, in 1671, was organized the second Indian church. Upon the organization of the church, a meeting-house was erected, the site of which, near the old Indian burying-ground, in the vicinity of Mr. Frederick Jourdan's place, is still pointed out. A school was also established, where youth were educated to preach the gospel to the Indians in the neighboring towns. Of course, the services of the church were conducted in the Indian language, and there is ample proof in the writings of Eliot, as well as in those of Major Gookin, the Indian commissioner of those days, that, under the dusky skin of those primitive congregations, lurked traits of human nature common to all complexions. I cannot stop to give more than a single example of the numerous shrewd and difficult questions which his Indian disciples put to the pious Mr. Eliot. In his letters to the corporation established in London for the propagation of the gospel among the Indians, he gives, in great abundance, examples of these queries; but he does not give his answer to the following, among others:

"If God made hell in one of the six days, why did God make hell before Adam sinned?"

Gookin says of these Indians, whom he saw attending upon the preaching in the churches: "And for my part, I have no doubt, but am fully satisfied, according to the judgment of charity, that divers of

them do fear God and are believers; but yet I will not deny but that there may be some hypocrites that profess religion and yet are not sound-hearted. But things that are secret belong to God, and things that are revealed unto us and our children."

Wattascompanum, the chief ruler of the whole Nipmuck country, resided here. He was said to be "a grave and pious man." It is probably no impeachment of his gravity or piety that he was executed in Boston in June, 1677. For his crime was that he had been induced or forced to join the party of his countrymen in a desperate and futile attempt to drive from their ancient domain the ever-encroaching pale-faces, in whose insidious advance the prophetic souls of the natives read the doom of their own race. And popular feeling ran so high against the Indians at the close of that sanguinary war, that small measure of justice was likely to be meted out to a native who had yielded to the blandishments or threats of the foe.

In proof that these obscure natives who once occupied this vicinity were not destitute of all the amenities of civilized life, I must not omit to mention that here, two hundred and fifteen years ago, occurred the first seizure of liquor in this county, under process of law, of which I have discovered any record. It appears that Petavit, otherwise called Robin, was one of the magistrates or rulers here at Hassanamesitt, and he was, evidently, a magistrate not easily deterred from the performance of his official duty. Major Gookin gives an account of the seizure of the liquor, as follows: "I remember sundry years since, a Sagamore that lived up in the inland country came to Hassanamesitt, and brought with him a rundlett of strong liquor [it was more than three per cent. alcohol, and could not be palmed off for Schenk beer], and, lodging in his house, Petavit, in the morn, sent for the constable, and ordered him, and, according to law, seized the rundlett of liquors. At which act the Sagamore drew a long knife, and stood with his foot on the rundlett, daring any to seize it. But Petavit thereupon rose up and drew his knife, and set his foot also to the rundlett, and commanded the constable to do his office. And the Sagamore"—

Here the ancient manuscript breaks off, like a serial novel, in the very crisis of a thrilling scene. We see a sudden flash of long knives in the morning sun, and the curtain falls. We shall never know with certainty what the issue was. But, considering the divinity that doth hedge a magistrate, and the dauntless and resolute temper of Mr. Justice Petavit *alias* Robin, I hasten to assure you that, in my opinion, the Sagamore from the inland country, after growling out sundry phrases in the Indian dialect, not strictly in accordance with the discipline of the church then established at Hassanamesitt, restored his long knife to his belt, removed his moccasin from the rundlett, and yielded to the inevitable.

The war with King Philip was disastrous to the promising enterprise of bringing the Nipmucks under English and Christian influences, and upon no part of the extended and undefined domain of that people did it fall more fatally than upon Hassanamesitt. Two engagements were fought in this territory,—one not certainly located, and the other on Keith Hill. The first engagement resulted in a repulse of the company of English under Captain Henshman, with a loss of two of his men. Mr. Brigham says, on the authority of the Gookin manuscript, published by the American Antiquarian Society, "that upon the return of the English the next morning to the scene of the conflict, they discovered the heads of their two men who had fallen in the attack placed on crochted poles before the wigwam, and facing each other." But, as given in a note to Drake's edition of Hubbard's narrative, Gookin's account of it is as follows: "Capt. Henshman told me he judged several of the Enemy were slain in the wigwam, but the certainty is not known; but it was certain he lost two of his men, whereof his Lieutenant was one, Philip Curtice, of Roxbury, a stout man. His Hands they cut off and placed upon a crochted Pole at the Wigwam Door, faced each other, which was seen a few days after." It may not be of much importance, but if the note in Drake's Hubbard is authentic in its citation of General Gookin's manuscript, it would appear certain it was the hands of the stout (*i. e.*, valiant) Lieutenant Curtice, and not the heads of the slain, which were the subject of the ghastly humor of the savages. There is some confusion and contradiction in the original authorities respecting the battle on Keith Hill. According to Hubbard, it occurred on May 6th, and according to Drake, on May 5, 1676. The English were accompanied by some Natick Indian allies, and these allies came upon the hostiles, who were pursuing a bear. They did not perceive at first that the Natick Indians were not of their own party, which gave the English some advantage. From eleven to sixteen Indians were slain. Dr. Mather says "our Forces had probably destroyed many more of them had not an Englishman unhappily sounded a Trumpet, whereby the enemy had notice to escape."<sup>1</sup>

But while the devastation of battle cannot be said to have swept the place with special violence, in other ways the desolate track of war was left deeply imprinted on its soil. For, through the intrigue and force of the hostile savages, the little Indian town whose bright promise had filled the inspired Eliot, and the resolute, but humane Gookin, with such high hopes, was completely broken up and dispersed. The church and school were never rehabilitated, and only a few of the surviving natives, after an interval of many years, straggled back to the desolate scenes of

the old settlement, and took up again their abode on the land of their fathers.

In 1718 a single white man had acquired title to some lands in the town, and in 1727-28 the title to the whole original territory of Hassanamesitt resided in seven individuals, who were descendants of the original native proprietors under the reservation of 1654, and in nine English families, who, under permission of the General Court, had purchased lands and settled here. In that year was granted by the General Court the petition of forty English families, preferred some time before, to purchase the entire reservation of 7500 acres from the Indians, with certain restrictions. And thereupon a deed was given, dated March 19, 1727, old style, and it is executed by the seven proprietors and the husband of one of them. It reserves the previous grants to the earlier white proprietors, and to the Indian grantors an equal dividend of land with each of the grantees, and one hundred acres besides for the use of the Indians. It is in the nature of a strict entailment, for it is, by its terms, a grant for the settlement of forty English families of the petitioners or their posterity, and no others. By an act of the General Court, passed at the same time, certain conditions were coupled with the grant, the most important of which were,—

That within the space of three years they build and furnish a meeting-house for the instruction as well of the Indians as English children; that they settle a learned orthodox minister to preach the gospel to them, and constantly maintain and duly support a minister and schoolmaster among them, and all this without charge to the Indians.

The expense of building the meeting-house and school-house was imposed, by the same act, four-fifths upon the purchasers and one-fifth on the prior English settlers, who were likewise required to contribute to the maintenance of the minister and schoolmaster. The English purchasers under this deed immediately proceeded to execute its conditions, and, almost before the ink was dry upon the parchment, and months before it was recorded the proprietors made provision for the location of the meeting-house and school-house, and only a little later began the allotment of lands, and as early as 1730 the meeting-house was completed, and a large portion of the forty families had removed here, and in the following year the church was regularly organized and a minister duly installed.

Although the day we celebrate—April 18-29, 1735—is the date of the legal incorporation of the inhabitants with the powers and privileges of a town, the true era of the permanent settlement of the place by the English must be referred to the years 1730 or 1731. We have now reached the period when first came upon this scene the men and women by whose characters and deeds the first bias and direction was given to the history of this community. There is a certain unity and individuality of type belonging to every

<sup>1</sup> Mather, *Brief Hist.*, 143. This was the first time the Natick Indians were employed in any such number by the Government.—Drake, 257.

community, if we only had the art to discover it. And it will be found to be a reproduction of the type of character which predominated in the leading founders of the community. Of course there will be no community without concurrence of sentiment, and the masses will finally concur with the minds of the strongest and most positive cast of character. The first settlers of a town, surviving for a generation, will generally set the current of popular thought and feeling and establish the polity of that town for generations to come.

In that view, and in all views, it will be of interest to inquire who these emigrants were; what they did and what they aimed to do; what they thought; what they hoped; what they believed; and, in short, what manner of men and women they were. It will be of interest to inquire what were some of the causes which enabled them to establish so goodly a heritage for their children, and to instil principles into the minds and hearts of their successors, which made of them heroes in their turn, and enabled them, in common with the inhabitants of other towns and States, to set examples of wisdom in counsel and courage in action, not surpassed by anything in the annals of man.

They were forty English families, who, with the nine who had but a short time preceded them, made up about fifty families. Most of them, perhaps nearly all, were born in the province, and were, therefore, Englishmen in the sense that they were born of English parentage in the English provinces of Massachusetts Bay and Plymouth. If I should repeat their names many of you would hear your own names, and I should probably name few, if any, who have not some lineal descendant within sound of my voice. They came unheralded by any noise of trumpets, blazon of fireworks, or other demonstration of human interest. When their creaking carts, loaded with the scanty supply of furniture which was all-sufficient for the simple wants of their lives, rolled slowly up these hills and into these valleys, guided by marked trees through the primeval forests, without doubt the wolves and bears regarded the invasion as very important and revolutionary, and the owls peered down at night upon the fires of the settlers which looks of ominous conjecture.

But the human owls, seated in the high places of England, could not see so far, and had no idea of what was taking place here, and in some hundred other places where the like things were transpiring. Outside the few towns whence they came (Sudbury, Concord, Wenham, Stow, Marlboro'), the event had absolutely no significance. When three or four years later the town was incorporated and christened with an English name, Governor Belcher may have mentioned, in a letter to the Duke of Grafton, that he had named a little township after him up in the woods of central Massachusetts Bay, and his grace may have jocosely told it to his friend, Sir Robert

Walpole, the prime minister, of whose son Horace, the great letter-writer, the Duke of Grafton was the godfather. There is a remote possibility that the King himself, the "snuffy old drone from the German hive," may have mentioned it to the Duchess of Kendall as an item of news from the distant province. But the advent of our fathers to these fields had about as much significance to the people of England, who supposed they themselves were making the history of the time, as the movements of a nomad tribe in Central Asia for a change of pasturage would have to us to-day. Nor have the circumstances of their coming attracted the attention of mankind since. The poet and the orator have not found in their special history a theme worthy their efforts. They did not flee from religious or political persecution, nor traverse wide and stormy seas to find, on a desolate coast, an asylum in which to worship God according to the dictates of their own conscience. At the end of the first third of the eighteenth century, religious persecution of Protestants had ceased in England, and the first settlers in this town were in full sympathy and entire accord with the people of the communities they left, both in politics and religion. If they endured hardships, they endured them in common with the early settlers of one hundred and twenty-five other towns in the province, settled and incorporated before ours. I shall not, therefore, claim that these early settlers of Hassanamesitt are to be selected and set on any pedestal over the heads of the primitive inhabitants of other towns. The greatness I claim for them they shared in common with many other similar communities of the same race and time, and it is sufficient glory that they are eminent among equals. But it detracts nothing from the intrinsic interest of their characters that the chief features they present are repeated in a hundred other communities. It detracts nothing from the importance of the experience they went through that it is not dissimilar to that of other neighboring peoples who settled other towns. The fact is, representative constitutional government was first invented and put into practical operation in this province, and it first manifested itself in the little autonomies of the towns. It is the people of one of these towns to which I would call your attention, and one where I believe will be found a remarkably pure and perfect type of the kind of communities which were then taking root everywhere in New England. They were representative New Englanders of the first half of the eighteenth century, and as such were enacting the most important history which was then transpiring on this round earth. Indeed, what human interest attaches to the quarrels of Walpole and Bolingbroke, or to the corrupt sway of the former after his full accession to power; to the history of the South-sea Bubble; to the intrigues and uprisings of the exiled Stuarts to regain their ancient throne; to the petty wars of the first Georges, or to the endless plots and counterplots

of Whigs and Tories, as compared with the scenes which were unfolding on this continent, and mainly within these old provinces, now Massachusetts, from 1720 to 1789? The men and women who came to Grafton to settle were, like their neighbors, the heirs and successors of those heroic men and women who, in the preceding century, had encountered the first perils attendant on establishing a foothold for civilization on this continent.

They had drunk deep of the spirit of the great conflict with the Stuarts, which ended with the revolution of 1688, whereby the liberties of Protestant Englishmen everywhere, as they believed, were forever established. In the first place, they were men of eminently sound, practical common sense. You cannot open a page of their records, or trace the faded leaves of the church proceedings without receiving the impression at the outset and carrying it with you to the end, that first of all here was a race of men perfectly sound-minded, level-headed, and intent upon the practical affairs of life. This Saxon good sense and business capacity is the chief feature of their character, subordinating all others. I know it is common to ascribe to colonial settlers of pre-revolutionary days, and to these our fathers, as the predominant trait of their characters, devotion to religion. I do not dissent from the estimate which gives that element a prominent and controlling place. But in religious zeal they have been surpassed by many races. I believe our good friends the Catholics of the Irish race have, on a thousand fields, shown a devotion to the faith of their fathers as great as any the early settlers of this country ever displayed. And Spaniards and Frenchmen and Netherlanders and Germans and Turks and Africans have, in all times, displayed a zeal which would rival and eclipse that of our fathers who settled here. When Mr. Wilson, in the excellent discourse I before referred to says, that these "grave pioneers, cherishing the same religious zeal which characterized the primitive colonists of New England, made it their first care to provide for the worship of God; that their first vote at their first meeting relates to the selection of a proper situation for the house of prayer," he tells but half the story, and the impression conveyed is misleading. They do first attend to the building of a meeting-house. The fact is so. But it is also a fact that precisely that was the first condition in their deed, to wit: that they complete a meeting-house in three years. Their whole title depended upon that strict condition. Like business men, therefore, they set about doing the thing necessary to be done at once to prevent a forfeiture. It was an act most characteristic. But it was characteristic of sensible men of affairs, who exactly understood the nature of their grant, and went about complying with its conditions. It was a practical business transaction, and the record of the second meeting of the proprietors at the house of Nehemiah How, here in Hassanamesitt, on April 19-30, 1728, one hundred and fifty-seven years ago to-

morrow, when they adjourned once and again, and examined and re-examined the proposed sites and shifted from one to the other until, after mature consideration, they were satisfied that the location would be "accommodable," furnishes a strong illustration of the very trait of character I am now insisting on, a sturdy practical sense, the faculty to adapt means to ends. I should be sorry to be misunderstood. These pioneers, as a general thing, were professors of, and profound believers in, religion. The conditions on which their grant was made undoubtedly received their hearty concurrence. But none of them were religious zealots, and they were not all of them saints, and they knew their own hearts too well to pretend to be, and neither they nor the General Court felt it to be safe to trust the institution and maintenance of religious worship to anything less secure than the express and rigid condition of the deed itself. The policy of maintaining the ordinances of religion, as well as public education, was the settled policy of the provinces, and these emigrants believed in it. There was nothing impulsive or sensational in their conduct, but all was well considered, deliberate and eminently worldly wise.

They were, moreover, an industrious people. They came here as a chief end to better their material wealth; to get on in life.<sup>1</sup> Mr. Brigham has noted at how extravagant an estimate they held their lands, and how they gloried in the idea that they should leave so valuable an inheritance to their children. He reckons ill who leaves out of the account of the early New England settlers the fact that they were intent upon honest gain. They desired and expected to increase their stores, and to acquire moderate independence. Love of money is said to be the root of all evil, but the hope of acquiring it has sustained many brave hearts in the midst of trials. The early settlers in this town, like most of their contemporaries, had a dim consciousness of the coming greatness of this country. Of course, they knew nothing of the vast resources that lay slumbering in the heart of the continent, and had no correct notion of the real wealth in store for the succeeding generations. But they believed in the boundless productiveness of the soil, and indulged visions of remuneration for their toil of a kind and degree destined never to be realized. They were, indeed, a deeply religious people. They were Puritans without being fanatics. They were Congregationalists and Calvinists. It is evident, however, as well from their church covenant as from the dissensions and differences of opinion which arose within a few years, that they held the tenets of their creed with liberality and a tolerant spirit, and with some conception of the rights of others, as well as their own, to private judgment in matters spiritual. They were, for the age in which they lived, progres-

<sup>1</sup> See curious pamphlet on New England, by Rev. — Higginson; 1 Mass. Hist. Coll., First Series, 117.

sive. I am strongly inclined to think that there was a greater degree of liberality of views among the original settlers in respect to religious matters at first than later. After the divisions which arose in 1745 and 1746 in regard to Mr. Prentice, the first pastor, that happened which usually happens in case of religious schism. Each sect draws the lines of its peculiar belief more rigidly than before, and the minor differences which occasioned the division become the principal and sacred essentials of doctrine.

At any rate, we know that the church creed was revised and made more definitely Calvinistic under the second minister, Mr. Hutchinson, in accordance with the views of that very able and most logical and uncompromising sectarian. That these people were of a courageous disposition, worthy of their ancestors and of their posterity, needs no evidence to verify. They inherited from their fathers the courage of warriors, and it is not unlikely that some of the first founders of the town had faced the enemy in battle. The war of the Spanish succession, or Queen Anne's War, which broke out in 1702, and continued a number of years, so far as this country is concerned, fell with especial fury upon the colony of Massachusetts Bay. The neutrality of the Five Nations protected New York and the central colonies. The province of Massachusetts Bay was desolated, and for her (says Bancroft) "the history of the war is but a catalogue of miseries."

All along the borders of Maine, then a part of Massachusetts, the cloud of war hung black as death. And, nearer home, Deerfield was burnt and its inhabitants massacred in 1704, and Haverhill shared the same fate in 1708. For eleven years the war raged till the treaty of Utrecht in 1713. The troubles respecting the eastern boundaries of the province, which arose about 1720, with the tribe of Abenaki Indians, lasted about four years, and the Indians, who had embraced the Catholic faith under the teachings of the Jesuit Rasles, waged a war with Massachusetts, animated on both sides with much religious zeal (a circumstance which does not often mitigate the severities of war), which resulted in the success of our colony. These conflicts may have engaged the personal participation of some of our settlers, and at any rate had made them familiar with the wrinkled front of grim-visaged war from their youth.

We can know but little of the personal appearance and daily life of these ancient pioneers, who first bore into your fair territory the seeds of civilized life. No photographer's art has preserved the lineaments of a single face. For the most part they were too poor to employ the brush of a painter to fix on the canvas the fleeting lines of their features, even if an artist had ever visited the region. I am bound to believe, however, that the men were of well-knit and vigorous frames, and possessed of no small share of manly beauty, and the women well endowed with the comely graces and endearing charms of their sex. If

asked the grounds of this belief, standing among the descendants who bear their features by inheritance, I should answer, "*Si monumentum quaeris, circumspice.*" If you want the proof look about you. It would be instructive and curious, if time permitted, to go into an examination of their daily lives, as affected by the implements, appliances and facilities they could command in the performance of their labor, and in providing the necessities of existence.

We, who live in this age of curious inventions and elegant devices of convenience, designed and adapted to facilitate labor and render delightful domestic life, can with difficulty realize the rude and scanty tools and implements and barren facilities with which they prosecuted the labors of the house and farm. In the article of dress, if we had the power to recall and materialize the ancient worthies who assembled in yonder old meeting-house one hundred and fifty years ago; if we could look in upon them as through a window, what a source of infinite amusement and interest their quaint figures would excite!

A brilliant writer, describing a period fifty years later, gives a lively picture of the dress of the New England farmer: "If the food of such a man was plain, so were his clothes. Indeed, his wardrobe would by his descendants be thought scanty in the extreme. For meeting on a Sabbath and on state occasions during the week, he had a suit of broadcloth or corduroy, which lasted him a lifetime, and was at length bequeathed, little the worse for wear, with his cattle and his farm, to his son. The suit in which his neighbors commonly saw him, the suit in which he followed the plough, tended the cattle and dozed in the chimney corner, while Abigail or Comfort read to him from 'Edwards's Sermons,' was of homespun or linsey-woolsey."<sup>1</sup> I am inclined to think this picture would be applicable to the farmers who settled Grafton, after deducting the broadcloth, corduroy and "Edwards's Sermons." And yet they were by no means destitute of all ideas of refinement, and most of them had seen glimpses of some of the elegancies of life.

It is quite likely that after a few years, at least, on the Sabbath and important occasions, some of the more well-to-do among them may have displayed garments more attractive than the ordinary sheepskin, deerskin, or coarse knee-breeches and frock. Some of the ladies may even have possessed a gown of silk. At any rate we shall presently see that there was one such garment in town. The periwig, which so scandalized the clergy of the preceding century, had established itself in fashion, and doubtless might have been seen here early, if not at the very first. Their education was not contemptible, as the records of their proceedings amply show. They had had the benefit of the long-established policy of the colony,

<sup>1</sup> McMaster's "History of the People of the United States," vol. I. pages 18, 19.

which made public education the corner-stone of the State. They were familiar with Scripture and familiar with learned preaching. One of the conditions of their grant was that they should maintain a learned Orthodox minister. They complied with the condition by calling and settling in December, 1731, the Rev. Solomon Prentice, a young graduate of Harvard in the class of 1727, a classmate of Governor Hutchinson, of Massachusetts Bay, and Trumbull, of Connecticut.

In the following year the young minister married Sarah Sartell, of Groton, and his wife, sixteen years of age, is said to have been well qualified by her learning and ability to assume the important position of a pastor's wife. I have unmistakable evidence that even in those rude and primitive days, in the infancy of the settlement, the minister's wife was not wholly unacquainted with, nor indifferent to, the elegancies of refined life. For, among my heirlooms, I possess an ample fragment of an elegant dress which was the property of that lady. One tradition in the family describes it as her own wedding dress, but the better authenticated account is that it came from an aunt of hers, and was worn by its former owner at the Court of George II.

However that may be, it was undoubtedly worn by the fair lady herself, who was, I imagine, as well by her position as by her accomplishments, the leader of society here in those primitive days. As I look upon its beautiful texture, as perfectly preserved as when, one hundred and fifty years ago, it graced the person of the youthful lady, when I see its unfaded and lovely hues,—a bright canary-colored satin, elegantly brocaded with flowers,—I am struck with the transitory nature of the things we here pursue. By the aid of this talisman I am enabled to look into the

Dark backward and abysm of time,

and behold one of the figures that moved over these scenes when the curtain of history first rolled up and disclosed this section of the world's stage. For nearly a hundred years, after a long life, the mother and grandmother of a numerous posterity, she has slept in yonder ancient cemetery. There remain of her memory only a few fleeting and uncertain traditions, scarcely more in extent than the nearly obliterated inscription upon her tombstone. All the rest has fallen silent and is swallowed up in oblivion, but the frail and beautiful adornment which set off the charms of the stately young minister's wife remains. No shade of the cunningly-wrought design has become in the least dimmed with age. Every line of the delicate tracery, and every lovely variation of color, lives as clear as on the day it left the loom. Venerable ancestress! I salute you across the gulf of years! Is it possible to believe that this delicate fabric, this tegument which became so intimately connected with her destiny, is all that survives of her, that all the rest is exhaled like the perfume of the flowers which

bloomed a hundred years ago? No! at least she and her contemporaries, whose lives we are now trying to recall, live in the beneficent influence they exerted. It is not alone by hereditary transmission that the qualities and peculiarities of one generation reappear in another. We are creatures of imitation. The manners and individual peculiarities of a strong personality are reproduced by force of the instinct to imitate; and as some individuals of every generation are contemporaries of the next succeeding, the traits and habits of a vigorous and original character are continued and transmitted from age to age. The frail memorial, the curiously-wrought fabric, is but a symbol of the graces of personal character which do not perish even from this life, when the tenement of clay dissolves, but survive

To the last syllable of recorded time.<sup>1</sup>

The pastoral relation of Mr. Prentice was dissolved in 1747 by reason of troubles which had been brewing for two or three years. I do not propose to enter upon the subject of those troubles. It is enough to say that no impeachment of the integrity of Mr. Prentice was attempted, but it was his orthodoxy alone which was brought in question. It is essential for me to say that the records of this controversy, faithfully set down in the beautiful handwriting of Mr. Prentice himself, discloses a people of great independence of thought and character, desirous to do right, but by no means to be deterred by authority from asserting their just privileges and opinions. Mr. Prentice was succeeded by Rev. Aaron Hutchinson, a man of great power and great eccentricities, who remained till 1772, and in 1774 Rev. Daniel Grosvenor succeeded him. A lady friend of mine has given me a brace of anecdotes told to her by Mr. Grosvenor himself, one of which well illustrates his sense of the humorous and his dislike of insincerity.

Mr. Grosvenor was dining with a lady of his parish, who was a cook of exquisite skill, and she placed before the pastor a delicious pie, of some kind, and as she helped him to a piece of it, she remarked that she hoped he would accept a piece of her *poor* pie. The minister tasted it with great gravity, and said, "Poor pie! why, I call it a very *passable* pie." Whereupon the good lady was in high dudgeon. She declared she never took more pains with a pie in the whole course of her life, and she did not believe there was ever a better pie made. Fishing for a compliment, she got caught with her own hook.

On another occasion the reverend gentleman

<sup>1</sup> I regret that a story so destitute of probability as that relating to the domestic discord between Mr. and Mrs. Prentice, which Mr. Howe deemed worthy of a place in his excellent address, should have received an indorsement so respectable. The frequency with which the story has been applied to ancient couples, who were divided in opinion upon the special tenet of the Baptists, renders it quite too stale for adaptation to the cultivated and refined first pastor of Grafton and his intelligent and spirited wife.

called upon one of his parishioners, who, it being upon a washing day, and her dinner not being just what she would desire to invite so august a personage as the minister to partake of, did not mean to extend to him the courtesy of an invitation. But the lady's mother, who was of the family, nevertheless asked Mr. Grosvenor to stay. He accepted, and when his young hostess apologized for the quality of the repast, her mother made the following observation, which Mr. Grosvenor thought quite notable. She said there was no occasion for any apology; for, if Mr. Grosvenor was a good man, he would be content and thankful even with a poor dinner, and, if he was a bad man, it was good enough for him.

I have read a sermon preached by Mr. Hutchinson at Newbury in 1767, and the reply by him to certain strictures thereon, by the Rev. John Tucker, pastor of the first church in Newbury. This famous ecclesiastical controversy related to the necessity of infant baptism in order to insure salvation. It is hardly necessary to say that Mr. Hutchinson maintained the affirmative of that proposition. His discourses are marked by great familiarity with Scriptural texts, much classical learning, fine controversial skill, and by a logic which may fairly be described as of deadly precision. Admit his premises, and you cannot escape his conclusions.

Mr. Hutchinson, like his great contemporary, Dr. Samuel Johnson, coupled with great learning and ability, the manners of a bear. The president of the day,<sup>1</sup> who is the repository of all the history and anecdotes connected with the antiquities of the town, relates a story of Mr. Hutchinson, illustrating his manners: He was dining at a conference of ministers, and helped himself to so large a portion of the pudding that there was little left on the platter. Thereupon one of his neighbors at the table helped himself from Mr. Hutchinson's plate, and, when remonstrated with, remarked that he always helped himself from the largest pile.

I do not find in the ancient records of the town, anything to show whether the young settlement contributed men to the expedition which resulted in the brilliant conquest of Louisbourg in 1745. To this enterprise, which owed its conception and execution to the energy of Governor Shirley, this province contributed more than three thousand men, and it is probable that in the ranks were found some residents of this town.

The treaty of Aix-la-Chapelle restored to the French the fortress which New England valor had placed in English hands, and left the colonists to the long struggle which was in store for them, with their wily and cruel neighbors of the north; and the first war, after the settlement of the town, which arose to try the mettle of the inhabitants, was the French War,

in which hostilities broke out in 1754. I have already referred to Queen Anne's War of fifty years before. It is undoubtedly true that the protracted struggle of the English colonists with the French and Indians along our extended northern frontier, from the mouth of the Saint Lawrence to the forks of the Ohio, furnished the training-school in which was raised the generation of soldiers who fought the battles of the Revolution. In the French War Washington won his spurs, and many of the officers and privates who met the British regulars on Bunker Hill, or penetrated the thick forests of Canada and crossed the Saint Lawrence in canoes under the lead of Arnold and Montgomery, to attack Quebec, or joined in the attack on the Hessians at Trenton, or endured the pangs of famine and frost at Valley Forge, had also, twenty years before, rushed upon the defences at Louisbourg, or, under the command of Wolfe, struggled up the cliffs to the Heights of Abraham, or marched with Washington through the dense forests of Western Pennsylvania to the field of Braddock's defeat. To say that the record of this town in that long struggle was distinguished and honorable, is but to faintly praise where words of enthusiastic eulogy are appropriate. In a period of nine years its population was more than decimated by the fatalities of that war. Such a record is of great and unparalleled significance, and imports that here resided a race of heroic men, whose martial virtues were not inferior to any that ever inspired the strains of the lyric muse. In 1757, the fortunes of England in America reached their lowest ebb. For more than two years, disasters had huddled thick upon her arms. At Fort Du Quesne, at Oswego, at Fort William Henry and throughout the whole of the Saint Lawrence valley, an almost unbroken succession of defeats had reduced her prospects here to the verge of despair. And, at home, the gloom which settled on the face of affairs was scarcely less deep and rayless than that of one hundred years before, when the guns of the Dutch fleet were heard in the Thames. It was at this moment that the elder Pitt, the great commoner, seized the reins of power which fell from the nerveless grasp of the "Whig aristocracy." In less than four years he restored the military glory of his country to the pitch it had attained by the genius of Marlborough, and gave to England an influence in the politics of the world which she had not enjoyed since the days of Oliver Cromwell. The most brilliant of the series of victories by which these results were accomplished was the conquest of Canada. To the conquest of Canada no portion of the British people contributed so much as the province of Massachusetts Bay, and no portion of the people of this province contributed more of men and money, according to their numbers, than the people of the town of Grafton.

When we read the astounding fact that eighty of her sons out of a population of seven hundred and fifty died in this war, we feel the intense meaning of

<sup>1</sup> Henry F. Wing, Esq.

Colonel Barré's immortal speech in the House of Commons: "They protected by your arms? They have nobly taken up arms in your defence; have exerted a valor amid their constant and laborious industry, for the defence of a country *whose frontier was drenched in blood*, while its interior yielded all its little savings to your emoluments."

When we turn the leaf which embalms the deeds of this town in the War of the Revolution, we find equal cause for pride and exultation. Grafton sent forth no conspicuous leader to the councils, and furnished no battle-field in that great debate. She contributed no Washington, no Adams, no Warren, no Ward, and it was not here that—

The embattled farmers stood  
And fired the shot heard round the world.

But no people in the colonies caught the echo of that shot with more quick and responsive ear. Before the sun had set on the 19th day of April, 1775, a full company of nearly one hundred men, with Rev. Mr. Grosvenor, their pastor, in the ranks, were in rapid march to the front. On every bloody field, from Bunker Hill to Yorktown, the sons of this town dared or tasted death in the cause of independence. But the contest of the American colonies of Great Britain with the mother country was not specially distinguished by the valor of the Continental troops. There was no deficiency in that respect, but there have been more remarkable instances of human courage and endurance than any displayed in that war. The long contest of the Netherlands with the mighty armaments of Spain, forty-three years in duration, recorded in the glowing and eloquent pages of Motley, presents an instance far more striking and wonderful of a brave people, in the sacred cause of liberty, maintaining an unequal contest through more than a generation, and carrying it to a triumphant issue against intrenched power and vast resources. It was not very wonderful that three million people, situated in a country of such resources as this, and remote from Europe, especially in alliance with one of the great powers of the earth, should be able to wrest their independence from the mother country, whose people were not completely united in policy. But what is unexampled in this great contest, what the file affords absolutely no precedent for, was the calm and conservative wisdom which marked all the councils of the revolt. The colonists were not revolutionists, indeed, but rather conservatives. They were not fighting to establish new reforms, but to preserve ancient liberties. They had no constitutions, in the sense in which we use the term, and yet in all their public utterances and state papers they perpetually refer to their constitutions, and appeal to the principles of those constitutions.

By their constitutions the people of this province meant the Magna Charta, the declaration of rights of 1688, and the bill of rights of 1689, and all that body of law found in the preambles of ancient statutes

and in the decisions of courts, whereby the liberties of Englishmen were declared and secured everywhere. They believed those principles were embodied by necessary implication in the charter of 1629, and in the new charter of 1691. I cannot develop, and must not stop to dwell on this topic. They were a race of constitutional lawyers. Burke said of them: "In this character of the Americans, a love of freedom is the predominating feature which marks and distinguishes the whole. This fierce spirit of liberty is stronger in the English colonies, probably, than in any other people of the earth." And Chatham, in 1775, thus characterized their public papers: "When your lordships look at the papers transmitted to us from America, when you consider their decency, firmness and wisdom, you cannot but respect their cause and wish to make it your own. For myself I must declare and avow that in all my reading and observation—and it has been my favorite study—I have read Thucydides and have admired the master states of the world—that for solidity of reasoning, force of sagacity and wisdom of conclusion, under such a complication of difficult circumstances, no nation or body of men can stand in preference to the General Congress at Philadelphia."

Now, the same characteristics which marked the emanations of the greater bodies, and so much challenged the admiration of the great statesman, will be found in less degree in the humble records of the proceedings of the New England towns. I have adverted to this subject to say that right here, in the volumes containing the proceedings of this town in 1774 and '75, will be found undying evidence of the existence here of that "fierce spirit of liberty" which Burke discovered, coupled with the temperate wisdom and practical sagacity which commanded the applause of Chatham. A single illustration is all I can allow myself. I refer to the report of a committee adopted by the town January 4, 1774, and having reference to a communication from Boston, sent out upon the occasion of the destruction of tea in Boston harbor. It is in these words: "The town of Grafton, taking into consideration the unhappy circumstances that this country are involved in at the present crisis, attempts being repeatedly made infringing upon our rights and privileges, which we consider justly alarming to all the true friends of our happy constitution, which hath been so dearly purchased, and which we esteem to be our most invaluable interest and rights as Englishmen, which we have ever gloried in, more particularly at the glaring injustice of the East India Company being allowed to send tea to America, while subject to a duty payable in America, which we view as subversive of our rights as Christians; as subjects, and as loyal subjects of our most gracious King George, whose name and person we ever desire to view as sacred. Therefore, Resolved, as the people of this town, that any one individual, or any body of men, that shall encourage, aid or assist in importing

or receiving any such tea or any other article while subject to a duty, the sole purpose whereof is to raise money to appropriate to any sordid measure, or any use whatever contrary to our just rights of distributing our own property wherewith God and Nature hath made us free, can but be viewed as criminal to our country, as well as to the mother state, and must be so viewed by us. Resolved, that this town are in duty bound to join with and assist our sister towns and colonies in this our common cause, so as we may be instrumental under God of handing down that liberty to our posterity which hath been kept so long inviolate and preserved by our worthy ancestors. Resolved, that the substance of the proceedings of the town of Boston and other towns in their respective town-meetings (relative to said affair), which have been published and come to our knowledge, are in our apprehension consistent with truth and our happy constitution, and we can but wish prosperity may attend all laudable stands, so that our glorious constitution may yet be handed down to posterity inviolate. But to adopt any measures where private advantage or sinister ends are apparently at the bottom, and who make this though ever so glorious a foundation for their avarice and *emolument* we cannot but must detest and abhor."

The syntax of this document will not bear examination, but the record presents an interesting type of the class of the counsels that prevailed everywhere. It exhibits in the sons the same characteristics which predominated in the fathers who settled the town—clear, practical common sense, a people who knew their rights and the exact extent and limits and grounds of them; a people who believed that liberty was not an abstraction, but inhered in a sensible object—a people who could not be surprised nor driven into vain excesses, and who proposed as their ancestors had done, to govern themselves, but by no means to commit society to any untried and dangerous theories of abstract rights, that rested not upon the solid basis of precedent. But our ancestors were not always right. What Emerson said of Concord is true of Grafton, "If the good counsel prevailed, the sneaking counsel did not fail to be suggested." You will find if you search the musty records, that while most of the men whose blood flows in your veins were staunch in the just cause, others of your ancestors, perhaps, were obstinate, obstructive and wrong-headed. If the question came up on paying the minute-men for the time they spent in learning the military art and for their accoutrements, you may find some of your kindred, whose names you would prefer not to see in that conspicuous eminence, sullenly protesting against the scheme, perhaps suspicious that it savored too much of "measures where private advantage and sinister ends were at the bottom." But Tories were exceeding scarce, and although I find an honored name of one who was cashiered as agent to procure recruits for the town, "because he was not

firm and friendly to the State," yet I believe he was restored within a few months. And you know that when the question of the adoption of the United States Constitution came up, the people of this town and vicinity, concurring with the mistaken views of many veteran patriots of the Revolution, rejected by a very large majority that Union which, in the next age, their posterity were destined so gloriously to defend. I have left myself no time, nor was it a part of my design, to enter upon any consideration of Grafton's relation to the War for the Union. If the record of fatalities did not reach the unparalleled extent of the old French War, the roll of your volunteers was swelled far beyond every requirement of the government. For nearly every eight men your quota called for, you furnished, out of the abundance of your patriotism, an additional man.

Your eminence in this particular received ample recognition from the Commonwealth, when its chief magistrate said, in measured words: "I feel bound in truth and justice to say that no other town appears to have contributed to the late war a larger proportion than yours of its treasures and its men." I am speaking to those who helped to make the record. I know how appropriate the theme is; but I could not adequately treat it. To what examples of ancient or modern valor could I refer to set in more striking light your own? The mind reverts to Marathon; to Platea; and to the pass in the Locrian Mountains, where the three hundred Spartans with their few allies, held at bay a million barbarians.

The literature and art of twenty-five centuries has invested these examples of heroism with imperishable glory. No immortal literature has yet wrought its spell upon your deeds. The long arts of sculpture and painting have not familiarized the eyes of seventy generations with your achievements. Perhaps the conditions under which you and your comrades wrought and endured are not favorable to the representations of art, and the Achilles of the Civil War may never find his Homer. But I know of nothing in the quality of your valor, in the circumstances under which it was displayed, in the motives which actuated it, or in the results it achieved, to belittle it in comparison with the classic models of antiquity. The Greeks, trained in war from their infancy, on those renowned fields, confronted a foe formidable only in numbers, to preserve for a few precious decades a small tract of mountainous country, until their genius might create and transmit to other ages and other races a body of wonderful literature, monuments of unequalled art, and examples of politics and governments, of the highest interest to mankind. You fought without previous military training, against an equal foe, in the cause of human liberty, inspired with a lofty sentiment of national integrity, and to the end, in the immortal language of Lincoln, "that government of the people, by the people, for the people, might not perish from the

*Esak. Summels*

J. S. Nelson

minister's friend and active supporter in all good things.

It is also true of him that he has ever been a kind and generous friend to the poor, and has by his helping hand and wise and sympathetic counsels brightened many a life. It used to be said of him that "he would never have an unworthy man in the village." No saloon has ever found a roof to cover it in Saundersville, and no corrupter of the people, a home.

While giving his time to the exacting demands of a large business, and caring like a father for the welfare of the place, Mr. Saunders always manifested an intelligent interest in public affairs. He has voted at every Presidential election since that of John Quincy Adams in 1824. In the palmy days of the old Whig party he acted with them, and his counsel was frequently sought. Later he became identified with the Republican party. All local enterprises of moment sought his advice and support. He was an advocate of public improvements in the town of Grafton, where he lived, and active in all movements to benefit it. He had a large influence in getting the Providence and Worcester Railroad through, taking a large amount of stock, giving land for a station and settling land damages for the company. He twice represented the town with acceptance in the State Legislature, and served several terms as selectman, overseer of the poor, trustee of the cemetery, etc.; was director of the Grafton Bank and Savings Bank; also of Millbury Bank and Savings Bank; was director also of Worcester Safety Deposit Co., and is now the oldest director in the Worcester Manufacturers' Mutual Insurance Co., being one of its organizers in 1855. The fact that he was frequently called upon to act as arbitrator shows that he was widely recognized as a man of intelligence and discrimination in all business affairs.

Mr. Saunders was married at South Deerfield, Mass., in 1825, to Miss Minerva Boyden, and three daughters were born to them. One, Emily B., married William H. Jourdan, now of Worcester; another, Harriet M., became the wife of John D. Chollar, Esq., of the same city; the third, Minerva, married Robert W. Taylor, afterward of Providence. Mr. Saunders has three grandsons, viz.: William Saunders Jourdan, John Howard Chollar, Bradford Newcomb Taylor; one great-grandson, Harry Putnam Jourdan.

In 1867 Mr. Saunders married for his second wife Miss Margaret Read White, daughter of the late Deacon Washington White, of Grafton, who still, the most devoted of wives, imparts the charm of her presence to his beautiful home.

Changes have come to the village. The business is in other hands. New proprietors are running the mill. But though not enjoying the prosperity that once was his, Mr. Saunders can look out from the windows of his residence upon the surrounding activities, upon the mill he erected, upon the church he built, the trees he planted, and the beautiful vil-

lage he created, and believe that the place that bears his name will retain, long after he has gone, the marks of his formative hand. His influence will live on in what he has done for village improvement, and education and temperance and religion.

#### JASPER S. NELSON.

Jasper Stone Nelson, son of Josiah and Sophia (Goddard) Nelson, was born June 2, 1822, in the town of Shrewsbury, Mass, upon a farm still owned by the Nelson heirs, it having been in the possession of the family for the greater part of the last one hundred and twenty years.

The experiences of Mr. Nelson's early life were those of the farm and the district school, he attending the latter more or less until he was eighteen years of age. This, with three months at Worcester Academy, was all that fell to his lot in the way of educational advantages. After leaving school he learned the trade of shoe-making from an elder brother, and until about twenty-three years of age divided his time between the farm and the bench.

Mr. Nelson's career as a manufacturer of boots and shoes began in Shrewsbury in the year 1845 and was marked by a steady, uninterrupted growth and successful issue. The shop in which he began business was a plain building, ten by thirteen feet in dimensions, situated only a few rods from the place of his birth. This building was subsequently enlarged to about twice its original size. To this place he took the stock of his own selection, and with the help of an elder brother prepared it for market, being his own salesman. Such was the beginning of a now large and flourishing industry, with its agents and branch houses all through the West and South.

In 1848 Mr. Nelson moved to what is now North Grafton and became associated with Mr. James S. Stone, of Boston, a native and former resident of Grafton. In 1850 Messrs. Stone & Nelson purchased a tract of land near the Boston and Albany station, and with it a building which forms part of the present establishment. November 1, 1857, Mr. Nelson bought out Mr. Stone's interest, continuing the business in his own name until January 1, 1869, when Mr. Geo. H. Rugg, a former employé, became a partner to the business. In 1873, Mr. Nelson's son, Charles H., was admitted to the firm, and January 1, 1877, Mr. Rugg disposed of his interest to the other members, since which time the business has been conducted under the firm-name of J. S. Nelson & Son.

The factory, which was originally thirty by forty feet, two stories high, has been enlarged from time to time to meet the requirements of a steadily increasing trade, until the present buildings have a capacity of two hundred and sixty-four by thirty feet, four stories high in which two hundred people find steady employment.

For nearly forty years Mr. Nelson was in close contact and competition with business men all over the country, yet no dishonorable act or suspicion of unfairness was ever charged against him; his character for strict integrity stood unchallenged to the end. "His word was as good as his bond." As a citizen, Mr. Nelson was public-spirited and patriotic, concerned for the welfare of both his home and his country. He was not, however, ambitious for political honors, though he shrank from the performance of no known duty.

During the War of the Rebellion he was one of a special committee who, with the Board of Selectmen of the town, were entrusted with the management of its military operations, in which capacity he rendered valuable service and was among the foremost to assist, by word and deed, those who gave themselves to fight the country's battles, and many a soldier and soldier's family became the recipients of his practical sympathy and generosity.

Mr. Nelson was twice elected and served the town as a selectman, and in 1870-71 represented his district in the State Legislature.

October 31, 1844, Mr. Nelson married Mary E., daughter of Gardner Wheelock, who bore him three children—two daughters, Emma Elizabeth and Carrie Gilman, both of whom died before reaching their majority, and a son, Charles Horatio, who, upon the death of the father, succeeded to the business, which, under his wise and vigorous management is still (1889) growing and prosperous. Brought up to labor, Mr. Nelson's sympathies were with the laborer, and the men in his employ both loved and respected him, for they felt that in him they had a friend and benefactor, so that in the establishment of which he was the head, serious differences between employer and employé were practically unknown.

For whatever was false and degrading Mr. Nelson entertained a wholesome contempt and his sympathies were strongly on the side of temperance and moral reform. In him the Baptist Church of the village found a firm friend and generous supporter, and was greatly encouraged and helped by his regular attendance upon public worship—from which he seldom absented himself when in health—as also by his liberal contributions of money.

To know Mr. Nelson at his best was to know him as a friend, and those thus favored—and they were many, for he was a man to attract others—found in him at all times, and under all circumstances, the courteous gentleman, the genial companion and sympathetic helper. He was a man of strong attachments, loyal to his friends and eminently domestic in his habits; he loved his home and was not easily enticed away from its luxury and comforts.

In person Mr. Nelson was a man of fine physique and commanding presence, blessed with a vigorous constitution, and until the closing year of his life he enjoyed excellent health. He died October 22, 1884,

while yet upon the rising tide of a prosperous business career, beloved and mourned by all who knew him.

#### ERASTUS FISHER.

The little town of Killingly, Conn., was the birth place of the subject of this sketch, as it had been the home of his ancestors for several generations. To this place his great-grandfather, who bore the scriptural name of Barzillai (born January 6, 1730; died January, 1813), came in 1769 with his wife, Lydia Dexter (whom he married October 3, 1754). They were blessed with nine children, the four oldest of whom rendered valuable service in the War of the Revolution. One of the sons, Nathan, was taken prisoner, and died on the "Jersey" prison-ship. John, the eldest (born December 29, 1755; died June 9, 1843), the grandfather of Erastus, served during the entire war. On the farm now owned by John Williams he brought up his seven children, the second of whom, Laban (born January 1, 1783; died July 3, 1860), was the father of four children, of whom Erastus was one. If it be true, as Oliver Wendell Holmes has said, that "the education of a child should begin an hundred years before he is born," the present descendants of Erastus have much to be grateful for in their inheritance from his mother. Abigail Dexter (born April 2, 1789; died July 26, 1862) was a direct descendant of Rev. Gregory Dexter, who came from England in 1644, who was an intimate friend of Roger Williams, and came to this country at his solicitation, and who became pastor of the First Baptist Church in Providence, R. I. On the old homestead farm these parents reared their children. Both father and mother were earnest, devoted Christians, not only professors but possessors of true religion. Erastus (born November 21, 1810; died April 20, 1880) was sent to the public school, and in his good home he early formed those habits of industry, and acquired those moral characteristics, by which he was afterward so well known.

After his marriage, April 7, 1835, to Mary Fletcher Dresser (born September 19, 1813; died December 6, 1880), who became a worthy helpmeet in all his undertakings, they lived for a year on a leased farm on Allen Hill, near the old homestead, where their first son was born. Then, with assistance from his father, he purchased the farm in Grafton, Mass., now owned by George W. Fisher, and by hard work and rigid economy the soil was made to yield a profitable increase. In 1845 he bought a part interest, with his brother Waterman A., in the cotton-mill in what is now Fisherville. He took the superintendency, later bought the whole interest, and eventually associated with him his three sons as E. Fisher & Sons, which firm continued until his death. On January 27, 1881, the mills were burned, and a corporation was formed in the following spring, composed largely of his old business friends, and assumed in his honor the name

*Erastus Fisher;*

*J. L. Warner*

of Fisher Manufacturing Company. By direction of the company, as a testimonial of their high esteem, an excellent crayon portrait of Erastus Fisher has been placed in their office.

In 1861 he removed his residence to Worcester, while his business interests continued in the town of Grafton. He died at his home in Worcester, April 20, 1880, leaving behind him the example of a man who prospered in the good old-fashioned way, by his own productive industry and by honest methods.

In business life Erastus Fisher was characterized by invincible integrity, industry and perseverance. He was always a man of his word, abhorring deceit, and honorable in all his dealings and methods. Though quiet and unassuming, he was yet outspoken and resolute for the right. He was a good counselor, was possessed of a large fund of that uncommon thing called *common sense*, was wise in all his plans and energetic in their prosecution.

In his family-life he was a kind husband and a faithful and indulgent father. He endeavored to bring up his children in the way they should go, trained them to habits of industry and honesty and efficiency, and left them a priceless legacy in his counsels and example.

Politically he was a Whig, and cast his first vote for Henry Clay. Later he acted with the Republican party, and held strong anti-slavery sentiments. He cast his vote always and conscientiously at elections; was interested in the welfare of the town and ready to assist in public improvements. He had no desire for public office, but preferred to see others enjoying its honors and rewards.

He loved to spend his time apart from business hours in his home, yet consented to serve the town as selectman, and while a resident was a director of the Grafton Bank. He was also a member of the "Old City Guards" of Worcester.

He was interested in moral reforms, was an earnest and pronounced temperance advocate, and a total abstainer in practice.

He was a constant attendant on public worship and a professed Christian, he, with his wife, having joined the Evangelical Congregational Church in Grafton in 1842. He was benevolent toward his church, and interested in whatever tended to promote the kingdom of God. A handsome window, memorial to him and his wife, the gift of their sons, now adorns their church in Grafton and commemorates their virtues.

After his removal to Worcester he was a useful and valued member of the First Church (Old South) in that city, and served the parish as assessor and treasurer. After his death highly eulogistic resolutions were inscribed upon the parish records, from which the following is an extract: "In the death of our highly esteemed brother the Old South Church and Parish have lost a wise counselor, liberal supporter, and an earnest and devoted friend,—one whose heart was as full of love as was his life of noble and generous deeds."

His children were Henry Dresser, born at Killingly, Conn., January 18, 1836, died in Worcester March 14, 1886; George William (born November 18, 1843), at present the agent of the Fisher Manufacturing Company; and Albert Laban (born March 10, 1846), also a resident of Fisherville, and lately a member of the State Legislature.

---

SAMUEL D. WARREN.

Grafton, a beautiful hill-town of the county, was the birth-place of one of the eminent business men of this country, born there September 17, 1817. His father, a typical New England farmer, had at one time been in business at the South. The early school-days of the subject of our sketch were passed in his native town. At the tender age of thirteen, his father being dead, he entered Amherst Academy, remaining there two years. Like many a country youth before him, young Warren was filled with the idea that Boston held for him fame and fortune, which in fact was true in his case.

To the tri-mountain city he wended his way, seeking the prize before him. Disappointment was the result, and he returned to his native town. But he was made of the material that would not suffer him to remain in that limited field of action. Mr. Otis Daniell, a relative, saw the young man had a fixed purpose to rise in the world, and offered to him a position in Boston at small pay. The young man saw in this a beginning—a stepping-stone to greater things. He accepted the place with Grant & Daniell, paper dealers. His wages being low, he was compelled to be very frugal in his expenditures. His employers soon saw in him the qualities that go to make the successful man of business. Slowly but surely he was mastering all the details. His success was such, they decided, a few years after, to admit him a member of the firm, which then became Grant, Daniell & Co. Previous to 1853 the concern was engaged only in selling paper. At that time only a small portion of the paper used here was made in this country. Five miles from Mr. Warren's birth-place the first paper-mill in Worcester County had been established, in 1776, by Abijah Burbank. As a boy at school, young Warren had used paper bearing the Burbank water-mark. No doubt he had seen the vats of blue pulp and noted the process of paper-making in Millbury, crude though it was.

Perhaps memories of this mill were in his mind when, in 1853, he determined upon manufacturing paper himself. He accordingly leased a small mill at Pepperell, Mass., as an experiment. But, it proving too small a field, he abandoned it and bought mills at Cumberland Falls, Me. The mills were old and much in need of repair, and a fortune for those days was expended on them before he was satisfied. The best machinery known was introduced and every appliance to facilitate the business. It was a rule with him that to successfully do a job, good tools must be

used. At that time, it is said, he was deeply engaged in the manufacturing part of his business, leaving the other arrangements mostly with his partners.

The business at Cumberland Falls was successful in all its details. An enterprising community sprang up about there, in consequence of good management. An idea of the magnitude of the business of this firm in paper-making can be gathered when it is known that the daily production of the firm's mills in 1888 was forty-five tons of paper, and the same number of tons of wood-pulp. A small mill was bought in 1874 at Yarmouth, Me., where a series of experiments were begun in making pulp of wood-fibre by a chemical process. With a tenacity characteristic of Mr. Warren, he held on to his purpose until his fondest dreams were realized. The business successfully started grew until twenty-five tons daily were made, all of which was put on the market.

Another pulp-mill was set up at Cumberland Falls in 1879, to make the pulp for their own paper-mills. Not having reached the height of his ambition as a business man, Mr. Warren decided to add to their other business the importation of rags. Several journeys to Europe were made by him before his plans were all perfected. In this, too, he was also successful, his firm at one time becoming the largest importers of rags in the country. About 1875 the firm decided to abandon this part of the business.

Mr. Daniell having withdrawn from the firm in 1855, the name of Grant, Warren & Co. was used in the business until 1867, although Mr. Grant had died in 1863. S. D. Warren was now alone in this immense business, and continued so until 1871, when the firm became S. D. Warren & Co. Thus, by steady application to business, he had made for himself the place he sought. He had scaled the heights his ambition had reared before him. His name was a power in the financial and business world. He had gone through the many paths of business for long years, and had come out with an unspotted reputation.

Respected by his fellow-citizens, he had been honored by them with many important trusts,—a trustee of the McLean Asylum and of the Adams Nervine Asylum, a director in the First National Bank and of the Provident Savings Institution; also of the Fireman's Relief Fund.

His wife was Miss Susan, daughter of Rev. Dorus Clarke, D.D., by whom he had six children, of whom four sons and one daughter are now living.

Mr. Warren died May 11, 1888. His funeral was held at Mount Vernon Church the 14th, Rev. Samuel E. Herrick officiating. Memorial services were also held at the same hour at Cumberland Falls, where his large mills were situated. The burial was at Mount Auburn. He was a member of Mount Vernon Church, on Ashburton Place, and his Christian deeds are well known. Liberal in all useful ways, his heart was ever open to the needy poor. Broad in his charity, sweet memories cluster around his name.

His was a genial nature, ever looking on the bright side of life. For the young he ever had a kind word of encouragement and advice. Numerous instances might be given where he has assisted such to place and fortune.

As a business man he had few equals. His sterling integrity soon became known in the business world, and "his word was as good as his bond." His name sheds lustre upon the place of his birth. Fitting it is that his features should be preserved in the history of the county he loved so well.

#### GEORGE W. HAMMOND.

George Warren Hammond, eldest son of Josiah Hovey Hammond and Anna Grout (Warren) Hammond, was born in Grafton, Mass., April 4, 1833. His father was descended from Thomas Hammond, of Lavrenham, England, who came to this country in 1636, with his wife Elizabeth (Cason) Hammond. This family of Hammonds settled in Hingham and Newton, and for six generations the Hammond family lived at Chestnut Hill, where Josiah Hovey Hammond was born in 1806. The Warren family came from Wayland, England. Capt. Samuel Warren bought his land in Grafton of his brother, in 1731, who bought it of the Indians in 1728. A part of the old Warren homestead has remained in possession of the Warren family until recently, when it passed by will into the hands of the subject of this sketch.

George Warren Hammond's business career began at Cumberland Mills, Maine, April 12, 1854, under the care of his uncle, the late Samuel D. Warren, of S. D. Warren & Co., Boston. Mr. Hammond became agent at Cumberland Mills in 1863. These mills manufacture paper of the finest quality and are among the largest in the world. In 1874 they began the development of the new industry of chemically-prepared wood-fibre, to be used in superior paper; this industry has been carried on at Yarmouthville, Maine, under the name of the Forest Paper Co., the sole owners being Messrs. S. D. Warren and G. W. Hammond.

Mr. Hammond married Ellen I. S. Clarke (October 15, 1874), daughter of Rev. Dorus Clarke, D.D., of Boston. Since that time Mr. Hammond has been a resident of Boston, although continuing the direction of his business in Maine.

As this history of Worcester County contains records of many of its pioneers and representative men, there seems a peculiar appropriateness in preserving here this mention of the four nephews of S. D. Warren, which appeared in the *Portland Advertiser*, Monday, July 9, 1888, after the commemorative service to the late S. D. Warren had been held at Cumberland Mills and Yarmouth Mills, Maine. The *Advertiser* says—

In this connection it is not inappropriate to refer to the four nephews of Mr. Warren, who were his special body-guard at the funeral in Bos-

*Geo. W. Hammonel*

*Jas. S. Storer*

*J. C. Furber*

ton, May 11th. They were George W. Hammond, long associated with the Cumberland Mills as agent and later joint owner with Mr. Warren in the Forest Paper Co.'s mills, for the manufacture of wood-fibre, at Yarmouthville; John E. Warren, present agent at Cumberland Mills, son of Joseph A. Warren, who was born in Grafton, Mass.; Henry E. Merriam, agent of the Copsecook Mills, Gardiner, Maine, and M. B. Mason, a partner in the Boston house of S. D. Warren & Co.

These nephews have faithfully sought to develop, not only the business, but the social and religious interests in their respective places. These men represent the devotion, loyalty, integrity and ability essential to success. Those who rightly appreciate the training of the home and the church, and who mark the influence of birth and family, will note with interest Mr. Warren's fortunate position in being supported and succeeded by such men.

Three of the nephews mentioned are sons of sisters of S. D. Warren.

#### JAMES S. STONE.

There were two early settlers of the name of Stone, from whom most of the very numerous families of that name in New England are descended, viz., Simon and his younger brother Gregory. The latter moved from Watertown to Cambridge, probably about 1636. Gregory was the ancestor of the families in this town.

Nahum Stone, born 1753, married Hannah Haven, died August 30, 1803; he died September 7, 1821. Children: Gregory, born July 11, 1776, married Prudence Leland; David, born January 18, 1778, died September 22, 1778; Albert, born August 5, 1779, married Sally B. Kimball; Daniel, born December 4, 1781, married Sally Williams; Josiah H., born June 28, 1783, married Betsey Bent.

Gregory Stone (Nahum), born July 11, 1776, married Prudence Leland, born 1778. He died 1810.

Albert Stone (Nahum), born August 5, 1779, married Sally B. Kimball.

He was a man of sound judgment and stern integrity, with a liberal turn of mind. He was much interested in town affairs, and always looked for the welfare and prosperity of the town. He held many town offices, such as selectman, overseer of the poor, assessor, and collector of taxes, and was Representative for two years; he also served on various town committees of importance.

In early life he was a clothier by trade. He had a fulling-mill. About 1812 he built a two-story building for machinery for carding wool for farmers who made their own cloths, as everything was high during the war.

In about 1825 he, with his neighbors, sold out his farm in New England Village, and later bought on Brigham Hill, his honored wife being unwilling to move out of town and away from their numerous acquaintances.

Children: Hannah, born May 23, 1804, married Benjamin Kingsbury; Mary, born September 3, 1806, married Lincoln Wood; Lorana, born August 19, 1808, married Elijah L. Case; Sally, born August 27,

1810, married William E. Tidd; Martha, born October 21, 1812, married Leander S. Pratt; Albert G., born November 17, 1814, died March 7, 1818; James S., born July 4, 1816, married Mary L. Phinney June 13, 1838; Elbridge K., born August 23, 1818, married Jane E. Brown; Lucy E., born June 26, 1821, married William J. Eaton.

James S. Stone, born July 4, 1816, married Mary L. Phinney, June 13, 1838.

In addition to a very limited common-school education, he attended the Teachers' Seminary and Phillips Academy at Andover for about two years, teaching school during the winter seasons.

At the age of twenty-one years he engaged in the boot and shoe business for himself in Alton, Illinois. Selling out there in 1845, he came to Boston, resuming the same business in his own name, and afterwards was a partner in the firms of Fay, Jones & Stone and Fay & Stone. Giving up active business in 1875, he was later interested in real estate, and employed his leisure time for about ten years in building stores.

Children: Albert, born in Alton, Illinois, May 20, 1843, married Anna H. Putnam; Ellen Augusta, born in Boston August 9, 1846, died September 26, 1850; Edwin Palmer, born in Medford, Mass., September 3, 1853, married Clara O. Leland.

Elbridge K. Stone, born August 23, 1818, married Jane E. Brown.

In 1840 he established himself in the jobbing and retail boot and shoe business at Quincy, Illinois, building himself a store in 1857, continuing in the same line of business for twenty-five years; and later on for eighteen years was superintendent and manager of the Horse Railroad Co. in Quincy, his son, E. K. Stone, Jr., succeeding him in that office. Once during his business life, owing to the general depression that prevailed in that section of the country, he found himself obliged to compromise with his creditors, but as soon after as he was able to do so, it afforded him the greatest pleasure to pay them all in full, with interest. He still resides in Quincy, Illinois, a much honored and respected citizen.

Children: Sarah E., born July 13, 1843, died May 27, 1848; Emily H., born February 12, 1846, died May 15, 1848; Mary J., born November 30, 1848, married H. Newhall; Elbridge K., born in the year 1850, married Cora Edison; Charles E., born September 19, 1854, died November 3, 1856.

#### JONATHAN CHESTER FORBUSH.

Silas Forbush, the father of the subject of this sketch, was a descendant of one of the old families of Worcester County, the family of Forbush being traced back as far as 1680, when they were settled in Marlboro'.

Silas Forbush was born in Grafton in 1795, and always lived there, dying at the age of ninety-two.

His life was one of great industry, integrity and usefulness. At an early age he began the business of manufacturing shoes, at which he continued successful for some years. Later he returned to his farm, in which he always took delight. During his entire long life he was a man of influence in the town, being called to many important trusts.

He was certainly the very model of the old-time, cheerful, contented and successful New England man.

Jonathan Chester Forbush was born in Grafton, July 14, 1825. His boyhood was spent on his father's farm, and his education was that of the common schools. Later he worked in his father's shoe-shop, where he continued till early manhood, when he began the business of manufacturing shoes with Nathaniel Brown, also a native of Worcester County. The firm remained in Grafton for about one year, when they removed to the then young city of Buffalo, New York, where they have ever since continued the business.

Mr. J. C. Forbush's life, both in a business and social way, has always been pleasant and very successful. Inheriting the sturdy traits of both his father and mother, he has always commanded the confidence and respect of the community in which he lived.

#### WALTER P. PHILLIPS.

Walter Polk Phillips was born June 14, 1846. Prior to his parents' removal to Providence, in 1859, the family lived on a farm near Saundersville. Mr. Phillips' father is Andrew Smith Phillips, now of Providence, and his mother, before marriage, was Roxana Minerva Drake, of Northboro'. In 1861, Walter secured employment in the telegraph office at Providence, with a view to becoming an operator. He was well advanced in his studies for a boy of fifteen, and so assiduously did he apply himself to the business which he had undertaken, that in 1867 he was formally recognized by Professor Morse, the inventor of the telegraph, as the most expert operator in the United States. The record made by Mr. Phillips, in that year, in a tournament in which many stars of the profession participated, has never been equaled.

Mr. Phillips was now of age; he had recently married Francena Adelaide Capron, of Attleboro', and having made his mark as a telegrapher, he decided to take a step forward and enter journalism. With this object in mind, he began a special course of study, which, he being a natural and persistent student, rapidly fitted him for newspaper work. During the next five years he combined with his telegraphic duties a great deal of newspaper writing of various grades, ranging from ordinary reporting to editorial writing and book reviewing.

In 1872 Mr. Phillips established the *Attleboro' Chronicle* and, pushing it quickly to phenomenal

success, disposed of it advantageously and went to New York. Here, in due course, he found his way into the service of the Associated Press, with which important organization he met with marked success. His value was recognized in 1878, in his selection for the head of the Associated Press at Washington. Remaining at the capital until 1883, when his reputation as a journalist and *litterateur* was largely augmented, Mr. Phillips returned to New York in that year, and assumed charge of the United Press, of which he was made and continues to be the secretary and general manager, as well as one of its principal owners.

This organization, although the product of fifteen years of experiment and unflagging endeavor, was a weak and ineffective competitor of the Associated Press when its affairs passed to Mr. Phillips' hands. Under his charge the United Press has become a power in the land, and a most prosperous business undertaking. It was long since recognized by its rival, the Associated Press, as a legitimate competitor, and in the place of hostility, formerly existing between the two organizations, there have come, under Mr. Phillips' administration, most radically changed conditions, which contemplate self-respecting co-operation and a greater degree of usefulness for both, than was possible in the past or dreamed of for the future.

Mr. Phillips' management of the United Press has served to permanently fix his status as a man of affairs, and it is as a business man that he is now best known after having successively won a reputation in telegraphy, in journalism and in the wider field of general literature.

#### JONATHAN D. WHEELER.

Hon. Jonathan D. Wheeler was born August 14, 1806. At the early age of seven he came to Grafton, and resided with his paternal uncle, Jonathan Wheeler, Esq., and while here entered Leicester Academy, from which place he graduated. After graduating he studied languages with Dr. Dodget, and in 1823 he entered the firm of Earle & Chase (J. Milton Earle and Anthony Chase), in Worcester, as clerk. After remaining here a few years he went to Weston and engaged in mercantile business, where he remained for three years, subsequently entering the employ of the Bottomly Manufacturing Co., in Leicester, as chief clerk in their office. In 1829 he came to Grafton and purchased the store of Samuel Harrington, and, with Ebenezer Aldrich as partner, conducted the business. While in this business he married Elizabeth Davenport, of Mendon, daughter of Benjamin Davenport; she died May 15, 1832.

In 1832 he sold out his interest in the concern to Jonathan Warren, and removed to Boston, where he conducted for five years a domestic goods commission business at No. 75 Kilby Street, under the firm-name of Farnum, Mills & Wheeler. During the

Walter T. Phillips

*J. D. Wheeler.*

last two years the firm-name was Pierce, Mills & Wheeler.

October 13, 1834, he married for his second wife, Caroline A. Norcross, of Boston, daughter of Otis Norcross, Esq., and sister of Hon. Otis Norcross, ex-mayor of Boston. In 1837 he formed a co-partnership with Benj. Poor and conducted an extensive commission business for nearly two years. In 1839, with Peter Farnum, he purchased of the Wadsworth Manufacturing Co. at Danville (Barre), Mass., the large woolen-mills, and for a short time conducted an extensive manufacturing business.

He subsequently sold out to his partner and returned to Boston. Moving again to Grafton in 1843, he entered into business with Samuel Harrington (firm-name Harrington & Wheeler), and after a short time purchased what is now known as the Wheeler Cotton-Mills, West Millbury.

In 1863-64 he was a member of Gov. Andrew's Council from the Sixth Councilor District. In 1868 he represented the Second Worcester Senatorial District and was chairman of the committee on the Troy and Greenfield Railroad; he declined a re-election. Since the organization of the Grafton National Bank he has been a director, and was president from 1864 to 1882.

He was selectman for three years, and one of the trustees of the Grafton Savings Bank from its organization.

## CHAPTER CXXV.

### SUTTON.<sup>1</sup>

BY J. W. STOCKWELL.

THE township of Sutton was purchased by certain persons residing in Boston, of John Wampus and others, Nipmug Indians, and is described as a tract of waste land eight miles square, lying between the towns of Mendon, Worcester, New Oxford, Sherburne and Marlborough, embracing within its limits an Indian reservation four miles square, called "Hassanimisco."

The origin of the name is unknown. Deacon Leland gives an old tradition, which he regards well-established: It is this John Wampus visited England; while on his return voyage to New England he received medical aid and other kindnesses from a fellow-passenger, Dr. Sutton, and from gratitude to him for his kindness, suggested his name for the town-

ship, when he gave the deed conveying it to the proprietors.

The original deed from John Wampus & Co. seems to have been lost, from the fact that the "Proprietors of Sutton," at a meeting held February 22, 1731-32, ordered "That the Clerk shall provide a new book and transfer this regularly, and that on the first pages of it, the original deed of John Wampus, alias White, together with the Grant of the General Court, be first placed"—and though a new book was procured and the transfer made, no deed appears. The grant referred to was recorded on the first pages, and is as follows:

Joseph Dudley, Esqr., Captain General and Governor In Chief In and over her Majesties Province of the Massachusetts Bay in New England in America—To all to whom these presents shall come Greeting.

Whereas John Conner, Pewterer, James Smith, Shop-keeper, William Mumford, Stone-cutter, and Joshua Hewes, Innkeeper, all of Boston In the County of Suffolk, within the Province aforesaid by their petition presented to the said Joseph Dudley, Esqr., Governor, and the General Assembly of the aforesaid Province, at their last Session begun the Eighth day of March last past before the sale hereof, Have humbly prayed in behalf of themselves and company, a confirmation by a grant of this Court of their right and title to a certain tract of land purchased of John Wampus, alias White, and Company, Indians situate in the Nipmug Country between the towns of Mendon, Worcester, New Oxford, Sherburne and Marlborough, of eight miles square, in which is included a tract of land four miles square called Hassanimisco, and possessed by the Indians. And Whereas the said Governor and General Assembly have ordered that the prayer of said petition be granted, saving the lands purchased by the Haynes's, and reserving the Indian property of Hassanimisco—Provided also that they intrench upon no former grant of the General Court, and they be obliged to settle a town of thirty families, and a minister upon said lands, within seven years after the end of the present war with the Indians. And that they reserve three hundred acres of the said lands for the first settled minister, four hundred acres for the ministry, and two hundred acres for the use of a school, all to be laid out conveniently. The said tract to begin upon the line of Marlborough next Hassanimisco, a platt thereof to be returned and approved by this Court, as in and by the record of said General Assembly, relation being thereunto had, doth and may appear.

Know ye therefore that I, the said Joseph Dudley, Esqr., Governor, agreeable to the above received order passed by the Council and Assembly respectively, and pursuant to the power and authority contained and granted in and by her Majesties Royal Charter the Governor and General Assembly of the aforesaid Province of Massachusetts Bay, have granted, ratified and confirmed and by these presents do freely, fully and absolutely grant, ratify and confirm unto the above named John Conner, James Smith, William Mumford, Joshua Hewes, and others, their Partners, viz.: Paul Dudley of Boston aforesaid Esqr., John Jackson of said Boston, housewright, Mary Conner and Elizabeth Pitom, daughters and co-heirs of John Pitom Plummer, deceased, Edward Pratt of Newtown within the County of Middlesex, Physician, and Elizabeth Wilson of Hartford in the County of Connecticut, Widows, their heires and assigns forever, all the aforesaid certain tract of waste land purchased of the Indians, Native Proprietors, as above mentioned, situate and described as aforesaid, and to be surveyed, platted and approved as above directed, with and under the several savings, reservations, Provisos and conditions above expressed, and all the estate, right, Title, Inheritance, use, property, and Interest of the said several persons therein and thereto—Together with all and singular the fields, feeding, herbage, pastures, soils, swamps, Meadows, Rivers, Rivulets, Ponds, Pools, Woods, underwoods, trees, timber, stones, fishing, fowling and hunting Rights, Members, Heraditaments, Emoluments, Profits, Privileges and Appurtenances thereto belonging or in any way appertaining. The said tract of land being hereby granted for a township, the same to be called Sutton. And to have, use, exercise, and enjoy the same powers, immunities, and privileges by Law granted to towns. To have and to hold all the said tract of land by the name of the town of Sutton, with all the aforesaid premises, Emoluments, Profits, Privileges and appurtenances thereto belonging, with and under the several savings, reservations, Provisos and conditions herein before expressed. And to be surveyed, platted, returned and approved as above said unto

<sup>1</sup> In preparing this History of Sutton, the writer has selected largely from the "History of Sutton" printed for the town in 1878, edited by Rev. W. A. Benedict and others, instead of culling over again the original material from which that work was compiled, as collected and preserved by Deacon Jonathan Leland and Christopher C. Baldwin. Therefore, while I have not followed the form or arrangement of the book, I have taken from that history any material facts and used them without other acknowledgment of authorship.—J. W. S.

thesaid John Conner, James Smith, William Mumford, Joshua Hewes, Paul Dudley, John Jackson, Mary Conner, Elizabeth Pittom, Edward Pratt, and Elizabeth Wilson, their heires and assigns to their proper use and behoofe forever. Yielding, Rendering and Paying therefore unto our Sovereign Lady Queen Anne her kings and Successors one fifth part of all the Gold and Silver Ore and Precious stones, which from time to time and at all times forever hereafter shall happen to be found, gotten had or obtained in any of the said lands and Premises, or within any part or parcel thereof—In lieu and stead of all Rents, Services, Dues, Dutys, and demands whatsoever from the said lands and premises, and for every part and parcel thereof. In Testimony Whereof I the said Joseph Dudley, Esqr., Governor have signed these presents and caused the Publick seal of the Province of Massachusetts Bay aforesaid to be hereunto affixed.

Dated at Boston aforesaid the fifteenth day of May in the third year of her Majesties Reign Anno Domini 1704.

{ The publick seal }  
{ on a label appending }

J. DUDLEY.

Copy of Records Examined.

H. ADDINGTON, Sec.

The tract of land included in the above grant was, with the exception of here and there a cleared space, on which the Indians raised their corn, and a few marshes, called meadows, an unbroken forest, heavily wooded with pine, oak, hickory, chestnut, birch and maple. In its physical aspect it presented many attractive features, and was a favorite resort of its native owners, who reserved a home within its limits. Its surface is uneven and hilly, and, though none of its hills rise to a great height, yet many of them are of sufficient elevation to reveal from their summits scenes of quiet beauty unsurpassed in any other portion of New England.

The soil is varied, in the southern and eastern part being of a sandy and gravelly nature, while in the northern and western parts much of it is a clayey loam. In the main it is well adapted to agriculture, though some portions, particularly in the southern part, are too rocky to be brought under cultivation, and none of it was subdued and made productive without much patient toil.

The fine farms of to-day, which embellish hill-side, hill-top and valley, are the result of the muscle and money the several generations that have occupied them have contributed. This township furnishes great facilities for manufacturing purposes, as well as for agriculture. There are within its limits several natural ponds, fed largely by hidden springs, whose outlets afford fine water privileges. The principal of these are Dorothy Pond in the north part of the town,<sup>1</sup> Ramshorn in the northwest, Crooked Pond (Singletary Lake) near the centre and Manchaug Pond in the southwest. Blackstone River—called by the Indians Kittatuck—has its rise in Ramshorn Pond, and passes through the town from northwest to southeast. This river furnishes valuable water-power. So also does Mumford River, the outlet of Manchaug Pond. Mill Brook, the outlet of Crooked Pond (Singletary Lake), has in the distance of a mile a fall of one hundred and seventy-five feet, and affords seven water privileges. There are several

other streams in town which the early settlers utilized by the erection of saw-mills, grist-mills and fulling-mills, and which in later days have been employed in manufacturing of various kinds.

In its geological features the town presents nothing of a peculiar nature. Like many other towns in Eastern Massachusetts, the rocky formation is chiefly granite, quartz rock and gneiss. Gneiss predominates, and the quarries which have been opened furnish most excellent stone for building purposes. This rock often contains iron pyrites, mica, lead, tin and some other mineral substances in small quantities. The glitter of the little particles has led to the belief that gold and silver might be found in this town, and, in common with many others in the State, it has had its excitements over wild and fruitless searches for the precious metals.

There are natural curiosities in the town, some of which are thus referred to in Whitney's "History of Worcester County:" As first. In the west part of Sutton, within sixty rods of the rise of the inlet of Ramshorn Pond, which is the head of Blackstone River running to Providence and falling into the sea at Bristol, is a brook sufficiently large to carry a saw-mill in Sutton, then bears away into Oxford, joins French River, which unites with the river Quinebaug, and enters the sea at New London.

Secondly. A few rods west of the Second Parish Meeting-house there is a swamp having two outlets, one at the southwest, the other at the southeast. Both these outlets enter Blackstone River above described, at about one mile's distance from each other. But the river is estimated to run ten or twelve miles after the entrance of that one on the westerly side before it returns and takes in that on the east.

Thirdly. In the southeastern part of the town is a cavern in the earth or rocks, commonly called Purgatory. The rocks on each side of the chasm evidently appear to have been rent asunder. People may enter some rods under the ground or rocks, and there are cracks down which they drop pebbles, and after these strike the sides alternately several times they are heard to fall into the water; and a brook issues out at the bottom of the hill.

It may be acceptable to give a more particular description of this place called Purgatory.

It is the side of a hill which consists of vast ledges of rocks. Where the natural descent begins, a chasm has been formed of perhaps thirty, and in some places forty feet in width, in these ledges by some violent concussion which left this body of stones of all shapes and sizes to fall in. Above, it is open to the heavens, and the ledges, on either side, are from five to ten and so on to twenty and even forty feet in height. This chasm is, perhaps, near eighty rods in length, and the descent is gradual and not very difficult. Where the greatest depth is, water issues from crevices in the rocks and hangs in icicles and even in solid bodies of ice, not only in May, as I have seen,

<sup>1</sup> Now Millbury.

but in June, although the descent is to the south. Some small caverns were formed by the falling of these rocks, through which persons have descended and come out several rods below. This is a most stupendous place, and fills the mind of the beholder with exalted ideas of the infinite power of the great Creator of all things, "who removeth the mountains and they know it not; who shaketh the earth out of its place, and the pillars thereof tremble."

After all, no description given of this place by another will enable persons to form just and adequate conceptions of it.

The ledges which Mr. Whitney says are "from five to ten and so on to twenty, and even forty feet in height," are found by actual measurement to be in some places between fifty and sixty feet in height. Dr. Hitchcock, in speaking of Purgatory, puts the extreme height of the sides of the fissure at seventy feet.

The settlement of the town was delayed by the war known as "Queen Anne's War," which began in 1702 and was not ended until 1713.

November 17, 1714, the proprietors held the first meeting of which there is any record. At this meeting (held in Boston) it was voted, "That three men should be chosen for a committee to order the affairs of that place"—Sutton. Nathaniel Brewer, Jonathan Draper and Eliezer Daniels were chosen such committee, and "were to stand until others were chosen."

It was the same day voted that all the charges that has been and shall arise, till the next meeting should be paid by the Proprietors equally according to their several proportions at twenty shillings for every 500 acre right.

The next meeting was held in Boston, March 2, 1714-15.<sup>1</sup>

At this meeting it was voted

That Jonathan Draper, Eliezer Daniels and Nathaniel Brewer should be a committee to go and lay out sixty lots at Sutton, for the Proprietors, of thirty acres a lot, thirty rods wide and one hundred and sixty long.

Voted the same day that all such as had one five hundred acre right should have a thirty acre lott, and they who had more according to their proportion.

It was also

Voted that there should be a rate of sixty pounds, one pound on every five hundred acre right.

It appears from these votes that the first division of the township was into sixty five-hundred acre rights. Each proprietor owned at least one right, some more. Actual surveys, as will appear, were afterwards made of lots, corresponding in number to the number of rights, and varying in area from thirty to one hundred acres. These lots were drawn by the proprietors—each right being entitled to one—and disposed of by them individually.

<sup>1</sup> Before the adoption of the "New Style" in England, 1752, the year was considered as beginning March 25th. Any date between the 1st of January and the 24th of March would be a year too little; so to avoid mistakes, it had become customary to give both years as above. March 2d would occur in the year 1714, should the year begin the 25th of March: in 1715, should it begin the 1st of January.

At the meeting held March 2, 1714-15, it was likewise

Voted, that all such as should appear to go first and live at the town of Sutton, for their encouragement should have one hundred acres of land given them for their own, provided they settle two years from the date hereof; and they to bear their proportion of town charges, the Proprietors to bear half the charges of building a Meeting-house and settling a minister the first four years.

March 18-19, 1714-15. Meetings of the proprietors were held at which it was

Voted that every man shall have a convenient way to his lott through his neighbor's lott, where it shall be most convenient for him and least damage to his neighbor; also in all after divisions in the town every person shall have a convenient way to their lotts, which lott is to be understood to be a proper whole lott.

Also

Voted the same day that for encouragement of thirty families to go and settle first, they should have four thousand acres laid out to them on the northwest side of the road from Marlborough to Oxford provided, and it is to be understood that such as appear and are allowed by the Committy do go and work upon their lotts within six weeks, and make a return to the Committy. And upon their default the Committy shall have liberty to putt in others as shall appear.

Voted the same day that the Committy shall go and survey the four thousand acres of land, and lay out thirty home lots in it, containing forty acres per lott, at the settlers' charge.

Voted the same day that Jonathan Draper, Edward Sumner and Nathaniel Brewer should be a Committy to allow of the settlers.

It seems that the survey of the land granted to the thirty families who should be approved by the committee and settle upon it within the time prescribed was made and the thirty lots of forty acres each were in due form laid out. But no settlement was effected during the year. It appears that no formal "Act of Incorporation" was ever secured, or asked for by the proprietors or settlers of the town. The following endorsement is on the back of a plan of the township on file in the land office.

In the House of Representatives,  
June 18, 1715.

Ordered that the Land described and Platted, on the other side, be allowed and confirmed to the Proprietors of the Township of Sutton. Provided it Intrench on no former grant. Sent up for concurrence.

JOHN BURRELL, *Speaker*.

In Council, June 21, 1715,  
Rec'd and Concurred,

JOSEPH HILLER, *Clerk Coun.*

A true Copy, Examined,

JOS. MARION, *D. Sec'y*.

The next meeting of the proprietors of which there is a record was held in Boston, March 13, 1715-16, at which the following votes were passed:

Voted that every five hundred acre right should draw a second right of one hundred acres.

The same day it was voted that wheresoever any clay was found in any man's lott, it should be for the use of the whole town till a publick place was found for that use.

Voted the same day that the Mill lot<sup>2</sup> and stream in the settlers' side shall be at the Proprietors' disposal.

Voted the same day that the proprietors will be at half the charge of building a meeting-house and settling a minister for the first four years from the date hereof.

Voted the same day that the settlers shall have liberty to cutt grasse and timber in the Proprietor's land till they come to improve and to be laid out.

<sup>2</sup> This lot embraced a tract of one hundred and sixteen acres at the foot of Crooked Pond, and included the privilege of the stream to the lower falls.

During this year (1716) three families were found of sufficient nerve and enterprise to pioneer the settlement of the town. These families were those of Benjamin Marsh, Elisha Johnson and Nathaniel Johnson.

They built their cabins near the centre of the town, and spent there the winter of 1716-17. It proved a trying winter to them. It was the winter made memorable by the deep snow which fell the last of February, and wholly covered the cabins.

Elisha Johnson, whose cabin was located near the place now occupied by Mr. Samuel Prescott, had left his family the morning of the day the great snow commenced falling, for the purpose of obtaining some supplies in Marlborough.

He was seen on his way by a friendly Indian, who, when the storm had subsided, started on snow-shoes for the little settlement, and found the cabin of Mr. Johnson by the hole which the smoke from the fire-place had made through the snow. His family would doubtless have perished had it not been for the kind forethought of this friendly Indian. Mrs. Johnson said "no human voice ever sounded half so sweet as did that." Other families were attracted during the year 1717 by the offer of a farm for the taking, so that, at its close, the thirty families to whom a grant of four thousand acres had been made, and for whom home-lots of forty acres each had been laid out, were on the ground.

The tract of land which the four thousand acres embraced was so located on the north side of the Oxford Road, that a north and south line dividing it into equal parts would pass directly through Singletery Lake.

The home-lots fronted some of them on the Oxford Road, extending as far west as the place now occupied by Deacon John Marble, and east as far as the place now occupied by H. S. Stockwell. Five of them were north of and joining those most easterly and eight of them in what is now the "Eight Lots District"—the most easterly of these being the place now occupied by Mr. Solomon Severy.

The entry in the proprietors' records with reference to the thirty families to whom four thousand acres of land were given is as follows:

These are the names of such as are entered settlers in the four thousand acres that was given to them upon the conditions that they would go and settle first there and bear charge with the proprietors according to their agreement.

William King.  
Oliver Gosse.  
Joseph Sibley.  
William Stockwell.  
Benjamin Marsh.  
Thomas Gleson.  
Samuel Gowing.  
John Waite.  
Benjamin Smith.  
John Stockwell.  
Jonathan King.  
Samuel Bixbee.  
Samuel Barton.

Thomas Gowing.  
Samuel Parker.  
Samuel Stearns.  
John Bates.  
Jonathan Sibley.  
William Rutter.  
Timothy Manning.  
John Sibley.  
Samuel Dagget.  
Nathaniel Johnson.  
William Larned.  
Elisha Johnson.  
Richard Gibson.

William Stockwell.  
Freegrace Marble.

Ebenezer Cutler.  
William Heywood.<sup>1</sup>

The plat of "Settlers' Land" contains four thousand nine hundred and sixty acres. The south line on the Oxford road was 1,240 rods, the west line 640, the north line 1,240, the east 700 rods. Six hundred acres were allowed for "Crooked Pond" (Singletery Lake), and three hundred and sixty acres for farm. This farm was at the southwest corner of the plat, and fronted on the north side of the Oxford road, the east line being near Deacon Marble's house. For what purpose this farm was laid out cannot now be learned. There is no record with reference to the use to which it was put, and no allusion is made to it, only as bounding the land adjacent as this was apportioned among the settlers. The thirty persons above named style themselves "Proprietors of the four thousand acres," and kept a record of their meetings. This record contains little of interest, as it is mainly filled up with proceedings pertaining to the division of what remained of the four thousand acres among the occupants of the home-lots, and the boundaries of each man's portion.

The aim seems to have been so to divide the land that no one should have reason to complain that he had been wronged; and that no dissatisfaction was expressed when the allotments were made is pleasing evidence of the good feeling which existed, and the disposition of all to see that exact justice was done.

The mill-lot to which reference has been made was assigned to Ebenezer Dagget, as appears from the following entry in the proprietors' records:

Ebenezer Dagget hath the mill-lot with the privilege of the stream to the lower falls, upon condition that the said Dagget, or his Heires, keep a Grist-mill for the use of the town; and if the said Dagget denies or refuse to keep a mill for the use of the town he shall return the stream to the town again.

The return of the mill-lot, with boundaries carefully defined, is noted in the proprietors' records of November 23, 1717.

The first town-meeting was held at the house of Captain John Stockwell, December 3, 1718.<sup>2</sup> This house was a small one, about fifteen feet by ten, and stood near the present dwelling of Mr. Simeon Stockwell. Elisha Johnson was elected moderator; and selectmen, a town clerk and a constable were chosen "to continue in office until the next March meeting."

Action was also taken on a proposition of the proprietors, that a committee be appointed to act with a committee whom they had chosen, to aid in the matter of building a meeting-house, and establishing the preaching of the Gospel.

<sup>1</sup> A few of these names will be recognized as still common. Numerous descendants of some of these families are now residents of the town.

<sup>2</sup> Not within the house, but at the house. The moderator, Elisha Johnson, stood upon a rock, nearly flat on one side, and this rock is the foundation-stone in the southeast corner of the cellar wall of the house now owned by Simeon Stockwell, and illustrated on page 235 of the "History of Sutton."

Referring to the proprietors' records, we find that at a meeting held in Boston, March 5, 1717-18, the following votes were passed :

Voted the same day that the four years charges for carrying on the worship of God, and building a meeting-house should begin from this day above mentioned.

Voted the same day that there shall be twenty pounds raised by the Proprietors and settlers towards the carrying on of the worship of God amongst them, which money is to be paid into the Clerk's hands to be improved for that use.

Voted the same day that Jonathan Draper, Nathaniel Brigham, John Haye, and Nathaniel Brewer are a committee to agree with workmen to build and furnish a meeting-house ; and the Proprietors obliged themselves and heirs to bear their equal proportion of said charges.

The record in reference to the action of the town in response to the proposal of the proprietors' committee is as follows :

The committee of the proprietors who was chosen to manage the affairs relating to the settlement of the worship of God in this Town, having made application to the Town at this meeting, that a committee may be appointed by this Town to joyn with them to move forward and carry on proper managements and agreements for said service—

Voted unanimously that the Town do now choose five persons to be a committee to joyn with the Proprietor's committee aforesaid, who shall from time to time represent the Town in order to building and furnishing a Meeting-house in said Town, and it is Resolved, that William King, Samuel Stearns, Benjamin Marsh, John Stockwell and Freegrace Marble or the Major part of them, be a committee for said service.

At a town-meeting held March 17, 1719, it was voted,

That there should be a rate levied on the settlers of the four thousand acres, according to every man's right, of one hundred pounds to defray the charges of building the Meeting-house.

Voted the same day that William King, Samuel Stearns and John Stockwell shall be a committee to get a minister, by the second Sabbath in May, and so on for three months.

Another town-meeting was held December 25th, at which it was voted that Mr. Macinstree should have fifteen pounds for three months' preaching.

The meeting-house was built during this year. Its location was on the west side of the Common, and near by that of the Central School-house. It fronted toward the east, was about forty feet by thirty-six, had folding-doors in front and single ones at each end. It was lighted by two small windows of diamond glass set in leaden sashes, at each side and end for the lower floor, and one window of the same fashion and size in each side and end for the gallery.

The pulpit was on the west side of the house opposite the front door, which opened into the broad aisle. The seats first used seem to have been nothing more than ordinary benches with backs. The gallery extended across the front side and each end, and had two rows of seats through its whole extent. Behind these seats there was a narrow platform which the children who could find no other place occupied. "A very convenient place," Deacon Leland quaintly remarks, "for idlers; not much chance, however, to escape detection, as the tything-man, in his official capacity, was ready to notice every delinquent."

From this point we leave the "Annals of Sutton," and shall give the further history under its appropriate "Topic," illustrating the character of the town by its public acts in support of churches, schools and

libraries; by its enterprise and thrift on the farm and in the manufactory; by its prompt patriotism and self-sacrifice in both the earlier and the later war; by the personal history and public renown of many who have gone out from the town and others more potent in their influence on its history who have remained to mould its character; only giving the following data as essential to its history and not included therein :

March 13, 1823, "voted to petition the General Court, at the next sessions, for the Inhabitation of Hassanamisco that dwell on the southwestward side of the Blackstone River to be laid to this Town."

The northeastern part of the town, embracing the Indian reservation of Hassanamisco and a small portion of territory in addition, was incorporated as the town of Grafton in 1785.

April 10, 1778, the town of "Ward," comprised of parts of Sutton, Worcester, Leicester, and Oxford, was incorporated. The name was afterward changed to "Auburn."

June 11, 1813, the North Parish of the town was set off as a separate town by the name of "Millbury."

November 3, 1828, the church erected 1751 was burned.

November 24th measures were taken for erecting a new house, and the Building Committee was as follows: Amos Armsby, Jonas L. Sibley, Daniel Tenney, Elisha Hale and Nathaniel Woodbury. June 15, 1829, the corner-stone was laid, and the new church was dedicated February 24, 1830.

## CHAPTER CXXVI.

### SUTTON—(Continued.)

#### CHURCH HISTORY.

THE religious history of this town is coeval with its civil. When the Governor, Council and Assembly of the province confirmed the purchase and made a grant of the land to the proprietors in 1704, it was upon the condition "that they settle a town of thirty families and a minister upon said lands within seven years after the end of the present war with the Indians."

At the first town-meeting, held at a private dwelling, December 2, 1718, a prominent object of the meeting was to provide for the establishment of the Gospel ministry. Measures were taken in March following to erect a house of worship, which was completed in the course of the year.

In the fall of the year 1720, a number of the christian inhabitants of the township of Sutton, embodied into a church state, under the direction of Rev. Mr. Swift, of Framingham, and the Rev. Mr. Breck, of Marlboro; at which time (after the Publick services of a Day of Fasting and prayer, in which the Reverend ministers mentioned assisted), the following per-

sons, whose names are as followeth, signed a solemn covenant to walk together in church relation :

Timothy Manning.	John Whipple.
Samuel Stearns.	John Stockwell.
John Page.	Ebenezer Stearns.
Elisha Johnson.	William Larned.
Samuel Sibley.	Samuel Parker.

The persons entering into covenant.

At the same time Timothy Manning was chosen Monitor.

The above is the only record of the organization of the First Congregational Church in this town, and it is found in the handwriting of the Rev. David Hall, the second pastor. The records of the church for the first eight years of its existence are lost, having been carried away by the first pastor.

The church was organized upon the Congregational platform of the simplest and most rigid character, and has ever maintained the principles of such organization. Tradition says it was owing to a difference upon the matter of church government with the first pastor that led to his dismissal. Subsequently an effort was made to introduce the eldership into the church, according to the Cambridge platform, but the proposition was unanimously rejected.

On the 9th day of November, 1720, the Rev. John McKinstry was ordained pastor over them as a Congregational Church, they calling him thereto, and calling in the help of sister churches.

The ministry of Mr. McKinstry continued about eight years, when, from difficulties arising as stated above, he was dismissed, and was subsequently settled in Ellington, Connecticut, where he died.

Mr. McKinstry was dismissed September 2, 1728, and on the 30th day of the same month the church solemnly renewed their covenant and subscribed their names to the same. The following is a record of the transaction :

Sept. 30th, 1728. The Brethren of the Church here renewed their solemn covenant with God and one with another and subscribed thereto as following :

1. We, whose names are hereunto subscribed, Promise this day to renew our Solemn Covenant engagements to serve the Lord God Almighty with his grace assisting us ; apprehending ourselves called of God into the church state of the gospel, do first of all confess ourselves to be unworthy to be so highly favored of the Lord, and admire that free and rich grace of his which triumphed over so great unworthiness, and with a Humble reliance on the aids of his grace therein promised for them, that, in a sense of their inability to do any good thing, do humbly wait on him for all—we now thankfully lay hold on his covenant and would choose the things that please him.

2ndly. We declare our serious belief of the christian Religion as contained in the sacred Scriptures, and with such a view thereof as the confession of faith in our churches has exhibited. Heartily resolving to conform our lives unto the Rules of that Holy Religion as long as we live in the world.

3rdly. We give up ourselves unto the Lord Jehovah, who is the Father the Son, and the Holy Spirit, and avouch him this Day to be our God, our Father, our Saviour, and our Leader, and receive him as our Portion forever.

4thly. We give up ourselves unto the Blessed Jesus, who is the Lord Jehovah, and adhere to him as the Head of his People in the Covenant of Grace, and rely upon him as our Priest, and our Prophet, and our King to bring us unto Eternal Blessedness.

5thly. We acknowledge our Everlasting and Indispensible obligations to glorify our God in all the Duties of a Godly, and a Sober, and a Righteous life ; and very particularly in the duties of a church State and a body of People associated for an obedience to Him in all the ordinances of the

Gospel ; and we hereupon depend upon his gracious assistance for our faithful discharge of the duties thus incumbent on us.

6thly. We desire and intend, and (with Dependence on his promised and powerful grace) we engage to walk together as a Church of the Lord Jesus Christ in the faith and order of the Gospel, as far as we shall have the same revealed unto us—conscientiously attending the Publick worship of God, the Sacraments of his New Testament, the Discipline of his Kingdom, and all His Holy institutions in Communion with one another, and watchfully avoiding sinful stumbling-blocks and contention as becomes a people whom the Lord has bound up together in the bundle of Life—at the same time we do also present our offspring with us unto the Lord, proposing with his Help to do our parts in the methods of a Religious Education that they may be the Lord's. And all this we do, flying to the blood of the Everlasting Covenant, and praying that the glorious Lord, who is the Great Shepherd, would prepare and strengthen us for every good work to do his will, working in us that which is well pleasing in his sight, to whom be glory for ever and ever. Amen."

The men subscribing were by name as followeth :

Sutton, September 30th, 1728.

Percival Hall.	Nathaniel Dike.	John Singletary.
Samuel Rich.	Elisha Johnson.	John Whipple.
Elisha Putnam.	John Sibley.	Obadiah Walker.
Ebenezer Stearns.	Simon Dakin.	John Stockwell.
Samuel Bigsby.	Israel Putnam.	Ebenezer Stockwell.
Gershom Wait.	Solomon Holman.	James Leland.
Samuel Dudley.	John Page.	

After this transaction, which took place the same month, Mr. McKinstry was dismissed ; we have the following interesting record, showing with what zeal the infant church, after a severe trial, put itself in readiness for the work of maintaining the covenant which they had so solemnly renewed :

At a meeting October 4th it was "agreed upon and voted to observe the 23d of the Instant October as a day of Humiliation—and the Rev. Mr. Parkman and the Rev. Mr. Troop to preach on said day if the Town acquiesce therein," and then the meeting was dissolved.

Early in November following Mr. David Hall was invited to preach to the people in this town. He supplied the pulpit several months, to the great acceptance of the people, and in March, 1729, received a unanimous call to settle with them in the ministry and become their pastor, the church and town concurring in the call.

This invitation was laid before Mr. Hall, and on July 24, 1729, his acceptance of the same was laid before the church, at a meeting called to consider the same.

The following is Mr. Hall's answer to the invitation :

To the Chh. & Christian Inhabitants of the Town of Sutton. The Invitation which you gave me to settle with you in the work of ye ministry, March ye 26th, has been with me as a matter of serious advice and Religious Consideration and I have also thought upon the Incouragement which you conjoined therewith and would manifest a sense of gratitude to you for your Respect and good will discovered in both. The value of a hundred pounds which you offer me in work and materials for my Incouragment in settling with you, I Return you my hearty Thanks and shall be willing to manifest a cordial acceptance of it provided I am ordained among you. As for the hundred acres of Land you Proposed to Lay out to the ministry and as such promised to give me a Lease or deed of it to be ye Sole Propriety of me and my heirs after me : I would with respect Thereto take notice of your good will therein manifest towards me, but must be excused from accepting of it under such a proposal. But if I may have a clear and secure Title to it from ye Proprietors of ye undevided lands in Sutton and not as included in ye four hundred acres of ministerial Land (as there is a fair Prospect that I may)

it not being as yet laid out to the ministry, upon this proviso I will thankfully accept it, and the Same shall discharge you from your obligations in Reference thereto. Lastly as to the Sallery you have offered me I observe with a suitable Resentment yt you have made provision yt it shall be honourable & as you have made a honourable Pursuance thereof for the present Considering your abilities and my present necessities in voting a hundred pounds sallery in money, equivalent to silver at sixteen shillings an ounce, which is the standing value of money, wherein you have agreed that I shall receive my yearly sallery according to which standard I do accept of an Hundred pounds a year at present, and doubt not and expect that as my necessities shall require, you will continue to make Good your obligation as God shall bless you, that my necessities and charges if they should increase may nevertheless be honourably supplied, and with these provisos, I do now accept of your call, which, if you will please to receive and record in confirmation of and compliance with what amendments I have made, and prove yourselves a willing and Honourable People unto me, I shall account that necessity is laid upon me as at this day, and, according to help from Christ, will endeavour to labor with and for you in the gospel.

DAVID HALL.

July 15th, 1729.

After this answer was read to the church, "it was put to vote to see whether the church would accept of the said answer, provided Mr. David Hall would be ordained according to the church platform, *i.e.*, in the Congregational way; and the vote passed in the affirmative."

A committee was then appointed to wait upon Mr. David Hall to see whether he would take office according to the fore-mentioned vote.

The following is the answer of the candidate:

In compliance with the Terms of the church with respect to Governing the same I shall as far as I am concerned therein endeavour to conform to the platform drawn up by the Synod of our churches of New England in every article so far as it may be thought in reason to be consistent with the interest and peace of the church provided it be agreeable to the great rule of the gospel.

DAVID HALL.

This was acceptable to the church, which then proceeded to take measures for Mr. Hall's ordination.

This extreme jealousy for their liberty and rights as a Congregational Church arose in part, if not wholly, from the controversy with Rev. Mr. McKinstry, their first minister. The answer of the candidate exhibits a degree of caution, even while assenting really to the proposition of the church, worthy of all praise. He would consult their interest, while maintaining the integrity of the Gospel in all matters of church government and discipline.

October 15th, 1729. The Rev. Mr. David Hall was ordained to the Pastoral office in Sutton. The Rev. Mr. Troop, of Woodstock, began with prayer. The Rev. Mr. Williams preached the sermon from 1st Thess. 5: 12-13. The Rev. Mr. Swift, of Framingham, gave the solemn charge. The Rev. Mr. Campbell, of Oxford, gave the Right-hand of fellowship.

The young pastor thus ordained to the work of the ministry in this town commenced his labors with considerable zeal, and prosecuted them faithfully for a period of nearly sixty years.

The records of the church during his administration furnish little more than a few hints concerning its history except as to its discipline, which seems to have been faithfully and kindly administered, contributing largely to its almost uniform prosperity. At times the pastor and people passed through great trials, and at others great peace and prosperity

attended the preaching of the Word and administration of the ordinances. One fruitful source of trouble was the admission of persons to the ordinance of baptism, but not to full communion in the church. This is called in the records of the church the covenant of baptism, but is known in history as the "half-way covenant."

There is no record of any form of covenant used in the admission of such members.

The list of the names of those who were thus admitted is preceded by the following introduction:

The following have owned the covenant of Baptism, and some of them were baptized.

The first entry is made May 10, 1730, when "Joseph, John, James and Elizabeth, children of Joseph Sibley, owned the covenant and were baptized." It would seem from this and other entries that some took this step for themselves, while others owned the covenant and had their children baptized. The last entry is made October 28, 1781, when Nathaniel Cheney and Mary Cheney, his wife, owned the covenant and had their children baptized.

Out of this unscriptural measure grew up many things to trouble the church. It led, in large part, to the separation of a portion of the members, both from the public worship and ordinances of the church. With these separating brethren and sisters the pastor and church had long labor and severe trials, in all which they seem to have been actuated by the gentleness and forbearance of Christ.

All those who occasioned the trouble finally returned to the church and were restored to its fellowship. Another subject that at times was a source of trouble was sacred music. At first, and probably for a long time, the singing was congregational, led by one who was called the precentor or chorister. The hymn or psalm was *lined* by one appointed for that purpose. The tunes were few and simple, and were not sung by rule, as it was called, for this gave great offence to some. It seemed to them less devotional if there were any rule or order about it. The objection to singing by rule seems to have led to the resignation of the choristers at a certain time.

Under date of April 8, 1779, is the following record:

The church was stayed on account of some uneasiness about singing by rule, but the church adjourned the matter to April 19th.

April 19th. The Church and Pastor being notified assembled upon that occasion—a letter was read from the Choristers before deputed—John Woodbury and John Hall giving up that service. After some discourse the church voted:

- 1st. To encourage singing by rule.
  - 2nd. That some of the old tunes be studied and learnt, as 100 Old and New, and Canterbury.
  - 3dly. That Amherst and the six line metre be sung.
  - 4thly. They desire new tunes be not multiplied, though they mean not wholly to exclude them.
  - 5thly. Chose John Woodbury and John Hall to be Choristers.
- In all these votes the People of the Parish voted concurrence and no vote in opposition when put to the Parish.

Subsequently, in November following, in consequence of the refusal of the above-named to act as

choristers, the church and parish in meeting assembled requested by vote David Town and John Harback "to be helpful in that service, and that they don't set the tune called the 34th Psalm tune which so many have been offended at."

But the trouble was not yet at an end, for in May following, 1780, at a church meeting, "after a long discourse on the affair of singing, voted to choose a committee of three brethren to consider what tunes were proper to be sung and confine the Choristers not to exceed, and see if they could get one to set the tune, and the church by vote chose Deacon Putnam, Bartholomew Town and Caleb Chase, and afterwards Nehemiah Putnam, to act in the affair and make report to the church at their next meeting—and then the church meeting was adjourned to the first Monday in June next at 4 o'clock, by vote of the church. June 5th, 1780. The church met on adjournment and after long reasoning the church voted the following tunes be sung in our Publick assembly—Buckland tune, Bangor, Barley, Canterbury, Funeral Thought, London New, Little Marlborough, New York, Plymouth, Portsmouth, 50th Psalm, Rentham, 100th Psalm Tune old, Quincy, Amherst, St. Martyns. Standish, Southwell, Windsor, Brookfield, Colchester new, 113th or Proper Tune, Trinity, Aurora. No objection being made against them."

This measure of the church did not, however, satisfy all the members, for in January, 1781, after two meetings of the church called to treat with two of the brethren who had absented themselves from public worship and ordinances, it is recorded that the "matter of great uneasiness expressed by both was respecting the singing of new tunes at which they were offended." It is also stated that this expression of their uneasiness was accompanied by some "unbecoming reflections."

At what time the change was made from congregational singing to singing solely by a choir no mention is made, but it must have been about this time, and this increased the trouble. Tradition states that on the Sabbath when this took place, Dea. Tarrant Putnam, whose office it was to line the hymn, began as usual to discharge his duty, but after reading the first two lines, the singers took the matter into their own hands, and proceeded without pausing for the remainder; the good deacon, however, kept on, and lined the hymn as usual, both reader and singers reaching the end of the hymn about the same time, though not in exact harmony. The congregation were in great commotion, and the pastor rising to explain that he had no hand in the matter, was saluted by one of the offended brethren with the declaration: "David Hall, you lie!" then turning to his wife, seizing her hand, he said, "Sally, it is time to go." They left the house of worship and never entered it again. This trial in relation to sacred music, involved both church and parish.

The ministry of Dr. Hall was long continued and

unusually blessed among the people. At his settlement the church consisted of forty-nine members—twenty males and twenty-nine females.

Religion was in a low and languishing condition, and wicked men abounded. There were about eighty families in the town and not far from four hundred inhabitants. The profaneness and other vicious practices of the people seemed to have greatly distressed the pastor, both before and after his ordination. He says in his half-century sermon: "I can never forget my vehement struggles at the throne of grace just before I was here ordained a pastor, lest I should fail of success among this people." Immediately after his settlement religion was greatly revived. In a communication published in "Prince's Christian History," giving an account of the work of God among his people in 1741-42, he says: "There was, soon after my settling here by the favor of God, some considerable abatement of that too common profaneness and other vicious practices visible among us, and within the space of two years we had a very large addition to the church, more than doubling the number of communicants." In five years' time eighty-one persons were added to the church, the most of them on profession of faith.

In the years 1741-42 there was enjoyed a season of great religious prosperity. The labors of the pastor were abundant and successful. It was a season of great religious excitement throughout New England. This powerful and wonderful work of God in this town continued for some months, with various degrees of power. It seemed to be free in a great measure from those excesses that were witnessed in some other places. Dr. Hall set himself resolutely against these, and discountenanced all extravagances; though some over-zealous brethren (as he calls them) gave him considerable trouble.

By this religious interest the whole face of the community was changed. The additions to the church during this period were ninety-eight by profession and forty by letter.

During the first fifteen years of Dr. Hall's ministry, two hundred and sixty-one persons were added to the church—one hundred and eighty-one by profession and eighty by letter. These additions, considering the small number of inhabitants, show that the people had been greatly prospered in spiritual things. There were at times, during the ministry of this faithful pastor, seasons of revived religious interest, and others of great trial from laxness and indifference. Dr. Hall continued to labor and feed the flock over which the Holy Ghost had made him overseer, until the time of his departure drew near. He closed his labors in the pulpit but a short time before he was called to a higher and purer service in the sanctuary above. He died May 8, 1789, aged eighty-four years, having preached the Gospel to this town more than sixty years. He came to his grave "in a full age like as a shock of corn cometh in his season."

The successor of Dr. Hall in the ministry of the first church in Sutton was Rev. Edmund Mills, who was a native of Kent, Conn. He preached his first sermon on Sabbath, October 25, 1789, about six months from the date of Dr. Hall's decease. "The next spring he received an invitation from the church and people to settle with them in the evangelical ministry, which invitation he accepted and was ordained pastor of the First Congregational church and congregation in Sutton on the 22d day of June 1790," a little more than a year after the decease of Dr. Hall. In May, 1790, immediately preceding the ordination of Mr. Mills, the following important articles or by-laws were adopted:

1st. We are fully of the opinion that the Sacrament of the Lord's Supper is designed particularly for the real friends of Christ or those savingly converted, and that of consequence we ought to proceed in admitting members on the ground that they are such.

2. For the satisfaction of the church in regard to the qualifications of persons to be admitted, we think it most wise for the church and person or persons to be admitted, to meet in some convenient place for mutual conference.

3. We are fully of the opinion that the half-way practice, as it is called, is not supported by scripture and ought not to be favored.

4. That a strict regard to discipline is an indispensable duty and necessary for the happiness and prosperity of the church, and that the outlines of it are contained in the eighteenth chapter of Matthew.

In "April, 1811, the church being regularly convened, proceeded to the consideration and adoption of the following confession of faith, unanimously:"

1. We believe there is one God subsisting in three persons, whose appellations in Scripture are Father, Son and Holy Ghost, who are the same in essence and equal in every divine perfection.

2. We believe the Scriptures of the Old and New Testaments were written by men divinely inspired, and contain all the truths necessary to be known in order to salvation.

3. We believe that God hath a perfect knowledge of all his works, of the final issue of every event and of the endless condition of every intelligent creature, consequently a concerted plan relative to creation, providence and redemption from eternity.

4. We believe that God created man in his own image, holy or upright, and constituted him in regard to the moral state of his posterity their public head and representative.

5. We believe that, consequent upon man's fall and apostacy from God, human creatures come into existence with hearts deceitful above all things and in a state of entire moral depravity.

6. We believe that for the purpose of carrying forward the great work of man's redemption, the Lord Jesus Christ hath suffered and died in their room and stead, and in this way wrought out a complete atonement, tasted death for every man, magnified the divine law and became its end to every one who believeth in him.

7. We believe that divine and saving grace correspondent to the immutable and eternal design of God, and in a sovereign way and manner, will be so far displayed in the recovery and salvation of the hell deserving, and particularly in the millennial state of the world, as shall be on the whole most promotive of his glory and the happiness of the intelligent universe.

8. We believe that in order for the impenitent to become the subjects of right affections of heart, and interested by faith in the atonement of Christ, they must be renewed in the temper of their minds by the irresistible and gracious influences of the Holy Spirit.

9. We believe that a dutiful celebration of the Lord's supper requires a sincere and cordial friendship to Christ, and that a profession of this friendship ought to be required of all those who are received to communion.

10. We believe that sprinkling is the proper mode, and infants and children of believing parents proper subjects of Christian baptism.

11. We believe that God hath mercifully engaged to keep all who are

renewed by the Divine Spirit from final apostacy, and enable them to persevere in holiness until they shall be made perfect in glory.

12. We believe that God hath appointed a day in the which he will judge the world in righteousness by Jesus Christ, when he will admit the godly to everlasting happiness and doom the wicked to everlasting sorrow.

Though there was some increase of religious interest in the year 1800, and a few were added to the church, yet the number of members in the church was reduced by death and dismission nearly one-half in twenty years. In 1810 there were but fifty-five members. During this year and the following religion was greatly revived, and the interest prevailed generally through the town. A universal seriousness pervaded the face of society. All minds were more or less affected by religious truth. Sixty-seven were added to the church as fruits of this revival, the majority of whom were heads of families. The number of members in the church was increased from fifty-five to one hundred and twenty-five. Again, in 1820, there was another season of special religious interest that greatly strengthened the church. Between forty and fifty were added to its membership.

The venerable pastor continued to preach with his usual ability and acceptance till seized with disease a short time before his death. A few weeks before the close of his earthly pilgrimage he preached his last sermon with unusual animation and solemnity. He calmly anticipated his approaching dissolution, and cheerfully committed his spirit into the hands of his Redeemer November 7, 1825, aged seventy-three years, having sustained the pastoral office thirty-five years and five months. Dr. Hall and Mr. Mills served this people in the ministry ninety-six years.

Mr. Mills was an uncommon man. His erect and commanding person, the dignity and urbanity of his manner, and his great sensibility and kindness of heart fitted him in an admirable degree to gain the respect and good will of all who knew him. These traits of character, as much as his original and interesting manner of unfolding and presenting truth, deeply seated him in the affections of his people. He was a man universally respected and admired.

The successor of Mr. Mills was the Rev. John Maltby. He was born in Northford, Conn., graduated at Yale College in 1822, received his theological education at Andover, and was ordained June 28, 1826—a little more than seven months from the decease of Mr. Mills.

The year 1828 was characterized by a serious calamity to the church and society—their house of worship, erected in 1751, and endeared to them by many precious associations, was consumed by fire in November. Measures were immediately adopted for the erection of another; and in fourteen months the beautiful and commodious house of worship that now adorns the centre of the town was completed and dedicated to the worship of the one only living and true God, the Father, the Son and the Holy Ghost.

Soon after this there seemed an evident increase of piety in the church; and the way was evidently preparing for the rich shower of divine grace which watered this part of the Lord's vineyard not long after.

In 1830 there was a season of considerable interest, which continued for a short time, and about twenty were added to the church on profession of faith. The summer following, Christians were more than usually awake, and many began to feel that the set time to favor Zion had indeed come.

There were added to the church as fruits of the revival more than one hundred individuals, increasing the church to two hundred and thirty-one members; of the number added, thirty-six were heads of families—twenty of these were husbands and wives jointly. The voice of prayer was henceforth heard in many habitations where before God had not been called upon.

The church continued to enjoy an unusual degree of prosperity during the remainder of Rev. Mr. Maltby's ministry. Mr. Maltby closed his short but successful ministry with the church in June, 1834, for the purpose of taking the oversight of the Hammond Street Church, in Bangor, Me., where he was permitted to reap the fruits of his labor. His dismissal was caused by no dissatisfaction on the part of the people, or their pastor; but by the prospect of greater usefulness in the field to which he was invited. Mr. Maltby continued in the ministry in Sutton eight years.

The next pastor was Rev. Hiram A. Tracy, a native of Lisbon, Conn., who obtained his classical education at Plainfield Academy, while engaged as a teacher in the same. His theological education was obtained at Andover. He was invited to supply the pulpit while yet a student at Andover, and came directly from the seminary to Sutton, preaching here for the first time on the second Sabbath in September, 1834. In October following, he received a call to become the pastor of the church. Having accepted this invitation, he was ordained pastor January 1, 1835,—a little more than five months from the dismissal of his predecessor.

During the first five years of Mr. Tracy's ministry only eighteen persons united with the church on profession of faith. In the autumn of 1839 this church, in view of the low state of piety in the community, was impressed with the importance of earnestly seeking the Lord by repentance and prayer. As fruits of the revival which followed, forty-eight individuals were added to the church, increasing its membership to two hundred and sixty-one, the largest number that has been connected with it at any one time.

The church continued to enjoy prosperity and peace during the remaining ten years of Mr. Tracy's ministry. There were occasional additions to the church during this period, but no seasons of general interest like that in 1840.

In August, 1842, the church, upon the recommendation of a committee, voted unanimously to dispense with the use of alcoholic wine in the administration of the ordinance of the Lord's Supper. This vote has been adhered to from that time to this.

November 24, 1850, Mr. Tracy resigned the pastoral office to accept the appointment of district secretary of the American Board of Commissioners for Foreign Missions in the district of Cincinnati, which embraced Southern Ohio, Indiana and Southern and Central Illinois. A council convened December 11, 1850, dissolved the relation which had continued with great harmony for sixteen years. The number of members in the church at the close of his ministry was two hundred and five.

After several attempts to unite in calling a pastor, the church and society agreed upon Rev. George Lyman, of Easthampton, and to him an invitation was extended to become their pastor and teacher. This invitation was given to Mr. Lyman September 26, 1851, and accepted October 18, 1851. He was ordained November 12th following, Rev. R. S. Stone, of Easthampton, preaching the sermon; Rev. J. H. Bisbee, of Worthington, giving the charge, and Rev. L. F. Clark, of Whitinsville, the right-hand of fellowship. The number of members in the church at the ordination of Mr. Lyman was one hundred and ninety-three.

There were occasional conversions and additions to the church. In October, 1858, nine persons were admitted to membership, indicating a previous state of revived religious feeling in the church and congregation. Again, in 1863, the church was enlarged by the addition in May of nineteen on profession of faith, and in November following thirteen were added.

The ministry of Rev. Mr. Lyman was characterized by continuous interest and frequent conversions and additions to the church of those who were its strength, so that this ministry was a fruitful one, and the church was strengthened. The average of conversions was greater than any preceding pastorate, excepting the ministry of Rev. John Maltby.

Mr. Lyman resigned June 30, 1867, to take effect the 12th of November following, the anniversary of his ordination and settlement as pastor of the church.

A council was called which met October 15th, and sanctioned the action of pastor and church, and Mr. Lyman retired from his labors here November 12, 1867.

After considerable delay and several attempts to unite upon a pastor, the church and society gave a call to the Rev. F. E. Fellows, who had been previously pastor of the Congregational Church in Bridgeton, Maine. This invitation was accepted July 4, 1869, and Mr. Fellows was installed by council October 26th following. Mr. Fellows' ministry was a short one. He labored among this people a little more than eighteen months, but during this period there was a season of religious interest, bringing into the church,

upon profession of their faith, forty-three persons; nevertheless his ministry was not wholly happy in its results.

In December, 1870, Mr. Fellows resigned, and closed his labors as pastor of the church on the second Sabbath of January, 1871. The following Sabbath the pulpit was supplied by Rev. Mr. Tracy, who had returned from Ohio on account of the health of his family.

On Monday, at the annual meeting of the society, he was invited to be the acting pastor for one year, which invitation he accepted, thus renewing his labors in the field of his first settlement, after a lapse of twenty years. From this time on, during a period of four years and nine months, the church, under the labors of Mr. Tracy, performed for the greater part of the time through severe infirmities, enjoyed an unusual degree of prosperity.

Early in September, 1875, Mr. Tracy gave notice that he must close his labors after the second Sabbath in October. In the mean time, upon his recommendation, Rev. William A. Benedict, of Plainfield, Conn., was engaged to supply the pulpit for six months, and commenced his labors on Sabbath, October 16th, following Mr. Tracy's retirement. There was almost immediately a revived state of religious feeling, and during the winter many souls were converted. In January Mr. Benedict received an invitation from the church and society to become their pastor, which invitation he accepted, and was installed by council February 16, 1876.

Rev. Mr. Benedict closed his pastorate, and Rev. Philander Thurston was invited to supply as pastor and teacher, and is at the present time acceptably laboring in this ancient church, whose history we have followed from the date of the earliest settlement of the town of Sutton.

**FIRST BAPTIST CHURCH (West Sutton).**—The first Baptist Church in this town was organized September 16, 1735. It was the fourth oldest church of the denomination in Massachusetts. Backus, the Baptist historian, says, in regard to the founding of this first Baptist Church at Sutton, that a Mr. James Bound, a sensible Baptist, who had immigrated from England and located in Salem Village, and had, with others, become imbued with Baptist principles, removed and began a Baptist Society in Sutton.

In 1737 Benjamin Marsh and Thomas Green were ordained its joint pastors the same year. Thomas Green became pastor of a Baptist Church in Leicester. Elder Marsh was the pastor till his death. He died in 1775, and the church was disbanded because "rent with dissensions." In 1785 another church was organized, which continues its existence to the present day.

The several pastors have been: Ebenezer Samson, 1788-94; William Batcheller, 1794-99; Samuel Waters, 1799-1825. Next Rev. Moses Harrington, three years; Rev. John Walker, six years; Rev.

Charles H. Peabody, three years; Rev. Otis Converse, two years; Rev. Samuel Richards, one year; Rev. George Deland, three years; Rev. Job Boomer, three years; Rev. G. W. Benton, one year; Rev. J. Thayer, two years; Rev. S. O. Lovell, four years. From 1856 to 1863 the church was, for most of the time, without a pastor. 1863, Rev. C. S. Baker, one year; 1864, Rev. J. Barber, one year; 1865, Rev. G. Stone, one year; 1869, Rev. A. E. Batelle, one year; 1870-71, church supplied, two years; 1873, Rev. C. F. Myers, three years; 1876, Rev. E. J. Stevens, one and one-half years; 1877, Rev. Joel P. Chapin, three years; 1880, Rev. Charles Newhall, four years; 1885, Rev. Albert Green, three years. Rev. Benj. Tuck, the present pastor, began his labors Sept. 2, 1888.

It is satisfactory to know that since 1735 the town of Sutton has had a Baptist Church, the oldest and for two years the only one in all this part of the State, and that its days are yet full of life, and vigor, and good works.

**SECOND BAPTIST CHURCH (South Sutton).**—The Second Baptist Church was organized Oct. 9, 1792. In 1804 the society began the building of a meeting-house, which was finished and dedicated July 2, 1805. In 1809 Rev. Nathan Leonard became pastor for one year. From that time Elder Wm. Batcheller was its pastor until Nov., 1816. Following was the ministry of Rev. Job C. Boomer, from 1819 to 1841. The church was repaired and rededicated Oct. 9, 1845. The pastors of the church have been as follows: Elder William Batcheller, 1792; Brother Nathan Leonard, 1809, ordained; Elder William Batcheller, 1810; Brother Job B. Boomer, 1819, ordained; Brother Austin Robbins, 1841; Elder U. Underwood, 1842; Elder Nelson B. Jones, 1845; Brother Joseph Thayer, Oct., 1847, ordained; Brother J. B. Boomer, 1849; Brother R. G. Lamb, 1852; Brother Charles A. Snow, 1853; Rev. Abial Fisher, D.D., 1855; Brother Justus Aldrich, 1858; Rev. J. B. Boomer, 1859; Rev. Joseph P. Burbank, 1862; Rev. N. J. Pinkham, 1869; Rev. J. P. Burbank, 1870; Rev. Philip Berry, 1873; Rev. J. P. Burbank, 1875, to the present time.

**THE FREE-WILL BAPTIST CHURCH.**—This church was organized November 1, 1834, under the labors of Rev. Willard Fuller, with a membership of eleven—five brethren and six sisters.

The meeting-house was largely built, and the expenses of the church were for the most part borne by, the pastor.

Services continued to be held until 1858 or 1859, and perhaps occasionally later than that date.

The church had but one minister, Rev. Mr. Fuller. It was his request that after his death the meeting-house should be sold, and the proceeds given to the Free-Will Baptist Home Missionary Society, which was done. He died December 8, 1875.

It is fitting in this connection to say of him, that in the public and private relations of life, he eminently illustrated the graces of the Christian.

**UNIVERSALIST SOCIETY.**—This society was formed during the summer of 1840. In March, 1841, Rev. Alvin Abbott was engaged to preach one-half the time and the meetings were held in the hall at West Sutton. Mr. Abbott continued to preach for two years. After he left the society weakened and the last meeting of which there is any record is April 5, 1847.

**BAPTIST CHURCH IN MANCHAUG.**—This church was organized May 18, 1842, with thirty members, and was named "The Manchaug Baptist Church." A few of the original members still survive and bear an honorable record.

Its house of worship is situated in the manufacturing village of the same name, and as most of its resident membership and of the congregation are employes and operatives in the mills, the Manchaug company have ever borne a noble and principal part in supporting the pastors. The following is a list of pastors, with their terms of service, as nearly as can be readily attained by the records: Rev. W. H. Dalrymple, one year and two months; Rev. N. B. Jones, one year and four months; Rev. George Daland, one year and six months; Rev. Abial Fisher, four years; Rev. N. Chapman, two years; Rev. J. S. Harradon, six years and nine months; Rev. N. J. Pinkham, one year and seven months; Rev. Addison Browne, seven months; Rev. D. A. Dearborn, four years; Rev. C. L. Thompson, four years and five months.

Rev. J. C. Boomer is the present incumbent, a worthy man and a good pastor; holding the love and respect of the church, the parish and the community.

**THE THIRD BAPTIST CHURCH.**—This church seems to have had its origin in an association of a few persons who had been connected with the Baptist Church in Thompson, Connecticut. Difficulties arose in this church, which led, in 1797, to a separation, the one part adhering to the elder John Martin, and the other to Deacon Parsons Crosby, who was ordained their elder.

This church seems not to have entirely separated from difficulties, and, after a troublous life, the records are lost, and it is supposed that at about this time it ceased to exist.

**ST. JOHN'S CHURCH (Wilkinsonville).**—This society was incorporated March 10, 1827, under the name and title of St. John's Protestant Episcopal Church. The present house was built in the year 1828. The cornerstone was laid June 24, 1828.

The first rector was the Rev. Daniel Le Baron Goodwin, who commenced his services July 17, 1825, and closed in April, 1854; length of service, nearly twenty-nine years.

His successor was Rev. Benjamin H. Chase, whose service commenced in April, 1854, and closed in April, 1858. He was succeeded by the Rev. A. Decatur Spalter, whose term of service commenced in June, 1858, and closed in December, 1859. He was succeeded by the Rev. William George Hawkins, who commenced his services in April, 1860, and closed in

April, 1862. He was succeeded by Rev. George Sturges Paine, whose term of service commenced in September, 1862, and closed in September, 1863; who was succeeded by the Rev. Samuel S. Spear, whose term of service commenced in January, 1864, and closed in January, 1867; who was succeeded by the Rev. Thomas L. Randolph, whose term of service commenced in January, 1867, and closed in December, 1870. He was succeeded by the Rev. Henry A. Metcalf, who commenced his services in June, 1871, and closed in June, 1874. He was succeeded by the Rev. James S. Ellis, who commenced his services July 5, 1874, and remained in charge until 1882, when he resigned, and the Rev. John Gregson became his successor, and is the present rector. Mr. Gregson adds to his energy and zeal in church work an active interest in the advancement of every educational and moral interest, and his true, earnest work as chairman of the School Board is appreciated by all his townsmen.

**UNITED PRESBYTERIAN CHURCH (Wilkinsonville).**—The Associate Church, to which the Sutton United Presbyterian congregation first belonged, was originally a secession from the church or kirk of Scotland in the year 1733, and was known as the Seceders' Church. The original founders of the Sutton United Presbyterian congregation were families from the province of Ulster, Londonderry County, Ireland; and were from their earliest associations trained up in the Presbyterian faith, and when here, longed for the church of their choice, in which their children could be taught the Shorter Catechism, and otherwise instructed in the distinctive principles of that faith which they had carried with them from their homeland beyond the seas.

The first settled minister was the Rev. James Williamson, who was installed February, 1856, and continued in his pastorate nearly eight years. Mr. Williamson was a native of Ayrshire, Scotland, and was educated in the Glasgow College, and also studied theology under the celebrated Doctors McCrie and Paxton, of Edinburgh, in connection with the original Seceder Church.

The second pastor, the Rev. P. Y. Smith, was ordained and installed February 28, 1866. Mr. Smith was educated in the University of Glasgow, Scotland, and studied Hebrew and theology in the city of New York, and was licensed to preach the Gospel by the Second Presbytery of the United Presbyterian Church, New York City, September 15, 1863. He died July 21, 1885. Mr. Smith was a man of large views, a constant student and deeply interested in education.

Rev. William Calbraith was installed October 8, 1886, and is the present pastor of this church.

**METHODIST EPISCOPAL CHURCH.**—During the autumn and winter of 1852, Rev. Mr. Jones, of East Douglas, was invited by some resident members of Methodist churches residing in the centre of the town to hold occasional meetings in Washington Hall, and the

next spring they felt justified in petitioning the New England Conference, at its annual meeting in April, 1853, to send them a preacher. The petition was favorably entertained, and the Rev. John W. Lee stationed here. Washington Hall was procured, and he entered at once upon his labors, with a congregation not large, but constantly increasing.

In 1854 Mr. Lee was returned to this charge; the church prospered. A house was built, the cornerstone laid July 4, 1854, completed March, 1855, dedicated 22d day of same month. Mr. Lee's labors closed April 8th. He was followed by Rev. J. H. Taylor, for one year. In 1856 Rev. Rodney Gage was stationed for two years; 1858, by Rev. N. S. Spaulding; 1859, Rev. William A. Clapp; 1860, Rev. J. J. Woodbury; 1861, Rev. C. W. Mackreading, Jr.; 1862-63, by Rev. S. O. Brown, and in 1864 the church property was given into the hands of its creditors, and the church became extinct.

## CHAPTER CXXVII.

### SUTTON—(Continued.)

#### EDUCATIONAL.

THE first settlers of this State were the founders of the free-school system. They had received some inspiration from the schools of learning in Europe, established for the favored classes, and more from revelation. They did not believe that knowledge, power and wealth were intended for the few, but that the avenues to their attainment should be open to all.

It was because they saw no hope of securing to themselves and their posterity their God-given rights, that they crossed a stormy ocean, seeking a home as remote as possible from opposing influences made strong by long-continued growth and prejudice; and here in this western wilderness, amid the toils, anxieties and perils attending a new settlement so remote from sources whence supply of almost every want, aside from food, must come, they inaugurated a system of education for the masses, which, improved from time to time, gradually extended through the New England States and over a large portion of the country.

In 1642 a law was passed requiring that those chosen to manage "the prudentials of every town in the several precincts and quarters where they dwell, shall have a vigilant eye over their neighbors, to see, first that none of them shall suffer so much barbarism in any of their families as not to endeavor to teach by themselves or others, their children and apprentices so much learning as may enable them to read perfectly the English tongue, and a knowledge of the capital laws, upon penalty of twenty shillings for each neglect therein."

It was not, however, until 1647 that a law was enacted ordering the establishment in every town of fifty householders of a public school, in which the children should be taught to read and write, and, when the families shall have increased to an hundred, of a grammar school in which the young men might be fitted for the university.

In this town there is no mention of a school until 1725, and then only in connection with a proposed sale of the school land—two hundred acres—which had been given by the proprietors in accordance with the conditions of the grant of the General Court confirming the purchase of the township from the Indians.

The children may have had instruction in private schools, but no action seems to have been taken by the town in the matter of the establishment of a public school previously to 1730, when it was voted that a school should be kept for four months in four places, at the discretion of the selectmen, one month in a place.

In 1731 it was voted that there should be school-dames.

No record can be found of an appropriation for the support of a school until 1732. The name of John Smith appears upon the treasurer's book as the schoolmaster for this year. The school was kept at the house of Mr. John Gibbs, who was paid fifteen shillings for its use.

From this time onward the records of the town show that schools were provided and enlarged as the needs of the town demanded. In these schools only the rudiments were taught.

Each district employed its own teacher, and had the general supervision of its schools. The only official visits made the schools at this time were those of the minister of the parish for the purpose of catechising the children.

Persons might have been, and probably were, delegated to give instruction to any who might wish to pursue the studies which were then considered as belonging to a grammar-school. There were very few of this class of pupils before the time above mentioned. Joseph Hall, son of Rev. Dr. David, is the first and only one who seems to have been appointed grammar schoolmaster, and authorized to present his bills as such. His first bill was in 1794, for teaching grammar-school in 1793, £4 8s. 2d., and as his bill varied from year to year, it is evident that his salary depended upon the number of his scholars. About this time summer schools, for terms of four or six weeks, were established in most of the districts. The winter schools were kept from eight to ten weeks, and taught exclusively by male teachers.

A desire for advantages, the common schools and the grammar-schools, as taught by Mr. Hall, did not furnish, began to find expression in the establishment of private schools. Among the first of these were those taught in 1806 by Miss Mary T. Morse in the

South Parish, and Miss Caroline M. Warren in the North Parish.

Miss Morse's school was for young ladies only, in which instruction was given in "Reading, writing, orthography and English grammar; also plain sewing, marking, working muslin and embroidery; also drawing and painting in water-colors and filigree work." Miss Warren's school was open to youth of both sexes, and "instruction was given in reading, writing, orthography and English grammar, rhetoric, logic, and English composition; also arithmetic, geometry, geography, astronomy and the Latin language." Young ladies were likewise instructed in the ornamental branches.

It is quite impossible to give a history of the many private schools that were established in town after 1811, as no records were kept, and the "oldest inhabitants" can impart little information.

A few of these schools, however, are remembered, and worthy of particular mention. One of them, called "Sutton High School," was established by Rev. George A. Willard, in 1835, in the hall of the brick mansion built by Mr. James Freeland; the school was afterward removed to West Sutton and continued several years. Mr. Willard was a superior teacher, as several of his former pupils now resident in town can testify.

Looking at our schools from the standpoint of the present, we believe they are improving in the standard of attainments, while, except in the villages, they are sadly decreasing in numbers to such an extent that emulation to excel is not duly excited.

As it regards the improvements, we would mention the tasteful and commodious school-houses which have taken the place of the rude structures of olden time—the attractive furnishing of most of these houses, the introduction of maps, blackboards and apparatus affording facilities for the illustration of the various branches of study, text-books adapted to the wants of scholars of every grade, singing and drawing, the encouragement of a taste for the useful and beautiful, less severity in punishment, more governing by love, and an appeal to the reason of a child rather than his sense of physical pain.

The character and attainments of the teachers, prepared most of them in the normal schools, is a present study to the child, and an incentive to correct deportment, while calisthenics and physical training are taught, that the child may be sound in body as well as strong in mind.

**HIGH SCHOOL.**—In this brief historical sketch of the efforts of the friends of a more liberal education, and the action of the town which culminated in the establishment of our present popular high school, we shall confine these notes to such facts as have reference to the high school recognized by legislative acts, and maintained by the town in its municipal capacity. We regret the necessity for this omission, for these subscription schools, by introducing some

of the higher branches, induced a more correct appreciation of such branches, and created a demand for the high school.

The historians of our common-school system begin by referring to the legislative acts of the Massachusetts colonists in 1647, as the inception and foundation of that system. By this early legislation the support of schools was made compulsory, and the means of education became *common* and *free*. The same legislation laid the foundation for the high school, for it included an enactment requiring every town of one hundred families or householders to set up and maintain a "Grammar school," under a master competent to instruct youth in such branches as were required to fit them for the university.

Because the wish is often parent to the thought, the thought to action, and the action to beneficial results, we are pleased to find in the report of the School Committee for 1859, Foster Freeland, chairman, a strongly expressed wish that Sutton might have the advantage of grammar school instruction; and a recommendation that the excess of school money raised by the town, above a specified amount, then deemed sufficient for the common district schools, should be appropriated to the establishment and maintenance of two "grammar schools;" and this followed by a suggestion that the school acts should be so amended as to give the income of the State school fund to the several towns of the Commonwealth to aid in the maintenance of such schools.

In the warrant of the selectmen, Horace Leland, chairman, for the annual meeting of 1860, we find:

Art. 13. To see if the town will establish a *High School* or act or do any thing relative to the same.

This action was negatived by the town for the reasons set forth in the School Committee's report of the same year, as follows:

"Your committee concur in the opinion that whatever is appropriated for this noble cause" (a higher education) "considering the territorial structure of our town and the sparsely located *proper* recipients of High School privileges, the greatest good to *all the inhabitants of the town* will be attained by the *division of the fund in the districts.*"

However, something had been gained, in that the attention of the town had been called to its necessity, to the violation of the State law, and to the strength of its friends.

In 1866 the following articles were inserted in the warrant for the annual meeting:

1st. To see if the town will maintain a high school, or act or do anything relative thereto.

2d. To see if the town will raise and appropriate five hundred dollars, to aid the pupils in Sutton in prosecuting their studies in the higher branches in some of the high schools and academies of the neighboring towns, or act or do anything relating thereto.

These articles were passed over "without note or comment" by an indefinite postponement, and thus ended the second direct attempt to establish this school.

The action of Massachusetts Board of Education in procuring the passage of the law "That no distribu-

tion or apportionment of the annual income of the State school fund should be made to towns not complying with certain requisitions of chapter 38, sections 1 and 2, general statute, including the maintenance of a high school," strengthened the friends of a higher education, and in March, 1883, the following articles were inserted in the warrant for the approaching annual meeting:

Article 14. To see if the town will *maintain* a high school according to the requirements of statute law, or act to do anything in relation to the same.

Article 15. To see if the town will raise money for the maintenance of a high school.

After a dispassionate discussion and a more detailed statement of the case than is found in the foregoing extract, the affirmative of both articles was sustained by an almost unanimous vote of the persons present and voting.

Under Article 14—"Voted that the town will maintain a high school to hold one term of three months at Wilkinsonville, one term of three months at Sutton Centre, one term of three months at West Sutton, and one term of three months at Manchaug Village."

Under Article 15—"Voted to raise and appropriate five hundred dollars for the maintenance of the high school."

The success of the measure was principally due to a higher standard of *public opinion*, and an appreciation of a higher culture and a demand therefor. Many good citizens had labored to bring about this improvement in public opinion, prominent among whom were Rev. H. A. Tracy and James W. Stockwell, Esq., and last for the first I. B. Hartwell, Esq., of whom it is a pleasure to say that no one in town has labored more earnestly, both in a private and public capacity, to improve our common schools, to foster the desire for a more generous course of study than they afford, and to furnish facilities for the gratification of such desire. He was chairman of the School Committee during several years preceding the establishment of the high school, at the time when the agitation attending the discussion of the matter was the greatest, and brought all the influence which his position commanded, to bear in support of the measure. His faith in the good sense of the people, and in their ultimately favorable action, never faltered.

From that day the school has been successful, the town has fostered it liberally and its results have been beneficent.

The first teacher of the high school, Walter A. Wheeler, gave permanency and character to it. He was a Christian gentleman, earnest and enthusiastic in his work, combining the rare faculty of imparting knowledge and the love of it to all under his care.

THE FREE PUBLIC LIBRARY.—December 2, 1874, J. W. Stockwell, Esq., proposed for discussion before the Farmers' Club in Sutton Centre the following question: "Social Life and Culture, How Best Promoted in this Town?" The record of the meeting

reads as follows: "After the discussion of the subject showing the need of books for intellectual growth, J. W. Stockwell proposed to form a club, if twenty persons could be found willing to contribute one dollar each to a fund for the purchase of books for this winter's reading. He was followed by other speakers favoring such a proposal, and so well was the idea of the nucleus of a Free Library received that at this meeting a 'committee of five' was chosen to solicit for a library and purchase books. J. W. Stockwell, Rev. H. A. Tracy, W. A. Wheeler, Misses Ellen C. Woodbury and Sarah M. Mills were selected as such Committee."

The above extract indicates the inception and beginning of the Sutton Free Library, which now numbers three thousand two hundred and fifty volumes.

Dr. J. H. Armsby early wrote for information in regard to its plan and purpose, and finding its promoters held large hopes for its future success, at once took an active interest in its prosperity and enlargement, and his contributions to aid in establishing "The Free Public Library" were frequent, large and valuable. A suggestion from a member of the committee to those who had left their native town for wider fields of usefulness brought liberal returns and many were the donors, while from those within the town were earnest workers and liberal donors. A valuable selected library was given by Hon. John D. McCrate, and other large contributions were received from Rev. H. A. Tracy, George P. Stockwell, Hervey F. Lombard, Rev. George Lyman, J. S. C. Armsby, E. J. Mills, J. W. Stockwell, D. T. Thurston, Mrs. H. W. Beecher, Professor Homer B. Sprague, Rev. Frederick N. Knapp, H. C. Batchellor, Mrs. J. W. Clark, Dr. A. L. Stickney, and many others.

Thus far the library was the property of the original proprietors, but the time was at hand for transferring it by deed to the town, and this was proposed on the single consideration that it should ever be maintained as a free public library in the centre of the town or revert to the grantors. At the annual meeting of the town, March 20, 1876, the town voted to accept the library on the terms proposed, and it was transferred by deed, dated March 21, 1876, and thus was established "The Sutton Free Library."

The friends of the library did not abate, in the least, their interest in its prosperity, and donations of books increased rather than diminished, and this enterprise is largely the work of its founders and friends, and less the gift of the town.

The question of dividing the now large library of about two thousand five hundred volumes and placing a part in the other villages of the town was agitated at the annual meeting, but the deed to the town prevented such dismemberment of it, and at the next annual meeting it was voted, on motion of Jason Waters, Esq., to establish branch libraries in each of the villages; these, far from taking from the enthusiasm for the Free Public Library (which now con-

tained so many donations that were memorials of friendship and love from deceased friends of the town that its care had become a duty), only demonstrated to the entire people more fully than ever before the inestimable value of books. From the annual reports of the librarian, April 1, 1885, we insert the following extract:

The dawn of '85, its tenth birthday, sees the Library established in a pleasant, commodious room, its friends and patrons rejoicing in its removal to a suitable place, in the new Town Hall, adapted to its requirements.

Looking back from this standpoint in the history of the Library, the projector and founder of the plan "to secure good reading," with the little band of supporters, may feel repaid for all efforts and sacrifices made in the interest of true progress, and may be pardoned if there is pleasure and pride in recalling its steady growth, and seeing its establishment in a new and permanent home. That another decade may still find it an honor to the town, a source of education and advancement with refining influence, it is essential that no citizen should be indifferent to its advantages, or neglect to avail himself of its privileges.

At the annual town-meeting, April 6, 1887, a Board of Trustees for these libraries was elected,—Rev. John Greyson, Miss Sarah M. Mills, Jason Waters, George H. Clark and George W. Albee. In 1888 the town appropriated five hundred dollars for books and care (the largest grant ever made by the town), to be divided between the several libraries according to weekly circulation from each. D. T. Thurston was the first librarian and gave a room in his house for its use. At his death J. W. Stockwell assumed the care and held the position till April 1, 1883, when Miss Sarah M. Mills became librarian, and holds the position at the present time.

The library and branch libraries now number volumes as follows:

	Volumes.
Sutton Free Library.....	3250
Manchaug Branch Library.....	721
West Sutton Branch Library.....	360
Wilkinsonville Branch Library.....	300
South Sutton Branch Library.....	367
Total .....	4998

## CHAPTER CXXVIII.

### SUTTON—(Continued.)

#### MANUFACTURES.

It is a well-known fact that England for a long period discouraged manufacturing in her colonies. She thought by so doing to increase the demand for her own products, and make her dependencies more dependent.

The first Provincial Congress of Massachusetts, which met at Salem October 5, 1774, took the matter in hand, and, appealing to the patriotism of the people, strongly recommended the production of wool, the raising of flax and hemp, the making of nails, steel, tin-plate, fire-arms, saltpetre, gunpowder,

paper, glass, buttons, salt, combs, cards and the establishment of all such arts and manufactures as might be useful to the people.

As early as 1768 the people of this town, in hearty sympathy with every movement designed to relieve the colonies from dependence upon England for necessary articles of wear and use, passed a resolution encouraging manufactures.

Most earnestly did the people set themselves at work to provide for their necessities. Every house was a manufactory of cloth, every farmer a producer of wool and flax. As the carding was all done by hand, it was natural that the first manufacturing of the town should be the production of those articles most needed in making woolen and linen cloth. So we find hand-cards among the first, if not the first articles manufactured in Sutton. These were made by Jonathan Hale, who came from Newbury not far from 1747, his name appearing upon both the church and town records that year.

Mr. Hale removed to Coos, N. H., in 1771, and the business of card-making was carried on in town for two or three years by Joseph Rockwell, born in Middletown, Conn., who learned his trade of Mr. Hale.

Rockwell went from Sutton to Philadelphia, where he continued his trade. He was succeeded in the card-making business by — Sibley, who made a great improvement in the machine for cutting and bending the teeth. Mr. Sibley continued the business until about 1795, from which time nothing farther was done in that line in town.

Comb-making was introduced in town about 1780 by Simeon Carpenter, who came from Attleboro', and continued by him until 1815. Levi and Jonathan Fuller, who came from Attleboro' about the same time with Mr. Carpenter, were also comb-makers by trade, and carried on the business for many years. These combs were made from horn, bone, ivory, tin and lead. Combs were also manufactured by one of the Chases, on the place now occupied by Andrew Boyce, in the Slocomb District.

Scythe, hoe and axe-making were also carried on at an early date—scythe-making in particular. All these were at first beaten out by hand, afterward by the trip-hammers, operated in some cases by water-power and in some by horse-power.

There are several places in town which lay claim to the introduction of the first trip-hammer.

Mr. Oliver Hall says the first was put into operation by horse-power by Mr. Nathan Putnam, who had a scythe shop near the house in which Mr. Hall now lives.

Mr. Putnam afterward erected a building (the foundations of which may still be seen) on a stream emptying into Manchaug Pond, just below the village of West Sutton, a little west of the road to Manchaug, in which he had a trip-hammer operated by water-power. He forged his scythes in this building and finished them in the shop near his house. Scythes,

hoes and axes were made at West Sutton—hoes and axes were made by Elder Samuel Waters and his son-in-law, Amos Waters, and axes by Cornelius Putnam.

Scythes and hoes were also made by Abel Chase and Nathaniel Whitmore & Sons, on the place now owned by Lewis Griggs, called the Deacon Hall place. Scythes were likewise made near the place where Estes Putnam now has a shingle-mill; at Marbleville by some of the members of the Marble family; at Manchaug by Joseph and Cornelius Putnam and Colonel Reuben Waters; in the Union District by Joel Lackey; at South Sutton, and in what is now Millbury, on the stream running from Crooked Pond, which will have more particular mention in connection with what will be said upon the early manufacturing along this stream.

The fine water-privileges along the outlet of Crooked Pond (now Singletary Lake) were at an early date utilized for manufacturing purposes. The first privilege was occupied by the grist-mill built by John Singletary, who bought the "mill-lot" of Ebenezer Dagget, to whom it was given upon condition that he should "keep a grist-mill for the use of the town." The exact date of the building of this mill cannot be ascertained. Mr. John Singletary came to town about the year 1720, and undoubtedly bought the right of Mr. Dagget, and built the mill soon after. On the next privilege it is said there was a blacksmith shop, with a trip-hammer, in which scythes were made on a small scale, and perhaps other articles used on a farm. The next privilege, where the mill of M. A. Lapham now is, was occupied by the paper-mill of Abijah Burbank. This was the first paper-mill built in the county, and the fourth or fifth in Massachusetts. Its erection appears to have been suggested by a resolution passed in a convention of the Committees of Correspondence and delegates from the several towns of the county of Worcester.

This mill was, during most of the Revolutionary War, the main dependence, and at times the sole dependence, for paper, of the printing-office of Isaiah Thomas in Worcester.

Its capacity, according to Deacon Leland, was thirty reams per week, during eight months of the year.

Mr. Caleb Burbank, son of Abijah, was associated with his father, and succeeded him in the business of paper-making, increasing somewhat the production, and greatly improving the quality.

Just below the paper-mill was an oil-mill, jointly owned by Jonathan Holman, Abijah Burbank, Jonathan Waters and Andrew Elliot. The building of this mill was begun in 1769, as appears by a charge in the memorandum book of Colonel Holman, in which he makes note of money due him for getting timber for the oil-mill.

The same book contains several entries giving the number of gallons of oil sold to various persons, by which it is seen that quite an extensive business was done.

Just below this was a carding and fulling-mill; still farther down the stream a powder-mill, which seems to have been run but a few of the first years of the Revolutionary War.

Next to the powder-mill was a gun manufactory; changed afterward into a manufactory of scythes, axes, saws, mill-iron, steel-plates, etc., in which an extensive business for that day was done.

Tanning and currying was also carried on by John Morse, Captain Joseph Griggs and possibly others whose names have not been brought to our notice.

Printing was done previously to 1813, by Sewall Goodrich, in a building which stood near the residence of Mr. Tyler Waters, in the part of the town which became Millbury the above date.

The boot and shoe business was also quite extensively carried on at the centre of the town, and something in the same line was done in several other places.

As early as 1837, according to statistics furnished for Barker's "Historical Collections," there were made 9314 pairs of boots and 51,968 pairs of shoes, of the value of \$55,656.

The business was started not far from 1835, and carried on by various parties, the principal of whom were Simon J. Woodbury, N. G. King, W. C. Chase & F. F. Sibley, B. L. & Henry C. Batcheller, B. F. & D. A. Tenney, Loren C. Howard & E. A. Dudley, afterward L. C. Howard alone.

MARBLEVILLE.—Joseph Hathaway began the manufacture of shuttles at this place. He sold to Mr. Ezra S. Marble, who carried on the same business until his death, making from five thousand to seven thousand dollars' worth of shuttles per year. Since his death the business has been continued by his son, Ezra W. Marble, who suffered a heavy loss by the burning of the shop in 1874. He rebuilt in 1875, and resumed business in the spring of 1876. He has invented and patented an ingenious contrivance for holding the bobbin, which is attached to the spindle, making his shuttle one of the best, if not the best, now in use.

WOODBURY VILLAGE.—Where the Woodbury factory now stands, there was, in the early settlement of the town a saw-mill, built and owned by Deacon Percival Hall, then owned by his son, Willis. Captain Josiah Hall built a new saw and grist-mill there in 1797. The mill-work was done by Captain Francis Putnam. Captain Hall sold to Captain David Dudley in 1813. Captain Dudley, Charles Hale, Luther Woodbury and Leonard Woodbury commenced manufacturing scythes there the same year, continuing the business two or three years, when they sold to Captain Asa Woodbury, who continued the same business a few years.

The old building was repaired, enlarged and changed into a woolen-mill or factory; burnt in 1835, rebuilt soon after, and operated by Captain Asa Woodbury and Henry Boyden, under the name and firm

of Woodbury & Boyden. It was afterwards operated by Woodbury alone.

It was burnt in 1855 and rebuilt in 1856. The new mill was first operated by Woodbury, Brown & Cooper, owned by Woodbury, and afterwards run by him alone. Stockwell & Prescott run the mill for him awhile. Hall & Prescott hired the mill and run it for a year or so, making very nice jeans. After the death of Captain Woodbury it was sold at auction to Crawford & Fisher, and run from 1866 to 1871 by Crawford, and since that time rented to different parties, and at the present time doing a flourishing business under the management of Geo. A. Bigelow, of Worcester.

**PLEASANT VALLEY.**—A card and fulling-mill was built at this place by Thomas Harback about 1776. His son, Thomas, Jr., built in 1822, near the site of the old fulling-mill, a factory for the manufacture of broadcloth, and here, first in town, was cloth woven by power-loom.

The factory was next owned by Mallalieu, Roberts & Graham, then by the Goodale Manufacturing Company. They sold in 1836 to Freeman & Sibley. In 1837 the company was incorporated as the Sutton Woolen-Mills Company, and the property was mortgaged to Francis Sibley. In 1841 the factory was burned, and Sibley took possession on his mortgage soon after. He sold to Stephen B. Holbrook and Sumner F. Sutton in August, 1845, who built, in 1846, the main building of the present factory.

Partridge & Wakefield rented and operated it from 1846 to 1849, manufacturing print-cloths. They also built the small house and saw-mill.

William Yearnshaw made bags there; Leander Lackey made bits, bit-stocks, etc.

William Nolan manufactured print-goods in 1850.

Holbrook made cotton flannel.

John M. Daniels & Son made satinets from 1860 to 1864.

H. H. Chamberlain engaged in wool-cleansing and the manufacture of woolen warps and cotton yarn. Holbrook sold to James C. Southwick, and he to George C. Ripley, of New York; he to E. B. Stoddard, of Worcester, Stoddard to Holbrook and he to F. B. Smith, September, 1870.

Mr. Smith made many improvements in the mill; built a picker-room of brick, fire-proof, forty feet by thirty feet; an engine-house, forty feet by fifteen feet, and put in a fine engine of thirty horse power.

He died—and the mill has since been run by his son, F. S. Smith, agent Fred. B. Smith estate. It was burned 1885, and at once rebuilt, enlarged and improved, and is now doing a large and increasing business.

**WILKINSONVILLE.**—Asa Waters, of Millbury, purchased of Jeremiah Stone in 1815 what was known as the Dudley farm, including water-power, etc. Said Waters deeded the premises to David Wilkinson, of North Providence, R. I., by deed bearing date of

April, 1823. Mr. Wilkinson built the east part of the stone factory the same year, and in 1828 added the west end, and in 1832 the brick wing, twenty-four by twenty-five feet.

The main building is one hundred and eleven feet long by thirty-eight feet wide, four stories high, with attic.

During Mr. Wilkinson's administration the place was very much improved in the erection of the hotel buildings, the Episcopal Church and several dwelling-houses. In the year 1829, when the manufacturing interests throughout New England were in a depressed condition, the financial affairs of the proprietor of the village were such that the property passed into the hands of Samuel Slater & Sons. In 1832 an act of incorporation was obtained, under the name of Sutton Manufacturing Company. The capacity for manufacturing purposes has increased from time to time, and is now ten thousand spindles and two hundred and forty-one looms.

The annual production is two million yards sixty-four square printing-cloths, which are sold at different printing establishments in New England, New York and Philadelphia.

H. N. Slater, of Providence, is treasurer of the corporation.

*Shuttle Works of D. T. Dudley & Son.*—These works are situated in Wilkinsonville, on the road from the village to Millbury. They were built in the fall of 1866 by Warren Wilder.

January 1, 1867, D. T. & H. T. Dudley purchased a two-thirds interest in the business, and carried it on with Mr. Wilder until the fall of 1867, when the partnership was dissolved, the Dudleys purchasing the whole property and carrying on the business under the name of D. T. Dudley & Son.

At first they manufactured shuttles only, employing six or seven hands. But the business was soon enlarged. Machinery was introduced for making shuttle-irons, and the business increased to such an extent that seventeen hands were employed.

The machinery is operated most of the year by water-power, furnished by streams from what are known as the Sutton and the Sibley reservoirs, uniting at Woodburyville. A steam-engine has been provided for running the machinery when water fails.

There is a large demand for their goods, which are sent to all parts of the United States, the Canadas, South America and Mexico.

The buildings are wooden structures. In the main one, which is two and a half stories high, shuttles are made; in the low building adjoining this, the shuttle-irons are forged. About one hundred feet southeast of this is another building, two and one-half stories high, used for storage and drying purposes. The beautiful dwelling which stands upon the elevation easterly of the mill is occupied by the junior partner.

**MANCHAUG.**—The village of Manchaug derives its name from a noted Indian chief who was drowned

in the pond now known by that name. It is situated upon the north branch of Mumford River, a tributary of the Blackstone. Its hydraulic power is derived from this stream, which is, in reality, the outflow of a chain of ponds lying within a radius of four or five miles, and covering an area of one thousand acres, nearly. The extent of country drained is estimated at eleven thousand five hundred acres.

The quantity of power derived is attributed to the springs found in the surrounding country, and the great and rapid fall of the river, which in less than one-fourth of a mile is eighty-three feet. The remarkable advantages of this stream as a motive-power have been increased by building a dam at the outlet of each of these ponds or reservoirs, which give the water an additional fall of several feet.

It was about the beginning of the year 1826 that a number of gentlemen from Providence, R. I., on their way to Worcester and Boston, conceived the idea of utilizing this stream for the purpose of manufacturing.

After many interviews with Mr. Elliot a sale was effected, and in January, 1826, the deed conveying forty-eight and one-half acres was passed from Aaron Elliot and his wife, Susan Elliot, to Jonathan Congdon, Randall H. Green and Samuel Congdon (merchants), all of the city of Providence.

February 12, 1827, Welcome and Samuel Congdon becoming members of the firm, the standing was as follows: Jonathan Congdon, one-fourth; Randall H. Green, three-eighths; Arnold Congdon, one-eighth; Welcome Congdon, one-eighth; Samuel Congdon, one-eighth.

May 17, 1828, Baxter Morse sold to the Manchaug Company, as constituted above, twenty-eight acres of land. This completed the purchase of real estate, as far as known, by the originators of this company. A successful business is supposed to have been done by the gentlemen composing the company until July 29, 1829, when they sold out all their interest to Peter Pratt and William R. Staples, they in turn transferring it, May 1, 1830, to Samuel Shore, previous purchases and improvements having augmented this estate to nearly two hundred acres improved and wood land, three cotton-mills, eleven dwelling-houses, etc. Unfortunately, February 1, 1834, after a somewhat checkered experience, Samuel Shore transferred all the above property by deed of assignment to John Whipple and Dexter Thurber for the benefit of his creditors. The assignees above named, on the 28th of May, 1835, sold to Olney Whipple, of North Providence, all the above property, and August 21st of the same year, Benoni Cook, Isaac Brown and Dexter Thurber (manufacturers), Earl Douglass Pierce (gentleman) and Lewis Baxter (yeoman), all of Providence, with the exception of Lewis Dexter, who was a resident of Smithfield, R. I., purchased the entire property, and Charles Thurber was appointed resident manager. Under his

management the business was materially improved, and quite successful until September 13, 1839, when he died, Mr. Dexter Thurber assuming the management, and continuing in that capacity until October 1, 1841, when Messrs. Asahel Wall & Co., together with Stephen Randall as resident manager, leased the mills, agreeing to furnish eighty-seven and a half pounds of print cloth for every one hundred pounds of cotton and to receive two and three-fourths cents per yard for manufacturing the same; the owners keeping in repair all dams, flumes, permanent shafting, wheels, etc., and furnishing all necessary supplies for the maintenance of the same. This they continued to do until April 1, 1843, when the contract was annulled and the business was again conducted under the management of the old company, Mr. Randall continuing in the capacity as manager until 1846. Messrs. Thomas & Colt leased the mills for the manufacture of print cloths and continued from July 21, 1846, until March 29, 1847, when Mr. Colt took the lease and continued until May 8th to manufacture by the yard on the same terms as A. Wall & Co. (two and three-fourths cents per yard); they, as in the case of Wall & Co., having the waste. Thread was manufactured at No. 2 Mill and woven into print cloths at the other mills.

September 1, 1853, James M. Cunliff, of Providence, was admitted as a partner, having been in 1848 appointed resident manager, which position he held until April 1, 1870.

Scott W. Mowry was also admitted as a partner at the same time with Mr. Cunliff, Mr. Dexter Thurber retiring.

It was during the administration of Mr. Cunliff that several valuable improvements were made in connection with this property. An addition was made to the lower or No. 1 Mill in 1852, of granite, two stories high, of the style called "Rough Ashlar," fifty feet by one hundred and eighteen feet. It was built by Lafayette Reynolds, of Pascoag, Rhode Island.

In 1862 a further addition of four stories of granite, seventy feet by one hundred and forty-three feet, was built.

In 1868 the foundation of the new or No. 3 Mill was laid, and the building erected under the care of Nathan Staples & Sons, of Lowell.

It was constructed of granite obtained from the quarries of this village, and is of the style called "Rough Ashlar."

The dimensions of this mill are as follows: three hundred and ten feet long, fifty-two wide, four stories high, with two towers to connect the several stories, twenty feet square. A picker-house eighty-four feet long by forty feet wide, three stories high; one boiler-house forty-eight feet long by thirty-six feet wide, one story high.

After the completion of this mill print cloths were manufactured until the summer of 1873, when there

was a change to what is known as "Fruit of the Loom."

Mr. James M. Cunliff, after a successful management of twenty-two years, retired, leaving it in the hands of his son, Lemuel H. Cunliff, under whose superintendence the interests of the company became somewhat clouded.

At this period Messrs. B. B. and R. Knight, of Providence, Rhode Island, purchased an interest, and the other parties retired, with the exception of Mr. Dexter, the firm then standing, as at the present time, "Lewis Dexter, B. B. & R. Knight."

With the increase of wealth and skill in manufacture, it was evident that none but a man of ability and strict business integrity could assume the responsibility of the large property and make it a successful and profitable business. Hence the owners were anxious to secure the services of a man who could meet the requirements of the time and place. After several interviews with different parties, Robert McArthur, at the time located at Millville, N. J., was induced to accept the management. Mr. McArthur assumed the entire control as resident manager and agent in the fall of 1873, and continued as such. It is but justice to Mr. McArthur to say that, through his untiring energy and careful discrimination, the business has been made successful. Constant improvement marks the growth of this village, and within the last three years, under the efficient management of the present superintendent, George H. Clark, Esq., three of the mills have been enlarged, new tenement houses have been erected and neatness and order are everywhere apparent.

As illustrating the progress of this company, we give a list of the product each decade: 1840, 634,775 yards; 1850, 1,300,480 yards; 1860, 2,444,832 yards; 1870, 4,065,320.

Add to this the increased value of the product from print cloths to "Fruit of the Loom" cottons, to realize the growth of this village.

## CHAPTER CXXIX.

### SUTTON—(Continued.)

#### MISCELLANEOUS.

THE REVOLUTION.—On the breaking out of the Revolutionary War few towns in the Commonwealth rallied to the cause with such spirit and unanimity as the town of Sutton. The first gleaming ray from the torch of liberty kindled to a flame the whole surrounding region, and volunteers flocked to its standard in great numbers. Long before the battle of Lexington they had formed a band of "minute-men," well mounted and armed, and under the command of Colonel Jonathan Holman, who had been a vet-

eran in the British service in Canada during the old French War.

As soon as the news of that fight reached them they sprang to their saddles, and, riding with all speed through the whole night, reached Concord just as the enemy were retreating to Boston.

It was not thirty days after that fight before Sutton and the neighboring towns had raised a full regiment of ten companies, all volunteers, and they were on the march to the field of action.

They were organized under the command of Colonel Ebenezer Larned, of Oxford; marched to Roxbury, where they arrived more than two months before Washington came to take command of the army.

Another regiment was immediately formed of men coming from "Sutton, Oxford, Sturbridge, Charlton and Dudley, including adjacent lands," and placed under the command of Colonel Jonathan Holman, of North Sutton.

The following entry is found in the journal of the Massachusetts Council:

MASSACHUSETTS COUNCIL, Feb. 7, 1776.

In the House of Representatives: The House made choice by ballot of the following gentlemen for Field Officers of the Fifth Regiment of Militia in the County of Worcester, viz.: Jonathan Holman of Sutton, Colonel; Daniel Plympton, Lieut. Colonel; William Larned, First Major; Jacob Davis, 2d Major.

In Council: Read and Concurred.

This regiment, being composed largely of men from Sutton, and under the command of a Sutton officer, was usually known and styled as "The Sutton Regiment." It was destined to a very severe and long-continued service of nearly two years, during which it was engaged in many battles with the enemy, and finally, if we accept the evidence of a high British authority, in the great decisive battle of the war, the battle of Saratoga.

In the battle that ensued Colonel Holman's regiment was actively engaged, and that they acquitted themselves bravely may be justly inferred from the fact that after the battle this regiment was designated "to take possession of Fort Edward, and to hold it, until the dispersion of Burgoyne's army," which they did.

The regiment was then honorably discharged, and the men returned to their homes.

This battle, followed by the surrender of Burgoyne and his whole army, virtually ended the war in New England. The British, after fighting the obstinate Yankees for two years and a half, became discouraged and moved the theatre of war down South.

January 19, 1776, there was a call for more men, and a levy was made upon all the towns in the State, the number to be raised being apportioned according to the size and strength of the towns.

For Worcester County the drafts were as follows:

Brookfield, forty-nine; Lancaster, forty-six; Sutton, thirty-nine; Mendon, thirty-three; Worcester, thirty-

two; Hardwick, twenty-nine; Shrewsbury, twenty-five; Bolton, twenty-three; Lunenburg, twenty; Sturbridge, seventeen; Westboro', seventeen; Charlton, sixteen; Douglas, fifteen; Grafton, fifteen; Dudley, twelve; Leicester, thirteen; Uxbridge, thirteen; Oxford, eleven; Northbridge, six; and so on.

In a levy made upon the towns for blankets, they were apportioned as follows: Lancaster, thirty-three; Sutton, thirty; Brookfield, thirty; Worcester, twenty-seven; and so on in lesser numbers.

In the Provincial Congress held at Watertown, May 1, 1775, provision was made for the support of the people who had been driven from their homes in Boston by the entrance of the British army.

They were assigned to the several towns in the State, to be supported as far as necessary.

In Worcester County they were assigned as follows: Lancaster, one hundred and three persons; Brookfield, ninety.

The evidence, therefore, appears to be conclusive, that in the great and arduous struggle to gain our independence, Sutton ranked among the forty-three towns in Worcester County as the *third*, Brookfield and Lancaster alone having a better record, they being larger towns.

Sutton may well be proud of her contribution to the grand result; and, in common with all the towns of the Commonwealth, her glory is still more enhanced by the fact brought out by Charles Sumner, in his celebrated debate with Senator Butler, of South Carolina, in which he *proved by documentary evidence from the War and Treasury Departments*, that, in the Revolutionary War, Massachusetts alone furnished *more men, and more money*, than all the Southern States combined.

CIVIL WAR.—April 11th. Fort Sumter was fired upon, and the War of the Rebellion inaugurated.

April 15th. The President issues his proclamation calling for seventy-five thousand of the militia of the several States to "re-possess the forts, places and property" which had been seized, "to maintain the perpetuity of popular government, and to redress wrongs long enough endured."

These men were called for three months' service.

April 29th. An impromptu meeting of citizens of the town was held for the purpose of discussing the situation, and a committee appointed to draft a series of resolutions for the action of a meeting of the town called for the day following.

April 30th. At the meeting of this date the feeling of indignation at the atrocity of the act of firing on the national flag, of patriotic devotion, and of determined purpose to crush rebellion, was in full harmony with that which prevailed throughout all the loyal States. In view of the peril of the hour, and the necessity of wise action, it was proposed that the proceedings be opened with prayer; and it is recorded that the Rev. Mr. Hawkins, being called upon "to address the

Throne of Grace, responded in a fervent and appropriate prayer."

On motion of E. J. Mills, it was "voted that a Committee chosen at a meeting held last evening to present the subject for action to-day be invited to do so now, and the Hon. J. D. McCrate, Chairman of said Committee, responded in the following resolutions:

*Resolved*, That in this most unnatural contest, waged against our Country by a band of traitors in the Southern States, we, the inhabitants of Sutton, believing that the whole strength of the country should be exerted in an official manner to put down rebellion, call upon the Government of the United States to make no terms or compromises with traitors, but to carry on the war in such a manner, and with such force as will strengthen the union sentiment which we believe still exists in portions of the rebellious States, and intimidate and overwhelm those who, regardless of all obligations, seek a division of our beloved Country.

*Resolved*, That we are neither advocates of nor believers in the right of Secession, That we regard the course taken by the self-styled Seceding States as Revolution without justifiable cause, and that the Government of the Country is therefore bound to put it down by the strong arm of force.

*Resolved*, That we appropriate the sum of six thousand (\$6000) dollars for the specific object of taking care of the families and of uniforming such of the inhabitants of this Town as shall enlist either for the war or for three years or more, and shall be called out to serve for that period, and be accepted by the regularly constituted authorities of the Country.

*Resolved*, That the above sum, or whatever portion thereof be necessary, shall be expended under the direction of a Committee of three, to be chosen at this meeting.

*Resolved*, That Col. John D. McCrate, A. Dudley Chase and James Taylor be a Committee for the purpose above mentioned.

August 2d. The town "Voted to offer a bounty of one hundred and fifty (\$150.00) dollars to any person who, on or before the eighteenth day of August, will enlist as a Volunteer in the Army of the United States as one of quota of twenty-eight men from Sutton, the same to be paid as soon as such person shall have been accepted and mustered."

August 23d. The call for nine months' men was promptly responded to by the town, which "voted to take measures to procure by enlistment our quota of troops, and to pay to each person enlisting as one of said quota a bounty of one hundred and fifty (\$150.00) dollars."

The town furnished two hundred and twenty-three men for the war, which was a surplus of eight over and above all demands.

Two were commissioned officers. The whole amount of money appropriated and expended on account of the war, exclusive of State aid, was twenty-five thousand one hundred and eighty dollars and fourteen cents (\$25,180.14). The amount of money paid by the town for State aid to soldiers' families during the war, and afterward repaid by the State was as follows: In 1861, \$501.91; 1862, \$2,410.71; 1863, \$3,212.70; 1864, \$1,725.76; 1865, \$1,901.26. Total amount, \$9,752.34.

The ladies of Sutton furnished a great many articles for the soldiers during the war, to the money value of about one thousand dollars. Among the articles were shirts, drawers, socks, lint, bandages and other useful stores. They were forwarded to the front generally through the Sanitary and Christian Commissions.

CENTENNIAL.—1876, March 20th. The town made an appropriation for a centennial celebration.

There was, upon July 4th, a large and enthusiastic gathering of the citizens of the town in the grove a little east of the house of Mr. F. H. Marble.

A procession of citizens and Sunday-school children was formed at the Congregational Church, under the direction of Messrs. Edmund J. Mills, Amos Batcheller, H. S. Stockwell and Charles H. Chase, marshals; and, escorted by the Oxford Brass Band, marched to the grove, where appropriate services were held under the direction of E. J. Mills, president of the day. Prayer was offered by Rev. W. A. Benedict, the Declaration of Independence read by Miss Hattie A. Holbrook, and patriotic speeches were made by Rev. H. A. Tracy, Messrs. I. B. Hartwell, Reuben R. Dodge, J. W. Stockwell and Rev. W. A. Benedict.

Old-time and modern songs were sung, and stirring music was given by the band. As the day wore on to its close the crowd slowly and reluctantly dispersed, some, at least, praying that they who shall upon the same ground celebrate the nation's bi-centennial, may look upon our flag studded with many new stars, still proudly waving over an undivided people, who have maintained their civil and religious institutions in their integrity, strengthened their government by the promotion of virtue and intelligence, and made as rapid progress in the second as in the first century of the nation's life, in all that constitutes true national greatness.

SUTTON A FARMING TOWN.—Sutton is pre-eminently a farming town, and has ever been noted for its advanced position in agriculture. Its fine stock has been remarked at all cattle fairs, from the first exhibition of the Worcester County Agricultural Society to the present time. Its fine oxen have been sought after from all the adjoining country.

When Daniel Webster was in England and was asked at one of their fairs if he had ever seen as beautiful oxen, he replied, "Yes; at the fair in Worcester County, Mass., and they were raised in Sutton."

From the earliest times to the present, trained oxen have been a specialty in this town, though now the horse is fast usurping the place of the slower ox. Nor have the farmers of this old town been behind in other branches of good husbandry. The grass crop is immense; the fruit product is equal to that of any town of its extent in the State, while in mixed farming it takes high rank, and well it may, for its soil is naturally productive, and its culture has been thorough; therefore its farmers are intelligent, prosperous and enterprising. They are the conservative force that has influenced the acts of the town, shaping its policy and carrying forward its history. Their moral influence is seen in the liberal policy of the town, the advancement of the school, and the support of the ministry, and they can to-day take pleasure in the neatness of their dwellings, the beauty of their fields, and their

productiveness, and the consequent large return for their labor.

THE HOMES OF SUTTON.—And now, gentle reader, a glance at the homes of Sutton. A history of these is really *the* history of the town; for in these homes the influences, secret and silent, direct and open, conscious and unconscious, have been in operation that have molded the characters of the men and women of the town, and established them in those principles which they have exemplified in every line of action. They were men who knew what it was to go out into the wilderness and fell the trees, build houses, subdue the soil, found churches and schools, establish civil government and put in operation the varied forces by which social order is maintained and social progress advanced.

And they were equal to the work. They were not what may be called educated men, and yet they were not ignorant. They had good common sense, sound judgment and strong purpose. They knew what the rights of men are, and possessed the independence to assert, and the will to maintain them.

Most of these homes were *Christian* homes, and all that were not professedly so were occupied by those who sincerely respected religion, and contributed, by a cheerful payment of the "ministry tax," to the support of the institutions of the Gospel. All had seats in the house of God, and few were the families that did not make their arrangements to be represented there upon the Sabbath; and from these homes has naturally grown the history of the town.

Those who went out from us may have reflected honor on our history, but those who remain, the quiet, unnoted ones, have moulded the character of the town, and to them belongs the praise. Of them it may truly be said, "Son, thou wast ever with me, and all that I have is thine." In the church and in the support of the Gospel in all these "meeting-houses," in the town-meeting and the responsibilities of State, in the school and the support of education, in the moral and social life nurtured within its boundaries, has been sown the seeds of character that we now look back upon and read in history. Their names known to comparatively few, their characters known only within the family circle, have yet an influence felt in the community, and broadening through time. Therefore, in closing, let our last, best words be for the noble lives, lived within our borders, which have prepared these beautiful hillside fields, and dotted them with happy homes; these villages, prosperous and enlarging their borders, because of local interest and local pride; these churches, with their uplifting influence, and these schools, nurseries of learning. In these lie the foundation of character, wherein is enfolded the future, not only of our town, but of the State and nation.

Members of the Provincial Congress: 1774, Edward Putnam; 1775, Captain Henry King, Elder Amos Singletary; Member of United States Congress:

Hon. Jonas Sibley; Members of the State Senate: Hon. Jonas Sibley, Hon. William R. Hill, Hon. James W. Stockwell; Members of the House of Representatives: Samuel Dudley, Percival Hall, Henry King, Amos Singletary, Captain Mark Chase, Captain Timothy Sibley, David Harwood, Dr. James Freeland, Captain Jonathan Woodbury, Solomon Leland, Major Samuel Waters, Dr. Stephen Monroe, Jonas Sibley, Josiah Styles, Estes Howe, Darius Russell, Abijah Burbank, Josiah Wheelock, Elisha Hale, Jonas L. Sibley, Daniel Tourtelotte, Joshua Armsby, Edmund J. Mills, Samuel Taylor, Sumner Cole, Darius Putnam, Asa Woodbury, Welcome Whipple, Peter Putnam, Benjamin Woodbury, Sylvanus Putnam, Zelek Darling, Zadock Woodbury, Salem Chamberlin, Timothy Burnap, A. A. Lombard, B. L. Batchellor, Simon J. Woodbury, William R. Hill, Jason Waters, S. D. King, James M. Cunliff, E. H. Hutchinson, William Abbott, M. M. Hovey, George W. Rice, Henry S. Stockwell.

#### BIOGRAPHICAL.

##### THOMAS BLANCHARD.

Thomas Blanchard, the inventor, was born in Sutton June 24, 1788. His father, Samuel, was a farmer, and lived on a poor remote strip of land, where there was absolutely nothing to suggest a mechanical motion. He was of French origin, his name being derived from the French word *Blanchir* (to whiten), and many distinguished men appear in the annals of France bearing that name.

Much dispute has arisen as to his nativity, and hence the honor of his inventions.

Six claimants for the honor of Blanchard's inventions have already appeared, viz.: Sutton, Millbury, Oxford, Springfield, Boston, and lastly, France. That he was born on a strip of land lying between Sutton township and Oxford proper, called "Oxford Gore," all agree. The very house is still pointed out.

Sutton bases her claim upon the following facts: That said strip projects or *gores* into, in a zigzag course, her territory as defined on ancient maps by straight lines; that her records show that Samuel Blanchard paid his taxes to Sutton, and must have voted there if anywhere; that the births of most of his children are recorded there, all which would seem to establish the citizenship of the father in Sutton, and that would of course carry the birth-place of the children. Besides, it is well known that Thomas, who ought to know, always told his biographers that he was born in Sutton, and they have so recorded it.

While on the farm, Thomas gave little if any promise of the latent powers within him. There was nothing in his surroundings to excite them. He was misplaced; schools were remote, and he seldom attended, for he was afflicted with a perverse impedi-

ment of speech, so that the boys called him "stammering Tom." His prospects were anything but promising. At length, when he had arrived at the age of eighteen years, his eldest brother, Stephen, started in West Millbury a tack factory, with horsepower, and he promoted his unfortunate brother to the position of heading them in a vise, with a hand-hammer, one by one. Once in a mechanic shop his dormant genius began to wake up.

Ere that youth had spent many months heading tacks, one by one, he had designed, constructed and put in operation a machine which would cut and head them at one motion twice as fast as the ticking of a watch, and better finished than those made by hand. So perfect was it in design and construction, it was continued in use more than twenty years. It is said to be still in existence, and experts who have seen it, say no essential improvement has ever been made upon it.

Colonel Asa Waters, at the armory, had succeeded in turning gun-barrels so far as they were round, but to turn the irregular shape of the butt baffled his efforts. At length, having heard of a young man living in West Millbury, as having developed some inventive talent, he sent for him to come to his armory. When he came he seemed an utter stranger to all present, uncouth, diffident, had a stammering tongue, and little was expected of him.

He was shown the machine and given to understand what was wanted.

Glancing his eye over the machine, he very soon suggested an additional, very simple, but wholly original, cam motion, which, upon being applied, was found to relieve the difficulty, and proved a perfect success. Mr. Waters was delighted. Turning to Thomas, he said, "Well, Thomas, I don't know what you won't do next. I should not be surprised if you turned a gun-stock!" naming that as the most impossible thing in mechanics he could think of. Thomas hesitated a moment, then stammered out, "We-we-well, I'll try that."

As soon as he had completed his cam motion at Millbury, he was called to Springfield to adjust similar motions in the United States armory there. On a return journey, when passing through Brimfield, solitary and alone in his carriage, in deep meditation, he was heard to exclaim with great glee, like Archimedes of old, "I've got it! I've got it! I've got it!" Two men who were by the wayside overheard him, and one says to the other, "*I guess that man is crazy.*"

He had the idea only, and it required two years of study to bring out the wonderful invention—for turning irregular forms.

It was really the *discovery of a new principle in mechanics* whereby the machine is made the obedient, faithful servant of man to work out his designs after any given model, be it round or square, crooked or straight, however irregular, and made to reproduce the original shape *exactly, every time.*

For this great invention, whose worth to this country and Europe can only be computed in millions, Blanchard himself received but a meagre compensation. For the first two terms of his patent he was continually harassed by infringements and lawsuits, and even in the few years while he was busy at the armory, more than fifty violators had pirated his invention and started up works in various parts of the country for making lasts, spokes, etc.

When the second term of his patent had nearly expired, he said he had expended *a hundred thousand dollars* in defending his right, and had realized to himself little more than "his board and clothes;" that is to say, a fair living.

#### MOSES L. MORSE.

Moses L. Morse, who lived on this place, was a great inventor. He invented the first pin-making machine ever made in this country. The pins made had solid heads, and the principle involved in their manufacture was the same as that introduced in the best machines now in use, which make two barrels a day. Some one who has written on the subject gives a Mr. Wright credit for inventing the first machine for making pins with solid heads in 1833, but it is a mistake. Solid-head pins were made by Morse's machine during the war of 1812. He also invented and had patented scales for weighing coins and other substances hydrostatically. He says a gentleman came into the shop one day, and having his attention called to the new scales, took out a new Spanish dollar and asked Mr. Morse to test his scales on that dollar; so he weighed it and pronounced it a rank counterfeit. The man was provoked at the idea, for it was a very perfect coin. So Mr. Morse gave him another dollar that he might test the one in dispute; then he took his drill and bow and began to tap the dollar, which proved to be made of copper, slightly plated with silver. Then the man declared the scales the greatest invention of the age, and ordered one immediately for his own use. The scales had a graduated face not unlike a clock-face, with hands to point out the result.

Mr. Morse afterward established a cutlery manufactory in Worcester, at what was known as the red mills. He had two children, Charles Willard (a very noted and effective preacher), and Ruth Sibley, who married Rev. Charles F. Allen, D.D., a celebrated preacher and educator, the first president of the Maine Agricultural College, Orono.

#### HON. JONAS SIBLEY.<sup>1</sup>

Hon. Jonas Sibley, the subject of this sketch, was a native of the town of Sutton and always a resident within its limits. He was largely self-educated, the schools of this town being his only aids. A man of broad

views, strong intellect, self-reliant, and thoroughly conscientious. He was a farmer, faithful to its interests and prominent in all agricultural improvements.

At the present day it is not easy to understand the influence of such a sturdy, honest character on the yeomanry of the town. It then represented what to-day the press does in its influence on the political, moral and philanthropic acts of a community; it moulds the character and controls the policy of the people. Such prominence and influence belonged to Jonas Sibley in the town of Sutton, and in the southern part of Worcester County, and on many important elections he led the voters from his own door to the polls and under his guidance were deposited the ballots that determined the policy of the town, or the influence of its action on the state and nation. He represented this town in the State Legislature, was also in the Mass. Senate; and for one term, 1822 and 1823, eighteenth session, he was Representative for the County of Worcester in the Congress of the United States (the only term when represented by a Democrat until the election of Hon. John E. Russell in 1886, fiftieth session). Beside these positions he was constantly in public service for the town as Moderator, Assessor, Selectman, and School Committee.

The following description of him is from the "History of Sutton":—"He was a man of gentlemanly deportment, candid, unassuming, and faithful to every trust."

His thorough honesty of purpose and independence of party dictation on that national stumbling-block—the Tariff—lost him a re-election, as his action on some points could not satisfy the diversified interests of his constituents. A great truth was covered in the words of General Hancock, when he said the tariff was a "local issue" so strongly do local interests influence the action of the voter, and bias the judgment of the statesman. Thus we find Jonas Sibley opposed to higher duties and voting against the bill, but on all amendments to the bill voting in the interest of his section and his calling. Therefore on woolen and cotton goods to reduce the tariff; on wool, sugar, molasses, to hold the duty, and on salt to free it from duty. It is interesting to note that generally his vote was in accord with that of Daniel Webster, even to the final vote "shall the bill pass?" both voting in the negative.

Jonas Sibley, son of Capt. Nathaniel Sibley, married Lydia Rice, daughter of Asahel Rice, August 18, 1785. Children:—first, Susanna, born June 27, 1786, married Daniel Hovey, died August 11, 1811; second, Jonas Leonard, born January 8, 1791, married Margaret M. Monroe, died February 1, 1852; third, John Jay, born November 12, 1792, died March 10, 1815.

John Jay graduated in advanced classes at Brown University, 1814, as valedictorian of his class, but close application to study had undermined his health, and while delivering the address he was attacked

<sup>1</sup> The portrait which accompanies this sketch is taken from one painted by — Styles, of Worcester.

*Jonas Libbey*

*Jonas L. Sibley*

with a hemorrhage which resulted fatally, March 10, 1815.

Jonas Sibley died February 5, 1834, aged seventy-two years, and his wife died December 27, 1837, aged seventy-six, on the homestead in Sutton, which has remained in possession of the family to the present time.

The first Sibleys came from England in the Fleet in 1629—only nine years after the settlement of Plymouth—and settled in the town of Salem. They were supposed to be brothers (John and Richard), and both married. They united with the church in Charlestown, December 21, 1634, and John Sibley took the freeman's oath, May 6, 1635. He was a selectman of the town of Salem and a member of the General Court from that town. Joseph Sibley, son of John, was the father of this branch of the Sutton Sibleys; three of his sons, Joseph, John and Jonathan, were among the thirty families who were entered as settlers in 1717, in the four thousand acres that was given them upon condition that they would go and settle there first, and the thirty persons thus going style themselves "Proprietors of the four thousand acres."

Each branch of the family has developed sturdy character and contributed distinguished names to the history of Sutton.

In the line of Joseph, son of Joseph, is found Jane Walter, daughter of Gibbs Sibley. She married Sir Curtis Miranda Sampson, of New Haven, Vermont. They were married in New York, 1827. When the Atlantic Cable was finished he accepted a baronetcy tendered him as an acknowledgment of his services in pushing that enterprise to completion. They have two sons and two daughters; one of the daughters, a lady of marked ability and culture, is married to Mr. Frederick Lockyer, a well-known man of letters and of society, whose "Vers de Societe" have been republished in this country. Sir Curtis and Lady Sampson had a seat at Rawfant, in Sussex, England.

Also Hon. Solomon Sibley, who studied law with William Hastings, Esq., of Boston, and removed to Detroit, Mich. He was delegate to Congress; United States Attorney; and for many years judge of the Supreme Court of the territory. His son, Henry H., was elected member of Congress from the territory of Wisconsin, and was commissioned Brigadier-General for gallant and meritorious service in 1865.

Caleb, son of Nathaniel Sibley, graduated at West Point in 1828, and remained in the service till his death. He won a high reputation as a gentlemanly, conscientious and able officer, and rose by promotion to the rank of brigadier-general.

The famous "Sibley Tent" is the invention of General H. A. Sibley, descendant of John, who emigrated to Louisiana and settled there. His claims for use of this invention, which was of such valuable service to the government during the late Civil War, are now before Congress for recognition.

In the earlier history of our country we find this

family represented in the colonial service as follows: Capt. John Sibley; Ensign Jonathan Sibley; Sergeant Samuel Sibley; Privates, Elijah; David; Elisha; John, Jr.; Jonathan, Jr.; Joseph; Joseph, Jr.; Stephen; William and William, Jr. In the Revolutionary War: David, Daniel, Richard, Stephen, and William Sibley, beside the Minute Men from Sutton who marched to Concord, April 19, 1775: Joseph, Daniel, Elias, Gideon, Peter, Samuel, Jr., Tarrent and ——— Sibley.

In the control of town affairs; in its political history; and in church matters is equally seen the influence this family has exerted on the character and history of this town.

#### JONAS L. SIBLEY.<sup>1</sup>

Jonas Leonard Sibley, son of Hon. Jonas Sibley, was born in Sutton, January 8, 1791. He was educated in the schools of the town and prepared for college under the instruction of "Master Hall," and graduated at Brown University in the class of 1814. He studied law with Hon. Levi Lincoln, and was admitted to the bar and began practice before the courts in 1817.

He married Margaret N. Monroe, daughter of Stephen Monroe, M.D., and had eight children, only four of whom survive.

Susan Maria, the eldest, married Hon. John D. McCrate. He was a graduate of Bowdoin College; studied law with Judge Bailey, of Wiscasset, Maine, J. E. Smith, Esq., of Boston and Hon. Peleg Sprague, of Hallowell, Maine. He represented the town of Wiscasset for five successive years in the State Legislature; he was appointed commissioner of insolvency for the State in 1829 and 1830; collector of the district of Wiscasset in 1836 by President Jackson; and elected to Congress from the Oxford and Lincoln District 1844. He was a man of rare strength of mind and memory. He died September 11, 1879, in Sutton, on the old homestead where his widow now resides.

The second daughter Joanna Le Baron, married Rev. John Pierpont, Jr., son of John Pierpont, preacher, poet and philanthropist. She died in Medford, March 30, 1852.

John Monroe, the eldest son, was born July 7, 1822. He graduated at Yale College, and was for many years superintendent of schools for the State of California and a prominent educator on the Pacific slope. He has now retired from active work.

The second son, Henry Jonas, was for a time a broker in Chicago; he is now engaged in mining interests in California.

Frances Mary married Hon. James W. Stockwell, son of Simeon Stockwell, of this town. He has held the offices of selectman, school-committee and treas-

<sup>1</sup> The portrait which accompanies this sketch is taken from one painted by Henry Willard, of Boston, a native of Grafton, Worcester Co., Mass.

urer and collector. He represented the Third Worcester Senatorial District in the Senate of Massachusetts for the sessions of 1879-80; was appointed (1887) on the Massachusetts State Board of Agriculture by Governor Ames to fill the vacancy caused by the death of Hon. Marshall P. Wilder and re-appointed in 1889 his own successor.

Jonas L. Sibley represented his native town for several years in the State Legislature. He was a sincere friend and strong supporter of President Jackson, and was by him appointed Marshal of the United States District Court of Massachusetts, at Boston, which office he held for a period of eight years. In this position he performed valuable service in re-organizing and systematizing the departments of this Court—a service duly appreciated by his superior. He was presented by him with his portrait, life size, one of the finest portraits in citizen's dress ever painted of General Jackson.

In his profession he held to a large degree the confidence of the community, and his practice was that of the true lawyer—the settlement of differences between the two parties instead of carrying them before the courts; yet his practice was extensive, having for a single term of court eighty cases on the docket.

Mr. Sibley was a man of fine presence and pre-eminently public-spirited, and every enterprise having for its object the welfare of the people, or the improvement of the town, received ready support and active co-operation. He was affable, courteous and kind, and his memory is held in loving remembrance by the wide circle of his friends. He was especially interested in agriculture. He owned one of the finest farms in town, located a short distance west of the centre of the town, and extending northerly in an oblong square to Singletary Lake and including one of its most beautiful shores, and southerly in a smaller square of similar form. Here his leisure time was employed in planning improvements and carrying forward the work. His orchards were the finest, his crops the largest, his stock the most choice, and his fields the most perfectly tilled. As most of them were within the view from the house, every improvement was a pleasure to him and his interest in farming and in his farm never abated, even during his long and painful sickness. It was a constant source of pleasure to him—possibly not of profit.

At the burning of the Congregational Church, November 3, 1829, he, in endeavoring to save valuable papers from the flames, was struck on the back by a falling timber. The injury was at the time supposed to be slight, but its serious nature was soon apparent, and, notwithstanding the efforts of the best medical skill, it could not be stayed, but resulted in paralysis of the right arm and later of the lower limbs. This episode represents years of pain and suffering, borne heroically and patiently. As the right hand became

useless and refused to obey the dictates of the will, he learned to use the left with greater facility, and his penmanship, written with the left hand, is a model of neatness. He abated in no particular or degree his interest in the welfare of the town, or for years in the practice of his profession. In the rebuilding of the church he was an active member of the building committee and prompt in meeting its responsibilities. To his artistic eye the town is indebted for the (at that time) rare architectural beauty of this church, which is a model in its harmonious proportions and perfect acoustics.

In his office Christopher C. Baldwin collected, placed in order, and preserved the old records and data of the town that have been of incalculable value to the later historians. Hon. Isaac Davis, Christopher C. Baldwin, Esq., Edward Clark, Esq., and others studied law under his teaching and in this office. He was one of the founders of the Worcester Agricultural Society, in 1819, and one of its officers later. He was a prominent and active Mason; a member of Olive Branch Lodge, which was chartered in 1797, and its W. M. from 1821 to 1825, inclusive. Though not able to attend its meetings in his later years, yet his interest in Masonry remained unabated, and at his death he was buried with Masonic honors—many prominent Masons from other lodges being present to honor his memory.

Though his religious views were more broad, and nearer in accord with the Unitarian faith, he was an active member and liberal supporter of the orthodox Congregational Society located in the centre of the town. Naturally sympathetic, he cultivated the kindly virtues, and his life was full of kind deeds. None came to him for sympathy, for counsel, or for help and turned away unassisted—their need was his excuse for giving them his best service. Yet, his tenderness was ever in abeyance to his moral courage, which never flinched from duty, and whether in shielding the defenceless little African boy, who, noting sympathy in his face, ran to him for protection and would not be taken away, or in the hanging of the pirates Marshal Sibley was the same,—tender yet true,—in enforcing the law, or in protecting the defenceless. Such was his life, broad and beneficent, and his death calmly awaited as a happy release from physical suffering such as falls to the lot of but few. He died February 1, 1852.

*Genealogy.*—Jonas L.<sup>6</sup> (Jonas,<sup>5</sup> Nathaniel,<sup>4</sup> Samuel,<sup>3</sup> Joseph,<sup>2</sup> John<sup>1</sup>), married Margaret N., daughter of Stephen Monroe, November 12, 1817; she was born January 17, 1795; died December 27, 1858. Children, —1. Susan Maria, born August 31, 1818; married John D. McCrate, Esq.; 2. Joanna LeBaron, born May 1, 1820; married John Pierpont, Jr.; 3. John Monroe, born July 7, 1822; 4. Frances Lydia, born February 22, 1824; 5. Mary LeBaron, born March 16, 1826; 6. Henry Jonas, born April 21, 1828; resides in California; 7. Frances Mary, born August 29, 1830; married

W. R. Kill

J. W. Stockwell of Sutton, June 26, 1867; 8. Margaret Louisa, born October 26, 1832.

John M.<sup>7</sup> (Jonas L.,<sup>6</sup> Jonas,<sup>5</sup> Nathaniel,<sup>4</sup> Samuel,<sup>3</sup> Joseph,<sup>2</sup> John<sup>1</sup>), married Experience C. Wheelock. Children,—1. John Pierpont, born July 4, 1849; lives in New London, Conn.

#### WILLIAM R. HILL.

William Robinson Hill, son of Deacon Micah and Sally (Marsh) Hill, was born in Douglas, Mass., February 10, 1815, and died in Wilkinsonville, November 19, 1887. His ancestry can be traced through seven generations to John Hill, who came from England to Plymouth Colony among the early settlers (previous to the year 1632), and whose descendants for several generations lived in the towns in Eastern Massachusetts, chiefly in Medway, Dorchester and Sherborn.

John Hill became a member of the Boston Artillery Company in 1633, and died in 1664. The records of Sherborn contain an entry of three grants of land, comprising ten thousand seven hundred acres, by "The Great General Court of Mass. Bay" to the people of Sherborn. This land was divided into lots to be drawn by the inhabitants of Sherborn, and were situated in what was then called New Sherborn, now Douglas.

John Hill (2d), son of John Hill, was a large landholder in Sherborn. In 1715 he drew thirty-three acres of land in Douglas. He died in Sherborn, January 23, 1718. His sons—Samuel, Dr. Eleazer and Ebenezer Hill—drew lands in Douglas in 1715.

Capt. Ephraim Hill (of the fourth generation), son of Samuel and grandson of John Hill (2d), was born in Sherborn, November 5, 1688.

Twenty acres of land were given him in Douglas, December 29, 1721, "in consideration of his being the first-settled inhabitant in town." He died in Douglas in 1795, being one hundred and seven years old.

Ephraim Hill's name appears often on the records of the proprietors of land-grants. He served on committees to transact business concerning the interests of the grants in the settlement of any trouble from the time the grants were made to the time of the Declaration of Independence in 1776, and after that date his name was among the officers of the town of Douglas, which was incorporated in 1746.

Caleb Hill, son of Ephraim Hill, was born in Medway, May 23, 1716. The town records of Douglas show that in 1750 "a grant of land was made to Col. Caleb Hill, Innholder."

He was an active man in proprietary affairs to the time of the Revolution, and in town business after that era. For thirty years he was a deacon of the church in Douglas.

Moses, the oldest son of Caleb Hill, was born in Douglas August 17, 1757. He married Dinah Robinson in Dudley September 20, 1780, and died September 1, 1800. "In the death of Lieut. Moses Hill, at

the age of forty-three years, his family, society and the town met with a severe loss."

Micah Hill, son of Lieutenant Moses Hill, was born in Douglas September 27, 1787, and in 1809 was united in marriage to Sally Marsh, daughter of Aaron and Sarah (Fuller) Marsh. For many years he was a deacon of the Congregational Church in Douglas. He died June 20, 1836, leaving a widow and six sons, all of whom lived to maturity and filled places of trust and responsibility.

William R., the third son of Micah Hill, at the age of twelve years, entered upon a clerkship in the store of his uncle, Benjamin Cragin, in East Douglas. He remained there for two years attending school during its sessions, and devoting the remaining hours of the day and his vacations to his duties in the store. In the spring of 1829 he engaged as clerk in the store of the Manchaug Manufacturing Company. The succeeding fall found him a clerk for Wadsworth & Fowler in East Douglas. In April, 1830, he went to New Worcester and remained one year with Wadsworth & Metcalf. In the spring of 1831 he went to Uxbridge as clerk for Amasa Dudley, and remained till March, 1833, when he was employed by J. L. Dudley, Wilkinsonville, and remained with him two years. On the 1st of April, 1835, he returned to the store of Amasa Dudley, in Uxbridge. In 1836 he took up his permanent residence in Wilkinsonville (in the township of Sutton) as a partner in mercantile business with James L. Dudley. This partnership was dissolved in 1844 by the death of Mr. Dudley. The business was continued by Mr. Hill in the same place until December, 1884. During these forty-eight years he was the book-keeper and pay-master for the Sutton Manufacturing Company. For thirty years he was postmaster, holding this office at the time of his death.

He was always active and interested in the affairs of the town in which he lived (Sutton) and satisfactorily filled positions on the Boards of Assessors, Selectmen and School Committee. His fellow-townsmen sent him to the House of Representatives in 1861, and in 1862 and '63 he was sent to the State Senate. In politics he was a thorough Republican.

On the temperance question he advocated total abstinence. He was for several years the president of the Worcester County (South) Temperance Union, and from its organization deeply interested in its work. Tobacco in any form was abhorrent to him.

For twenty-three years he was a director of the Grafton National Bank; for ten years the president of the Millbury Savings Bank, being in office at both places when he died.

The office of treasurer of the Worcester South Conference of Churches was for many years faithfully filled by him.

Mr. Hill possessed a pure tenor voice of rare sweetness. It was also a voice of unusual compass, being equally pure and full in the upper and lower regis-

ters. It may be said to be his maternal inheritance, as several members of the family were equally gifted. He was deeply interested in musical matters.

During his residence in Uxbridge he was organist at the Congregational Church, and was leader in the choir of the West Church in Grafton for nearly half a century.

For fourteen years he faithfully served the Worcester County Musical Association as president, discharging its duties for nearly one-half the period covered by its history. His labors were very valuable in securing the incorporation of the association, over which he ever presided with dignity and efficiency.

He was also leader in the singing at the meetings of the Worcester Congregational Club, of which he was long a member.

When seventeen years of age he made a public confession of faith in Christ, uniting with the Congregational Church in Uxbridge, Rev. Mr. Grosvenor, pastor.

In the West Church at Grafton, to which, for forty-five years he belonged, he was, till the end of life, an active and consistent member, sincerely beloved and honored, and achieving through its channels of usefulness a most noble service for the Master.

His was an active and well-spent life, his energetic spirit leaving no hour unemployed, and by patient, persevering industry, prudence and good judgment, he achieved success.

Promptness was considered by him one of the cardinal virtues, and his presence could always be relied upon at the time appointed. He was very methodical and always met and faithfully discharged every obligation.

Quiet and unassuming in manner, a careful investigator of business and municipal problems, his sound and discriminating judgment was supplemented by a keen sense of honor and a desire to do that which was for the best interest of all concerned.

He was generous to his opponents, considerate of his friends, but in that generosity and consideration was never found countenance of questionable public or private action.

Willing at all times to counsel with those who sought his advice, he never intruded his opinions upon others, while to those in distress through the misfortune of this life he gave generously of his means, never refusing an appeal, and quietly seeking out and assisting those in trouble.

He was one of the staunchest supporters of the Evangelical Congregational Church in Grafton, and at the time of his death was its senior officer. He was a generous supporter of the church, and at his death left it a legacy of (\$2000) two thousand dollars.

He manifested a deep interest in the Sunday-school and in early life, and later, for a term of years filled the position of superintendent.

The cause of missions, both home and foreign, received his hearty support and regard. Deprived of

the advantages which a collegiate course would have conferred, he was ever solicitous for the educational privileges of childhood and youth; his benefactions were not confined to the more public charities, but were rendered through many private ministrations.

It was in the home circle that his death was most deplored, for home was to him the dearest place; and welcomed as he was in public life, it was here that the graces of the man shone the brightest. Genial in temperament, fond of quiet conversation with his friends, the pleasantry and playfulness of manner so frequently manifested were characteristic of his nature. Tall and commanding in stature, and of fine personal presence, his appearance drew even strangers towards him.

In the swiftness of the summons which called him to his heavenly reward, his earnest desire was gratified. Closing one day with the knowledge of daily duty faithfully done, the sleep of earth was succeeded by an awakening in the presence of the Lord.

There was a large attendance at the funeral, which took place November 22, 1887, at the West Church, and to quote from the public press—"It was a day of mourning in Grafton and in the neighboring towns. Mr. Hill was loved by all who knew him, young and old, rich and poor; and those who did not know him personally, honored and respected him as a man of absolute integrity." The directors of both of the banks in Grafton, and the trustees of the Millbury Savings Bank attended the funeral, and also a delegation from the Worcester County Musical Association.

The words of his pastor, Rev. B. A. Robie, on this occasion, were a fitting eulogy:

While I would not predicate of Mr. Hill the possession, to any pre-eminent degree, of those qualities which go to make up the greatness of a man's character, yet if it is true that in goodness there is true greatness, then he certainly was in the truest sense a great man, and few of us ever knew a better. In the qualities of Christian goodness his life shone with uniform brightness. He was gentle, and pure, and benevolent. . . .

He gave with a lavish hand, his benefactions being regulated by a wisdom that ever regarded the worthiest claims upon his charities. In addition to these gentler qualities of the Christian character, there were exhibited in Mr. Hill's life those more sterling virtues which go to make up the successful business man. Indeed, so combined in him were the two—the characteristics of the merchant and those of the philanthropist—that had God in his providence cast his lot in any of our metropolitan cities, his name would have been enrolled, without question, among those of the Lawrences, an Otis, Wm. E. Dodge and many others, whose histories are a standing protest against the popular idea that a man cannot carry on business to-day upon strict Christian principles and succeed.

Through the fifty years of Mr. Hill's business career, not one act of questionable integrity, or so much as a thought thereof, ever stained its record. He was the soul of honor—his life immaculate in its purity—his simple word, in commercial circles, a bond as good as gold. To his wisdom and experience his associates in financial circles were accustomed to submit questions of importance with a degree of confidence which few men could command. His death has created a vacancy among them which it will be hardly possible for them to fill.

Observation teaches us that most men shine more or less conspicuously in some one sphere of usefulness alone, being, as we say, specially "adapted" for the sphere in which they serve.

But with Mr. Hill it seems otherwise—not only in one, but in many and varied positions his life seemed most successful, whether in the

home, the place of business at the store, office or bank, in political and social life, he was a man of *character* and of *prayer*.

From whatever standpoint you looked at him he seemed the same—and the words of the poet in their application to him are true :

“ The elements

So mix'd in him that nature might stand up  
And say to all the world *This was a Man!* ”

Upon the death of Mr. Hill resolutions of the high regard in which he was held were passed by the Millbury Savings Bank, the Grafton National Bank and the Worcester County Musical Association.

Mr. Hill was united in marriage, May 21, 1839, to Miss Emily B. Wheelock, daughter of the late Capt. Francis Wheelock, of Sturbridge, who survives him, with two of their four daughters—Caroline Wheelock and Ellen Agnes—the latter the wife of Albert L. Fisher, of Fisherville.

## CHAPTER CXXX.

### PRINCETON.

BY NATHAN ALLEN, M.D., LL.D.<sup>1</sup>

THE following names are found recorded in the town records, January 1, 1770, as heads of families :—

Isaac Abbot, Joseph Abbot, Samuel Bailey, John Barber, Phineas Beaman, Timothy Billings, John Bartlett, Stephen Brigham, Thaddeus Bowman, Aaron Brooks, Charles Brooks, Enoch Brooks, Job Brooks. — Brown, J. Bullard, Richard Cheever, Ebenezer Colburn, — Conant, Robert Cowden, Oliver Davis, — Davis, — Eager, Joseph Eveleth, David Everett, Nathan Farron, Robert Forbes, William Foster, John Frost, Elisha Gale, William Gibbs, Moses Gill, Joseph Gibbs, John Gleason, Peter Goodnow, — Gregory, Asa Harris, Abijah Harrington, Ephraim Hartwell, C. Hartwell, Samuel Hastings, Joseph Haynes, Elisha Hobbs, Colonel Benjamin Holden, Abner Howe, Adonijah Howe, Eliphalet Howe, Artemas Howe, — Howard, Silas Houghton, Joel Houghton, Ebenezer Jones, Colonel Elisha Jones, Isaac Jones, John Jones, John Jones, Robert Keyes, Timothy Keyes, Tilly Littlejohn, Sadey Mason, Thomas Mason, Paul Mathews, Caleb Mirick, James Mirick, John Mirick, Josiah Mirick, Lieut. **ECCLESIASTICAL HISTORY.**—The early settlers here, like all our New England towns, were decidedly a religious people. In October, 1759, when Princeton was incorporated, the Rev. Mr. Harrington, from Lancaster, preached the first sermon to a mere handful of people at Mr. Abijah Moore's. In 1762 the first meeting-house was erected and preaching was conducted here till 1764, when a church was organized, consisting of eighteen members. The Rev. Timothy Fuller was ordained as the first pastor of this church in 1767, and dismissed in 1776. The following succeeded him as pastors : Rev. Thomas Craft from 1786 to 1791 ; Rev. Joseph Russell from 1796 to 1801 ; Rev. James Murdock, D.D., from 1802 to 1815. At this time a division occurred in the church ; a large majority of its members, being dissatisfied with the ministrations of Rev. Samuel Clarke, withdrew and organized as a Presbyterian Church. Mr. Clarke was settled, in 1817, in fellowship with the Unitarian denomination, and continued his pastoral labors here until 1832. After his dismissal their society employed what were considered evangelical preachers. Rev. John P. Cowley was settled in 1833 and dismissed in 1834 ; Rev. Elijah Demond was pastor from 1836 to 1839 ; Rev. Willard M. Harding from 1840 to 1844 ; Rev. Alfred Goldsmith from 1845 to 1849 ; Rev. Henry Weeks from 1852 to 1855 ; Rev. William T. Briggs, 1856 to 1863 ; Rev. Mr. Zelig, 1864 to 1867 ; Rev. Roger M. Sargent, 1869 to 1871 ; Rev. George M. Howe, 1876 to 1884 ; Rev. A. L. Love, 1885 to 1887 ; and at present the church is supplied with Rev. Charles A. White. In 1817 a Baptist Society was organized by residents of the town and of Holden ; and in July, 1822, a church was formed, and in 1826 Rev. Elias Johnson became its pastor. In 1828 a small brick meeting-house was built a mile north of the centre of the town.

From 1830 to 1832 Rev. Appleton Morse supplied ; from 1832 to 1836 Rev. Nehemiah G. Lovel ; from 1837 to 1841 Rev. Mason Ball ; and from 1841 to 1844 Rev. Orlando Cunningham. During this time the society built a new meeting-house in the centre of the town, near the Congregational Church, but in 1844 this society, becoming much reduced in numbers and means, ceased to exist, and its place of worship was sold, and became a hotel, now known as the “ Prospect House.” In 1839 a Methodist Church was organized, and in 1840 a meeting-house was built one-fourth of a mile northwest of the centre of the town. This church has been since supplied by a regular series of pastors, changing often, according to the practice of that denomination. The formation of

<sup>1</sup> The preparation of this history of Princeton was Dr. Allen's last work. He was ably aided by his daughter, Annie Louise Allen, who completed some of his unfinished manuscripts.—EDITOR.

this society was much indebted to changes in another church organization. In 1817, upon the settlement of Rev. Samuel Clarke over the old Congregational Society, the main body of the church being dissatisfied with his preaching and doctrines, withdrew and formed a new church, called Presbyterian. In 1820 Rev. Alonzo Phillips was ordained its pastor and preached here with great acceptance till 1836. At this time, by the advice of a council, a formal union took place between the two churches, who had worshipped in separate houses for sixteen or seventeen years. Being dissatisfied with the result, quite a number of the leading families connected with Mr. Phillips' church joined in a movement for the formation of a Methodist Society and church in the town.

NAME.—Princeton bears an honorable name. Its first cognomen was the East Wing of Rutland. As early as 1686 certain Indians conveyed by deed to Hervey Willard and others a large tract of land twelve miles square, of which Rutland became the centre. From this tract several towns were formed, and the eastern part, comprising about 12,000 acres, was designated East Wing of Rutland. In 1759 the proprietors of this land petitioned the Legislature for incorporation, and it was proposed, as Rev. Thomas Prince was by far the largest proprietor, to call the place Prince-town. Rev. Thomas Prince, besides being associated pastor of the Old South Church, Boston, was the most distinguished writer of his day. In 1771, after other additions of land amounting to some eight thousand acres, had been annexed, the inhabitants petitioned that the town be called Princeton.

SETTLEMENT IN PRINCETON.—The first settlement was made in 1743 by Joshua Wilder, from Lancaster, which had then been settled one hundred years, and was the first place settled in Worcester County. Wilder built a block-house on land since known as the Houghton place and lived here several years, being the only family.

In 1750, Abijah Moore settled on land known as the Reed place, and about the same time a Mr. Cheever settled in the southern part of the town on land since known as the Cobb place. In 1751, Robert Keys settled on land at the easterly base of Wachusett Mountain, and soon after Oliver Davis settled in the western part of the town, known since as Clark Hill. In 1752 these five families were the only ones permanently located in the place, but after this new families came and gradually increased till 1759, when they numbered thirty. At this time there were seventy-four names attached to a petition for incorporation, but it is understood that more than one-half were single men seeking a settlement.

TERRITORY.—The exact amount of land contained in the East Wing of Rutland was eleven thousand six hundred and twenty-six acres. Along the northern boundary of this section there were three thousand acres of uncultivated land, known as the Watertown

Farms, taking this name from the fact that the General Court, for certain considerations, had conveyed to Watertown this strip of land, which was included in the act of incorporation. It seems, also, there was at the same time another large tract of land, not incorporated, called "Province land," which, with five hundred acres including the Wachusett Mountain, were annexed in 1771 to Princeton by the Legislature, amounting in all to about five thousand acres. In 1810 a strip of land—five hundred acres—was taken from Hubbardston, and in 1828 a grove of land called Notown, adjoining Leominster, were both annexed to Princeton. The whole area of land does not vary much from twenty-two thousand acres.

BOUNDARY.—The town is bounded north by Westminster; east by Leominster and Sterling; south by Holden and Rutland, and west by Hubbardston. It is seated nearly fifty miles from Boston due west, and is about the same distance east of Connecticut River, occupying the highest ground between these localities and constituting a water-shed, from whence the streams flow either to this river or the ocean. It is situated fourteen miles from Worcester, a little west of north, and only a few miles south of the centre of the county.

INDIAN HISTORY.—There is little to be said on this subject. The Indian history of the place is not characterized by so many striking incidents as some places. The Indians generally sought abodes on plain land easy of cultivation or bordering on ponds and rivers; hence Lancaster and the grounds around the Wachacum Pond in Sterling were places of frequent rendezvous. Reports state that they gathered occasionally in large numbers around Wachusett Mountain for hunting, but, with one exception, no depredations were committed upon the inhabitants here. It may be the tribe—the Nashaways—traversing this region were of a more peaceable disposition and had to some extent come under the favorable influence of the white population. A most noticeable event occurred here long before the place was settled, in the deliverance of Mrs. Rowlandson, taken in 1676 at the burning of Lancaster and carried away captive by the Indians. In another place a particular account of this event will be given, together with the report of the Indians stealing in 1775 a young child, by name Lucy Keyes, and carrying her away into captivity. It may be said that no Indians were ever seen by the settlers in this region.

SOIL AND PRODUCTIONS.—The most marked feature of the place is its rocks. These give shape and character to the land. Peter Whitney, in his history of the county in 1790, says, "the land here is naturally moist and springy, hilly and rocky, exceedingly well adapted to pasturage and the growth of English grass. The soil being rich and very productive, people have every encouragement to settle and cultivate the lands. The growth of wood is oak of the various kinds, chestnut, white ash, beech, black

birch and maple, together with some butternut and walnut."

**ROADS.**—On account of the rocks and hills the making of roads has been attended with great hardship and difficulty since the first settlement of the town. One of the first steps was to provide by legislation a land-tax for this purpose. There was also much trouble in agreeing on the location of roads by marked trees or otherwise, and, as a general thing, the roads were laid out two rods wide. There seemed to be a strong proclivity to lay out roads over the hills rather than on level ground or in the valleys, and when once made, any change was attended with much difficulty. For a hundred years or so, the roads were supported by what was called a "Highway tax," which could be worked out or paid in money, but now a direct appropriation is made for this purpose. The cost of building and taking care of roads has always been a large annual expenditure. On account of the hills and rocks the roads are constantly exposed by storms and drainage to injury, and require frequent repairs. But notwithstanding this great draft of expense and labor, the roads have been kept in remarkably good condition. Few towns in the State can present such roads, and in very few places can there be found so many pleasant and rural rides. Good roads are not only a great convenience for permanent residents, but are very desirable for strangers or summer company. In several instances the town has expended large sums of money in the construction and improvement of its roads, particularly upon the road from the centre to the railroad—also upon the one over the western part of Meeting-House Hill and again at the base of Wachusett Mountain.

**TOPOGRAPHY.**—Few towns are so diversified by hills, both large and small, of every description. In fact, the place is made up of rough and uneven land, without plains or valleys worthy of notice. It embraces a range of high lands starting with the White Mountains in New Hampshire, running southward and extending through Worcester County into the State of Connecticut. Wachusett is the highest peak in this range and the most attractive mountain in the State, of which a more particular description will be given in another place. The two next highest peaks are Pine Hill in the east, and Little Wachusett near the centre. The high range of land running north and south through the town constitutes a water-shed, so that the waters falling here divide and flow away by small streams in three directions. It will be seen that as no streams run into the town there can be found no large collections of water or much water-power. Thus, the rain falling in drops on the highest points of land, these immediately separate—a part flow into the Atlantic Ocean and a part into Long Island Sound. As these waters gather at the base of the mountain they are called Wachusett's Brooks—East, South and West—the first entering into the Nashua, the second into the Quinneboxet Pond, and thence

into the Blackstone River, and the West flows into the Ware River and thence into the Connecticut. There are two small ponds in the town—the Quinneboxet, in the southern part, on the boundary of Holden, and the Wachusett Pond, a part of which is in Westminster. On account of the great number of natural springs in the mountain and hills, the town has for all necessary purposes an abundance of the purest water.

**OLD HOMESTEADS—*Old Homes of the Early Settlers.***—There were some peculiarities in the settlement of this town which had an effect on the character of its people. The first settlers came here, not in colonies, nor in the way of relationship or acquaintance, but single and alone, and were mostly young men seeking a home of their own. They did not come in large numbers from any place, but came from almost as many different places as there were individuals. It is evident that the leading influences controlling them were of a decidedly religious character. A few came from places near by, as Lancaster, Shrewsbury and Rutland, but most of them came from a distance, as Sudbury, Medfield, Dedham, Watertown, Cambridge, Boston, Charlestown, Concord and Lexington. There was one element that entered largely into the character of these settlers. They must have had some knowledge of the place where they were to make their homes. Here were rocks, hills and forests unequaled at the time. The soil was rich, but required the hardest possible labor for its cultivation. To overcome such obstacles one must have indomitable courage and energy, a self-reliance and a will-power that never tires, and only those who had such qualities would here seek a home. The presumption is that these settlers knew what hardship, toil and self-denial were in their old homes.

**PUBLIC BUILDINGS—*Meeting-houses.***—In the settlement of all the New England towns one of the first steps to be taken was the building of a meeting-house. This was sometimes coupled with another question: Where was the centre of the town? It was generally admitted that their house of worship should stand near the centre of the place. It was not easy to find this spot in Princeton, on account of the hills and the rocks. There was so much difference of opinion on the subject that the voters agreed to submit the question to a committee of three persons, residing in other towns; but being dissatisfied with the report of their committee, they voted, July, 1761, to locate the meeting-house on the highest part of the land given by John and Caleb Mirick for this purpose. In 1762 a meeting-house was built, forty by fifty feet, with sufficient height for galleries. It was soon occupied, but not fully completed for several years. The first attempt to settle a minister was in 1765, and the one first settled was Rev. Timothy Fuller, in 1767. This house continued to be the place of worship till 1795. In the mean time the population had increased to over one thousand in-

habitants, rendering a larger place of worship necessary. A new house was built on the same spot, seventy by fifty-five feet, containing seventy-five ground and twenty gallery pews. As this house stood on high ground, and had a tall spire, it was a conspicuous object in the whole region. It continued to be the place of worship till 1838, when it seemed desirable, not only to have a new church, but to change its location—to go south—towards the Wachuset Hotel, about half way up on the slope of the hill. This house, built more in the modern style of churches, is still used, though within a few years it has been removed to the eastern side of the road.

*Town-Hall.*—The business meetings of the town

reception and dining rooms. It is admirably adapted, not only for town business, but for other purposes, such as lectures, concerts, exhibitions, etc.

There is a frequent demand for the hall for such purposes. A very correct view of this building is here presented.

*Goodnow Memorial Building.*—No town in the county or State can present a public building so conspicuous in position or so beautiful and attractive in its appearance. It is situated in the centre of the town, on the southern slope of what is known as "Meeting-house Hill," with a triangular tower in front, while on the right is the new Town Hall, and on the left stands the Congregationalist Church. We have here,

BAGG HALL.

GOODNOW MEMORIAL LIBRARY BUILDING.

were held in the church from 1762 to 1797, when, upon the building of a new meeting-house, the business was transferred to a school-house located near by, where it was continued till 1842. At this time a new building was erected for town business, at the foot of the hill, nearly opposite the new church, called "Boylston Hall," from the fact that W. N. Boylston contributed money for its erection. In 1882 this hall was destroyed by fire, and soon steps were taken for building a new town-hall. This was dedicated in September, 1887, and presents quite a contrast with the old hall. It is built of brick, two stories high, having a large hall on each floor, with kitchen,

side by side, in one row, the three representatives or pillars of the highest type of civilization—the church, the free school and library and the hall for town business. These public buildings stand on higher ground than any others of the kind in the State, while from these buildings a magnificent view of the country can be seen south, east and west; at the same time these edifices can be distinctly recognized at great distances in each of these directions. The Goodnow Memorial Building derives its name from Mr. Edward A. Goodnow, a native of Princeton, but for a long time a resident of Worcester. Some years since Mr. Goodnow conceived the idea of doing some-

thing for the permanent benefit of his native place, and at the same time connect with it a memorial of the loss of two wives—natives of the town—and also the loss of his only child. The beautiful building is the result of this design. This structure is pronounced, from every point of view, the perfection of beauty. No language can adequately describe the building or compute the importance and value of the uses to which it is appropriated.

Its object is education of the people of the town,—schools for the young, and a library and reading-room for all, in the broadest and freest sense.

MUNICIPAL OFFICERS FROM 1760 TO 1852—*Town Clerks*.—Dr. Zachariah Harvey, 1760–61; Caleb Mirick, 1762, '70–71; Samuel Woods, 1763; Peter Goodnow, 1764, '65, '67; Boaz Moore, 1766; Ephraim Woolson, 1768, '69, '72, '73, '75, '78; William Richardson, 1774; James Mirick, 1776–77; William Dodds, 1779–93, '97–1814; John Dana, 1794–96; Artemas How, 1815–18; Jonas Hartwell, 1819–20; Erasmus D. Goodnow, 1836; Charles Russell, 1821–35, '37–49; David H. Gregory, 1850–52.

*Selectmen*.—Peter Goodnow, 1760, '64, '65, '67; Abijah Moore, 1760, '61, '63; Dr. Zachariah Harvey, 1760–61; Joseph Gibbs, 1760, '61, '63, '67, '68, '70; Timothy Moseman, 1761–62; Eliphalet How, 1762; Boaz Moore, 1762, '63, '66, '70–72, '78, '81–92; Robert Keyes, 1762; Caleb Mirick, 1762, '70, '71, 1808, '09; Ebenezer Jones, 1763, '66–72, '74–76; Samuel Woods, 1763; Benjamin Holden, 1764, '69, '73, '80–82, '90, '91; Stephen Brigham, 1764, '65, '68, '71, '75–77; Tilly Littlejohns, 1764; William Muzzey, 1764, '69; Sadey Mason, 1765, '66, '78–91; William Thompson, 1765, '66, '72–77; Benjamin Taynter, 1765, '67; Robert Cowden, 1766; Oliver Davis, 1767; Ephraim Woolson, 1768, '69, '72, '73, '75, '78; Adonijah Howe, 1768, '76, '77, '79, 1818; Joseph Sargent, 1769, '70, '78, '82–85, 1807, '08; James Mirick, 1771, '76, '77; James Phelps, 1772; Paul Mathews, 1773–80; Joseph Eveleth, 1773, '75, '81, '85, 1809; William Richardson, 1774; Charles Brooks, 1774, '80; Elisha Hobbs, 1777, '79, '94, '95; Samuel Hastings, 1778, 1810–12; Ephraim Hartwell, 1779; Abraham Gale, 1779; John Mirick, 1780; Asa Whitcomb, 1781; William Dodds, 1783–93, '96, 1807; Abner How, 1786–89; Ebenezer Parker, 1786–92, '96, '98, 1804, '05; Abijah Harrington, 1792, '93, '96, '97; Ephraim Mirick, 1792, '93; Isaac Hartwell, 1793–95; David Rice, 1793–1800, '04–07; John Dana, 1794, '95, 1801–09; John Watson, 1794, '95; Jonas Beaman, 1796–99; Andrew Whitney, 1798–1800, '04, '06; Samuel Dadman, 1799–1802; Ephraim Wilson, 1800–03; Amos Meriam, 1801–03, '23–29; Bartholomew Cheever, 1803; Simon Davis, 1803–09; Samuel Stratton, 1808, '09; Joseph Eveleth, 1810–12; Charles Mirick, 1810–12; Benjamin Harrington, 1810; Artemas How, 1810–15; Jonas Brooks, 1811–14; Samuel Stevenson, 1813–17; Jonas Hartwell, 1813–20; Samuel Brooks, 1813; Israel How, Jr., 1814, '16, '20–22; William Everett,

1814, '15; Henry Prentiss, 1815; Calvin Bullock, 1716, '17; Azar Maynard, 1816; Jacob W. Watson, 1816–18, '28, '29, '36, '37, '49; Moses Hobbs, 1817, 18; Joseph Cutting, 1817, '18; Nahum Wilder, 1818; Israel Howe, 1819, '20; Joshua Temple, 1819; Thomas Wilder, 1819; Moses Bullard, 1819–22; John Mirick, Jr., 1820–21; Clark Mirick, 1820–22; Joseph Mason, 1821, '27, '30, '36; Ephraim Mirick, Jr., 1822–27; John H. Brooks, 1823, '29, '36; Moses G. Cheever, 1823, '28, '30–31; Gamaliel Beaman, 1828–29; Ebenezer Parker, Jr., 1829; Rufus Davis, 1830–32; John Whitney, 1830–35; Israel Everett, 1830–33, '40–42; Enoch Brooks, 1831–33; Caleb Dana, 1832–34, '37, '38; Harlow Skinner, 1834–36; Nathan Meriam, 1834–35; Joshua T. Everett, 1834–35; Daniel Parker, 1835, '45; Alfred Beaman, 1836–37; Sewall Mirick, 1837–38; John L. Boylston, 1837–39; William How, 1838–39; John Brooks, 1838, '45, '47, '48; Henry Boyles, 1839–41, '49, '50; Jonas Brooks, Jr., 1839–41; Edward A. Goodnow, 1840–41; Erasmus D. Goodnow, 1842–43; Alphonso Brooks, 1843, '44, '46, '47; Chas. Russell, 1844–46; David H. Gregory, 1846–48; Ebenezer Smith, 1848–49; Asa H. Goddard, 1850–51; Solon S. Hastings, 1850–51; William H. Brown, 1851–52; Charles A. Mirick, 1852; George O. Skinner, 1852.

*Assessors*.—Zachariah Harvey, 1761; Abijah Moore, 1761; Peter Goodnow, 1761; Joseph Eveleth, 1762–64, '67; Boaz Moore, 1762, '63, '70–72, '87; Caleb Mirick, 1762; Samuel Woods, 1763, '64, '67, '70, '72, '73, '75, '76, '78, '79, '83, '84; Thomas Mason, 1764, '66, '68, '69, '71, '73, '76–81, '85, '86, '94–99; Robert Cowden, 1765; William Muzzey, 1765, '66, '68, '69; Adonijah Howe, 1767; Ebenezer Jones, 1768; Joseph Sargent, 1769–70; James Mirick, 1771; John Jones, 1772, '74, '75; Benjamin Holden, 1773; Enoch Brooks, 1774–78; William Richardson, 1774; William Dodds, 1777, '80–93, '95–1809; James Curtis, 1779–80; Humphrey Moore, 1781, '88–90; Ephraim Hartwell, 1782; Ebenezer Parker, 1782–93, '96–1805; Michael Gill, 1791; David Rice, 1792, '93, 1806–09, '18, '19; John Dana, 1794, 1802–09; Timothy Fuller, 1794–95; John Roper, 1800–01; John Moore, 1810–11; Joseph Mason, 1810–13, '21–26, '30; Artemas How, 1810–19; Jonas Hartwell, 1812–20; Samuel Stevenson, 1814–17; Moses Hobbs, 1820, '23; Ephraim Mirick, 1820–26; Charles Mirick, 1824; Amos Meriam, 1825–29; Ephraim Mirick, (2d), 1827; John Whitney, 1827–29, '32–35, '37–39, '44, '45; Jacob W. Watson, 1828–29; Moses G. Cheever, 1830, '31, '36; Rufus Davis, 1830–32, '48, '50; Israel Everett, 1832, '33, '37–39, '44, 50; Harlow Skinner, 1833–34; Joshua T. Everett, 1834–35; Nathan Meriam, 1835; Hamilton Wilson, 1836–39; William S. Everett, 1836; John Brooks, 1840, '41, '50; Joseph Meriam, 1840–43; Caleb Dana, 1840; Charles B. Temple, 1841–44; Joseph Hartwell, 1842–43; Asa H. Goddard, 1845–47; Marshall Meriam, 1845; Caleb S. Mirick, 1846–48; George O. Skinner, 1846–

47; Ephraim Beaman, 1847; Phineas E. Gregory, 1848; Jonas Brooks, Jr., 1849; Frederick Parker, 1849, '51, '52; William D. Cheever, 1849, '51, '52; Henry Boyles, 1851; Joseph Whitcomb, 1852.

*Town Treasurers.*—Peter Goodnow, 1761; James Mirick, 1762-63; Timothy Keyes, 1764-45; Sadey Mason, 1766; Joseph Sargent, 1767, '70, '71; Abner Howe, 1768-69; Joseph Eveleth, 1772-73; Robert Cowden, 1774-77; Charles Brooks, 1778; Joseph Haynes, 1779; Enoch Brooks, 1780-1812, '14-16; David Rice, 1813; Benjamin Harrington, 1817-21; Thomas Wilder, 1822; Jacob W. Watson, 1823-24; Jonas Brooks, 1825, '33; Charles Mirick, 1826, '32; Moses G. Cheever, 1827-30, '42; John Brooks, 1831; Jacob W. Watson, 1834-36; Joseph Mason, 1837-41; Daniel Howe, 1843-44; Alphonso Brooks, 1845-48; Warren Patridge, 1849; Joseph A. Read, 1850-52.

*Representatives.*—Moses Gill, 1780, '84, '95; Asa Whitcomb, 1783; Ebenezer Parker, 1797, '98, 1800; David Rice, 1801, '02, '13-18, '21; John Dana, 1804, '05, '12; William Dodds, 1806, '08-11; Ephraim Mirick, Jr., 1823; Charles Russell, 1826-32; Joshua T. Everett, 1833-35; Jonathan Whitney, 1834; John Brooks, 1835-36; John Whitney, 1836; Alphonso Brooks, 1838; Sewall Mirick, 1839-45; Ebenezer Parker, 1840-42; Israel Everett, 1843-44; Caleb S. Mirick, 1847; Henry Boyles, 1848; Ebenezer Smith, 1849; Ephraim Beaman, 1850; Luther Crawford, 1851.

**LIBRARIES.**—One of the first public libraries established in Worcester County was in Princeton. In 1793 Peter Whitney, in his history of this county, states that in Princeton they have a "very handsome social library established, of the value of seventy pounds," called the "Gill Library," from the fact that he gave ten pounds towards it. This library contained some five hundred volumes, and was owned by stockholders; and outsiders paid a small tax for the use of books. This library gradually ran down for want of care, patronage and by the loss of books, and was burnt up in 1813.

In 1859 the Ladies' Reading Society started a social library, which steadily increased in numbers and interest until 1884, when they had one thousand one hundred and twenty-six volumes. At this time the Goodnow Memorial Building was completed and its library-room opened. There were two other small libraries in the town at this time,—an Agricultural Library of seventy-eight volumes, and a Law Library of four hundred and forty-eight volumes,—these three libraries were united and placed in the hands of a Board of Trustees, constituting the Free Public Library of the town. By a legacy left by Mr. Goodnow, it is stipulated that fifty dollars be paid every year to this Board of Trustees for the benefit of this library, provided the town itself appropriates annually the same amount for this purpose. This library is free to all permanent residents of the town, but a small amount is required of non-residents. The

Board of Trustees are required to make a report every year of their doings and of the condition of the library. A neat catalogue of the library has been published, making a classification of the books into twelve divisions, according to their subjects. This arrangement aids very much in the selection of books and the report made in February, 1888, represents the whole number of books in the library as two thousand three hundred and forty-seven volumes.

**HISTORIES OF PRINCETON.**—The first sketch of the town appeared in Rev. Peter Whitney's "History of Worcester County" in 1793, in which all the towns of the county were alike noticed. The first regular "History of Princeton" was published in 1833, written by Charles Theodore Russell, a native of the place, but for many years a resident of Boston. A careful account of the early history of the town is given, but considerably more than one-half of the work is taken up with its ecclesiastical affairs, parts of which were thought by some to be one-sided, which proved a stimulus for another history of the town. This was written by Rev. Mr. Hannaford and published in 1852. While this history covers the same ground as the other, it is largely given up to the religious history of the place, and in this way incurs the same objection as the other. We find many facts related in one which are not found in the other.

In 1859 a centennial celebration of the incorporation of the town was held, at which many items of great interest were brought out. The principal address on this occasion was given by Hon. Charles T. Russell, of Boston, followed by a poem from Professor Erasmus Everett, of Brooklyn, N. Y. Speeches were made by a large number of individuals, natives of the town, narrating many interesting facts in the history of the place. There is another medium by which the town has become extensively known to the public. In the course of twenty or thirty years great numbers have made the place a summer resort for a longer or shorter period, and have furnished the press with communications, describing the peculiarities and beauties of the town. By this and other means probably no rural town in the State has become so well known to the public as Princeton.

**BUSINESS.**—The business of the place is almost exclusively agricultural. Whitney, the historian of the county in 1793, says "the land is naturally moist and springy, hilly and rocky, exceedingly well adapted to pasturage and the growth of English grass; hence, the finest of beef is fattened here, and vast quantities of butter and cheese are produced in the town." This statement was made nearly one hundred years ago, and the soil remains the same. Fattening cattle for the market and raising good stock have always been a primary business; but, instead of making butter and cheese in excess for home use, the milk is now disposed of for use in the city. There has never been much manufacturing or me-

anical business done in the place. In 1750 Oliver was settled in the western part of the town, and built a saw-mill, which was the first application of water-power in the vicinity to mechanical purposes. A grist-mill was soon afterwards built upon the same stream, now called Ware River. A small settlement has grown up in the same place, called "Slab City;" but the water-power is small and not permanent. In the eastern part of the town there started some fifty years ago quite a business in chair-making, which flourished for a while; but the water-power is small, and, with other changes, this business is continued in a moderate way. This place has been known as "East Princeton," and a post-office has been established there. About a mile south of this village there was built a small cotton factory, which was run a few years by Benthall; but it was soon discontinued on account of the water-power being small, combined with several other causes. There was a short period when the straw business had quite a run, and the shoe business also became prominent, but both these industries flourished but a short time. The most important business of the town of late years has been the entertainment of "Summer Company," which will be described more fully in another article.

**REDEMPTION ROCK.**—This rock represents one of the most remarkable incidents that can be found in history. It will be seen in the narrative that the term "redemption" has here a meaning. In 1676, Lancaster, the oldest town in Worcester County, had a settlement of fifty families. King Philip, that distinguished Indian chieftain with fifteen hundred followers, on the 22d of February, early in the morning, assaulted this town, burning most of the houses and killing nearly all the inhabitants. A few women were spared, among whom was a Mrs. Rowlandson, the wife of the parish minister. The Indians carried her through the forests in a westerly direction, camping a short time at the foot of Wachusett Mountain. This is a most thrilling narrative Mrs. Rowlandson describes how she left this region and traveled with the Indians in the wilderness as far as the Connecticut River amidst sufferings and wanderings; and after spending some two months or so in this way, they returned to Wachusett. It seems the Indians gathered here in great numbers with the design of destroying other settlements in the vicinity of Lancaster. While they probably had several camps in the region, Mrs. Rowlandson describes the place where she was stationed—in a meadow or low ground near the mountain, and near some water. Tradition has fixed this locality near Everettville, on the west side of the road, between the pond and base of the mountain. Here was a gigantic boulder, which has long been designated as "Redemption Rock," from the fact that around this rock the council of Indians was held whereby Mrs. Rowlandson was redeemed from her captivity. Mrs. Rowlandson, in her narra-

tive describing her return from her winter wandering, says: "As we came to Wachusett through a great swamp, up to our knees in mud and water, having indeed my life, but little spirit, Philip came to me and took me by the hand and said, 'Two weeks more and you will be mistress again.' I asked him if he spoke true; he answered 'Yes, and quickly you shall come to your master again.'" It would seem by this that Philip had some idea of her being redeemed and returned to her friends. Mrs. Rowlandson does not state just how long she remained here, but probably some weeks. The Indians, while she was here, made an attack on Sudbury, as she describes their pow-wow preliminary to the assault. It seems that not far distant from the mountain they built a great wigwam, big enough to hold a hundred Indians, which was done in preparation for a great day of dancing. They came in from all quarters to the merry dancing day. Not only was King Philip present with his captives, but several others of the leading sagamores, and among them Quinnapin, the master of Mrs. Rowlandson, and his wife, the celebrated squaw sachem Matamoo, "Queen of Pocasset," "a severe and proud dame," says Mrs. Rowlandson, "bestowing every day in dressing herself nearly as much time as any of the gentry of the land, powdering her hair and painting her face." At this time there were certain Indians partially civilized and friendly to the whites passing through the forests between the Indian camps and the English settlements, so that news of Mrs. Rowlandson's return to this region had been communicated to some of the leaders in other settlements.

As a sequel, Mr. John Hoar, a well-known citizen of Concord, either was deputized or went of his own accord to visit the Indians here with reference to the release of Mrs. Rowlandson. The diplomatic interview carried on between the two parties developed some curious features. "In the morning," says Mrs. Rowlandson, "Mr. Hoar invited the sagamores to dinner; but when we went to get it ready, we found they had stolen the greater part of the provisions Mr. Hoar had brought; and we may see the wonderful power of God, in that our passage, when there was such a number of them together and so greedy of a little good food, and no other English present but Mr. Hoar and myself, that it was a wonder they did not knock us on the head and take what we had." In order to conciliate the Indians, or their leaders, Mr. Hoar brought something else besides provisions. Just what all the diplomatic proceedings were between Mr. Hoar and these Indians we have no means of knowing. It has been stated that one Quinnapin was called her "master," who might be supposed to take a prominent part in the business. Mrs. Rowlandson states that "Mr. Hoar was obliged to conciliate the royal Quinnapin with a pint of rum, upon which he at once became beastly drunk." Without being made acquainted with the details of this negotiation, it is sufficient to know that Mr.

Hoar succeeded in obtaining the release of Mrs. Rowlandson and her return to Lancaster. In the summer of 1880, Hon. George F. Hoar, of Worcester, who is a descendant of John Hoar, of Concord, in the fifth generation, purchased about half an acre of land, in the centre of which "Redemption Rock" is located. This rock is situated about sixty feet south of the highway and rises in the rear some twelve feet above the level of the ground. Upon this part of the rock these words are engraved in clear letters: "Upon this rock, May 2, 1676, was made the agreement for the release of Mrs. Mary Rowlandson, of Lancaster, between the Indians and John Hoar, of Concord. King Philip was with the Indians, but refused his consent."

**POPULATION.**—At its incorporation in 1759, with 30 families, the whole number of inhabitants, as the families were young, did not probably much exceed 100 persons. The first census taken was in 1790, when the population was 1016. This shows a handsome increase in thirty years, considering that the whole business of the place was farming. But for the next ten years the increase was only 5, the census reporting 1025; and for the next ten years the increase was small, the census being 1067; but after that we find a larger increase: 1820, 1261; 1830, 1346; and 1840, 1347. This increase was undoubtedly occasioned by the introduction of two new kinds of business—chair-making and shoe manufactures. As these declined we find the population decreasing, as the census shows: 1850, 1318; 1860, 1201; 1870, 1279; but in 1875 it was only 1063; and in 1885, 1038. By these figures the population assumes a stationary state, as the business is confined almost exclusively to farming. Aside from the farm, the only permanent business which is likely to increase is the entertainment of summer company, but this has not much effect in the increase of population. It is possible that there may be a larger foreign element coming in to engage in farming, which would gradually increase the population. If there are many young people in the American families, it is pretty certain that they will leave for the city or go West or South. Thus, taking all things into account, it would look as though the population of Princeton might remain in a stationary state for a long time.

**SCHOOLS.**—The first settlers were so scattered that they could not unite in supporting a school, but the parents taught their children in their houses. The first school opened was in 1762, and was kept at the place formerly known as Captain Nahum Wilder's. This school was taught by Mr. Samuel Woods, who became famous in the town as a teacher, and was called "Master Woods." The first appropriation for schools was in 1764, and was only six pounds, or twenty-seven dollars; but this appropriation was steadily increased till 1769, when the town was divided into six school districts. These districts contained the following number of families: The First

District had 36; the Second District, 20; the Third District, 10; the Fourth District, 18; the Fifth District, 14; and the Sixth District, 21. This makes 133 families, showing a rapid increase in ten years, from 1759 to 1769, when there were only some 30 families. But no school-houses were built till 1773, when the town commenced building a school-house in each district. These houses were occupied till 1792, when some changes were made in the number of districts and it was decided to build new houses, though not completed till 1797. These houses continued till 1836, when they were rebuilt, most of them with brick.

**EDUCATION.**—Aside from the common schools, there are other modes of applying the term education to a people. One test is the average intelligence of a people. While the exact knowledge of every individual cannot be measured, neither can the intelligence of one community easily be compared with that of another, we believe that the great mass of the inhabitants of the town will compare favorably with those of other places.

In fact, from the fine physical organization of this people, as well as from living in the healthiest region to be found, they should have advanced to a higher education. There is another test: the proportional number of teachers to the population of the place. This class in Princeton has always been large. It has not only supplied the town with most of its teachers, but every year sent out a goodly number to other places. Many have inherited the right kind of qualities to make good teachers, viz.: energy and talent, with ambition and love of power. It is not merely temporary teaching, but permanent, making a profession or business of it. There is another test—that is, the number of college graduates. It has been maintained that those towns having a permanent classical school send relatively a larger number to college, but the comparison should be made with a population similarly situated, that is, a country town made up mainly with a plain and hard-working farming people.

#### EDUCATED MEN FROM PRINCETON.

Names.	College.

Harris H. Wilder.....	Amherst
Harry Beaman.....	Harvard

Leonard Wood and Thomas Mason were the first college graduates from the town. They belonged to the class of 1796 (Harvard), Leonard Wood being valedictorian and Thomas Mason the greatest wrestler, thus showing that one excelled in mental power, and the other in physical.

**REVOLUTION.**—The town records show that its inhabitants took a very lively and active part in the great work of the Revolution. As early as in 1768, at a public town-meeting, the voters denounced the act of Parliament imposing duties on paper, glass, painters' colors and tea imported into the colonies. When, in January, 1773, the grievances under which they labored from British rule came up for discussion in a public meeting, the subject was referred to a committee to draw up an expression of their views. Dr. Ephraim Woolson was chairman of this committee, and the following resolutions furnish abundant evidence that he was a complete master of his subject.

*Resolved*, 1. That the connection between the mother-country and these colonies is of great consequence to both, if mutually kept up; but when digressions are made from established compacts, that connection begins to lessen, and, of course, creates an alienation, the effects of which must be attended with bad consequences. For the resolute man, in a just cause, while in a state of freedom, never will consent to any abridgements or deprivations of his just rights, and disdains threats, or any measures of compulsion, to submission thereto—not like the dog, the more he is beaten the more he fawns—but, on the contrary, with a noble mind, defends to the last, and every stripe stimulates his efforts and endeavors in defence of his own or his country's cause.

2. That this town, as a part of this province, whensoever their rights, liberties and properties are infringed upon, by what authority soever, that they, in honor to their forefathers, by whose solicitude and industry, under God, they for many years have enjoyed the fruits of their labors—for the regard they bear to posterity—as friends to their country have good right to complain, and manifest their uneasiness at such proceedings.

3. That the repeated attempts to make the people of this province subject to unjust taxation, and absolute dependency upon the crown together, appear subversive of, and inconsistent with, the constitution of a free people.

4. That such measures are unconstitutional, and demand the attention of all well-disposed people, and a mutual connection and joint adherence in proper means for redress, that thereby the rights and liberties, civil and religious, which have been transmitted to us from our illustrious ancestors, might be kept inviolate by us, their posterity.

5. That they shall be always ready to concur in all just and proper means that this province and the neighboring colonies may come into for the common good, and in conjunction with the friends of liberty, shall bear testimony to all invasions upon our rights and liberties.

6. That this report (these resolutions) be put upon the town records, that posterity may know they had a sense of their invaluable rights and liberties, and were not willing to part with them but by their own consent, and that they are determined to vindicate and support them, as times and occasions may call for.

The above resolutions were unanimously adopted as the sense of the town. It should be borne in mind

that this action took place some time before the war broke out.

It is related that when word reached the place that a band of the King's troops had made an excursion up the Mystic River and carried off a quantity of gunpowder from the Charlestown Arsenal, it thoroughly aroused the inhabitants, and they spent the night in converting pewter plates into musket-balls. In March, 1775, a company of minute-men was formed, and ordered to train once a week. On the 19th of April an express came to the town shouting, "To arms! the war is begun." As the news spread, the implements of husbandry were thrown aside in the field, and this company seized their arms and started at once for Lexington and Concord. The records of the town from 1775 to 1783 furnish the strongest possible evidence of the sagacity, energy, boldness and self-sacrificing spirit of its citizens in all matters pertaining to carrying on the war. No town in the State can show a better record in furnishing soldiers or providing means for this purpose.

**PRINCETON AS A HEALTH RESORT.**—The three great natural sources of health are pure air, pure water and a pure soil. Where, then, can pure air be found? Certainly not about cities, or villages, or low ground; generally, in such places the air is more or less contaminated with poisonous gases or effluvia arising from sewers, from accumulation of filth, from decomposition of animal and vegetable matter, etc., while about mechanical and manufacturing places the air is vitiated by steam, by smoke, by chemical, mechanical and other impurities. Then, the air passing over a thin or sandy soil, with few trees, becomes parched or dry, while that along the rivers and about large bodies of water is too moist or damp. On the other hand, the air on high mountains is too bracing and changeable for weak lungs and cannot be favorable to good health in any class of persons. Where, then, can the best air be found? It must be upon high ground, sufficiently elevated above the surrounding country to obtain generally a fresh breeze from the four points of the compass. At the same time the ground should not be level, but so interrupted by hill and valley as to cause not only frequent changes in the circulation, but that the whole surface should be so undulating as to be thoroughly drained and frequently washed by the showers of heaven. The earth itself should not be too rich or highly cultivated, must not all be open land, nor all covered with woods, but always green with vegetation and dotted here and there with trees. The description here given applies pre-eminently to this town. I venture the opinion that there is no region or spot in New England where the atmosphere, in quantity, purity, perhaps in all life-giving properties, can be found so well adapted in every respect for comfort, health and longevity as in this place.

The next agent most productive of health is pure water. Its virtue does not arise so much from its use

as a beverage as for culinary purposes. Here it is used in a variety of ways, combining with almost every kind of food cooked. In this way it has a powerful influence upon the human system, either for good or evil. As its immediate effects are not so perceptible as some other agents, so in a quiet, gradual manner, comparatively unseen and unfelt, its bad effects became more destructive and fatal. Many diseases can be traced directly to its impurities, and others indirectly; while, if we could go back and analyze all the primary and occult causes in producing diseases and derangement of the system, we should be surprised at the great number of diseases produced from impure water.

There are certain conditions connected with the earth which are indispensable for securing the best quality of water. It must come from natural springs suitably located in the ground, where it may be found in abundance and at the same time be fed alone from the rains from the heavens. While the soil should be good—but not too rich—it must not be composed of a clay or lime formation. The rocks should be granite or hard, not soft, nor composed of mineral substances, where, by the laws of chemical affinity, the least particle of matter, mineral or gaseous, can become mixed with the water. Neither should there be any decaying animal or vegetable matter upon the surface of the ground or imbedded in it, with which the water can come in contact. It will be seen at once that it is very difficult to find all these conditions combined in one place. But here nature has provided springs or fountains of water, with the means of purifying it, far better than can be furnished by artificial reservoirs, and expedients for filtering it that can be devised by human skill and ingenuity. Nowhere else can water in quantity, purity and health-giving properties be found equal to that found here.

*Pure Soil.*—This as a condition of health may not seem so important as that of pure air and pure water. In fact, the two latter cannot be found in their best state unless the earth itself is of the right quality. This must be composed of just such materials as make up every part and parcel of this rocky, hilly town. It is said there is not an acre of level ground by itself in the place. There are no swamps and scarcely any decaying animal or vegetable matter. The whole structure of the earth is here made up largely of rocks of the hardest kind, which never breed disease. There are other considerations favorable to health, both of body and mind. These are the stillness and quiet of the place, pleasant rides over fine roads, grand opportunities for exercise by walking amid beautiful scenery, and Wachusett Mountain adds greatly to the advantages and attractions of the place, especially with reference to health and recreation. Such are the relations between the body and the mind that, in order to secure the highest state of health, the proper exercise of both must

be taken into account. Pure air, pure water and a pure soil are conditions indispensable for the sanitation of the body, but mental development, improvement and enjoyment require something more. This, in part, is obtained by observing and studying the beauties of nature, in such scenery as this town affords. No town in the State can excel this in the variety, beauty and extent of its scenery. This last condition adds greatly to the merits and attractions of the place as a health resort.

**FIRST TOWN-MEETING.**—The following officers were chosen at the first regular town-meeting, March 16, 1761: Moderator, Dr. Zachariah Harvey; Clerk, Dr. Zachariah Harvey; Selectmen, Dr. Zachariah Harvey, Joseph Gibbs, Abijah Moore and Timothy Moseman; Assessors, Dr. Zachariah Harvey, Abijah Moore and Peter Goodnow; Treasurer, Peter Goodnow; Constables, Caleb Mirick and Sadey Mason; Tythingmen, Samuel Nichols and Joseph Rugg; Highway Surveyors, Paul Mathews, Silas Whitney, Stephen Brigham, Tilly Littlejohn and Timothy Keyes; Clerks of the Market, Samuel Hashu and Timothy Keyes; Fence-Viewers, Samuel Hastings and Amos Spring; Field-Drivers, James Mirick and Oliver Davis; Deer-Reeves, Robert Cowden and Edward Wilson; Hog-Reeves, Amos Powers and Samuel Hastings; Surveyor of Boards and Shingles, Sealer of Leather, Stephen Brigham; Wardens, Peter Goodnow and Timothy Moseman; Agent to the General Court, Dr. Zachariah Harvey.

A list of these officers is here presented partly for instruction and partly from curiosity. One, a physician, is chosen to five of the most important offices. Twenty other men are chosen to office, making full one-half of all the heads of families.

In 1759 there were only thirty-one voters, but in 1771 they had increased to one hundred voters. In 1791, when the first census was taken, there were one hundred and forty-four dwelling-houses and one thousand and sixteen inhabitants, all within fifty years, showing a rapid increase.

#### PERSONAL AND FAMILY HISTORY.

MOSES GILL was born in Charlestown in 1733, and engaged early in mercantile pursuits in Boston. In 1759 he married Miss Sarah Prince, the only surviving daughter of Rev. Thomas Prince, then pastor of the Old South Church. In 1767 he took up his residence in Princeton, where he inherited from the Prince estate some three thousand acres of land. Here he held important offices, both in the town and the State. Mr. Gill was the first Representative of the town in the Provincial Congress held at Watertown, and of the General Court at Salem in 1774 and 1775. He was a member of the Legislature up to 1780, when he was elevated to the Senate Board, remaining there till 1789. In 1794 he was chosen Lieutenant-Governor, and was annually re-elected, and upon the death of Governor Strong in May, 1800,

Simon S. Hastings

Mr. Gill officiated as Governor till the close of the year. He died May 20, 1800, while holding the office of Lieutenant-Governor. Aside from these offices he was appointed, in 1775, judge of the Court of Common Pleas for Worcester County, which office he held till 1789, when he was transferred to the Governor's Council.

Mr. Gill lost his first wife in 1769, and in 1772 he married Rebecca Boylston, niece of Thomas Boylston and sister of Mrs. Mary Hallowell, mother of Ward Nicholas Boylston. This marriage formed the link between these two families.

In his "History of Princeton" C. T. Russell says of Mr. Gill, "Throughout his whole life he maintained the character of an upright man, a firm, uncompromising patriot, a devoted husband, a liberal townsman, an exemplary public officer, and a consistent Christian."

**WARD N. BOYLSTON.**—His original name was Ward Hallowell, son of Benjamin Hallowell, and born in Boston, November, 1749. His mother was a sister of Thomas Boylston, and at the solicitation of his maternal uncle, Nicholas Boylston, the distinguished benefactor of Harvard University, he dropped the name Hallowell and added that of his uncle. His full name was known afterwards as Ward Nicholas Boylston. In 1773 he visited Europe for his health, and from 1775 to 1800 he resided in London, engaged in trade. In 1800 he returned to Boston and purchased the estate in Princeton, where he resided summers until his decease in 1827. This place had become famous in this region for its size (three thousand acres), its large and splendid buildings, as well as the high cultivation of its land. Whitney, in his "History of Worcester County in 1793," says at that time, "It is not paralleled by any in the New England States, and perhaps not by any on this side of Delaware." Mr. Boylston spent his winters at Jamaica Plain, Roxbury, where he possessed a beautiful situation. While in Princeton he lived in a princely style, and was remarkable for his politeness to all with whom he came in contact. He possessed an unusual amount of intelligence and liberality in his benefactions.

While residing in London he became familiarly acquainted with the celebrated Dr. John Hunter, and having had two uncles in this country distinguished members of the medical profession, he became greatly interested in all matters pertaining to medicine. For this purpose he made several handsome donations to Harvard University, so that the name Boylston is honored, being attached to a medical library, an anatomical museum, a medical society, and prize medals for essays to improve medical science. Thus it was said, "He has done more towards raising the standard of the medical profession in this Commonwealth than all others of the profession."

**TIMOTHY FULLER** was the first minister of Princeton. He was born in Middlesex, near Salem, in 1738,

and graduated at Cambridge in 1760. He was settled in Princeton in 1767, and became a conspicuous character in the history of the town.

In 1774 and '75 there arose a sharp variance of feeling and opinion between him and his people. A bitter controversy ensued. He was charged with neglect of pastoral duties and Toryism, which he indignantly denied. There was fault on both sides, each being positive, self-willed and determined. Mr. Fuller was dismissed and left the town in 1776. But after awhile he returned and spent several years there. In 1788 he represented the town in the convention which adopted the Federal Constitution. In 1796 he removed to Merrimac, N. H., and engaged in agricultural pursuits, where he died in 1805. One of the peculiar incidents of Mr. Fuller's residence in Princeton was that he became the first owner of Wachusett Hill, which previously was Province land.

The General Court, in 1768, upon Mr. Fuller's petition setting forth a small salary and hard getting along in the ministry, passed an act giving the mountain, containing five hundred acres, to him. Mr. Fuller married, in 1770, Sarah Williams, daughter of Rev. Mr. Williams, minister of Sandwich, and was the head of a venerable family, several of his children being born in Princeton. Timothy Fuller, his oldest son, formerly a resident of Groton, was a member of Congress and the father of Margaret Fuller, one of the most remarkable women this country ever produced. H. H. Fuller, another son, became a distinguished attorney in Boston. Other descendants of Rev. Timothy Fuller have made their mark in the world.

**SAMUEL WOODS.**—From the best authorities known, he came from Chelmsford, and became a resident here about the time of the incorporation of Princeton in 1759. Soon after this he opened the first public school in the town near the Wilder place. He became known as "Master Woods," and was the head of a most distinguished family. From the little incidents known about him, it is evident he possessed a brain of remarkable power. As he was noted for his originality, Governor Gill christened him with the name "Philosopher." His son, Leonard Woods, was born in 1774, and was graduated from Harvard College in 1796. He became one of the most distinguished preachers and writers in the country. He was graduated at the age of twenty-two, with the highest honors in the class. He was professor in the Andover Theological Seminary for years, and his writings on theology and other subjects are well known. He died August 24, 1856, in his eighty-first year, from heart-disease, brought on from over-exertion and heat.

**SOLOMON S. HASTINGS.**—The names of men who distinguish themselves for the possession of those qualities of character which in a large degree con-

tribute to the success of private life, who have been exemplary in the personal and social relations, thus winning respect and confidence, ought not to perish. Among the individuals of this class, few are better entitled to be held in respectful remembrance than the subject of this sketch.

Solon S., son of Stephen and Silence (Sawyer) Hastings, was born in Sterling, Mass., December 26, 1806. His father was an enterprising and successful farmer, and was one of the early members of the Worcester Agricultural Society, taking an active part in extending the benefits of the organization.

Solon passed his childhood and youth at the farmhouse, becoming familiar with the experiences and incidents peculiar to New England farm life, and, in fact, he remained there until the death of his father in 1840. His educational advantages were of the sort peculiar to the times, attending the district school in the winter months and working on the farm in the summer. He had, in addition to this, a course of instruction at the Leicester Academy, and in his early manhood engaged in teaching winter schools in his native town and vicinity, where, for twelve years, he was known as a successful teacher, frequently teaching for two terms in the same season in different districts. He also was a teacher in a private school in the city of Boston.

He has always been interested in agriculture, and in early life became a member of the same society in which his father was so prominent, as well as in other kindred organizations.

He was actively interested in military affairs, and held the offices of brigade and division inspector, with the rank of major in the brigade and lieutenant-colonel in the division.

In 1840 he married Lois R., daughter of Edward and Rebecca (Beaman) Goodnow, of Princeton, Mass., to which town he removed in 1841, and where he now resides.

He has held offices of trust and importance in both his native and adopted towns, and discharged the duties thereof with fidelity and intelligence.

For more than twenty-five years he has been a director in the Worcester Mutual Fire Insurance Company, the oldest institution of its kind in the county. In 1859 he was the Representative to the General Court for the towns of Princeton, Rutland and Oakham, and was also, in 1864, a member of the Senate of Massachusetts.

He held a clerkship in the Naval Office at Boston under Hon. Charles Hudson, and in 1850 and 1870 was engaged in taking the United States census for his section. He is of a naturally retiring disposition, conscientious and conservative in all his relations, whether religious, civil or financial.

He has always been much interested in educational matters, and a regular attendant upon and supporter of religious institutions.

During these later years, with comfortable leisure

at his command, he has alternated between town and country, spending his summers at his quiet home in Princeton, directly under the brow of "Old Wachusett" Mountain, and his winters in the neighboring city of Worcester.

He had two brothers,—Rufus, twelve years his senior (now deceased), and Aaron S., who died in childhood.

The family is of Danish origin, and has held prominent place in the history of England. In the early days of the British kingdom the Danes made frequent incursions upon that part of England and Scotland bordering on the North Sea. One of these incursions was made by a Danish chief of this family, who landed a large body of his men upon the coast and took possession of Sussex, and the castle and seaport were held by his family when William the Conqueror landed in England, and they held it from the crown for many generations. William de Hastings was steward of King Henry II. Sir Henry and George Hastings were grandsons of the Earl of Huntingdon.

The first of this family to come to America was Thomas, from whom Solon S. is in direct line. He settled in Watertown, Mass. (then known as a portion of the Massachusetts Bay Colony), in 1634.

For further detail see "Genealogical History of Descendants of Thomas Hastings," by Lydia Nelson (Hastings) Buckminster, published by Samuel G. Drake in 1866.

JOHN BROOKS was born in Princeton, February 22, 1789, being the ninth of fourteen children. His father was a master carpenter, and built fourteen meeting-houses; the son worked with his father till he was twenty-four years of age, and was a good mechanic. He went to Boston and was in the broker's business there, at the corner of State and Kilby Streets. The building in which his office was located is still standing. During or soon after the War of 1812 he went to Canada to buy Spanish dollars for the purpose of selling them again for the broker with whom he was in business. He thus earned the sobriquet of "Broker Brooks," by which name he was called for a long time.

He was married, in 1818, to Miss Sarah Braser, daughter of John Braser, of Franklin Street, Boston. He went to Princeton in 1824, and took the care of his father's farm and family, the farm being then worth eight hundred dollars, but now it is valued at twelve thousand dollars, the gain being due to the good management of the present owner, his son, John Brooks. He has served in all the offices of the town with the exception of that of town clerk, and has been Representative and Senator in the General Court. He was president of the Worcester Agricultural Society and a member of the State Board of Agriculture, also one of the founders of the Mutual Life Insurance Company of Worcester. He died in Princeton, at the home of his childhood, May 1, 1863. Resolutions were passed on the occasion of his death

*John Brooks*

*Nathan Allen*

by the Worcester Agricultural Society and the State Board of Agriculture, both testifying to his useful life as a citizen and a devoted patriot; to his cultivated mind, his courteous manners and his unswerving integrity, together with his ever-active and earnest labors for the advancements of the pursuits of husbandry. Rev. W. T. Briggs officiated at his funeral and testified to his high character and useful life, and showed that in the midst of life he was prepared for death, and was ready when the summons came to join that innumerable throng of which the poet Bryant so grandly sings.

**DOCTORS IN PRINCETON.**—Zachariah Harvey, Ephraim Woolson, Henry Bagg, Warren Patridge, Orville Brooks, — Titus, Henry Eldridge, Luther Allen, Martin Howe, — Brainard, Alphonso Brooks, Chandler Smith, Joseph O. West, W. H. Kelsey, R. H. Mansur.

**OTHER MEN OF NOTE.**—Edward Savage, born in the western part of the town 1761 and died in 1817, became a distinguished portrait-painter.

David Everett, born in 1770 and died in 1813, was a noted journalist and author. He was the author of those well-known school-boy verses, commencing,

"You'd scarce expect one of my age,  
To speak in public, on the stage."

**NATHAN ALLEN, M.D., LL.D.**—Nathan Allen was born at Princeton, Mass., April 25, 1813. His parents, Moses and Mehitabel (Oliver) Allen, were both born in Barre, in the same State. The Allen patronymic is borne by numerous families in the Old and New Worlds. That one with which Dr. Allen is identified is lineally descended from Walter Allen, one of the original proprietors of Old Newbury, in 1648, and who died at Charlestown, Mass., in 1673. The early years of Dr. Allen were spent on the paternal farm. There he was habituated to hard work till the age of seventeen, and consequently received one of the best kinds of preparation for future activities. After an absence of forty years,—ten of which were spent in continued studies and thirty in professional pursuits,—in delivering an address at an agricultural exhibition in his native place, which was published, Dr. Allen alluded to his early life as follows:

I wish here to make my public acknowledgments to that overruling Providence which ordered my birth and early training in this place, distinguished no less for intelligence and morality than for health and devotion to agricultural pursuits. The greatest gift that any human being can receive in this world is that of a sound constitution, which can come alone from parents perfectly healthy in body and mind. The next greatest blessing is that this constitution be early strengthened and developed in accordance with natural laws, while at the same time the mental habits and moral character receive proper training and right direction. To these blessings I confess the strongest possible obligations: first, to the Creator; second, to parents; and third, to the healthy educational and moral influences of this quiet rural town.

At the age of seventeen he commenced academical studies, and matriculating at Amherst College in 1832, he graduated from it in 1836. Having decided to study medicine, and wishing to avail him-

self of the best advantages in the country, he went to Philadelphia in the autumn of 1837. Here he pursued medical studies and attended lectures till the spring of 1841. During his residence in this city he had the entire charge for three years of the *American Phrenological Journal*, which proved, in many ways, a valuable experience. Here he learned some things respecting the use of the pen and the power of the press, and also to do his own thinking. He was also brought into contact with a variety of persons, some of them distinguished. Among these were Dr. Charles Caldwell, of Kentucky, the profoundest physiologist of his day; the Hon. Horace Mann, of Massachusetts, who, as an educator, has never been excelled; and also George Combe, Esq., of Edinburgh, unequaled as a practical philosopher. From correspondence and personal acquaintance with these men Dr. Allen acknowledges that he obtained most instructive lessons for future life.

In March, 1841, he received the diploma of M.D. from the Pennsylvania Medical College, upon which occasion he presented a thesis upon "The Connection of Mental Philosophy with Medicine." This essay was published in the *American Phrenological Journal* and in pamphlet form. It attracted much attention at the time and indicated the department of scientific investigation, in which he has since become distinguished.

In the autumn of 1841 Dr. Allen settled in Lowell, Mass., and from that time until his death, January 1, 1889, a period of nearly fifty years, he continued to be a most active and successful medical practitioner in that city. Soon after commencing medical practice Dr. Allen's attention was arrested by the great difference in the birth-rate between the native New England women and the English, the Irish, the Scotch, the Canadian French and the German; and also by the small number of children in a New England family compared to what it was fifty or a hundred years ago. From many years of study and observation he became convinced that the "arts of prevention and destruction" were not sufficient in all cases to account for this great difference in birth-rate, but that there must be some other primary cause—that there might exist some difference or change in the organization itself to account for it. This inquiry led to a wide range of studies, such as census and registration reports, works on population, vital statistics and obstetrics. His works were not confined to these matters, but he also published essays on physical culture and degeneracy, insanity and state medicine, heredity and hygiene, education and temperance, divorces and the family institution. There were over thirty publications of different kinds, and these were in quarterly journals and reviews, and were widely copied by the press, and some of them were published in Great Britain and commented on by distinguished scholars. In France and Germany his writings have also attracted attention.

The following is a list of the titles of the various pamphlets that have originated from his pen :

Title.	Pages
1. Connection of Mental Philosophy with Medicine.....	32
2. The Opium Trade between India and China.....	80
3. Law of Human Increase.....	58
4. Physical Culture in Amherst College.....	46

Octavo Pages.....	1026

Since this list was published, Dr. Allen has written several other papers, among which was "The Relations between Sanitary Science and the Medical Profession," written and read by him at the fourteenth annual meeting of the American Health Association, October 5, 1886, at Toronto, Canada, also the "Dedictory Address for the Goodnow Memorial Building" at Princeton, September 6, 1887. He was also skilled in genealogy and in local history, and at the time of his death was engaged upon a history of his native Princeton for the Worcester County history. In 1872 Dr. Allen visited Europe. He went as a delegate, commissioned by Governor Washburn, to the International Congress of Prison Reform. His reputation had preceded him, and secured a cordial welcome from eminent men in his own profession. In attending a large, public health meeting in London, presided over by Mr. Edwin Chadwick, being called upon to speak, he apologized, after making remarks, saying that he was a stranger, etc., whereupon several gentlemen assured him he was not a stranger, as his name was quite familiar to them by his writings.

During his forty-eight years' residence in Lowell Dr. Allen was always prominent in local and State affairs. He served on the School Committee in 1851, and in the Common Council in 1867, and was city physician in 1864 and '65. He was three terms on the Board of Health, and was at one time a nominee

for State Senator. He was a prominent member of the Massachusetts and the North Middlesex Medical Societies. He was secretary of the medical staff of St. John's Hospital for over twenty-five years, for over twenty years president of the City Institution for Savings, president of the Board of Physicians at the dispensary, president of the Amherst Alumni Association of Lowell, and not long since his *alma mater* conferred on him the degree of LL.D. In 1856 he was chosen by the Legislature a trustee of Amherst College, and took a leading part in establishing the department of physical culture in that institution. Dr. Edward Hitchcock, professor of hygiene in the college for over twenty-five years, pays Dr. Allen a high compliment, in which he calls him the god-father of this department.

In January, 1888, the Amherst Alumni Association, of Lowell, presented to the gymnasium a life-size oil portrait of Dr. Allen.

Dr. Allen was a member of the American Medical Association, the American Academy of Medicine, the American Public Health Association, the Massachusetts Medical Society, and was one of the founders of the American Social Science Association, and the National Conference of Charities, and frequently wrote papers and reports for those bodies.

Dr. Allen sustained concussion of the brain as the result of a serious fall at his home, December 16, 1888. By means of his vigorous constitution and great vitality he lingered in an unconscious condition for two weeks, but just at sunset, on the first day of the new year, he breathed his last, and we know that he has gone to his reward, and that he will long be "remembered by what he has done."<sup>1</sup>

SUMMER GUESTS OF HIDE AND SEEK TOWN.—Hide and Seek town, as Mrs. Helen Hunt Jackson so aptly christened the Princeton of to-day, is most charmingly described in a delightful sketch written by her for *Scribner's Monthly*, and published in August, 1876. In this sketch the real name was not revealed, and very likely it was this mysterious veiling of the town's identity that gave so much interest to it. But the summer guests whose good fortune it had already been to have traversed its hills and dales, and tasted of its delicious and invigorating air, recognized at once its alluring descriptions, and its quaint and truthful illustrations. Very likely this sketch did much in its way to advertise the town's attractions, and so increase its annual influx of summer guests. It is said that "the quiet hill town of forty years ago has become each season the popular New England summer Mecca for eight or nine hundred seekers of health, and pleasure." Although Princeton has long been known to the outside world as a healthy summer resort, it is only within the last fifteen or twenty years that it has become widely enough known to attract any large number of people.

<sup>1</sup> By Annie Louise Allen.

In the centre of the town the "Wachusett House" is the largest hotel, and also the oldest established; its proprietor and owner, Mr. P. A. Beaman, may be called the pioneer in the summer hotel business, having been connected with the Wachusett House for over thirty years. When he first took charge of the hotel it was simply a country tavern, probably an old-time "tavern-in-the-town," open all the year; but although having more guests in the summer, probably there were not more than one-tenth of the number who now annually spend their summers there. From time to time improvements were made to this house, and its capacity increased. It now accommodates from one hundred and fifty to one hundred and seventy-five guests, and for a period of over a month, during the last summer the guests numbered nearly two hundred. During the last twenty years the Howard House, Mount Pleasant House, Linden House, Forrest House, and Princeton House have been opened for the accommodation of summer company. Additions were made to the Wachusett House, Prospect House and Mountain House, which now accommodates one hundred and fifty, and is so delightfully situated several miles from town, nestling close to the mountain's side and commanding a most extensive and beautiful view of the surrounding country for miles around. Its latch-string is always open, and its hospitable proprietor and owner, Mr. M. H. Bullard, is ever ready to "welcome the coming, speed the parting guest." Several farm-houses have also made themselves known to city families, and, indeed, it seems as if every man, woman and child in the place were only too glad to welcome the city travelers and share with them their privileges.

A comfortable and attractive house has been built on the top of Mount Wachusett, and this, together with the ease of traveling to the summit over a fine road, has drawn an immense number of tourists. The present Summit House, which is kept by Mr. G. A. Derby, was built in 1884 by Beaman & Son, of the Wachusett House.

They came into possession of the whole mountain about the year 1880, buying it from a land company who had built the road to the summit a few years before.

The number of visitors to the top of the mountain is now estimated at ten thousand to fifteen thousand yearly, and some two thousand horses go over the road.

Princeton now has an extra summer population of over six hundred people, and probably twenty-five hundred tourists visit the town every summer, exclusive of those already mentioned as going to the mountain top. Of course nearly all of these twenty-five hundred make the trip to the top of the mountain during their stay in the town, and so the number who visit the summit—ten thousand to fifteen thousand—may be taken as the estimate of the guests who yearly visit Princeton. Before the opening of the Boston,

Barre and Gardner Railroad, in 1869-70, the difficulty in reaching Princeton kept away many people. Then the summer guests were obliged to ride seven miles by coach from the nearest station to Princeton Centre, while now the iron horse ploughs his way to within a mile of the Centre hotels. Formerly the visitors to Princeton went with the intention of remaining through the entire season; but now the town is so easily reached from Worcester, Boston and the other large cities, that people come and go to a much greater extent, and during the course of the season the number of guests is greatly increased. These guests go from Boston, Worcester, Lowell, Providence, New York, New Haven, Fall River, Philadelphia, Baltimore and many other places. In fact, the reputation of Hide and Seek town is now so well established that, while other resorts complain of a lack of patronage, no such report comes forth from Princeton. For the summer visitors soon learn to love the quaint old town, and their days spent there are long remembered, and amid the chilling blasts of winter their memories and fancies go back to the happy summer time, and they commence then to plan their next summer's visit to gain new strength and life.<sup>1</sup>

## CHAPTER CXXXI.

### SOUTHBRIDGE.

BY LEVI B. CHASE.

SOUTHBRIDGE is situated in the southwestern part of the county of Worcester. It has Charlton on the north, and Dudley on the east; southward it is bounded by the State of Connecticut, and west by Sturbridge. The centre of the town is in latitude 42° 5', and the distance from the court-house in Worcester is seventeen and one-half miles. Formerly the great route of travel from Worcester to the southwest was through Charlton and Sturbridge. The connection with the shire-town is now by the New England Railroad to Webster, and thence by the Norwich and Worcester line. There is direct railway connection with Boston through Webster, Blackstone, etc., by the New England Railway. The number of square miles in the town is about nineteen, and the number of acres is twelve thousand and seventy-four.

The surface of the town is much broken by hills and valleys. The hills rise northward and southward from the valley of Quinebaug River, some of them gradually, and some with abrupt and rugged sides. Hatchet Hill, in the south part, near Connecticut line, is sixteen hundred feet above the level of the sea, and the summit furnishes an extensive prospect.

<sup>1</sup> By Annie Louise Allen.

The main river is the Quinebaug, which comes in from Sturbridge on the west, and runs across the township north of the middle in an easterly and southeasterly course. The river is fed by Globe, Cady and McKinstry Brooks on the north, and Hatchet, Cobasse and Lebanon Brooks on the south, all of which empty within the limits of the town. The valleys of these streams greatly diversify the scenery.

From west to east the Quinebaug River has its course, furnishing the power for various and important industries. This river has been the principal factor in the building up of this wealthy and enterprising town. Hence it is fitting, in proceeding to a partial description of some of the prominent features that strike the eye of a casual observer, to begin with the entrance of the Quinebaug.

The Quinebaug flows quietly through the valley of Sturbridge, then turns eastward through a gorge between rocky hills. Before it quite passes the narrow valley, one-half of the width of it, by lines established, becomes included in the territory of Southbridge. Then it flows unhindered through the ruins of the old dam at Westville, past the old mill foundation, the bridge and the little village that has seen better days. Immediately afterwards, being confronted by a large hill, it turns squarely to the north, imparting power, as it passes, to the Litchfield Shuttle Shop, and beyond glimmers brightly along a secluded valley, beautiful in its varied scenery of wooded grove and dell, level intervals, sloping field and hill-side pasture, ending abruptly, northward, at a high rocky precipice. In ordinary times the river flows shallow in this valley. When all between the towns of Brookfield and Woodstock was a solitary wilderness, a path or road from one place to the other had its crossing here. It is inferred from facts known that this was the fording-place of the great trail of the Indians, from Narragansett and Wabbaquasset to the Quabaug towns and the Connecticut River at Hadley and above. Pursued by Captain Henchman and Oneco, son of Uncas, it was here that King Philip and his feeble following hurried across, the 3rd or 4th day of August, 1675. As will be seen further along, the first settlers had a fordway here.

The northern course of this valley, of about a mile in length, is ended by a rocky bluff, causing an angle in the river, near which the line between this town and Sturbridge runs north, leaving the eastward flow wholly in the former town. Down a rocky gorge, a precipitous cliff on the left and a more rounded hill sloping up to the southward on the right, rushes the Quinebaug of the Indians. Now this entire space is occupied by a pond; the water being held by what is commonly called the "Big Dam," a magnificent structure across just where the river leaves the companionship of these hills.

The Quinebaug is held, bitted and harnessed and

made to work the will of man, not only here, but all along its winding way below, for miles; it encounters structures of similar intent and purpose. Here, years ago, small industries were started with cheaper structures. A population was collected to control, direct and make a useful servant of the never-ceasing power, brought into subjection by capital and skill. Money was earned, resulting in increased facilities for manufacturing or the starting up of new industries. Exchange of commodities necessitated the trade class and middle men. The exercise of the various occupations was created by the demands or needs of the community. Thus a symmetrical growth was established; and a steady and unvarying prosperity has been the rule in this place.

Below the big dam, the course of the Quinebaug, in a winding way, tends eastward across the opening of the valley of McKinstry Brook, which tributary it receives from the north, and then strikes another hill or cliff, which rises abruptly upon the north side of the river. Cliff Street passes over along the height, and here one obtains a view of remarkable variety and interest. The Cliff is distant about a third or half a mile eastward from the big dam, and that portion of the river is occupied by the factories of the Hamilton Woolen Company. Four large mills and more smaller factories and buildings used in their business are in view. The lower mill is opposite the Cliff, and from this height one looks down upon the very bell-tower, the massive building and the pigmy people below.

The course of the Quinebaug from this point is in a southeastward direction. The site and ruins of the Dresser Manufacturing Company's factory is beneath the Cliff, and beyond, a fourth of a mile, is the large establishment of the Central Mills Company. Next, is the large and many-lighted building of the American Optical Company, about three-fourths of a mile farther down the river; close by which is Plimpton's laundry, J. & L. D. Clemence's lumber-working establishment and I. P. Hyde & Co.'s cutlery works. Beyond, is the large brick building recently erected by the American Optical Company, in which they are commencing the extensive manufacture of lenses. This plant is on the site of the old Columbian Mill, and the locality is now called Lensdale.

Saundersdale, about a mile farther down the river, is hidden from view. It is there that the plant occupied by the Southbridge Printing Company is located.

The Cliff, or the Clemence Hill, back of it, affords the visitor a fine panoramic view of a large portion of the villages of Southbridge Centre and Globe Village. Immediately in front the view takes in a broad and not high swell of land, not long ago devoted wholly to forest and agricultural purposes, and appeared to form a separation between Globe Village and the Centre. This is now cut up into streets, and largely occupied by the homes of the industrious

and the finer residences of the wealthy. The railroad depot, freight-house and the odd-shaped building containing the "stalls" for the "iron horses," are just over the river from the Cliff.

To the right is the denser population of Globe Village, extending up the far slope to the southward, and northward crowding up the McKinstry Valley.

To the left of the ridge that has been mentioned as being in the centre of our view, and looking as the needle points nearly south, the tops of the large business blocks and the public buildings are seen, around which we also have a perspective view of a portion of the main village.

All about among the distant hills and valleys are farm-houses, fields and woodlands—it is the combination that produces the effect, and the visitor on a pleasant day can but exclaim with delight.

The central portion of the main village is fast taking the appearance of a city. The industrious town has expended for new roads and streets since 1870, a period of eighteen years—exclusive of general appropriations for repairing highways and bridges, which is generally from \$3000 to \$5000 annually—\$53,682.

Aggregate expenditures on sidewalks in the same length of time has been \$54,700. For the erection of new school-houses \$20,700 has been expended within the last eighteen years.

The total expenses of the free public library have been \$31,397. The town is now erecting a town hall, high school and memorial hall building, for which an appropriation has been voted of \$65,000. The town's valuation for 1868 was \$2,200,500; for 1887, \$3,158,210. The population is now about 7000. But above all, Southbridge is justly proud of its large number of homes which its working people and business men have made for themselves. Also in having the largest Young Men's Christian Association in the world in proportion to the number of its inhabitants.

Individual ownership began here one hundred and fifty-eight years ago. In going back to note the early settlements, we are necessarily confined wholly to the public records of the town of Sturbridge. The records of Dudley and Charlton, were they consulted, would shed little light in matters of much importance. The first effort will be to locate some of the old lines, as laid by the first proprietors, upon the portion of their lands that may be seen from Clemence Hill.

A section of the old Oxford line is found in the west line of Mr. J. T. McKinstry's house-lot upon the pinnacle of Clemence Hill. From that point running south about four degrees east, it crossed the river just below Hamilton Woolen Company's lower mill, passing near the centre of Chapin's block, corner of Hamilton and Crane Streets, along near the centre of Whitford's block, corner of Hamilton and Main, and to near the centre of the new town hall building.

Lot 20 east, of the proprietor's first division, is south of Mr. W. F. McKinstry's farm. It was bounded east on Oxford line, and carrying the same length of Mr. McKinstry's lot westward, extended south to the river. It is that part of the valley of McKinstry Brook next to the river, and is westward of the Cliff and Clemence Hill. It was drawn to the original right of Abraham Harding.

Over the river there was a tier of four lots between the valley beyond the bend of the river above the Big Pond and the line between the homesteads of the late Deacon Henry Fisk and land formerly owned by Mr. J. J. Oakes. The lines ran from the river, south 40° west, and the long lots abutted on a line running east 40° south, which is believed to be the north bounds of the farm of the late Mr. Palmer Harding. The position of the first line is now marked by a sunken wall in the Hamilton Woolen Company's pasture, the line extending to the river again below the shuttle shop 192 rods, and this lot, No. 61, bounded everywhere else by the river, was drawn to the original right of Samuel Ellis. Lot No. 60, bounded northwest by 61, extended on that line 160 rods, then east 40° south 68 rods, north 40° east 153 rods, striking the river not far from the "Big Dam." Joseph Clark was the original proprietor. Lot No. 62, drawn by James Denison, original proprietor, was parallel, 60 rods wide, extended on the river to a little below Mr. Gleason's store. It was 217 rods on its long or southeast side. Lot No. 63, drawn by Ezra Bourne, original proprietor, "Begins at the river" (point of termination of lot 62), runs E. 40° S. 64 rds, S. 40° W. 217 rds, West 40° N. 64 rds, N. 40° E. 217 rds to the beginning. Traces of the southeast line of this lot can be seen, as stated above, also between the house-lot of Mr. H. M. Fiske and Mr. Rowley. Lot No. 64 "begins where Oxford line crosses the river, south along the line 116 rds, W. 40° N. 124 rds, N. 40° E. 23 rds, W. 40° N. 64 rds, N. 40° E. 23 rds. W. 40° N. 64 rds to the river, along the river to the beginning." Drawn to original right of Ezra Clark. Lot No. 65, drawn to original right of Thomas Learned, of Oxford, was bounded northwest on 63, northeast on 64, east on Oxford line, southwest on undivided land; begins in the line of 63, runs east 40° south 124 rods to Oxford line (corner of 64), south on Oxford line 104 rods, west 48° north 158 rods, south 40° west 45 rods, west 48° north 33 rods, east 40° south to first corner. This lot, No. 65, was purchased by Capt. Moses Marcy; also all that part of lot No. 64 northward of it, lying eastward of a continuation of the northwest line of 65 to the river. Mr. Marcy, finding an eligible site upon these lots, there established his homestead, building a large house in 1740, which still remains. The noble old house has had good care, and shows no outward signs of decay. It may as well be said here that Mr. Marcy owned four hundred acres adjoining upon the Oxford side of the line. The long lot, No. 63, next

to Mr. Marcy's, was purchased and probably settled by Moses Clark.

James Denison had at first two shares—two-fiftieths of the proprietors' land. Hensdale Clark purchased one of Mr. Denison's shares and in that way came in possession of lot 62, and built his house where Mr. Harvey Newell lives and his barn on the opposite side of the road, farther west on the westward slope of the hill. He subsequently owned all the land to the bend of the river, lots 60 and 61, and when the large estate was divided among his children, other old Clark homesteads were built. Besides Mr. Marcy and Hensdale Clark, the settlers known to have been located within the limits of Southbridge before Sturbridge was incorporated, were: Jonathan Perry, site of the old homestead of the late Mr. T. N. Harding; James Denison, near the residence of the late Mr. Lewis Morse; Jonathan Mason, now James H. Mason; Joseph Morse, now Andrew H. Morse, and Daniel Thurston, somewhere southerly of Mr. Marcy.

In March, 1739 (our dating), the first road was laid within the limits of this town. It began at the meeting-house in Sturbridge, past the dwellings of Deacon Isaac Newell, Mr. Rice, Deacon Daniel Fiske, Henry Fiske, Mr. "Martains," Henry Hooker, "thence southerly by the house where Ebenezer Stearns dwells, so on the south end of a hill; then leaving the old path, turning down the river to a white pine, then through the river, then turning up the river to the old path, thence running southerly in the old path till it comes to where the trees are newly marked for a road, still keeping a southerly course to where the southeast corner of lot No. 66 is marked, thence running southward by a line of marked trees, east of a small frame house, thence keeping much the same course to the west of Jonathan Mason's house, thence to the west of Joseph Morse's house. So near the same course to the common land."

It will be understood that the "old path" mentioned here was an old Brookfield and Woodstock road. This first town-way intersected it near the residence of Mrs. F. W. Emmons, at which point there is mention of the "path or road leading from Brookfield to Woodstock," entered upon the proprietors' records in 1730, before any settlements were made here. The dwelling of Ebenezer Stearns was upon the place now owned by Mrs. Malcom Ammidown, in Sturbridge, and the above road passed down the slope, by the brick-yard to the river. On Southbridge side of the river, traces of this road (and consequently the ancient path) may be seen in the pasture-land upon the side-hill above the residence of Mr. C. D. Chace.

The second road laid out by the town of Sturbridge within the territory now in Southbridge is dated most four years later, viz., December, 1742. It began at a white "oke" tree beside the old path down the river below the shuttle-shop, and in winding up the side hill it passed a "grate Rock In the old fence," to the "south side of the stock of a chimuey," then "south

of a swamp hole," and from this point, near Mr. Manning Plimpton's, the description appears to be identical with the present location of the road and South Street.

There was a line of marked trees to a "white oke" marked "y<sup>e</sup> north point of a hill," . . . "thence to Hensdale Clark's barn—the road runs the north side of the four last bounds—thence south of s<sup>d</sup> Clark's now dwelling-house, thence the north side of a heap of stones, on a little ledge, and a white oke tree marked, then to a heap of stones at the line of s<sup>d</sup> Marcy's land; s<sup>d</sup> heap of stones on the south side of the highway by said Marcy's fence." It appears that Mr. Marcy was not at that time ready to have his land cut up with roads. The location of the fence that the town ran against and stopped—carefully avoiding the heap of stones—was in front of the residence of Mr. H. M. Fiske.

March 23, 1744 (our dating), a road was laid out and is described as "Beginning at the south side of the river, on Moses Marcy's land, by a large rock; thence over the river north; thence turns westerly as near the river as is convenient till it comes to the old road now trod, to a pitch pine tree; thence to a black oak; then running a northerly course to a pitch pine near the line between Jabez Harding and Jonathan Perry." The road was described in its continuance by various marks until it "comes into the road that leads from Aaron Martin's to Denison Bridge." Aaron Martin's was where Mr. Horatio Carpenter now lives, on Fisk Hill.

We find here that in 1744 lot No. 20 was owned by Jabez Harding, who was a son of Abraham Harding, original proprietor of that lot. The crossing of the river from the "large rock," in Mr. Marcy's land, was not far from the east end of the Hamilton Woolen Company's lower mill, and near Oxford line. From that point to Cliff Street the road can now be traced along the steep side-hill. The road went north of the pond called Pleasant, by where Dr. L. W. Curtis now resides.

One year later, March 4, 1745, among the town's creditors we find: "Then Mr. Hensdale Clark brought in his account, which was three pounds, twelve shillings, old tenor, for the sawing plank for the bridge." The location of Mr. Clark's saw-mill will be referred to in another place.

In March, 1745, the above-mentioned road was continued: "Beginning at a large rock the south side of the river in Mr. Marcy's land, then runs southeasterly to a small pitch pine tree, then over a small run of water to the end of a rocky knoll; then turning more south to a great rock with stones upon it the west side of the road; thence near the same course by a fence the east side of the said road till it comes to the corner of said fence; then turns easterly by said Marcy's house and barn, which are the north side of this road; then a little more southerly to Oxford west line. Then this road begins again in Stur-

bridge, the west side of Mr. Samuel Freeman's land. Then was laid out the Woodstock road over Lebanon Hill. The record gives the names of three settlers on the line of that road to Woodstock,—Nehemiah Underwood on the location long known as the Clark place, John Ryan just beyond, and where now is Southbridge Pauper Asylum was Joseph Hatch.

The road down under the cliff was never a popular way, and why it was located there is hard to understand, unless it might have been expected at the time that the town of Oxford would extend it to Mr. Marcy's mills. The people preferred the fordway near Denison's Bridge, and in March, 1750, the town accepted a road "as now trod more easterly through Hensdale Clark's land, instead of the one from the ford up stream to Denison's Bridge." This road can be traced in the Hamilton Woolen Company's pasture land along the hill-side above the pond.

In March, 1753, an alteration was made. "From the meeting-house to Moses Marcy's. Beginning in Reuben Ellis's land, the north side of the river, the north end of a knoll, then southerly to and over the river," etc. This road may be described more briefly; it began opposite the residence of Dr. L. W. Curtis, passed the location of the company's "Big Mill," across the river in Hensdale Clark's land, turned a little east towards the Union Church, then southward into Moses Clark's land; thence over a small run, and up over the hill where it may now be seen in the pine grove on Main Street. This road united with that of 1745, from the Cliff Bridge, which entered South Street near the low house owned by Mr. J. J. Oakes. The old road around by the bridge under the Cliff was then discontinued. Reuben Ellis built his house on that section of the road between Dr. Curtis' residence and the river. That house and property was afterwards owned and occupied by Samuel Fiske, Sr., and when the Hamilton Woolen Company made their improvements at the "Brick Village" so called, it was moved to a back street, and there occupied until within a few years.

These roads that have been mentioned comprise all that were laid out in the part of Sturbridge now included in this town, previous to 1753.

It was about this time that two young men came in, whose descendants have been prominent in various departments of the town's progress and history.

Gershom Plimpton came on foot with his pack, gun, ammunition, etc. He was a clothier by trade, and established that business at what is now Globe Village. He married Martha, daughter of Moses Marcy, and they lived several years in a part of the clothing shop. He bought of his father for "9 pounds lawful money," ten acres of land in Sturbridge, bounded south on the Quinebaug, west by land of Jonathan Perry, northerly by the highway, and easterly by the land of Reuben Ellis. Deed dated April 21, 1759. Near the east end of this lot, the north side of the river, on a beautiful site, he

built his house. The location is now occupied by Alden's magnificent block. A bridge at this place—now Main Street Iron Bridge—is mentioned in the town records along in the seventies of last century, and called "Gershom Plimpton's bridge." A more direct road, crossing Pleasant Pond, south of Gershom Plimpton's house, and over the river by the clothier's mill, superseded the one below, which crossed by Reuben Ellis' saw-mill.

William McKinstry, of Scotch-Irish descent, landed from Ireland in 1741, without capital, except his own innate love of industry and frugality. He settled lot No. 19, next north of 20, where his great-grandson, Mr. William F. McKinstry, now resides. Mr. William McKinstry married Mary, daughter of Joseph Morse, who, as well as Martha Marcy, had grown up in this new place.

To illustrate the times, the following is copied from Mr. Moses Plimpton's "Historical Lectures," delivered before the Southbridge Lyceum, March, 1836:

From a person who, some years since, had an interview with the late Capt. Abel Mason, Sen., for the purpose of making inquiries, I have the following facts: "When Mr. Jonathan Mason first came to this place, bears, wolves and deer were numerous, and made depredations upon the flocks of cattle and sheep and fields of grain.

"The people were in the habit of attending meeting at all times when it was possible to go. Mr. Mason and those in his neighborhood had to travel 5 or 6 miles through the woods, and ford the Quinebaug in the summer, and they sometimes felled trees across to pass upon, which would remain until carried off by freshets. In winter the men of one neighborhood assembled early, and, by the aid of snow-shoes, or rackets, beat a track, all going single file. The women and children would follow, and mothers often carried young children in their arms." Another incident of the lecturer's grandfather, Gershom Plimpton, is as follows: "Some years after he began, probably about 1756, there was nothing but a foot-path from this place to the old Col. Cheney house, so-called, which was near the place of Larkin Anmildown's factory. Coming from Col. Cheney's in the evening, and when near the place of the Columbian factory, he heard the howling of wolves not far from him, and he supposed they had seen or smelled him, and were collecting to pursue him. It may be imagined that his speed was soon increased to a maximum, and, being very active and swift of foot, he in a few minutes reached Mr. Freeman's in this village, and the wolves had to make other provision for their supper."

It was under such circumstances that, for more than twenty years, the little children were gathered from the scattered homes to receive the small amount of education which the times allotted to them. The first teacher in that part of Sturbridge, now included in this town was Margaret Manning and she gathered her pupils at the house of James Denison, on the site of the homestead of the late Lewis Morse. The first school-house was built about twenty rods west of Mr. Denison's house, in 1754. The first school district was all of Sturbridge, south of the river, that is included in this town. The school district in the Pratt neighborhood was established in 1770, and the centre district in 1775, the location of the Denison school-house being moved farther south.

The first saw-mill in this town was built by Moses Marcy before November, 1733, to which he added a grist-mill before the last of September, 1736. The second saw-mill in this town and the first improvement of water-power in Globe Village was Hensdale

Clark's, built before 1744 and situated on or near the site of a little mill, which (whatever is done in it now) was a grist-mill some twenty-five years ago. It was down the river, not far below Mr. Gleason's store. This early saw-mill was subsequently owned by Reuben Ellis.

It will now be appropriate with the design and brevity of this article to pass lightly over a period of about half a century, a period of gradual growth in population and a corresponding change in the appearance of the country. New farms were wrought by the second and third generations from the first settlers. The whole surface of the town was brought to about the same general appearance—style of buildings excepted—as may now be seen in all the rural districts. Along the Quinebaug, the Marcy saw and grist-mill; and on the location of Globe Village, Gershom Plimpton's clothing-mill, and later his son's grist-mill, accommodated the agricultural community. Yet, in the midst of this half-century of quiet progress occurred that which formed a great epoch in the world's history—the American Revolution. Strong men went out from these homes to the conflict and helped to achieve the right of the people to govern themselves. Their names, so far as has been ascertained, are found on the rolls of the Revolutionary soldiers of the towns of Sturbridge and probably Charlton and Dudley. Some of those who survived the war were no less strong in the affairs of civil government, and their names are identified with the early movements that preceded and finally resulted in the establishment of the town of Southbridge.

The thought of a new town existed in the minds of far-seeing men when there were not above five hundred inhabitants in all the territory; and being put in an enduring form by the pen of Joshua Harding, and handed down by Moses Plimpton, is here inserted as an important link in the chain of movements between the early conditions and present developments.

At a meeting of parties interested, in 1796, a committee was appointed, consisting of Oliver Plimpton, Daniel Morse, Joshua Harding, Jr., Asa Walker, Luther Ammidown, Eleazer Putney, Jr., and James Dyer, to whom was referred the subject of forming a new town, and who were to report thereon. They reported as follows:

The committee to whom was referred the subject of forming a number of the inhabitants of the southeast part of Sturbridge, southwest part of Charlton and west part of Dudley into a town, have attended that service, and beg leave to report as follows, viz.: The first article of instructions to your committee was to report the most convenient spot for a meeting-house. In the public opinion, three spots have been referred to, at a moderate distance from each other. Your committee, having paid particular attention to each of them, are unanimous in their opinion that the central, which is a rising ground on Capt. Marcy's land, north of Col. Freeman's barn, concentrates convenience, elegance and beauty.

The second article of instruction to your committee was to report the principles on which said house is to be built. As it is natural to expect that in a class of citizens so numerous as is comprised in the proposed new town, there will be different sentiments in regard to

modes of religious worship, this part, therefore, of your committee's instructions forms the most arduous and difficult task. But, as a liberal and conciliatory plan appears to be the general wish, your committee propose the following: That a subscription be opened to raise a sum sufficient to erect a frame and belfry for a meeting-house and complete the outside, and that the pews be sold at public vendue to complete the inside; that every denomination be equally privileged in said house, according to their interest therein; this clause, however, not to be constructed so as to operate against the major part governing, but to confirm the free use of said house to the minority, when the majority are not improving the same.

Your committee foresee with concern that the liberality of this plan will be objected to by many respected characters as having a tendency to deprive the town of a stated, settled, Orthodox ministry, to which objection your committee beg leave to make the following observations:

1st. The difference in sentiment betwixt the Congregationalists and Baptists is principally confined to the administration of the ordinance of Baptism, a very immaterial difference indeed. Were both parties seriously to reflect that religion consists in purity of heart, and give no more weight and consideration to modes and forms of worship than they really deserve; and if a minister should be settled disposed to administer that ordinance in the manner most agreeable to the subjects of it, we might look forward to that wished-for period, when both parties might be happily united in one society.

2d. That every denomination being equally privileged in said house, according to their interests, will have a material tendency to unite and cement themselves together in one society.

3d. That there are comprised in the proposed town as large a number, and reputable both as to character and interest as new towns are generally composed of, (and) it would be ungenerous to say they were not as well disposed towards supporting the Gospel.

The third article of instructions to your committee was to ascertain the bounds of said town.

Your committee propose the following: Beginning at the Southeast corner, on the State line, to include James Haskell, Benjamin Stone, Thomas Cheney, Lieut. Eleazer Putney, Eliakim Chamberlain, Jesse Merrit, Paul Rich, Asa Dresser, Alexander Brown, John Chub, Joseph and William McKinstry, Jonathan Perry, to the river; thence include John Plimpton, Capt. Elias Plimpton, Fletcher Foster, Capt. Samuel Ellis, Jedediah Ellis, Simeon Mason and Chester May, to the State line. But as an actual survey will be necessary, before an act of incorporation can be applied for, your committee are of opinion to refer minute circumstances respecting boundaries to that period.

The fourth article of instruction to your committee was to report a plan of the meeting-house, which will accompany this report.

The fifth article of instruction to your committee was to see what number of persons will come forward to build said house. Although your committee as yet are not well enough informed to detail the particular disposition of every person, yet from what information your committee have already obtained, the disposition of the people appears to be very general in favor of the plan. Your committee propose to bring forward subscription papers at the present meeting, which will give that point the fairest decision; and all moneys, either by subscription or sales of pews, to be considered as binding, whenever an act of incorporation takes place, otherwise to be void and of no effect.

Your committee, in closing this report, are disposed to present to your view the geographical situation of the proposed town. The great parent of nature seems to have been profuse in his favors to this place. The Quinebaug River, which falls so nearly central through, with its excellent seats for mills and other water-works, are circumstances highly favorable to the introduction of useful mechanics, and rendering it a place of activity and business. The goodness of the soil, with the excellent forests, abounding with all kinds of timber for building, are estimated of great consequence to the general plan.

Abstractly considered from the value it will add to the real estate, if we take into view the benefits that would naturally result from a religious society, where there are so large a number of youths, in forming their minds for accomplishments, usefulness and virtue, when they are at present, by reason of local situation, notoriously neglected are, in the opinion of your committee, considerations of so much weight that (they) ought to bear down obstacles that present themselves in the way of the accomplishment of an object so noble, so great and so good. From every view of the subject your committee recommend, with steadiness, energy and vigor, to take the most effectual measures to carry into complete effect an object of so much consequence, as soon as time and other circumstances will permit. (Report made February 29, 1796.)

This report was signed by the whole committee, and undoubtedly expressed their views and feelings; but it is due to one of them (says Moses Plimpton) "to state that it was from the pen of Joshua Harding, who was usually required to draft instruments of this kind; and it will, perhaps, be sufficient commendation of the report and of its author to say that it discovers sound judgment and ability, and, in particular, that the candid and liberal views and high moral tone which pervade it throughout were literally but specimens of his pure and benevolent mind."

Twenty years afterwards the purpose in the minds of the people, so well expressed in the foregoing report of the committee, resulted in the formation of a new town. Their object was retarded by the opposition of all three of the old towns and more especially of Sturbridge, that town being unwilling to lose so much of her territory.

The meeting-house, however, was built and a poll parish formed. The meeting-house frame was raised under the direction of William Love, July 4, 1797, and this first public building within the limits of this town was dedicated July 4, 1800, which was, of course, just eighty-eight years before the laying of the cornerstone of Southbridge's magnificent Town Hall.

The act erecting a poll parish here was approved February 28, 1801. The preamble of the act containing the reasons for the same is as follows: "Whereas, for the convenience and satisfaction of a number of the inhabitants of the towns of Sturbridge, Charlton and Dudley, in the county of Worcester, with respect to their attending public worship, it is found necessary to set them off, and erect them into a poll parish." The names of ninety legal voters were affixed to the act. The number of acres of land included in the estates taken from each of the three towns was: Dudley, 2229; Sturbridge, 9445; Charlton, 2429. The parish was known by the name of "Honest town."

The agitation for a new town was commenced again in 1811, and continued from year to year until an act of incorporation was obtained.

In March, 1814, Oliver Plimpton was chosen an agent "to attend the next session of the general court, and use his endeavors to obtain an order of notice, or at least an examining committee, for business, relative to being set off as a town." In May following, Major Calvin Ammidown was chosen an additional agent to attend the General Court. At another special meeting, December 6, 1814, Jason Morse was chosen as an additional agent, and Joshua Harding, Gershom Plimpton and Fordyce Foster a committee to draft an act of incorporation. On the subject of a name for the new town, all were invited to bring forward their favorite, and a committee of five was chosen to select from the list. This committee was: Abel Mason, Sr., Joshua Harding, Gershom Plimpton, Fordyce Foster and Jacob Endicott. The venerable Captain Abel Mason, Sr., brought in the name of Southbridge. The committee selected from the list

the names of Southbridge and Quinebaug for the consideration of the parish, and Southbridge obtained the vote. New agents were chosen in March, 1815, viz.: Calvin Ammidown, Frederick W. Bottom and James Wolcott.

The "act to incorporate the town of Southbridge" was approved by the Governor and thus became a law February 15, 1816.

The warrant for the first town-meeting was issued by Oliver Plimpton, Esq., to Dexter Clark, dated "February 21, 1816," directing the calling of the legal voters "to assemble at the meeting-house, where the parish meetings have heretofore been held," March 6, 1816.

At this meeting the following were elected, to wit: Moderator, Gershom Plimpton; Town Clerk, Timothy Paige; Town Treasurer, Luther Ammidown, Sr.; Selectmen, Gershom Plimpton, Samuel Fiske, Joshua Mason, William Morris and Fordyce Foster; Assessors, John McKinstry, Edward Baylis and Joseph Marcy; Constable, Dexter Clark.

At that time was founded a new town, eighty-three or four years after the entrance of the first settler, and seventy-six years after the Marcy house was built.

The limits of this article will not admit of anything like a history in detail of the seventy-two years intervening between that and the present. The aim will be to illustrate to some extent the remarkable growth in the various departments, forming the conditions which makes this as high as the seventh town in population, and other characteristics, in the county. It being allowable only to bring out the prominent features which make up the main issue, it is seen that in the elimination of a portion of the large amount of data in hand, much of interest, and many persons and factors of importance, must necessarily be excluded.

The population of this town was in 1820, 1066; 1830, 1441; 1850, 2824; 1875, 5740; 1885, 6500. The increase since 1850 has been mainly from immigrants and their descendants. They are German, Scotch, English, Irish and Canadians; the latter being the most numerous. The English and Scotch are few—mostly skillful workmen in some of the departments of manufactures. The honest labor of the frugal people has formed the base of every enterprise in the progress here for the last forty years. We see the marks of their toil in every structure and excavation, and in every product of the mill and the workshop. These immigrants came here poor, and as a rule have become well to do—some are wealthy; and the rising generation are having the benefit of the educational, moral and social advantages bestowed by the capital which their fathers have helped to create in this place. Constituting two-thirds of the population, it is hopeful for the future welfare of the town that a goodly number are advancing with vigor in the various enterprises, and in the formations that serve

to promote temperance and the best interest of the community.

Appropriations for all purposes the first year of the town were \$1600; 1830, \$1600; 1839, \$5493; 1848, \$3200; 1869, \$35,864; 1880, \$41,899; 1888, \$45,000, exclusive of the special appropriation of \$65,000 for the town hall. Valuation: Total in 1869, \$2,124,796; 1879, \$2,906,461; 1887, \$3,158,210—an increase of \$1,033,414 in eighteen years.

**EARLY MANUFACTURES AND EXTINCT CORPORATIONS AND COMPANIES.**—The business of manufacturing at the "Globe Village" began in 1814. The spinning was commenced in the old mill—linseed oil mill of Captain Gershom Plimpton—which stood near the road on the south side. The first owners were Thomas Upham, David Fiske, Samuel Newell, James Wolcott, Jr., Perez B. Wolcott, Josiah I. Fiske, Francis Wheelock, Ephraim Angell, Moses Plimpton and Samuel L. Newell, a part of whom were incorporated by the name of the "Globe Manufacturing Company," in October, 1814. The same year this company erected the "Globe Mill," which still remains near the bridge. The factory building below the road was erected in 1815. It was at first, and until 1817, a cotton factory. In that year there was a division of the property among the owners, the south side being taken by James Wolcott, Perez B. Wolcott, Samuel A. Groves and Ephraim Angell, and the other side by the remaining proprietors. Additions were soon made to the south side, and the woolen business established, and in 1820 the owners of the other side, who still composed the "Globe Manufacturing Company," sold out the whole of their property to Mr. Wolcott and his company.

After the purchase from the "Globe Manufacturing Company," in February, 1820, James Wolcott, Jr., Perez B. Wolcott and Samuel A. Groves were incorporated by the name of the "Wolcott Woolen Manufacturing Company," and the company was increased by new proprietors in Boston, who made investments to considerable amount. After the great misfortune occasioned by the falling of the dam, and the destruction of property it occasioned, the Boston owners determined to abandon the concern and get rid of their interest. In 1829 it passed into the hands of Messrs. Willard Sayles and Samuel A. Hitchcock, of Boston, and in 1832 they obtained a new act of incorporation by the name of the "Hamilton Woolen Company" (see Existing Corporations).

The factory afterwards owned by the "Dresser Manufacturing Company" was put in operation in 1814. It was then in Charlton, and the first water-power that side of the line. The owners were John Green, of Rhode Island, and William Sumner, the latter having the care of the business and living in this town. This privilege was owned in part by Major George Sumner, who erected clothing works below the cotton factory, and that business and wool-

carding was continued until the whole became the property of S. H. Babcock, of Boston, by whom it was sold to Harvey Dresser. This cotton-mill, with all the real estate and machinery, was incorporated as the "Dresser Manufacturing Company," February 14, 1834; the corporators were Harvey Dresser, Jerry Merritt, of Charlton, Samuel Stafford, of Providence, and Benjamin W. Kimball and their associates, with a corporate capital of seventy-five thousand dollars real estate, and one hundred and fifty thousand dollars personal estate. Subsequently reorganized under the same act, it continued in the name of the "Dresser Manufacturing Company" until the mill was destroyed by fire. The water-power is now unemployed.

The Marcy privilege, located next below the preceding, with the saw-mill and grist-mill, became the property of Jedediah Marcy, Jr., grandson of the first proprietor, in 1789. The following year John Gray introduced at this place the clothier and wool-carding business; and, after conducting it about eight years, sold his interest to Zebina Abbott. Mr. Abbott sold the clothier business to his brother-in-law, George Sumner, of Spencer, who came here about 1802. After Mr. Sumner moved to the next privilege above (Dresser Manufacturing Company's), about 1814, a company was formed, and, after conducting business about two years as the "Charlton Manufacturing Company," were incorporated February, 1816, as the "Southbridge Factory Company, for the purpose of manufacturing wool in Southbridge." Two years afterwards the company failed, and the property passed back to the heirs of the Marcy estate. This property had been in the name of the Marcy family ninety-five years, when, in 1827, it passed by deed from Hon. Jedediah Marcy to Deacon Elisha Cole. Mr. Cole deeded to Mr. Royal Smith in 1832, who conveyed his whole interest, including the mills and water-power here and twelve acres of land, to Mr. Ebenezer D. Ammidown, January 20, 1836; consideration, nine thousand dollars. The same day, Mr. Ammidown deeded this property to the Dresser Manufacturing Company, and that company conveyed the same, with additional power, to the Central Manufacturing Company, which was at that time organized by Mr. Ammidown. This company erected a mill in 1837, putting in 4480 spindles and other preparations, with 120 looms, for making fine shirting and sheeting.

On the 27th December, 1845, the company was reorganized, with the capital increased to \$80,000—\$1000 each share, subscribed for as follows, viz.: Ebenezer D. Ammidown, 40 shares; Linus Child, 10; Manning Leonard, 15; Chester A. Dresser, 15; the last two not being among the first corporators.

At the organization of this company E. D. Ammidown was elected agent, C. A. Dresser, superintendent, and M. Leonard, clerk.

In 1852 the manufacturing property was leased to Chester A. Dresser and Manning Leonard, who oper-

ated for the company on contract for a period of five years.

March 30, 1859, the whole estate was conveyed by Samuel M. Lane, as assignee of the Central Manufacturing Company, to Chester A. Dresser and Manning Leonard for forty thousand dollars, who operated as co-partners. Then Mr. Dresser bought Mr. Leonard's one-half interest for twenty-five thousand dollars, and organized the "Central Mills Company," to whom the whole estate was conveyed by deed dated February 16, 1863, for fifty thousand dollars. (See Central Mills Company.)

Columbian Cotton Mill, located about a mile below the Marcy privilege. The first mill was erected in 1821. The business was conducted under a general partnership up to the year 1825. The owners were: Ebenezer D. Ammidown, Lament Bacon, Samuel Hartwell, Moses Plimpton and Samuel L. Newell. Mr. Newell lost his life by being caught in a belt. The other partners obtained an act of incorporation June, 1825.

The mill was destroyed by fire in December, 1844, and the water-power remained unused until 1856, when Hon. E. D. Ammidown erected a brick mill on the premises, and commenced the manufacture of cotton jeans and flannels. This business was afterwards conducted by his sons, Malcolm and Henry C., to whom the property had been conveyed by deed. Lieutenant Malcolm Ammidown lost his life in the war. The property was then sold for the purpose of effecting a division of interests, and was purchased by the brother, who sold, in 1866, to Henry T. Grant, of Providence, R. I.; consideration, thirty-seven thousand dollars. Mr. Grant erected a large addition to the mill, and put in forty-seven hundred and thirty-six spindles and one hundred and eight looms, with other preparations for making print cloths. In 1879 a foreclosure brought about a public sale, and the property changed hands. Afterwards the mills were destroyed by fire, and the water-power was unused until purchased by the American Optical Company. (See American Optical Co., p. 1012.)

ASHLAND was the former name of the location of the mills, the lowest down the river in this town. The first improvement of the water-power here was a saw-mill at the mouth of Lebanon Hill Brook, built by Adolphus Ammidown in 1831. His brother, Larkin Ammidown, built the first mill on the Quinebaug, at this point, in 1835, and began spinning cotton in 1836, and the same year sold the estate to Silas H. Kimball.

In 1843 it came into the hands of a mortgagee, who sold the estate in 1847, one-half to Stephen P. Irwin, one-fourth to Moses E. Irwin and the other fourth to W. A. J. Wilkinson. These grantees operated the mill about two years, until June 5, 1849, when the cotton-mill and machinery were destroyed by fire. The water-power, except for a saw-mill operated part of the time, was unused until sold to Mr. James

Saunders, of Providence, R. I., in 1864. Afterwards, the village that had been called Ashland became Sandersville (see p. 1012).

In the War of the Rebellion, Southbridge bore an honorable part, with the expenditure of much money and the loss of many valuable lives. The selectmen during these eventful years were: Verney Fiske, Adolphus Merriam, Malcolm Ammidown, William C. Steadman, Manning Leonard and John O. McKinstry. The town clerk was Daniel F. Bacon. Samuel M. Lane was treasurer in the years 1861-64, and Daniel F. Bacon in 1865.

A special town-meeting was called May 6, 1861, to contrive measures for the aid of the government against the Rebellion, when the sum of eight thousand dollars was appropriated for raising and equipping a military company and for the support of the families of those who might enter the service. William Beecher, John O. McKinstry, John Edwards and Chester A. Dresser were united with the selectmen to form a committee to take charge of the appropriation and expend it "according to their best discretion." This committee were authorized to pay for each volunteer, who resided in the town, a dollar and a half each week to the wife and half a dollar to each child under twelve years of age, during the term of the volunteer's active service. The committee were also to pay to each enlisted man eight dollars a month while in active service and fifty cents for each half-day spent in preliminary drilling. On the 7th of October the selectmen were authorized to pay State aid to the families of soldiers, as provided by a law passed at the extra session of the Legislature.

July 1, 1862, the town voted to give a bounty to each soldier, not to exceed thirty-eight, the sum of one hundred dollars, to be paid when the soldier was mustered into the military service for three years and credited to the quota of the town.

In August, the same bounty, one hundred dollars, was voted to each volunteer, to the number of sixty, who should enlist in a nine months' regiment and be credited to the quota of the town.

In September, 1863, it was voted to pay State aid to families of drafted men as well as the families of volunteers; and in November to pay State aid to the families of men who had died or become disabled in the military service.

On June 20, 1864, the bounty to volunteers for three years' service was fixed at one hundred and twenty-five dollars.

On March 6, 1866, the sum of three thousand five hundred dollars was raised to refund to persons who had paid money upon subscriptions used for recruiting purposes.

The number of men furnished by the town for the war was four hundred, which was nineteen above all demands. Among them were four commissioned officers. The town expended on account of the war, exclusive of State aid, \$17,313.65. For State aid, half

of which was refunded by the State, \$18,367.98. Individuals voluntarily contributed \$5757 more than was refunded by the town. The ladies worked with increased interest until there was no further call for supplies. The Soldiers' Aid Society sent money and other contributions to the amount of nearly \$1200.

The auditing committee for the year 1866 reported in the words following, referring to the list of soldiers on the records of the town :

Below we give a list of those who have served in the Federal army as soldiers during the late war, and, so far as is known, their record.

It is, indeed, a Roll of Honor, to which we shall be proud to refer as our attestation of the loyalty and devotion of our people to the Union of the States, and the cause of republican liberty. There are among them few of rank, but all are of honor, save in one or two instances, and served their country well in all the vicissitudes of the war; and we desire to perpetuate the memory of the fallen and the title of the living braves, by inscribing their names upon our public Records as part of our debt of gratitude to them.

*Second Infantry.*—C. O. McKinstry (sergeant), re-enlisted in the same; promoted second lieutenant.

*Fourth Infantry.*—James Ryan.

*Fifth Infantry.*—William P. Plimpton, second enlistment.

*Ninth Infantry.*—Edward Byrne, Augustus Benway, John Gleason, killed at Gaines' Mill, Virginia, June 27, 1862; Patrick Maher, killed at Gaines' Mill, June 27, 1862; John Innis.

*Tenth Infantry.*—George W. Hersey, David F. Smith.

*Twelfth Infantry.*—John C. Freeman, died a prisoner at Florence, South Carolina, February, 1865.

*Thirteenth Infantry.*—Charles C. Bigelow, L. A. Chapman, Albert E. Morse.

*Fourteenth Infantry.*—Porter Plimpton.

*Fifteenth Infantry.*—Conrad Anthon, Alexander Bryson, James C. Barlow, Sanford Bottom, Peter Cain, was previously in Fort Sumter when bombarded, April 14, 1861; Watson Cheney, Henry M. Carpenter, George W. Faulkner, promoted to commissary sergeant; Charles M. Hersey, William F. Miller, corporal; Eliot F. McKinstry, re-enlisted; Lucian G. Lamb, W. H. Nichols, William H. Smith.

*Eighteenth Infantry.*—David Brown.

*Twenty-first Infantry.*—Timothy Cranuy, James Bryson, died of fever at Annapolis, Maryland, November 27, 1861, the first martyr from this town; Lucian Convers, Timothy Collins, killed in battle at Newbern, North Carolina, March 14, 1862; Charles H. Greenleaf, Joseph Harman, killed in battle, Roanoke Island, February 8, 1862; Charles L. Horton, Dennis Mahan, Charles W. Melleney, Samuel H. Marble, re-enlisted; Samuel G. Irish, James S. O'Brien, Oliver Stone, Albert Saunders, Waldo Vinton, Edward Wald, Lucian W. Spencer.

*Twenty-second Infantry.*—Nathan B. Angell, Benjamin S. Aldrich, Harrison A. Bond, corporal, died August 22, 1863, from a gun-shot wound received at Gettysburg; John L. Bartlett, Andrew J. Clark, Henri Elkins, died August 4, 1862, from wounds received at Gaines' Mill; David R. Horton, Anson Morse, J. Marra, John F. Pratt, Daniel Walker, sergeant.

*Twenty-fourth Infantry.*—Marvin G. Marcy, re-enlisted; Louis Rivers, by transfer; Andrew H. Morse, by transfer.

*Twenty-fifth Infantry.*—John E. Bassett, Samuel S. Dresser, James A. McKinstry, Elias M. McKinstry, A. J. McKinstry, John G. Leach, George Link, Dwight Moore, John Ryan, John Stone, Alonzo Vinton, first enlistment.

*Thirty-fourth Infantry.*—Malcolm Ammidown, second lieutenant, taken prisoner at Newmarket, Virginia, May 15, 1864, and died at Charleston, South Carolina, October 1, 1864; his name is given to Post 168, Department of Massachusetts, G. A. R.; Eber C. Pratt, first enlistment; Francis Armes, first enlistment; Linus C. Albee, Nathan B. Angell, second enlistment; John Bryson, was in Andersonville prison-pen; Albert O. Blanchard, killed by accident, May 26, 1864; Stephen Blackmar, sergeant, died at Harper's Ferry, March 4, 1864; Charles E. Blackmar, Edwin Bennett, Sanford Broadbent, Edwin S. Beecher, Michael Bowler, W. H. H. Cheney, member of the band; George W. Corey, sergeant; Joseph B. Corey, Walter B. Cutting, killed in battle at Stickney's Farm, October 13, 1864; Arnold Capron, killed in battle June 5, 1864, at Piedmont, Virginia; George Congdon, George H. Dean, sergeant; George F. Fiske, died May 2, 1864; David Fairfield, Arthur L. Fox, killed in battle at

Piedmont, Va.; Henry C. Green, George E. Hubbard, Frederick Holmes, David Marcy, William B. Morse, John Mack, Patrick Moriarty, David T. T. Litchfield, member of band; J. H. Lumbard, Ebenezer Leach, Andrew H. Morse, transferred to Twenty-fourth; Louis Rivers, transferred to Twenty-fourth; Munroe Reynolds, William A. Sears, died of wounds June 18, 1864; Paul Sarboro, S. Judson Tiffany, died at Andersonville slaughter-pen, Ga.; Kayson Tierney, Alexander Wald.

*Thirty-eighth Infantry.*—Dr. S. C. Hartwell, volunteer surgeon to the Army of the Potomac from April 9 to May 17, 1862; afterwards surgeon of Thirty-eighth Massachusetts, and also Medical director of General Emory's division; resigned March 2, 1864; Andrew J. Plimpton, surgeon's assistant.

*Thirty-ninth Infantry.*—William P. Plimpton, third enlistment.

*Fortieth Infantry.*—Richmond Barrett, sergeant; George Eccleston, William E. Horton, Alden Potter.

*Forty-second Infantry.*—James A. Knight, died in the service.

*Forty-fourth Infantry.*—Samuel S. Perry.

*Forty-fifth Infantry.*—Frank H. Dean, Charles H. Leonard, Barnard A. Leonard, Charles A. Howard, James H. Mason, Edwin T. Morse, Danforth K. Olney, member of the band; William P. Plimpton, first enlistment; Charles B. Sumner, Edwin E. Tiffany, first enlistment.

*Fifty-first Infantry.*—Edward Armes, Charles G. Blanchard, Thomas Burns, Jasper Bugbee, Henry M. Clemence, Philip Cain, Flavius J. Cheney, Joseph Corey, William B. Card, James J. Callahan, Edwin Dexter, first enlistment; Marcus Dillabar, James Flynn, first sergeant; Luther S. Fox, Charles Green, George S. Lallin, drummer; Albert Holmes, George A. Hanson, Fitz Henry Hall, Adelbert O. Horne, first enlistment; Philip W. Harris, Charles N. Hager, Frederick Kind, James J. Leary, first enlistment; W. O. Mason, first enlistment; John Murray, Joseph Moore, first enlistment; Norval Newell, William H. Parsons, William Ryan, first enlistment; Thomas Ratigan, Francis F. Spencer, Thomas A. Stone, sergeant; Terence Smith, Alvin S. Streeter, William Sabin, first enlistment; Leonard G. Webster, John K. Walker.

*Fifty-fourth Infantry.*—John Tanner, killed July 13, 1864.

*Fifty-seventh Infantry.*—John Tully, Thirty-fourth, enlisted in Co. A, Fifty-seventh, and died at Alexandria, Va., May 16, 1865.

*Sixty-first Infantry.*—William O'Brien, killed at Petersburg, Va.

*Sixty-second Infantry.*—John W. Clark.

### Other Massachusetts organizations:

*Thirty-fourth Massachusetts Regulars.*—John R. Amidon.

*First Cavalry.*—William H. Belknap, died at Hartford, Conn., December 17, 1864; Ambrose Fogle, David Stone.

*Fourth Cavalry.*—Robert S. Bryson, Edward Egan, James Flynn, second enlistment; Edward C. Hughes, bugler; Francis Heffenan, James J. Leary, second enlistment; Joseph Link, Peter Porter, farrier; John Powers, William Ryan, second enlistment, corporal; Jason G. Smith, first sergeant, second enlistment; William Shumaker, died at Andersonville slaughter-pen, Ga.; John Spencer, died November 19, 1864; Everett A. Town.

*Fifth Cavalry.*—George W. Coffin (colored), died May 17, 1864; William G. Coffin (colored).

*Second Battery, Light Artillery.*—Henry B. Blodgett, John D. Fiske, sergeant, Nim's Battery, re-enlisted in the same.

*Third (B) Battery.*—Henry G. Ammidown, George Blackmore, died at Hall's Hill, 1862.

*Fifth Battery.*—Frank A. Prescott, clerk of battery.

*Second Heavy Artillery.*—Watson Cheney, Edwin Dexter, second enlistment; John A. Frost, died at Newbern, N. C., October 19, 1864; John W. Lucia, Isaac F. Irish, John Kelly, died May 17, 1865; James S. O'Brien, second enlistment, died at Andersonville prison-pen, Ga., August 29, 1864; Thomas O'Harry, George Remington, Albert Saunders, second enlistment; Charles Seymour, died a prisoner at Charleston, S. C.; Alonzo Vinton, second enlistment; Albertus A. Wilbur.

*Holden Riflemen.*—Henry G. Ammidown.

*Fifteenth Battery (bought).*—Joseph Coburn, James Colologue, John Devins, John Gilmore, James Gayton, Theodore C. Lewis, Edward Murry, George T. Brown, William Dewitt, Samuel Newhall, William Ripley, Aaron Bell, Thomas Brown, John Miller, Thomas McIntire, James McDonald, James Riley, George Rickert, Patrick Quinn, William D. Waddell, George H. Cutter, Edward Farrell, Thomas Higgins, Charles Hersey, James A. Johnson, John Kinney, John E. Mathews, John Williamson, Michael Walker, George Hazlett, Peter McPhail, John Scott, Daniel Boyce, Albert Burton, George Reese, Raymond Russell, John Smidt, Charles Sherman, Frank Turner, Henry Vince.

*Sixth United States Colored Troops.*—Eber C. Pratt, second enlistment,

second lieutenant, acting on the staff of Colonel Duncan, and died December 15, 1864, of wounds received at Chapin's Bluff, Va., September 29, 1864.

*Corcoran Legion.*—Timothy Cranney, second enlistment, and was promoted to first lieutenant.

*Second District Columbia.*—Samuel F. Plimpton, promoted commissary sergeant, died March 6, 1864; Francis D. Plimpton, died June, 1865.

*United States Cavalry, Regulars.*—Andrew L. Bigelow.

*Organization Unknown.*—Austin Stevens, E. N. Robbins, Henry E. Gilbert.

### Organizations of other States :

*Third Battery, Rhode Island.*—William Calvert, re-enlisted.

*Fifteenth Battery, Rhode Island.*—H. W. Brown.

*Third Cavalry, Rhode Island.*—Philip Cain, second enlistment, died at New Orleans.

*Seventh Infantry, Connecticut.*—David Bryson, died at Folly Island, S. C., July 10, 1863.

*Seventh Infantry, Connecticut.*—Joseph Goodale, Oliver H. Mason, sergeant.

*Eleventh Infantry, Connecticut.*—Francis Armes, second enlistment.

*Eighteenth Infantry, Connecticut.*—E. P. Bowen.

*First Cavalry, New Hampshire.*—Calvin Clafflin, quartermaster-sergeant.

*Seventh Infantry, New Hampshire.*—Sanford Bottom, killed before Petersburg, Va., September 10, 1864.

*Fourth Infantry, Vermont.*—Rev. Salem M. Plimpton, chaplain.

*Seventh Infantry, Vermont.*—Philip Lucia, was in Andersonville prison ten months.

*Thirty-sixth Infantry, New York.*—Bernard Flynn.

*Thirty-seventh Infantry, New York.*—Stanley F. Newell, second lieutenant.

*Thirtieth Battery, New York.*—Stanley F. Newell, second enlistment, second lieutenant.

*Truth Cavalry, New York.*—Warren F. Sikes.

*Sixteenth Cavalry, Iowa.*—Edwin T. Plimpton, died June 14, 1862.

*Navy.*—William Blute, John Burnis, frigate "Santee;" Cornelius Cummins, West Gulf Squadron, ship "Luckawana;" Michael Eagan, gunboat "Tasca;" F. A. Hurd, gunboat "Kennebec;" Dennis Kehay, Alexander Longmore, frigate "Santee;" Charles L. Newhall, frigate "Minnesota" and "San Jacinto;" Joseph Olney, frigate "Cumberland."

*Mention of:* Captain Salem Marsh, fell at Chancellorsville, May 1, 1863, in command of the Second United States Regulars, twenty-eight years of age, a graduate of West Point in 1860, a native of this town.

The foregoing list is rearranged from a list having the names in alphabetical order, found in a historical sketch of Southbridge by Holmes Ammidown, Esq.

**GRAND ARMY OF THE REPUBLIC.**—Malcolm Ammidown Post, No. 168, Department of Massachusetts, G. A. R., has a fine organization, and the town will furnish them with a Memorial Hall and convenient quarters in the new Town-Hall building. The present commander is Edwin T. Morse.

Auxiliary to this is the Malcolm Ammidown Relief Corps, No. 71, conducted with much interest and efficiency by the ladies.

**SOUTHBRIDGE LIGHT INFANTRY.**—The grant for a new military company in Southbridge, to be attached to the Massachusetts Volunteer Militia, was signed by Oliver Ames, Governor and commander-in-chief, March 26, 1888. The company was organized as Company K, and attached to the Sixth Regiment Massachusetts Volunteer Militia. Officers elected were,—Captain, John M. Cochran; First Lieutenant, W. F. Heron; Second Lieutenant, F. E. Newbury. Permanent quarters were prepared for the company in M. J. Suprenaut's new block on

Central Street. A dedication and reception of visitors occurred there December 20, 1888.

**RELIGIOUS SOCIETIES, CHURCHES AND MINISTERS.**—The Congregational Church originated from a withdrawal of twenty-one members of the Congregational Church in Sturbridge. They were residents in the poll parish that was established here by an act of the Legislature, February 28, 1801. These members were dismissed from the church in Sturbridge, and organized this church on the 16th day of September following. This small colony united in their public religious worship with the Universalists, Baptists and Methodists in the parish meeting-house. With the addition of five more members, this was the condition of the church when the parish was, by an act of the Legislature, made a town by the name of Southbridge, February 15, 1816. The church members now number two hundred and fifty-six, and two hundred and seventy-five attend the Sunday-school. Sunday-school superintendent, H. R. Beecher.

The "Congregational Religious Society in Southbridge" was incorporated December 13, 1816. There were sixty-two original corporators, "with their families and estates, together with such others as may hereafter associate with them, and their successors." August 28, 1818, for the consideration of eighteen hundred dollars, the society obtained of Major Calvin Ammidown the deed of one and one-fourth acres of land, with a house designed for a parsonage. Their meeting-house was erected in 1821, and dedicated January 1, 1822. The house was remodeled in 1839, and dedicated anew September 5th, and again repaired and some changes made in 1869; re-dedicated September 24th. This house was removed, and a large and elegant edifice of brick erected on the same site, which was dedicated in October, 1885; located on Elm Street.

**Pastors:** Rev. Messrs. Jason Park, 1816-32; Henry J. Lamb, 1833-35; Eber Carpenter, 1835-64; Edwin B. Palmer, 1864-69; E. L. Jaggard, 1869-72; J. E. Fullerton, 1873-76; Joseph Danielson, 1877-88; Charles H. Pettibone, 1888.

**Deacons:** Asa Walker, 1801-14; Daniel Morse, 1801-32; Jason Morse, 1821-31; George Sumner, 1822-39; Henry Haynes, 1831-39; Josiah Hayward, 1839-42; Elbridge G. Harding, 1837-51; Jonathan Cutting, 1842-75; Samuel M. Lane, 1851-86; William P. Plimpton, 1875; E. S. Swift, 1886.

**Baptist.**—The First Baptist Church of Southbridge was established January 28, 1817. It was composed of a colony of twenty-six, of both sexes, who withdrew from the Baptist Church of Sturbridge.

The Central Baptist Church originated in some differences in the management of the prudential affairs of the First Baptist Church and Society, when, for the sake of harmony and peace, a majority of the members of that church withdrew their membership in 1842, and on Sunday, the 18th of September fol-

lowing, organized themselves into a new church by the name of "The Central Baptist Church of Southbridge."

Before the division the First Baptist Church had about one hundred and seventy-five members; afterwards, in the course of a few years, the old church became extinct. The Central Baptist Church had, in 1884, one hundred and eighty-two members. The church and society are both in prosperous circumstances. Three only of the twenty-four churches that form the Worcester Baptist Association have contributed more for outside charitable and religious purposes. Their Sunday-school has a membership of one hundred and seventy-eight, consisting of thirteen classes and teachers. Their Sunday-school library is large, and is mainly supported by the annual income from a fund left for the purpose by one of the town's business men, the late John Edwards, Esq.

A society was incorporated by the name of the "First Baptist Society of Southbridge," January 29, 1822. Other denominations held meetings in the old parish meeting-house occasionally until 1835. At that time the house was sold at auction, bought, repaired and sold again in the form of slips, the deeds of which limited the kind of preaching to that of the Baptist belief.

In the year 1841 an association was formed and incorporated, styled the "Southbridge Baptist Meeting-House Association." Measures were taken for the erection of a new house, which was completed and dedicated on Wednesday, October 25, 1848. This building was burned on the evening of the 14th of November, 1863, and entirely destroyed.

The society erected and finished, in the year 1866, at a cost of over twenty thousand dollars, the substantial and fine-looking brick edifice they now occupy. The organ, the cost of which was two thousand dollars, was given by Chester A. Dresser, Esq., and the late John Edwards, Esq., the whole being the sole property of the society. They have recently purchased a handsome parsonage, and are entirely free from debt.

Pastors: Rev. Messrs. George Angell, 1816, died 1827; Addison Parker, 1827-32; David C. Bowles, 1833-35; Joseph G. Binney, 1835-37; Sewell S. Cutting, 1837-45; C. P. Grosvenor, last pastor of the First Church, 1842-44; Timothy G. Freeman, 1845-47; Oakman S. Stearns, D.D., 1847-54; Shubal S. Parker, 1855-67; B. F. Bronson, 1867-73; H. H. Rhees; A. G. Upham, 1877-83; Goram Easterbrooks, 1884.

Deacons, First Church: Cyrus Ammidown, 1817-21; Joshua Vinton, 1817-21; Elisha Cole, 1821-44; Samuel Fiske, 1821-35; Marvin Cheney, 1835-44.

Deacons, Central Baptist Church: Marvin Cheney, Henry Fiske, Adoniram Coombs, Charles E. Steward, Alpha M. Cheney, 1878; Joseph F. Esten, 1883-85; Lucius E. Ammidown, 1885.

*Methodist Episcopal.*—During the existence of the

poll parish the several families of Methodists here joined in support of religious worship with the other denominations, and occasionally had a preacher of their own belief. In the year 1832 they for the first time maintained separate worship in Southbridge. Their meetings were held in the district school-house in the Globe Village for a period of nearly six years. The Rev. Hezekiah Davis, of Dudley, conducted services there the first year or two.

When their church was formed, in 1834, the Methodist Conference provided for this new church. Rev. F. P. Tracy was placed here, a young man about nineteen years of age. He was an able scholar and possessed remarkable powers of eloquence. The church and society increased rapidly under his ministry. It soon became necessary to obtain larger quarters to accommodate the crowds of eager listeners.

In the year 1840 this society moved into the second story of the old Globe Factory, and held their meetings there about three years. At the close of this period it was decided to take measures for erecting a meeting-house. An eligible location was obtained through the liberality of Jedediah Marcy, Esq., and during the year 1843 the Methodist Church was built. Since 1870 it has been remodeled and beautified inside and out. It is located on Main Street, opposite the Marcy house.

The present number of church members (1888) is one hundred and seventy-eight. The Sabbath-school, George T. McVey, superintendent, has two hundred members. The ministers furnished them by the Methodist Conference, since they entered their own house, are as follows: Rev. Messrs. Stephen P. Cushing, 1844; L. R. Thayer, 1845-46; Chester Field, 1847; Mark Staples, 1848-49; Charles McKedding, 1850; William R. Raynall, 1851-52; David Sherman, 1853-54; Joseph Denison, 1855; John Caldwell, 1856; J. B. Bigelow, 1857-58; Ichabod Marcy, 1859-60; I. W. Morey, 1861-62; N. D. George, 1863; T. J. Abbott, 1864; J. W. Lewis, 1865-67; W. A. Braman, 1868-69; William Silverthorn, 1870-72; W. A. Nottage, 1873-75; John C. Smith, 1876-78; E. S. Best, 1879; J. M. Avann, 1880-82; G. Beekman, 1883-84; W. J. Pomfret, 1885-87; N. Fellows, 1888.

*The First Universalist Society.*—Universalism was strong, even in the days of the parish, and they continued their right and occasional occupancy in the parish meeting-house until it became exclusively the property of the Baptist Society in 1835.

In 1838 the form of constitution as contained in the Revised Statutes of Massachusetts, in Chapter XX., Sections 26, 27 and 28, was circulated, and eighty signatures were obtained as male members. Preliminary steps having been taken, the first meeting of the society was held at the New England Hotel (located on the present site of the Edwards house), April 14, 1838, and was called to order by Benjamin D. Hyde, Esq., when the proper officers were elected for the organization of the society. It was voted that the society

be called by the name of The First Universalist Society of Southbridge.

Their meetings were held, first in Dr. Hartwell's Hall, afterwards in the then new Town Hall. Their present church building, corner of Hamilton and Main Streets, was erected and the bell purchased in 1842. Pastors: Rev. Messrs. John Boyden, 1838-40; Franklin Whitaker, 1841-43; J. M. Usher, 1844; R. O. Williams, 1845-46; Day K. Lee, 1847-49; B. F. Bowles, 1850-51; Mr. Cambridge and Mr. Eliot, 1852; J. W. Lawton, 1853-55; John Nichols and B. F. Bowles, 1856; W. W. Wilson, 1857-63; A. B. Hervey, 1864; F. C. Flint, B. V. Stevenson, Frank McGuire, 1882-88; Ephraim A. Reed, 1888. Sunday-school superintendent, George C. Winter.

*Evangelical Free Church, Globe Village.*—This church had its origin in a movement of some of the members of the other evangelical churches of this town. A conference was held in this village in December, 1853, when it was unanimously decided: "That the necessities of this village require established preaching and the ordinances of the gospel; and that it is the duty of Christians in this vicinity to unite in the support of this object." At a meeting held January 21, 1854, the Rev. G. Trask, of Fitchburg, Rev. Oakman S. Stearns and D. Sherman, of Southbridge, were present and united their efforts in sustaining the measures for laying the foundation of this church. Statements of the necessities and motives for prompt action in its favor were made by L. W. Curtis, M.D., George Hanson, Robert Elliot and Oliver Plimpton. The Evangelical Free Church was then organized, with twenty-nine members,—eleven males and eighteen females,—who were originally connected with the Congregational, Baptist, Methodist, Presbyterian and Protestant Episcopal Churches.

Public worship was held in Gothic Hall until 1869, when the Hamilton Woolen Company placed at the disposal of the society a beautiful and capacious brick church.

The success of this movement has proved that Christian unity, ignoring sectarian divisions, does not decrease the interest felt for religious services, but, tends to greater sympathy and purer motives, producing harmony and prosperity. Number of members in the church, one hundred and sixty-one. The Sunday-school numbers one hundred and forty, B. U. Bugbee, superintendent. Pastors: Rev. Messrs. J. Cunningham, 1855; W. C. Whitcomb, 1856-57; Henry Loomis, 1859; Thomas Morony, 1860-63; Martin L. Richardson, 1863-66; Austin Dodge, 1867; Frank A. Warfield, George A. Jackson, 1878; G. H. Willson, 1878-80; Rev. Sylvanus Hayward, installed December 28, 1880, is the present pastor.

*Catholic Church of St. Mary's.*—In the year 1840, month of September, the Rev. G. Fitton, afterwards pastor of South Boston, called the Catholic people together at the house of Lawrence Seavy in Globe Village. There were present at this first meeting

twelve persons. For the next six years they were visited about twice a year by the following priests, viz.: Rev. G. Fitton, 1840-43; Father Williams, 1844; Father Gibson, 1845, and Father Logan, 1846, the last named being the first to visit them on Sunday. Afterwards the Rev. John Boyce, of Worcester, found it necessary to engage the town hall every two months to give service to this people. Having decided, in 1852, to erect a church, Mr. Wm. Edwards generously gave them the land for a location, upon which they commenced July 12, 1852. On Sunday, May 1, 1853, their church was dedicated under the invocation of Saint Peter by the Rt. Rev. J. B. Fitzpatrick, Bishop of Boston. In August, 1858, the Rev. James Quan was appointed pastor here and at Webster, as one parish.

In September, 1865, the Catholic Church of Southbridge was set aside as a parish by itself, and a pastor, Rev. A. M. Barrett, D.D., appointed for it. The parish, as then organized, included Southbridge, Sturbridge and Charlton, and numbered about two thousand souls.

The Rev. Dr. Barrett was dismissed from this service in the autumn of 1869, when followed the division of this first society.

The Rev. J. McDermott was in charge of the Irish portion about a year; then the Rev. John Kremmens was assigned by Bishop O'Reilly, of Springfield, to the pastorate.

Father Kremmens was "a man of great strength of will, and power and capacity to build, guide and care for his charge, and to lead it on to a surprising unity, strength and prosperity—constant and successful." The parsonage was burned soon after he came here, but the present one was soon built. The old church was removed to the west side of the lands, the surface of the lot was graded and set out with trees, the new and commodious edifice for worship was erected and all these were paid for during his services here, besides the neat little chapel at Fiskdale.

"Those grounds, embowered with shading trees and carpeted in nature's living green, wherein he lived his cheerful, helpful life and serenely died—wherein his remains now lie, at his request, entombed beneath the shadow of the beautiful church edifice he designed and built as a monument of his taste, and of his faith in his work in behalf of his people—will long be looked upon, as time shall pass away, as the evidence of his genius and ability to surmount obstacles and inspire others with something of his own sense and enterprise and energy." He died July 18, 1886, and was buried near his beautiful tree-embowered church. Over his grave has been placed a fine monument, in which is canopied a portrait bust chiseled in enduring marble.

The Rev. James Donohoe is the present pastor of St. Mary's.

The French Catholics withdrew from the Irish the latter part of the year 1869, under the charge of Rev.

M. F. Le Breton as priest. The Notre Dame Church, the largest house for public religious worship in this town, was erected by them on Pine Street upon lands adjoining those of the old society. The Rev. M. F. Le Breton was succeeded by Rev. G. E. Brochu, who at present officiates as priest of Notre Dame.

**SCHOOLS.**—School districts, seven in number, were established when the town was organized in 1816; and so remained, with little alteration as to territory, while the district system was in operation.

In 1868, March 2d, by vote of the town, the several school districts were abolished; and the town entered upon and took possession of the property of the districts, in accordance with the provision of the general statutes, chapter xxxix., section 3.

The management of the public schools by the town has been in accordance with the provisions of the general statutes, from time to time enacted; adopting such changes as the needs of the town and the spirit of the times have demanded.

A committee of six, serving three years, two of the number being elected annually and two retiring, constitutes the School Committee of the town. A superintendent of schools is employed by the year to devote his whole time to the school interests. The report of that officer, Mr. J. T. Clarke, for the year ending February 29, 1888, being the third of the series of the annual reports of the superintendent of schools, furnishes statistics from which is obtained the following:

The town supports a High School, eighteen graded, and three ungraded schools; also evening schools to answer the requirements of the "Illiterate Minor Bill" of June, 1887, are established.

"The May enrolment of the children of school age gave 1515, an increase of 96 over the previous enrollment. The public schools have enrolled 999, which is 111 more than last year. The parochial school reports 625 as the number enrolled, with an average attendance of 490. Allowing for those over 15, and for the duplicate enrollment of the few who have attended both the parochial and the public schools a part of the year, the result indicates that there are very few children of school age in town who have not attended school a part of the year."

The total expenditures of the town, less the permanent repairs, for the year was \$14,608.15.

A High School was established in 1841, and maintained by private contribution until appropriations were made by the town beginning in 1854. A room in the upper story of the old town-house was occupied by the High School until that building was taken down in 1887. Very fine accommodations in the lower story of the new Town Hall-High School building combined will be furnished at an early day.

The Southbridge Public Library was established by vote of the town March, 1870, at which time one thousand dollars and the dog fund, \$176.17, was ap-

propriated. At first the books were kept in Whitford's Block, but on the 1st of January, 1872, the collection was removed to the commodious rooms in Ammidown Block, designed expressly for the purpose.

By the report of March 1, 1888, the library at that time contained 12,141 books and 1557 pamphlets and periodicals unbound. During the year the total number of books consulted at the library was 3199; total number of volumes taken for home use, 14,949. A reading-room is connected with the library, which is also supplied with current periodicals. A museum, containing natural curiosities and antiquities, is in the same building. Miss A. J. Comins is the librarian, and Miss J. S. Smith, assistant.

**SOCIETIES.**—There are two Masonic Lodges, viz., the Quinebaug Lodge, F. and A. M., and Doric Chapter, R. A. M., meet at Masonic Hall, Main, corner of Hamilton Streets; Phoenix Council, No. 333, Royal Arcanum, meets in their hall in Ammidown Block, Main Street; Southbridge Lodge, No. 47, I. O. O. F., meets at Odd Fellows' Hall, Savings Bank Building; Ancient Order of Hibernians, organized in 1873; St. Jean Baptiste Society, meets at Memorial Block, Main Street; St. Mary's Total Abstinence Society, meets at their room in Chapin's Block, Hamilton, corner of Crane Street; and many more of a social, literary, musical or benevolent character. The Good Samaritan and the Woman's Christian Temperance Union Societies have done good work; also the Young Women's Christian Temperance Union, which still exists.

A Young Men's Christian Association was organized in 1882, and started off very auspiciously. A Star Course of Lectures has been instituted, and kept up each winter season. Their rooms, in Edwards' Block, are open every week-day evening until ten o'clock. The association has purchased an eligible site, corner of Main and Elm Streets, now occupied by the "Columbian" building, where they contemplate erecting, at some future time, a suitable edifice for the prosecution of their work. President, George W. Wells; Vice-Presidents, F. W. Eaton and B. U. Bugbee; Executive Secretary, C. D. Munroe; Clerk, F. C. Hill; Treasurer, E. A. Wells.

**BANKS.**—The Southbridge Bank was incorporated in 1836; capital, one hundred thousand dollars. This bank was authorized to increase its capital stock fifty thousand dollars in 1854, which sum was subscribed and paid in the same year. It was converted into a National Banking Association under the act of Congress of June, 1864, and commenced business as such April 1, 1865, with a capital of one hundred and fifty thousand dollars. The presidents of the Southbridge Bank and Southbridge National Bank have been as follows: Samuel A. Hitchcock, 1836-52; Jacob Edwards, Jr., 1852-62; Samuel M. Lane, 1862; Jacob Edwards. The cashiers have been: Samuel M. Lane, 1836-62; Henry D. Lane, 1862-67; Francis L.

Chapin, 1867 to the present time. Southbridge Savings Bank, incorporated by an act of the Legislature, approved April 28, 1848, and commenced business in June following. Ebenezer D. Ammidown, Esq., was elected the first president, in 1848, and continued till 1849; he having resigned, Dr. Samuel Hartwell was elected his successor in 1850. Manning Leonard, Esq., was chosen the first secretary, and Samuel M. Lane, Esq., treasurer. The present officers are: President, Robert H. Cole; Treasurer, C. D. Munroe; Vice-Presidents, S. Dresser, C. A. Paige and C. A. Dresser; Secretary, C. D. Munroe.

NEWSPAPERS.—Beginning in 1828, when there were but two other papers in this county, Pierpont Edwards Bates Botham started the *Reformer and Moralist*, a four-page paper, nineteen by thirteen inches, advocating firmly the cause of temperance, upon the total abstinence principle. The name of the paper, after the first year, was changed to *The Moralist and General Intelligencer*. It was located in the old brick house opposite the residence of the late Dr. Hartwell. Mr. Botham failed, and the property passed into the hands of Moses Plimpton, who sold it to Josiah Snow, of Providence. Under the direction of L. H. Goland the *Southbridge Register* appeared in February, 1829. In 1832 Mr. Snow sold the property to Joslin & Tiffany, who, on the 7th of February 1832, issued the first number of *The Village Courier*. Edwin D. Tiffany wishing to conduct a political paper in the interest of the Whig party, bought out Milton Joslin, and hung out the Henry Clay flag in August following; while an opposition paper, called the *True Republican*, supporting Andrew Jackson, was started by H. G. O. Parks, and continued until the close of the campaign. The last issue of the *Courier* was No. 52, on the 31st of January, 1833. In 1830 the *Ladies' Mirror* was started. Each number contained eight pages, nine by eleven inches. One volume and a few numbers of the second were issued, George W. H. Fiske, Josiah Snow and W. W. Sherman successively publishing it. We have no account of any printing in this town from that time until 1853, in October, when W. F. Brown, of Brookfield, and W. L. Greene started the *Southbridge Press* in a house on the site of the C. A. Dresser house. Nine numbers only of this paper were issued by the above firm. They sold the paper to Sidney Clarke, who, in January, 1854, recommenced the publication of the *Press*. Later he associated Clarke Jillson with him, and the paper was issued by them until 1856, when Mr. Clarke was again alone, continuing until 1857, when E. A. Denny bought and published it until 1858. Then Mr. Charles L. Newhall started the *Saturday Morning News*, which, in turn, in 1860, gave way to the *Quinebaug Item*, of O. D. Haven.

The *Southbridge Journal* superseded the above paper in 1861, and was issued by Henry C. Gray until August 17, 1868. William B. Morse became proprie-

tor and editor and conducted the business till December, 1871, when George M. Whitaker became his associate. Mr. Whitaker became sole proprietor and editor, 1874, in January. Under the able management of Mr. Whitaker, the journal has been brought to rank among the best, and its influence in favor of education, temperance and good morals is outspoken and decided. In 1887 Mr. Maitland P. Foster became sole proprietor and editor of the journal.

The *Enterprise* was started in 1874, by Charles L. Newhall and P. L. Schriftgiesser. The *Journal* office was burned out in December of '74, and the outfit of the *Enterprise* was sold to Mr. Whitaker, of the former paper.

In 1878 Mr. William W. Corbin started the *Transcript*, which did not live a year.

The *Southbridge Herald*, started by Mr. W. W. Corbin in 1881, was a success, and gained a firm foothold in the community before the death of Mr. Corbin in 1884. The present editor and proprietor, Mr. William T. Robinson, took the management in 1886, and by his enterprise and ability has brought the *Herald* to be one of the best of country locals.

A paper in the French language, called the *L'Etoile de l'Est*, was started in 1872 by C. Desmarais; but the portion of the community even then, who could not read the English papers was too small to give it adequate support, and it was discontinued.

MUTUAL GAS-LIGHT COMPANY.—President, Hiram C. Wells; Treasurer, C. A. Dresser; Directors, C. A. Dresser, Hiram C. Wells, Andrew Hall, I. P. Hyde, J. M. Cochran.

SOUTHBIDGE ELECTRIC LIGHT COMPANY.—Incorporated in 1887 with a capital of fifteen thousand dollars. President, Chester A. Dresser; Treasurer, Hiram C. Wells; Directors, C. A. Dresser, Andrew Hall, E. I. Garfield, H. A. Pattison, Thos. T. Robinson; Clerk, J. M. Cochran.

AQUEDUCTS.—The first aqueduct company in Southbridge was organized in the year 1825. The principal object was the introduction of water to the new hotel, built that year on the site where the Edwards house now stands. The proprietors were Luther, Larkin, Oliver and Holmes Ammidown, owners of the hotel, and Elisha Cole.

The *Southbridge Aqueduct Company* was organized June 22, 1831. It was originated by Holmes Ammidown for the purpose of introducing water to his dwelling-house, erected in the year 1830, and with that view the water was conducted to a reservoir near the house. From that point, now the residence of Mr. C. A. Paige, the water was distributed to the shareholders, about fourteen in number, comprising nearly all the dwelling-houses at that time in the village.

The *Southbridge Water Supply Company* was organized in 1881. President, F. L. Chapin; treasurer, F. W. Eaton. This company entered upon the work of furnishing the more copious supply of water,

which was the pressing need of the village. A reservoir was made on elevated land southwest of the village, and the laying of pipes has progressed from year to year. In 1888 a new reservoir was constructed, on the same stream, of larger dimensions, and in the most thorough and scientific manner. This reservoir is of an average depth of sixteen feet, and has a surface of four acres.

**FIRE DEPARTMENT.**—The manual force consists of a chief and four assistants, two steamer companies of fifteen men each, and two hook-and-ladder companies of ten men each; also eleven horses subject to the call of the department. Chief, Calvin Clafin; first assistant, A. H. Cozzens; second assistant, B. C. Stone; third assistant, J. W. Robinson; fourth assistant and clerk, Michael Egan.

**RAILROAD.**—A road from Southbridge to Blackstone, about thirty-four miles, was chartered May 1, 1849. The completion of this road, so anxiously looked for by the people of this town, was not accomplished until 1866. Other sections making a through connection with Boston, having been previously completed, the entire line to the depot in Southbridge was finished by putting down the last rail at 5½ o'clock P.M., November 9, 1866, when the first train of cars, the same evening, having run from Boston over the whole line, entered the depot grounds.

This point is now the terminus of the "Southbridge Branch" of the New York and New England Railroad.

The road furnishes the convenience of outside communication and of freight transportation, which has made possible the recent remarkable growth of the town.

**DISTRICT COURT.**—The First District Court of Southern Worcester was established by an act of the Legislature, approved May 26, 1871, to take effect the first day of August following. The jurisdiction of this court embraces a district composed of the towns of Sturbridge, Southbridge, Charlton, Dudley, Oxford and Webster. This court consists of one standing justice and of two special justices. Hon. Clark Jillson, the first appointed standing justice now (1888) holds that office. Frederick W. Botham, Esq., of Southbridge, one of the two first appointed special justices is deceased, and Elisha M. Phillips, Esq., of Southbridge, has that position. These courts are held for criminal offenses on Monday, Wednesday and Friday at Southbridge, and on Tuesday, Thursday and Saturday at Webster, in each week, except legal holidays; and for civil business in Southbridge on Monday, and at Webster on Tuesday of each week, and at such other times as may be fixed according to law.

**AGRICULTURE.**—The soil of this town is usually good; some tracts may be called excellent.

Several good farms have remained in the families of the early settlers; more proportionally, perhaps,

than is usual. In the southeast part of the town Mr. Daniel Pratt lives, where his ancestor, Henry Pratt, settled on lot No. 42, second division, surveyed in 1733, and drawn to the original right of Ephraim Partridge. Next north of Mr. Pratt is Mr. W. Morse, who lives where his ancestor, Daniel Morse, settled on lot No. 41. In the southerly central part of the town Mr. A. H. Morse lives where his great-great-grandfather settled before 1738, on two lots: No. 17, originally the minister's right, Rev. Caleb Rice; No. 18, drawn to the original right of John Shearman, who sold his shares, in 1735, to Ezekiel Upham.

The next farm north of the last-named is that of James H. Mason, on lot No. 16, drawn to the original right of Ichabod Harding; has been in the family since 1738, when Jonathan Mason bought of David Morse.

The Clark place, on the road to Lebanon Hill, has been in the family since 1744. It was lot No. 33, originally drawn to the right of Joshua Morse.

In the north part of the town Provostus and W. F. McKinstry occupy lands upon which their ancestor, William McKinstry, settled, as mentioned in another place.

The farms above mentioned, to which may be added, in the southeast part, those of Hiram and Manson Morse, A. Haskell, Lucien and the late L. A. Lyon; in the southwest, the farms of the late Lewis Morse, A. J. Plimpton and A. Marcy; north of the river, the late T. N. Harding, Nathan McKinstry and others in various parts of the town, little, if any, less worthy of mention, afford examples of thorough and successful farming in the conservative style, new methods being adopted to some extent. The well-known farms of Dr. L. W. Curtis, George L. Clemence and W. H. H. Cheney furnish fine examples of progressive agriculture.

As reported in the census of Massachusetts of 1885, there are 2108 acres under cultivation, including grass land and orcharding, and 3965 acres in permanent pasture in the town. This amount of land is divided into 77 farms of sizes ranging from less than 2 to over 500 acres; about half of the number containing between 100 and 300 acres.

The number of farm laborers was 129, owners and others making up the total of 217 employed in agriculture. The total value of agricultural products was \$102,206.

The first town-house was built in 1837-38, at a total expense, including land, of \$3809.78. The town's portion of the United States surplus revenue of 1837 (a part of which was distributed to the States that year) was appropriated to this use. The walls were of brick, two stories in height, and a small cupola on the top of the building. The lower story was fitted up for a town-hall, and the upper for the High School.

When the town decided, in 1887, to erect a new

building on the same spot, the old town-house was taken down.

The Town Hall-High School building, now being built, is seventy-five feet in width and one hundred and nineteen feet in length, and will contain the following rooms, viz.:

In the basement, two play-rooms, laboratory, boiler-room, water-closets, etc.

In the first story, a school-room for the High School, two recitation-rooms, one for a library, one for the superintendent of schools, a small hall, a memorial hall, town clerk's office, etc.

In the second story, a town-hall, with capacity to seat twelve hundred and fifty persons, and four large rooms to be used in connection with it.

The structure has a granite basement, and above that the materials are bricks, brown-stone and terracotta. There will be a tower one hundred and thirty-seven feet in height.

The whole building will be a very substantial structure, and for adaptability to the purposes intended and for architectural appearance, it will rank in the first class in the State.

The corner-stone was "laid by all the rights of the Masonic Order" by the M. W. Grand Lodge of Massachusetts. It was just eighty-eight years from the dedication of the first meeting-house in old Honest-town to the laying of the corner-stone of the grandest structure ever erected in Southbridge. These events occurred—as did also the raising of the frame of the old meeting house in 1797—on the 4th of July, and represent epochs in the history of the town.

**MANUFACTURES.—EXISTING CORPORATIONS ON THE QUINEBAUG.**—*Litchfield Shuttle Company*, incorporated in 1878, with a capital of twenty-one thousand dollars. The President is P. T. Litchfield; Treasurer, John M. Cheney; Clerk, Frank C. Litchfield. Their plant is located on the Quinebaug, between Westville and Globe Village, where they have one of the largest and finest factories for the manufacture of shuttles in this country. They produce shuttles and shuttle-irons and are also sole manufacturers of the Thompson patent adjustable tension eye-shuttle. None but the most thoroughly seasoned stock is used, and their customers number many of the fine, large mills both in New England and the South. Their reputation as manufacturers of a high grade of shuttles is second to none.

The *Hamilton Woolen Company*, with a corporate capital of two hundred thousand dollars, organized June 29, 1831, as follows: Samuel A. Hitchcock, president; Willard Sayles, clerk; Samuel A. Hitchcock, Willard Sayles and Lorin Norcross, directors. The productive power at this time was five sets of machinery, with the dyeing and finishing apparatus suitable for the manufacture of broad-cloth. There were twenty-eight broad looms, and there were manufactured in the first year of their operations forty

thousand seven hundred and seventy-eight and one-half yards of broad-cloths.

The factory buildings were the old "Globe" mill, which gave name to the village, and is now the carpenter's shop standing near the bridge, and the "Wolcott brick mill," which has given place to the larger structures of the "Print works."

To illustrate in a small measure the growth of business at Globe Village, the larger constructions and improvements, with the increase of capital stock, may be briefly mentioned.

The "Big Dam" was raised in height about three feet above its former condition, and greatly strengthened; the great six-story brick mill was erected and filled with machinery 1836-38. This more than doubled the productive capacity for making broad-cloths. Monthly payment to employés was inaugurated, the manufacture of delaines introduced, and the wooden mill near the dam erected in which to make the cotton warp in 1844. An increase of capital stock was granted in 1845 to five hundred thousand dollars. An act for the further increase of the capital of this company to one million dollars was granted by the Legislature and approved February 14, 1846, and in September, 1849, the company voted to issue new stock to the amount of one hundred thousand dollars, which increased the paid-in capital to six hundred thousand dollars. The same year the brick mill near the big dam was erected. December 9, 1850, the large six-story brick mill was destroyed by fire. It was rebuilt in the year 1851, with the addition of the two-story wing.

The lower mill, near the depot and opposite the Cliff, was erected in 1860, and was put in operation in 1864. In 1861 the big dam was greatly strengthened and made a substantial and durable structure; also, this year, the print-works were greatly enlarged and improved.

In 1865 the company made a large addition to their reservoir supply of water by the construction of extensive works in the town of Holland, which insures a constant supply. The great dam was raised again to the amount of four feet above its former height, about 1872. The whole plant, flowage and all, occupies the river fully a mile, of which the company owns the land on both sides, with numerous tenement houses, business blocks, other building and farm-lands.

Since 1873 the Hamilton Woolen Company have used their reserve funds in the purchase and fitting up of the old Salisbury Mills at Amesbury, Massachusetts; consequently no further enlargement or improvement has been made at Globe Village. They are now running at this place 25,632 spindles and 942 looms, giving employment to 1097 hands. The yearly production of worsted dress goods and cassimeres is 12,000,000 yards.

Samuel A. Hitchcock had charge of the works here from the organization of the company until 1836.

Samuel L. Fiske was agent from 1836 to 1846. Joshua Ballard, Jr., succeeded Mr. Fiske as agent, which position he held until elected treasurer of the company in 1865, when his brother, Gayton Ballard, succeeded him as agent.

The present officers in charge of the works at Globe Village are: Mr C. A. Coleman, treasurer; and Mr. John Tatterson, agent. Mr. Tatterson commenced his agency here in the beginning of the year 1878.

*The Central Mills Company.*—The corporators of this company were: Chester A. Dresser, of Southbridge, Samuel and William Foster and T. A. Randall, of Providence, R. I.

The manufacturing interests of the company have been successfully managed by Mr. Chester A. Dresser, the resident proprietor, to the present time. Mr. Dresser is now president and treasurer of the company, and his son, Mr. Henry B. Dresser, is the superintendent.

At a regular semi-annual meeting of the company in July, 1888, it was decided to build an addition to the wing on the east side of the mill—the new part to be one hundred and twenty-five feet in length by sixty-five feet in width, and three stories high. This (January, 1889) has been accomplished. The additional room increases the machinery from 6000 spindles to about 10,000, and the looms from 150 to above 260; this, with the improvement in machinery and methods, will more than double the productive capacity of ten years ago.

*Southbridge Steam Laundry*, owned by Mr. William P. Plimpton, is the next on the river.

*American Optical Company, Manufacturers of Spectacles and Eye-glasses, in Gold, Silver and Steel.*—An examination of the industries of Southbridge reveals the fact that there are several extensive enterprises carried on here which demand special attention at our hands, and which will arouse the interest of the reader, not only by their magnitude, but by the pre-eminence which they have achieved. Foremost among such is the enterprise of the American Optical Company, known throughout the world as manufacturers of lenses, spectacles and eye-glasses, in gold, silver and steel. The character of the business and the impetus which its prosecution has given to the general thrift of this community make it a fit theme for comment, and entitle it to a prominent place in the pages of this volume. The business was first inaugurated, in 1833, by Mr. William Beecher, who is still an honored resident of Southbridge. About 1842 he disposed of the business to Messrs. Ammidown & Putney, which firm was soon after succeeded by Messrs. Ammidown & Son. In 1856 Mr. Beecher returned to his first love, and, in company with Mr. R. H. Cole, now the president of the company, formed the firm of Beecher & Cole, who conducted it till 1862, when the firm of R. H. Cole & Co. was organized, remaining as proprietors until 1869, when the present company was incorporated. The officers of the com-

pany are Mr. R. H. Cole as president; G. W. Wells, treasurer; and H. C. Cady, superintendent. The main factory, used for the manufacture of spectacle and eye-glass frames, is a three-story frame building, with finished brick basement, which was erected in 1872, to which additions were made in 1879, 1882 and 1886, comprising some sixty thousand feet of floor space. The lens factory was built in 1887 and is two stories in height, two hundred and thirty-two feet long, sixty-three feet wide and is specially constructed and adapted to the business of manufacturing lenses, and contains forty thousand feet floor space. This firm employs over six hundred workmen, all proficient in their work and experienced in the art of manufacturing. The machinery, much of which is extremely ingenious, and a large portion of which was designed by active members of the firm, for the special uses to which it is applied, is operated by water-power, aggregating three hundred horse-power, with steam auxiliary of seventy-five horse-power. The company have invested in the business about six hundred thousand dollars, and their output aggregates over four hundred dozen spectacles and eye-glasses per day (fifty dozen of which are gold), or one million five hundred thousand pairs per year, and much more than the above of lenses. The demand for their goods comes from all parts of the country, and also from many foreign countries. The management has brought the business to a wonderful degree of elaboration and system, and they have the satisfaction of knowing that their goods are not excelled by any in the markets of the new or the old world, and that they have the largest and most complete manufactory of the kind in the world. The company melted in the year 1888 two hundred and eighty-eight thousand five hundred dollars of gold and silver, and their pay-roll amounts to over five thousand dollars per week.

*The Lumber Yard and Manufactory* of John & L. D. Clemence is on Mechanic Street, and employs the water-power next below the American Optical Company's factory. This firm does a large business in builders' furnishings.

*Hyde Manufacturing Company*, incorporated in 1881, located on Main Street between the above-mentioned lumber-yard and Lensdale, manufacture shoe-knives, shaves and other shoe-tools. President, Treasurer and Clerk, I. P. Hyde.

**SANDERSDALE.**—This pretty little hamlet, pleasantly situated on the banks of the Quinebaug River, one and three-quarters miles from Southbridge, deserves more than a passing notice, as it has gained celebrity not only through earnest and successful endeavor on the part of the late James Sanders, from whom it derives its name, but by persistent and untiring efforts of Thomas and James H. (sons of the deceased founder), who, having been thoroughly instructed in the art of calico printing, and endowed with excellent

business qualifications, have brought the works to its present high standard.

James Sanders, now deceased, was born in Lancashire, England, in 1811, and at thirteen years of age was apprenticed to a block printer. After a seven years' apprenticeship he continued at his trade until 1842, when he came to this country and settled in Fall River, Mass., entering the employ of the American Print Works. He married in 1844, and moved to Rhode Island in 1848, and in 1850, in company with his brother-in-law, the late James Abbott, leased the Crompton Print Works. After a business connection of ten years, H. N. Slater purchased Mr. Abbott's share, and the new firm continued for nearly three years, when James Sanders took entire control.

In 1864 he purchased what is now known as Sandersdale, but at that time as Ashland, the area comprising several hundred acres of land and three or four houses, together with excellent water-power and water privileges suitable for the purposes of a print works. Having amassed a handsome fortune, he commenced the erection of the present works in 1868, and the chart hanging in the office shows the following dimensions, the buildings, being designated as No. 1, 2, 3, etc.:

No. 1. Printing building, 265 feet by 57 feet.

No. 2. Dyeing, bleaching, finishing and boiler building, 250 by 107.

No. 3. Engraving and packing room building, 115 by 48.

No. 4. Boiler house and engine-room, 65 by 50.

No. 5. Liquor shop, 70 by 40.

No. 6. Kier-room and wheel-house, 73 by 25.

No. 7. Office, 40 by 33.

No. 8. Mechanic shop, 76 by 40.

The several buildings, with the exception of the mechanic shop, which is part brick and part stone, are wholly constructed of brick, compactly built, presenting a neat and substantial appearance.

In 1870, when all was in readiness, the machinery used in the Crompton Print Works was transferred to the new quarters, the amount necessary occupying over thirty freight cars, and in the same year Mr. Sanders and family moved to Southbridge, the works commencing operations under the firm-name of T. & J. H. Sanders (sons of the founder), in the spring of 1874, and continued under their management until the spring of 1884. During that time the product consisted principally of prints, mostly shirtings and cheviots, the capacity averaging ninety thousand yards per day.

On December 31, 1884, The Southbridge Printing Co. was incorporated, and the property and plant purchased, and as the demand for specialties outside of the straight line of prints was so great, extensive alterations, especially in the dye house, were necessary, which with the addition of new and more modern machinery throughout the works, placed the new corporation in a position to successfully compete with

others who had been more favored in the past, thus enabling a production of silesias, cambrics and all kinds of cotton goods subject to a dyeing process, in connection with the straight prints.

A glance at the present production is worthy of perusal. In prints may be found shirtings of coarse and fine grades, in both narrow and wide goods; flannels and sheetings; wide and narrow cheviots; sleeve linings, from a light cheap quality to the finest forty-four inch sateen, in both loose and fast colors, especially for the clothing trade. In dyed goods the variety is equally as great, if not larger than in prints, consisting of brocades, cashmeres, Hollands, pocketings, cambrics (from an ordinary quality to a thirty-six-inch French cambric), silesias, flannels, Italians, serges, etc., etc., etc.

Water is the principal motive-power, an excellent fall being obtained, graduated to three hundred horsepower, and in case of necessity steam can be substituted, as two ponderous engines are ever ready to be set in motion, should an accident to the turbine wheel or connections thereto occur.

Considering the many varieties of work, the daily production averages from fifty thousand to seventy-five thousand yards, which is an excellent showing, reflecting credit upon the management entire.

The officers of The Southbridge Printing Co. remain the same as when incorporated, viz.:—President, Jacob Booth; Treasurer, Thomas Sanders; Superintendent, James H. Sanders.

*Southbridge Optical Company* was incorporated in 1883. The President is Mr. A. H. Wheeler; Secretary and Treasurer, Mr. B. U. Bugbee. The company manufacture spectacles and eye-glasses. They erected, in 1888, a new building upon Marcy Street, with machinery fitted up for their manufactures. The factory is of wood, two stories in height, with a brick basement, and is one hundred feet long by forty wide.

Stephen Richard, manufacturer of shoe-knives and razors, has a high reputation for quality of goods produced.

Other establishments of business or employment, not included in the foregoing list of particular mention, can only be enumerated, and are, so far as ascertained, as follows, viz.: apothecaries, 5; artist, 1; auctioneer, 1; bakers, 4; banks, 2; barbers, 4; blacksmiths, 6; books and stationery, 5; boot and shoe dealers, 9; boot and shoemakers, 6; brick manufacturers, 2; calico printer, 1; carpenters and builders, 4; carriage-makers, 4; clothiers, 7; coal dealer, 1; dentists, 2; dressmakers, 19; dry goods dealers, 8; expresses, 3; fish and oysters, 1; florist, 1; flour and grain, 5; furniture, 3; gents' furnishing goods, 5; grist-mill, 1; groceries, 17; hardware and cutlery, 4; harness-makers, 2; hotels, 3; insurance agents, 2; laundries, 2; lawyers, 4; livery stables, 5; lumber dealers, 2; marble-works, 1; meat-markets, 7; milliners, 7; music-stores, 2; music-teachers, 5;

newspapers, 2; news-rooms, 3; painters, house and sign, 7; paints and oils, 4; photographers, 3; physicians, 13; pool-rooms, 2; printers, 2; restaurants, 5; rifle-range, 1; saloons, 2; sewing-machines, 3; shoe-knife manufactories, 3; spectacle manufactories, 3; stoves, ranges and tin, 4; tailors, 4; tea, coffee, 2; telegraph office, 1; telephone office, 1; trunks and bags, 1; undertakers, 2; upholsterer, 1; watches and jewelry, 6; wood-dealer, 1.

In the month of December, 1858, the tavern on the corner of Main and Elm Streets, built of wood in 1825, was destroyed by fire, together with other buildings in the immediate vicinity. This event preceded the appearance of the first of the many fine business blocks which now enrich and adorn the town. That vacancy, and along that side of the street, was soon afterwards occupied by the ornamental and massive brick buildings erected by Messrs. William C. Barnes, Sylvester Dresser, and William and John Edwards (last two now deceased)—names identified with the last thirty years of the town's history and progress. Besides the long line of first-class accommodations for trades people and employments, there are the Memorial Block Hall, Edwards Hall and Dresser Opera-House.

Daniel Whitford and Elbridge Ellis built on the opposite side of street, corner of Main and Hamilton, the large and fine structure bearing their names.

Hartwell's block, built by the late George H. Hartwell, is on the corner of Main and Central Streets. In 1863 a fire swept away the Baptist Church, the old parish meeting-house—then used for business purposes—and other buildings. The brick church of the Baptists was erected in '66, and what was once the "rising ground on Capt. Marcy's land, opposite Col. Freeman's barn," was leveled down, and Mr. Holmes Ammidown built his public library building in 1870 or '71. Then, on the corner of Main and Central Streets, Mr. Chester A. Dresser built the C. A. Dresser house, costing—furnishing and all—about eighty thousand dollars.

Alden's Block, built by William E. Alden, Sr., in 1878-79, is a fine structure of brick with granite trimmings and metallic cornices, standing on the site of the old Plimpton house, in Globe Village.

Recently the new bank building on Main Street and Suprenaut's Block, on Central Street, have added to the architectural appearance of Centre Village.

These buildings, with the mercantile or other establishments which they enclose, will compare favorably with those of the same class in any town in the county.

Southbridge also contains even within the limits of her villages much of quiet rural beauty. Whole neighborhoods of fine cottages, surrounded by ample grounds and smoothly-shaven lawns,—entire absence of fences and unsightly objects,—this is the enviable home, the place where the tired business man retires to the quiet enjoyments of family and friends.

In the midst of all that has been described in this article on Southbridge is the old Marcy house, erected there when all around was literally a howling wilderness. The same sturdy arms that spotted the trees for the first paths, "slashed" the trees in the first clearings, and wrought out the first homes about here, also hoisted in place the massive timbers which form the frame-work of this old house. Its simple grandeur, made beautiful by antiquity and associations, is unabashed in the presence of the finest of modern residences, though set in "pillars of gold."

## BIOGRAPHICAL.

### MANNING LEONARD.

Manning Leonard was born in Sturbridge, June 1, 1814; died in Southbridge, July 31, 1885. Among those interested in the history of Worcester County Manning Leonard was one well deserving special mention in these memoirs, both because of his connection with those who had no little part in shaping the history of the towns of Sturbridge and Southbridge, and because of his own honorable record as a citizen.

His mother, Sally Fiske, daughter of Henry, was a grandchild of both Henry and Daniel Fiske, the first white settlers in the town, who located on what is now known as "Fiske Hill" in 1731, and from one of whose descendants Fiskedale in Sturbridge was named.

His father, Rev. Zenas Lockwood Leonard, fifth in descent from Solomon, who landed at Duxbury in 1636, was born at Bridgewater 1773; graduated at Brown University in 1794 and came to Sturbridge as a Baptist minister in 1796. During his long pastorate of thirty-six years he had a more than ordinary interest and influence in the affairs of the community.

Though on a small salary, never exceeding two hundred dollars, he maintained a hospitable home, gave his children a good education (sending his eldest son through Brown University), kept free from debt and gave his family an honorable position in the community. In all household affairs he was ably aided by his wife, who was a model of quiet efficiency.

Of their seven children, *Manning* was the fifth, having a brother and two sisters older and a brother and sister younger than himself. Reared in a home of order, thrift and industry, he naturally developed such a degree of self-reliance, diligence and self-respect as gave early promise of sure and honorable success in life. Generously determining to forego the advantages of a college education, he defrayed his own expenses during a course in English and the mathematics at Amherst Academy, under the tuition of Rev. Simeon Colton, D.D., taught school a term

*Marning Leonard*

*Calvin A Farge*

at South Amherst and then, to school himself for business life, became a clerk in the dry-goods house of Tiffany, Anderson & Co., of New York City. After three years spent in an earnest endeavor to master every detail of the business, he went West in 1835, the year of his majority, and in 1838, joining with George M. Phelps, a young man also from Worcester County, established himself in business in Madison, Indiana. He prospered. In 1840 he married Mary F., daughter of Hon. Ebenezer Davis Ammidown, of Southbridge, Mass., than whom no one had greater part in making Southbridge the beautiful town it is, or contributed more to its material advancement.

In 1844 he returned to Southbridge, and first, with his father-in-law, and later with Chester A. Dresser, was for twenty years engaged in the cotton manufacturing business at what is known as the Central Mills. On account of failing health he retired from active business in 1863. Nevertheless, he did not subside into listlessness and idleness, but maintained an active interest in public affairs; was on the Board of Selectmen during the early years of the war; was a representative in the State Legislature, and for many years a member of the Southbridge Public Library Committee; a prime mover in the establishment of the Southbridge Savings Bank in 1848, he was secretary of that corporation until his death, and also was a director in the National Bank.

He was an active and consistent member of the Congregational Church for more than fifty years, and generous in his support of the great work of home and foreign missions as well as various undenominational charities.

For many years, more or less of an invalid, he traveled much for health as well as for business—twice visiting Europe, once California and many times going to the great prairie States. Yielding to a complication of diseases, he died at Southbridge July 31, 1885, having completed his seventy-first year two months before.

In early life ever striving to fit himself for the task of the morrow, while faithfully fulfilling the duties of the day, he won promotion by merit rather than sought it by favor.

In middle life a man of reserve power, whose sagacity and foresight gave him success where others failed, and being eminently a just man, he was made the recipient of many public as well as many private trusts.

In maturer years more conservative and cautious, yet never a captious obstructionist, his counsels were the more valuable because his course had been always consistent—ever securing not the applause of the many, but the approval of the best; he had been not a partisan, but a patriot.

#### CALVIN A. PAIGE.

The subject of this sketch was born in Southbridge, Mass., June 7, 1820; son of Timothy Paige, Jr., Esq., and Cynthia (Ammidown) Paige. His parents died when he was but eight years of age, and after their decease he made his home in the family of his guardian, Dr. Samuel Hartwell. At thirteen he entered the employ of Messrs. Plimpton & Lane, as a clerk in their store in Southbridge. At fifteen he went to Northfield, Vt., where for about two years he was employed in the store of Charles Paine, afterwards Governor of Vermont, and president of the Vermont Central Railroad Co. Returning home to Southbridge, he was employed until 1843 in the store of John Seabury & Co., then kept in the old Columbian Building, now standing on Main Street, known as the "Factory Store." This store was in those days an important factor in the business enterprises and trade of the town, involving large transactions and no inconsiderable number of small details, by a system of orders by which the Dresser, the Columbian and the Central Manufacturing Companies paid their operatives.

In 1844 he became clerk and bookkeeper in the employ of the Dresser Manufacturing Company. This mill was one of the first cotton-mills erected in this locality by William Sumner and others soon after 1814, when the privilege was purchased. The premises included the water-power, mill, land and tenant-houses, situated on what is known as "Dresser Hill," and in 1831 the same was purchased by Harvey Dresser, then an active, enterprising business man of Charlton, who organized the Dresser Manufacturing Company in 1834, to operate the mill. Mr. Dresser died in 1835. After his death this company was reorganized under the agency of E. D. Ammidown. Until 1845 Colonel Alexander De Witt, of Oxford, succeeded to the agency until 1850, when Calvin A. Paige was appointed agent, and operated the mill until it was destroyed by fire in 1870. May 9, 1843, Mr. Paige married Mercy Dresser, daughter of Harvey Dresser, by whom he had two children—Mary E. Paige, born April 7, 1846, who died September 2, 1848, and Calvin D. Paige, born May 20, 1848, who is now residing in Southbridge. From 1844 until he became the agent, Mr. Paige acted not only as clerk and bookkeeper, but was also practically the managing and business agent of the company during the whole period, conducting its affairs safely and prudently, and with profit to its owners. He became himself an owner of the stock of the company, and after the mill was burned sold the mill-site and water-power to the Central Mills Company, retaining the land and tenements on "Dresser Hill," which he now owns, and since then has not been engaged in any regular active business.

Mr. Paige married for his second wife Ellen Jane Scholfield, of Dudley, February 20, 1856, by whom he has one son, Frank S., born May 18, 1857, now

living in Southbridge. After 1870 the leisure time at his command, his thorough business training, habits and experience, have set him apart as a citizen well qualified and acceptable to discharge numerous public duties, in which he has been long conspicuous and of great advantage and service to the town and community for a period of more than twenty-five years. He was a leading member of the town committee to oppose the division of the town before the Legislature of 1854, and one of its most zealous and effective workers in defeating that project. In 1850 he was commissioned a notary public by Governor Briggs, and still holds that office. During the Rebellion he was appointed United States enrolling officer for the town, and in 1883, by Governor Long, commissioner to qualify civil officers; and was elected a member of the House in the Legislature of 1863. For thirty years he has been a director in the Southbridge National Bank, and a trustee of the Southbridge Savings Bank. He has been elected many times to the offices of selectman, assessor, overseer of the poor and other town offices and positions, and in all these positions he has discharged his duties with singular ability and unvarying success. His great caution, accuracy of knowledge, thorough business training, promptness and experience in public affairs have been long recognized and repeatedly called to service in town matters, and probably few unprofessional citizens are better posted in matters relating to town government and its proper administration—especially in relation to the pauper laws—or more serviceable to the public in these respects than he is. Whatever falls to his management is promptly and correctly done, and with due consideration to the public interest. His books and records are always kept correctly and with business-like completeness and care. His worth in these respects is so generally conceded by his fellow-townsmen that party politics rarely defeat him as a candidate for public office, although he is a strong party man. He has discharged numerous trusts as administrator, guardian, assignee and trustee in bankruptcy and in insolvency, and in these relations found capable, honest and efficient. He is ready to accept responsibility and to do his duty, but is guided by a conservative good sense and caution to first learn what his duty is.

Mr. Paige has long been an earnest and influential citizen in promoting town enterprise and improvements, and uniformly advocated whatever tended to these results. He sustained the plan adopted to establish the public library, and usually advocated the laying-out and grading of new streets, the building of sidewalks, the lighting of streets and the introduction of electric street lights, and was recently one of the most influential workers in obtaining the Town Hall building. He is active and persistent, ambitious of carrying his points and usually successful. He has a wide personal acquaintance, and enjoys the confidence and respect of those who know him. He is naturally

kind-hearted, cordial and generous in his association and dealings with men, and almost impulsive in his vigor and show of enthusiasm. He is a stalwart in his convictions when once formed, but cautious and conservative in forming them. He is an active and zealous partisan in politics, and always an ardent and uncompromising Republican, willing to work for the Republican cause, and a great admirer of Hon. James G. Blaine. His energy and push partake largely of his great natural spirit of enthusiasm.

The history of the town would be incomplete without special mention of the life and active career of Mr. Paige, in view of all he has accomplished for himself and for the general welfare—having so long been a prominent figure among the people in this community.

The ancestors of Mr. Paige were natives of Hardwick, Mass., where they were prominent citizens, as the town history shows. His great-grandfather, the first Timothy Paige, was a farmer, who served in the Revolutionary period as a captain of a militia company, led his company to Bennington at the alarm in August, 1777, and to West Point in 1780, and served in many town offices. His grandfather, the second Timothy, was a member of the company of "minute-men" who marched to Cambridge upon the Lexington alarm, and served for short periods several times during the Revolution.

He was a conspicuous man in public matters, holding justice courts and many town offices, and at his death, October 21, 1821, the *New England Palladium* described him as one of the oldest members of the House of Representatives; a man who united very many excellent and useful qualities, and who was universally esteemed among his acquaintances for his intelligence and unbending integrity.

The *Columbian Centinel* referred to him as "one of the oldest members of the House of Representatives of this State, an undeviating patriot and an intelligent man." He was Representative to the General Court seventeen years successively, from 1805 to 1821, and a delegate to the Constitutional Convention in 1820.

His father, Timothy Paige, Jr., was a lawyer of good standing in his profession, and of much literary taste. He was the first town clerk of Southbridge and won an enviable repute as a poet. His poems were published as written in the public journals and bore the signature of "Jacques." The last poem he wrote was published in the *Massachusetts Spy* shortly after his death, November 17, 1822, entitled "Farewell to Summer."

Rev. Lucius R. Paige, LL.D., of Cambridge, Mass., the historian of Hardwick and Cambridge, and a man of literary attainments, is a brother, and uncle to the subject of this sketch.

*Chester A. Dresser*

## CHESTER A. DRESSER.

Chester A. Dresser, of Southbridge, Mass., was born in that town on the 2d of September, 1818, and, with the exception of a few years, has always resided in that place.

His early life was similar to many another New England boy's, who has plodded his way along rugged paths, surmounting all obstacles with a fixed purpose to guide him and a determination to become a useful and intelligent man. His mother, with her three children, of which the subject of our sketch was the second, resided in what was then and is to the present day known as the Columbian Block, situated on the corner of Main and Elm Streets, at that time the property of his grandfather and now owned by the Young Men's Christian Association. When ten years of age, upon the death of his mother, he was left in charge of his uncle, Ebenezer D. Ammidown, who was appointed his guardian. His education was acquired at the district school of the village, which he attended irregularly for several years, and he was a student at Nichols Academy, Dudley, Mass., and at Monson Academy—two terms at each institution. During the winters of 1830-31 he lived in the family of Hon. Linus Childs, who was an old friend of his mother, performing the duties of "chore boy" as remuneration for his board and attending school.

At the age of fourteen he chose Dr. Samuel Hartwell as his guardian and made his home at his house when not employed elsewhere. For a short time he was employed in the store kept by Milton Joslin, but he had now arrived at the age when, in those days, it was thought that a boy should have some aim in life, and the subject of a "trade" was taken into consideration by his friends, and their advice freely given.

Learning of an opening in the village harness-shop for a boy, his guardian advised him to enter as an apprentice, but this employment not being entirely agreeable to his tastes, he sought the advice of his uncle, Harvey Dresser, and of Moses Plimpton, Esq., who was then the agent of the Columbian Manufacturing Company, engaged in the manufacture of cotton sheetings. Mr. Plimpton recommended his becoming a manufacturer, whereupon an engagement was entered into, the remuneration to be forty dollars per year and board. The price for board was one dollar and twenty-five cents per week and all lost time at the mill was deducted at the rate of forty dollars per annum, while there was no deduction for board. His initiatory apprenticeship was in the repair-shop of the company, in charge of an English mechanic, whose motto was "learn to do work well, after which do all you can."

After serving one year in the machine-shop, he was employed, in turn, in every department of the mill, learning to card, spin and weave. During these years of service, to strengthen his finances, he worked at night by moon and lamp-light, carrying in and packing wood, at eight cents per cord, and fold-

ing and packing cloth. Oftentimes the midnight hour would find him hard at work.

Feeling that he was yet deficient in the mathematical education necessary for a thorough knowledge of the business which he had chosen, he attended school for three months during two winters, and devoted all his leisure time during his apprenticeship to the study of those problems which he had to solve and in the improvement of his handwriting. When the "financial crisis" of 1837 came, the mill was stopped during a part of that year, and he worked at farming through the summer, and took a position late in the fall as overseer of the warp-spinning, when the mill resumed operation. Being anxious to gain a more thorough knowledge of the weaving of cotton fabrics than the facilities of the small weaving-room at this mill afforded, the following spring he obtained a situation in the weaving department in charge of Nelson Drake, at the Fiskdale Mills.

"What wages do you expect?" asked Mr. Drake. "Give me whatever you think I am worth; I am not seeking wages, but a knowledge of the business in all its details," was the reply. So acceptably did he perform his duties that his wages were constantly increased while he remained in this department. In the spring of 1840 he entered the company's counting-room to obtain a knowledge of mercantile, manufacturing and double entry book-keeping, under the instruction of Avery P. Taylor. His career as manager began in September, 1840, when he was engaged to take charge of a mill of four thousand spindles at Swift Creek, near Petersburg, Va., where he remained for two years. He then returned to his native town, in feeble health, and was seriously ill and incapacitated for business for some time.

In November, 1842, he assumed the management of the cotton-mill located at Westville (a village in the westerly part of the town), and at the same time kept the "factory store."

He was married to Mary C. Bartlett, of Petersburg, Va., in 1843, and in the spring of 1845 removed from Westville to take charge of the Dresser Mill, in the Centre village, succeeding Benjamin F. Kimball as superintendent. It was then that he established a marked reputation, in this vicinity, as a manufacturer. Up to this time Mr. Kimball had been the acknowledged authority on cotton manufacturing in this locality. The work at the Dresser Mill was running badly; to use the language of a manufacturer, it was "completely bunged up." The manager and directors had made many fruitless efforts to ascertain the cause of the trouble, and finally came to the conclusion that the fault was in the raw material. A change in the quality of the cotton was consequently made, but no improvement in the running of the work resulted. The product was diminishing, the quality of work was inferior, the operatives were dissatisfied, many of them had given notices to leave, and the owners were disheartened.

The directors assembled one afternoon and sent for the young superintendent at Westville, requesting him to go over to the mill and, if possible, tell them what was the matter. He complied with their request, so far as to visit the mill; but when asked if he knew what the trouble was, replied that he would go there, take off his coat and go to work, and if, at the end of two days, he could not correct the difficulty he would not remain. The new superintendent discovered the cause of all the trouble very soon after he entered the mill, at once applied the needed remedy and very soon the equilibrium was restored.

In December, 1845, he became the superintendent of the Central Manufacturing Company, where he remained until 1857, having, in the mean time, become one of the stockholders. In response to a very urgent request from the agent of the Amoskeag Manufacturing Company, of Manchester, N. H., he accepted the position as manager of the upper level, embracing three mills and dye-house. While in the employ of this corporation he brought about great improvements in the dyeing department and in all the mills under his supervision. The Central Manufacturing Company having become financially embarrassed, self-protection rendered it necessary that he should again return to Southbridge, in 1859, and attempt a settlement of their affairs. In this he was successful, and Manning Leonard and himself became joint owners of the property and thus carried on the business until the breaking out of the Civil War, when the machinery was stopped and remained idle until November, 1863. At this time Mr. Leonard withdrew from the concern, selling his interest to Dresser, who, with new associates, established the present incorporated concern, called the Central Mills Company, which, having been thoroughly remodeled and supplied with improved machinery, has been successfully operated for the last twenty-five years, with C. A. Dresser as treasurer and manager.

#### JOHN EDWARDS.

Mr. John Edwards was born in Southbridge, Mass., June 12, 1822, and died there July 2, 1872.

He came from good, native New England stock on both sides, the son of Jacob Edwards and Hannah Marcy Edwards, who was a sister of ex-Governor William L. Marcy, of New York.

He married Mary E. Irwin, eldest daughter of Stephen P. Irwin, by whom he had three children,—one son, John M., who died in infancy, and two daughters, now living, Lizzie I. Edwards and Ida F., wife of Calvin D. Paige.

His early education was limited to the instruction afforded by the public schools of the town and a course of study at Wilbraham Academy, after which he was for a time employed in the store of William and Jacob Edwards, Jr., his brothers, who carried on the leading dry goods and grocery business of the town.

In 1844 he became a partner in the firm, which continued until 1852, when Jacob Edwards, Jr., sold out his interest to his brothers, William and John, who divided their interest, William taking the grocery department and John the dry goods department doing business under the firm-name of "John Edwards & Co." until January, 1871, when, in consequence of failing health, he retired from active business.

In 1859, when his store was greatly injured by fire in an adjoining building, he was brought face to face with the question of rebuilding or of removing to a larger field, but upon mature consideration he determined to stay and enlarge his business. He erected the large brick block on Main Street, using the two lower floors for his business and the third floor as the "Edwards Opera House,"—at this time this being the largest retail dry goods store in the county, and now considered one of the best appointed stores in this section.

The erection of this block was the commencement of the construction of the fine business brick blocks which give Southbridge its prominence and distinction, and had not a little to do with attracting attention to the business capacity and interests of the town, that led to the completion of the railroad.

His stock of goods was large, varied and expensive, and attracted the people from all the surrounding towns, his business being conducted with a system and attention to details unexcelled even at the present day in metropolitan centres of trade.

His success as a merchant established his reputation as a man of unusual business capacity.

For twenty years he was a director in the Southbridge National Bank and a trustee of the Southbridge Savings Bank.

Although of a retiring disposition, he held several public offices and represented the town in the Massachusetts Legislature of 1855.

He was an influential member of the Baptist Society, and when the church was destroyed by fire in 1863, it was largely through his labors that the present edifice was built, he contributing both time and money liberally towards its construction.

He took a deep interest in the welfare of the society, and at his decease left to the society, in trust for the benefit of the society and several Baptist institutions, a legacy known as the "Edwards legacy."

He first introduced gas into the town, putting in the gas works, first for his own use, and afterwards running them several years successfully for the public generally, until disposed of to the Mutual Gas-Light Company.

He purchased land on Main Street and improved it by opening and building Everett Street. In 1867 he built his new residence on the corner of Main and Everett Streets, which, with the fine grounds surrounding it, continues to be one of the most spacious and beautiful places in the village.

*John Edwards*

*James Blair*

In public matters he was liberal, public-spirited and enterprising in all things that tended to the growth and welfare of the town, and he was always found an active and influential adviser and worker in that direction.

This brief sketch of Mr. Edwards sufficiently indicates his rank in the social, business and political life of the town, and the confidence and respect he enjoyed as a citizen among those who knew him best, but is, after all, deficient in conveying to any but those who knew the detail of his life-work his real worth to the community in which he lived, and the distinguished part he acted in contributing to the public thrift and progress here.

He was always looking ahead, and desired to keep matters moving, and was eager to put his own shoulder to the wheel of progress, whenever occasion required it.

In all the councils upon such affairs Mr. Edwards was a leader.

He was reserved and modest in manner, courteous and obliging, sagacious and prudent, helpful in worthy instances, and kind-hearted and sympathetic.

He had traveled in this country extensively, was always an intelligent observer, and therefore interesting as a companion. In these respects, for many years he filled a large and important place in his native town, and left behind him a memory that will endure, as one of its successful and worthy citizens.

There was nothing fortuitous in his career. He was the substantial architect of his own fortunes—most truly a self-made man—and will long be remembered as such.

Measuring his worth by what he was able to accomplish in life, few citizens of Southbridge have merited so prominent a place on the scroll of fame.

#### HON. LINUS CHILD.

Hon. Linus Child, third child and third son of Rensselaer and Priscilla Corbin Child, born in Woodstock, Ct., February 27, 1803, and married, October 27, 1827, Berentia Mason.

Hon. Mr. Child passed his early years on his father's farm, with the usual attendance upon the public school. He began his preparation for college under the tuition of Rev. Samuel Backus, of East Woodstock, and completed his preparatory studies at Bacon Academy, in Colchester, Conn., in the autumn of 1820. The following winter he entered Yale College, New Haven, whence he graduated in 1824. Mr. Child did not reach the highest rank in college as a scholar, but for honest, actual mastery of the prescribed course few were before him. After he graduated he became a member of the law school in New Haven, and studied in the office of S. P. Staples. He was also under Judge Daggett's instruction. Six months later he became a student in the office of Hon.

Ebenezer Stoddard in the West Parish of his native town, and after eighteen months' study there was admitted to the bar of Connecticut. He spent a year in the office of Hon. George A. Tufts, of Dudley, Mass., when he was admitted to practice in the courts of Worcester County, Mass. He resided in Southbridge some eighteen years. During this period he was six times elected Senator from Worcester County to the State Legislature. In 1845 he removed to Lowell, and held the agency of one or two of the largest manufacturing corporations of that city. He possessed the unusual stature and frame of his father and grandfather, was cordial and genial in look and manner earnest in the promotion of all efforts for the public weal, and prominent in church and missionary interests, a member of the American Board of Foreign Missions.

In 1862 Mr. Child removed to Boston and resumed his profession, associating with him his son, Linus M. Child.

Hon. Mr. Child died in Hingham, Mass., after a short illness, August 26, 1870.

#### THE AMMIDOWN FAMILY.

This is, doubtless, a typical New England family, and, as such, the record is interesting as illustrating the origin and growth of that portion of the people of New England which has given to this part of the United States its peculiar character. It is also interesting from the fact that the peculiarities of New England character have been broadly impressed upon the whole nation, and, more than any other, have contributed to make the people of this country a distinct and original race, endowed with high purposes and strong qualities, fitting them for leadership in human progress.

The earliest mention of the family in this country appears in the records of the town of Salem in the year 1637. It is of French origin, and belonged to that numerous class of early settlers in this country known as Huguenots, who fled from persecution in their native land to find freedom for their religious convictions.

It is believed that the name was originally Amadon; but, by changes common in our early history, it may be found at this day in various forms, among which the more common are Ammidown, Amadon, Amidon and Ammidon.

The first settler at Salem was Roger Ammidown. He removed to Weymouth before 1640. On the records of that town in 1640 appears the birth of a child, Sarah, daughter of Roger and Sarah Ammidown. We next find him in Boston, where another child, Lydia, was born on the 22d of February, 1643. This is the first birth recorded in the Boston records under the letter "A." From Boston he joined a company from Weymouth, and founded the ancient town of Rehoboth, then in Plymouth Colony. Among his associates was Rev. Samuel Newman. The deed of convey-

ance of the land is from Governor William Bradford, dated 1641. The first meeting of these founders was held at Weymouth, October, 1643, and it was agreed that they should move to their new home before April, 1644. The settlement was incorporated in 1645, and Roger Ammidown is named as one of the original proprietors. His lot was located on the border of the Palmer River, about six miles west of the present centre of the town. He passed the remainder of his days at this place, and was buried there on the 13th of November, 1673. This founder of the family had a son Roger, who married, in 1666, Joanna Harwood, at Rehoboth. The family continued at this place for many years; but, about the beginning of the next century, Philip, a son of Roger—the third generation—and born in 1669, moved to Mendon. He had married, for his second wife, Ethemore Warfield, and the records of Mendon show that he had there a large family, born between 1704 and 1717. At a later period he removed to Oxford and became a proprietor in the English settlement of that town. He was also, with his wife, a member of the First Church of Oxford, when it was formed in March, 1721, under the charge of Rev. John Campbell, a remarkable man, whose descendants have held a conspicuous place in the annals of this country. Philip Ammidown died in Oxford March 15, 1747, aged seventy-eight. He had brought all his children with him to Oxford, where we find on the town records the dates of their marriages and of the births of their children. They have now grown too numerous to follow, and have become connected by marriage with many families, whose names are known in all parts of New England: the Cheneys, Davises, Chamberlains, Bullards, Curtises, Hastingses, Aldrichs, Sumners, Holdens, Tafts, Sabins and many others.

Among the children of Philip, who died at Oxford in 1747, was Philip—the fourth generation—born in 1708 at Mendon. He married, at Oxford, Submit Bullard, and lived in the west part of that town, on the fertile hills at a later period (in 1754) set off and incorporated in the town of Charlton, and still later (in 1816) included in the corporate limits of the town of Southbridge. He had three children, from whom have descended those members of the family whose names have been most widely known since the beginning of the present century. These children—the fifth generation—were Caleb, born August, 1736; Joseph, born August, 1741, and Reuben, born September, 1747. From the middle of the last century down to the present time the public records of Worcester County bear frequent evidence of the part these men and their descendants have taken in public and private affairs.

Caleb Ammidown was a remarkable man, and, as one of the contributors for founding Leicester Academy, the late Governor Washburn refers to him as follows: "He was of a class of men which were once scattered through the country, whose independence

of thought and opinion gave character and consistency to public sentiment of the community at large."

The children of Caleb remained in the town where they were born. They were among its most influential citizens. Their work may be found in the roads, bridges and important public edifices of their native town. Their tomb-stones, with the record of their birth and death, may be found in the town cemetery. But, although in the early part of this century the name was among the most conspicuous in this town, and now is among the most frequent in its cemetery, this family has been gradually dispersed, and at the present day is represented by comparatively few persons. These few, however, bear many of the traits which distinguished their progenitors. They are generally useful citizens, ready to perform the duties of citizenship, and in both public and private life acting well their part.

The children of Joseph (brother of Caleb) nearly all moved away from the place of their birth, and located in the State of New York.

The children of Reuben (brother of Caleb) also, many of them, moved to other parts of the country.

Among the children of Caleb were three men, who made their mark locally. They were: John, born in 1759; Luther, born in 1761, and Calvin, born in 1768. These men were of the sixth generation. Luther was the most widely known, and, like his father, was a member of the State Legislature. He died in 1835.

Among the children of the seventh generation was the late Holmes Ammidown, born in Southbridge June 12, 1801. He died in St. Augustine, Florida, April 3, 1883. Holmes Ammidown was a member of the State Legislature in 1836. He afterwards became prominent as a merchant in Boston, and, by his public and private character, illustrated the traits which have marked the family career from its earliest known period. An account of his life, with a portrait, may be found in the Proceedings of the Worcester Society of Antiquity, for the year 1883.

Among the children of Calvin Ammidown was Eben D. Ammidown, of the seventh generation, prominent as a manufacturer and as a member of the State Senate. His mind, remarkably strong and fertile, was constantly engaged in projects for public improvements.

The Ammidown family is now scattered throughout the United States. Although never a numerous family, it has made its mark in every generation, never reaching the highest distinctions, but always conspicuous for the qualities which make good citizens.

In former times they were generally farmers; in later years they have engaged successfully in various pursuits—farming, manufacturing, mercantile and professional.

Several of the family have already been specially named as holding prominent positions in life. Among others of note may be mentioned Philip, of Mendon,

*Holmes Aumuthou*

of the sixth generation, and his son Otis, who became distinguished as a merchant, both in Europe and America, and died in Philadelphia in 1858, aged eighty-seven. A daughter of Philip, of Mendon (Sylvia), was the wife of Jonathan Russel, who was one of the Commissioners signing the Treaty with Great Britain in 1814. A grandson of Philip, of Mendon (the seventh generation), was graduated at Harvard College in 1830. Another, of the Southbridge branch of the family, Edward Holmes (of the eighth generation), was graduated at Harvard College in 1853. Another, Albert (of the ninth generation), also of the Southbridge branch, was graduated at Harvard College in 1868.

The death of another member of this family, Mr. Hollis Amidon, has this week (January 22, 1889) been announced in the papers at Washington, D. C. It is not known to the writer to what branch of the family he belonged, but the language of the obituary notice of him indicates that the family traits found marked expression in his career. It says: "He died at the advanced age of eighty-two. He represented the Department of Agriculture in the Centennial Exhibition. He was a man of rare intellect, and contributed many articles to the press. He was much liked by all who knew him."

## CHAPTER CXXXII.

### ATHOL.

BY REV. JOHN F. NORTON, A.M.

*Location—Boundaries—Face of the Country—Productions—Ponds and Streams—Wild Animals, etc.*

ATHOL (*Pleasant Land*) lies in the northwest part of Worcester County, bordering on Franklin County. As originally surveyed, in October and November, 1732, the township was six miles square. It is bounded on the north by Royalston and Orange, on the east by Phillipston and Petersham, on the south by Petersham and New Salem, on the west by New Salem and Orange. The southwest corner probably remains unchanged; but the southeast corner, as at first surveyed, was south of the meeting-house now standing in Phillipston; the northeast corner was northeast of South Royalston meeting-house; and the northwest corner was a few rods south of North Orange meeting house. By the territorial changes which have been made since the opening of the township for settlement, portions of Athol were annexed to Royalston, February 26, 1799, and March 7, 1803; a part was set off to form Gerry (now Phillipston) in 1786; the northwest corner was taken to form Orange. A part of Gerry was restored to Athol, February 26, 1806; a part of Orange, February 7, 1816; and parts of New Salem were annexed February 5, 1830, and

March 16, 1837. (See "History of Athol," by George W. Horr, LL.D., "History of Worcester County," 1879). The original boundary lines appear to have been straight, or nearly so, but at present they are far from being straight, as a glance at any modern map of Athol will show.

The surface of the land is very irregular, affording fine scenery. Edward Everett set it down as one of the most picturesque of the Massachusetts towns. The hills are high, and through them, in a general course from east to west, Miller's River finds a winding channel. From all the heights there is a full view of Monadnock, giving the best outline of that mountain. A little south from Monadnock lie Wachusett and Watatic, while the nearer hills, Mt. Grace, Tully, Lion's Head and others, help to form a landscape of unusual beauty. The outlook from Athol Centre is especially fine, with the above-named hills as a background for the bend in Miller's River, as it comes in from the northeast. A little off from Pleasant Street, about a mile from the Centre, is a spot where, across the tops of a near grove, one can look down into a sunken valley, with ranges of hills beyond, and enjoy an almost endless variety of light and shade. "The Gulf" is in the northeast part of the town, reached by a true mountain road, but the wild scenery amply compensates the visitor. The modern custom of dispensing with door-yard fences in the establishment of new village homes, and the removal of those erected many years ago, has added surprisingly to the original beauties of the place. This custom cannot be too highly commended.

The climate of the whole region is cold, though the hills so shelter some sections of Athol as to make the winters milder than in many of the adjacent towns, but the winds sweep violently up the river, lowering the temperature of its valley several degrees.

When the town was opened for settlement the forests were very heavy, and the work of clearing the land for tillage was extremely exhausting. Huge pines, beeches, chestnuts, ashes and maples abounded. Few of the virgin trees remain, but the woodlands have become very valuable property. Of the common fruit-trees, the apple is almost the only one that secures confidence for a long term of years. Wild grapes are plentiful, and all the earlier (the e are often the choicest) kinds can be cultivated with success. The wild small fruits, such as the strawberry, the raspberry and the blueberry, abound, and have nowhere a richer flavor.

Though it has some fine farms, agriculture is not the chief business of Athol. The soil yields fair crops to the cultivator, not, however, repaying labor like the valley lands of the Connecticut River. The excellent and abundant water-power furnished by Miller's River and its tributaries offers more lucrative employment than tillage. Hence the population tends steadily towards the villages, and many outly-

ing farms have passed into the hands of new owners, some of whom are of foreign birth. Miller's River—originally the Pequog River, but unfortunately renamed for a man who was drowned while crossing it, more than a century and a half ago—has a rapid current, and supplies power for various manufacturing establishments. It is a tributary of the Connecticut. Its own feeders in passing through Athol are Tully's Brook and Mill Brook, both of which carry numerous mills that stand upon their banks.

Much the largest sheet of water in the town is Southwest Pond. Lake Ellis, near the Worcester Northwest Fair Grounds, is a picturesque spot with wooded islands and shores, and is a popular resort for picnic parties. Silver Lake lies low down among the hills near the railroad station, and is noted for the quiet beauty of its surface and shores.

The early settlers found the river and streams stocked with choice fish: trout, pickerel and salmon were plentiful. The forests abounded with small game, while the deer, the bear, the wolf and the catamount roamed through the region. The three last-mentioned animals were a source of terror and of considerable loss to the settlers. As wolves rarely attack men except when nearly starved, they were chiefly dreaded for their depredations on the calves and sheep. The bear and the catamount were more dangerous, and encounters with them, and hunting parties in pursuit of them, broke up somewhat the monotony of life in the colony. Mt. Monadnock was the stronghold of these beasts, but they raided the cattle-pens, even as far as Gardner and Templeton. The children were employed to watch the herds by day and at night they were driven into strong enclosures. A large bounty was paid for each wolf killed. The most noted wolf-hunt in the region was in the winter of 1819-20. The parties engaged in it came from Southern New Hampshire, and days were spent in the pursuit of the three-legged animal. It would invade the farm-yards of the very houses in which the hunters were sleeping and feast on the sheep and calves.

The catamount, which one hundred years ago was occasionally found in the Monadnock region, was a very formidable and dangerous beast to encounter. The last of its race was taken in a powerful steel trap, near the foot of the mountain. From the nose to the end of the tail it measured thirteen feet and four inches. For its stuffed skin the proprietors of the Boston Museum are said to have paid forty-five dollars.

In the southerly part of the town there is a sulphur spring, whose waters have been deemed efficacious in the treatment of certain diseases. It can hardly be said that these are pleasant to the taste, but they may have virtues nevertheless. At present the locality of this spring does not bid fair to become a popular resort.

Whitney, in his "History of Worcester County," published in 1793, gives us this information concerning another spring in Athol:

There is a very fine spring in this town, which issues out of a very high bank on the side of Miller's River, perhaps twenty feet above the surface of the river. The water whereof is medicinal. Many persons who have drank freely thereof have found it to act as a gentle cathartic, and some who have been poisoned, have been speedily cured by washing the parts affected therewith. Several who have been afflicted with rheumatic complaints bathed in the water of this spring in a cistern, some few years ago provided to receive them, and found great relief.

And what is worthy of notice is this. These waters have the same efficacy and virtue without soap in washing of persons which other waters have with.

This spring, which was so celebrated a century ago, is supposed to be identical with the one that issues from the north bank of Miller's River, very near the north end of the bridge that is crossed on the way from Athol Centre to Chestnut Hill and Royalston, but whether its remarkable value for economic purposes is as great as formerly, is somewhat uncertain.

## CHAPTER CXXXIII.

### ATHOL,—(Continued.)

#### PAQUOAG<sup>1</sup> ON MILLER'S RIVER.

*Loss of the Proprietors' Records—Efforts to Re-establish their Authority—Grant of the Township—Drawing for House-Lots—First Settlers—Perils from Indians—First Meeting-House—Second Meeting-House—Call of Mr. James Humphrey to the Pastorate—Ordination—Pastor's Home—Second and other Divisions of Lands—Acts of the Proprietors.*

THIS, as given in the original grant, was the name of the township which, at its incorporation, was called Athol. Generally speaking, the Proprietors' Records are the great store-house from which the historian of a New England town must obtain most of his information respecting its settlement and condition during the earlier period of its history.

For the most part these records were kept with commendable care, whatever else was neglected, for the proprietors' clerks were often men of education, and were justly regarded by their contemporaries as holding a most important and responsible office. But, in a very important sense, the earliest records of the proprietors of Paquoag on Miller's River are not accessible in the preparation of this history. The facts regarding this appear to have been substantially these: very soon or immediately after the grant of this township to certain individuals by the General Court of the province of Massachusetts, which must have been as early as 1734, the proprietors named in the grant chose for their clerk Dr. Joseph Lord, who, coming from Sunderland, Mass., was one of the first settlers of the township. Dr. Lord was a capable man, and, for anything that appears to the contrary, enjoyed for a number of years the confidence of all the parties concerned. But for a considerable period

<sup>1</sup> This name will be found spelled in at least ten different ways in the various records.

before 1758 a majority of the proprietors had been dissatisfied with the proceedings of their clerk, and in the month of June of that year had displaced him and appointed a new treasurer and clerk. Dr. Lord having refused to deliver up the books and papers that were in his hands to the new and legally appointed clerk, a suit was commenced against him, and all his property that could be found was attached to satisfy the claims of the proprietors. In November of 1758 the court decided that Dr. Lord must deliver up all the books and papers in question or pay £1000 in lawful money as damages and the costs of the court, amounting to £23 8s. 1d., but before this decision was rendered Dr. Lord had left the State, taking with him, if he had not previously destroyed them, all the early records and valuable papers of the propriety. Certain it is these were never recovered. Whether the property of Mr. Lord, which had been attached and was sold at auction, yielded a sum sufficient to meet these demands upon his estate is uncertain, as no complete record of this transaction was made.

The most that can be learned respecting this matter is that on March 25, 1761, the proprietors voted that their committee having this business in charge should proceed to execute "good and sufficient Deeds to such person or persons as have purchased said lands or any part of them" (meaning the estate of Dr. Lord) and adding: "And we engage for ourselves and heirs to indemnify the said Committee, who have managed the controversy with said Lord on behalf of the proprietors and their heirs from all damages which may rise to them on account of said controversy and the sale of said lands." Measures were soon adopted to replace the lost records as far as possible, and for this purpose a petition, signed by Abraham Hill and John Caldwell, as a committee of the proprietors, was presented to the General Court in June, 1760. The result of this was that "Rev. Mr. Abraham Hill was empowered and directed to make a new Book of the Records of said Proprietors during the time that the said Joseph Lord was Proprietors' Clerk," drawing his information from all papers within his reach and "the remembrance of the Proprietors," and then to lay the same before the General Court, that it might be established as the legalized Records of the Propriety. This was done, and hence we have the Proprietors' Records as we find them in Vol. I., more than fifty pages of which are covered by material obtained in the manner indicated above. Rev. Abraham Hill, of Road Town (now Shutesbury), appears to have been indefatigable and cautious in the performance of the difficult task assigned him, and his work was as exhaustive and correct as the circumstances would admit.

But with the best intentions and the most laborious and careful research, it was plainly impossible for him to recover and replace very many important items that must have been inserted in the original records,

such as concerned the laying out and construction of some of the roads, the building of bridges, arrangements for a school, etc. Mr. Hill's name does not appear in the list of the first proprietors, and like many other clerks of similar bodies, he was not a resident of Paquoag on Miller's River.

He was the clerk of the proprietors for about four years, or until 1762, and of course the items recorded of transactions before 1758 lack, with the historian, a measure of authority.

In July, 1732, the General Court of Massachusetts opened for sale and settlement a new township in the northwest part of Worcester County, called from the Indian name of the river which passes through it, "Paquoag on Miller's River." The date of the grant was April 20, 1733.

The grant provided that the township should be divided into sixty-three equal parts, one of which should become the property of the first minister, another should be set apart for the support of the ministry and another for the support of a school, while the remaining sixty parts should afford house-lots for sixty settlers, each of whom must occupy his lot in person or in the person of one of his children.

Each settler was required to build, within three years, a house on his lot of at least "18 feet square and of seven feet stud," and to clear and fence eight acres of his land in the same period, or forfeit twenty pounds for the use of the other settlers. Each was also required to pay five pounds into the Provincial Treasury when he was admitted as a proprietor, while the proprietors were required within five years to erect a suitable meeting-house and settle a learned Orthodox minister.

These conditions were similar in most respects to those under which a large proportion of the county townships of New England were settled. In Connecticut provision was often made for two additional shares, one for the State School Fund and a second for Yale College, while in New Hampshire the proprietors were not by any means always required to occupy their lots in person or by their children, but had power to sell them.<sup>1</sup> On the second page of the Proprietors' Records, as prepared by Rev. Abraham Hill, proprietors' clerk, there is this entry under date of August 21, 1761:

The following is a list of the names of the men admitted by the Hon<sup>ble</sup> William Dudley, Chair Man of the Com<sup>ee</sup> & others, the Great and General Court's Committee, to draw House-Lots in the township of Pequoaig on Miller's River, on the 26 of June, 1734, at Concord, as Settlers of said Pequoaig."

Following this is a tabular view of the drawing for house-lots, with the location of these as north or south of the river and east or west of the highway, with the number of each. After the lapse of one hundred and fifty-four years from the date of this im-

<sup>1</sup>Of the twenty-three original proprietors of Monadnock No. 4 (now Fitzwilliam, N. H.), only a single one, Gen. James Reed, of Revolutionary fame, became an actual resident of the township.

portant transaction at Concord, and the changes that have taken place in the ownership of the Athol lands during this period, a reproduction of this table is hardly deemed necessary in this historical sketch. The curious are referred to the volume of Records named above. Only the names of the proprietors are here given, as follows:

Edward Goddard, Daniel Epps, Sr., Daniel Epps, Jr., Ebenezer Goddard, Zechariah Field, Nehemiah Wright, Richard Wheeler, Richard Morton, Samuel Morton, Ephraim Smith, Nathan Waite, John Wood, Benjamin Townsend, Jonathan Morton, Joseph Smith, William Oliver, Moses Dickinson, Joshua Dickinson, James Kellogg, Richard Crouch, Ezekiel Wallingford, James Jones, Charles Duharthy, Gad Waite, Joseph Lord, Benoni Twichel, John Wallis, Samuel Willard, John Smeed, Wm. Chandler, Jonathan Marble, William Higgins, James Kenney, Abner Lee, Abraham Nutt, John Headly, Isaac Fisk, Thomas Hapgood, Richard Ward, Samuel Tenney, John Grout, Daniel Adams, John Cutting, Samuel Kendall, Jonathan Page, John Longley, Joseph Brown, John Child, Nathaniel Graves, George Danforth, James Fay, Capt. Joseph Bowman, Francis Bowman, Stephen Fay, Israel Hamond, Benjamin Bancroft, Joseph Harrington, James Holden, Daniel Fisk.

N.B.—I transcribed the above from a List under the Hand of Joseph Lord, who has made Oath to the Truth of it, and adds the following N.B., viz.: This above mentioned List is what the Clerk of Pequoig has always made use of for Want of an Attested Copy, and also entered in their Book of Records without Attest. The above entered per

A. HILL, Prop. Clerk.

Aug. 2<sup>nd</sup>, 1761.

From the table containing the results of the drawing for lots in Pequoig, it appears that prior to June 26, 1734, a highway had been laid out, if not opened, through the township, north and south, which probably passed over "The Street," through the upper village and, crossing Miller's River somewhere in the vicinity of the existing bridge, continued over Chestnut Hill or west of it to the northern line of the grant. At the drawing for lots it is probable that this highway was confined to the plan of the township and simply aided in the location of the lots.

From an intimation given in the legislative act that created the township, it would appear that the cost of the survey and laying-out of this highway was paid from the provincial treasury, but with the expectation of its being reimbursed from the fund received through the £5 required of each proprietor, which he was to pay within one year after the survey, for the admission of settlers. The way was now prepared for the location of settlers in the new township.

Tradition asserts (for no record has been discovered respecting it) that on September 17, 1735, five men with their families arrived here from the earlier settled townships in the valley of the Connecticut River. These were Richard Morton, Ephraim Smith, Samuel Morton, John Smeed and Joseph Lord. The four first named are said to have come from Hatfield, while the last-mentioned was a physician, who had previously been established in his profession for a longer or shorter period in Sunderland, and was plainly the leading spirit in the enterprise. That they brought with them through the wilderness their clothing, cooking utensils and as much food as they could carry, is certain, but the supply of each must have

been scanty, for they made the journey on foot, and by marked trees in the thick forest. During the following winter their supplies were obtained from the Connecticut Valley in the same manner.

Most, or all, of these five families erected their huts upon The Street, but at considerable distance from one another, for the lots which they drew, and doubtless commenced clearing at once, were by no means in close proximity.

That the winter of 1735 and '36 was one of constant anxiety and great hardship with these pioneer families cannot be doubted, for in three of the huts a son was born, while warm rooms, good beds and a full supply of substantial clothing and suitable food were out of the question.

But the greatest perils arose from other sources, for not far away and on nearly all sides were Indians, not a few of whom were hostile, and the settlers must have been familiar with the fearful cruelties inflicted by the savages in Lancaster, Brookfield and other places.

The rich meadows upon the banks of the Pequoig in this township were a favorite haunt of the red tribes for a considerable period after they had deserted the neighboring regions. Here were their corn lands, which were unusually productive, and the place was easy of access, being upon the Indian trail most frequently used from the southeastern sections of New England to the Canadas. There were two Indian crossings of the Pequoig within the limits of this township—one a little above Lewis Bridge, and the other not far from the house of the late James Lamb. The remains of these are still to be seen. Mrs. Mary Rowlandson, of Lancaster (the murder of whose infant daughter, Grace, by the Indians is said to have given the name to Mt. Grace in Warwick), was taken captive by the Indians in Lancaster, February 10, 1675. She was brought to this place, as it appears from her narrative, and here crossed the "Payquage" or "Bacquag" River upon a kind of raft constructed by her captors. And it is understood that the breaking up of this favorite haunt, where some of the most cruel and perfidious Indian tribes congregated, was one of the objects of the Colonial Government in the votes that were passed in 1732 with reference to the settlement of this region.

The perils of the first settlers in this township from this source were great indeed, almost beyond conception. Penhallow, in his "History of the Indian Wars," describes the Indians "as implacable in their revenge as they are terrible in the execution of it, and will convey it down to the third and fourth generation."

When, in 1759, the colonists suddenly attacked the Arosaguntacook or St. Francis Indians in Canada and defeated them, among other things found in the settlement were six or seven hundred English scalps suspended on poles, the trophies of their barbarous

warfare. And for forty years after 1703, wherever settlements were made in New Hampshire and in the adjacent parts of Massachusetts, the Indians, incited by the French, were ready to fall upon them at the most unexpected moment, as when the people were at church or attending a wedding.

Penhallow's sickening record gives the names and particulars of the capture, torture and murder in cold blood of hundreds during this period, as well as of the fearful sufferings that the prisoners of both sexes experienced while wading through the deep snows to Canada and during their captivity, before redemption or death put an end to their miseries.

War could be no sooner proclaimed between France and England than the Indians seemed to become acquainted with the fact, as it were instinctively, when the signal would be given to renew the work of pillage, burning and butchery.

The Indians were very early instructed in the use of fire-arms and supplied with powder and balls by renegade whites, conspicuous among whom was Baron Castine, a French nobleman, who settled among the Indians in Maine, and filled his house with Indian women. Thomas Morton, the ring-leader of a company of outlaws, whose headquarters were in Braintree, Mass., was engaged in the same infamous business and severely punished for his crime.

Notwithstanding the hardships and exposures of the five families that settled in this township in the autumn of 1735, the spring of 1736 brought with it other settlers. These came from different parts of the Province, but largely it is supposed, from the Connecticut Valley, and their arrival added not a little to the strength of the colony. The common exposure led them to do everything in their power to protect one another. As soon as might be, forts were erected in different parts of the township, to which all the families might flee in case of an attack. These were built of trees set close together in the ground, with small openings between them for the free use of fire-arms.

Each fort had its well inside the enclosure and was furnished with a good supply of provisions.

Such a stronghold, with a goodly number of well-armed and resolute men and women inside, could not easily be captured or burned. Thirty years ago a number of persons were living in Athol, who distinctly remembered having seen in childhood and youth the remains of these ancient places of refuge.

One of these forts (and probably the one first constructed) was located on "The Street," nearly in front of the house then occupied by the late Mrs. Betsey Humphrey, the home of Mr. John F. Humphrey and Mrs. Ebenezer Brock in their childhood. The well of this fort, now to be seen, has long furnished water for the first parsonage, the home of the first pastor and his descendants bearing the name of James Humphrey for four generations. Where the Pequoig House now stands tradition has located a second of these forts, while a third was located northwest of the Lower Vil-

lage, on the hill which commands a view of the ancient corn-fields on the banks of Tully Brook and Miller's River.

Notwithstanding all the precautions which extended to the carrying of loaded fire-arms into the fields which the settlers were clearing, and a loaded musket into the pulpit by the pastor, the settlement did not wholly escape, for, after eleven years of watchfulness, Ezekiel Wallingford, one of the original proprietors, who lived at the fort on West Hill, fell a victim to Indian atrocity. Contrary, it is said, to the advice of his friends, he went one night from the fort to protect his corn-fields from the bears, when a ball from the gun of an Indian fractured his thigh, and he was quickly dispatched by the murderous tomahawk. Soon after the murder of Mr. Wallingford Jason Badcock was fired upon, wounded and captured by the Indians, who, according to their custom, carried him to Canada. After a few months he was redeemed and returned to Pequoig.

About this time, 1746, when the settlement had been maintained for eleven years, the peril was so great that a number of families are said to have relinquished all their improvements and to have removed, for safety, to less exposed parts of the Province. These Indians were of the Nipmuck or Nipnet tribe. Their territory John Eliot described in 1651 as "a great country lying between Connecticut and the Massachusetts, called Nipnet, where there be many Indians dispersed."

They seem to have ranged over the Province as far west as the Connecticut River and over the northern central portions of the State of Connecticut, while their villages were chiefly located in Worcester County.<sup>1</sup> Plainly nothing but the indomitable courage and strong will of the majority of the scattered settlers in 1746 saved the colony from practical abandonment.

Soon after the occurrences named above the Indians seem to have retired permanently from the region and the population of the township began to receive larger accessions from the older settlements. The first settlers, consisting of five families, received considerable accessions to their numbers, probably in the spring of 1736.

These were mostly from Hatfield or from towns in that vicinity, and plainly were part of a company that had been previously organized for the settlement of Pequoig on Miller's River. Of the physical, intellectual and moral characteristics of these pioneers something is learned through tradition, but more probably through the well-known habits and deeds of their descendants of the next generation.

The names of Aaron Smith, Samuel Dexter, Noah Morton, Robert Young, Robert Marble, Nathaniel and Eleazer Graves, and of the four brothers, William, John, James and Robert Oliver, appear upon

<sup>1</sup> See Lincoln's "History of Worcester," page 16.

the list of settlers in 1736. Most or all of these were able-bodied, industrious, resolute men in their various callings and did much to give a healthy tone to the newly-organized society of the township.

The provision made in the original grant for the establishment of religious privileges among the settlers has been already noted. Owing, doubtless, to the loss of the earliest records, we are obliged to rely chiefly upon tradition for the truth of what follows. Measures were taken as early as possible to erect a house for religious worship. This was built of logs and stood upon eight acres of land, a part of the lot of fifty-eight acres laid out for "Lieutenant Samuel Kindle on the original right of Jonathan Marble," the lot exceeding in size the others laid out at the same time by eight acres. The plan was that these eight acres should lie in common for a "Burying-place and a Meeting-house place," according to the discretion of the proprietors.<sup>1</sup>

These eight acres lay upon the north bank of Mill Brook, sixty or seventy rods southeast of the railroad station and covered the old cemetery lot, which was recovered, cleared and fenced by the town in 1859, with considerable territory north and east of this which had been under cultivation.

This first meeting-house probably stood a few rods northeast of the granite monument which the town erected at the rededication of the ancient cemetery, July 4, 1859, to which allusion will be made hereafter. From the papers discovered by Rev. Mr. Clark, it would appear that this building for church purposes could not have been erected before 1741, which was too late for compliance with the conditions of the grant. Be this as it may, the first church was doubtless erected upon that spot, with the first cemetery adjacent, according to the custom prevailing very generally one hundred and fifty years ago. The reason for the selection of this spot for the location of the church and cemetery is apparent when we consider that it lay just about half-way between the two principal settlements of the township at that date, the one being on The Street and the other around the fort on West Hill, northwest of the Lower Village. In those days foot-paths took the place of our highways, and there was plainly such a path leading from The Street, by the church and cemetery lot, to the northwest settlement.

This log church was never finished, but no such building was ever speedily finished in those days. The probability is that it was so far completed that it could be used for public worship, but how long it was used for this purpose, or by whom the religious services in it were conducted, we have no information. In some family records the title of Rev. is attached to the name of Dr. Joseph Lord, but it can hardly be supposed that he was ever a regularly or-

daind minister of the Gospel, for one hundred and fifty years ago this title was most jealously guarded.

That he was a man of marked ability is certain, and that he was a fluent speaker is probable. Without much doubt he was an exhorter or lay preacher, and conducted for some years the religious services of the early settlers.

This first meeting-house was soon consumed by fire, lighted, it has been generally supposed, by Indians.<sup>2</sup>

The site was now abandoned for this purpose, although burials took place in the first cemetery for some years longer.

The settlement on The Street or "East Pequoiag Hill," as it was called, having had the most rapid and largest growth, was soon regarded as the centre of the township, and there the second meeting-house was erected. No record is found that throws light upon the exact date of the erection of this building, its size or cost. It is said to have had, certainly at first, but a single pew, and this was doubtless intended for the family of the first minister. The house stood not far from the fort already noticed.

The proximity of these two structures was plainly a precautionary measure. As yet no "learned Orthodox Minister" had been settled in this township, according to the conditions of the original grant, and all the improvements that had been made were technically forfeited. But the Province of Massachusetts was more lenient in its treatment of such cases one hundred and fifty years ago than the land companies are now, near the close of the nineteenth century, and the settlement made sure though slow progress. A Mr. Brown preached at least one Sabbath in 1749, and the proprietors allowed him five pounds, old tenor, for his services.

Rev. John Mellen, pastor of the first church in Sterling, Mass., is supposed to have supplied the pulpit more or less during the same year.<sup>3</sup>

So far as is known Mr. James Humphrey, of Dorchester, was the first regular candidate for settlement as the minister of this township, and he commenced his probationary work as preacher early in December, 1749, and preached eighteen Sabbaths.

His services were so acceptable that at a legal

<sup>2</sup> The old tradition about the burning of the first church is contradicted by an ancient document, just received from Mrs. Mary R. Humphrey, of Dedham, widow of James Humphrey, the fourth of the name in regular succession, in which it is stated that "by setting the woods afire it caught the Meeting House, which was burnt down." This is doubtless a true statement of the case. It is added that this was a heavy burden to the people, still being desirous of continuing their religious privileges. They immediately commenced building a new meeting-house on "The Street," within about twenty rods of the fort. This also is added, "When a part was in the sanctuary a number was obliged to watch at the post of her doors with their arms at their side, to keep off their devouring enemy whilst others were worshipping God within."

<sup>3</sup> Mr. Mellen was a man of influence in the Province, and was sometimes employed to arrange civil matters with the Royal Governors and Councils. See "History of Fitzwilliam," N. H., pages 126, 127.

<sup>1</sup> See the documentary evidence bearing upon this matter in the Appendix to Rev. Mr. Clark's "Centennial Discourse," page 60.

meeting of the proprietors on the third Wednesday of May, 1750, Samuel Kendall being moderator, it was

Voted that we choose an Orthodox Minister to settle in this Place.

Voted that Mr. James Humfries, our present Preacher, be the Orthodox Minister in this Place.

Voted that we give Mr. James Humfries, our present Preacher, the Sum of Fifty Pounds, lawful Money of this Province of the Massachusetts Bay, per Annum, while he continues in the Work of the Gospel Ministry in this Place, and further add to that Right or whole Share of Land in the Township of Pequoaig laid out by the General Court for the first Minister of sd Pequoaig, of which the House Lot on East Pequoaig Hill, on the West Side of the High Way—Number Eight is part—the Sum of Sixty Six Pounds thirteen Shillings and four Pence, lawful money of the Province of the Massachusetts Bay, to be paid, one-half within One Year after his Ordination, the other half within one Year after the Payment of the first half, if he accepts of the Work of the Gospel Ministry in this Place.

This call was communicated to Mr. Humphrey by a committee, but his answer was delayed till August of the same year, for he plainly desired time to consider a matter of such importance. The answer was as follows:

*To the Proprietors of the New Township, called Pequoaig, at their Meeting, continued by Adjournment from May 16th to August 8th ensuing:*  
Gentlemen:

I received, by the Hand of Lieut. Richard Morton, a Copy of your Votes, passed at your Meeting on the 16th of May last, respecting my settling among you in the Capacity of a Gospel Minister. And in Answer thereto,—In the first Place I do heartily thank you for the good will you have expressed to me in your Invitation. After mature Deliberation upon the important affairs, I now signify my acceptance of the Salary and Encouragement you have given me to Settle in the Work of the Ministry among you in this Place, in case the Propriety will make me an Addition of Forty Shillings lawful money to your former Encouragement for my Annual Support, and if it please God in his all-disposing Providence regularly to introduce me into the Pastoral Office over you, I hope by his grace and Spirit I shall be enabled, in some good measure, to fulfil my Ministry.

So I remain, with hearty Regards, your Servant in Christ Jesus,

JAMES HUMFREY.

Pequoaig, August 8, 1750.

At the meeting of the proprietors, August 8, 1750, after the answer of Mr. Humphrey had been received it was "voted that Mr. Humfrey has Forty Shillings lawful money of this province added to the former Encouragement we have given Him for his annual support or Salary." A committee was also appointed to make arrangements respecting the proper ordination, and "to take care to send to a neighboring Minister or Ministers to Assist them in a Fast and in Gathering a church in this place."

The church was organized August 29, 1750, Rev. Samuel Kendall, of New Salem, Rev. Abraham Hill, of Shutesbury and Rev. Aaron Whitney, of Petersham, taking part in the service. The entry in the ancient church records is that they "met in Peiquage, and, after solemn prayer to God, they gathered the church, and it was Imbodied and each member signed the Covenant."

A little more than two months later the ordination of the first pastor, Rev. James Humphrey, took place. All that is known respecting it is found in the following entry in the church records:

Peiquage, November the 7, 1750. An Ecclesiastical Council, convened

in Peiquage; the council consisted of the Church of Christ in Dorchester, ye Chh. in Hatfield, ye Chh. in New Salem, ye Chh. in Roadtown,<sup>1</sup> ye Chh. in Nitchawoag,<sup>2</sup> and ordained Mr. James Humphrey paster over the Chh. and Congregation in said Place.

Attested by JONATHAN BOWMAN, Mod.

This entry was made by Mr. Humphrey, who had been chosen, or acted, as the clerk of the church, and the same hand, about eleven months later, made this additional entry: "Dorchester, Oct. the 9th, 1751, James Humfrey and Esther Wiswell was married, and the 3rd day of November we got home to Peiquage."

For about twenty years Rev. Mr. Humphrey appears to have enjoyed a peaceful pastorate. His salary was always small, and not always paid promptly, but this was doubtless true in a large majority of the county congregations in Massachusetts.

Before the expiration of these twenty years of peaceful labor the township of Pequoaig, on Miller's River, had become the town of Athol, when the payment of the pastor's salary was assumed by the town.

The lot of which he became possessed by becoming the first pastor was on the west side of the highway leading over The Street, and upon this he erected his house, the well-known dwelling of himself, of his son, General James Humphrey, and of his grandson, the James Humphrey whom not a few of the present residents of Athol well remember.

Portions of the house, as it now stands, were a part of the original structure. The second, the third and the fourth James Humphrey were born under this roof, while the first, the second and the third died there. The fourth in the succession bearing that name removed to Dedham—not far from twenty-five years ago—and died there. The old parsonage is now owned by Mr. I. L. Cragin.

The aged elms that have so long shaded the dwelling were planted by the first pastor, according to the family tradition.<sup>3</sup>

From this point the history of the first pastorate properly becomes ecclesiastical.

The meagre account already given respecting the allotment of the lands of this township may be misleading. It is to be remembered that the territory embraced in the grant was six miles square and contained thirty-six square miles, or twenty-three thousand and forty acres, including ponds and rivers. At first but a small part of this territory was allotted to the individual proprietors.

From what seems to be an authentic statement respecting the laying out of the eight acres for the first cemetery and lot upon which to build the first meeting-house, it is nearly certain that in the first

<sup>1</sup> Now Shutesbury.

<sup>2</sup> Now Petersham.

<sup>3</sup> James Humphrey (the third) had three children,—Antoinette, who married a brother of Gov. Bullock and died in Athol, leaving a son, Rufus A. Bullock, who is a lawyer in Boston; James, who married Mary D. Ripley, was a merchant in Boston, and left a widow and three children—two daughters and a son, James Humphrey, now about seventeen years of age; Fred., who died in his youth in Athol.

division only a fifty-acre lot was assigned to each proprietor. If so, but three thousand one hundred and fifty acres were included in the first allotment, leaving nineteen thousand eight hundred and ninety acres of common land to be afterwards divided as circumstances might seem to require. An attested record of the first division was doubtless contained in the book which disappeared with Dr. Joseph Lord, as already noticed; but in the volume prepared to take the place of this, and legalized by the General Court, no information respecting the first division is found.

With regard to the second and succeeding divisions of the lands owned in common after the first division, the records are now satisfactory.

In the second division thirty-acre lots were laid out, though they frequently contained from two to five additional acres. A greater or less surplusage was allowed all along, in making these various allotments, for streams, ponds, land for roads, and possibly, in some cases, for what were called waste lands, or such as were declared absolutely valueless.

In the third division the lots consisted of ten acres; in the fourth, one hundred acres, in the fifth, fifty acres; of the sixth and seventh the records are indefinite, but one of them must have been on the basis of eight acres, while the eighth was for one hundred acres, and the ninth for thirty acres. These several divisions as here stated would have amounted in the end to an allotment of three hundred and seventy-eight acres on each right, which would be almost eight hundred acres in excess of the contents of the whole township. But it is found that while some of the assigned lots exceeded in size the unit of division, others fell far short of it, sometimes twenty or twenty-five acres on the large divisions. Moreover, "delinquents," as they were called in the ancient records, were common in those days, and their lots may sometimes have been entered for re-allotment.

With regard to the method adopted in making these divisions after the first, some information may be gained from the directions adopted for this purpose by the proprietors, May 29, 1765.

The committee appointed to make a new allotment was directed to accommodate each proprietor already in possession of a lot or lots by laying the new lot on the line of the adjoining lots already owned and possibly improved, so that the whole might be as compact as possible. It was a delicate business to make these allotments, but no complaints of the work of the committee are on record.

The rights to lay out the common land under the direction of the proprietors were soon bought and sold like any other property.

During the years immediately succeeding the incorporation of the town, viz., 1762-65, this work of allotment made the greatest progress, but the common land was not all discovered and sold before 1824.

The last meeting of the proprietors of which there is any record was held September 29th of that year.

Nathan Goddard was the proprietors' clerk for some years, succeeding Rev. Abraham Hill, and Jesse Kendall held the same office after 1768. After 1820-James Oliver was clerk of the proprietors.

A very singular warrant for a proprietors' meeting is found recorded on page 60, 2nd vol. of Proprietors' Records. It reads as follows:

[SEAL.] PROVINCE OF THE MASSACHUSETTS BAY IN NEW ENGLAND.  
To Nathaniel Graves, of Paxton, in the County of Worcester, New England,  
Gentleman:

Greeting—

You are hereby required to notify the Proprietors of said Paxton, lately known by the name of Pequoiag, lying on Miller's River so called, in the County of Worcester, that they assemble and meet at the Publick Meeting-House in said township on the 2d Wednesday of March next, for the transaction of their usual business, &c.

This warrant was dated February 22, 1762, only twelve days before the Great and General Court incorporated the township, giving to the town an entirely different name. Nathaniel Graves was a well-known citizen of Pequoiag, and it seems certain that the clerk of the proprietors, Rev. Abraham Hill, a non-resident, knew but little of what was transpiring in the township at that time, and so took it for granted that the new town had received, or was to receive, the name of Paxton.

Possibly this was the general understanding when the movement for incorporation was made.

The name Paxton had not then been appropriated to a township in Worcester County, but another name for the settlement on Miller's River had been suggested, which met with general favor, and this, perhaps, at the last moment, went into the request for incorporation. The meeting called by the warrant alluded to is stated to have been held in Pequoiag March 10, 1762, four days after the township had become the town of Athol. Important news traveled slowly in those days.

## CHAPTER CXXXIV.

ATHOL,—(Continued).

ATHOL—1762-1800.

*Its Incorporation as a Town—Its Name—Its Organization—Civil History—Provision for Schools and Religious Privileges—Patriotic Measures at the Opening of the War of the Revolution—Service in the War—Condition at the close of the Century*

By whom the movement was made for the incorporation of "Pequoiag on Miller's River" into a town is uncertain, but tradition asserts that the petition for this purpose was headed by John Murray, Esq. The same authority informs us that Mr. Murray was a resident of Athol for a number of years before he removed to Rutland, Mass. The charter was granted March 6, 1762, and is recorded in Chapter XX. of "Acts and laws passed by the Great and General

Court or Assembly of His Majesty's Province of the Massachusetts Bay in New England," and is as follows:

Anno Regni Regis, Georgii III., Secundo, 1762.

# CHAPTER XX.

An act for erecting the new Plantation called Payquage, in the County of Worcester, into a Town by the Name of Athol. Whereas, it hath been represented to this Court that the inhabitants of the Plantation of Payquage, in the County of Worcester, labour under great difficulties by reason of their not being incorporated into a Town, and are desirous of being so incorporated: Be it therefore enacted by the Governor, Council and House of Representatives, That the said Plantation be, and hereby is, erected into a Town by the Name of Athol, bounded as follows, viz.: Northerly on the Plantations of Royashire and Mount-grace, Westerly on Ervingshire and New Salem, Southerly on Petersham and the Plantation called Number-Six and Easterly on said Number Six; and that the Inhabitants thereof be, and hereby are, invested with all the Powers, Privileges and Immunities that the Inhabitants of the Towns within this Province are by law vested with. And be it further enacted, that John Murray, Esquire, be, and hereby is, directed and empowered to issue his Warrant directed to some of the principal Inhabitants within said Town requiring them to warn the Inhabitants of said Town qualified to vote in Town Affairs to assemble at some suitable Time and Place in said Town, to choose such Officers as are necessary to manage the Affairs of said Town: Provided, nevertheless, the Inhabitants of said Town shall pay their proportionable part of such County and Province Charges as are already assessed in like Manner, as tho' this Act had not been made.

With regard to the name of the town thus created the uniform tradition is that it was named for the second Duke of Athol, a Scottish nobleman, and in part because the scenery of the new town resembles that in the vicinity of Blair Castle, the palatial residence of the Dukes of Athol. The castle is situated in Blair, Scotland, and occupies a beautiful and romantic locality on the southern slope of the Gramscian Hills.<sup>1</sup>

<sup>1</sup> It is almost certain that the John Murray, Esquire, mentioned in the act of incorporation, was largely responsible for the name under which the plantation was chartered. Murray, as is well known, is the family name of the Dukes of Athol or Athole, as it is sometimes spelled in Scotland. John Murray, Esq., held proprietors' rights in Pequig as early as November, 1761, and before the town was incorporated was owner of 340 acres of land in the township. Later, viz., in 1762 and 1763, he was in possession of 238 additional acres—in all 578 acres. The title Esq. is invariably attached to his name upon the records, a distinction accorded to no other proprietor. March 31, 1768, when provision was made for a new allotment, John Murray, Esq., drew No. 19 for the selection of a "pitch" when the additional division should be made. How long he resided in the township before removing to Rutland is uncertain, but, evidently, he was for years the most distinguished man in both places. It will be seen from these statements that it was eminently proper he should be selected as the moderator of the first town-meeting in Athol.

The following incidents of his life were obtained by the efforts of Rev. Charles P. Lombard, pastor of the First Church in Plymouth, Mass., and late pastor of the Second Unitarian Church of Athol:

Mr. Murray's third wife was Lucretia Chandler. In a genealogy of the Chandler family, collected in 1883, it is recorded that Col. John Murray "came from Ireland, and it has been supposed with good reason that he was the youngest and wayward son of the Duke of Athol, Scotland. He had a plate with the Duke's family arms on it. In the grant of the town of Athol by the General Court, the first name was that of John Murray, who probably gave the name of his ancestral honors to the new town. The 'History of Rutland' says he was too poor when he came over to pay his passage. He lost his wife on the voyage. At first he peddled about the country, and then settled at Rutland as a merchant. Some of the doors of the house of Col. John Murray were used in building the State House of Ohio, by mistake for those of Gen. Rufus Putnam's former residence in Rutland, whose memory (Putnam's) the people wanted to honor.

The call for the first town-meeting was as follows:

Worcester SS. To George Cutting, of Athol, in the County of Worcester and one of the Principal Inhabitance of Said Town Where as I the Subscriber, am Impowered by act of the Grate and General Cort To Call a meeting of the Inhabitance of the said Town of Athol to Choose Town officers, &c.

These are Therefore In his majesties Name to Require you forth with to Warn and Notifie the Said Inhabitanc of Athol Qualified to vote in Town affairs that they meet at the meeting-House in Said Town of Athol, on Monday, the 29 of this Instant, march, at one of the Clock in the afternoon, then and there to Choose a moderator, Selectmen, Town Clerk, assessors, Town Treasurer, wardins, Constables, Surveyers of Highways, Tythingmen, fence-viewers, Sealers of Leather, Sealers of

"Colonel John Murray was a man of great influence in his vicinity and in the town of Rutland, which he represented many years in the General Court of Massachusetts. On election days his house was open to his friends, and the good cheer dispensed free to all from his store, told in his favor at the ballot-box. His wealth, social position and political influence made him one of the colonial noblemen, who lived in a style that has passed away in New England. He was, in 1774, appointed by King George III. and Lord Dartmouth, 'Mandamus' Councilor; but he was not sworn into the office because a party of about five hundred staunch Whigs, with the Committee of Correspondence, repaired to his house in Rutland and requested him to resign his seat in the Council. He left his house on the 25th of August, 1774, and fled to Boston, as he stated in his memorial.

"In 1745 he had commanded the provincial troops, in conjunction with the British, against the French. Like most, who at that day held office and station from the royal hand, he gave his influence and support to the cause of the government and his King, which brought down upon him the displeasure of the Whigs. Frank Moore, in his 'Diary of the American Revolution,' page 40, vol. i., says, 'Col. Murray, of Rutland, one of His Majesty's Council, has been obliged to leave a large estate in the country and repair to Boston to save himself from being handled by the mob, and compelled to resign his seat in the Council.'

"In reference to him and Israel Williams (who was put into a room with a fire, the chimney-top being covered and the doors closed by the Whigs, and kept there several hours in the smoke), Trumbull, in his McFingal, asks the Whig mob—

"Have you made Murray look less big,  
Or smoked old Williams to a Whig?"

"In 1776, with his family of six persons, he accompanied the royal army to Halifax. In 1778 he was proscribed and banished, and in 1779 lost his extensive estates under the Conspiracy Act, except one farm, for his son Alexander. He built a house in Prince William Street, St. John, where he afterwards resided.

"In person he was about six feet three inches high and well-proportioned. The Hon. Robert L. Hazen, member of the Executive Council of New Brunswick, and a grandson of Colonel Murray, has his portrait by Copley. He is represented as sitting and in the full dress of a gentleman of the day. There is a hole in the wig; and the tradition in the family is that a party who sought the colonel at his house after the flight, vexed because he had eluded them, vowed they would leave their mark behind them, and accordingly pierced the canvas with a bayonet.

"On a mausoleum, in the rural cemetery at St. John, N. B., removed from the old ground, is inscribed—

The dead, how sacred! Sacred is the dust,  
And Sacred may this marble long remain.

To the memory of

JOHN MURRAY, ESQUIRE,  
Who was born in Ireland

The 22<sup>nd</sup> Day of November, 1720,  
And died in this City, August 30<sup>th</sup>, 1794."

Miss Ellen Murray, now of Frogmore, St. Helena Island, S. C., sent the following sketch to Rev. Mr. Lombard, copied "from a family account written by our mother, Harriet Letitia Murray:"

"My husband's grandfather was Colonel Murray, the younger son of a Duke of Athol in Scotland. Becoming displeased with his family, he left his country and settled in America before the Revolution. He had a large grant of land, and named a town 'Athol.' He had been married three times, and with the third wife fled to New Brunswick in the beginning of the war with the mother country. Mr. Hazen, my husband's grandfather on the other side, escaped with him. In the dark-

weights and measures, Field Drivers, Hog-Reeves and all other ordinary Town offices as Towns choose in the month of March annually Here of Fail not and make Return Here of with your Doings here on unto me before Said meeting—

Given under my Hand and Seal at Rutland in Said County this fiftenth day of March, 1762, in the Second year of his present majesties Reign, &c.

JOHN MURRAY, *Jus. Peace.*

At this meeting, presided over by John Murray, Esq., of Rutland, and held March 29, 1762, the most important town offices were filled as follows:

Selectmen and Assessors, William Oliver, Aaron Smith, John Haven; Town Treasurer, Nathan Goddard; Wardens, Robert Young, Nathan Goddard; Constable for South Ward, Richard Morton; Constable for North Ward, Ephraim Smith; Surveyors of Highways, Nathan Goddard, John Oliver, Seth Kendall; Tythingmen, Jesse Kendall and Jotham Death.

No town clerk was chosen at this meeting, nor at the meeting of May 25th of the same year; but the record of the proceedings of the former was signed by John Murray, moderator, and that of the latter by William Oliver, moderator. The first town clerk was John Haven, who was elected at the annual meeting March 7, 1763. It is not easy to understand the delay in filling this important office.

The town now entered upon its mission as an integral part of the Province of Massachusetts, and assumed the support of the pastor, laid new highways, built new and better bridges, made appropriations for town charges and the support of the schools, and arranged a multitude of other matters for the promotion of the general good.

What the population of the town was at the time of its incorporation is not known, but it could not probably have exceeded three or four hundred, as it was only eight hundred and eighteen when the census was taken in 1790.

From the beginning the custom has generally prevailed of filling the most important offices in this town from the ranks of its most capable citizens, and there has hardly been a time during the space of one hun-

ness of the night they fled to the woods, and only the ladies knew of their hiding-place, and supplied them with food. Afterwards they reached St. John, their property in Athol being confiscated. There is now in St. John a beautiful picture, by Copley, of Colonel Murray, in satin waistcoat, bag-wig and purple coat. The Revolutionary party entered his house, and not finding him, ran a bayonet through the picture—the jagged rent is still there. A Mrs. English, who visited the Duchess of Athol some thirty or forty years since, was shown in an old chronicle of the family the name of John Thomas Murray, younger son of the family, who, some years before the American Revolution, had quarreled with his family, and securing a grant of land, had settled in New England, and named a town 'Athol.' Miss Murray adds, "Some twenty years ago, a gentleman from Athol came to see our mother to secure a quit-claim to a tract of wooded hill land near the town. When the rest of Colonel Murray's property had been sold by the victorious Revolutionary party, this tract was overlooked, and when a dispute arose about it, it was found that by the wills of the three Murrys, we were the rightful owners. My mother refused the quit-claim and tried to secure the land, but found it too vexatious and expensive an attempt, and abandoned it."

For some other documents upon the same matter there is no space.

dred and twenty-five years when men of broad and far-reaching views could not be obtained for this purpose. Especially in times of excitement and danger, like the period 1861-65, the services of such men as Calvin Kelton and Nathaniel Richardson were invaluable and Athol has always had a goodly company of citizens of like ability and patriotism from which to fill the principal public offices. Few realize how largely the prosperity of the town has been due to this circumstance.

March 7, 1763, the town voted "to Rais £13 6s. 8d. to provide a School, and chose Nathan Goddard, Jesse Kendall and John Oliver Committee to hire a school Master, and voted to divide the School Money by the River, and those that live on the south side to have what they pay towards the sum raised, and those that live on the north side to have what they pay towards said sum." This was the first action of the town in relation to schools, and it seems to indicate that the same master was expected to teach on the two sides of the river alternately.

As bearing upon the matter of obedience to law, the item following has interest: May 24, 1764, the town "voted to David Twitchel the money that was taken for Fines the last year for Breach of Sabbath."

At the same meeting, under the article relating to providing a school, the town voted to provide a school and to divide the school money as before; also "chose Robert Young, John Oliver and John Farbank, Comitte, to take care of and provide for the school on the south bank of the river, and John Haven, Samuel Morton and Nathan Goddard Comitty on the north side." Eight hours were also made to constitute a day's work on the highways.

In 1764 the town voted not to send a representative to the General Court. In 1766 the town voted "to build two School Houses and to reconsider the vote." Then it was voted to divide the town into five "Squadrons," which was also reconsidered. Later it was "voted to build two School Houses, one on the West Hill, between Aaron Smith's and Ichabod Dexter's; the other on East Hill, at the head of Capt. Field Lain (so called); and the above houses are to be built sixteen foot wide, and eighteen foot long, and six foot and half stud." Separate committees were appointed "to set men to work" for the erection of each house. Later, during the same year, it was "voted to raise £26 13s. 4d. to build two school-houses, and that men should be allowed to work out their Raits on the School Houses at two shillings and four pence pr day."

In 1767 a vote was passed to sell the school lands and the ministerial lands, with the consent of the pastor for the latter sale, and to have five pounds and four shillings of the money granted for highways "worked out on the Burying Places."

In 1768, £16 were raised for the use of the school, £52 to pay the pastor's salary, and £3 for town charges.

In 1769, £6 were raised to repair the old meeting-house.

In 1770, £6 were raised to provide a "stock of amonition for the town," the people evidently beginning to anticipate the conflict which was soon to arise with the mother country. The same year it was "voted to have a school kept at the south end of Meeting House hill, and one at the north end; one on the east part of the town; one at the south-west part; one on West hill, and one on Chestnut hill," "each part to enjoy the benefit of the money they pay for schooling."

In 1771 it was voted not to set a new meeting-house on the site of the old one on The Street, but to place it "between the Slow on John Brooks' lott, near the mill brook, and the little new bridge in said lott, on the east side of the County Road." After a recess of one hour and a half, this action was made more definite by explaining in a vote that the meeting house was to stand "near the southeast corner of corn mill lot (so called), the east side of the road, and said lot now owned by John Brooks, of Lancaster, and is the plot of land next and near a little slow," etc., all of which was doubtless more easily comprehended one hundred and eighteen years ago than it can be by the reader to-day.

The question of dividing the town so that the west part of it might constitute a town by itself, which was submitted to this meeting, was decided in the negative.

A little later, during the same year, it was voted to raise one hundred and twenty pounds to build a meeting-house to be forty-six feet wide and fifty-six long. In July, of the same year, the location of the house was still under discussion, when it was "voted to prefix a spot to sit a new meeting-house and to sit it within thirty rods north of the place where it was placed in January." The next month the town "voted to refer it [the location] to a Committee that they shall choose to prefix a spot for the inhabitants of Athol to set a meeting-House," and under this vote the committee chosen consisted of "Capt. Oliver Witt, of Paxton; Capt. Stephen Maynard, of Westborough; and Col. John Whitcom, of Boldton," doubtless Bolton. The report of this committee, dated January 28, 1772, was in favor of "sitting said Meeting-House on a small rise of land on the west side of the County Road on the north side or adjoining some hewed timber prepared for a house."

This location is supposed to be the one finally adopted, which was upon the north end of what is now the Common, in the Upper Village. From the various measures taken by the town in 1772 it would appear that the erection of the new house on the spot indicated above was commenced and carried forward during the earlier part of that year, although there was not a little dissatisfaction with the doings of the building committee.

In March, 1773, the work had so far advanced that

the town "Voted to reserve the pew ground on the west side of the pulpit nearest the pulpit for the use of the Ministry." Also "Voted that each man should Pick his pew according to his pay to the meeting-house on his real and personal estate." Also "Voted that each man that draws a pew shall build his own pew." To understand these votes it is to be remembered that a hundred and twenty-five years ago it was customary in our country towns, after the floor of a new church was laid, to sell, usually at auction, what was called the "pew ground," which was a certain space marked off for the location of a pew. Generally, at the first sale the parts of the floor adjacent to the walls of the edifice were disposed of, leaving the interior portion to be filled with cheaply constructed seats for such as did not erect or occupy pews. Each one purchasing or drawing pew ground was expected to build his pew at his own expense and in a style agreeable to his taste and the amount of money he could afford for such a purpose. A meeting-house furnished in this manner, as a matter of course, must have presented, for a considerable period, a singular and unsightly appearance with its vacant spaces, long seats and various styles of workmanship. No paint was used to bring the different kinds of lumber employed in pew construction to a common color—indeed, no paint at all upon the inside work, excepting upon the pulpit and on the window-casings.

May 19, 1773, the town "Voted to meet in the new meeting-house the first Sabbath Day in July next." In June of the same year the town accepted a plan for pews in the galleries, and "Voted that the selectmen desire Mr. Humfray to preach a lecture in the new meeting-house before the first Sabbath in July next."

During the years in which the location and erection of this house of worship occupied so much of the attention of the people, the work of relocating and building roads and constructing new and better bridges went on uninterruptedly, and, considering the number of the people and the straitened circumstances of many among them, the appropriations made for all public purposes were liberal. Foundations were to be laid and almost everything was to be done, but money was not abundant.

We are now approaching a period when new and most important duties devolved upon the town officers and the entire population of Athol, for the whole Province and the whole people of the thirteen Colonies were beginning to feel the pressure of British encroachments. March 7, 1774, Deacon Aaron Smith, James Stratton, Jr., and James Oliver were chosen selectmen, and July 7th, of the same year, "after very close and serious Debates on what measures were most likely to affect a deliverance from the burdens and oppressions that America in general, and this Province in particular, are laboring under, it was unanimously agreed to enter into a League or

Covenant, binding ourselves to Renounce the use and consumption of all goods that shall arrive in America from Grate Britain from and after the last day of August next ensuing, untill the act of blocking up the harbor of Boston shall be repealed, and we restored to the free use and enjoyment of our national and charter rights, or untill other measures shall be adopted by the Body of the people or the General Congress of the Colonies that is soon to meet, that shall be thought more likely to affect a Deliverance." At the same meeting a Committee of Correspondence was chosen, consisting of Deacon Aaron Smith, William Bigelow, Josiah Goddard, Captain John Haven, Ephraim Stockwell, James Oliver, Abner Graves, James Stratton, Jr., and Daniel Lamson.

The other towns in the county of Worcester having appointed similar committees, a general meeting of these was held in Worcester, August 9, 1774, and continued by adjournment. At this meeting resolutions were passed, expressing true allegiance to His Majesty, George III., declaring that the people of the Colonies should enjoy the same rights as His Majesty's subjects in Great Britain, claiming the right to originate here the laws under which the people of this Province shall live, deprecating the attacks recently made upon their chartered privileges which place their lives and property at the disposal of the British Government, declaring the closing of the Port of Boston a most unjust and cruel act, and then asserting in the plainest language that it was the duty of all Americans, especially of the people of this Province, "to save our money, encourage our own manufactures, and reform our manners" by non-consumption of "Brittish Goods," all of which "will have a tendency to convince our brethren in Britain that more is to be gained in the way of Justice by our friendship and affection than by extortion and arbitrary power."

When these resolutions were read in open town-meeting in Athol, September 2, 1774, they were "accepted and ordered on record." A few days before this action, viz., on August 25th, the town held a very important meeting, and passed unanimously seven resolutions, of which the following is a summary:

The 1st points to a closer and firmer bond of union between the colonies.

The 2d acknowledges the loyalty of the people to King George III. so long, but only so long, as he shall govern according to the English Constitution and the chartered rights of the people.

The 3d condemns the blockade and plunder of Boston.

The 4th complains of the injustice involved in the practical repeal of the charters of the colonies.

The 5th is a pledge of resistance to the unjust measures pursued by the British Government.

The 6th provides for a representation in a county meeting that was soon to be held at Worcester.

The 7th is as follows: "*Resolved*, That if any person shall accept a commission or post of office to serve under the new Establishment (that is, British regulations then going into force), he ought to be looked upon and treated as an enemy to his country: as he thereby is joined with, and lending a helping hand to those who are endeavoring to enslave us."

The seventh resolve shows how exceedingly jealous the people of Athol were with reference to what were then called Tory influences.<sup>1</sup>

In 1774, September 29th, the town "Voted to inlist thirty men, exclusive of officers, to send in case of an alarm," and later, under the same article, they "Voted to have two companies of Militia in the town, and that the division of the aforesaid companies be made by the River." Also "Voted to raise sixteen pounds, Lawful money, to provide a town stock of ammunition." William Bigelow was chosen as a delegate to attend a Congress, called to meet at Concord on the second Tuesday of October, 1774, and also to represent the town in the adjourned Provincial Congress, to assemble November 23d of the same year at Cambridge.

On the 11th of January, 1775, the town "Voted that we do approve of and adopt the non-importation agreement Recommended by the Continental Congress." At the same meeting a Committee of Inspection was chosen, which consisted of John Haven, James Stratton, Jr., William Bigelow, Deacon Aaron Smith, Hiram Newhall, Josiah Goddard and James Oliver. The business of this committee, according to the warrant under which it was raised, was "to see that the Resolves of the Continental and Provincial Congresses are faithfully observed."

At that stage of the great conflict which was impending, hardly any other town office imposed upon those who held it such grave responsibilities as confronted those Committees of Inspection.

Generally they were composed of men in middle life, men active, energetic, fearless and eminently patriotic. In their respective towns they were expected to maintain a sleepless vigilance over all the interests involved in self-government and the deliverance of the Province and country from British oppression. It ought to be borne in mind that in the beginning of the struggle for liberty and, to a considerable extent, through all the vicissitudes of that

<sup>1</sup> Upon the west side of Pleasant Street, and almost within the present limits of the Upper Village, there stood the ancient tavern of Athol, kept in the Revolutionary times by a man named Ward. Tradition says that he and his family held to the King's party, for which reason a guard was stationed at one or more points in the vicinity, and also upon the causeway east of the tavern,—then the highway from The Street to Boston was laid from the tavern east across the swamp that is now covered by Lake Ellis. The object of this guard was to discover, if possible, whether there was any communication between the Ward family and Tories in the eastern parts of the county. Whether this precautionary measure was followed by any practical results is unknown, but the whole movement shows that at the commencement of the war the people of Athol were ready at all hazards to maintain what they deemed their inalienable rights.

contest, there was hardly a town in New England that had not a number of Tories. Some of these were men of property, education and influence, while others were bold adventurers, determined to make money, however much the people generally might suffer. Both of these classes needed watching, and the Committees of Inspection were expected to discover and thwart their plans as far as possible. Under the restrictions imposed by the action of the Continental and Provincial Congresses with regard to the non-importation of goods from Great Britain, and the abandonment of their use by the people, many were restive, and some of these were ready to sacrifice almost everything for the gratification of their desires. Especially was it deemed hard to be deprived of *tea*, and the demand for this article led not a few unprincipled men to run great risks in furnishing it secretly to such as would purchase it. Small traders, with bags of tea on horseback, spread themselves over the country, and in almost every town would find some one to aid them in their dishonorable enterprise. The encounters of such men with the Committees of Inspection occasioned very sensational scenes in various places.<sup>1</sup>

There is a tradition that, influenced by their passion for tea, some even of the patriotic ladies of New England would secretly procure it, and stop up the key holes of their doors while the fragrant herb was steeping over the coals, lest they should be betrayed by the well-known vapor.

As the cloud of war became more portentous, the people of Athol were found furnishing and equipping soldiers, and supplying provisions for the Continental Army. There was no backwardness, no hesitation, but a noble spirit of self-sacrifice animated them.

If it were possible, a full record of the soldiers that this town furnished during the War of the Revolution should here be presented. It would be pleasant to know to what companies and regiments each of them belonged, under what commanders they fought, in what battles they were engaged, what feats of valor they performed, and how many of them survived the hardships and perils they encountered; but this cannot be satisfactorily done till months and years shall be spent in sorting and arranging the ancient documents that are in the possession of the Commonwealth of Massachusetts. It is to be remembered that during the war, soldiers were often transferred from one

company to another, companies from one regiment to others, regiments from one division to another, and that not unfrequently all the records of these changes were made upon loose scraps of paper. Books of record for military use were few during the Revolutionary War.<sup>2</sup>

The following are the marching-orders that were sent to an Athol captain, probably in 1776:

*To Capt. Eph'm Stockwell:*

Sir:—By virtue of an express from Gen'l Warner in which I am Directed to detach every Sixth man out of my Regiment to go to the relief of our Distressed Brethren at the westward,

I do Hearby Direct and Order you forth-with with-out the Least Delay and with the utmost Dispatch to Detach Every Sixth man out of the Training Band and alarm List of your Company for the purpose affores'd and See that they are acquit according to Law with armes ammunition also with Kittles and Cooking utensils. The Selectmen are Directed to acquit those that are not acquiped, you are also to Detach one Corporal. And when you have so Done you are to march them to Petersham on monday the Twenty Eight day of this Instant July to meet on the Paraid near the Meeting House in said Town at nine o'clock in the forenoon, you are also to take the command of the men Detached from captains Nye, Henery and Lord's Companys, Together with your own Detachment. And from s<sup>d</sup> Petersham you are to make your Route By the way of Bennington where you are to receive further orders from Colo. Cushing, you are to Return me a List of the names of those men Detached from your Company Immediately.

NATHAN SPARHAWK, Col.

This company was in the battle of Bennington, and afterward captured in New Jersey a British detachment, one less in number, without firing a shot. In the terrible conflict of White Plains two of its men were killed who bore the Athol names of Morse and Goddard. The first pastor of Athol, Rev. James Humphrey, has left this record respecting them: "Mr. Earl Cutting, their townsman and messmate, was between them when they fell." Tradition adds that one of them, when wounded, leaped over a fence and died without uttering a word.<sup>3</sup>

The following will throw light on the distribution of the Athol soldiers in the Continental Army, as well as upon the unselfish spirit by which they were actuated in this service. Their wages were paid by the town:

Athol, in the State of Massachusetts bay; the men for the war for the years 1775, 1776 & 1777. Minute men who went to Cambridge were paid 6 shillings each:

Eight months' men to Cambridge, 6s. per month.  
Six weeks' men to Roxbury, 4s. per month.  
Two months' men to Dorchester, 6s. per month.  
Twelve months' men to Dorchester, 10s. per month.  
Seven months' men to "Nantastick," 2s. per month.  
Five months' men to "York," 18s. per month.  
Four months' men to Ticonderoga, 26s. per month.

<sup>1</sup> One of the most obnoxious of these Tory peddlers in Southwestern New Hampshire was Breed Bachelor, a notorious character, who in 1776 visited a number of towns to dispose of his contraband goods. Encountering some members of the Committees of Inspection from Fitzwilliam and Marlborough, who were watching for him, Bachelor had the tenacity to strike Mr. Tucker, one of the Marlborough committee, with a club that he carried in his hand. Mr. Tucker was wounded by the blow, when the miscreant rode off as fast as possible. Being pursued, he was brought back, and the pecuniary benefit derived from his venture was very small. A complaint was made out against him and presented to the General Assembly of the colony of New Hampshire by the Fitzwilliam Committee of Inspection, but he soon disappeared.

<sup>2</sup> So far as known, New Hampshire is the only one of the original thirteen States that has entered systematically and thoroughly upon the work of arranging and printing its ancient State papers and Revolutionary rolls. Many of these were edited and carried through the press under the supervision of the late Rev. Dr. Bouton, of Concord, N. H., while the work upon the old documents of the Revolution is now ably conducted by Hon. Isaac W. Hammond. A copy of each volume as printed is deposited with the clerk of each town and city.

<sup>3</sup> Capt. Stockwell was the grandfather of the late George Sprague, of Athol, who had in his possession, in 1859, the original document from which the order inserted above was copied. The lieutenant of the company was Benjamin Townsend, grandfather of the late Col. Thomas Townsend.

Four months' men to Dorchester, 4s. per month.  
 Two months' men to Tarrytown, 20s. per month.  
 Three months' men to "the Jerseys," 20s. per month.  
 Two months' men to Rhode Island, 8s. per month.  
 Six weeks' men to Bennington, 20s. per month.  
 "Larrum" men to "Williamston," 8 days, 8s. per month.  
 Three months' men to "Saratogue," 15s. per month.  
 To Fort Edward, 4 weeks, 18s. per month.

The farther they went from home the greater were their wages, but these were small at the best.

It appears from the town records that soldiers were furnished, equipped and paid in like manner through all the years of the war; and before it ended it was doubtless true of Athol, as it was of many towns of New England, that nearly every able-bodied man was, at some period of the struggle, enrolled in the army. It may be added that this service embraced, very often, young men who had reached the age of fifteen or sixteen years only. In 1778 more than fifteen hundred pounds were raised at one time to pay wages to the soldiers. The requisitions of the province upon the town for beef and other supplies for the army were cheerfully and, in general, promptly met.

How all these burdens were sustained for so many years without financial ruin it is not easy to understand. Only the strictest economy in household expenses, and untiring industry and frugality on the part of all the people, could have enabled the town to meet such a crisis. It is to be borne in mind that at the close of the war the population at Athol could not have much exceeded five or six hundred. The currency of this, and of the neighboring provinces, had depreciated to such an extent that as many as ninety dollars in paper money were often exchanged for a single dollar in silver. The proposed improvements upon the farms had been seriously interrupted by the absence of so many of the men in the army, while every necessary article manufactured elsewhere, could be purchased only at an enormous price. Athol was then far from any large and regularly supplied market. The people were mostly farmers, but to transport the surplus products of the farm and the forest to market was a slow and expensive process. The hills over which the highways passed—especially on the east and west roads—were long and steep; and the roads themselves were narrow and poor; yet the town was, on the whole, prosperous. Before the close of the century it could meet its liabilities, and debt pressed less heavily upon the people. The farms showed signs of permanent improvements; small manufacturing establishments were projected—if not actually built—upon the banks of the streams, school-houses were provided for the several "squadrons," and the range of studies enlarged, while the military spirit was not suffered to die out in the town for want of organizations and public encouragements.

## CHAPTER CXXXV.

### ATHOL—(Continued.)

ATHOL,—1801-1888.

*Condition of the Town before the Civil War—Excitement in 1861—Acts of the Town to Encourage Enlistment of Soldiers—Enlistments—Bounties Offered—Military Companies Organized—Private Munificence to Obtain Recruits—Aid to Soldiers' Families—Number of Soldiers from Athol—Expense Account of the War.*

THE present century opened with Rev. Joseph Estabrook as the minister of Athol, who had been ordained November 21, 1787. His predecessor, Rev. James Humphrey, had been dismissed about five and a half years before, viz.: February 13, 1782, after a pastorate of about thirty-two years, and had died May 8, 1796, in the seventy-fifth year of his age. The town was gradually recovering from the disturbance, if not the breaking up, of its most important business interests, and from the great losses occasioned by the Revolutionary War. Its population had increased but slowly—only one hundred and seventy-five between 1790 and 1800—and now numbered nine hundred and ninety-three. The conditions for general improvement in the near future, though not as good as could have been desired, were, on the whole, fair, and the town entered upon the work of the nineteenth century with increasing courage and hope.

There was little to disturb the general quiet of the place until the war with Great Britain commenced in 1812. As is well known, this was very unpopular throughout New England. The majority of the people in this part of our country were not at that time in sympathy with the national administration, and strenuously maintained that the war must prove disastrous to their shipping and other interests. To this intense feeling expression was given August 31, 1808, in a petition to the President of the United States, which was accepted by the town. In 1814, January 31st, the town again took action upon the same matter in a petition to the Legislature, which was couched in very significant language. But the general prosperity of the town was not seriously interrupted by this excitement. In those days the electoral votes of New England were not usually cast for the successful candidates for the Presidency; and that fact may have had something to do with the strong opposition which prevailed in this part of the country to the War of 1812.

During the sixty years from 1800 to 1860 the population of Athol increased from nine hundred and ninety-three to two thousand six hundred and four, and there was a steady gain in financial strength and business enterprise. During this period agricultural interests received more and more attention, while factories and mills for manufacturing purposes were erected in considerable number, as will presently appear.

The construction of expensive county roads and other highways, largely for the accommodation of the inhabitants of the neighboring towns, has for many years made heavy drafts upon the treasury of Athol, but the debts thus created have been paid in part by the town becoming a business centre for not a little of the adjoining territory.

From its beginning the people of Athol have had an almost passionate regard for civil freedom and individual liberty, and oppression in any form has always been looked upon as a crime. The repeal of the Missouri Compromise, and the desperate attempts to fasten the institution of slavery upon Kansas, that made memorable the years just preceding 1860, aroused the deepest indignation here, and did much to prepare the way for the unanimity, steadfastness of purpose, and spirit of sacrifice that characterized all the proceedings of the town when the Civil War began.

"Athol in Suppressing the Great Rebellion." This is the title of a volume of two hundred and sixty-four pages, the entire contents of which belong to the history of Athol. The book originated in this manner: in the warrant for the town-meeting of Athol for April 7, 1862, Article 4th was as follows:

To see if the Town will choose a Committee to collect and preserve facts and incidents which may have a historic interest to the people of the Town as showing the part they have taken in aiding to suppress the Great Rebellion.

At the town-meeting held under this warrant it was "voted to choose a committee of three to collect and preserve such facts as they may think best; and said committee will work free of charge to the town. Chose Rev. John F. Norton, John M. Twichell and Dr. A. G. Williams; and then voted to add one, and chose Dr. James P. Lynde."

This committee was organized by the appointment of Rev. J. F. Norton, chairman, and Dr. J. P. Lynde, secretary.

Dr. A. G. Williams having accepted a commission as a surgeon in the army, at a town-meeting March 2, 1863, Mr. Charles W. Bannon was added to the committee at the request of the other members. He had previously rendered much assistance in collecting and arranging many of the facts that relate to the early history of recruiting in Athol.

At the town-meeting November 7, 1865, on motion of Nathaniel Richardson, Esq., it was "voted that the Town authorize its Committee in charge to publish by subscription the Record entitled 'Athol in Suppressing the Great Rebellion,' with such changes as said Committee may deem desirable.

"Voted that the Selectmen be authorized to subscribe in the name of the Town for Fifty Copies of the Record, provided it can be furnished at a price not exceeding two dollars per copy."

The committee at once entered upon its work (the chairman making the entries in the record) and prosecuted it till the close of the war. Nearly every soldier

from the town, who lived to return, was visited as soon as possible after his discharge and his personal experience recorded. All reliable documents concerning the killed and wounded were examined. The information contained in the volume is deemed in every respect reliable, and a summary of it is here given:<sup>1</sup>

The people of Athol, in common with all their loyal countrymen, were filled with amazement and the most gloomy apprehensions by the bombardment of Fort Sumter, a fortress of the United States in the harbor of Charleston, S. C. The attack upon this fort, which was the opening scene of the Great Rebellion, was made April 12, 1861; and the little garrison, under the heroic Colonel (afterwards General) Robert Anderson, surrendered to the rebel host that assailed it after a bold resistance for about thirty-six hours.

Washington was at once menaced by an army of rebels that poured into Virginia. But a few days elapsed before Massachusetts men were shot in the streets of Baltimore while on their way to rescue the National Capitol. The whole South was in commotion; and every hour the rebel cause gained strength till it assumed frightful proportions.

The news of these events aroused all the patriotism of the North; and the people of Athol determined to do their part for the support of the government against the mighty combination that threatened to destroy it. From all parts of the town men, women and children came together to raise and honor the glorious flag of our Union, and to determine on the course of action which the crisis demanded. Processions were formed; and the gatherings in different parts of the town were large and enthusiastic. At a public meeting in the Town Hall, on the evening of April 19, 1861, forty or more young men offered themselves for the formation of a military company.

A town-meeting was at once called, at which five thousand dollars were appropriated to encourage volunteers and to provide for the families of such as were married, in their absence.

Enlistments now commenced, the first name upon the roll being that of Leander W. Phelps. Then came the names of David E. Billings, J. B. Billings, Delevan Richardson, Hubbard V. Smith, Edward L. Townsend, Charles H. Hill, Charles S. Green, Columbus Fox, William L. Clutterbuck, Horace Hunt, William Nute, Frederic Cummings, John D. Emerson, Thomas Johnson and Aurin B. French; and, a little later, John F. and James L. Merrill went to the seat of war in the Tenth Massachusetts Regiment. July 10, 1861, the town made still more liberal offers to those enlisting as soldiers, especially with regard to such as might be dependent upon these for support, and numerous enlistments followed. Twenty-three men soon joined the Twenty-first Regiment, and were

<sup>1</sup> As the author of the volume noticed above is also the author of this historical sketch, the utmost freedom with its contents is allowable. It may be added that it was printed and distributed under the personal responsibility of the chairman of the committee.

connected with Company A, under command of Captain (afterwards Major and Lieutenant-Colonel) George P. Hawks, of Templeton.

Mr. Adin W. Caswell now undertook to recruit a company chiefly from Athol, and in the short space of ten days obtained the requisite number of men. On the 4th of October, 1861, which was the day of the annual cattle show and fair, a dinner was given to this company on the Common at Athol; and the men were addressed from the balcony of the Summit House. Dr. James P. Lynde presided and addressed the soldiers and the immense audience assembled. A sword, sash, etc., were presented to Captain Caswell, Hon. Charles Field making the presentation address. Captain Caswell responded, and addresses were afterwards made by Hiram Woodward, Esq., of Orange; James Brooks, Esq., of Petersham; J. H. Goddard, Esq., editor of the *Barre Gazette*; Rev. I. S. Lincoln, of Warwick; Rev. A. Harding, of New Salem; Calvin Kelton, Esq., chairman of the Board of Selectmen; Rev. Ira Bailey and Rev. John F. Norton, of Athol. A patriotic poem, which he had prepared for the occasion, was recited by Rev. D. J. Mandell, also of Athol. Bouquets of flowers were presented to all the soldiers composing the company by young ladies who volunteered for this service, while patriotic songs, in which a multitude of voices joined, enlivened the occasion. The exercises at the Summit House were closed with prayer by Rev. J. F. Norton; and almost the entire assembly went with the company to the depot, where the soldiers took the cars for the camp at Springfield. The Athol Cornet Band was present during the day and added to its interest, while the Athol High School Guard, under the command of the master of the school, Mr. Andrew J. Lathrop, with fifty mounted men of Athol and nearly the same number from Royalston, did escort duty. The company left with the cheers and benedictions of the assembled multitude. At Springfield the men were mustered into the service of the United States, and constituted Company B of the Twenty-seventh Regiment, Massachusetts Volunteers.

At the close of 1861 Athol had ninety eight men in the army and navy as volunteers and seven others in the regular army.

Near the opening of 1862 sixty-eight men from Athol encountered the perils and losses of the Burnside Expedition to North Carolina. In the battle of Roanoke Island they suffered severely in the miry swamps and while fighting the enemy were standing up to their knees in water. William Hill, the first Athol soldier who fell in action, was there killed. In the battle of Newbern, a few days later, James C. Parker and William H. Johnson were killed, while many others were severely wounded. The sufferings of the Athol men in North Carolina were so great that the citizens of Athol at once raised funds and dispatched Laban Morse, Esq., for their relief. He

left March 21st with two hundred and twenty-seven dollars, contributed in a few hours, and was joyfully welcomed at Newbern. Of money there was scarcely any in the regiments, and all the suffering shared alike in the food and medicines purchased by Mr. Morse. He slept, rolled in his blanket, on the floor of the hospital and was ready to act at a moment's call.

Then came other calls for soldiers, six hundred thousand in the months of July and August, one-half to be raised by draft. Town and citizens' meetings were now held, bounties were offered for enlistments and soon Company E, of the Fifty-third Regiment, was recruited, largely from Athol, with Farwell F. Fay as captain. This regiment endured great hardships, but did good service in Louisiana and was in the fight at the capture of Port Hudson.

In 1863 the first draft was made of sixty-six men from Athol. Only twenty of these were found fit for service, of whom fourteen procured substitutes, two paid the commutation (three hundred dollars each) and four reported for service.

To fill the quota for Athol under the five calls for soldiers that followed, in which one million eight hundred thousand men were asked for, substantially the same process was adopted. Men and money did not fail. According to the reports of the Adjutant General, Athol had, December 1, 1864, a surplus of ten men, and nineteen days later, of twenty-eight men.

In the record will be found the names of three hundred and thirty-five men furnished by Athol. Of these, nineteen re-enlisted and seventeen others re-entered the service after recovering from the disabilities for which they had been discharged; four musicians were included in the number, who had been discharged under an order discontinuing regimental bands of music. In arriving at the sum total, the re-enlisted men must, of course, be counted twice. There may be added fifteen who were credited to Athol through the enlistments of Massachusetts men in the navy, and one more was also credited to the town of whom nothing further is known. The whole number furnished by Athol was, therefore, three hundred and eighty-seven.

The speedy suppression of the Rebellion seemed certain at the opening of 1865. April 3d, of that year, General Grant's army entered Richmond, and soon after the soldiers began to return home. Fifty-one Athol men died from wounds or diseases contracted in the service; Captain Fay's company, in the Fifty-third Regiment, lost seventeen men.

In general the soldiers from Athol proved themselves brave and patriotic, but this cannot be said of some obtained through brokers. Athol furnished fifteen commissioned officers, viz.: George H. Hoyt, lieutenant-colonel Fifteenth Kansas Cavalry; James Oliver, Jr., surgeon in the Twenty-first and Sixty-first Regiments; Alfred G. Williams, surgeon in the Eleventh Regiment; John N. Mars, chaplain of the

First North Carolina (Colored) Regiment; Farwell F. Fay, captain in Fifty-third Regiment; Adin W. Coswell, captain in Twenty-seventh Regiment; Ransom Ward, captain in First Kansas (Colored) Regiment; Daniel W. Larned, captain in Twenty-seventh Regiment; George R. Hanson, captain in Fourteenth United States (Colored) Heavy Artillery; Albert D. Pond, first lieutenant Twenty-seventh Regiment; John O. Mowry, first lieutenant Fifty-fifth (Colored) Regiment; Lovell H. Horton, second lieutenant Twenty-seventh Regiment; Asa L. Kneeland, first lieutenant Thirty-second Regiment; John D. Emerson, second lieutenant Second New York Heavy Artillery; Seth F. Hale, second lieutenant Massachusetts Militia.

Of the families in Athol that made great sacrifices to aid the Government, many deserve an honorable mention.

James L. Merrill furnished five sons for the army, all courageous and faithful soldiers. Three of them were severely wounded, while a fourth nearly sacrificed his life to save that of a wounded brother.

The family of Leander Phelps gave four to fill the quotas of Athol, two of whom re-enlisted, and another entered the service a second time and was severely wounded.

Franklin Oliver had four sons in the service, one of whom was severely wounded, and another died in the rebel prison at Andersonville, Ga.

Isaac King had also four sons in the service, two of whom died.

Albert Simonds followed two of his sons into the ranks, and one of the latter was a prisoner at Andersonville and in other rebel prisons.

Laban Morse, Esq., was the agent for the relief of the town's sick and wounded at Newbern, N. C., and sent two sons to the war.

George Morse went himself, and two sons went also.

Edward Nickerson had three sons in the army, one of whom was imprisoned at Andersonville and in other places.

Widow Dorinda Foster sent three sons, one of whom died in the service and another not long after his discharge.

William Hill went into service with two sons. He was killed at Roanoke Island, and one son died at the same place.

The citizens of Athol raised by subscription, to fill the various quotas, the sum of \$12,777.78. Hospital supplies were sent to the soldiers without stint. About \$350 were forwarded to the Christian Commission. The Ladies' Society in the centre of the town dispatched supplies valued at \$1,223.47, while the Soldiers' Aid Society of the Depot Village sent through the Sanitary Commission stores valued at \$808.43. Large sums were contributed for the comfort of the soldiers in a less public manner. The total indebtedness incurred by the town on account

of the war was \$18,880.94. The credit of the town continued good, notwithstanding these heavy expenses.

Just before the breaking out of the war, or January 1, 1861, the net indebtedness of Athol was \$6,672. Six years later it was but \$8,200, the people having willingly submitted to increased taxation to keep the debt as small as possible. The valuation of the town in 1867 was \$1,194,559. In 1870 the net indebtedness was \$14,775. In 1876 the ordinary debt was \$28,571 and the railroad debt was \$90,600.

In 1880 the total indebtedness on town notes was \$96,680, which was reduced January 1, 1888, to \$64,500, with interest at four and one-half per cent.

The period since the Civil War has been one of general prosperity. Agricultural products have been in good demand at fair prices, while the manufacturing interests of the town have acquired very large proportions, as will be seen in the sequel.

Among the town officers elected in March, 1888, were the following: J. D. Holbrook, town clerk; C. F. Richardson, Ira Y. Kendall and A. J. Nye, selectmen; Samuel Lee, treasurer; William W. Fish, James W. Hunt and James F. Whitcomb, assessors; Calvin Miller, collector of taxes; L. B. Caswell, A. J. Nye and E. V. Wilson, School Committee.

May 1, 1888, the number of polls in Athol was 1490: viz., males, 1486; females, 4. The value of personal estate, excluding resident bank stock, was \$529,452. The value of resident bank stock was \$102,185. The real estate was assessed at the same time at \$1,813,667 in buildings, and \$828,388 in land, making a total valuation of \$2,773,692. The taxes laid amounted to \$47,353.07, the rate per cent. being \$16 per thousand. The number of dwelling-houses taxed was 1021. The number of acres of land assessed in the town was 18,777. The number of taxpayers was 1910: viz., 1236 on property, and 674 paying a poll-tax only.

The population of Athol in 1790 was 848; in 1840, 1591; in 1860, 2604; in 1870, 3517; in 1880, 4307; in 1885, 4758. It is supposed at this time, January, 1889, to exceed considerably 5000.

The Athol representatives in the General Court during the last ten years have been as follows, Royalston having had the member in the years 1883 and 1886: J. Sumner Parmenter, 1878; L. B. Morse, 1879; Russell Horton, 1880; Ira Y. Kendall, 1881; Henry M. Humphrey, 1882; C. F. Richardson, 1884; Washington H. Amsden, 1885; Sidney P. Smith, 1887-88; J. D. Holbrook, 1889.

Benjamin Estabrook was a member of the Senate in 1843, Charles Field in 1858-59, and Alpheus Harding in 1879.

In politics the town of Athol is strongly Republican, and has been ever since the organization of the Republican party. The same is true of Royalston, which town with Athol constitutes a Representative district. As a matter of course, it is generally expect-

ed that this district will be represented in the General Court by a Republican; usually this has been the case; but occasionally, through discordant opinions and wishes in the dominant party, or the nomination of an exceptionably able and popular candidate by their opponents, or both combined, a Democrat may be elected, as was in true in 1879.

At the memorable election, November 6, 1888, the town voted for Presidential electors and Governor as follows: Republican electoral ticket, 501; Democratic, 315; Prohibition 41. The Republican candidate for Governor had 502 votes; Democratic, 315; Prohibition, 41. For Representative, Mr. J. D. Holbrook had 504 votes; Mr. Raymond, 291; Mr. Lindsay, 32. There are in town about 980 votes.

## CHAPTER CXXXVI.

### ATHOL—(*Continued.*)

#### EDUCATIONAL AND ECCLESIASTICAL.

*Public Schools—Early Provision for Them—Interest in Them Gradually Developed—Early School Committees—Branches Taught—Athol High School—Its Masters—Census of Scholars—Appropriations—Athol Town Library.*

THE school-house was always found by the side of the church in the settlement of New England, for the fathers well knew that ignorance and barbarism go hand-in-hand the world over. As already noticed, one sixty-third part of the twenty-three thousand and forty acres of land embraced in the grant to the proprietors of "Pequogon on Miller's River" was reserved and forever set apart "for the support of a School." Possibly six or eight years elapsed after 1735 before a school was opened. The records give no information concerning the location of the first school, but very early the proprietors appropriated money for its support, and as the population increased new schools were opened. As new divisions of the commonland in the township were made, the "School Right" was carefully looked after, until the several lots laid out for it were sold or leased, and the fund thus created was turned into the town treasury, the town assuming the support of the schools.

Whether the benefit accruing to the youth and children of the town from this source was small or great, the purpose manifested to educate the rising generation of the province was praiseworthy. The buildings early constructed on the two sides of the river for the first schools were doubtless built of logs, with seats and warming apparatus of the rudest kind; but boys and girls hungry for knowledge could and did there acquire an invaluable acquaintance with reading, spelling, writing and arithmetic—branches to which a common-school education in those days was chiefly confined. In 1792 ten pounds were appropriated "for the use of a Singing-School." In 1770

the town "voted to appropriate the interest money coming by the sale of the ministerial and school rights of land (exclusive of Mr. James Humfrey's part of the interest) to the use of the schools."

In 1774 the school districts (or squadrons, as they were then called in all the region) were six in number, and each of these seems to have been provided with a rudely constructed school-house and to have maintained a school during a part of the year. School-teachers were not then abundant, for the wages paid for such service were necessarily low, as was true of every avocation and so also was the cost of living. In 1792 the town appropriation for schools was eighty pounds. From decade to decade this sum was gradually increased until, in 1876, Athol was the sixth town in Worcester County in the amount of its appropriations for schools—the sum raised being \$13.03 for each child between five and fifteen years of age; the total amount being seven thousand dollars.

The early records give but little information concerning the supervision of the schools. As was true generally, the minister was expected to know something concerning the qualifications of the teachers and to be present at the closing examinations, which were by no means rigid. For eighty or ninety years the prudential committees, as they have been more recently called, seem to have provided the teachers and supervised the schools officially. In 1829 a town School Committee was chosen, consisting of Rev. Joseph Estabrook, Horatio Willard and Abel Sweetser, and from this date a marked and constantly increasing interest in the schools was developed. As late as 1850 a number of the district school-houses were very poor and inconvenient, but happily these have disappeared in the march of improvement. The oldest printed school report that has been obtained covers the year 1848-49. The town School Committee at that time consisted of Rev. Richard M. Chipman, Rev. S. F. Clark and Dr. George Hoyt. The wages of the teachers for the summer schools varied from eight dollars to \$4.66, and for the winter schools from twenty-seven dollars to four dollars per month.

The names of the teachers are not given in this report. The schools are represented as having been in a fair condition, though the committee administered a rebuke to the town by asserting that "the relative position of Athol as to the proportion of money paid for schooling has been sinking from year to year."

Two years before Athol stood No. 8 in the county for its school appropriations, but when this report was issued it was No. 27, and there were one hundred and sixty towns in the State which were making larger relative appropriations. An improvement in this respect was soon manifest.

In 1856 the town had five hundred and thirty-six families, and was required by law to establish a High School. The location of a High School house caused considerable excitement, as is often the case in the erection of public buildings.

The house was built in 1856, and ready for occupancy in the spring of 1857. Rev. John F. Norton, Dr. George D. Colony and Mr. C. B. Swan were then the acting School Committee. Mr. George A. Wheeler was the first master employed, and was followed by Mr. Farwell F. Fay. Mr. Fay was an excellent teacher. During the remainder of the year Mr. D. D. Leavitt, from Dartmouth College, was master of the school, and gave universal satisfaction. Mr. Leavitt was succeeded for two terms by Mr. Horace Toothaker, from the same college, who was also an excellent teacher. During the year following Mr. George B. Towle was master, and was succeeded by Mr. A. J. Lathrop, who was well known as the popular and successful principal of New Salem Academy.

The work of Mr. Lathrop for four terms in the High School was marked by great success. His successor was Mr. L. S. Burbank, whose service for two years was acceptable. Upon the resignation of Rev. John F. Norton, Dr. James P. Lynde became the chairman of the School Committee. After a little time Mr. H. F. Lane, of Templeton, taught the school successfully for two terms, being succeeded by Mr. Joel D. Miller, a native of Athol, and formerly a pupil in its High School, but for the last twenty years the successful master of the Leominster High School, and now also the editor and publisher of the *Leominster Enterprise*. Mr. Sidney P. Smith, now a lawyer in Athol, was a successful master of the school for three years.

Mr. W. H. Terrill was master when the last report was issued. A very large majority of the twenty-five masters of the school were excellent teachers, and did much to mould the habits and expand the intellects of the youth of Athol.

Of the teachers in the grammar and other schools, much might be said, for this town has long followed the custom of retaining the services of the ablest teachers as long as possible. When the last report was prepared by Messrs. A. J. Nye, L. B. Caswell and E. V. Wilson, committee, the schools were generally in a good condition.

The graded system adopted in the larger schools in 1873 works admirably. Lately a new and well-furnished school-house has been erected on very nearly or exactly the spot where the first meeting-house was built about 1741, and near the granite monument dedicated by the town in 1859 to mark the locality of the ancient burying-ground.

With the growing interest in popular education and the larger number of youth and children to be educated, the appropriations made by the town for the support of schools have gradually increased. The master of the High School is now paid \$1000 salary, and his assistant at the rate of \$500 per annum. In the grammar schools the highest wages amount to \$12.50, and the lowest to \$11 per week. In the intermediate and advanced primary schools

nearly all the teachers receive \$10 per week, and in the mixed schools nine teachers are paid \$7, and fifteen \$6 per week. During the year ending March, 1888, thirty-two teachers received in wages the sum of \$7408.45. The town appropriation for that year was \$8000, and this was increased from other sources, so that the sum actually expended was \$8837.12. To this there are to be added for repairs of school-houses \$368.99; for books, \$611.35, and for other supplies, \$147.60, making a total (not including the cost of a new school-house) of \$9965.06.

The number of children in town between five and fifteen years of age, May 1, 1887, was seven hundred and ninety, and during the year following the scholars in attendance numbered eight hundred and ninety-seven. Recently the School Committee has been giving an unusual amount of attention to the sanitary condition of the school-houses, and from their report and recommendations the most valuable improvements may be expected. Plainly the School Committee is taking large and comprehensive views of the duties of the town respecting the education of its youth and children. Among those who served on the School Committee for a number of years, between 1850 and 1870, were Rev. S. F. Clark, Dr. George D. Colony, Dr. J. P. Lynde, L. W. Hopgood, Esq., Mr. Edwin Ellis, Rev. Lysander Fay and Rev. John F. Norton.

**LIBRARIES.**—Forty years ago a library, which was kept in the Depot Village, furnished not a little excellent reading to the people of Athol; but a larger organization being deemed necessary to meet the increasing wants of the growing population, "The Athol Library Association" was formed in December, 1878, with Hon. Charles Field as its president. Valuable donations of books were received from various quarters, and the library, though small at first, soon became an important factor in the intellectual and moral education of the people. But before five years had passed a strong public sentiment called for a Free Public Library, and at the town-meeting in April, 1882, a Library Committee was chosen consisting of Hon. Charles Field, Rev. H. A. Blake, Rev. J. H. Cox, E. V. Wilson, Esq., and Mr. L. B. Caswell. Mr. Field was the chairman of this committee and Mr. Caswell its secretary and treasurer. The Athol Library Association now made over its library of one thousand and sixty-three volumes to the new organization, and the Free Public Library of Athol was established.

The efficient librarian of the Athol Library Association, Mrs. E. F. Doane, was secured to take charge of the Free Library. The appropriation of the town for new books in 1882 was three hundred dollars. During the next year ten thousand and twenty books were delivered, and by purchase and gift the number of volumes was increased to one thousand four hundred and twenty.

The first ten volumes of the "Official Record of

the War of the Rebellion" had been received from Hon. Amasa Norcross, of Fitchburg, before March, 1884.

A donation of six full volumes of the excellent journal *The Athol Transcript* was also received from its editor, Mr. W. L. Hill. For the year ending March, 1885, the town appropriation for the library was five hundred dollars, and it was constantly becoming more and more popular and useful. During the following year Mr. L. B. Caswell was the chairman of the committee, and the appropriation for the purchase of new books was five hundred dollars. One year later Rev. C. P. Lombard was the chairman of the committee, and the library was increasing in size and value. At the date of the last report the library had been removed to a convenient building which had been leased for five years, and the town was continuing its appropriation of five hundred dollars annually for new books. Mrs. M. S. Doane was librarian.

**ECCLESIASTICAL.**—In the earlier part of this history will be found a somewhat detailed account of the action of the proprietors of the township relative to the building of the first and second meeting-houses, and the settlement of the first minister, Rev. James Humphrey, while later mention is made of the assumption of the support of the pastor by the new town of Athol, and of the location and building of the third meeting-house, which stood, as already stated, on the north end of the Common in the upper village.

Not long after the erection of this edifice dissensions began to arise in the church, though not at first affecting its relations to its pastor. He, however, was soon involved in the trouble, but the records contain no charge against him whatever. From time to time town-meetings were called for the purpose of effecting his dismission. These efforts took form as early as 1779, but the attachment of the people to their pastor was strong, and he was not willing to be dismissed until certain questions relating to the exemption of his estate from taxation, according to law, and the payment of his over-due salary, could be settled. Early in 1782 Mr. Humphrey's proposals for the settlement of difficulties were accepted by the town, and on February 13th of that year he was dismissed. Between five and six years now passed, during which the people were listening to various candidates for settlement, but in July of 1787 the church, by a unanimous vote, called to the pastorate Mr. Joseph Estabrook, a native of Lexington, and graduate of Harvard College. A month later the town voted to concur with the church in extending the call to Mr. Estabrook, offering him an annual salary of £75 in cash and twenty cords of good fire-wood each year, besides the gift of £200 as a settlement.

Something like this last-mentioned offer was common in those days when a call was given to a minister.

The conditions of the call proving satisfactory, Mr. Estabrook was ordained November 21, 1787. His long pastorate of between forty-two and forty-three

years in Athol was peaceful. He was a man of great natural kindness, and his friendly disposition won and retained the hearts of his people. "Prudence was the one virtue above all others by which he endeavored to govern his ministerial conduct." "Mr. Estabrook would not himself preach upon doctrine which were warmly contested, nor did he wish others to do so in his pulpit."<sup>1</sup> During the closing years of his ministry elements were smouldering which at length caused a disruption of the church and congregation, but, happily for him, he did not live to see it. It was a time of unrest in the churches, especially in Massachusetts, and divisions were taking place on every hand. To settle a successor to Mr. Estabrook over the whole people of Athol was a delicate and difficult undertaking. As a matter of course, it is no part of the historian's duty in this place to decide upon the merits of the controversy that, about 1830, rent so many of the churches asunder. Mr. George J. Tillotson, from the Theological Seminary at New Haven, Conn., was soon engaged as a candidate. He was a good scholar and an earnest preacher, but had adopted what were called the Orthodox views of religious doctrine and ministerial responsibility. The rupture occurred when the test of exchanging pulpits with ministers of what were called more liberal sentiments was applied.

A large part of the church seceded, with the two deacons, Messrs. Elijah Goddard and Elijah Ballard, and organized what has since been known as the Evangelical Church of Athol.

The town was still responsible for the support of the minister of the ancient church, and in October, 1830, it voted unanimously to give Rev. Josiah Moore a call to become the pastor of the First Congregational Church and Society of Athol, stipulating, however, that "he shall exchange ministerial labors with all the Congregational clergymen in the neighborhood who are of regular standing, and who will exchange with him." Rev. Mr. Moore was succeeded by Rev. Messrs. Linus H. Shaw, Stephen A. Barnard, Crawford Nightingale, E. J. Gerry, S. F. Clark, D. C. O'Daniels, Ira Bailey, W. S. Burton, S. R. Priest, E. P. Gibbs, W. C. Litchfield and Daniel H. Rogan.

At the first communion service of the ancient church after the separation, eight persons were present as members, the great majority having seceded to form the Evangelical Church.

The church edifice, which was erected in 1773, on the north end of the Common, in the upper village, was the meeting-house of the town for fifty-four years, when it was destroyed by fire, the work, as it has always been supposed, of an incendiary.

The next year, 1828, the present edifice, known as the First Unitarian Church and Town Hall, was built at the cost of between five thousand and six thousand dollars.

<sup>1</sup> See Rev. S. F. Clark's Centennial Address, page 34.

This building is one of a number of churches erected about the same time in the vicinity resembling one another in the general harmony and beauty of their proportions. Reference is here made especially to the Unitarian Churches in Petersham and Templeton, and to what is now the Town Hall in Fitzwilliam, N. H. Modern church architecture has not produced nobler structures in the country towns of New England.

In 1847 the Athol Church was remodeled and made substantially as it now is, the Town Hall occupying the upper story, and the First Congregational Church and Society the lower, as their house for religious worship. Mr. Samuel Sweetser donated the land upon which this edifice stands. This society is usually known as the First Unitarian Society.

*Evangelical Church.*—As already stated, a divergence in religious views occasioned in 1830 the withdrawing of the great majority of the ancient Congregational Church with the two deacons and the formation of the Evangelical Church and Society in Athol. Articles of Faith were adopted by the new church in March, 1831. For about two years this organization worshipped in the Town House, but in 1833 erected a church edifice where their present house of worship stands. The original structure was vastly inferior to that which is now an ornament to the village. It had no vestry or rooms for Sabbath-school and social and religious gatherings, except a long, narrow, poorly-lighted room under its roof, which it was difficult to reach or to leave.

From the first the congregation was large, and in 1859 had outgrown its church accommodations. In the year just named the edifice was substantially rebuilt. The building was raised about eight feet, giving space for a commodious vestry and other necessary rooms; land was purchased and an addition was made to the rear end of the building, new pews were built, new windows were put in, and a new and beautifully proportioned spire erected. The original pews were private property and were appraised and accounted for in the sale of the new pews, which, though a part of the estate of their occupants, are subject to a possible annual tax. The singers were stationed, for a number of years, in the front gallery, at the back of the audience, and as a large majority of the congregation were anxious to see as well as to hear them, the custom of rising and turning around in the pews prevailed longer than in most congregations. Later, the singers were stationed on the left of the pulpit, in front of the audience, and other changes made the rooms below much more pleasant and convenient.

In 1850 the membership of the Evangelical Church was 153; in 1860 it was 230, when it had become the largest church in the Worcester North Conference; in 1870 it was 206; in 1878, 282, and in 1888 it was still the largest in the Conference, numbering 278.

This church has had seven pastors, as follows: Rev. B. B. Beckwith, 1831-34; Rev. James F. Warner,

1835-37; Rev. Richard M. Chipman, 1839-51; Rev. John F. Norton, 1852-67; Rev. Temple Cutler, 1868-76; Rev. Henry A. Blake, 1876-82; Rev. Herbert W. Stebbins, 1883-88.

Mr. Chipman, ordained in 1835, is still living in Bethlehem, Ct.; Mr. Norton resides in Natick, Mass.; Mr. Cutler is a pastor in Essex, Mass.; and Mr. Blake, recently a pastor in Providence, R. I., is just entering upon a new pastorate in Webster, Mass.

Considering its pecuniary means, the contributions of the Evangelical Church for benevolent objects have been liberal, reaching, in 1871, the sum of \$1,653.66.

When it was organized in 1831 its deacons were Messrs. Elijah Goddard and Elijah Ballard. Other deacons have served this church as follows: William Cutting and Samuel Sweetser were elected deacons in 1834. Later, this office was filled by Samuel Clapp, James I. Goulding, Goodell Goddard, Joab Kendall, Edwin Ellis and J. Sumner Parmenter, all of whom are dead. The deacons more recently elected are Lewis Thorpe, Frank C. Parmenter, Ira Y. Kendall, Frederick Allen, Samuel S. Tower and Elbridge E. Spaulding.

*The Baptist Church.*—Whitney, in his "History of Worcester County," published in 1793, says under the head of Royalston: "There were nine or ten families of the Baptist denomination among the first settlers. At what time they were embodied into the church state is not known to us. A Mr. Elisha Rich was their teacher, but he was never ordained among them. He was succeeded by Mr. Whitman Jacobs, who was installed December 13, 1770. He lived in Athol, to which town a part of his society belongs, and there he now resides."

The same historian, under the head of Athol, furnishes this information: "There are about ten families of Anabaptists in this town; nor any stated teacher of this denomination in the place."

On the ancient records of Athol we find a number of certificates similar to the one here copied:

We, the Subscribers, Being chosen a Committee by the Society of the people called antipedo-baptist, who meet together for religious worship on the Lord's day in Royalston and Athol, to exhibit a list or lists of the names of such persons as do belong to said Society or Congregation, do certify that Martin Morton Dos frequently and usually, when able, attend with us in our Meeting for religious worship on the Lord's day, and we do verily believe is, with respect to the ordinance of Baptism, of the same religious sentiments with us. Dated August the 31, 1774.

WHITMAN JACOBS, Elder.  
SIMEON CHAMBERLAIN, { Committee.<sup>1</sup>  
ELIPHALET MOOR.

Upon the same page are certificates to the same effect and couched in similar language, respecting the religious belief of twelve other persons.

To understand this matter it is to be remembered

<sup>1</sup> The terms "Antipedo-baptist" and "Anabaptist" long since disappeared from the reports of the Baptist denomination, the former signifying a person opposed to infant or child baptism, while the latter denoted such as maintain the doctrine that those baptized in infancy should be rebaptized on making a public profession of religion.

that at that time all those who did not in this manner "sign off" from the Congregational Church were liable to taxation for its support, church and State being practically united in a considerable part of New England.

From the printed "Historical Sketch" of the Baptist Church in Athol the facts that follow are gleaned. In 1810 the families of this denomination living in Athol were constituted a branch of the Baptist Church of Templeton, and three years later the members of this branch church—twenty-two in number—were recognized as an independent church by a council. For seven years religious services were maintained, chiefly by the deacons, when one of these, Deacon Briggs, was ordained to the pastoral office October 4, 1820. This pastorate continued thirteen years. In 1828 or '29 the first house of worship was erected in the Upper Village, the same as is now owned and occupied by the Roman Catholic denomination. After a season of considerable trial the second house of worship was erected where the Baptist Church now stands, in the Lower Village. Since the change of location the growth of the church has been constant and healthy, if not rapid. Two hundred and twelve names are found upon the printed list of members for 1888.

From the list of pastors it appears that Rev. Mr. Briggs was succeeded by Rev. Mr. Merriam for six and one-half years. Then followed Rev. D. H. Stoddard, for seven years; Rev. Ambrose Day, for two years; Rev. J. Glazier, for two years; Rev. O. Tracy, for one year; Rev. Charles Farrar, for three years; Rev. D. Reid, for a little time; Rev. Charles Ayer, for one year and a half; Rev. G. L. Hunt, for three years; Rev. J. C. Emery, for two years; Rev. E. M. Bartlett, for four years; and Rev. J. H. Cox, for six years. Rev. Horace F. Brown, the present pastor, began his work in Athol September, 1887.

In 1886 the church edifice was thoroughly renovated, new pews having been put in and a new and valuable organ furnished. The repairs cost \$3,363.85, the organ \$1750 and the furnishing \$242.56, making a total of \$5,356.41. The church was reopened for worship October 1, 1886.

*Methodist Episcopal Societies.*—The oldest of these is the church at South Athol, which was probably organized about the year 1830. Their house of worship was erected in 1836, and Mrs. Melatia Crossman has now in her possession the builder's contract. This is an agreement between nine trustees and two carpenters to build a church forty-two by thirty-two feet and fifteen feet from top of sill to plate. The lumber was to be furnished by the trustees, and the doors, windows, sashes and blinds by the contractors. Forty-four pews were to be built "after the style of the Orthodox Church of Athol." The lumber was furnished by subscription, and the contractors were to receive three hundred dollars for their work.

At present there are thirty-six pews in this church,

and it has a cottage organ and melodeon for instrumental music. Originally it stood in New Salem, but the changes of territory have brought it into Athol.

In 1839 a pulpit Bible was given to this church by a man in Wendell, with the request that all names of pastors, with dates, should be written in the "Family Record."

Rev. George Hudson, commencing in 1887, is the minister at present.

In 1851 a Methodist Episcopal Church was organized in Athol, with Mr. George Gerry as class leader. A congregation of considerable size was soon collected, and public worship was held in halls in the Lower Village until a convenient church edifice was erected and dedicated in 1861. The pastors of this church have been Rev. John Goodwin, Rev. Linus Fish, 1857-59; W. J. Hambleton, 1859-60; Rev. J. B. Bigelow, 1860-62; Rev. J. W. Coolidge, 1862-63; Rev. F. T. George, 1863-65; Rev. John Capen, 1865-66; Rev. C. H. Hannaford, 1866-68; Rev. W. T. Harlow, 1868-69; Rev. C. L. McCurdy, 1869-72; Rev. John Peterson, 1872-75; Rev. A. F. Herrick, 1875-78; Rev. L. A. Bosworth, 1878-81; Rev. Wm. Full, 1881-83; Rev. A. R. Nichols, 1883-84; Rev. P. M. Vinton, 1884-87; and Rev. W. N. Richardson, 1887.

*Second Advent Society.*—This was organized May 17, 1863, with a membership of twenty-eight persons. For some time the meetings were held in the Engine House Hall, the preacher being Dr. James Hemanway. In 1873 their house of worship was built, at an expense of about two thousand dollars. Their first and only settled minister was Roland D. Grant, who was called January 5, 1876, and resigned November 1st of the same year. The officers of the church at present are James Hemanway and J. F. Sawtelle, elders; George Stockwell and Austin Sheldon, deacons; O. T. Brooks, treasurer; and H. A. Wilder, clerk.

*The Second Unitarian Church and Society.*—This society was legally organized February 22, 1877, the first meeting to consider the matter of such an organization having been held during the previous November. Preaching for the new congregation was established in Starr Hall in February, 1877. Rev. J. C. Parsons was installed as pastor June 12, 1877. Land was purchased for the erection of a church edifice at the cost of \$4,000, and the church was built at the cost of \$7,458.48. The furnishing of the same involved the additional expense of \$2,994.50. The hall and vestry were built at the cost of \$5,348.49, and furnished for \$383.19, making the total cost of the entire property, \$19,134.66.

The whole amount of cost was raised by subscription. Unity Hall was dedicated June 11, 1885.

Rev. Mr. Parsons having retired, Rev. Charles P. Lombard was called in March, 1882, and remained as pastor about six years, when he removed to Plymouth, Mass., to take charge of the First Congregational

Church in that town. The present pastor, Rev. Chas. E. Perkins, was invited to this pastorate May 30, 1888.

The records of this church show that it has at this time one hundred and twenty-six members.

*Roman Catholic Church.*—Rev. Mr. Martin, in charge, has furnished the facts that are here given.

Prior to 1850 the Catholics of this town were visited at irregular intervals by different priests, but after the above date Athol became a mission and was attended by Rev. M. W. Gibson, of Worcester, who, in 1853, purchased the old Baptist Church in the Upper Village. After this the wants of the people were better supplied. In 1855 Rev. Father Turpin took charge of this mission. About the year 1862 Otter River became a parish with resident priest, Rev. Mr. Bannon, who visited Athol monthly. Succeeding him were Rev. Messrs. Orr (now of Cambridge), the two by the name of McManus (since dead), Robert Welch (now of Worcester), R. J. Donovan (since dead) and Joseph Coyne, who attended three times each month till March, 1882, when the present incumbent, Rev. E. F. Martin, was appointed resident rector. Attached to the newly-formed parish are the Catholics of Orange, who have services every Sunday. This denomination has in Athol a property costing about twelve thousand dollars, four acres of land lying centrally between the two villages; also a basement roofed over until there are sufficient means to build the superstructure; also a substantial parochial residence. The Catholic population of Athol numbers about nine hundred, the majority of whom are permanent residents, owning their houses and highly esteemed by their fellow-townsmen of all denominations.

*Protestant Episcopal Church, St. John's Parish.*—In 1793, as Whitney informs us, there was one family of Episcopalians in Athol.

The first Episcopal services held in this town were in 1864, and the meetings were in the Town Hall. Rev. Messrs. French, of Greenfield, and Denham, of South Boston, were among the officiating clergymen at that time. Bishop F. D. Huntington, Rev. W. H. Huntington and others officiated later, and September 3, 1866, St. John's Parish was organized and three months later was incorporated. Rev. James D. Reid was at once chosen as rector, but after laboring for a year he removed from town. From that time till 1881 but few services were held, but when, in the autumn of that year, Rev. J. S. Beers was elected diocesan missionary, the interest in this organization was revived under his faithful labors. At the present time there are about sixty communicants; the Town Hall is engaged for six months or until a chapel or church edifice can be erected, while a lot for this has been secured on the corner of Park Avenue and Allen Street, towards which Mr. Hollon Farr has generously contributed two hundred dollars. It is expected that the building will be commenced

with the opening spring, and that arrangements can be made so that, for the present, the same rector can officiate in Athol and Winchendon. The clerk is H. M. Burleigh; Mrs. E. J. G. Parmenter is treasurer; C. W. Sibley, assistant treasurer; and Mrs. H. M. Burleigh, organist.

## CHAPTER CXXXVII.

### ATHOL—(Continued.)

#### MISCELLANEOUS.

**THE MILLER'S RIVER BANK.**—This bank commenced business September 12, 1854, with a capital of one hundred thousand dollars, which, later, was increased to one hundred and fifty thousand dollars. Its presidents have been: John Boynton, 1854; Seth Hapgood, 1855-64; Isaac Stevens, 1864-65; and Alpheus Harding, from 1865 to the present time. Cashiers: Merrick E. Ainsworth, for two years; Alpheus Harding, Jr., 1856-65; Albert L. Newman, 1865-81; William D. Luey, 1881, incumbent with William B. Harding, assistant. January 12, 1865, it became Miller's River National Bank. Directors: A. Harding, John G. Mudge, George T. Johnson, Rodney Hunt, A. L. Newman, George Whitney, H. R. Stowell, George D. Bates and William D. Luey. This bank has paid semi-annual dividends ever since its organization, and for the last twenty years these have been at the rate of twelve per cent. annually, amounting to three hundred and sixty thousand dollars. The reserve fund is one hundred thousand dollars.

**ATHOL SAVINGS BANK.**—This bank commenced business in 1867. Presidents, Charles C. Bassett, 1867-82, and John G. Mudge (incumbent), chosen in 1882. Alpheus Harding has been its treasurer from the beginning; Assistant Treasurer, William D. Luey. It has always paid semi-annual dividends. Its standing is: Deposits, \$1,357,817.09; guarantee fund, \$40,000; undivided earnings, \$29,763.38. Directors: A. Harding, J. G. Mudge, G. T. Johnson, Rodney Hunt, James G. Smith, J. C. Hill, James M. Lee, Solon W. Lee, Lucian Lord, O. T. Brooks, George N. Kendall, Lewis Thorpe and Henry R. Stowell.

**ATHOL NATIONAL BANK.**—This bank began business September 15, 1874, with a capital of one hundred thousand dollars. Its first Board of Directors consisted of Thomas H. Goodspeed, Solon W. Lee, Lyman W. Hapgood, Edwin Ellis, James M. Lee, Washington H. Amsden and Gilbert Southard, of Athol; S. S. Farrar, of South Royalston; Edward Powers, of Phillipston; D. C. Paige, of Petersham; and Isaac Brown, of Templeton.

The present Board of Directors consists of Thomas

H. Goodspeed, O. A. Fay, J. D. Holbrook, C. A. Chapman, James M. Lee, F. C. Parmenter and James G. Smith, of Athol; Isaac Brown, of Templeton; H. C. Longly, of Dana; and J. H. Lee, of Boston; with one vacancy.

The president of the bank is Thomas H. Goodspeed and the cashier C. A. Chapman. The amount of loans is sixty-five thousand dollars, the amount of deposits is ninety-four thousand dollars and the amount of surplus and profits is thirteen thousand dollars.

CONNECTION WITH THE WORLD.—Athol has good carriage-roads leading to all the neighboring towns, and railroad connection with most of them and with the world at large. The Vermont and Massachusetts Railroad (from Fitchburg to Greenfield) was opened in 1847. This is now an important link in the great Fitchburg Railroad system. It has now a double track, and affords excellent facilities for travel and business. In years gone by, especially after snow-storms, close connections with other roads were very uncertain.

The Athol and Enfield Railroad, which has since become the Springfield and Northeastern Railroad, was opened in part in 1871. This road now belongs to the Boston and Albany Railroad system, and opens an important outlet for business, and will probably become more and more valuable to the town.

The spacious and convenient railroad station at Athol, costing about thirty thousand dollars, was erected in 1873. At this station some of the passenger trains stop for refreshments. There is a railroad station at South Athol, on the Athol Branch of the Boston and Albany Railroad.

POST-OFFICES.—List of postmasters<sup>1</sup> at Athol (now Athol Centre) from the establishment of the office:

	Appointed
Joseph Esterbrook.....	October 1, 1802
Solomon Strong.....	April 1, 1803
James Humphreys.....	April 1, 1805
Joseph Proctor.....	February 11, 1809
Reappointed.....	May 8, 1819
Nathaniel C. Esterbrook.....	September 13, 1822
Clough R. Miles.....	March 24, 1823
Reappointed.....	July 15, 1828
Lincoln B. Knowlton.....	February 25, 1835
William H. Williams.....	August 24, 1837
Isaac Stevens.....	July 13, 1841
William H. Williams.....	September 5, 1842
Benjamin Esterbrook.....	December 30, 1847
Stillman Simonds.....	August 25, 1849
Isaac Stevens.....	June 10, 1850
John H. Williams.....	May 13, 1854
Samuel Lee.....	March 27, 1858
Thomas H. Goodspeed.....	June 25, 1862
Reappointed.....	April 22, 1873
Frank H. Raymond (incumbent).....	July —, 1885

List of postmasters at Athol Depot (and later Athol) from the establishment of the office:

	Appointed
Joseph W. Hammond.....	August 4, 1849
Sylvanus E. Twitchell.....	August 7, 1851

<sup>1</sup> This list was procured and kindly furnished to the author by the proprietors of *The Athol Transcript*.

Howard B. Hunt.....	November 1, 1864
Reappointed.....	March 2, 1867
Lucien Lord.....	April 21, 1869
William W. Fish (incumbent).....	

The post-office at Athol Centre has been kept in dwelling-houses, stores and other buildings too numerous to mention.

The office in "The Factory Village," later "The Depot Village," and now Athol, was opened in 1849 in a small house, a little west of the Methodist Church. Two years later Mr. S. E. Twitchell established it in a small room in the Pequog House. Mr. Hunt kept it for a time in the ell of the same hotel, and then removed it to his music store.

Mr. Lord having erected Masonic Block in 1874, reserved in it spacious and convenient quarters for the post-office. The present names of the two offices were given them June 8, 1875.

From the list of postmasters and their appointment as given above, it appears that relatively the post-office in Athol was established quite early, for towards the close of the last century nearly the whole of Worcester County was served by the office at Worcester. In the *Massachusetts Spy*, 1801, the postmaster of Worcester advertised letters for nearly all the towns in the county and for some of the towns in adjoining counties.

THE WORCESTER NORTHWEST AGRICULTURAL AND MECHANICAL SOCIETY.—For some years previous to 1867 annual fairs were held in Athol, at which the exhibitions were highly creditable and awakened a great amount of interest. These gatherings, which were largely attended, doubtless prepared the way for the incorporation of the society named above. This was established in the town of Athol in 1867, and issued its first report in that year. Its officers at that time were as follows: Calvin Kelton, president; Josiah Haven and J. F. Packard, vice-presidents; Thomas H. Goodspeed, treasurer; E. T. Lewis, secretary; and L. W. Hapgood, Benjamin Estabrook, F. F. Fay, C. H. Baldwin, A. G. Stratton and E. J. Sage, trustees, all of Athol, except Mr. Baldwin, who belonged in Phillipston. The exhibition of horses and farm stock took place on the Common, while that of fruits, vegetables, flowers and manufactured articles was in the vestry of the Orthodox Church. Premiums amounting to about one hundred and ten dollars were awarded. The list of members contained the names of eighty-five men and women of Athol and of nineteen others, belonging mostly in Phillipston, Royalston and New Salem.

For the year 1868 F. F. Fay, Esq., of Athol, was president, and seven well-known gentlemen of this town and vicinity, vice-presidents. The society received from the State, as its share of the State bounty, about \$218, and paid out for premiums \$219. The chief event of that year affecting the society was the purchase of land for fair grounds. A lot was bought of Mr. Benjamin Estabrook for \$1500, and another

lot adjoining of Mr. S. D. Prouty for \$1300. There was cash in the treasury to pay \$300 on these purchases, and notes were given for \$2500, with interest at five per cent. Within the grounds there is a beautiful grove, while a lake borders the same upon one of its sides. During 1869 an exhibition hall was erected, one hundred by fifty feet, two stories high. In the second story is a hall for addresses, society dinners, etc., with offices for the officials of the society. A track was prepared for the exhibition of horses and a stand for judges erected. These permanent improvements upon the grounds cost \$8853. During the year 1871 \$1200 of the debt of the society were paid, the sum total of the receipts for the year having been \$4846. Of this amount \$600 were received from the Commonwealth. The number of members was also largely increased. From year to year it has been customary to enlarge the range and amount of premiums offered and to diminish as rapidly as possible the debt of the society. In 1875 this amounted to \$9722. In 1880 this debt had been reduced to \$7125, and in 1887 it appears from the reports to have amounted to only \$1400. From the beginning, the whole enterprise has been eminently successful.

**PHYSICIANS AND SURGEONS.**<sup>1</sup>—Dr. Joseph Lord, first physician, exhorter and clerk of proprietors, died in Vermont; Dr. Ellinwood, home at the Ellinwood place, on The Street; Dr. Royal Humphrey, son of first pastor, on The Street; Dr. Ebenezer Chaplin, on the Common; Dr. Rice, removed, lived in the house of Theo. Jones; Dr. Holmes, removed to Leicester, dead; Dr. Morton, lived on Sawyer place, Orange Road; Dr. William H. Williams, Brick House, Centre, dead; Dr. George Hoyt, water cure founder, dead; Dr. George Field, water cure, dead; Dr. J. H. Hero, removed to Westborough, water cure; Dr. Hutchinson, contemporary with Dr. Hoyt, dead; Dr. George D. Colony, in Depot Village, removed to Fitchburg; Dr. Austin, in Centre, accidentally killed in 1856; Dr. A. G. Williams, in Depot Village, removed to St. Albans, Vt., dead; Dr. James Cooledge, successor of Dr. Colony, died in Depot Village; Dr. J. B. Gould, removed to Somerville; Dr. Kendall Davis, removed to Templeton, dead; Dr. O. M. Drury, removed to Orange, dead; Dr. H. A. Deane, removed to East Hampton, Mass.; Dr. V. O. Taylor, removed to Providence, R. I.; Dr. Jackson, removed to Somerville, Mass.; Dr. Kemp, removed to Danvers; Dr. King, removed to Huntington; Dr. Donnell; Dr. A. N. Parsons, removed to Mexico, and Dr. C. W. Parsons, removed to Worthington, dead, brothers; Dr. Chamberlain, lived on The Street, removed to New Salem; Dr. James P. Lynde, now resident since 1856, Centre; Dr. James Oliver, resident since 1877, Centre; Dr. H. O. Dunbar, came in 1873, Depot Village; Dr. M. L. Linsey, 1882, Depot

Village; Dr. Smith, 1888, Depot Village; Dr. H. H. Burns, 1888, Depot Village; Dr. R. H. Dunne, removed to New Haven, 1888.

**Eclectic Physicians.**—Dr. Simmonds, Depot Village, removed; Dr. Chase, on Hollis Goddard place, removed; Dr. Maybe, Depot Village, removed; Dr. Green, removed to Paris, Maine, Riceville; Dr. D. D. Davis, Centre, removed.

**Homœopathic Physicians.**—Dr. Cragin, Depot Village, removed; Dr. Broons, removed to East Boston; Dr. Thayer, removed; Dr. Colburn, removed; Dr. C. H. Forbes, resident between the villages. Drs. A. G. Williams and James Oliver were surgeons in the army during the Rebellion. Dr. G. D. Colony is widely known as a consulting physician in Fitchburg and vicinity, and so is Dr. Lynde in the northwestern part of Worcester County. Dr. Lynde is treasurer of the Board of Control of the State Agricultural Experiment Station. Drs. Colony, Lynde and Oliver have been efficient members of the Athol School Committee, the former two for a series of successive years.

In the list given above, there are the names of some others who, from time to time, took an active part in the business, educational and religious interests of the town.

**LAWYERS.**—No public record has been preserved respecting the earliest lawyers in Athol. In 1850, and for about fifteen years afterwards, till the time of his death, *Isaac Stevens* had his law-office in the Upper Village. He was a useful citizen, and very favorably known in his profession as a member of the Worcester County bar. For a short time he was the president of Miller's River National Bank, also postmaster at Athol for some years.

Among the lawyers of Athol who have died, *Farwell F. Fay* may be mentioned. He was a native of New Salem, and was first known in Athol as a successful teacher in one of the common schools. Later he became master of the High School, but relinquished this position to study law in the Law Department of Harvard University. After his graduation he settled as a lawyer in Athol. In 1862 Mr. Fay recruited a company of soldiers—chiefly from Athol—for nine months' service against the Confederacy, and was chosen their captain. This was Company E of the Fifty-third Regiment Massachusetts Volunteers, and served during the tedious campaign in Louisiana. For some years after his return from the war he was a member of the School Committee. Later he opened a law-office in Boston, and died there in 1888.

*Charles Field* is one of the senior members of the Worcester County bar, and one of the vice-presidents of the Bar Association. He was born in Athol and removed in early youth to Greenfield. He studied law in the office of Hon. Daniel Wells, afterwards chief justice of the Court of Common Pleas. After his admission to the bar he spent four years in the West and Southwest, returning thence to Massachusetts and to his native town, which he has since made

<sup>1</sup>The names of these and dates have been kindly furnished by Dr. James P. Lynde.

the place of his residence. In 1857 he was elected to the House of Representatives, and in the two years following was a member of the State Senate. In 1860 he was a Republican Presidential elector, and, with Chief Justice Chapman, John G. Whittier and others, cast the electoral vote of Massachusetts for Abraham Lincoln and Hannibal Hamlin. Since then he has confined himself to the duties of his profession. On the establishment of the First District Court of Northern Worcester, in 1884, he was appointed justice of the same, and still holds that office. In 1856 he married Caroline C. Alden, and has one son, Charles Field, Jr., who follows his father's profession.

Though not in the army during the Civil War, the services of Mr. Field were eminently helpful. For a number of years he was the collector of internal revenue in the district embracing Athol.

*George W. Horr*, a member of the Harvard Law School Association, the senior member of the bar of Northern Worcester, is a native of New Salem. He received his academical education in his native town, in Quoboag Seminary, Warren; in Phillips Academy, Andover; and Williston Seminary, Easthampton, from the last of which he graduated as salutatorian in 1848. He then pursued science and law at Harvard University. Later he was in law-offices in Greenfield and New York City, and, later still, as a partner of the late Charles G. Colby, opened a literary bureau in Brooklyn, N. Y. Returning to Massachusetts, he was admitted to the bar in 1860, and received the degree of LL.B. from Harvard. Mr. Horr filled various important positions in his native town before removing to Athol in 1863. During the Rebellion he enlisted as a soldier, but a severe injury received before the war prevented his acceptance. In Athol he has served as chairman of the School Committee and moderator of the town-meetings. A Democrat, he cast the one solitary vote for the Democratic candidate for Governor in 1865. On various occasions Mr. Horr has delivered literary and scientific addresses, and at the celebration in Athol, July 4, 1887, he was the orator.

For the "History of Worcester County," published in 1879, Mr. Horr prepared the histories of Athol, Dana, Petersham, Phillipston and Royalston. His law practice is large, particularly in the Department of the Interior, at Washington.

*Sidney P. Smith, A.B., LL.B.*, attorney-at-law, Athol, Mass., was born in Princeton, Ill., July 13, 1850, and fitted for college at the High School in his native town, and entered Amherst College, Amherst, Mass., 1870, and graduated in 1874. He was principal of the Athol High School from 1876 to 1880. He graduated at Union College of Law, Chicago, in 1882, and the same year was admitted to the bar in Illinois, and in 1883 to the Massachusetts bar. He has been special justice of the First District Court of Northern Worcester since 1884, and represented the First Worcester District in the Massachusetts House

of Representatives in 1887 and 1888. He married, in 1879, Miss Stella M. Parmenter, of Athol, by whom he has had two children.

*Henry M. Burleigh*, counselor-at-law, Athol, Mass., was born in Hartford, Conn., March 2, 1835; was fitted for the bar under private tutors, and admitted to the bar of Suffolk County, Mass., as an attorney and counselor-at-law July 17, 1856. He was commissioned second lieutenant in First Regiment New York Volunteers, April, 1861; promoted to adjutant, and afterward captain of Company D. He was also commissioned assistant adjutant-general of volunteers in April, 1862, and served on the general staff of the United States Army till the close of the war. He was wounded three times—at Antietam September 17, 1862; again July 4, 1864, and at Winchester in April, 1865. He was mustered out September, 1865. He settled in Kansas, and in 1866 was appointed United States commissioner, and also served two terms as prosecuting attorney of Allen County. In 1878 he settled in Athol. He married Clara Hoyt, daughter of Dr. George Hoyt, of Athol, in May, 1871, but has had no children.

*E. V. Wilson*, counselor-at-law.—Mr. Wilson was born at Winchendon, Mass., July 1, 1847. After fitting for college in New Hampshire, he graduated from Cornell University at Ithaca, N. Y., in 1872. He read law with Wheeler & Falkner in Keene, N. H., and was admitted to practice in the New Hampshire Courts in 1875. In 1876 he was admitted to the Massachusetts bar at Greenfield, and established himself in his profession in Athol in May of the same year. Mr. Wilson was auditor for the town in 1887, and at the last election was chosen a member of the School Committee for the term ending in 1890.

*Charles Field, Jr.*, counselor-at-law.—Mr. Field was born in Cambridge, Mass., fitted for college at Phillips Academy, Andover, and with private tutors; entered Williams College in 1877, and graduated, B.A., in 1881. He studied law in the office of his father, Judge Charles Field, of Athol, for two years, also read law two years in the Boston Law School, and was admitted to the Massachusetts bar in June, 1886. Mr. Field is in practice in Athol.

TRADERS IN ATHOL (1888)—*Athol Centre*.—Fay & Fay, grocers; Stevens & Co., grocers; A. P. Wheeler, painters' supplies; J. E. Goodnow, meat market; W. N. Ward, meat market; Highland Bakery, bakers; Cyrus Smith, tinware and stoves; F. G. Amsden, clothier; George W. Rickey, jewelry; J. A. Holton, boots and shoes; Frost & Whitcomb, stoves and tinware; T. W. Savage, dry goods; H. M. Humphrey, apothecary; Samuel Lee, hardware; E. E. Kelton, groceries; Miss Ryan, milliner.

*Athol*.—C. H. Tyler, groceries; C. F. Gage, variety store; George Woodbury, meat market; F. G. Lovel, footwear; L. A. Smith, tailor; E. Deney, dry goods; H. R. Barber, harnesses; C. F. Paige, hardware; H.

Arsenault & Co., apothecaries; Parmenter & Kendall, clothing; Boston Millinery Store, millinery; Amsden Brothers, clothing; Geo. O. Faye & Son, jewelry; John Glennon, groceries; Parmenter & Tower, dry goods; E. W. Train & Co., stoves and tinware; J. D. Holbrook, dry goods; O. T. Brooks & Co., groceries; Henry Cook, furniture; A. V. Fletcher, stoves and tinware; Albert Ellsworth, baker; T. S. Estabrook, drugs and medicines; G. M. Ainsworth, plumber; J. B. Cardany, furniture; P. J. Talbot, tailor; W. A. Beaman, bicycles and guns; Athol Fruit Store, fruits; C. M. Lee, stoves and tinware; J. W. White, groceries; M. Lehrberg, millinery; Converse Ward, apothecary; W. W. Norton, dry goods; F. W. Lord, apothecary; J. L. Balcom, footwear; Lucien Lord, books, stationery, etc.; C. A. Carruth, clothier; Johnson & Whittemore, groceries; Miss Ward, millinery; A. S. Davis, footwear; C. R. Chandler, millinery; S. N. Follansbee, jewelry; L. S. Rich, millinery; L. C. Parmenter, millinery; Geo. H. Cleveland, footwear.

CEMETERIES.—So far as can be ascertained, no complete and reliable record of the deaths in Athol has been preserved. During the long pastorates of the early ministers they kept a record of the funerals which they attended, and of the deaths of some others, as was the custom in those days, but for the last fifty years little or nothing has been done to combine the old with the more recent records, and make the list complete.

The oldest cemetery was laid out in 1741 on a lot of eight acres, situated on the north bank of Mill Brook, about sixty rods southeast of the railroad station. For years before 1859 this "Old Burying-Ground" had been wholly neglected and was almost forgotten, being held as private property. In that year, through the efforts of Colonel Thomas Townsend and Messrs. George Sprague and Amos L. Cheney, the town obtained a legal title to a lot eight rods long and four rods wide (which contained nearly all the graves that could then be distinguished), fenced the same, and reconsecrated it with religious services July 4, 1859, erecting, at the same time, a suitable granite monument. The proceedings on that day were soon printed in two editions, under the title, "The Home of the Ancient Dead Restored." The lot was given to the town by Messrs. Ethan Lord and Amos L. Cheney. In 1859 about forty graves could be distinctly traced, but no marks upon the rough stones gave any indication of the names of the occupants. Five children of Ephraim Stockwell were buried there, and five graves, side by side, are seen, answering in length to the recorded ages of the children.

The second cemetery laid out was what has long been known as the Village Burying-ground, just beyond the covered bridge on the road to Orange. This appears to have been opened as early as 1746.

The third was the ancient burying-ground, a little off from Pleasant Street in the Upper Village, just

back of the house owned by Mr. Eliezer Judd. This is sometimes called "The First Church Cemetery." The interments in this cemetery were almost wholly between 1773 and 1846.

The fourth cemetery (sometimes called "the Main Street Burying-ground") was opened in the south part of the Upper Village in 1843. The remains of many of the leading men of the town repose there, and the town makes an annual appropriation to keep it in order.

The cemetery on Chestnut Hill is probably older than the one just noticed, but it is not known when it was opened.

In 1883 the town purchased a pleasantly-located tract of land containing nearly thirty acres for a new cemetery. It lies upon the north side of Miller's River, and upon the side of the road leading to Orange Furnace. It is called the "Silver Lake Cemetery," as it borders upon the beautiful lake of that name. The grounds have been laid out with good taste, and there is not in all the region a more suitable spot for the resting-place of the dead. The cemetery was dedicated May 10, 1877.

The most ancient tombstone found in the Lower Village Cemetery has this inscription:

In memory of Mr. Ebenezer Goddard, who died Nov. ye 29th, in ye year 1752, in ye 49th year of his age.

In the ancient Upper Village Cemetery, on Pleasant Street, is a gravestone inscribed thus:

MR. CALVIN HUMPHREY, SON OF THE REV. JAMES HUMPHREY AND ESTER, his wife.

He departed this life Nov. 20th, 1773, aged 6 years and 6 m.

Ah, death! how cruel is thy reign.  
Thine arrows make the parents Pain.  
But faith anticipates the day  
When thou must yield a Pall thy Prey!

Over this inscription is a large cherub, with expanded wings, a favorite device for tombstone ornamentation during the eighteenth century.

The first pastor of Athol, Rev. James Humphrey, was laid at rest in a tomb in this old cemetery, but there was no inscription upon it in 1850. It is possible, perhaps probable, that this tomb was private property, but the hand of time and, what is infinitely worse, the hands of the lawless, have long since made it a heap of ruins. In the same cemetery was another tomb, perhaps a receiving tomb, which has shared the same fate. A third tomb survives, viz.: that of Joel Morton and family. Depredators broke into this some years since, and took such relics as they could find, but the breach was repaired and the entrance carefully sealed.

The locality and surroundings of this cemetery are not such as to encourage efforts in the way of improvement like the cemeteries that are now used for the interment of the dead; still it hardly comports with the respect we ought to show to the honored men and women of the past that this ancient burying-ground should be so sadly neglected.

**HOTELS.**—Mr. Daniel Bigelow (now eighty-eight and a half years of age, and one of the oldest men in town) says he can remember when the Pequig House was a private dwelling. From other sources it is learned that it was not opened as a hotel until 1830.<sup>1</sup> From Mr. Bigelow's statements it appears that the "Factory Boarding-house" was erected in 1811, and that two or three years later it was opened as an inn, and so kept for a number of years. Captain Orcott's tavern was erected very early in the history of the town. It stood just above the centre of Athol, and was the first house on the Templeton road, very near the Fair Grounds. In the old elm-tree opposite, the staple still remains on which the ancient tavern-sign was hung. Probably the oldest tavern in Athol was on "The Street," not far from the present residence of Mr. C. K. Wood. During the Revolutionary War, as already stated, it was supposed to be the headquarters of a little company of Tories, and was carefully watched or "inspected," as the term was in those days. Captain William Crosby is said to have kept the same house as an inn. Where, or nearly where the Summit House now stands, Mr. Samuel Sweetser is said to have kept a public-house during the later years of the last century, and Thomas Lord was his successor. Others owned the place and kept the tavern before it came into the possession of Mr. John Brooks, the father of Mrs. Doctor Lynde. Captain Kendall once kept a hotel where Mr. Gilbert Southard now lives. It is certainly singular that so little definite information can now be obtained respecting the old taverns of Athol, for a century ago the country tavern was a most important institution. Travelers were to be entertained in considerable numbers, horses were to be cared for, the ground in front was the place for military parade, while all, young and old, were welcome in the bar-room.

It should be added that the landlord of the Summit House at the present time is Mr. George H. Prouty, while Mr. George F. Lord has the charge of the Pequig House, under a lease given by its owner, Mr. Adolphus Bangs. Mr. Bangs was the keeper of the Pequig for about nineteen years previous to 1886.

**FREE MASONS.**—Upon the rolls of some of the older Masonic lodges in the county, and of the lodge in Greenfield, the names of Athol men appear. In 1803 the Harris Lodge was instituted in Athol, and in 1864 a new lodge, the Star Lodge, was organized. This was followed in 1866 by the Union Royal Arch Chapter, and later the Athol Commandery of Knights Templar was instituted.

Major Warren Horr, of Athol, is doubtless one of the oldest Masons in Worcester County. His certificate of membership, written in both English and Latin, is a curiosity that merits preservation: "Brother

Warren Horr, Jr., to whom we have granted these letters, was admitted to the third degree of Masonry in Golden Rule Lodge, on the 25th day of Oct. A. L. 5825. Distinguished for his virtues and fidelity to the craft, he is recommended to their favor and protection. In testimony whereof we have caused our Brother to write his name in the margin and to these presents and have affixed the Seal of our Lodge. Witness our Master and Wardens at New Salem this 23d day of January A.D., 1826.

"SAMUEL WOODBURN, Sec'y."

On the sides of the certificate are the names of other officers of the lodge, and then follows an official declaration that the lodge in New Salem is in good standing, signed by the Grand Secretary. Mr. Horr is eighty-five years of age.

**WATER-WORKS.**—The history of these is as follows:

Robert Wiley and S. L. Wiley, co-partners under the firm-name of the "Athol Aqueduct Company," agreed, under seal, with the inhabitants of Athol to furnish them with pure water for fire and domestic purposes, and to provide fifty hydrants at fifty dollars each per year, and others, as needed, at the same rate. This agreement was signed by Robert and S. L. Wiley and the selectmen of Athol June 7, 1876, and approved by a vote of the town at a town-meeting held June 13, 1876.

The next year, by act of the Legislature, the two Wileys and two citizens of Athol, their associates and successors, were made a corporation by the name of the Athol Water Company (the Wileys being really the corporation), for the purpose of furnishing Athol with pure water, which carried out, so far as it has been carried out, the original agreement referred to above.

Fifty hydrants were furnished, and five or six more have been added. The act of incorporation bears date of April 10, 1877, and the constructed works were accepted by the town July 7, 1877.

The water furnished by this corporation comes from Wellington Brook, in Phillipston, Buckman Brook, in Athol, and a small brook that rises near the residence of Charles H. Barton, in Phillipston. There are three reservoirs for storing and distributing the water. The main one has an area of nineteen acres, and is partly in Phillipston and partly in Athol, with an elevation of five hundred and fifty feet above the Lower Village. This is chiefly for storage. A second reservoir, of about one acre, is a little distance east of the Calvin Kelton homestead, and this supplies the Upper Village or Athol Centre, while a third, of about the same size, situate a little north of the Upper Village Cemetery, supplies the Lower Village.<sup>2</sup>

From the report of the Water Committee for 1888, to which reference is made in the notice of the Fire

<sup>1</sup> In conflict with this opinion is the fact, as stated in the *Athol Transcript's* Annual for 1888, that Mrs. Sally Fish had a deed in which the Pequig House building was described as a tavern more than one hundred years ago.

<sup>2</sup> These facts have been kindly furnished by Judge Charles Field.

Department, it appears that there is not a little dissatisfaction with the working of some, at least, of the hydrants.

**THE ATHOL GAS-LIGHT COMPANY.**—In 1874 this company was organized. Its capital was fixed at forty thousand dollars. What effect the general introduction of electric lights will have upon this company's prosperity remains to be seen. This company has recently been incorporated with the Athol Electric Light and Power Company.

The people of Athol may be congratulated upon their miles of excellent brick and concrete sidewalks.

The spacious and beautiful Music Hall, erected in Athol Centre, opposite the Summit House, and which was destroyed by fire in 1875, has not been rebuilt.

**NEWSPAPERS.**—As has often proved true in other places, the first efforts to establish a good newspaper upon a permanent basis were not successful in Athol, *Freedom's Sentinel*, started in 1827, and *The White Flag*, which first appeared in 1850, had but a brief existence. Those of a later date have been more fortunate, either because they have been better managed financially or have better supplied the wants of the community. In 1866, at a meeting of the citizens of Athol, called to consider the matter "of offering suitable inducement to a competent person to establish in town an independent weekly paper," a committee was appointed to attend to this business; and, as the result, Mr. R. W. Waterman, publisher of the *Worcester West Chronicle*, then printed in Barre, was invited to remove his establishment to Athol and issue his paper from this place. Mr. Waterman accepted the invitation, and for twenty-three years has edited and published the *Chronicle* in Athol. He has done good service in procuring, arranging and printing, from time to time, a multitude of facts relating to the history of his adopted town. If the *Chronicle* has a specialty, it is believed to be the collection weekly, through correspondents, of the local news from nearly every town in the northwest part of Worcester County, and giving the same to the public.

*The Athol Transcript*, which is designed to be "a first-class home paper and a popular advertising medium," was started, in 1871, by Messrs. Lucian Lord and Edward F. Jones, with Dr. V. O. Taylor as editor. Later, Col. George H. Hoyt was connected with it as owner in part and editor. In 1873 Mr. W. L. Hill purchased a small interest in it and became its editor, a position which he has held uninterruptedly for the last sixteen years. Mr. Lord and Mr. Hill are now equal owners in the establishment, and the paper is very prosperous. From the first it has been the aim of Mr. Hill to make the *Transcript* a reliable and outspoken organ of local public opinion and progress, and how well he has accomplished his purpose is attested by the esteem and financial support secured. The editorials of few country papers find

their way into city journals as often as do those that first appear in the *Transcript*.

With the opening of 1888, the *Transcript* Company prepared and printed for circulation *An Annual*, which is crowded with historical and other information of very great and permanent value. Few, perhaps, will appreciate the amount of time and labor expended upon this unpretending work, but whoever shall study it will become familiar with the principal facts regarding Athol's settlement and progress.

**FIRE DEPARTMENT.**—From the last printed report of this organization it appears that the appropriation to maintain it for 1887-88 was \$2,100, while the amount actually paid out to meet necessary expenses was \$3,261.41. This expensive, but absolutely necessary organization, is an honor to the town.

The two steamers, Athol and Pequog, the hose companies and the Union Hook-and-Ladder Company, have all efficient men at their head and enough assistants to do good execution in case of a fire. But serious complaint is made by the water committee respecting the working of the hydrants, which have been from the beginning, with the entire water-works, private property. And this matter has become of such pressing importance that the water committee have examined several other sources of supply, and earnestly recommend to the town to take immediate action for the purpose of obtaining the right to take water for domestic and other purposes from a pond, which is large and natural, in the southeast part of Phillipston. The engineers who received compensation for the entire year were Charles Gray and J. C. Blake, while A. L. Pike was paid for six months; J. L. Dexter, J. H. Hoskins and H. F. Boutelle, for nine months each; and J. A. Carter for twelve months, but by two orders on the treasury.

**LOCAL BUILDING IN 1888.**<sup>1</sup>—During the last year an unusual number of dwelling-houses and manufacturing establishments have been built in Athol. Of the former thirty-six have been erected, while many others have been thoroughly renovated or enlarged to such an extent as to be practically new. The houses erected on the Ridge Hill property are pleasant and attractive homes; and the same may be said of nearly all the dwellings recently erected or renovated. From year to year the style of dwelling-house architecture in Athol improves, and arrangements for family convenience and comfort are multiplied.

Respecting new manufacturing establishments this may be said: The new Hill & Green shoe-shop, which is nearly completed, will cost about \$15,000. A new piano-case shop has been erected on Cottage Street, while Bates Bros., wallet manufacturers, have doubled their capacity for work. Mr. J. B. Cardany

<sup>1</sup>The facts respecting this matter have been gleaned from a very full and valuable statement, compiled by the *Athol Transcript*, for its issue January 8, 1889.

has built a new block, and added to his store on Exchange Street until he has doubled his room for business, expending \$12,000 in those enterprises. The Athol Silk Company and Athol Machine Company have put in much new machinery, while L. S. Starrett's tool business has been augmented by the addition to it of Charles I. Fay's extensive tool industry, lately removed from Springfield. L. Morse & Sons have made a large addition to their factory and built new sheds and dry-houses. A. F. Tyler and E. Ellis & Son have made additions to their factories for manufacturing sashes and blinds. For the Soapstone Works a new building has been erected, and the cabinet works of Scott & Nye have been enlarged. Hapgood & Smith have made very important improvements in their match-factory. The establishment of the Athol Electric Light and Power Company, and its recent consolidation with the Athol Gas Company, show that the town is making progress in industrial matters. It is estimated that during the year 1888 more than \$130,000 were invested by the citizens of Athol in building operations.

COLLEGE AND UNIVERSITY HONORS.—Williams College appears to have been the favorite resort of the young men of Athol who have acquired a collegiate education. The following appear to have graduated from it, viz.:—Jesse Stratton, John Wiswall Humphrey, John Drury, Jr., William La Roy Haven, for many years an educator in New Jersey, Joel Drury Miller, clergyman, teacher and editor in Leominster, and Frederic Eugene Stratton. Henry H. Sprague, of Boston, and George A. Black graduated from Harvard University. Lewis M. Norton took his degree, Ph.D., at Gottengen, Germany, and is professor of organic and industrial chemistry in the Massachusetts Institute of Technology, while James P. Lynde is a graduate of that institution. Charles H. Sweetser, a graduate of Amherst College, has been an able editor and is well known as the author of the "History of Amherst College."

GRAND ARMY OF THE REPUBLIC has two posts in Athol: viz., Parker Post, No. 123, whose headquarters are in Masonic Block in Athol Centre. This post holds in memory James C. Parker, who was sexton of the Evangelical Church before going to war. He was killed at the battle of Newbern, N. C., while in the thickest of the fight, his rifle missing fire as often as he attempted to discharge it. Mr. Parker left a widow (since dead) and three children.

H. V. Smith Post, No. 140, meets in Grand Army Block. This post holds in memory Hubbard V. Smith, one who was among the first to enlist upon the breaking out of the war. In the engagement near Strasburg, Va., a minie ball entered his body just above the right hip, and passed so nearly through him that it was extracted above the left hip. Mr. Smith was taken prisoner, but later was paroled for exchange, and was brought home alive, though a great sufferer.

Of the organizations for the promotion of temperance and the various reforms for mutual help in case of disability, to strengthen the social tie, and to improve society in various ways, Athol has a very large number which are in successful operation, one of the most important of which is the one entitled "Sons of Veterans," General Sherman Camp, No. 65.

DEPUTY SHERIFFS.—William Bigelow and Joseph Pierce held this office before 1807. Since that date James Oliver, 1807–28; Flavel Humphrey, Abijah Hill, 1828–38; John H. Partridge, 1838–59; and Gardner Lord (incumbent), 1859, have been Deputy Sheriffs.

MANUFACTURING ESTABLISHMENTS.<sup>1</sup>—The following notices of these are given without any particular regard to chronological order, or to the kind of goods manufactured.

It was very early perceived that the streams arising in and running through this town were sufficient in volume of water and rapidity of descent to furnish power for a great number of mills. Miller's River, Tully Brook (which the historian Whitney said in 1793 should have been called a river), Mill Brook and another stream in the south part of the town all have a permanent and large supply of water for manufacturing purposes, and soon after the settlement of the township a number of saw and grist-mills were built upon their banks.

In 1793 there were in Athol four grist-mills, six saw-mills, one fulling-mill and one shop with a trip-hammer, all carried by water-power. These were a necessity in supplying food, building materials, clothing and tools for the resident population. It was a later discovery that Athol might become one of the manufacturing centres for the Commonwealth and country. This business, which has now become of the first importance in the town, has been very gradually developed.

About seventy years ago Mr. Eliphalet Thorpe was manufacturing paper for the general market, as his old mill-book, dated January, 1825, and running about twenty years, shows. The manufacture of cotton-cloth was among the earlier industries of Athol, three hundred and sixteen thousand yards having been made at the Athol Cotton-Factory in 1837. This factory was built in 1811, and has had very many owners, not all of whom have been successful. Bennett & Van Valkenburg now employ thirty-seven persons in it, and it is understood that they are conducting their business with enterprise and with remunerative profits.

*Ethan Lord's Grist-Mill.*—This was built between 1757 and 1760, and it then stood opposite Richardson's machine-shop, and before 1770 it was moved to

<sup>1</sup> The facts now given respecting the manufacturing establishments of Athol, as they were forty or fifty years ago, have been kindly furnished by Deputy Sheriff Gardner Lord, and many of them are corroborated by the author's distinct recollection.

its present site. Later Simeon and Ezra Fish owned and operated this mill, and it was known as "Fish's Mill." Their successors were William and Augustus Newhall, and Joshua Newhall succeeded them. Joseph Richardson then became the owner, but the entire property is now in the possession of Mr. Ethan Lord.

*Sibley Scythe Shop.*—Before the close of the last century David Lilley made nails on the site of this shop, but about 1800 sold the premises to Perley Sibley and Stephen Hammond, who turned them into a scythe factory. Mr. Hammond died in 1835, and his interest in the shop was purchased by Russell Smith. Mr. Smith having died in 1868, and the Sibley family wishing to give up the business, the whole was bought by Ethan Lord, and is now occupied by the Athol Silk Company.

In the manufacture of footwear, which is the leading industry of Athol, Mr. Charles Milton Lee was early in the field, and has been eminently successful. He is the son of William D. Lee, and in youth was a farmer. In 1850, with about one hundred dollars, he walked to Boston and purchased a small stock of leather. During that year he employed no help, but the goods made and sold by himself brought about six hundred dollars. His business card (now before the writer) represents, not only his large and well-furnished factories as they now are, not far from the railroad station, but also the one-story home of his childhood and youth, and the still more unpretending shop in which he laboriously made his first pairs of boots and shoes for the general market. After this venture he employed help and enlarged his business. In 1858 he formed a partnership with his two brothers—John Howard and Solon W.—which continued for ten years, meanwhile establishing a business house in Boston for the sale of their goods. In 1869 this partnership was dissolved, Mr. C. M. Lee continuing the manufacture while his brothers carried on the business in Boston. During the twenty years since 1869 Mr. Lee's business has been constantly increasing, and he is now the owner of a group of three large and well-appointed brick factories in Athol, one of which he takes charge of in person, while his two sons, W. Starr and Auburn H., conduct the others.

A third son, George M., has charge of his store in Boston. Children's shoes are the specialty manufactured in this immense establishment, and the sales amount to about five hundred thousand dollars annually. Mr. C. M. Lee was among the first to substitute steam-power for human muscle in the manufacture of foot-wear, and to introduce the best machinery into his factories.

*TOOLS.*—Mr. L. S. Starrett is the manufacturer of fine tools for mechanics. He commenced this business in 1880, employing, during the first year, ten men, which number is now increased to forty. January 1, 1888, Mr. Starrett issued a finely-illustrated catalogue and price-list of his goods, from which it

appears that, among other exceedingly well-made implements for mechanical work, he puts upon the market his Patent Combination Square, Improved Bevel Protractor, Patent Double Square, Double Steel Square, Universal Bevel, Patent Inclinometer, Universal Bevel Protractor, Caliper Square, Micrometer Caliper Square, gauges of different kinds, shrink rules, calipers of various patents, dividers of all kinds, levels, speed indicators, etc.

*The Athol Machine Co.* was organized under the General Statutes of Massachusetts in 1868. Capital stock paid in, \$50,000. This company have an iron foundry, and manufacture hardware specialties, vises, meat-cutters and machinists' tools in general, employing forty workmen. Their products are sold in every State of the Union, and in many foreign countries. The president of this company is George T. Johnson; D. A. Newton is secretary and treasurer, S. H. Bellows is superintendent, and these form, with A. Bangs and W. H. Parmenter, the Board of Directors.

*The Miller's River Manufacturing Company*, incorporated in 1863, had at first a capital of \$40,000, but this has since been reduced to \$30,000. On two occasions this company has suffered much by the destruction of their property by fire. They employ seventy workmen, and manufacture satinets and blankets. Before the death of Mr. C. C. Bassett, he and Mr. George T. Johnson were understood to have a controlling influence in this company.

*George Gerry & Son* are manufacturers of wool, waste-dusters, mill gleanings, &c., employing five workmen. Mr. Gerry has been in business about forty years.

*Lewis Sanders* manufactures kegs, half barrels, &c., employing about forty men. This business was established in 1882.

*George S. Brewer* commenced business as a wood-turner in 1870, employing three workmen. He leased his shop to Dennis Goddard in 1887. Mr. Brewer was the contractor for laying the foundations and building the dam for the New Co-operative Company's shoe shop in the Upper Village.

*Lewis Cheney* is a prosperous manufacturer of carriages in Athol Centre.

*E. E. Partridge* manufactures warps, satinets and woolen-goods at his mill in Partridgeville. He is understood to be the owner of the mill, and employs about fourteen persons.

*Cutler & West* employ thirteen men in their steam box-mill at South Athol. This mill was built by Foster & Chamberlain, about 1852.

Another mill at South Athol, which is much older, is occupied by *H. H. Rice & Co.*, who also manufacture boxes.

*The Athol Carriage Works* were started in 1876. L. C. Sawin is the proprietor. He employs but little help, and makes no estimate of the amount of his business.

*J. W. Goodman* came from Dana to Athol in 1880,

and established the manufacture of billiard-tables, employing from twenty to twenty-five men. He does cabinet-work also.

*Edwin Ellis* (who died in July, 1888) commenced the manufacture of doors, sashes and blinds in 1847. More recently the business has been conducted by

*E. Ellis & Son*, and the manufacture is confined to sashes and blinds. Fifty men are employed in this establishment, and the value of the annual product is sixty thousand dollars.

*L. Morse & Sons* (an old establishment dating from 1850) manufacture cribs, cradles, towel-racks, tables and washstands. Their factory was built in 1869. The "Morse Patent Folding Settees," which are vastly superior to everything else of the kind in the market, and are found in a multitude of halls and vestrys, come from this establishment, in which sixty men are employed. The value of the annual product is seventy-five thousand dollars.

*Dennis Goddard* commenced the manufacture of shoe-boxes in 1887, and employs four persons. His sales amount to two thousand dollars annually.

*Stratton Brothers & Co.* established themselves in the manufacture of house-finish, packing-boxes, etc., in 1886. They employ seven men, and their annual product amounts to fifteen thousand dollars.

*C. Warren Cheney* has a job machine-shop, commencing his business in 1870. He is the inventor of the Climax Lawn Mower, and sold his right in this machine to a New York company in 1888.

*E. S. Handy* engaged in the manufacture of satinet in 1879.

In 1880 *W. H. Kauffman* went into business with Mr. Handy, and in 1885 became sole proprietor. Mr. Kauffman employs fifteen persons manufacturing woollens and satinet. His mill produces annually one hundred and fifty cases of goods, each case containing nine hundred or one thousand yards.

*H. S. Goddard and Robert Manning* began making piano cases July, 1888, in a mill built by the citizens of Athol for their use. The firm-name is Goddard & Manning. They are employing twenty-one men, and will engage more as soon as may be. Their production amounts to about one hundred cases per month.

The firm of *Palmer & Bates* began business in Athol in 1871, but failed in 1879. In that year *Bates Brothers* began business, and now employ from seventy to seventy-five persons, in the manufacture of wallets and pocket-books of all kinds.

*Co-operative Furniture Company* was established in 1879. In 1883 their mill was burned, since which time the business has been carried on in the mill of Monroe Cheney. They make pine furniture, and employ six men.

*F. W. Breed*, of Lynn, manufactures ladies' shoes in Athol Centre, under the firm-name of *Athol Shoe Co.*, and employ about two hundred and seventy-five persons. The brick factory which Mr. Breed occu-

pies, which stands near the Evangelical Church edifice, was erected in 1887 by a co-operative company, at a cost of about twenty thousand dollars, and was first occupied November 26, 1887. This establishment manufactures goods of two hundred thousand dollars' value annually.

*A. F. Tyler* manufactures sashes, blinds, window screens, screen doors, etc., and does a large business. He commenced in 1876, and now employs forty men. His factory comprises a three-story thirty-two by one hundred and twenty-five feet mill, a three-story thirty-five by seventy-five feet frame structure, used as a warehouse, and a lumber shed one hundred by two hundred feet. Mr. Tyler has an eighty horsepower steam-engine in service.

*Grist-Mills*.—*H. F. Boutelle*, Athol Centre; *A. W. Moulton*, Athol.

*M. L. Lee & Co.* manufacture men's, youths' and boys' kip boots, brogans and plow shoes, and employ from sixty to eighty persons. This company was established in 1861. About one hundred cases, consisting of twelve hundred pairs of boots and three hundred pairs of shoes, are produced weekly. This firm has an office and salesroom at No. 117 Pearl Street, Boston, through which the greater part of their trade is effected.

The firm is composed of *M. L. Lee*, *J. H. Lee* and *E. L. Sanborn*.

*O. E. Tebo* has a two-sett woolen-mill at Pinedale. He runs thirty looms and employs thirty-five workmen. Satinets are produced at this mill in large quantities. Pinedale was formerly called Wheelerville, and upon the site of Mr. Tebo's mill was a large establishment for the manufacture of woodenware.

In 1888 a soap-stone factory was established. The stone is obtained and drawn from Tully Mountain and made up in such forms as the necessities and tastes of the community may demand.

*Hapgood & Smith* have succeeded to the business of the late *Lyman W. Hapgood*, and manufacture large quantities of matches.

*Oakes' Peg Shop* (Templeton Road).—This was built by Abraham and Ira Oakes about 1825 and they manufactured shoe-pegs in it for about thirty years. The machinery was then removed by its purchaser, a Mr. Wilder, to the Lower Village, where it was soon consumed by fire. The mill fell to the ground in 1875.

*Kennebunk Mill*.—This was erected about forty years ago by Job Frye, and by him, Isaac Stevens and Jonathan Wheeler used as a saw-mill for about ten years, when *W. H. Amsden* purchased it and converted it into a door factory. Mr. Amsden's property was small, it is understood, when he established this business, but when he died, about two years ago, his estate was appraised at more than sixty thousand dollars. *W. H. Amsden's* sons now conduct the business.

A. M. Farnham

*Moses Hill*

W. H. Amsden established the manufacture of doors and sashes in 1847, and retired in favor of O. F. Amsden in 1879, but a year later became a partner of the latter. The business was then continued for six years, or until the death of the senior partner, under the firm-name of W. H. Amsden's Sons. William H. Amsden was admitted to the firm in 1887. The number of men employed is twenty-five and one million feet of lumber are consumed annually. The business of this firm extends from Massachusetts to Florida.

O. Kendall & Co.'s business was established by the late Ozi Kendall in 1847. His son, George N. Kendall, became a partner in 1856, and the firm-name became O. Kendall & Son. In 1870 Ira Y. Kendall and George S. Pond were admitted as partners, the firm-name then becoming Ozi Kendall & Co. In 1874 George N. Kendall sold out to his partners and ten years later the other partners bought out Ozi Kendall. In 1887 this firm retired from business, selling their shop to Henry Cook.

For many years the "Ozi Kendall Boots" brought the highest prices all over New England and beyond. During the Rebellion many of the soldiers from Athol and the neighboring towns were supplied with them, and after a year's marches amid the sands and swamps of Louisiana returned with them upon their feet in substantially good condition.

*Richardson's Machine-Shop.*—This was built in 1824 by Josiah Willard and James Young, and used by them as a carpenter's shop. Mr. Willard sold, at length, to Stillman Knowlton and Mr. Young to Nathaniel Richardson. In 1855 Mr. Richardson became the sole owner, and remained such till his death, though for a few years before that event his son, Charles Frederick Richardson, had the principal charge of the business to which he has now succeeded, employing about fifteen men.

Among others, Judge Charles Field, Dr. J. P. Lynde and the publishers of the *Chronicle and Transcript* have aided greatly in the preparation of this historical sketch, while Messrs. Warren H. Kendall and William G. Lord, young gentlemen of decided historic tastes, have been indefatigable in collecting material for this work.

#### BIOGRAPHICAL.

##### ADDISON M. SAWYER.

Addison M. Sawyer, of Athol, is widely known as an inventor and as a prominent pioneer in many fields of study and investigation. He is a son of John and Lucy (Balcom) Sawyer, and was born in Templeton, August 14, 1827. The family, through many generations, has been distinguished for mechanical skill and for aptness in the use of tools and the application of machinery. The father of the subject of this sketch

was a farmer and a mechanic, and while the sons attended the stated terms of the public schools of their native town, they were early familiar with labor, and were trained in habits of industry. An elder brother, Sylvanus Sawyer, whose inventions had laid the foundations of an important industry, in company with another brother, Joseph B. Sawyer, began the manufacture of cane at East Templeton, in 1851. The American Rattan Company was organized the following year, and the enterprise was removed to Fitchburg. From the beginning the subject of this sketch was employed by the company. He was familiar with the machinery in use, and early directed his attention to substantial improvements. By the early process of working and preparing cane, the straw was successfully removed from the outer surface, but the pith, which has proved to be of equal value, was wasted. Many experiments were made to utilize the pith, but the problem was first solved by the invention of Mr. Sawyer. The tubular spurred cutter was patented in 1854, and by it the business was revolutionized. To the present time the invention has suffered no material amendment, and still continues to defy every and all innovations.

The man whose sturdy toil has removed a forest or has adorned a portion of the earth's surface has not lived in vain, yet often a comparative simple invention represents the possible labor of many life-times.

The tubular spurred cutter, for a third of a century, has performed the work of many men. It has utilized and given value to material formerly worthless, but which since has commanded many thousands of dollars, and in the use of this material important industries have been established.

From his boyhood Mr. Sawyer has been an expert with the gun and the rifle. In this familiarity with fire-arms is found an incentive and suggestions which led to several important inventions, among which was a combination shell, known in the late war as the "Sawyer Gun," also an improved combination fuse, and other ordnance materials upon which letters-patent were granted.

These inventions were successfully tested by officers of the government, and received a merited commendation. The most conspicuous of these was the patent on canister shot or, more generally speaking, on the case for holding canister-shot. This patent was tested by the government and proved of such value that the sum of twenty-five thousand dollars was awarded the inventor. The Sawyer Canister Shot has become a necessity in the ordnance stores of the government.

While some of these patents were pending, Mr. Sawyer patented a machine for grinding and moulding peat, and capable of making brick. While his attention has been directed to other studies, he has permitted this invention to remain unemployed. Yet in his opinion it is an invention of great promise and capacity. Another invention of equal merit was in a combination of rubber and emery, and the manner of

constructing an emery wheel for grinding and polishing metals. This was patented, and the machines triumphed in the most exacting tests. Another patent secured by Mr. Sawyer was upon a screw-propeller, driven by direct steam, and consequently requiring no engine or machinery.

His more recent studies have been in the realm of science, and include important discoveries in electricity and in chemistry. He has invented a process, which has been patented, of refining and giving ripeness and the qualities of age to distilled spirits. This patent, with its immediate and pronounced results, has attracted the attention of scientific men. Later experiments and discoveries of a kindred nature now occupy his active mind, and with unfailing courage and confidence he anticipates fortuitous results.

The career of Mr. Sawyer was prefaced by the invention of the tubular spurred cutter, which, from a mechanical standpoint, is a notable achievement in the abridgment of labor, yet of greater value in its instant command of a new material that supports one of the thriving industries of our country. A review of his successive achievements, however, leads to the conclusion that the bent of his mind and the burden of his study have not been mainly directed to ingenious mechanical contrivances, but rather to a broader field that unites discovery with invention. His later inventions have combined discoveries in science with an intimate knowledge of mechanics, and his more recent triumphs have been the result of intelligent study and investigation, rather than the accidental fortune of instant invention.

In person Mr. Sawyer is a man of fair proportions and of commanding presence. His features are refined and regular, and are lighted with a dark, clear eye of unusual brilliancy, which flashes with every transition of thought, and gives expression to an unfailing measure of kindness and sympathy. In manner he is affable, courteous and kind, and in conversation he is fluent and intelligent. His opinions are accurately and clearly expressed, yet in a manner both deliberate and thoughtful. His sympathies are warm, his impulses are generous and his friendship is enduring. His habit of thought and study is unabated, and he still grapples new subjects with the enthusiasm of youth and the strength of disciplined faculties. His qualities are versatile, yet savored with the practical, and his resources are ever at his command.

Mr. Sawyer has resided in Athol since early manhood, and has enjoyed the confidence and respect of his townsmen. In his home-life he is happy and familiar with the comforts and conveniences controlled by ample means. A few years since he purchased a commanding site and ample grounds and erected a costly and commodious mansion. Living in quiet contentment, he is a hospitable host, and enjoys the society of his friends.

Mr. Sawyer was married, October 23, 1854, to Harriet Elizabeth Blackmer, a daughter of Hosea Black-

mer, of Dana. She died July 23, 1876. He married (second) August 8, 1877, Mary E. Stevens, a daughter of Darwin H. and Harriet (Andrews) Stevens, of Guilford, Vt., and more recently of Davenport, Iowa.

#### MOSES HILL.

Moses Hill, son of Asa Hill and Anna (Ballard) Hill, was born in Athol, August 15, 1822. His parents were also natives of Athol. His father was born August 13, 1785, and his mother June 20, 1795. She was the daughter of Joshua and Anna (Raymond) Ballard. She died November 11, 1863. Asa Hill died June 11, 1876.

Moses Hill, grandfather of the subject of this sketch, was born in Worcester, Mass., June 15, 1741, and in 1766 married Lucy Garfield. His parents were John Hill and Mary (Haven) Hill.

Moses Hill, Sr., in 1766, bought two hundred and forty-five acres of wild land in the northerly part of Athol, now known as Chestnut Hill, the original deed of which is in the possession of Moses Hill. This deed is dated June 21, 1765. Moses Hill, Sr., died November 15, 1820, and his wife November 16, 1826. Her father lost his life in a raid of French and Indians in Hinsdale, N. H., in 1755. John Hill died June 25, 1789, and his wife September 9, 1794.

Mr. Hill is a progressive farmer and one of Athol's estimable citizens. He has two children, Mary E. and Lucy A. Hill Lawton.

### CHAPTER CXXXVIII.

#### WINCHENDON.

BY WILLIAM T. DAVIS.

In the northern part of Worcester County, bordering on the New Hampshire line, lies a territory containing about thirty-six square miles, bounded on the north by Fitzwilliam and Rindge in New Hampshire, on the east by Ashburnham, on the south by Gardner and Templeton, and on the west by Royalston. It is, for the most part, about one thousand feet above the sea, abounding in hills rising from three to four hundred feet above that level and traversed by Miller's River, which, in its winding course, runs about fourteen miles within its limits. This is the town of Winchendon, probably deriving its name from some association which Governor Bernard, under whose administration the town was incorporated, had with the town of Winchington in England.

Little was known of this territory before 1735. It was the home of the Indian and the deer, and probably none beside the hunter or scout had wandered from the garrisoned settlements of the whites into its dark valleys and forest-covered plains. It was within

the jurisdiction of the province of Massachusetts Bay, and the government of the province assumed the right regardless of any Indian title or claim to grant it to any of its people. Among those to whom grants were made were the heirs of soldiers in King Philip's War, and in the expedition against Canada under Sir William Pepperell in 1690. Thus six townships were granted to the former, among which were Westminster, called Narragansett No. 2, and Templeton, called Narragansett No. 6. Among those granted to the latter were Ashburnham, granted to heirs of Dorchester soldiers, and called Dorchester Canada, and Winchendon, granted to heirs of Ipswich soldiers, and called Ipswich Canada.

The grant of Ipswich Canada, or what is now Winchendon with the addition of territory since taken from it and the subtraction of territory since added to it, was made by the House of Representatives June 10, 1735, concurred in by the Council June 18th and consented to by Governor Belcher December 29th in that year. Its text is as follows:

At a Great and General Court in and for His Majesty's Province of the Massachusetts Bay in New England, begun and held in Boston on Wednesday, the twenty-eighth day of May, 1735, and continued by several adjournments to Wednesday, the nineteenth of November following.

In the House of Representatives June 10, 1735, in answer to the petition of Lient Abraham Tilton and others, *voted*, That a tract of land of the contents of six miles square be laid out in a suitable place in the western part of this Province, and that the whole of the Town be laid out into sixty-three shares, one of which to be for the first settled minister, one for the use of the ministry and one for the school; and that on the other sixty shares there be sixty admitted; and in the admission thereof, preference to be given to the Petitioners, and such as are the descendants of the officers and soldiers who served in the expedition to Canada in the year 1690, viz.: a Tract of Land for a Township to the said Abraham Tilton and others. And inasmuch as the officers and soldiers (who served in that expedition) were very great sufferers and underwent uncommon hardships; *voted*, that this Province be at the whole charge of laying said Township in a regular manner and of admitting the settlers; that the settlers or Grantees hereby are obliged to bring forward the settlement of said Township in as regular and defensible a manner as the situation and circumstances of the place will admit of, and that in the following manner, viz.: That they be on the granted premises and have each of them a house of eighteen feet square and seven feet stud at the least; that each Right or Grant have six acres of land brought to, ploughed or brought to English grass and fitted for mowing; that they settle in the plantation or township a learned and orthodox minister and build a convenient meeting-house for the public worship of God in the township; the whole of these conditions to be duly complied with within five years from the confirmation of the Plot. And that Capt. John Holson and Capt. John Choate, with such as the Honorable Board shall appoint, be a Committee for laying out the Township hereby granted to Abraham Tilton and others, and admitting the settlers as aforesaid, who shall take bond of each grantee to the value of twenty pounds to the Province Treasurer for the respective grantees' fulfilment of the conditions of their grant; each lot as aforesaid to be entitled to and draw future divisions in equal proportions in the township or plantation; and that the Committee return the Plot of the said township to the Court within twelve months for confirmation, as also the list of the names of the grantees and their place of residence into the Secretary's office, that so the same may be examined and regulated by a Committee that may be hereafter appointed by this Court. And further, it is hereby ordered that in case any of the grantees shall neglect or delay to fulfil the terms of the grant, such person or persons shall forfeit to the Province all his or their right and interest in the land hereby granted.

Sent up for concurrence,

J. QUINCY, *Speaker*.

In Council June 18, 1735.

Read and Concurred and ordered that Thomas Berry, Esq., be joined to the Committee for laying out the Township.

J. WILLARD, *Secretary*.

Dec. 29 Consented to,  
A true Copy examined,  
A true Copy Attest,

J. BELCHER.

THADS. MASON, *Dept. Sec'y*.

THOS. NORTON, JUN., *Pro. Clerk*.

In accordance with the above grant Thomas Berry, John Holson and John Choate, the committee designated by the court, on the 13th of April, 1736, allowed the claims of sixty persons, of whom fifty-two were of Ipswich, to be grantees and proprietors. In the following June they laid out the township as required by the grant, but so far as the writer knows, no record exists of the date of confirmation from which the five years' period of forfeiture were to begin to run. On the 31st of May, 1736, the proprietors chose Thomas Norton, of Ipswich, their clerk, and by him the records of the proprietors were kept. But notwithstanding the laying out of the township and the admission of grantees, no attempt at actual settlement was made for a number of years. On the 27th of October, 1737, the report of a committee chosen to lay out a division of lots of one hundred acres each was accepted, and five acres were reserved near the centre for a meeting-house, burial-place and training-field. In this division only a part of the town was divided, including seventy-one lots, and in subsequent divisions the remaining lots were disposed of. No serious movement towards a settlement was made until the close of the first French War, when a committee was sent up "to run the lines and renew the bounds and to see what condition the meeting-house and mill were in." From this it would appear that some steps had been taken in the early years of the grant to comply with its conditions, and that a building of some kind had been erected for a place of worship. On the 29th of January, 1752, the proprietors voted one hundred pounds, old tenor, to each one of the first ten men who should, by the 1st of the next November, build a house and settle a family. Ten families were consequently settled at once on the township, and from that time, notwithstanding the danger of Indian invasion during the second French War, became permanent residents. In 1753 a frame of a meeting-house was erected near the territorial centre, but was afterwards sold unfinished. The records contain the following memorandum of the settlement of families immediately after the offer of one hundred pounds bonus above referred to.

March 10, 1752. Thomas Brown sent his claim to be received for one of the first settlers—1.

Edward Eveleth enters his claim for two of the first settling families—2.

March 16, 1752. Ezekiel Jewett enters his claim for one of the first settlers—1.

March 31, 1752. The Hon. Thomas Berry put in his claim for two settling families—2.

April 4, 1752. Thomas Brown desires the privilege of being admitted for two more settling rights—2.

April 18, 1752. Col. Thomas Berry claims a privilege for one more of the first settling families—1.

April 23, 1752. Edward Eveleth desires the privilege for one more settling family—1.

From this time on new families continued to come into the township. Among the early settlers, besides those already named in the above list, were Richard Day, Gabriel Pouchey, William Holt, John Darling, William Moffat, Benjamin Goodridge, Thomas Jewett, Joshua Priest, David Wilder, Benjamin Boynton, Nathaniel Burnham, John Moffat and John Brown.

On the 24th of October, 1753, at the first meeting of the proprietors held in the township, it was voted to grant to Thomas Berry the frame of the meeting-house, on condition that he would provide a room in his house for religious worship. During the second French War there were constant alarms in the settlement, and, as a precaution against Indian attacks, the houses were fortified and made as secure against invasion as circumstances would permit.

On the 7th of June, 1755, a petition was sent to the Province Government, narrating the dangers threatening the settlers, and asking for relief and protection. This petition was signed by Gabriel Pushey, Richard Day, Thomas Jewett, Wm. Holt, John Moffat, David Wilder, John Brown, Nathaniel Blodget, Joshua Priest and William Moffat. Between 1755 and 1761 the following persons were added to the settlement: Thomas Brown, Jacob Gould, Charles Tuttle, Henry Hodgkins, William Hodgkins, Samuel Craig, Philip Goodridge, David Poor, Joseph Fuller, Samuel Reed, Samuel Darling, Silas Darling and Timothy Darling.

On the 22d of September, 1761, the proprietors voted to build a meeting-house. Many of the material features of the town had been attended to, roads had been opened, bridges built, a mill erected, and it was now proposed to furnish better means of satisfying the spiritual wants of the people. The house was to be forty-five feet long, thirty-five feet wide and twenty-two or twenty-three feet in length of posts, and a committee, consisting of Benjamin Goodridge, Abijah Smith and Philip Goodridge, was chosen to "let out" the house, and were directed to have it completed before the last day of September, 1762. In accordance with this vote the house was built, and on the 15th of December, 1762, a church was organized, and Rev. Daniel Stimpson ordained with a settlement of sixty pounds and a salary of the same amount. On the declaration of peace, in 1763, or soon after, it is probable that about thirty settlers, with their families, were living on the plantation. These thirty are included in the following list, which includes also some who had removed and some who owned lots, but had never effected a settlement:

Thomas Berry.  
Benoni Boynton.  
Nathaniel Blodget.  
Thomas Brown.  
Nathaniel Burnham.

Thomas Jewett.  
William Moffat.  
Thomas Manning.  
John Moffat.  
Theophilus Mansfield.

John Brown.	Seth Oaks.
William Brown.	William Oaks.
Ephraim Boynton.	Bartholomew Pearson.
Daniel Bixby.	Joshua Priest.
Nathaniel Bixby.	Gabriel Pouchey.
Samuel Craig.	Nathan Pouchey.
Stephen Choate.	David Poor.
Richard Day.	Samuel Reed.
John Darling.	Amos Sping.
John Dunsmore.	Abijah Smith.
Timothy Darling.	Ebenezer Sherwin.
Joseph Fuller.	Rev. Daniel Stimpson.
Jonathan Foster.	Jonathan Stimpson.
Benjamin Goodridge.	Ephraim Stimpson.
Jacob Gould.	Jeremiah Stewart.
John Gibson.	Thomas Sweetland.
Francis Goodhue.	Abraham Tilton.
Daniel Goodridge.	Charles Tuttle.
David Goodridge.	Joseph Tuttle.
William Holt.	Samuel Titus.
Henry Hodgkins.	Thomas Wilder.
Abiathar Houghton.	David Wilder.
William Hodgkins.	Barzillai Willard.
Samuel Hart.	Abel Wilder.
Rev. Mr. Harvey.	Reuben Wyman.

Silas Whitney.

At a meeting of the proprietors, held on the 22d of June, 1763, it was voted that the proprietors join with the inhabitants in a petition to the General Court that Ipswich Canada may be incorporated into a town, and that Benjamin Goodridge and Daniel Bixby be a committee to draft a petition for that purpose. The petition of the inhabitants had been presented in May, and the name of Epesberry was selected and asked for by them in honor of two distinguished residents of Ipswich—Simonds Epes and Thomas Berry. In compliance with the petitions the following act was passed June 14, 1764:

An act for erecting the plantation called Ipswich Canada into a town by the name of Winchendon.

Whereas the inhabitants of the plantation called Ipswich Canada, in the county of Worcester, labor under many difficulties and inconveniences by means of their not being a town, therefore

Be it enacted by the Governor, Council and House of Representatives:

Sec. 1. That the plantation commonly called and known by the name of Ipswich Canada, in the County of Worcester, bounded as follows; South twelve degrees: West seven miles and two hundred rods on Dorchester Canada; West eighteen degrees South two hundred and seventy rods on Westminster; North thirty-six degrees West four miles and two hundred and twenty rods on Templeton line; North seventy-eight degrees West six hundred rods on Templeton line; North twelve degrees East four miles and two hundred and sixty rods on Royalshire; South seventy-eight degrees West six miles on Royalshire line, be and hereby is erected into a town by the name of Winchendon; and that the inhabitants thereof be and hereby are invested with all the powers, privileges and immunities which the inhabitants of the towns within this province do or may enjoy.

And be it further enacted:

Sec. 2. That there be laid on the lots already laid out in the said town of Winchendon a tax of one penny per acre for the term of three years.

And be it further enacted:

Sec. 3. That Edward Hartwell be and hereby is impowered to issue his warrant directed to some principal inhabitant in said town, requiring him to warn the inhabitants of the said town, qualified to vote in town affairs, to meet at such time and place as shall be therein set forth, to choose all such officers as are or shall be required to manage the affairs of the said town.

In accordance with the act, Edward Hartwell, of

## Lunenburg, a justice of the peace, issued the following warrant:

Worcester SS.

To Mr. Richard Day, of the Town of Winchendon in the County of Worcester, yeoman, Greeting:

Whereas I am ordered and impowered by the Great and General Court to issue my warrant directed to some principal inhabitant of said Town, requiring him to warn the inhabitants of said Town, qualified to vote in Town affairs, to assemble in some suitable place in said Town to choose all necessary officers to manage the affairs of said Town, and also to assess and levy, and collect the land tax. These are therefore, in his majesty's name, to require you, the said Richard Day, forthwith to warn the inhabitants of said Town of Winchendon, qualified, as aforesaid, to assemble and meet at your dwelling-house, in said Town, on Monday, the fifth day of November next, at one of the clock in the afternoon, then and there being assembled, to act on the several articles hereafter mentioned, viz.:

- 1st. To choose a moderator for the government of said meeting.
- 2d. To choose Selectmen and all other Town officers for the present year, as the law directs.
- 3d. To choose a collector to gather the land-tax and make due return of this Warrant and your doings therein. Hereof fail not. Given under my hand and seal, at Lunenburg, this sixteenth day of October, in the fourth year of his Majesty's Reign, A.D. 1764.

EDWARD HARTWELL, *Justice of the Peace.*

In obedience to the within-written Warrant, I have warned all the freeholders and other inhabitants of the town of Winchendon to appear at the time and place within mentioned.

RICHARD DAY.

Winchendon, November ye fifth, 1764.

The meeting was held in accordance with the warrant, and Richard Day was chosen moderator. The officers chosen for the year were Abel Wilder, town clerk; Theos. Mansfield, Benoni Boynton and Ephraim Boynton, selectmen; Richard Day, constable; Nathaniel Bixby, town treasurer; Daniel Goodridge, collector of the land tax; Silas Whitney and Reuben Wyman, church wardens; John Darling, tithingman; Daniel Bixby, deer-reeve; Aaron Hodgkins, fence-viewer; William Oaks, Timothy Darling, Amos Spring and Abel Wilder, surveyors of highways; Jonathan Foster, sealer of weights and measures, Silas Whitney, surveyor of boards and shingles; Reuben Wyman, field-driver; Nathaniel Bixby, sealer of leather; Stephen Choate, stave-culler; and Nathaniel Burnham, fire-ward.

As the officers chosen at the first meeting of the town are here given, it may be as well at this point in the narrative to present a list of those who, up to the present year, have occupied the various positions of moderator, selectmen, town clerk and treasurer. The moderators have been, since 1764:

1765. Theos. Mansfield.	1786. Moses Hale.
1766. Ephraim Boynton.	1787. Samuel Prentice.
1767-70. Theos. Mansfield.	1788-92. Samuel Crosby.
1771. Richard Day.	1793. Samuel Prentice.
1772. John Cheney.	1794. Moses Hale.
1773. Richard Day.	1795. Amos Heywood.
1774. Seth Oaks.	1796-1806. Desire Tolman.
1775-76. Moses Hale.	1807. Jacob B. Woodbury.
1777. Thomas Kimball.	1808. Desire Tolman.
1778. Moses Hale.	1809. Paul Raymond.
1779. Benjamin Brown.	1810. Amos Heywood.
1780. Dr. Israel Whiton.	1811. Paul Raymond.
1781. Ebenezer Sherwin.	1812. Ephraim Murdock.
1782. Samuel Crosby.	1813-16. Isaac Morse.
1783-84. Moses Hale.	1817-18. Horatio G. Newcomb.
1785. Abel Wilder.	1819. Isaac Whitcomb.

1820. H. G. Newcomb.	1842-45. E. Murdock, Jr.
1821-28. Isaac Morse.	1846. Calvin R. Whitman.
1829. Jacob Wales.	1847. E. Murdock, Jr.
1830. Foxwell N. Thomas.	1848-49. Milton S. Morse.
1831. Jacob Wales.	1850-53. E. Murdock, Jr.
1832. Elisha Gregory.	1854-55. John Cutter.
1833. Mark Whitcomb.	1856. Gilman B. Parker.
1834. Reuben Harris.	1857. E. Murdock, Jr.
1835-36. John Cutter.	1858-82. Giles H. Whitney.
1837-39. Ephraim Murdock, Jr.	1883-88. Charles J. Rice.
1840-41. John Cutter.	

## The town clerks since 1764 have been:

1765. Abel Wilder.	1798. Moses Hale.
1767. Theps. Mansfield.	1799-1800. Samuel Crosby.
1768-82. Abel Wilder.	1801-06. Amos Heywood.
1783-86. Benjamin Brown.	1807-28. Samuel Prentiss.
1787-91. Amos Heywood.	1829. Isaac Morse.
1792. Samuel Crosby.	1830-31. Joshua Smith.
1793. Amos Heywood.	1832-72. Webster Whitney. <sup>1</sup>
1794-95. Moses Hale.	1876-88. George M. Whitney.
1796-97. Amos Heywood.	

## The treasurers since 1764 have been:

1765-72. Richard Day.	1810-16. Benjamin Adams.
1773-76. Moses Hale.	1817-28. Amasa Whitney.
1777-80. Abel Wilder.	1829-33. Benjamin Adams.
1781-82. Benjamin Brown.	1834-36. Webster Whitney.
1783. Moses Hale.	1837-38. Isaac Morse.
1784-87. Amos Merriam.	1839-44. E. Murdock, Jr.
1788-92. Moses Hale.	1845-48. C. R. Whitman.
1793. John Burr.	1849-50. Benjamin R. Day.
1794. Samuel Prentiss.	1851-60. E. W. Webster.
1795-97. Levi Moor.	1861. Wm. Brown (2d).
1798-1800. Amos Heywood.	1862-64. John H. Fairbank.
1801. Levi Moor.	1865-83. Anson B. Smith.
1802-03. Samuel Prentiss.	1884-86. Waldo C. Corey.
1804-06. Paul Raymond.	1887. Frank F. Hapgood.
1807-09. Thomas Gratton.	1888. Alfred H. Whitney.

## The selectmen since 1764 have been as follows:

1765. Theos. Mansfield.	1775. Abel Wilder.
Nathan Bixby.	Levi Nichols.
Benoni Boynton.	John Boynton.
1766. Theos. Mansfield.	David Poor.
Richard Day.	Gideon Fisher.
Abel Wilder.	1776. Abel Wilder.
1767. Theos. Mansfield.	Wm. Whitney.
Joseph Boynton.	Joseph Boynton.
Silas Whitney.	Eli Smith.
1768. Abel Wilder.	James Murdock.
Seth Oaks.	1777. Abel Wilder.
Jonathan Stimpson.	John Boynton.
1769. Same.	Wm. Whitney.
1770. Abel Wilder.	Eli Smith.
Seth Oaks.	Amos Merriam.
John Boynton.	1778. Moses Hale.
1771. Richard Day.	Miles Putnam.
John Cheney.	Daniel Goodridge.
Thomas Sawyer.	Joseph Bacon.
1772. Abel Wilder.	Abner Curtiss.
John Boynton.	1779. Amos Merriam.
Dudley Perley.	Ebenezer Sherwin.
1773. Richard Day.	Solomon Bigelow.
Amos Merriam.	Seth Oaks.
John Homer.	Samuel Noyes.
1774. Abel Wilder.	Abel Wilder.
Levi Nichols.	Samuel Prentiss.
Abner Hale.	Benjamin Brown.
Wm. Whitney.	Samuel Stone.
Eli Smith.	Francis Bridge.

<sup>1</sup> Mr. Whitney died after election in 1872, and David H. Barnes was chosen to fill the vacancy, and was rechosen in 1873 and '74, and died in the middle of his term. Frank B. Spalter was appointed in 1874 by the selectmen, and chosen in 1875.

1781. Amos Merriam. Joshua Gale. Bill Hancock. Paul Boynton. John Day.	1799. Samuel Crosby. Ezra Hyde. Desire Tolman. Thomas Gratton. Benjamin Hubbard.	Asa Hale. Israel Whitcomb. Samuel Noyes. David Beaman.	Levi Raymond. Ephraim W. Weston.
1782. Amos Merriam. Samuel Crosby. Amos Heywood. Edward Withington	1800. Samuel Crosby. Thomas Gratton. Paul Raymond, Jr. Jacob B. Woodbury. Benjamin Adams.	1817. Same.	1843. E. W. Weston. John Cutter. Moses Hancock.
1783. Amos Merriam. Samuel Crosby. Benjamin Brown. David Foster. Daniel Hubbard.	1801. Amos Heywood. Paul Raymond, Jr. Samuel Prentice, Jr. Ephraim Murdock. Isaac Noyes.	1818. Israel Whitcomb. Asa Perley. Gideon Balcom. Levi Brooks. Moses Hale.	1846. Webster Whitney. Henry Greenwood. Ephraim Murdock, Jr.
1784. Benjamin Brown. Samuel Prentiss. Samuel Litch. James Steel. James Coolidge.	1802. Amos Heywood. Paul Raymond, Jr. Samuel Prentice, Jr. Benjamin Hubbard. Abel Jones.	1819. Israel Whitcomb. Gideon Balcom. Daniel Henshaw.	1847. Elisha Beaman. Harvey Wyman. Levi Raymond.

The following persons have represented in the General Court since 1776 either the town or the representative district of which Winchendon has formed a part :

1776-77. Robert Bradish.	1834. Wm. Brown.
1778-79. None.	Isaac Morse.
1780-85. Abel Wilder.	1835. Jacob Wales.
1786-99 (when the town was incorporated), Moses Hale.	C. R. Whitman.
1800. Samuel Prentiss.	1836. Jacob Wales.
1801. None.	Wm. Brown.
1802. None.	1837. Israel Whitcomb.
1803. Wm. Whitney.	1838. Elisha Murdock.
1804. None.	1839. Wm. Brown.
1805-08. Wm. Whitney.	1840. Elisha Murdock.
1809-11. Israel Whiton.	1841. Elisha Beaman.
1812-16. Samuel Prentiss.	1842. Henry Greenwood.
1817. Daniel Henshaw.	1843. Wareham Rand.
1818-19. None.	1844. None.
1820. H. G. Newcomb.	1845. Wareham Rand.
1821-22. None.	1846. None.
1823. Isaac Morse.	1847. None.
1824. Samuel Simonds.	1848. Elisha Murdock.
1825. Isaac Morse.	1849. Moses Hancock.
1826. None.	1850. Alvah Godding.
1827. Reuben Hyde.	1851. Elisha Murdock.
1828-29. None.	1852-53. None.
1830-32. Wm. Brown.	1854. John L. Reed.
1833. Wm. Dunbar.	1855. Maynard Partridge.
	1856-57. Jacob B. Harris.

The twenty-first article of amendment to the Constitution was adopted by the Legislatures of 1856 and 1857, and ratified by the people May 1, 1857, providing for Representative Districts based on a census taken in that year, and under the new arrangement Ashburnham and Winchendon constituted the First Representative District of Worcester County. This district was represented until the next apportionment by the following persons :

Jacob B. Harris, of Winchendon.....	1858
J. D. Crosby, of Ashburnham.....	1859
Wm. Murdock, of Winchendon.....	1860
Albert H. Andrews, of Ashburnham.....	1861
Nelson D. White, of Winchendon.....	1862
Thomas Bontelle, of Ashburnham.....	1863
Giles H. Whitney, of Winchendon.....	1864
George C. Winchester, of Ashburnham.....	1865
Giles H. Whitney, of Winchendon.....	1866

Under the apportionment based on the census of 1865 the same towns constituted the same Representative district and were represented until the next apportionment as follows :

George E. Fisher, of Ashburnham.....	1867
Windsor N. White, of Winchendon.....	1868
George H. Barrett, of Ashburnham.....	1869

Wm. L. Woodcock, of Winchendon.....	1870
Orlando Mason, of Winchendon.....	1871
Albert G. Sinclair, of Winchendon.....	1872
Austin Whitney, of Ashburnham.....	1873
Charles A. Loud, of Winchendon.....	1874
Wilbur F. Whitney, of Ashburnham.....	1875
Charles A. Loud, of Winchendon.....	1876

Under the apportionment based on the census of 1875 Ashburnham, Gardner, Princeton, Westminster and Winchendon constituted the Seventh Representative District of Worcester County and were represented until the next apportionment as follows :

Wilder P. Clark, of Winchendon.....	1877
Simeon Merritt, of Ashburnham.....	1877
Charles Webster Bush, of Gardner.....	1878
Artemas Merriam, of Westminster.....	1878
Wm. H. Brown, of Princeton.....	1879
Wilder P. Clark, of Winchendon.....	1879
George W. Eddy, of Ashburnham.....	1880
Edwin J. Cushing, of Gardner.....	1880
Giles H. Whitney, of Winchendon.....	1881
J. Henry Mellen, of Westminster.....	1881
John D. Edgell, of Gardner.....	1882
John B. Fay, of Princeton.....	1882
Walter O. Parker, of Ashburnham.....	1883
Wilder P. Clark, of Winchendon.....	1883
Roderic L. Bent, of Gardner.....	1884
Edwin L. Burnham, of Westminster.....	1884
Roderic L. Bent, of Gardner.....	1885
Charles J. Rice, of Winchendon.....	1885
Herbert S. Stratton, of Gardner.....	1886
Charles J. Rice, of Winchendon.....	1886

Under the apportionment based on the census of 1885 Ashburnham, Gardner, Templeton and Winchendon constitute the Second Representative District of Worcester County, and have been represented as follows :

Edward P. Noyes, of Gardner.....	1887
John H. Wilkins, of Ashburnham.....	1887
Charles W. Conant, of Gardner.....	1888
Nathaniel R. Perkins, of Winchendon.....	1888
John H. Wilkins, of Ashburnham.....	1889
Percival Blodgett, of Templeton.....	1889

But the new town, entering with promise as it did on its municipal career, was destined to receive in its earliest life a serious check to its development and growth. After a settlement, long delayed by the annoyances of the French and Indian Wars, an act of incorporation had been secured, after the peace of 1763, which seemed to relieve its people from all doubts as to their future comfort and prosperity. The relations of the colonies with Great Britain becoming daily more critical, as the breach was daily widened by the obstinacy of the crown on the one hand and the determination of the colonists on the other to resist aggression, soon passed into that state in which an open rupture became inevitable. In the patriotic efforts of the people of Boston to assert and maintain their rights the people of Winchendon enthusiastically joined, and though the prospects of war were specially gloomy to a town just entering on its life, they were ready to bear their full share of the sure burdens of a war of revolution.

In 1773, in response to a letter from the selectmen of Boston, a town-meeting was called "to see if the town will take into consideration the distressing cir-

cumstances of the present affairs of the province; and so far as concerns particular towns and individual persons to act thereon by choosing committees or otherwise as they shall see fit." At the meeting held on the 15th of February, in pursuance of the above call, Moses Hale was chosen moderator, and a committee of five, consisting of Moses Hale, Levi Nichols, John Boynton, John Homer and Dudley Perley, was appointed to draft such measures as they might consider proper and report to the town. At an adjourned meeting held on the 1st day of March, the committee reported the following resolves, which were unanimously adopted:

*Resolved*, that having taken into serious consideration the state of the rights of the Colonies, and of the Province in particular, as men, as Christians and as subjects, and a list of infringements and violations of rights as specified and set forth by the Committee of the town of Boston, We are of opinion that the rights of this Province are well and truly stated in said list, as they are well supported and warranted by the laws of God, of nature, of the realm of Great Britain and the charter of this Province; that a list of infringements and violations of these rights and privileges inherent to the inhabitants of this Province are well stated, vindicated and supported by a great variety of uncontested facts, whereby it appears to us as aforesaid that the time is speedily hastening when we shall be reduced to the most abject slavery.

*Resolved*, that having consulted our charter, we find that by the aforesaid infringements and violations, our rights and liberties thereby derived are sapped to the very foundation.

*Resolved*, that it is of the utmost importance the Colonies in general and the inhabitants of this Province in particular, stand firm as one man to support and maintain all their just rights and privileges.

*Resolved*, that this town will at all times heartily join with our brethren of this Province and with every true friend to liberty, in all lawful measures which may be proper, salutary and effectual for the redress of our grievances and the establishment of our charter rights, privileges and liberties.

*Resolved*, that this town choose a Committee to correspond with the Boston Committee and the Committees of other towns to receive and communicate to the town all salutary measures that shall be proposed or offered by any other towns for removing the common grievances of this Province and to communicate the sentiments of this town to the correspondent committee of the other towns of this Province.

*Resolved*, that the united thanks of this town and of every true son of liberty and friend to the Constitution of the Province is due to the town of Boston for their early and indefatigable zeal in endeavoring to preserve the Constitutional rights and liberties of this Province.

The committee reporting the resolutions were at the same meeting chosen a Committee of Correspondence.

At a meeting of the town held August 4, 1774, Moses Hale was chosen a delegate to a county convention to consider the best method of resisting the acts of Parliament. At a meeting held on the 25th of August the following resolves were passed:

*Resolved*, that we acknowledge ourselves true and liege subjects to his majesty King George III., and that we will, to the utmost of our power, defend his crown and dignity.

*Resolved*, that the charter of this Province is the basis of allegiance to his Majesty, the sacred obligation he is under to protect us, his American subjects, and that all Acts of the British Parliament which tend to vacate our charter, without our consent, have a tendency to destroy our allegiance to the King, and also the obligation he is under to protect us, his most loyal subjects, which consequently reduces us to a state of nature.

*Resolved*, that the unconstitutional acts, lately passed in the British Parliament, wherein they claim a right to tax the Americans without their consent, and to alter our free Constitutions at their pleasure, has a direct tendency to break off the affections of his Majesty's true and loyal subjects in America from the King, and therefore most certainly

weaken the British nation, and will, if persisted in, unavoidably endanger, if not actually be a means of the destruction of, the King and the whole British realm.

*Resolved*, that we will, to the utmost of our power, oppose all such unconstitutional acts which, in our opinion, are directly against the dignity of the King and the Constitution of this Province, and are ready to risk our lives and fortunes in defense of our rightful sovereignty and to maintain our free Constitution in order to save ourselves and posterity from ruin and slavery, which seems like a torrent rushing in upon us.

*Resolved*, that we will do all that lies in our power to maintain peace and good order amongst us according to the laws of this Province, and that we will break off all dealings, as far as possible, with all officers who hold their commissions under unconstitutional laws.

*Resolved*, that those men who are appointed Counsellors by mandamus from England, directly contrary to the charter of this Province, and have taken the oaths required to serve in that office, are destitute of any regard to the good of their country, and ought to be treated as open enemies to the once free Constitution of this Province.

The patriotic and determined tone and spirit of these resolutions was not excelled by those of any other town in the Province. They were evidently drawn by men of intelligence and courage, who knew that the united voice of the community for which they spoke would enthusiastically sustain them. Indeed, so far as is known to the writer, no open supporter and defender of the crown marred the unanimity which marked the action of the town at this exciting period.

On the 15th of September, 1774, Moses Hale was chosen a delegate to the Provincial Congress to be held in Concord on the second Tuesday in October. But it is unnecessary to describe in detail the action taken at various times by the town, by which, in successive steps, in common with other towns in the Province, the feeling of the people was raised to the point of open resistance to the crown.

On the reception of the news of the battle of Lexington two companies marched from Winchendon, one under the command of Captain Abel Wilder, and attached to the regiment of Colonel Ephraim Doolittle, and the other under the command of Captain Moses Hale, and attached to the regiment of Colonel Nathan Sparhawk. The Winchendon men in Captain Wilder's company were as follows:

Abel Wilder, capt.	John Darling.
John Boynton, lieut.	Zebulon Green.
Dudley Perley, lieut.	Jacob Hale.
Thomas Sawyer, sergt.	Amos Hale.
Benjamin Bene, sergt.	Bill Hancock.
Amos Merriam, sergt.	Daniel Joslin.
John Newton Parmenter, sergt.	John Carter.
Daniel Goodridge, sergt.	Ephraim Parmenter.
David Goodridge, corp.	Philip Rollins.
Roger Bates, corp.	Joseph Stimpson.
Thornton Barrett, corp.	Aaron Putnam.
Abijah Stimpson, corp.	Ephraim Stimpson.
Thaddeus Bowman.	David Stoddard.
Francis Bridge.	Ephraim Sawyer.
Elisha Brown.	Jonathan Smith.
Samuel Brown.	Joseph Wilder.
Samuel Brodiss.	Jonathan Whitcomb.
Stephen Boynton.	Ebenezer Sherwin.
Zebulon Conant.	Ahsimias Sherwin.
Joseph Clark.	Benjamin Kimball.
John Day.	Samuel Newton.
Nathan Day.	Ephraim Parmenter.

The following Winchendon men were in the company of Captain Moses Hale :

Moses Hale, capt.	Adonijah Bixby, drum.
Seth Oaks, sergt.	Thomas Beal.
Levi Bixby, sergt.	Samuel Steel.
Nathan Knight, corp.	Solomon Bigelow.
Wm. Whitney.	Wm. Moffat.
Ebenezer How.	Benjamin Chamberlain.
Isaac Stimpson.	Calvin Oaks.
David Poor, lieut.	Lucas Green.
Benjamin Rice, sergt.	Ephraim Sawyer.

The following enlisted in November, 1776, in the regiment of Colonel J. Whitney :

William Warner, capt.	William Warner, Jr.
-----------------------	---------------------

The following enlisted January 1, 1778, for one year, in the company commanded by Captain Benjamin Edgell, attached to the regiment of Colonel John Jacobs :

Benjamin Chamberlain.	Peter Joslin.
Jeremiah Lord.	Nathaniel Oaks
Philip Sweetzer.	

The following were drafted in 1778 for nine months' service and attached to the company of Captain Bowington in Colonel Sparhawk's regiment :

John Bemis.	Wm. Mastick.
Josiah Baldwin.	

The following enlisted in the Continental Army in 1778 :

Matthew Knight (for the war).	Ezra Temple (2 years).
Ebenezer Richardson (2 years).	Edon London (2 years).
Adonijah Bixby (2 years).	Absimias Sherwin (2 years).
Francis Pollard (2 years).	Richard Person (2 years).
Wm. Parker (2 years).	Nathan Green (2 years).
Thomas Rugg (2 years).	Jonas Bemis (3 years).
Levi Carter (2 years).	John Prentice (2 years)
Ephraim Temple (2 years).	

The following served in Rhode Island in 1779 in the company of Captain Thomas Fish attached to the regiment of Colonel Nathan Tyler :

Silas Bemis.	Samuel Russell.
--------------	-----------------

In the same year Abel Brown, Daniel Day and Daniel Mixter served on Castle Island and Governor's Island in the company of Captain William Henry, and Ephraim Parmenter enlisted for nine months.

In 1780 the following enlisted for six months in the Continental Army :

Joseph Day.	Daniel Day.
James Stoddard.	David Payson.
Samuel Russell.	Nathaniel Bixby.
Jesse Ellis.	Nathaniel Maynard.
Amos Bemis.	Zenas Stoddard.

In the same year the following enlisted for three months' service :

Jeremiah Lord.	Jonathan Smith.
Wm. Poor.	David Smith.
Aaron Potter.	John Heywood.
Beamsley Lord.	Samuel Bridge.
Azariah Cook.	Abel Brown.

In 1781 the following enlisted in the Continental Army for three years :

Samuel Russell, Jr.	David Dunton.
Jotham Holt.	Joseph Day.
Luther Stimpson.	Moses Patton.
Beamsley Lord.	

In the same year the following enlisted for six months in Captain Jonathan Sibley's company, attached to the regiment of Colonel Luke Drury :

Paul Stuart.	David Flint.
Ephraim Boynton.	Isaac Noyes.
Joseph Darling.	Otis Crosby.

Miscellaneous enlistments were those of

Joseph Boynton.	Nathan Pushey.
Stephen Belknap.	Timothy Darling.
Josiah Baldwin.	Gamaliel Beamer.
Jonathan Bates.	Theodore May.
Eliphalet Goodridge.	James McElwain.
Jacob Hale.	James Noyes.

The amount of money expended by the town during the Revolution it is difficult to state with precision. In March, 1777, it was voted to pay a bounty of twenty pounds to soldiers enlisting in the Continental Army, and in November of that year the bounty was raised to one hundred and forty pounds. In 1781 ten thousand pounds were granted to procure beef for the army, and in that year \$412,000 were needed to defray the expenses of the town. It must be remembered, however, that at that time the currency was largely depreciated, and that large sums represented small values. Of course the town of Winchendon came out of the struggle with the purpose for which its people fought accomplished, but largely in debt, and with means so crippled that financial recuperation seemed almost impossible. So extreme was the destitution and so harassed were many of its inhabitants with debts pressing on them for settlement, that much sympathy was found to exist in Winchendon with those who instigated and promoted the Shays' Rebellion in 1786. Notwithstanding that rebellion was suppressed, the purposes for which it was excited were to a limited extent accomplished, by the enactment of relieving laws, and after its suppression the people, as best they could, struggled to revive their fallen fortunes, and place themselves once more on the road to prosperity and content.

The history of the First Church, which was dropped in this narrative at the point of its formation on the 15th of December, 1762, and the ordination of Rev. Daniel Stimpson on that day, may now be properly resumed. After the incorporation of the town the proprietors kept up their organization, and aided the town in their support of a minister. Mr. Stimpson died on the 20th of July, 1768. He was born in Weston, in 1731, and graduated at Harvard in 1759, in the class with Jonathan Trumbull (Governor of Connecticut), Samuel Allyn Otis, Abiel Leonard, John Pickering, Lemuel Hedge and Zabdiel Adams. He left two children,—Luther who was a soldier in the Revolution, and Sarah, who married Beamsley Lord, who was also a soldier in the Revolution.

Rev. Joseph Brown was ordained May 24, 1769. At the ordination Rev. Francis Gardner, of Leominster, made a prayer; Rev. Mr. Clark, of Lexington, preached the sermon; Rev. Mr. Lawrence, of Lincoln, gave the charge; Rev. Mr. Cushing, of Waltham, gave

the right hand of fellowship, and Rev. Mr. Woodward, of Weston, made the concluding prayer. Owing to difficulties which it is not worth the while to include in this narrative, Mr. Brown was dismissed by the decision of an ecclesiastical council held September 3, 1799. Mr. Brown was a graduate of Harvard in 1763, in the class with Josiah Quincy, John Jeffries, Joshua Upham, Samson Salter Blowers, Timothy Pickering and Caleb Gannett, and died in 1810. During the pastorate of Mr. Brown a new meeting-house was built. On the 1st of March, 1790, the town voted to build a house, and chose a committee of five, consisting of Abel Wilder, Esq., Deacon Moses Hale, Mr. Thomas Graton, Benjamin Hall, Esq., and Deacon Samuel Prentice, to devise ways and means and report at an adjourned meeting. On the 4th of October it was voted to set the new house on the meeting-house common, and to build it sixty feet long, fifty feet wide, with posts twenty-seven feet long, and a porch at each end ten feet on the house and fourteen feet deep. It was also voted to have fifty-four pews on the floor, twenty-four in the galleries, and three seats on each side below and three in the galleries. There were to be twenty windows (forty squares in each window) below, and twenty-one windows (thirty-five squares in each) in the galleries, and the frame was to be raised in the early part of the year 1792. A committee, consisting of Abel Wilder, Thomas Graton and Benjamin Hall, was chosen to make the necessary arrangements and superintend the building of the house. On the 1st of November, 1790, before the house was built, the pews were sold by auction, and the pews on the floor, after the assignment of one to the minister, brought the sum of two thousand one hundred and eighty-three dollars. Those in the galleries brought three hundred and sixty-six dollars.

On the 21st of November, 1791, it was voted to reconsider the vote fixing the location of the meeting-house, and a committee consisting, of Abel Wilder, Esq., Deacon Samuel Prentice, Doctor Ziba Hall, Lieut. John Burr, Mr. Thomas Graton, Mr. James Steel and Samuel Crosby, Esq., was chosen to select a location and report at an adjourned meeting. On the 24th of November the town accepted the report of the committee, selecting a lot "one hundred and twenty feet south of Luther Stimpson's house, and thirty-one feet east of the stone wall by Mr. Brown's garden." But the town did not rest satisfied. On the 20th of December another committee, consisting of Abel Wilder, Moses Hale, Samuel Crosby, Wm. Whitney, Benjamin Hall and Samuel Prentice, was appointed to make another selection of a location, and report to the town. After one or more meetings it was definitely voted on the 7th of May to place the north side of the house one hundred and seventy feet from the north line of the Common. At a previous meeting it had been voted that the selectmen should buy "a barrel of West India rum and a quantity of sugar sufficient to make it into toddy, and that it be ex-

pended partly upon the men that assist the day preceding the day set for raising the meeting-house in laying the timber in order for raising; and the remaining part upon the people that attend as spectators at the raising, and that the selectmen see that it is properly dealt out." The house was raised on the 24th of May, 1792, and dedicated January 1, 1793, and the old meeting-house was sold.

On the 16th of March, 1801, the town voted "to give Mr. Levi Pillsbury \$400 for his annual salary so long as he shall continue to be our public teacher of piety, religion and morality; the said Pillsbury relinquishing all claims to ministerial lands and rents belonging to said town." Mr. Pillsbury was ordained June 24, 1801, and served until his death, which occurred April 5, 1819. There had been estrangements during his pastorate owing to political differences between pastor and parish, but these had been partially, if not wholly, reconciled before his death. In 1815, during the pastorate of Mr. Pillsbury, a tower was added to the meeting-house and a bell hung, which was bought by funds raised by subscription, but not before 1823 was a stove used to heat the house.

On the 10th of May, 1819, a committee of five, consisting of George Coffin, Isaac Morse, Samuel Prentice, Phineas Whitney and Samuel Moore Brown, was chosen to select a new minister as the successor of Mr. Pillsbury, but it was not until the 12th of October that a decision was reached, when it was voted to ask Rev. Elam Clark to settle as pastor. The invitation was declined and Rev. Eber L. Clark was then invited and accepted. He was ordained on the 13th of October, 1820, on which occasion Rev. Thomas Robbins, D.D., preached the sermon. His ministry continued until his resignation, January 2, 1835. Mr. Clark was born in Mansfield, Conn., March 23, 1786, and graduated at Williams College in 1811. He was licensed to preach in February, 1812, and ordained, September 24th in the same year, pastor of the First Church in Chatham, Connecticut. He was dismissed from that church August 13, 1815, and installed pastor of the church in Granby, Conn., July 3, 1816, from which he was dismissed July 5, 1820. After his resignation as pastor of the Winchendon Church, he served a pastorate of three years in Berlin, Mass., and afterwards a pastorate of fifteen years in Richmond, Mass. In 1853 he was installed in Washington, Mass., and died in that town in 1857. Julius L. Clark, formerly the efficient chief clerk in the State Auditor's office in Boston, and at a later day the much-respected insurance commissioner of Massachusetts, was his son.

The successor of Mr. Clark was Rev. Daniel O. Morton, then settled in Springfield, Vermont, who was installed March 2, 1836. At his installation Rev. George Goodyear, of Ashburnham; Rev. Sumner Lincoln, of Gardner; Rev. Cyrus Mann, of Westminster; Rev. Ebenezer Perkins, of Royalston; Rev. Amos W. Burnham, of Rindge; Rev. Alexander Lovell, of Phillipston; Rev. Lemuel P. Bates, of Templeton, and

Rev. Giles Lyman, of Jaffrey, officiated. Mr. Morton was dismissed June 29, 1841, and was afterwards settled in Bristol, N. H., where he died, March 25, 1852.

During the next five years the pulpit was supplied by Rev. Edwin Leigh two years, Rev. Robert W. Fuller, Rev. Abijah P. Marvin six months, and Rev. Benjamin Rice from 1843 until his death. Mr. Rice was born in Sturbridge May 9, 1784, and died July 12, 1847. He was a graduate of Brown University, and had before going to Winchendon been settled in Skaneateles, N. Y.; South Deerfield, Mass., and New Gloucester, and Buxton, Maine. On the 19th of November, 1846, Rev. Malachi Bullard was ordained and served until his death, in 1849. He was succeeded by the Rev. John Storrs, who was installed August 22, 1849, and died in his pastorate in 1854. During the pastorate of Mr. Storrs the old meeting-house, which was found too large after the organization of a new society in the north part of the town, which will be hereafter referred to, was taken down and a smaller one built, largely from the old materials, a little north-westerly of the old location.

Rev. Benjamin F. Clark was settled October 25, 1855, and was dismissed in April, 1865. Since that time the pulpit has been occupied by Rev. Milan H. Hitchcock, Rev. David Brigham, Rev. Levi Brigham, and the present pastor, Rev. Abijah Stowell, who has served three or four years.

The Baptists in Winchendon held religious services as early as 1783, but not until 1798 was a church organized, in the southwest part of the town, called New Boston. In 1811 a society house was built, and the first settled minister was Elder Samuel Simonds, who was ordained in 1816. In 1820 a meeting-house was built. In 1837 Mr. Simonds died, and was succeeded by various occupants of the pulpit, among whom were Elder Brown, Elder Jones, and in 1840 by Rev. Warren Cooper. In 1842 Rev. Andrew Dunn became the pastor, and was followed by Elder Fay and Elder Culvert and others.

The Methodist Episcopal Church was organized in the year 1800. Until 1807 meetings were held in a private house, but in that year a meeting-house was built on land given by Stephen Weston. In 1833 a new meeting-house was erected, and dedicated October 11th in that year. In 1851 the house was remodeled and rededicated on the 2d of October. In 1875 a third house was built and is now occupied by the society, under the pastorate of Rev. Wm. F. Lawford.

The North Congregational Church was organized December 7, 1843, a meeting-house having been built earlier in that year. There were sixty-seven original members, nearly all of whom had been members of the First Church. Rev. Abijah P. Marvin was invited to settle, and was ordained January 10, 1844, on which day also the meeting-house was dedicated. At the dedication, which took place in the forenoon, Rev. Richard M. Chipman made the introductory prayer, Rev. Mr. Marvin preached the sermon and Rev. Sam

uel H. Peckham made the dedicatory prayer. At the ordination, in the afternoon, Rev. Benjamin Rice, of the First Church, read the Scriptures and made the introductory prayer; Rev. Mr. Tyler, of New Haven, preached the sermon; Rev. Mr. Jennison made the ordaining prayer; Rev. Mr. Burnham gave the charge; Rev. Mr. Sabin the right hand of fellowship; Rev. Mr. Chipman the address to the people; and Rev. Mr. Stone made the concluding prayer. In 1848 a bell was hung in the meeting-house, and in 1855 the house was enlarged and rearranged, at a cost of \$2000. Mr. Marvin was dismissed August 22, 1866, in response to a request made by him for the second time. During the pastorate of Mr. Marvin he made himself not only a devoted and beloved leader of his flock, but a useful and respected citizen of the town. Whatever tended to promote the welfare and elevate the culture and morals of the community received his earnest support. He has permanently identified himself with the town, and enlarged the debt of gratitude due to him by its people by the well-conceived and ably-executed "History of Winchendon," which he published in 1868; and, at this point in the narrative, the writer desires to acknowledge the assistance afforded to him by that work in the preparation of this sketch.

Rev. Austin Dodge was ordained October 9, 1866, and remained about a year. He was followed by Rev. Davis Foster in 1869, who still officiates as pastor of the society.

The Baptist Church in the northerly part of the town, which is now really Winchendon, was organized April 27, 1848. Their meeting-house was dedicated January 17, 1849, and Rev. Andrew Dunn was settled. Mr. Dunn resigned in 1853, and Rev. Abraham Baldwin was settled in 1854. Rev. Lester Williams followed, and was succeeded by Rev. W. W. Ashley. Mr. Ashley left in 1861, and was followed in the same year by Rev. George A. Litchfield, who remained until 1865. After the departure of Mr. Litchfield, Rev. Leonard Tracy supplied the pulpit for a time, and Rev. J. S. Hamblin was settled in 1872. The present pastor is Rev. Windsor H. Wyman. In 1867 the meeting-house was repaired and somewhat remodeled, and the society is enjoying a season of prosperity satisfactory and creditable to its members.

The increasing number of Catholics in the town rendered, many years since, the organization of a church necessary. A meeting-house was built, and for many years Father Moran was the officiating clergyman. The church is called "The Church of the Immaculate Heart of Mary," and is now presided over by Father John Conway.

The Unitarians began to hold services in the town hall in 1851, and were organized as the Third Congregational Society, January 17, 1852. Rev. Theodore Haskell Dorr, a graduate of Harvard in the class of 1835, was installed January 19, 1852, and remained about a year. He was succeeded by Rev.

Benjamin Huntoon in 1856, who left in 1858. Rev. Charles H. Wheeler followed September 1, 1865, and remained in the pastorate until his death, in 1888. The present pastor is Rev. A. J. Culp. In 1866-67 their elegant and commodious granite church, called the Church of the Unity, was built, and dedicated November 13, 1867. The building committee consisted of I. M. Murdock, B. D. Whitney, William W. Whitney, Sidney Fairbanks, John Folsom and George Goodspeed, and the result of their work reflects infinite credit on their judgment and taste. At the dedication the dedicatory prayer was offered by Rev. Mr. Wheeler; Rev. Dr. Charles Bartol, of Boston, preached the sermon, and Dr. Edward Everett Hale, of Boston, delivered an address. The house is built of Fitzwilliam granite, and is ninety-five feet long by forty-five feet wide. The spire rises one hundred and thirteen feet, and the cost of the structure, including an organ, was \$44,000.

Returning now to the earlier days of the town, reference should be made to two changes which were made in its boundary lines. When the town was incorporated, in 1764, it was supposed that it was bounded on the north by the New Hampshire line. When, however, the line came to be run between the two Provinces, it was found to be one mile farther north than it was supposed, and consequently, a strip of territory a mile wide along the whole northern border of Winchendon, six miles long, remained unappropriated. After Royalston was incorporated, February 17, 1765, this strip was annexed to that town, and was called Royalston Leg. When the strip became settled its inhabitants petitioned to be set off to Winchendon, and on the 17th of June, 1780, an act was passed, granting the petition, and thus six square miles, or about 3840 acres, were annexed to Winchendon. When Gardner was incorporated, on the 27th of June, 1785, the act provided that the southeasterly part of Winchendon, the westerly part of Westminster, the southwesterly part of Ashburnham, and the easterly part of Templeton should constitute the new town. The part taken from Winchendon included 3680 acres, so that after these two changes had been made the town of Winchendon included 160 acres more than it did when incorporated.

The first mention of schools in the town was under the date of May 5, 1765, when the sum of eight dollars was appropriated for the benefit of a school at the centre. In 1766 the sum of twenty dollars was appropriated, and in 1767 it was voted that "the extreme parts of the town should have a school by themselves, they providing a place and keeper."

In 1774 the town was divided into six sections, each of which was to have a school. In 1780 it was voted to have a school-master for nine months, equally divided between the six sections, and in 1785 the sum of fifty dollars was appropriated for schools. After 1786 five or six school-houses were built, and in 1799

the appropriation for schools was \$450, in 1808 it was \$500, in 1829, \$600; in 1833, \$700; in 1840, \$1000; in 1844, \$1100; in 1846, \$1200; in 1848, \$1500. In 1854 a high school was established under the care of E. A. Upton, and in 1868 a high school-house was built. In that year the appropriation for schools was \$3,800, the district system having been abolished in the previous year. In 1877 the appropriation, or, rather, the money expended for schools, was \$4631.31, and for the year ending January 31, 1888, the school expenses were, for

Wages of teachers.....	\$5,237.95
Care of school-houses.....	137.32
Fuel.....	327.58
Repairs.....	209.66
Books and supplies.....	660.54
Miscellaneous.....	305.77
Making a total of.....	\$7,178.82

There are at present in the town a high school, two grammar schools, five intermediate schools, five primary schools and six ungraded schools, making a total of nineteen schools.

The Winchendon Academy was founded in 1843 by Ephraim Murdock, who built a house which was used free of charge at various times by John G. Giles, Levi O. Stephens, Stephen F. Kellogg, Charles L. Brace, A. H. Merriam and Rev. Wm. Wilmarth. The High School was kept in the academy building until the erection of a High School House, and since that time, by direction of Mr. Murdock, the building has been occupied by the lower grade schools of the town.

It is probable that the town of Winchendon had the privileges of a library earlier than any among the small towns in the State. According to tradition, one existed in the early part of the last quarter of the last century. How long it existed, by whom it was managed and to whom it belonged is not known. At any rate it disappeared, and another seems to have existed about the year 1800. This was sold in 1825, and not until the year 1851 can any public library be said to have been established. In that year a corporation was formed, which seems to have been inspired by the efforts of Rev. Mr. Marvin, whose eye was always open to whatever would educate and elevate the community in which his lot was cast. The first officers of the corporation were Elisha Murdock, president; Calvin R. Whitman, vice-president; H. Harwood, clerk; Amasa Whitney, Jr., treasurer; Ira Russell, Orlando Mason, Wm. L. Lincoln, Henry Perley and Ebenezer Butler, Executive Committee; and A. P. Marvin, B. O. Tyler, E. Murdock, Jr., D. L. Morrill and Alvah Godding, library committee. Subscriptions to the amount of three hundred dollars were raised, and the design of the library was to include lectures, from which both instruction and revenues might be derived. This library had a precarious existence until the 16th of January, 1867, when the members of the corporation voted "to present the library to the town at the next March meeting, provided the

town will provide for its maintenance and enlargement and proper keeping, for the accommodation of the readers of the town." The town voted to accept the library on the conditions stated, and it is now a free public library, managed by trustees chosen by the town and supported by annual appropriation.

As in the War of the Revolution, the town of Winchendon kept pace with other towns in its efforts to sustain the government in the War of the Rebellion. On the 27th of April, 1861, a town-meeting was held, at which Giles H. Whitney acted as moderator, and a committee was appointed to report suitable measures for the town to adopt in the existing state of affairs. On the report of the committee it was voted to furnish each volunteer with a suitable uniform, a good revolver and eight dollars a month, in addition to government pay. It was also voted to pay one dollar per day for time expended in drilling for a term not exceeding one month. On the 4th of July, 1861, at a town-meeting at which John Cutter presided, it was voted to furnish State aid to soldiers' families in accordance with the provisions of law. At a meeting held on the 19th of July, 1862, it was voted "that under the recent call of the government for three hundred thousand men, the town is called upon to furnish a certain number in making up the quota for this State; that this town will pay to such men as will enlist within twenty days to make up the required number one hundred dollars each, in addition to the bounty offered by government, to be paid as follows: twenty-five dollars as soon as the recruit is sworn into service, and seventy-five dollars at the expiration of the term for which he enlists, with interest from the true date of his being sworn into service. And if the recruit prefers, the seventy-five dollars shall be paid to his family or to those dependent on him for their support, by his order at such times and in such sums as the selectmen may think required. In case of death, what is due shall be paid to his heirs. Provided if any volunteer prefer to receive the whole bounty of one hundred dollars at the time he is sworn into service, he shall be paid accordingly."

On the 16th of August, 1862, it was voted "that this town will pay to each man that will enlist within the next fifteen days to make up the quota of this town of the last three hundred thousand men called for by the government, the sum of one hundred dollars upon their being sworn into service."

On the 13th of September, 1862, it was voted to pay the same bounty to nine months' men.

These votes, with others, not included in this narrative, illustrate the activity of the town in furnishing its share of men under the various calls of the President. The amount of money expended by the town during the war for war purposes was \$48,000, of which the sum of \$17,949.32 for State aid was paid back by the State. The following is a list of soldiers furnished by Winchendon, with the regiments and companies to which they belonged:

First Regiment.		Co.	Co.

The regiments of the following soldiers are unknown:

M. V. Barney.	G. A. Jewett.
Frank Bradford.	Daniel Norcross.
Luke Doyle.	George L. Norcross.
Isaac J. Dunn.	Milton M. Parks.
Milo Evans.	Samuel J. Resdin.
Orlando Gott.	Albert Samson.
Calvin O. Gott.	Henry E. Snow.
Charles S. Hilton.	George Thomas.

Joseph Hyatt.

The following soldiers were either killed or died in the service:

Edward Alger.....	died July 19, 1863
H. H. Baldwin.....	killed September 19, 1864
John Baldwin.....	died January 16, 1863
George W. Bradish.....	died
Peter Breen.....	killed at Spottsylvania, May 12, 1864

Levi W. Brooks.....	died September 19, 1862
George Brown (2d).....	died
Robert Bruce.....	died in 1864 at Richmond
H. N. Buttrick.....	died May 18, 1863
Lorenzo Coburn.....	died June 2, 1862
Theodore F. Damon.....	died November 29, 1862
Milo Evans.....	died
Patrick Fenton.....	died
C. B. Fisher.....	died
Wm. M. Flint.....	died at Baton Rouge, August 14, 1863
Adams E. French.....	killed June 19, 1864
Orlando Gott.....	died September 12, 1862
S. B. Hale.....	killed at Spottsylvania, May 12, 1864
D. H. Harding.....	died August 3, 1863
R. E. Hartwell.....	killed at Chancellorsville, May, 1863
Josiah Hill.....	died July 19, 1863
Theodore J. Hill.....	died June 25, 1863
T. F. Hubbard.....	killed March 23, 1863
George Knowlton.....	died May, 1863
J. Henry Lake.....	killed at Chantilly, September 27, 1863
George H. Matthews.....	died of wounds received at Roanoke
Frederick Maynard.....	killed at Gettysburg
D. McLennon.....	died July 2, 1863
Daniel Norcross.....	died of wounds in May, 1864
A. G. Nutting.....	died at Yorktown in April, 1862
G. C. Parker.....	died November 5, 1862
Elwin A. Parks.....	killed in Louisiana June 21, 1863
George H. Parks.....	died at Annapolis
George E. Plummer.....	killed November 16, 1863
Hiram E. Powers.....	died September 23, 1863
Charles Putney.....	died August 24, 1863
James A. Raymond.....	died February 19, 1863
Charles Samson.....	died
Albert J. Sawtell.....	killed at Spottsylvania May 12, 1864
Elijah M. Scott.....	killed at Ball's Bluff
Wm. J. Smith.....	died March 26, 1864
James S. Stratton.....	killed at Antietam
E. N. Taylor.....	died in Louisiana
George Thomas.....	died in prison at Richmond
Josiah T. Town.....	died April 27, 1862
Thomas Wells.....	died in 1862
F. L. Whitney.....	killed in June, 1864
Walter Wilkinson.....	killed at Williamsburg May 5, 1862
John M. Wyman.....	died May 20, 1863, in Louisiana

The business enterprises on which the town of Winchendon thrives are largely those of the manufacture of wooden-ware. In the early days of the town farming was the chief industry, but the abundance of suitable material in its adjacent forests naturally led to the enterprises which have, in later years, characterized it and given it distinction.

According to the census of 1885 the dairy products of the town were valued at \$25,011; poultry products, \$3496; the wood products, \$5607; cereals, \$1798; fruits, berries and nuts, \$3193; hay, straw and fodder, \$33,714; meats and game, \$2928; and vegetables, \$5129.

The various mills which existed previous and up to 1868 have been so fully described in "Marvin's History," and up to 1879 in his "County History," that it seems almost useless to recount them in this narrative. They have undergone some changes since that time, but for the most part they continue in the same line of business and under the same management. Since that time the establishments of Alvin Streeter, engaged in the manufacture of wood-working machinery; that of Brown Brothers, at Ballardsville, and Wilder P. Clark, at the North Village, engaged in the manufacture of wooden-ware; of Taft

& Day, in the manufacture of brush woods; of Wm. P. Caldwell, of hardware; of Quimby S. Backus, of oil and gas heaters; of the Glen Allan Cotton-Mills, conducted by White Brothers; of M. E. Converse & Co., in the manufacture of rattan chairs and toys; of W. P. Clark & Co., of chairs, and of George S. Loud, of wooden faucets, have been established, and have added to the industry, population and wealth of the town.

Among the older establishments of which some special mention should be made are those of Nelson D. White, Baxter D. Whitney, Orlando Mason, Ozro Hancock and William W. Whitney. The cotton factory of Mr. White, conducted by his sons at Spring Village, stands on the site of an old saw-mill, which was in operation in the early part of the century. In 1826 a woolen factory was erected by Sylvanus Holbrook, which, after running about five years, was converted into a cotton factory, and run by Philip Ridgway and William and John D. Dunbar. For a description of the mills conducted by Nelson D. White and his sons, the reader is referred to a sketch of Mr. White on page 1069.

The manufacture of wooden-ware was begun about fifty years ago by Elisha Murdock, who established it on a firm and lasting foundation. His son-in-law, William W. Whitney, succeeded him, and has shown the skill and good management requisite for the continued successful operation of the business.

The works of Baxter D. Whitney, for the manufacture of machinery for working wood, were begun in 1846. In 1852 his dam and buildings were swept away, but promptly rebuilt. Mr. Whitney has, by his ingenuity and inventive power, reinforced his natural business capacity and insured to his enterprises a permanent success.

Among the corporations and organized bodies of the town are the Winchendon National Bank, with a capital of \$150,000; the Winchendon Savings Bank, organized in 1854; the Gilman C. Parker Post, No. 153, of the Grand Army of the Republic; a lodge of Odd Fellows, a lodge of Royal Arcanum, a lodge of the Ancient Order of United Workmen, a lodge of Knights of Labor, and one of Good Templars, and a Ladies' Relief Corps attached to the Grand Army Post.

The railroads touching Winchendon are the Cheshire, connecting the town with the Boston and Fitchburg and with the Rutland Railroad, the Ware River Railroad, connecting Winchendon with Palmer and operated by the Boston and Albany, the Monadnock Railroad, connecting Winchendon with Peterboro', run by the Cheshire Railroad and the Worcester Division of the Fitchburg Railroad, connecting Winchester with Worcester.

The professional men in the town are Frank B. Spalter and Lafayette Washington Pierce, attorneys-at-law, and Frederick W. Russell, John G. Henry, Nathaniel R. Perkins and Peter S. W. Geddes, the

first two of whom are allopathic, the third homœopathic, and the last eclectic.

The population of the town is, with its business, gradually increasing. In 1860 it was 2624; in 1875, 3762, and in 1885, 3872. Its valuation has increased more rapidly than its population. In 1865 it was \$1,160,952; in 1875, \$2,190,889, and in 1885, \$2,057,308.

Among the natives of Winchendon who have found distinction in other and distant fields of activity, two who have been known to the present generation ought to be mentioned. Artemas Hale was the son of Deacon Moses Hale, who was a captain in the Revolution, and for many years held offices of trust in the town. Mr. Hale was engaged in early life as a school teacher, and finally settled in Bridgewater, in the county of Plymouth. There he lived to a great age, respected and beloved by all within the sphere of his influence. He held many offices of trust, and at one time represented the Old Colony District in Congress.

William Barrett Washburn was another distinguished son of Winchendon. He was descended from John Washburn, who appeared in Duxbury as early as 1632, and afterwards settled in Bridgewater. Elijah Washburn, the grandfather of the subject of this sketch, was born in 1752 or '53, and lived for a time in Leicester, from which place he removed to Hancock, N. H., and died in 1835. He was a colonel in the Revolution, and had twelve children. Asa Washburn, the fifth child, born in Hancock, removed to Winchendon in 1817, and married Phebe, daughter of Capt. Phineas Whitney. He was a hat manufacturer by trade, and died in Winchendon in 1823. William Barrett Washburn, son of Asa, was born in Winchendon, January 31, 1820. He fitted for college at the Westminster and Hancock Academies, and graduated at Yale College in 1844 in the class with Orrin Ferry, of Connecticut, who afterwards sat with him in the United States Senate. After leaving college he was a clerk in the employ of his uncle, Wm. B. Whitney, at Orange, until 1847, when he engaged in the manufacture of doors, chairs and wooden-ware, at Erving. In 1857 he removed to Greenfield, where he became interested in the Wiley Russell Manufacturing Company, and resided until his death. He was a member of the Massachusetts House of Representatives in 1850, and of the Senate in 1854. He was a member of Congress from 1863 to January 1, 1872, when he resigned to be inaugurated Governor of Massachusetts, to which office he had been chosen in the previous November. On the 17th of April, 1874, he resigned the office of Governor on his election to fill the unexpired term of Charles Sumner in the United States Senate, and held that office until March 4, 1875. He was for many years president of the Greenfield Bank, and its successor, the Greenfield National Bank, one of the trustees of Yale College, and one of the board of overseers of Amherst College.

He married, September 6, 1847, Hannah, a daughter of Col. Samuel Sweetser, of Athol, and died at Springfield, October 5, 1887, leaving two sons and four daughters.

In its municipal capacity, besides the school-houses and public library, to which reference has been already made, the town owns a town farm; a fire department with apparatus consisting of two hand-engines and one steamer, with three hose-carts or carriages, hooks and ladders, three thousand seven hundred and seventy feet of hose of all kinds, and all the necessary tools belonging to the same.

With the business enterprises now in operation and the facilities for reaching markets of purchase and sale, there seems to be no reason why Winchendon should not advance in a career of increasing prosperity and wealth.

#### BIOGRAPHICAL.

##### ELISHA MURDOCK.

The student of the development of the rural towns of New England for the past hundred years will find that the personal records of a few prominent men have gone far to the making of the history of those towns. To this rule Winchendon affords no exception. Whatever distinction she has gained among her sister towns of the old Commonwealth, outside of such personal narrative, is due, in a great measure, at least, to the manufacture of wooden-ware. The personal annals identified with the creation of this industry are those of the Hon. Elisha Murdock, a native of the town—annals that find a fitting place in our history.

Elisha Murdock was born in Winchendon, August 27, 1802. He was the third child of Ephraim Murdock and Gebiah Bixby, both natives of Winchendon and parents of a famous family. Elisha, in common with the other children, had the district school education which the town schools of that day afforded, and afterwards at his own expense continued his studies in the academy at Leicester, Mass., and that at New Salem, N. H. In his early manhood he taught school in Winchendon and some of the neighboring towns during the winter months. In 1829 he was elected a member of the School Committee of the town, a position which he held almost continuously until he resigned it in consequence of failing health, in 1863. Of his work in this direction something more will be said hereafter.

In 1832 he married Roanah Morse, the fifth child of Isaac Morse and Miriam Spofford. His home life was most happy, extending over nearly forty years. His wife and two daughters survive him,—Ellen R. Godding, wife of William W. Godding, a prominent alienist physician of Washington, D. C., and Sophia M. Whitney, wife of William W. Whitney, the successor

to Mr. Murdock's business and the leading wood-ware manufacturer in the country.

In 1834 Mr. Murdock commenced the manufacture of pails and tubs at his mill at Waterville, one mile west of Winchendon Village. This business proved his life-work, he devoting his full energies to it until his retirement, in 1862, with what result will appear further on.

His public life was an honorable one. He represented the town in the General Court as early as 1838, in 1840, and again in 1848 and 1851. In 1852 he was elected to the State Senate and re-elected in 1853. In all matters that concerned the public weal he was the first citizen of his town. Finding his health failing, he retired from business and withdrew from public work in 1863. He died March 12, 1870, universally esteemed and regretted.

These are the brief annals of a man whom Winchendon held in the highest regard and throughout his entire career delighted to honor. Is it asked why was this? the answer is not far to seek; he was never unmindful of the good of others, and while helping himself he helped them. He found Winchendon a wilderness of pine trees and scattered farm-houses, with hardly any other industry than that of agriculture. He lived to see it—and this was in a great measure the outgrowth of his own energy—dotted over with prosperous villages, utilizing its abundant water-power in converting the pine logs into material wealth by means of the processes which he had developed. The industry was a new one when, in 1834, he commenced sending out from his mill finished turned tubs and pails. It is true there had been other parties who, prior to 1834, had here and elsewhere in the vicinity made, in a limited and imperfect fashion, buckets and utensils of wood, but the fact remains that it was Elisha Murdock who first established on a permanent basis the manufacture of the turned pail and tub, articles which, coming into general use, have carried the name of Murdock and Winchendon wherever they have been introduced. To three Winchendon men the world is indebted for the turned pail,—Reuben Hyde, who, by his invention of the cylinder or barrel-saw, made sawn staves possible; William Murdock, the brother of Elisha, who perfected the lathe for turning the pails; and Elisha Murdock, to whose energy and enterprise the finished product was due. They were small beginnings in 1834, but they proved the planting of an industry which, in twenty years, had grown into a magnificent success, and, though afterwards others following in his footsteps and building still more extensive works, came to reap where he had sown, he has always been regarded, and justly, as the father of the trade, and to-day the E. Murdock & Co. Mills, on the old site, conducted by his son-in-law, William W. Whitney, and his grandson, Elisha Murdock Whitney, are the most extensive of any of their kind in the land.

*Eliska Huntstock*

---

*John & White*

This, which gave prosperity to his native town, was his success as a business man. But it is not for this alone that Elisha Murdock is remembered in Winchendon; he was successful in far more than this. We have alluded to his work for the schools of the town. This was with him a labor of love. He was alive to progressive methods and strove unweariedly to elevate the standards of education. A personal friend of Horace Mann, he was familiar with and sympathized in all his work as secretary of education for Massachusetts. For more than thirty years this man found time from out of the engrossing cares of his business life to supervise the education of the children in the district schools; his buggy beside the old red school-houses at the cross-roads was a familiar sight to the teachers; the children sometimes catching rides in his buggy, and so making his acquaintance, loved him. Realizing how limited his own opportunities for education had been, for the next generation of his townsmen he sought out something better. Young men struggling to gain a liberal education came to him for the advice and assistance that were not wanting; they had come to the right man. Without envy, he was ever ready to help those who made the effort to help themselves. No man was ever more popular as a member of the School Committee or more serviceable to the schools than he. Marvin, in his "History of Winchendon," who was for many years an efficient co-worker with Mr. Murdock on that committee, records a notable instance. In that brief era, when the secret organization, known as the Native American or Know-Nothing Party, made a clean sweep of all the public offices in Massachusetts, the town of Winchendon proved no exception. When the vote in town-meeting, on the election of School Committee was declared, Mr. Murdock's popularity was found to be proof even against Know-Nothingism, although it was well known he had no sympathy with that organization. He had been re-elected, but with a board of Know-Nothing colleagues. Such was his popularity and such was his interest in the schools, extending outside of and beyond their politics, that they seemed to have chosen him for life. But it showed something more than popularity when, looking only to the best interests of the schools, he rose in the town-meeting and declined to serve. This was moral strength greater than popularity, and in tribute to this, the town, with returning sense, voted him in again, together with the old chairman of the committee, whom they had just defeated; one of the newly-elected members resigning to make room for him.

Mr. Murdock was always a quiet man, but firm—a firmness that could be relied on. He had the courage of his convictions; he was a fearless pioneer in the temperance cause and in the party of freedom and free soil. He looked for a reign of universal brotherhood, and the peace movement of Elihu Burritt found in him an earnest advocate. He was sent as a delegate to conventions; he attended the primary

meetings; he attended those public gatherings that voiced the sentiment of the community on the great questions of the day; present to counsel and to guide, ever ready to speak and to act for the welfare of his kind. A Unitarian in his religious faith, he believed in a nobility in human nature; and believing, he was not disappointed in his trust. What others embalmed in their creeds, he strove to put into his daily life.

He found time to be a public-spirited man in respect to all that makes a town better, and still stood first among her business men. He compassed in his life the work of a dozen men, with his attention to his mills and his business in all its details—his farm, which he took for his recreation, and his public life for the welfare of his fellow-men; yet he slighted no one of these.

So it came at last that a constitution never robust gave way under the ceaseless strain, and failing health withdrew him from the public counsels while not yet old, taking with him into that final retirement the tender sympathies of all. He had worn out his life in their service, yet he had done all so quietly and with such apparent ease that men did not realize the magnitude of the work until it was over. It was a true life, with no ignoble aims; gentle, unostentatious, but great in those practical achievements which bring wealth to communities and make States.

#### NELSON DAVIS WHITE.

The American ancestor of Mr. White was Thomas White, who appeared in Charlestown in 1677, where he became a freeman in that year. He was born in 1636 and married Mary Frothingham, by whom he had Thomas, born October 15, 1664; William, born September 12, 1667; Samuel, October 24, 1669, and Elizabeth, February 28, 1671. Thomas, the oldest of these children, married Sarah Rand and had Thomas, born December 18, 1685; Samuel, born June 4, 1690; Sarah; John, born August 22, 1695; Hannah, born August 25, 1698; Mary; Rebecca, born December 1, 1704, and Abigail, born June 2, 1708. John, the third son of Thomas, married Sybilla, daughter of Col. Joseph Buckminster and removed to Framingham. His children were:—John, born October 17, 1728; Thomas, born July 11, 1731; Rebecca, born February 5, 1733; Sarah, born January 22, 1737; Sybilla, born October 29, 1741, and Rand, born October 15, 1751. Thomas, the second son of John, removed to Spencer and married Abigail Muzzey. His children were:—Thomas, born November 24, 1757; Thaddeus, born July 16, 1759; Abigail, born May 3, 1761; Mary, born November 11, 1762; Benjamin, born August 8, 1764; Joel, born May 3, 1766; Sibbel, born February 13, 1768; Nancy, born May 25, 1769; Jonah, born April 20, 1771; Betsey, born July 1, 1774; Amos, born February 6, 1776; John Bradshaw, born February 1, 1778, and Molly, born September 2, 1782. Thomas, the oldest child of the above, was a soldier in the Revolution

and after the war settled in West Boylston. He married Hannah Estabrook and had Polly, born May 23, 1786; Nancy, born October 15, 1789; Joseph, born July 24, 1792; Hannah, born February, 1794; Thomas, born June 5, 1796, and Ebenezer, born June 13, 1798. Joseph, of West Boylston, the oldest son of the last Thomas, married Matilda, daughter of Simon Davis, of West Boylston, and had Nelson Davis, born July 24, 1818; Persis Arminda, born January 11, 1820, who married Dr. Abbott, of Boston; Windsor Newton, born March 4, 1823, who married Miriam Walker, of West Boylston; Hannah Mandana, born June 27, 1825, who married Percival W. Bartlett; Joseph Estabrook, born June 19, 1832, and Francis Wayland, born October 26, 1834, who married Josephine M. Tracey.

Joseph White was a man of superior mental qualities and executive ability. He was a thorough mechanic and at the age of eighteen started a wire factory in West Boylston with eighteen hands in his employ. Two years later he began the manufacture of cotton yarns and a short time after of cotton goods, of which he was one of the earliest manufacturers in the country, and in which he continued until his death, leaving a handsome property to his family as the fruit of his labors.

Nelson Davis White, the subject of this sketch, the oldest child of the above Joseph, was born, as above stated, in West Boylston, July 24, 1818. He attended the common schools in his native town and the academies at Westminster and Shelburne Falls. Until he was twenty-five years of age he remained with his father at West Boylston, and was the superintendent of his mill, which he remodeled in 1838 at the age of twenty, introducing many improvements which attracted the attention of manufacturers. In 1843 he removed to Winchendon, and as the agent of the Nelson Corporation started the Nelson Mill, a wooden structure standing where the large brick mill now owned by Mr. White is located, at Spring Village, and which was burned in 1854. Not long before the destruction of this mill Mr. White removed to Winchendon Village, and in 1855 rented a building and privilege owned by Baxter D. Whitney, and fitted it with machinery, including eighty looms, where he began, and has continued up to this time, the manufacture of colored cotton goods, giving employment to about ninety hands.

In 1857 Mr. White bought for the sum of eight thousand dollars the property of the Nelson Mills Corporation, including the water privilege which had been idle since the fire three years before, and built a brick mill in which eighty-six looms were put in operation on the same line of goods as were manufactured in the mill at the village. From time to time the extent and capacity of this mill have been increased until at the present time it contains one hundred and eighty-five looms and employs about two hundred hands. The annual product of the two mills,

with their two hundred and seventy-five looms, employing nearly three hundred hands, is about half a million of dollars. The old Nelson Mills Corporation has survived the change of ownership of its property, and is still maintained with the possession of all the shares of its stock in the hands of Mr. White and his sons. Nelson Davis White is president and his son, Zadoc Long White, is clerk and treasurer. The property of the corporation consists of the water privilege on Miller's River, with the factory and machinery and about fifty houses, which constitute Spring Village, about a mile and a half or two miles from the central part of Winchendon.

A little lower down on Miller's River and nearer the town of Winchendon another mill has been recently built, containing one hundred and thirty looms, which is also engaged in the manufacture of the same line of cotton colored goods, and employs one hundred and ten hands. This mill, three-eighths of which are owned by Mr. White, two-eighths by Joseph N. White, two-eighths by Zadoc L. White and one-eighth by Charles D. White, is called the Glen Allan Mill, after Allan Temple White, a son of Mr. White, now living in Europe, and is managed by Charles Davis White, another son. The value of its annual product is about two hundred thousand dollars. Owing to the state of Mr. White's health he has relinquished the care of the Nelson Mill and the mill at the Central Village to his sons, Joseph N. and Zadoc L. White, under whose skillful management these industries have maintained their reputation and continued in their prosperous career.

Nor do these establishments, as extensive as they are, include all the manufacturing enterprises in which Mr. White has been engaged. In the town of Jaffrey, across the New Hampshire line, about ten miles from Winchendon, two other mills are engaged, under the management of Joseph N. and Zadoc L. White, in the manufacture of the same class of goods, employing two hundred and fifty hands and yielding a product of half a million dollars.

Mr. White married, December 15, 1847, Julia Davis, daughter of Zadoc Long, of Buckfield, Maine, and had Julia Matilda, born June 15, 1849; Joseph N., born October 4, 1851; Zadoc Long, born December 29, 1854; Percival Bartlett, born December 25, 1857; Allan Temple, born June 27, 1860; Charles Davis, born November 12, 1862, and Nellie, born April 8, 1873. Julia Davis Long, the wife of Mr. White, who died October 31, 1882, was the oldest sister of John Davis Long, ex-Governor of the Commonwealth and the present Representative in Congress from the Second Congressional District. Her father, who married Julia Temple Davis, daughter of Simon Davis, of West Boylston, and half-sister of Matilda, the wife of Joseph White, received his name from his grandfather, Zadoc Churchill, of Plymouth, a descendant from Governor Bradford of the *Mayflower*, the second Governor of the old colony.

*Ira Russell*

Mrs. White "was an accomplished woman, of rare character and worth; her life, which was somewhat retired, was devoted to the happiness and culture of her family and bore fruit in a pure and delightful home. Her manners were dignified and she impressed those who met her with a sense of the most genuine womanliness. It was, however, in the inner circle of her near relatives and friends that her exquisite qualities found full expression—her tenderness of heart, her regard for others, especially for those in need or sorrow, her unselfish and thoughtful kindness and that nameless loftiness of spirit which, respecting itself and respecting others, is superior to the pettishness of the meaner ranges of thought and conduct." Thus spoke one after her death who knew her well and had the best opportunities for estimating and appreciating her character.

Notwithstanding the magnitude of the enterprises in which Mr. White has been engaged, he has found time to respond to the demands of the community in which he has lived since he reached the years of manhood, for the display of his good judgment and the bestowment of his service in its behalf. The town, the church of which he is a member, the political party to whose principles he has long been devoted, the financial institutions with which he has been connected and the projects of a more public nature with which he has been identified, are ready witnesses of his wisdom, integrity and conscientious fidelity to trusts confided to him. Directorships in the Boston, Barre and Gardner Railroad and in the Winchendon National Bank, the vice-presidency of the Winchendon Savings Bank, and a seat in the House of Representatives, are among the positions which he holds or has held with credit to himself and with usefulness to his constituents.

Mr. White is a typical representative of a class of men who have made the manufacturing interests of New England conspicuous and successful. His grasp of business enterprises has been comprehensive. He has exhibited a genius for securing the largest manufactured product with the greatest economy in its production. He has himself invented some of his labor-saving appliances. His career is identified with the history of the town in which he has lived so many years, and of the prosperity and growth of which he is recognized as one of the foremost promoters. He is everywhere recognized as a man of liberal and progressive spirit, alive to the progress of the age and open to its advance in all the realms of modern thought and growth. He has a large circle of attached friends, to whom he is endeared by his pleasant manners and his kindly and social nature. Enjoying now, at three-score years and ten, the rewards of an industrious, successful and honorable life, living in the home of his life-work, surrounded by his children and children's children, all provided with abundant store, listening to the hum of the wheels and spindles which he set in motion, witnessing the continued ex-

pansion and prosperity of the business he founded and the activities of a village population to whom he has given employment, he presents a rare picture of the ripe years of a felicitous life.

#### DR. IRA RUSSELL.

Among the varied industries of Winchendon there is one which is quite outside of its ordinary business, but which is deserving of extended notice. We refer to

THE HIGHLANDS—(a Family Home for the Treatment of Nervous and Mental Diseases).<sup>1</sup>—In 1875, Dr. Ira Russell put in successful operation an idea which had been developing in his mind for many years. Quite original with him, it has proven a radical and valuable change in the care of insane and nervous patients. He planned to care for and treat such diseases in a home, with the associations of family life thrown about them, and every possible distasteful feature of sickness removed. How well he succeeded is gladly testified by many patients restored to health and happiness by his kindly and paternal care.

Dr. Russell, whose face on another page shows the strong nature of the man, was born in Rindge, N. H., November 9, 1814, and died at Winchendon, December 19, 1888, at the age of seventy-four years. He was the son of Eliakim and Sarah (Converse) Russell, of English and Huguenot descent. Very early in boyhood he was obliged to make his own way in the world, and with great self-denial and perseverance sought for and won his education. He graduated from Dartmouth College in 1841, and began the study of medicine under the direction of Dr. Dixi Crosby, of Hanover, N. H., and with Dr. Abell, of Rindge, and Dr. Alvah Godding, of Winchendon, Mass. He attended medical lectures in New York, and graduated from the University of New York City in 1844. He had received the appointment of district physician to the famous New York Hospital, where he had opportunities for large experience. He was among the very first to study and use the stethoscope, and indeed, in after-life, he was always in the van of medical progress. This was peculiarly shown by his going to New York and spending several months in the study of the microscope, when he was nearly sixty years of age.

He entered private practice in Winchendon, Mass., where, April 24, 1844, he married Rowena Greenwood, daughter of Henry and Sarah (Woodbury) Greenwood; she died in 1875. At first associated with Dr. Godding, and later on by himself, he practised for nine years with a constantly widening circle of friends, whom he served with unwearied devotion and energy. In 1853 he was invited by a committee of citizens to remove to Natick, where he soon took a leading position, and had an extensive and pleasant practice. In 1861 he could no longer

<sup>1</sup> For references, terms and confidential correspondence, address Dr. Frederick W. Russell, Winchendon.

THE HIGHLANDS.

control his desire for a more active participation in the great conflict, and he entered the army, by personal request of Surgeon-General Dale, as surgeon of the Eleventh Regiment Massachusetts Volunteers, Colonel Blaisdell commanding—a body of citizen soldiery which won an enviable reputation in “Fighting Joe Hooker’s” command.

Soon after the battles about Yorktown he was promoted to surgeon United States Volunteers, and assigned to duty in Hooker’s division. His executive ability attracted attention, and he was next ordered to Baltimore, to organize the Stuart Mansion Hospital, of which he remained in charge until November, 1862. He was then ordered to St. Louis, to equip the Lawson Hospital. In December he was appointed medical director of Northwest Arkansas; while here he had charge of the wounded men after the battle of Prairie Grove, and forwarded to Washington a report more complete than that of any other battle during the entire war. In February, 1863, he was put in charge of the general and post hospitals at Benton Barracks, St. Louis, Mo., which under his administration became one of the very largest hospitals of the war. While on duty at St. Louis he was a prominent figure in the benevolent and official life of the city, and made troops of friends. In December, 1864, he was placed on the staff of General Thomas, and organized the Wilson General Hospital for colored troops, at Nashville, Tenn. Here he did a great amount of scientific work, which has secured a permanent place in medical literature. At the close of the war he was breveted lieutenant-colonel for long and meritorious services; he then spent a year in the service of the United States Sanitary Commission in extensive travel and research in the line of his profession.

In 1867 he returned to Winchendon, where he entered into practice with the enthusiasm of a younger

man. In 1875 he entered upon the crowning work of his eventful life—his long-cherished idea of a family home for mental diseases—the first of its kind in this country: an idea which came at once into remarkable public favor. He devoted himself to this work for many years, and died in harness, the hero of many a hard-fought battle with disease, displaying wonderful courage to the very last moment of his life.

Dr. Russell was a man of sturdy and powerful frame, of great vigor of mind, and of almost unique devotion to his patients.

In 1876 he married Josephine A. Lees, who survives him. He left two children,—Dr. Frederick W. Russell, for many years his associate in practice and now superintendant of the Highlands, and Mrs. S. J. Walcott, wife of E. H. Walcott, well known in newspaper work. The following description will further explain the character of the Highlands, and the system by which it is carried on:

The Highlands was established by Dr. Ira Russell in 1875 for the treatment of nervous and mental diseases, the opium habit and inebriety. It is conducted like a home, where the principles of family life, non-restraint and open air are carried to the greatest possible extent. The home is not an institution or asylum, and there is no suggestion of sickness or gloom whatever about the buildings.

Each patient, when necessary, is provided with a companion. All male attendants, usually medical students, are obliged to be total abstainers from tobacco and alcohol and of gentlemanly deportment, while young American women of intelligence are the companions of lady patients. The utmost possible liberty is permitted under suitable guardianship to every patient, and each one is regarded and treated as a member of a private family.

The Highlands, so-called, is a pleasant mansion

*Orlando Mason*

with cottages annexed, situated in the midst of ample grounds, on an eminence overlooking the town of Winchendon and the valley of Miller's River. From the windows a superb range of hills and mountains can be seen, reaching from Wachusett in the south-east to Monadnock in the northwest.

A piano-room, billiard-room, bowling saloon, croquet and tennis courts and ample stabling are on the grounds. The drives in the vicinity are considered delightful, and for healthfulness of location the Highlands is unsurpassed.

A farm, with exceptionally pleasant surroundings, and farm-house fitted with closet and bath-room appliances with hot and cold water, is used to give suitable patients an outing as often as possible.

#### ORLANDO MASON.

The first American ancestor of Orlando Mason, the subject of this sketch, was Capt. Hugh Mason, who came to New England in 1634 and settled in Watertown. He was conspicuous in town affairs, and in 1653 received the commission which gave him his title. He was a representative from Watertown in the General Court of the Massachusetts Colony for ten years, and died in 1678. By a wife Esther he had a son Joseph, who was born June 10, 1644, and married Mary Fiske. Joseph had a son Joseph, who was born October 2, 1688, and married Mary Monk. Benjamin Mason, a son of the last Joseph, was born July 14, 1717, and married Martha Fairbanks. He removed to Dublin, New Hampshire, about 1764, and Bela, one of his children, was born in Dublin, October 1st, in that year. Another son of Benjamin, bearing his father's name, two years older than Bela, was a drummer boy at the battle of Bunker Hill. Bela Mason married Sarah Norcross, and had four sons and three daughters. Capt. Rufus Mason, the oldest son of Bela, was born at Dublin, N. H., May 16, 1788, and when still a boy removed to Sullivan, in the same State, where he became a successful farmer and married, June 1, 1815, Prudence Woods. At a time when herds and flocks were more abundant in New England than in these later years he raised many cattle and counted his sheep by the hundreds. He held for several years the offices of selectman and assessor, and for two years represented his adopted town in the Legislature. He died in Winchendon, December 4, 1873.

Orlando Mason, the subject of this sketch, was the son of Rufus, and was born in Sullivan, N. H., June 3, 1824. He was educated in the public schools of his native town and at the academy in Thetford, Vermont. After leaving the academy he taught school in Nelson, N. H., and thus, by the performance of his duties as a teacher, not only nourished the seeds of knowledge which he had planted as a pupil, but gave them better opportunities for germination and growth. On the 4th of March, 1844, he removed to Winchendon, and

entered the wooden-ware manufacturing establishment of E. Murdock, Jr., with whom he remained nine years, six years in the factory and three years in the office. On his retirement from the office of Mr. Murdock, to begin business on his own account, his employer, in token of his appreciation of the industry and fidelity which Mr. Mason had displayed, authorized him to draw on him at sight for the sum of two thousand dollars, if ever it might be required in the exigencies of the business upon which he was entering. The offer of such substantial aid was as creditable to the liberality of Mr. Murdock as the fact that advantage was never taken of it by Mr. Mason was to the spirit of independence and high sense of honor of Mr. Mason.

Mr. Mason began the manufacture of wooden-ware in 1853, purchasing one-half interest with Ephraim Kendall, and carrying on the business under the firm-name of Kendall & Mason. In 1863, Mr. Kendall sold his interest to Mr. Mason, and the latter became the sole proprietor, continuing his business alone up to the present time; in later years, since 1869, his son, Dwight L. Mason, assisting him. His mill is on Miller's River, near the centre of the central village of Winchendon. His goods bear the best reputation and find their way to the markets of both the Old and New Worlds.

But Mr. Mason, though an active and zealous business man, has found time to take part in various movements and enterprises calculated to promote the religious, moral, social and industrial welfare of the community. He has served at various times as selectman and overseer of the poor, and in 1871 represented Winchendon in the General Court. He took an active part in organizing the Winchendon Savings Bank in 1854, and while since its incorporation, he has been a member of its board of investment, during the last ten years he has been its president. He was also efficient in the organization of the First National Bank in Winchendon, in 1864, and since that time has been a member of its board of directors. His appointment on various town committees illustrates the confidence of his fellow-citizens in his sagacity and prudence and judgment. On the committees to secure volunteers during the war; to select a suitable tract of land for a cemetery; to recommend a proper site for a High School building, to oppose the division of Worcester County, and to consider the subject of town water-works, his business methods and wise council were duly appreciated by the town.

In more limited fields of usefulness he has been no less efficient. As chairman of the Republican Town Committee for many years, as superintendent of the Congregational Sunday-school for twenty-two years, as trustee of the Cushing Academy and a director in the Fitchburg Mutual Fire Insurance Company, his services have been in request as long as he was willing to render them.

Such a record as is here displayed renders it an easy task to form a correct estimate of the character of the man. He is such a man as every town seeking its highest and best development, guiding the footsteps of its youth, guarding the financial interests of its people, looking to progress without extravagance and respecting economy without the taint of parsimony, should possess.

Mr. Mason married, February 13, 1851, Jane S. Fifield, whose son, Dwight L. Mason, was born August 10, 1852. Twin daughters were also born June 26, 1858, one of whom died on the day of its birth and was buried with its mother, and the other at the age of five years. Dwight L. Mason graduated at the Highland Military Academy in 1869, and since that time has been engaged in business with his father.

Mr. Mason married a second wife, Calista Streeter, November 17, 1859, whose children have been Marcus Marvin and Mabel Murdock, both born October 7, 1861. Marcus Marvin Mason graduated at Amherst College in 1883, and since 1884 has occupied responsible positions in connection with stock-raising associations in Wyoming Territory, with a central office in Cheyenne. Mabel Murdock Mason, after finishing her education at Mt. Holyoke Seminary, engaged for several years in the occupation of teacher in Lawrence, Massachusetts.

Mr. Mason is still in active business, with a career of usefulness, should his health be spared, far from finished.

#### WILLIAM WEBSTER WHITNEY.

William Webster Whitney is descended from John Whitney, who came, a boy of eleven years, from England in 1635, in the *Elizabeth and Anne*, and settled with his father and mother, and four younger brothers, in Watertown. William Whitney, the great-grandson of John, was born in Weston April 10, 1736, and settled in Winchendon in 1774. He married, June 14, 1762, Mary Mansfield, of Weston, and had seven children,—William, Phineas, Mary, Joseph, Amasa, Sally and Luke,—and died July 10, 1817. He was a soldier in the company of Captain Moses Hale and regiment of Colonel Nathan Sparhawk, which marched from Winchendon to Cambridge at the outbreak of the Revolution in 1775.

Amasa Whitney, son of William, was born June 16, 1777, and married, in December, 1802, Mary, daughter of Daniel Goodridge, and died February 2, 1852. His children were,—Webster, born in Winchendon October 6, 1803; Amasa, April 24, 1806, who married Mary, daughter of Ephraim Murdock; Harriet, January 27, 1811, who married C. C. Pierce; William Lowe, March 24, 1815; Baxter Dodridge, June 28, 1817, who married Sarah Jane, daughter of Richard Whitney; Mary Goodridge, August 2, 1819, who married William, son of Ephraim Murdock; and John Milton, December 18, 1826.

Webster Whitney, son of Amasa, born as above, married, March 16, 1828, Eliza Parks, daughter of Colonel Joseph Whitman, of Lincoln, and had Eliza Caroline, born June 16, 1830, who married William Beaman; William Webster, the subject of this sketch; and Lucy Ellen, born October 21, 1834, who married Archus S. Kimball.

William Webster Whitney was born in Winchendon May 5, 1833. He attended the public schools of that town, and Phillips Academy at Andover. At the age of eighteen he began an apprenticeship with Captain Ephraim Murdock, an extensive manufacturer of wooden-ware, and remained with him until he was twenty-seven. He then went into partnership with his father-in-law, Elisha Murdock, a brother of Ephraim, in the same business at Waterville, under the firm-name of E. Murdock & Co. In 1862 Mr. Murdock retired from the partnership on account of ill-health, and died in 1870. Under the same title Mr. Whitney formed a partnership with his cousin, James Alfred Whitman, son of Ephraim Parks Whitman, which continued seventeen years, until 1879. During the next five years he carried on the business alone, and in 1884 took his son Elisha Murdock Whitney into partnership, still retaining the old firm-name of E. Murdock & Co.

The business originally established by Mr. Elisha Murdock, always successful, has, in the hands of Mr. Whitney, gradually extended, until his establishment is now not only the oldest, but has been for the last ten years the most extensive wooden-ware manufactory in the country. He married, January 22, 1857, Sophia Morse, daughter of his old partner, Elisha Murdock, and has one son, Elisha Murdock Whitney, who is his present partner.

Concerning this young man, the son of Mr. Whitney, the interesting fact may be stated that his three great-grandfathers—Amasa Whitney, Ephraim Murdock and Isaac Morse—who were three of the most prominent men in Winchendon from 1800 to 1825, lie buried side by side in adjoining lots in the old cemetery of the town.

From the first step taken by Mr. Whitney in his business life he has devoted himself unremittingly to the enterprises with which he has been connected, and to his industry, supplemented and reinforced by a good education, a marked intelligence, a sensitive honor and an indomitable will, his success has been due. Though avoiding and refusing public office, he has never been inattentive to the wants of his native town, and any project calculated to promote its interests he has pushed with energy and zeal. With the extension of the Ware River Railroad from Gilbertville, in Hardwick, to Winchendon, he was especially identified, and from the time that extension was projected he has been a director of the road. Since its practical purchase by the Boston and Albany Railroad corporation, when it became the Ware River Branch of that company, his early efforts in its

Wm H Whitney

*Miller P. Clark.*

behalf, and his high business character, have been recognized by continued re-elections to a directorship. He is also one of the trustees of the Winchendon Savings Bank, and an active member of the Unitarian Society, to which he has been a liberal benefactor, and of the executive committees of which he was for twenty years a member. Elisha Murdock, his father-in-law, was the pioneer of Unitarianism in Winchendon, and in later years his interest in the society was largely shared by his brother Ephraim.

Mr. Whitney is a man of marked presence, and with his genial social traits and broad views on the questions of the day, together with good conversational powers, he cannot fail to impress a stranger as a leader among men, possessing the brain to conceive and the ability to execute enterprises which men of less ardent and less hopeful temperament would consider impracticable, if not impossible. He is now in the prime of life, strong in body and mind, with a probable future before him of continued prosperity and usefulness.

#### W. P. CLARK.<sup>1</sup>

Wilder P. Clark, of Winchendon, was born in Chesterfield, N. H., October 12, 1832. His father, Joseph Clark, a son of Solomon Clark, of Chesterfield, and a grandson of Jonas Clark, of Petersham, Mass., married Fanny Gary, who died February 27, 1817, leaving two children; he married, second, Polly Kneeland, who died May 7, 1850, leaving six children; he died July 25, 1852, aged nearly sixty years. He was an industrious man and a good citizen. A prominent member of the Methodist Church, class leader and superintendent of the Sabbath-school, his life was a consistent expression of his religious convictions and professions. For many years he was an earnest and intelligent advocate of the cause of temperance, and frequently spoke in public from the standpoint of a man who never drank liquor at a public bar, which was an unusually conspicuous record for his time. His kindness was extended to all, and he never grew weary in his efforts for the good of his fellow-men.

John Kneeland, Esq., the maternal grandfather of the subject of this sketch, a son of Timothy Kneeland, was born in the southeast part of Winchendon (now Gardner), and in early manhood removed to Chesterfield. He was a man of marked ability, a selectman sixteen years, a representative several years and, living to an advanced age, he continued to exercise a commanding influence in town and State affairs.

The early experience and training of Mr. Clark were those common to the lot of many successful men who have been reared in the country homes of New England. Attending the public schools of his native town, and supplementing a brief primary

course by a few terms at the academy, his school advantages were measured more by industry and application than by months or years of study.

At sixteen years of age young Clark began the battle of life. In the autumn of 1848 he found employment in the store of B. L. Marsh & Co., on Hanover Street, Boston, where he remained four years. In the mean time Mr. Marsh retired from the firm, and, in connection with Eben D. Jordan, founded the well-known house of Jordan, Marsh & Co. In this employment he was eminently successful, and enjoyed the esteem and confidence of his employers and his associates.

In 1852 the engagement was terminated by severe sickness, and, after a residence in Texas of a year he returned to the scenes of his first successful effort in mercantile pursuits. From 1853 to 1857 he was a salesman in the employ of Porter & Lawrence and of Locke, Hall & Co., dry-goods houses, on Hanover Street. In 1857 Mr. Clark made his first essay in business on his own account. He bought, and soon sold, with apparent advantage, a stock of goods on Hanover Street, and while contemplating the employment of his modest capital in future business, he saw it melt away, in the failure of his purchaser to meet the notes given in exchange for the stock of goods. In the common usage of the term Mr. Clark did not fail, and no creditors attended him in misfortune. He simply lost of the fruit of his early labor and the rewards of a few years of self-denial and industry. The career of many successful business men has been prefaced by misfortune, and it is probable that lessons of caution and prudence thus acquired have compensated the loss of capital.

In May, 1858, Mr. Clark came to Winchendon. During the ensuing three years he was in the employment of E. Murdock, Jr., wholesale dealer in and extensive manufacturer of wooden-ware. The succeeding three years he was again engaged in the dry-goods trade, and was with the firms of Wm. Locke & Co., of Portland, Me., and Hall, Dame & Co., of Boston, and in February, 1864, he returned to Winchendon, and renewed his business relations with Mr. Murdock, which were continued until 1872, when he began business in this town on his own account as a wholesale dealer in wooden-ware and manufacturers' supplies. During the preceding years of close application and efficient service, Mr. Clark had commanded a liberal salary. He commenced business in this town under favorable auspices, and from the first he has been eminently successful. For many years Winchendon has been an important centre in the sale and distribution of wooden-ware, and the business of Mr. Clark exceeds in volume that of any other dealer in this line in New England. Since 1883 he has been extensively engaged in the manufacture of tubs, pails and other lines of wooden-ware, having mills in this town and at East Swanzey, N. H.

While he has been actively and closely engaged in

<sup>1</sup> By Ezra S. Stearns.

his chosen line of business, he has accepted several positions of trust. He is a director of the Safety Fund National Bank of Fitchburg, and since 1873 he has been a trustee and one of the board of investment of the Winchendon Savings Bank. He was a member of the House of Representatives 1877-79-83, and was assigned to important committees, including those of finance and insurance. He is a Royal Arch Mason, and has been a member of Artisan Lodge, F. A. M., since its charter (1865), and has been W. M. three years.

Mr. Clark is a man of keen perception and ready judgment, and while he thinks quickly he acts cautiously. His qualities are eminently practical, and his resources are at his command. His success in business has not been the fruit of hazardous enterprise, nor the result of fortuitous circumstances. From the beginning he aims at well-defined results, and he has the force of character and executive ability to attain them. With such industry and qualities of mind he would have been equally successful in any other calling. Frank and direct in his habits of speech and conduct, his convictions are well defined and are always attended with the courage of expression. In his relations with his fellow-men, he is affable, kind and attentive to the demands of society and of friendship. The achievements of his life and the esteem of his associates, which has never been withheld, are the legitimate rewards of a commendable ambition and an honorable conduct.

In his domestic relations Mr. Clark has been fortunate and happy. He married, February 3, 1864, Mary C. Merrill, an accomplished daughter of Nathaniel and Caroline W. (Harris) Merrill, of Belfast, Maine. They have three children: Murdock Merrill, born December 9, 1867; Mary Wilder, born June 11, 1873, and Maurice Leonard, born July 13, 1875.

#### OZRO HANCOCK.

Hezekiah Hancock, the grandfather of Ozro Hancock, the subject of this sketch, lived in Templeton, and died March 24, 1828, at the age of eighty years. His wife, Martha Hancock, died December 16, 1820, at the age of sixty-six. Their children were James, Jonas, Patty Levina, Chloe, Alma, Rufus, Hezekiah, John, Artemas, Hepzibah and Olive Richardson. Rufus Hancock, son of Hezekiah, was born in Winchendon, August 21, 1780, and married Sally, daughter of Samuel Bacon, September 19, 1802. His children were Benjamin Franklin; Hannah, born in Templeton, November 25, 1803; William Martin, born in Harrisburg, Pa., March 16, 1806; Artemas, August 13, 1809, and Ozro, January 10, 1812. Rufus, the father, died April 1, 1821.

Ozro Hancock, the subject of this sketch, was born January 10, 1812, as above stated in that part of Templeton now called Baldwinsville. He attended the lower-grade schools in that town and one term

at the High School. He left school at the early age of nine years, and served an apprenticeship with Peter Pierce, of Templeton, in the business of chair-making, remaining with him until he was twenty-two years of age. After that time he worked with several different persons in the same business until 1838, when he connected himself with his cousin, Moses Hancock, son of his Uncle John, in the manufacture of pails at Waterville, on that part of Miller's River about a mile and a half below the central village of Winchendon. During his connection with his cousin, which continued two or three years, the business was carried on on leased premises. After he began business alone, about the year 1842, he built a factory of his own, and continued until 1887 in the manufacture of pail ears and fixings. In 1887 he sold or transferred his business to his son, John, who has added to his product butts and hinges and other small articles of hardware. By faithful application to business in his younger days, by strict adherence to good principles, and by frugality and skillful management, Mr. Ozro Hancock has made himself what he is, and risen from slender means to a comfortable competency. He is one of those men who, no matter what may be said about the natural depravity of man, illustrate, on the other hand, the elastic and rising tendency of human nature,—a tendency which, without direct and positive hindrances must have its way. They illustrate, too, the opportunities which the free and elevating influences of our institutions afford to the honest, faithful man to occupy a higher station in life. They increase our respect for man as a man severed from all the adventitious aids and circumstances of life. They are the most effective examples to youth,—living examples of what youth, with uncorrupted morals and a determined will, can accomplish in the race of life.

Mr. Hancock married, November 26, 1846, Sarah, a daughter of William Brooks, of Winchendon, and has two children,—John, his successor in business, who married Mary Allen, of Woburn, and Flora Jane, who married George F. Brown, of Alstead, N. H. He is a Unitarian in religion and Republican in politics, less inclined, however, to be confined within the limits of any theological creed than to rigidly adhere to the principles of his party. He is now at the age of seventy-six, in retirement from business, after sixty-seven years of work, enjoying the comforts of home and a happiness well earned.

#### MORTON E. CONVERSE.

The name of Converse is of French origin and is derived from Coigniers. An early seat of the family was in Navarre, France, from whence Roger de Coigniers emigrated to England in the eleventh century, and during the reign of William the Conqueror. To him the Bishop of Durham gave the constablership of Durham, and among his descendants Conyers, of Hord-

*Geo. Humcock*

*Morton Converse*

en, Durham, was created a baronet July 14, 1628. In the line of descent, Sir Humphrey, the eighth generation, wrote the name Coigniers, and Sir Christopher, the twelfth generation, adopted the orthography of Conyers. In Navarre, in the sixteenth century, the seat of a family of this name was styled the Chateau de Coigniers, and families bearing the name in France were Huguenots. In the massacre on Saint Bartholomew's Day, in 1572, many of the family fell victims to the rage of the Papists. Pierre Coigniers, who was attached to the court of Henry of Navarre, having witnessed the assassination of his kinsman, Admiral Coligny, escaped with his wife and two infant children to England. He settled in the County of Essex, where a son married a lady of considerable possessions in that and an adjoining county. Ralph, a son of this marriage, was created a baronet by Charles II. In time, corresponding to the pronunciation, the name became fixed as Conyers, and sometimes by the change of a single letter, as Convers. The coat of arms of Coigniers, Conyers and Converse is substantially the same.

I. Edward Convers, the emigrant ancestor, born 1589, settled in Charlestown, 1629 or 1630. In 1631 he received a grant of the ferry from Charlestown to Boston, of which, under the favor of the General Court, he had the control several years. The same year he was admitted freeman, and he was a selectman of Charlestown, 1635 to 1640. His name is first of the seven commissioners appointed by the church in Charlestown to effect the settlement of Woburn. He removed to the new town and became one of its most useful and honored citizens. He was a selectman of Woburn from 1644 until his death, and for several years one of the board of commissioners for the trial of minor causes. He was a member of the First Church, Boston, 1630, an original member of the First Church, Charlestown, 1632, and the First Church, Woburn, 1642; of the latter church he was one of the first two deacons. His homestead is now within the town of Winchester, where he died August 10, 1663. The name of his wife was Sarah, who died January 14, 1661-62; he married (2) September 9, 1662, Joanna (Corbin) Sprague, widow of Ralph Sprague. The children of Dea. Edward and Sarah Convers were James, Josiah, Samuel and Mary.

II. James Convers, born in England, 1620, came to America with his father, Dea. Edward Convers. In the records he is styled ensign. He married, October 24, 1643, Anna Long, born 1625, daughter of Robert and Elizabeth Long, of Charlestown. He lived in Woburn, where he died May 10, 1715. "Through a long life he was a very valuable and highly esteemed citizen, and was repeatedly honored by the town with the principal offices which it had to confer."

III. Major James Convers, eldest of the ten children of Ensign James Convers, was born in Woburn, October 16, 1645, and died July 8, 1706. He was prominent in military affairs, and for his gallant defence

of Storer's Garrison, in 1691, he was promoted to major. He was ten years a member of the General Court and three times elected Speaker of the House of Representatives. He married, January, 1, 1668-69, Hannah Carter, born January 19, 1650-51, daughter of Capt. John and Elizabeth Carter, of Woburn. They had nine children, four of whom died in infancy.

IV. John Convers, son of Major James Convers, was born in Woburn, August 22, 1673. He married, May 22, 1699, Abigail Sawyer, born March 17, 1679, daughter of Joshua Sawyer, of Woburn. He died in Woburn, January 6, 1707-08; his widow married, November 29, 1720, John Vinton.

V. Joshua Convers, son of John Convers, was born in Woburn, June 3, 1704. He removed to Dunstable where he married, July 31, 1729, Rachel Blanchard, born March 23, 1712, daughter of Joseph and Abiah (Hassell) Blanchard, and a sister of Joseph Blanchard, an agent of the Masonian proprietors. In 1729 he removed to Naticook (now Merrimack), N. H. He was there a prominent citizen, and was frequently elected to office. In 1744 he was drowned in the Merrimack River.

VI. Zebulon Converse, son of Joshua, was born March 21, 1744, the year his father was drowned. He married, 1773, Sarah Merriam, born October 10, 1753, daughter of Nathaniel and Olive (Wheeler) Merriam, of Bedford, Mass. Previous to the Revolution he removed to Rindge, N. H., where he died, November 10, 1805; his wife died the twenty-eighth of the same month.

VII. Joshua Converse, Esq., the fifth of the eleven children of Zebulon Converse, was born in Rindge, April 23, 1781. He was a farmer in his native town and a successful manufacturer of lumber and wooden-ware. Possessing a strong mind and manifesting an earnest solicitude for the public good, his services were frequently sought by his townsmen. He was a representative, a delegate to the Constitutional Convention of 1850, and a selectman seventeen years. He married, May 6, 1808, Polly Piper, born February 13, 1791, daughter of Thomas and Hepsibeth (Jewett) Piper, and a granddaughter of Ezekiel and Hannah (Platts) Jewett. She died February 7, 1840; he married (2) May 20, 1841, Polly Kimball, born September 25, 1789, daughter of William and Abigail (Hamlet) Kimball, of Rindge. He died November 1, 1862; his widow died September 10, 1866.

VIII. Capt. Ebenezer H. Converse, son of Joshua Converse, Esq., was born in Rindge, November 14, 1811. He resides in Rindge. He was a captain in the Sixth New Hampshire Volunteers, and was in the service in the Burnside expedition to North Carolina. He married, October 8, 1835, Sarah Darling, of Winchendon, who died July 10, 1875. The marriage ceremony was performed by Rev. Daniel O. Morton, the father of Vice-President Morton, and in his memory the subject of this sketch derives a name. Mrs. Sarah (Darling) Converse was a daughter of Jewett B. and

Hannah (Murdock) Darling, and a granddaughter of James and Deborah (Williams) Murdock, early residents of Winchendon. Captain Converse married (2) June 2, 1877, Harriet E. (Leland) Dearborn, daughter of James and Hannah (Kidder) Leland; she died July 16, 1888.

MORTON E. CONVERSE, son of Capt. Ebenezer H. Converse, and of the ninth generation in America, was born in Rindge, N. H., September 17, 1837. He pursued a stated course of study in the public schools of his native town and the academies of the vicinity, and was in business two years at Salmon Falls, N. H. In response to the first call of the President for three years' men, and joining the multitude of the loyal North, he entered the service. His regiment, the Sixth New Hampshire Volunteers, an organization of excellent reputation, was assigned to the Burnside expedition to North Carolina. In July, 1862, the regiment joined the army in Virginia and shared the dangers of the second battle of Bull Run, of Chantilly, South Mountain and Antietam. The following spring it was ordered to Mississippi to re-enforce the army under General Grant. It was engaged at Vicksburg and saw hard service, during the ensuing months, in Mississippi, Tennessee and Kentucky. Early in 1864 the regiment was returned to the Army of Virginia and participated in the battle of Cold Harbor, the memorable assault upon Petersburg and other historic engagements. In the autumn of this year he was discharged on account of expiration of the term of enlistment. While with and sharing the fortunes of the regiment, for nearly two years, he was an acting commissary of subsistence. Having escaped wounds in the service, Mr. Converse was less fortunate in the effects of exposure and the influences of climate. The ensuing two years he suffered severely from malaria and was not actively employed. In 1867 he began, at Converseville, in Rindge, the manufacture of pyroligneous acid, iron liquor, acetic acid and other products of wood acid. This business was continued successfully eight years. In 1873 he bought and refitted a mill at Converseville and engaged in the manufacture of light wooden-ware.

In September, 1878, Mr. Converse removed to Winchendon, where he has been successful in the establishment of an important industry. He formed a partnership with Orlando Mason, a prominent citizen and a successful manufacturer of Winchendon, Mass., and under the firm-name of Mason & Converse, the manufacture of toys and light wooden-ware was continued successfully until 1883. At this time the existing partnership was dissolved. Mr. Converse then formed a partnership with his uncle, Alfred C. Converse, of Chelsea, Mass., under the firm-name of Converse Toy and Woodware Co. They purchased the Monadnock Mill, a commodious and substantial building, one hundred by forty feet, three stories, and ample steam-power, situated near the railroads centering in Winchendon, and in each succeeding year the

volume of the business was largely increased. In 1887 the firm-name was changed to Morton E. Converse & Co., the parties in interest being the same, and a new mill, one hundred by forty feet, four stories high, was erected, and a new industry was added to the business. The firm, under favorable auspices, has begun the manufacture of reed and rattan chairs and reed furniture. By improved machinery and processes the firm is cutting cane for its own manufacture and for the market. Until recently wooden toys were chiefly imported from Germany. The foreign goods were made without machinery in the homes of poorly-paid laborers. At the present time the home market is mainly supplied by American manufacture, and large quantities are exported. In this industry Mr. Converse maintains a foremost rank, and has built up the largest business in this line in the world. He has been successful in the production of original designs and a succession of novelties, and many of them have been protected by patents. With each year his business has steadily increased until the firm employs one hundred and fifty hands, with a pay-roll of four thousand dollars per month. Mr. Converse has his business well in hand, and under judicious supervision in each department. He has continually maintained fraternal relations with his employes, and has ever been considerate of their rights and thoughtful of their interests. In business habits he is industrious and cautious, yet quick in discerning the tendency of the trade, and in comprehending and anticipating the demands of the market. The successful issue of his business is found in his ability to organize, and in the fertility of his mind in the production of new designs and novelties, and in inventions to meet the increasing wants of the trade.

Mr. Converse is a public-spirited citizen, active in the church and in the cause of temperance, and an earnest advocate of all that relates to the welfare of the town and the community. Every enterprise that relates to the health, the convenience or the attractiveness of the town commands his influence, and support. A man of generous impulses and of a happy temperament, he is a firm friend, and he cultivates no enmities. He is sincere, frank and honest, commanding the confidence of the business community, and the respect of his associates. He is a member of Jerusalem Commandery, Knights Templar, having been connected with the Masonic order since early manhood, and is also an active member of the Odd Fellows.

Mr. Converse married, August 19, 1869, Hattie M. Atherton, daughter of Thomas and Susan (Peacock) Atherton, of Lowell, an accomplished lady of amiable and excellent traits of mind and character. She died in Winchendon, October 28, 1886, leaving two children: Grace Atherton Converse, born November 17, 1873, and Atherton Darling Converse, born January 7, 1877.

*William Brown*

## WILLIAM BROWN (1st).

In 1813, while Winchendon was still in its infancy, there being but seven houses in the village proper at that time, Samuel Brown came from Lincoln to found here a permanent home for himself and family. He brought with him his young wife, Eunice Hagar, from Weston—one very competent to share with him the reverses of fortune in a new country. They chose the site for their home on a pleasant hill-top, at the foot of which nestles the little sheet of water known as Bullardville Pond.

Their oldest child, William Brown, was born July 15, 1820. He attended school in Winchendon, but, being of an energetic temperament, he, early in life, showed a preference for active labors. He was particularly fond of teaming, and he was employed when quite a young man, by the contractors at the time the Cheshire Railroad was being built, to team the iron rails from place to place as needed.

He was one of four children, and with them united in following the worthy example of their father and mother, which had taught them that true contentment and honor were the reward of honest labor, and not the fruits of idleness. He married, April 8, 1856, Julia A. Lovejoy, daughter of Oliver and Nancy (Ingalls) Lovejoy. Their union was blessed with three children,—Arthur L., born May 18, 1857; William H., born May 26, 1860, and Mary E., born March 6, 1868. For many years he farmed quite extensively, dealing mostly in stock.

In 1879 he began business; he purchased a mill about half a mile from his homestead, and fitted it for the manufacture of tubs and pails, employing from twelve to fifteen hands. His sons, having completed their education at Wilbraham and Worcester, joined him in his business. He kept on building and improving until the time of his death, when he had between sixty and seventy employes.

He was one of Winchendon's most enterprising and prosperous manufacturers, and he was personally active in whatever was necessary to be done in or about his large mill. Although engrossed in business, he found time to cultivate the benevolent side of his character. He was never too busy to attend to the appeals of those in his employ. The poor found in him a ready friend, not with good advice alone, but often with substantial aid. He was of very impulsive nature, quick to resent an injury, and as quick to do a generous or noble deed.

His illness was of short duration, there being no pause in his labors until about two weeks before his death, which occurred January 16, 1888. At the time of his decease he was the only surviving member of his father's family, except one, Mrs. Eunice Nash, who still resides in Winchendon. His oldest son, Arthur, married Anna L. Lovejoy; their child, Charles Tyler Brown, was born June 26, 1883. William H., his second son, married Ella L. Smith; their daughter, Bernice Irene Brown, was born July 25, 1887.

He left a large estate, much of which was made by his own ability and business sagacity. The old homestead is still kept in the Brown name, being now occupied by the third and fourth generations, a new house having been erected in 1837.

## CHAPTER CXXXIX.

## OAKHAM.

BY JESSE ALLEN.

THIS town is situated in the western part of the county of Worcester and very near the centre of the State, and bounded northerly by Barre and Rutland, easterly by Rutland and Paxton, southerly by Spencer and New Braintree, and westerly by New Braintree and Barre.

The first settlement in Worcester County was made in what is now the town of Lancaster in 1643; but it was more than seventy years after that date before the settlers had reached the "mother town of Rutland" (of which Oakham was formerly a part), and one hundred and seven years before the tide of emigration had overflowed into what is now the town of Oakham.

On the 22d of December, 1686, Joseph Trask, *alias* Pugastion, of Pennicook, Job, *alias* Pompamamay, of Natick, Simon Piticom, *alias* Wananapan, of Wamassick, Sassawannow, of Natick, and James Wiser, *alias* Qualipunit, of Natick (Indians who claimed to be lords of the soil), gave and executed a deed to Henry Willard, Joseph Rowlandson, Joseph Foster, Benjamin Willard and Cyprian Stevens, for £23, of a certain tract of land twelve miles square, the north corner of which was the "Great Mountain Wachusett." The Indian name of this tract was Naquag. The name of Rutland was given to it February 23, 1713, when this Indian deed was confirmed by the General Court. This deed, signed and acknowledged by the above-named Indians, was received April 14, 1714, and entered with the Registry of Deeds for the County of Middlesex, *liber* 16, page 511, by Samuel Phips, register. To this conveyance can be traced the titles of the present owners.

The first settlement in this tract was made in 1716, and the first male child born (in Rutland) was in 1719, for which good fortune he received one hundred acres of land.

Oakham was the southwest corner of the "twelve miles square," and, previous to its incorporation, known as "Rutland West Wing." Its surface is uneven, and the soil is of great variety. The range of hills, extending from the northeast section, through the central and southwest portion, thence into New Braintree, possess a deep, heavy, clay soil,

excellent for grass, fruit, corn and the smaller grains. While the gravelly soil of the northwest part and the sandy plains of the eastern border produce excellent crops of potatoes and all kinds of grain. At the time of its first settlement the surface was covered with vast forests principally of oak and chestnut, while many other varieties of wood and timber, such as maple, birch, ash, hemlock, pine, poplar, etc., were found in greater or less abundance.

No large streams of water are found within its borders. The small streams and brooks which water and drain its surface all have their sources within its limits, and flow either northerly to the Ware, or southerly to the Chicopee River, and by their rapid fall furnish considerable water-power the greater part of the year.

The first settlements in "Rutland West Wing" were made in the fall of 1749, when ten families from the "old town" banded together for this purpose, and united in building their log houses, all working on each one in turn. Nine were completed and occupied before winter set in, and the tenth the following spring.

The heads of these families were: James Bell, James Dean, William Harper, Robert McMane, Captain James Craige, Alexander Bothwell, Alexander McFarland, William Banks, Patrick Green and Alexander Crawford. These colonists were Scotch-Irish, from the North of Ireland, strong, courageous men. No obstacles, however great, could discourage them. Just the right kind of pioneers to subdue such a wilderness. We can hardly imagine the trials and hardships endured by these early settlers.

By the many Indian relics of stone, such as tomahawks, gouges, mortars for pulverizing corn, arrowheads, etc., found in all parts of the town, there can be no doubt that many generations of the "Red Men" had roamed over these hills and through these valleys. But, for the most part, in this section of country, they had ceased to be hostile many years previous to this date. But still many were remaining in the region, wandering around more like beggars than warriors, and were a source of continual anxiety for many years to these early settlers, who could not easily forget the stories of the atrocities committed by them only a few years before in places but a few miles distant. The country was still infested by many wild beasts. As night came on their cattle must be gathered into their rude barns, and the house doors securely fastened, and often their slumbers would be disturbed by the howlings of wolves and other animals.

A young woman started one day to walk through the dense forest, from Mr. Alexander Crawford's, in the northeast part of the settlement, to the house of his son, about three miles distant. She would pass but one house on the way. The path was traced by blazed trees. Two-thirds of the distance was accomplished in safety, when, coming suddenly into a

small clearing, what was her dismay to find herself face to face with a large bear. Although greatly terrified, her presence of mind did not leave her. She knew that an attempt to escape by flight would mean almost certain death.

Betraying no signs of fear, "she looked at the bear, and the bear looked at her." The steady gaze of the brave young woman was very soon too much for Master Bruin, who slunk away into the bushes, to the intense relief of the young lady, who completed her walk in safety.

The land was almost entirely covered with a heavy growth of wood and timber, which must be cleared off before it could be cultivated. Rocks and stumps must be gradually cleared out, roads laid out and made, buildings constructed and many other obstacles overcome.

However, in spite of all discouragements, the number of settlers was largely increased during the next nine years by the arrival of other families.

The "West Wing" had been laid out previous to its settlement, by the proprietors of Rutland, into fifty-two lots, of about two hundred and fifty acres each.

As the population increased, very soon the need of better advantages for educating their children, and for the support of preaching in their midst began to be felt. December 29, 1758, a petition, signed by twenty-four persons, was sent to the Colonial Government, praying that they be incorporated into a precinct.

In response to this petition, an act was passed "incorporating the inhabitants of the West Wing of Rutland into a precinct, with all the rights, privileges and immunities which, by law, precincts had been vested with."

The records of the town commence at this date. The first precinct meeting was held at the house of Lieutenant Alexander Bothwell March 6, 1759, for the purpose of choosing precinct officers. Colonel John Murray, of Rutland, was chosen moderator.

On the first page of the records, in May of the same year, it was voted "to raise *teen pounds* by tax to *Repair Hyways*. Also to tax the *inhabiteence teen pounds* to support *pritching* this present year, and that the meeting be kept the first Sabbath at the house of Captain James Craige, y<sup>e</sup> 2 day at Alexander *Crawford's*, y<sup>e</sup> 3 at *Left*. Bothwell's, y<sup>e</sup> 4 at Patrick Green's, and so. the other four days accordingly." Action was taken a few weeks later respecting a burying-ground, and three acres were set apart for that purpose, including the present ground near the church. At the same meeting it was voted "to pay Thomas Harmon for finding the *Senter* of the Precinct." Also "to pay the *Chane men thare Charges*." The benefits received by the people in becoming a separate precinct soon created an earnest desire to become entirely separated from the "Mother Town," and thus enjoy all the privileges and advantages of an independent municipality.

Only three years after having become a separate precinct at a meeting held April 16, 1762, it was voted "to petition the General Court to be incorporated as a separate town," and on the 11th day of June, 1762, was passed "an act for erecting the West Precinct of Rutland into a district by the name of Oakham."

The town was called Oakham, probably from a town of the same name in England. Perhaps, also, the fact that the tree found in the greatest abundance in her forests was the "sturdy oak" had something to do in determining the name of the new town, as it could with the greatest propriety be called, as the name signifies, "the home of the oak."

The first town-meeting was held at the house of Capt. James Craige, who lived in the north part of the town, in what is now the village of Coldbrook Springs, on Tuesday, the 22d day of June, 1762. The warrant was issued by John Murray, Esq., of Rutland (in after-years famous for his loyalty to Great Britain), "In the second year of his Majesty's reign, King George the Third." The following town officers were chosen: Clerk, George Harper; Selectmen and Assessors, James Craige, George Harper and Jonathan Bullard; Constable, James Dean; Treasurer, Arthur Forbes; Warden, James Bell; Surveyors of Highways, Joseph Craige, Arthur Forbes and Alexander McFarland; Tithingman, Solomon Parmenter.

At a meeting held soon after, George Dunn and John Crawford were chosen "hog reves," also, Samuel Boyd and William Harper, "deer reves."

From an item found in a list of bills to be paid by the town, the following year, doubtless the occasion of the first town-meeting was celebrated in a "proper and becoming manner," for the following bill was presented by Capt. Craige, at whose house the meeting was held:

An account of Charges Being upon town Buensies June 8<sup>th</sup> 22<sup>d</sup>, 1762, to 7 Diners and 12 Bolls of punch for Col. Murray, £1 5s. 0d.

It certainly must have been a day of rejoicing to the first settlers, who had lived to see the infant settlement of 1749 become in the short period of thirteen years a prosperous and independent town.

The new town of Oakham continued to increase in population and prosperity till the trying days of the Revolution.

**ECCLESIASTICAL.**—The religious history of the town may be said to have begun with its first settlement. There can be little doubt that the early settlers of Oakham, if not strictly religious men, were under the influence of religious training and Puritan ideas. In their petition sent to the Colonial Government, nine years after the first settlement, to be set off as a separate precinct, the reason made the most prominent that the petition ought to be granted was "That y<sup>e</sup> greater of us live at a very great Distance from the places of *Public Worship*, both in Old and New Rutland. That we are not in a *Capacity* of Ourselves to raise any sum of money in order to hire

*Preaching* among us, as we are neither a *Propriety*, *Town District*, nor *Parrish*."

It is probable that up to this date they went to church on the Sabbath to West Rutland, where was a Presbyterian Church, formed by certain persons of that faith, who had seceded from the Rutland Centre Congregational Church, where Thomas Frink was pastor, or perhaps to the centre church of Rutland.

As soon, however, as they were formed into a separate precinct, they had preaching at their own private houses for two or three months in the year. This plan was continued for about two years. On April 14, 1761, it was voted "to build a Meeting-house at the *Santer*, or next convenient place." It was to be forty-six feet in length and thirty-six in width. Instead of erecting an entirely new building, however, the old Presbyterian meeting-house of West Rutland was bought, taken down and removed to Oakham Centre, in the fall of the same year, and placed a little to the south and east of where the present building stands.

This house was finished in a very gradual manner. In the fall of 1763 the floor was laid and windows glazed, and votes were passed in reference to some of the finishing, occasionally, for many years.

It was lathed and plastered in 1785, previous to which time there were only rough boards and beams.

The pew ground was sold in 1766, the first seven choices at £4 each. Each man was to build his own pew, "finishing it in the same fashion as the town pew," for the use of the minister. The pews were nearly square, with seats on three sides, except room for a door. Chairs or a short settee were sometimes placed in the pews.

There was a gallery on three sides; one-half, to a bar in the middle of the front one, was for men; the other for women; each with a separate entrance.

It had no steeple. After it was lathed and plastered, in 1785, the beams were left unenclosed, but were hewn close and painted. This building was used for more than fifty years, when, in 1814, it gave place to the present meeting-house. The history of the town and church for the first fifty years is one.

The town was the parish. The minister was paid by a tax upon all the property. It built and owned the meeting-house, and the selectmen were often the committee to supply the pulpit. Church interests and the qualifications of ministers were subjects often warmly discussed in town-meeting.

A Presbyterian Church of about thirty members was organized August 28, 1766. There is a tradition that, owing to the questionable habits of some of the proposed members, considerable difficulty was experienced in organizing the church. Objections were made to some that they sometimes drank too freely, to others that their language sometimes bordered too closely upon profanity. At last a certain Scotchman exclaimed, "*Weel*, if the *Laard* wants a church in *Oakham* he must tak' them *such as they be*."

The first minister ever settled in Oakham was the Rev. John Strickland. He was installed over the Presbyterian Church, probably at its organization, and was the first minister settled in Oakham and the only one under the Presbyterian form of government. The town voted him £133 6s. 8d. for a settlement, and for a salary £60 the first year, £63 6s. 8d. the second year, and £66 13s. 4d. annually thereafter, so long as he should remain their minister. He was born probably in Hadley, in 1739, was a graduate of Yale College, class of 1761, and at the time of his settlement was twenty-seven years of age. Doubtless this was his first settlement.

Mr. Strickland's ministry was troubled by contentions concerning church government, which resulted in a change of government and minister. Nearly all the original settlers were Irish Presbyterians. But as the new town increased in population the Congregational element soon became the majority. Most of the neighboring churches were Congregational. In the latter part of 1772 a vote was passed "that the Church be Congregational," but it was not formally organized by a council till June 23, 1773. Accordingly, Mr. Strickland was compelled to send in his resignation, which he did at a town-meeting held June 2, 1773, in the following terms:

*To the gentlemen, Committee, &c.*

GENTLEMEN:

Upon a mature and deliberate consideration of the difficulties that have long subsisted in this Society, it appears evidently to me that it is forever impossible that I should be either useful or comfortable as a minister of this parish. Am therefore willing to save the trouble of a Council or Councils by asking a dismission from this charge, in case we can come to an agreement that may be satisfactory on both sides.

You must be sensible, gentlemen, that it is probable that a dismission will be greatly detrimental to me.

You then, as you profess to be friendly, and discover an unwillingness to do me any damage, do that which is just and reasonable and christian.

Wishing you and the Society harmony, prosperity and happiness, I subscribe myself, gentlemen, your friend, well-wisher and humble servant,

JOHN STRICKLAND, JR.

In reply, the town also showed how it would be detrimental to their interests as well as his, it costing something in those days to settle a minister, when it was understood that quite a large sum must be given the new minister at his installation as a settlement. They, however, granted his dismission, with the liberty to supply the pulpit for six months, half of the time, "not being missing a supply more than two or three Sabbaths at a time or together, if you can help it, and let us know seasonably when we are to have a supply and when not." For this service he was to have the whole pay for the six months, at the same rate as his salary had been previously. This was dated the same date as his communication, and he agreeing to it, was dismissed June 2, 1773. No records of the Presbyterian Church, as a church, are extant so far as known.

Mr. Strickland was married, October 29, 1767, to Patty Stone, daughter of Captain Isaac Stone, of

Oakham. After his dismission he was settled in Hudson, N. H., July 13, 1774, and dismissed from that place October 24, 1792. He was settled again in Turner and Andover, Me., where he died, October 4, 1823, aged eighty-four.

James Dean and Thomas White were the deacons of the Presbyterian Church.

*Congregational.*—December 24, 1772, it was voted "by the supporters of the Gospel and the town to be under the Congregational government or constitution, agreeably to the government of the neighboring churches." A council was called, which was to meet on the second Wednesday in January, 1773, but, for some reasons it was deferred till Wednesday, June 23, 1773, when the present Congregational Church was organized.

The council convened, consisting of pastors and delegates from four churches, viz.: First Church in Sutton, Rev. Mr. Hall, pastor; First Church in Barre, Rev. Josiah Dana, pastor; First Church in Rutland, Rev. Joseph Buckminster; Second Church in Shrewsbury.

Rev. Mr. Hall was chosen moderator of the council and Rev. J. Dana scribe and standing moderator of the church, which position he continued to occupy till May, 1779. An "Incorporating Covenant" was brought before the council, signed by sixteen men (afterwards by fifteen more), which was accepted, and after suitable examination of the applicants the church was incorporated with little other ceremony. No names of women are appended to this document, though they must afterwards have become members of the new church, and if, in the usual proportion of two females to one male, the early church must have numbered between eighty and ninety members. The following are the names of the first signers to the covenant: James Craige, Isaac Stone, Asa Partridge, Edward Partridge, Asahel Clapp, James Brown, Benjamin Joslyn, Jonathan Bullard, Jesse Allen, Alexander Willson, Jabez Fuller, Ebenezer Woodis, Isaiah Parmenter, Samuel Metcalf, Lemuel Ashley, John Brown, sixteen.

The following signed soon after: Joseph Felton, Edward Partridge, Jr., Ichabod Packard, Jonathan Fitts, Isaac Stone, Jr., Joseph Chaddock, James Hunter, James Blair, Asa Briggs, Eleazer Spooner, John Bellknap, Isaac Tower, Samuel Davis, Joseph Osborn, John Stratten,—total, thirty-one.

Two deacons were elected the next month after the formation of the church—Jonathan Bullard and Jesse Allen.

They did not signify their acceptance of the office at once, but at a meeting of the church, three years afterward, Mr. Bullard declined to accept the position, and Jonathan Fitts was chosen in his place. Mr. Allen accepted, and continued in office to the time of his death, forty-three years afterward. The church had no settled pastor for thirteen years after its organization.

The times were very unsettled. The trying days of the "Revolution" were upon them. Everything was in a troubled state, ever unfavorable to religion. But they had preaching most of the time, and the committee were instructed to hire such men as would be likely to settle. The currency was very variable. July 3, 1778, Rev. Baruch Beckwith received a call to settle over the church. The town offered him £150 for a settlement, £50 to be the annual salary for three years, and ever after £66 13s. 4d. annually, this latter sum to vary more or less in proportion, as good merchantable Indian corn brings 3s. per bushel; rye, 4s.; best quality of pork, 4d. per pound; and best grass fed beef, 3d. per pound. Mr. Beckwith declined to accept the call. The following year a controversy arose in the town, respecting the baptism of children, whose parents were not members of the church. A meeting of the town was called to consider the matter. Finally, after much discussion, it was "voted that the town is willing to settle a minister if they can find one that is suitable. Also that they will settle a minister although he does not baptize for those who do not belong to the church. 37 for settling in that way, 24 against." The church had invited the Rev. John Davenport, who was decidedly opposed to "The Half-way Covenant," to settle with them. July 13, 1779, the town "voted to concur with the church in settling him. 26 in favor, 24 against." This meeting was adjourned to August 10th, when it was "voted to reconsider the vote of the last meeting, respecting the settling of the Rev. Mr. John Davenport." Immediately another vote was taken, and it was "voted to concur with the church in settling of the Rev. Mr. Davenport as a gospel minister. 35 in favor, 28 against." Mr. Davenport very wisely declined the invitation.

July, 1781, the town concurred with the church in calling Rev. Solomon Walcott,—34 affirmative, 13 negative. The invitation was not accepted. February 6, 1783, Rev. Daniel Farrington also received a call, which he declined to accept—50 in favor, none against. On the 3d of April, 1786, the town and church concurred in calling the Rev. Daniel Tomlinson to be the minister of the town and pastor of the church. He was offered £200 for a settlement and a salary of £60 the first year, £70 the second and £80 annually thereafter. Mr. Tomlinson accepted the call. On the 18th of May a meeting of the town was held, to make arrangements necessary for his ordination. June 22d was fixed upon as the date.

In these early days, when it was generally expected that a minister would spend his days with the people of his first charge, an ordination and installation of a new minister was an occasion of very great interest to all the town. Necessary committees were chosen by the town, one "to provide for y<sup>e</sup> Council," one "to secure y<sup>e</sup> meeting-house from being in danger of being damaged on y<sup>e</sup> day of ordination," another "to

keep order in y<sup>e</sup> meeting-house on said day of ordination, and provide seats for y<sup>e</sup> Council," and still another "to seat y<sup>e</sup> singers." Fifteen pounds were voted to defray the necessary expenses.

The following were among the council, if not the whole number: Rev. Charles Backus, Somers, Conn.; Rev. Josiah Dana, of Barre; Deacons Rice and Barber (delegates); Rev. Joseph Appleton, of North Brookfield; Deacons Adams and Haskell (delegates); Rev. Joseph Pope, of Spencer; Deacon Watson (delegate); Rev. Joseph Buckminster, of Rutland; Deacon Reed (delegate); Rev. David Bronson; Captain Woodruff (delegate); Rev. Mr. Sparhawk, Rev. Mr. Judd.

The examination of the candidate and the other exercises occupied a part of three days. Great numbers gathered from this and adjoining towns. The public exercises were held in the open air, on the green, south of the meeting-house. It may be of interest to know what were some of the necessary expenses for which the town had provided by their appropriation of fifteen pounds. Captain Isaac Stone presented a bill, which was paid by the town for entertaining the council:

	£	s.	d.
85 meals at 1s. 4d., "Licker" included.....	5	13	4
30 nights' horse-keeping at 7d.....		18	
16 lodgings at 4d.....		5	4
	6	16	8

Also voted to accept of Dea. Jesse Allin's acc<sup>ts</sup> for Wine, Lemons and so forth for the ordination of Mr. Tomlinson, £2 5s. 6d.

Some of the above items indicate the drinking customs of the times, but several members of the council and the young minister lived to see a reform of those customs, and themselves became, both by example and precept, the earnest advocates of total abstinence.

There is very little record of the early part of Mr. Tomlinson's ministry; many additions were made to the church membership, but very few names were recorded till after 1815. In the mean time the meeting-house was fast becoming old and dilapidated. The corner clap-boards were pulled off by the boys to keep tally on while playing ball. The floor-boards had become shrunken with age. With no stoves, and the cold air pouring in at many points, we cannot wonder that in winter, as the second hour of the sermon was reached, the men and boys were almost compelled to stamp their feet to keep from freezing. But the sermon went on without cessation, so long that the sun was nearly set ere the people could reach their homes. Not long after the settlement of Mr. Tomlinson the matter of building a new church began to be agitated, and in 1804 a vote was passed to erect such a building, but a disagreement arose as to where it should stand, one party wishing it on or near the site of the old building, while many others insisted that it should be built on the top of the hill, just to the west of where the parsonage now stands. Owing to this division of feeling, it was ten years

before it was built. The old house was taken down and the new one erected on the same spot. Including the porch, it was sixty feet in length by forty-five in width, and faced the south. The entire expense of the building amounted to \$6589.19; it was finished and dedicated early in 1815. In April, 1818, a bell weighing seven hundred pounds was purchased at an expense of five hundred dollars. This building, without material change, remained till 1845. In April of that year the control of the building, under certain conditions, was relinquished to fourteen men, who proceeded to remodel it. By permission of the town it was moved several rods to the west, and turned so as to face the west. The front was built out even with the porch, making the whole building sixty feet by forty-five; the posts were cut down somewhat, and the building raised, so that a hall for the use of the town, and a vestry and selectmen's-room were constructed underneath. The expense of remodeling amounted to nearly \$5,000, fifteen hundred of which was paid by the town. This building, with ordinary repairs, remains in good condition to the present time, 1889.

Rev. Daniel Tomlinson was the son of Mr. John Tomlinson, who, with two brothers, came from Derbyshire, England, and settled in Connecticut. He was born in Derby, Conn., May 20, 1759, and graduated from Yale College, and studied theology with the eminent Rev. Dr. Backus, of Somers, Conn. A small farm was bought by him just south of the church, which is still owned and occupied by two of his grandchildren. He was licensed by the New Haven Association at Bethany, September 30, 1783. Settled over the Congregational Church in Oakham June 22, 1786. His first and only pastorate. Married, November, 1786, to Miss Lucy Beard. Seven children were born to them.

He remained as sole pastor here until 1828, and as senior pastor until his death, fourteen years later, making a pastorate of fifty-six years, during which the church increased in numbers and strength. There were several powerful revivals during his ministry, in one of which ninety-five were added to the church. Of him his successor truly said: "He was a sound theologian—a man of great faith and prayer, and mighty in the Scriptures." "Father Tomlinson," as every one came to call him, lived to the good old age of eighty-three years, and, universally loved and respected, closed a life of great usefulness October 29, 1842, and was buried within the shadow of the church, which for more than fifty-six years he had faithfully served.

In 1828 the church building went into the hands of the Unitarians, they having become a majority in town, and ministers of that faith were employed to preach. The orthodox element held service for two Sabbaths in the hall of the tavern, then for about a year in the upper part of the house now owned by Mr. S. M. Sargeant.

March 5, 1829. "At a meeting of a respectable number of the inhabitants of the town of Oakham, held for the purpose at the house of Hosea W. Crawford, a society was formed under the name of "The Evangelical Congregational Society of Oakham." Seventy-four persons became members at this time. They chose a committee to select a spot of ground for a meeting-house, and to ascertain the probable expense. A spot was selected (where Deacon Jesse Allen's house now stands) and the same committee empowered to make purchases and contracts for building. But it soon becoming evident that the Unitarians would not care long to retain control of the meeting-house, the building of the new house was deferred for a time, and in December, 1830, the house afterward owned by Rev. James Kimball (and now by the church, and used as a parsonage) was built, fitted up with seats and used for worship for three years, when the old church was rented to them at a nominal rate, and finally passed into their hands with one or two restrictions.

Rev. Asa Hixon was ordained associate pastor October 7, 1829, but after preaching eleven Sabbaths his health failed, and he was obliged to discontinue his labors, though he was not formally dismissed from the pastorate till December 26, 1832. He was born in Medway, March 6, 1800; graduated at Brown University September, 1825; studied theology at Auburn, N. Y.; was licensed to preach by the Franklin Association in 1828; came to Oakham in May, 1829; was installed October 7th of the same year, but his health failing, soon after, he was granted a leave of absence for the purpose of recuperating. But a secret disease, which baffled the skill of many physicians, was preying upon him, and he was compelled to resign his charge. But the people of Oakham, by whom he was greatly beloved, hoping that he might, after a time, regain his health and strength, did not accept of his resignation until December 26, 1832.

Although he lived many years, yet he was never able to perform much labor. After leaving Oakham he spent many years in Medway, and one year in the South. He died in Medway November 16, 1862, aged sixty-two years.

Those who knew him best say that he lived a beautiful, Christian life. He was a very clear thinker and effective preacher. His successor, the Rev. James Kimball, preached his first sermon in Oakham October 5, 1832. A call was extended to him December 15th, and he was installed over the church December 26, 1832. His salary was to be five hundred dollars, payable April 1st of each year. Rev. Josiah Clark, of Rutland, preached the installation sermon.

The controversy between the Unitarian and the orthodox societies was at this time at its height, but Mr. Kimball was eminently a "peace-maker," and full of the spirit of love, and was truly the "right man in the right place." He succeeded in gathering all parties into one, so that, in a very few years, scarcely a

sign or hint remained to show that such a division ever existed in the town. Mr. Kimball was born in Bradford, Mass., October 5, 1797, united with the church at the age of thirteen, graduated at Middlebury College and Andover Theological Seminary. He labored five years as pastor of the Congregational Church in Townshend, Vt.; also two years as a city missionary in Boston. He continued pastor of the church in Oakham precisely twenty-eight years, being dismissed December 26, 1860, on account of failure of health.

On leaving Oakham he went to reside with his daughter in St. Louis, Mo., where he died March 16, 1861, in the sixty-fourth year of his age. His ministry, like that of Mr. Tomlinson, was very successful, four hundred and thirty-three being added to the church during his pastorate, and the church numbering, at the time of his resignation, two hundred and twenty-seven members.

As a Christian, he was remarkable for his consistency of character, and child-like trust in God. He did not attempt to write "great" sermons, although he was a very acceptable preacher. But as a pastor his influence cannot be over-estimated.

There were no homes in town where he was not cordially welcomed in his pastoral calls. Having been present at the formation of the "American Board of Missions," and being personally and intimately acquainted with many of the early missionaries, he early came to love the cause, and very soon imparted much of his zeal in this work to the church in Oakham, which ever since has given liberally to the support of home and foreign missions.

Being always a member of the "School Board," no child escaped his individual notice; all looked up to him as to a loving father. His influence for good over the children and youth of the town was truly remarkable.

When the news of his death reached Oakham many, even of those outside of the church, were moved to tears.

His memory will ever be cherished with the most affectionate regard by all who ever knew him.

He married, January 19, 1825, Emily, daughter of William Parker, of Dunbarton, N. H. Six children were born to them, only one of whom, Captain Wm. B. Kimball, of Enfield, is now living. Mrs. Kimball was truly a "help-meet" to her husband, aiding him in every possible way in his pastoral work, and was greatly beloved by all who knew her. After her husband's death she made her home with her son, Rev. James P. Kimball, where she died at Haydenville, Mass., October 18, 1874, aged seventy-four years.

Rev. Francis N. Peloubet, the successor of Mr. Kimball, was installed over the church December 26, 1860. Sermon by the Rev. Horace James, of Worcester.

He was born in New York City December 2, 1831; graduated at Williams College 1853, and at Bangor,

Me. Theological Seminary in 1857; labored one year with the Congregational Church in Lanesville, Mass. After a very successful pastorate of five and one-half years, having received a call to Attleboro', he resigned his work in this place, and was dismissed May 28, 1866. Mr. Peloubet is a man of great industry. His pastorate in Oakham included all the trying years of the Civil War. The value of his work in this town as a pastor, teacher in High School, also in compiling and improving the records of the church, cannot be over-estimated. He has now a national reputation as a Sunday-school worker.

Rev. Joseph C. Halliday was installed over the church October 24, 1866, remaining nearly five years. He was succeeded by Rev. Alpha Morton, of West Auburn, Me., who remained until October 12, 1880. At the age of seventy-six he is still doing good work as pastor of the Congregational Church in Paxton.

March 6, 1881, Rev. A. M. Shaw, of Clinton, N. Y., became pastor of the church, remaining one year. He was succeeded April 12, 1883, by Rev. H. A. Loring, who was acting pastor of the church about two and one-half years.

The present pastor of the church, Rev. Hartford P. Leonard, commenced his labors in this place August 1, 1886, who, with James Packard, Horace W. Lincoln and Jesse Allen, deacons, are the present officers of the church. This church, in its Presbyterian and Congregational form, is the only one that has ever existed in town, excepting a

*Methodist Church*, which was supported for a few years. Previous to 1842 various ministers of this denomination held meetings from time to time in different parts of the town. In 1842 Rev. James Shepherd, of North Brookfield, held meetings in the south part of the town and, after a time, in the centre. Quite an interest was awakened. In January, 1843, Rev. Rufus Frost moved into town from Webster, and devoted himself wholly to the work.

The first class was gathered in March of that year, some of "the chiefest of sinners," as it is recorded, having become converted. A house of worship, standing in the edge of Barre, one mile north of the village of Coldbrook Springs, was purchased by Captain James Conant and Mr. Isaac D. Rice, taken down and removed to the centre of the town, and there rebuilt. It was dedicated October 1, 1843, the sermon on the occasion being delivered by Rev. Dr. Raymond, then of Boston. The whole expense of the house and land was one thousand nine hundred and seventy-five dollars.

Rev. William Gordon was stationed here in 1843-44, the church numbering at this date sixty-one members. Rev. Joseph W. Lewis succeeded in 1845, remaining two years. Rev. John Goodwin followed in 1847 and remained two years. His successor, Rev. Benjamin King, preached here one year. Rev. Asa Barnes, of New Braintree, supplied the church in 1850, and Rev. David Culver in 1851 and a part of the following

year, when he removed from town. From 1852 to 1859 the church was connected in appointment with North Brookfield. Meetings were held in 1859 by Rev. J. Coolidge, and a new interest awakened. Rev. Rufus Gould then ministered to the people for a time. Rev. P. M. Vinton was appointed to supply in 1860, and Rev. J. L. Estey in 1861, for two years.

The last pastor of the Methodist Church, Rev. Mr. Jordan, was stationed here in 1863, for one year, at which time, the society having become greatly reduced in numbers and financial resources, was advised by the Conference to disband, which it did the following year, many of its members joining the Congregational Church.

A Sabbath-school, which has proved to be a great power for good, was organized in connection with the Congregational Church in 1818. The first superintendent, Deacon James Allen, filled that office for more than forty years. He was succeeded by Deacon James Packard for eighteen years, and he, in 1878, by Deacon Jesse Allen, the present incumbent.

EDUCATIONAL INTERESTS.—From the earliest history of the town the citizens of Oakham have provided liberally, according to their means, for the education of their children. In 1762, the year in which the town was incorporated, ten pounds was raised for "Schooling." In 1767 the town was divided into five "school-plots," which were known as the "Centre," "Southeast," "South," "Southwest" and "Northwest," and each plot was required to build a "decent school-house." The same year the town raised thirty pounds for schooling. William Oliver was paid £5 14s. in 1780 for teaching school two months in the "Senter Plot;" also £3 16s. 8d. was paid to Molly Osborn, for teaching school ten weeks in "Captain Crawford's Plot." The teachers usually "boarded around."

In 1787 Rev. Daniel Tomlinson was chosen inspector of schools, and in 1797 Dr. Spencer Field, Isaac Stone and Alpheus Stone were chosen a committee to assist the Rev. Daniel Tomlinson in "Examining School Masters and Inspecting Schools." The first school-houses were built of logs. A huge fire-place occupied nearly all of one side of the school-room, the seats and benches were of the rudest description. The school-house in use in the "Centre Plot" in the early part of this century is still remembered by persons now living. It occupied the spot where the dwelling-house of Mr. James F. Robinson stood, which was burned in January, 1886. On one side of the school-room, in the centre, was a fire-place, large enough to burn wood four feet in length. To the right of the fire-place was the entry-way, to the left was a small, dark room, with no window, known as the "dungeon," which answered the double purpose of a room for the clothes and books of the scholars; also a very convenient place of confinement, greatly dreaded, for "naughty boys and girls." The "Master's" table and chair were movable, and, on account of the "roaring fires" often built by the boys, he was

obliged, frequently, to change his position. On the side of the room opposite the fire-place were seated the scholars, the floor slanting from the back seats to the opposite side. Discipline was of the severest kind. The master, from his chair, with his long stick, could rap the heads of the little ones when out of order while a roguish boy in the back seat was often surprised by a heavy ruler or stick whizzing unpleasantly near his head.

If these *gentle* measures did not suffice, a severe flogging or thrashing generally would reclaim the offender.

This school-house gave place in 1826 to a brick building, which in after-years was converted into a dwelling-house and is now occupied by Deacon Jas. Packard.

At this date two terms of twelve weeks each were taught.

In the winter term the school was graded, all under the age of ten years being instructed by an assistant teacher in a separate room. Ten years later, in 1836, the number of scholars in this school had become so large it was thought best to build two school-houses, one about a half-mile to the west, the other about the same distance to the south of the Centre and known as the West and East Centre School Districts, and make two schools out of the Centre. From this date to 1874 eight schools were maintained in town, two other districts having been formed, known as the North and Coldbrook Districts. In 1874 the town, aided by "The Soldiers' Union" and the very generous contributions of her citizens, erected the building in the Centre known as Memorial Hall, of which the people are justly proud. It is two stories in height. In the first story are two large and very pleasant school-rooms, fitted up and furnished in the most approved style. The East and West Centre, together with the North and Southwest schools, having become greatly reduced in numbers, it was thought best to unite them in the Centre, using these new rooms, thus doing away with two schools, and providing for her children the advantages of a "Graded School." Since 1883 the town has maintained thirty weeks of school yearly throughout the town. Great interest is generally shown by the patrons of the several schools in their success, and, as a rule, those attending them prize their opportunities and acquire a good, practical education.

The amount expended for the support of schools by the town in the year ending March 1, 1888, was \$1,244.63.

In the autumn of 1833 Rev. L. S. Parker opened a select school for those wishing to pursue the "higher branches." This school was maintained nearly every year for half a century, with the very best of results. Among the early teachers, Gen. Wm. Crawford was known in all the region as a thorough instructor in all branches, being a graduate of Dartmouth College, but in managing a very difficult school his superior

could not be found. A giant in stature and strength, woe to the unlucky youth who ever attempted to resist his authority!

For more than forty years Deacon James Allen also exerted a great influence for good upon the rising generation, both as a teacher and a member of the School Committee. As early as 1800 a town library was established, which has been maintained ever since.

The number of volumes is not large, but they have been well selected and read by large numbers, especially of the youth of the place, with the very best of results.

In 1851 "The Oakham Lyceum" was organized, and in 1858, under the name of "The Franklin Literary Society," gathered in large numbers of the young men and women of the town, who derived great benefit therefrom.

**MANUFACTURING INTERESTS.**—As Oakham is emphatically one of the "hill-towns" of the county and until quite recently has not enjoyed railroad accommodations, manufacturing has not been carried on to any great extent. The great majority of her citizens are employed in agriculture.

Large quantities of lumber are annually turned out at the mills of Daniel M. Parker and David R. Dean.

Reuben J. Brooks, manufacturer of baskets, employs several hands, and carries on a successful business.

A. H. Matthews carries on the business established by his father, manufacturing plows, seed-drills and cultivators.

Stephen M. Sergeant, manufacturer of "Flavoring Extracts," from the smallest beginnings has developed a very flourishing and profitable business.

Amory J. Holden, manufacturer of "Wood Furnaces," has commenced a business which bids fair to become large and successful. Patented as late as June 21, 1887, he has already put large numbers into nearly all the adjoining towns, with the very best of results.

The manufacture of "Wire Goods" by Hon. M. O. Ayres is an industry that gives employment to quite a number of workmen for the entire year. This business has been carried on successfully for more than fifty years.

As early as 1832 the late Stephen Lincoln began the manufacture of sieves in a small way, having them drawn to Boston, sixty miles distant. His son William, before he became of age, began to develop the business, showing much mechanical skill and inventive genius.

In 1852 he received a patent on machinery for making wire dish-covers, the manufacture of which, together with sieves and other wire goods, has been carried on very successfully ever since.

**MILITARY RECORD.**—The new town of Oakham had hardly started out in her career as a separate

township ere the distant rumblings of the approaching storm of the "Revolution" began to be heard.

The early settlers were *liberty-loving* people, they or their immediate ancestors having come to the "New World" that they and their descendants might enjoy the blessings of civil and religious liberty, and any encroachment upon their rights was resisted in the most *emphatic manner*.

On the passage of the infamous "Stamp Act," in 1765, a meeting of the town was called October 15th of the same year, and a committee chosen to "draw up instructions for their Representative, John Murray, Esq., which were as follows:

Sir, we are *sensible* of the *duty* we owe to the Crown of great Britain, at the same time *cannot* but have a *sensible* feeling, not only for our selves and the province, but also for all the Colonies *here*, on account of a *Leat* Act of *parlement*, Respecting the Stamp *duty*, which we humbly *conceive*, presses hard on our *invaluable* rights and *privileges* granted us by Charter, and which tends to Distress the *Inhabitants* of this *Country*. Especially of this *providence* and are *Convinced* must End in *our* Ruin as we are by no means *able* to pay the duties Imposed in Said act, *we, therefore*, think it our *Indispensable* duty in *Justice* to *our* selves and *positively* in the most open manner, to Declare our greatest *Dissatisfaction* with the said Stamp act, and think it *Incoment* on you, by no means to *Countenance* the Same in any *measur* whatsoever, but use *youer* Utmost *Endeavors* at the *general assembly* to *oppos* it and preserve our *privileges* *Intyer*.

On the 16th day of January, 1775, the selectmen convened the inhabitants at the meeting-house "to discover their minds" upon several very important matters, among which were:

To see if they will choose a man to send to the Provincial Congress, to sit at Cambridge the first of February next, or sooner.

To see if they will choose a Committee of Inspection and give them instructions as they shall think proper; also

To see if they will agree to pay their proportion for the Continental Congress.

At this meeting it was voted "to pay the Continental Congress their proportion, and that the Treasurer advance the same, and that the amount £12 3s. 6d. be paid to the receiver appointed by Congress, and that no money be paid into his Majesty's Exchequer by the officers of this Town."

"Also voted unanimously to adhere to what they have done, as follows, to wit: Having perused the votes and proceedings of the Continental Congress, held at Philadelphia on the 5th of Sept., 1774, containing the Bill of Rights, a List of Grievances, the Association, &c., we esteem the same truly loyal and well stated, and calculated for the preservation of our invaluable rights and privileges, and therefore, to use the words of that venerable body, firmly agree and associate, under the sacred ties of virtue, honor and love of our Country, faithfully to adhere to said association in all respects."

Captain Isaac Stone was chosen a delegate to the Provincial Congress to be held at Cambridge, and instructed "to exert himself for the public good." At the same meeting a "Committee of Correspondence, Inspection and Safety" was chosen, consisting of Jesse Allen, Jonathan Bullard, Isaac Stone, Joseph Craige, Joseph Hudson, Benjamin Joslyn and Samuel

Metcalf, and were instructed to "put into execution the resolves of the Continental and Provincial Congresses as far as they are able." This committee, with certain changes of its members, was continued throughout the war. They had no *legal* authority; but still, backed up by "public opinion," their power in the community was *great*. Persons disloyal to the cause of the Colonies were to be "held and treated as outcasts—to be shunned and avoided as enemies of humanity," and yet to be closely watched, and all their actions scrutinized by the committee.

March 6, 1775, it was voted "that the Militia Company and Alarm men shall be equipt as well as possible, and meet in the field and exercise, &c., which appears to satisfy the minute-men without any pay."

April 19, 1775, news came of the battle of Lexington, and this company left forthwith for the scene of encounter, but, the alarm soon subsiding, returned home.

Previous to May 15, 1776, the town warrants always began "These are in his Majesties name, &c."

The warrant for the meeting on this day commenced "These are in the name of the Government and People of the Massachusetts Bay." At this meeting, May 21st, £4 16s. were voted for "Entrenching tools."

Also voted, without contradiction, that, if the Honorable Congress should, for the safety of the colonies, declare them independent of the Kingdom of Great Britain, that they solemnly engage, with their lives and fortunes, to support them in the measure.

This action of the town of Oakham was taken more than six weeks before the "Declaration of Independence," July 4, 1776.

In Executive Council July 17, 1776, it was ordered,—

That the "Declaration of Independence" be printed, and a copy sent to the minister of each Parish of every denomination within this State, and that they severally be required to read the same to their respective Congregations as soon as Divine Service is ended, in the afternoon on the first Lord's Day after they have received it; and after such publication thereof, to deliver the said "Declaration" to the Clerks of their several Towns or Districts, who are hereby required to record the same in their respective Town or District Books, there to remain as a perpetual Memorial thereof.

In the name and by the order of the Council.

R. DERBY, JUNR., *President*.

JOHN AVERY, *Deputy Sheriff*.

ISAAC STONE, *Town Clerk*.

A true Copy. Attest:

In compliance with the foregoing order, the "Declaration of Independence" was recorded in the town records, word for word.

September 26, 1776, the town voted "that such persons as refuse to do their part in the War are unfriendly to the States of America, and ought to be so esteemed and dealt with."

The patriots of 1776 were "intensely in earnest," and such a vote, backed up by public sentiment, meant a great deal to the "Tories" of those days.

The population of the town, by the census of 1776, numbered five hundred and ninety-eight.

The town sent one hundred and forty men into the Revolutionary Army. It would seem that nearly every man in the town liable to military duty must have served in the war. The terms of service varied from two and one-half months to five and one-half years, the average being nearly one year.

The following is a list of names of soldiers engaged in the different campaigns of the Revolution:

George Black, lieutenant.	Daniel Deland, Jr.
Stewart Black, ensign.	George Dunn.
William Black, sergeant.	Carley Ward.
James Herrin, captain.	Oliver Jackson.
Joseph Eager, captain.	James Conant.
James Boyd.	Luther Conant.
Samuel Bullard.	Stephen Foster.
Thomas Gill.	Joshua Turner.
William Dunn.	Libeus Washburn.
B. Harper.	Joseph Berry.
Jacob Parmenter.	Zeph Perkins.
Nehemiah Packard.	Joseph Gillis.
Isaac Stone, Jr.	James Twinerton.
Alexander McFarland.	William Johnson.
Daniel Deland.	Jacob Ames.
Josiah Parmenter, sergeant.	Archibald Forbes.
Tim. Conant, corporal.	Sheers Berry.
Bartholomew Green.	Matthew Gilleyson.
Daniel Parmenter, lieutenant.	Eben. Woodis, sergeant.
James Hunter, corporal.	Samuel Stone, corporal.
Moses Gilbert.	James Banks.
Joseph Green.	Jona. Bullard, captain.
Wm. Banks, ensign.	Edward Partridge.
Silas Partridge.	Joseph Craige.
George Castle.	Nathaniel weeks.
Asa Partridge.	Isaac Parmenter.
George Harper.	Timothy Shaw.
Asa French, lieutenant.	Samuel Metcalf, sergeant.
John Fobes.	Ichabod Parker.
James Bell, Jr.	Abraham Bell.
Silas Bullard.	Wm. Bothwell, corporal.
Benj. Knight.	Jacob Brooks.
Robert Willson.	Alex. Willson, lieutenant.
Jonas Cunningham.	Samuel Davis.
Isaiah Butler.	John Harmen.
John Bothwell.	Wm. Smith.
Thomas White.	Robert Forbes.
James Forbes.	Charles Forbes.
Jonas Rich.	George Rich.
John Hill.	James Ames.
John Boyd.	Isaac Bullard.
John Crawford, captain.	Benj. Foster, corporal.
Alex. Bothwell, lieutenant.	Nathan Edson.
Asa Briggs.	John Harper.
Wm. Washburn.	Jesse Allen.
Wm. Green.	James Brown.
James Blair.	Eleazer Spooner.
Wm. Crawford, captain.	Jacob Kibley.
John Butler.	Wm. Stephenson.
Jacob Adams.	Ebenezer Nye.
John Glazier.	Marshall Walker.
Reuben McFarland.	Robert Willson, Jr.
Stephen Lincoln.	Robert Harper.
Benson Dunbar.	Ebenezer Foster.
Francis Maynard.	Benj. Perkins.
Benj. Dunbar.	James Dunbar.
James Black.	Elias Bolton.
Joseph Harper.	John Hitchcock.
Leavitt Perkins.	James Shaw.
Ignatius Ames.	James Shaw, Jr.
John Crawford, Jr.	Apollos Bolton.
Josiah S. Nye.	Alex. Crawford.
George Caswell.	Nathan Fobes.
Nehemiah Allen.	George Walls.
George Perkins.	Herman Bassett.

John Brown.	John Bell.
Thomas Chaddock.	Abraham Joslyn.
Rufus Parmenter.	Benj. Spooner.
Skelton Foster.	Nat. Weeks.
Ezra Washburn.	Ichabod Packard.

The town paid and supplied these soldiers and aided their families, when necessary, raising and paying, previous to the inflation of the currency, the sum of £3,676, a part of which was afterwards refunded by the State.

As the war went on the currency became greatly depreciated in value. In June, 1780, £1000 was voted "towards supplying the pulpit this year." The next month £2089 10s. was voted by the town for horses for the Continental service, this sum purchasing three horses.

February 5, 1781, "voted £9112 10s. to purchase beef for the army." At the same meeting the town voted "to give three hundred silver dollars as hire to each soldier enlisting in the Continental Army." Becoming alarmed by the rapidly depreciating value of the currency, measures were taken by Congress and also by State and town governments, to set certain prices on all common articles, which were not to be exceeded. A State Convention assembled at Concord, July 14, 1779, to consult on measures for the relief of the people. The action of this convention was endorsed by a Worcester County convention the following month. The chief action of the convention was the adoption of a list of prices, each town to make additions of what smaller articles they pleased. Oakham adopted the same immediately, with some additions, and a committee of thirteen was chosen to see that these resolves were carried into execution, and that "said committee keep a carefull watch and bring every transgressor to condign punishment."

Some of these regulated prices were: Indian corn, per bushel, £3 12s.; wheat, £8 per bushel; beef, 5s. 6d. per pound; cider, per barrel, £4; New England rum, per gallon, £5; toddy, 15s. per bowl. Labor in husbandry, £2 14s. per day; woman's labor, £2 per week.

But it was soon found that prices could not be governed by legislation and threatened "condign punishment."

In 1781 the town allowed £18 per day for common labor, and paid the Rev. Mr. Grosvenor £120 for one Sabbath's preaching. By the records of the town it is very evident that a deep interest was felt by our Revolutionary sires for the welfare of the new National Government. January 9, 1778, it was voted "that the Confederation and perpetual union proposed by Congress is approved of by this town."

When the State Constitution was submitted to them, it was fully discussed, article by article, in open town-meeting; portions of it were assigned to different committees, more fully to consider and report upon. As a result, parts were rejected, certain sections approved, and various amendments suggested to other parts.

The "Federal Constitution" also, when proposed, was considered by them in a similar manner.

It is a matter of deep regret that so little is now known of the personal experiences of the many soldiers of the Revolution who went from this town.

But "that they served their Country in the hour of her greatest need is now nearly all that can be said of them."

Captain John Crawford, it is said, served through the war. He used to remark with pride that "they called me Bold Craford, and I walked right up to the cannon's mouth." James Conant enlisted as a private in Captain Crawford's company in 1777; July 1, 1778, was promoted to sergeant in Captain Scott's company. He afterwards enlisted for three years. After the war he became a captain of militia.

He used to relate that, at one time, a ration of rum had been dealt out to them; the hogshead from which it was taken was standing on end, the top head having been removed in order to dip it out easily, when suddenly they were surprised by an overwhelming number of British soldiers. His comrades at once sought safety in flight; but he was determined that the "Red Coats" should not regale themselves on "Colonial rum." So, regardless of the flying bullets, with a mighty effort, he overturned the hogshead, and then sought safety in flight, escaping unharmed.

Luther Conant enlisted at the age of seventeen as a private; afterwards promoted to sergeant. He also became captain in the militia. He served in Washington's army, was appointed by him for some special service, and knew him personally.

The War of 1812 did not commend itself to the good judgment of the citizens of the town of Oakham. They were also decidedly opposed to the proposed alliance with France. The following action was taken by the town July 13, 1812: "Voted against a war under existing circumstances." "Voted to choose a committee of nine to circulate a memorial of peace." Rev. Daniel Tomlinson, Dr. Seth Fobes and William Crawford were chosen a committee to draw up said "memorial." Also "voted to express an abhorrence of an alliance with France."

The alliance with France was not made; but the war with Great Britain went on, notwithstanding the vote of the town. A company known as the "Washington Grenadiers" enlisted from the towns of New Braintree and Oakham, was formed in 1813, and annexed to the Third Regiment of the First Brigade of the Seventh Division, Massachusetts Volunteer Militia, with the understanding that they were to hold themselves in readiness for actual service.

Early in September, 1814, Boston being threatened by the British, the company received the expected summons, and were—

Ordered to appear at Knight Whitmore's tavern in Oakham on Sunday, the eleventh day of Sept. inst., at five o'clock in the forenoon,

from thence to march to Boston, to do Duty in the service of this Commonwealth.

WILLIAM CRAWFORD, JUN., Capt.

The company, fully equipped, met as ordered. It was a beautiful September morning. A large number of the citizens of both towns had gathered. Nearly all of the members of the company were sons of Revolutionary sires. Many of the aged veterans were present. The aged minister, Father Tomlinson, made a long and very impressive prayer, and, with the "Good-byes" of aged parents and dear friends, they started on their long march of sixty miles to Boston, accomplishing the entire distance in two days, arriving there September 13th, tired, lame and foot-sore, but ready to perform any duty required of them.

The names of those who had enlisted from Oakham were as follows :

Capt. William Crawford.	Ensign James Allen.
Stephen Lincoln, Jr.	Mason Clark.
Daniel Flint.	Percival Hall.
Elias Marsh.	Seth Stone.
Isaac Stone.	Fabian Tomlinson.
John Macomber.	Ellis Fairbank.
Charles Sargeant.	

The enemy came within sight of the city, but finding it so thoroughly fortified, thought it not wise to made an attack, and soon sailed away. The company soon acquired great proficiency in military drill, and attracted much notice. From their uniform height of stature they were known as the "Tall Company." They remained in the service at Boston fifty-seven days, when, the danger having passed, they were discharged and returned home. "Capt." Crawford afterward became a general in the militia.

Mr. Isaac D. Rice, a resident of Oakham, enlisted in the regular army, and served ten years in the United States service previous to 1842. He saw much active service in the "Florida War." After his return home he went to California and the West Indies several times, and died in North Brookfield March 26, 1880, aged seventy-eight years.

There is no notice of the Mexican War in the records of the town, and but one man from Oakham was in the United States service in that war.

Mr. Algernon S. Crawford enlisted early in 1846, and was sent at once to join the United States forces in Mexico, but, soon after his arrival, was stricken with a fever, and soon died at Puebla, Mexico, in July, 1846.

In the War of the Rebellion Oakham did more than her full part for the preservation of the Union. From the firing on Fort Sumter to the surrender at Appomattox, the deepest interest was shown by her citizens in all the stirring events of the war, and all of the calls for men and means were responded to nobly.

The sum of \$10,867.58 was appropriated and expended by the town on account of the war, exclusive of State aid furnished to the families of soldiers.

The names of those who served in the war are as follows :

Charles S. Green, Second Regiment, Company F ; died Jan. 29, 1862, of typhoid fever at Frederick, Md.  
 Nathaniel W. Colton, Tenth Regiment, Company F.  
 Edward F. Ware, Fifteenth Regiment, Company F ; died Sept. 23, 1861, at Poolesville, Md.  
 George L. Caldwell, Twenty-first Regiment, Company K ; died Nov. 27, 1863, at Camp Nelson, Ky. ; accidentally shot.  
 John W. Gould, Twenty-fifth Regiment, band.  
 Henry W. Crawford, Twenty-fifth Regiment, band.  
 Albert Spooner, Twenty-fifth Regiment, Company H.  
 Julius D. Hill, Twenty-fifth Regiment, Company H.  
 Charles D. Robinson, Twenty-fifth Regiment, Company H.  
 Charles H. Parker, Twenty-fifth Regiment, Company H ; disch. Dec. 28, 1862 ; re-enlisted ; died March 16, 1881, at Oakham.  
 Edwin Wilbur, Twenty-fifth Regiment, Company H.  
 George W. Stone, Twenty-fifth Regiment, Company H.  
 Lorenzo K. Lovell, Twenty-fifth Regiment, Company H.  
 David O. Lovell, Twenty-fifth Regiment, Company H ; wounded at Drury's Bluff ; died in Libby Prison June 17, 1864.  
 Henry H. Ware, Twenty-fifth Regiment, Company H ; killed at Drury's Bluff May 16, 1864.  
 Charles D. Dean, Twenty-fifth Regiment, Company H.  
 Charles F. Howard, Twenty-fifth Regiment, Company H ; died Nov. 4, 1878, at Boston.  
 Jonathan G. Warren, Twenty-fifth Regiment, Company H.  
 Lawson D. Wood, Twenty-fifth Regiment, Company H ; died Nov. 23, 1862, at Newbern, N. C.  
 William H. Bullard, Twenty-fifth Regiment, Company H ; killed at Cold Harbor June 3, 1864.  
 Willard Frink, Twenty-fifth Regiment, Company H ; killed at Cold Harbor June 3, 1864.  
 Lyman N. Parker, Twenty-fifth Regiment, Company H ; killed at Cold Harbor June 3, 1864.  
 Joseph D. Whitney, Twenty-fifth Regiment, Company H ; disch. May 11, 1863.  
 Edwin Parker, Twenty-fifth Regiment, Company H ; disch. Dec. 28, 1862 ; re-enlisted.  
 William I. Temple, Twenty-fifth Regiment, Company H ; sergeant ; died Jan. 14, 1871, at Oakham.  
 George P. Wood, Twenty-fifth Regiment, Company H ; died Sept. 19, 1862, at Newbern, N. C.  
 Edward A. Sargeant, Twenty-fifth Regiment, Company A ; drummer.  
 George D. Macomber, Thirty-fourth Regiment, Company E ; killed Sept. 18, 1869, at Fort Bowie, Arizona.  
 Horace M. Green, Thirty-fourth Regiment, Company H.  
 William R. Barr, Thirty-fourth Regiment, band.  
 John Macomber, Jr., Thirty-first Regiment, Company G ; died Nov. 5, 1882.  
 Seth P. Dean, Thirty-sixth Regiment, Company K ; died Jan. 28, 1863, in Virginia.  
 Daniel Dean, Thirty-sixth Regiment, Company K ; died Nov., 1862.  
 John B. Fairbank, Thirty-sixth Regiment, Company K ; lieutenant.  
 William Macomber, Thirty-sixth Regiment, Company E.  
 Henry Macomber, Thirty-sixth Regiment, Company E ; died at Oakham August 19, 1870.  
 Charles L. Haskell, Thirty-sixth Regiment, Company K ; killed at Petersburg, Va., April 2, 1865.  
 Edwin C. Spooner, Thirty-sixth Regiment, Company K.  
 Silas J. Howell, Thirty-sixth Regiment, Company K.  
 B. Miles Reed, Thirty-sixth Regiment, Company K ; died Jan. 17, 1864, at Knoxville, Tenn.  
 Edward Chamberlain, Thirty-sixth Regiment, Company K ; died May 17, 1870, at Oakham.  
 Daniel Rawson, Jr., Thirty-sixth Regiment, Company K ; died Aug. 4, 1863, at Baltimore, Md.  
 James D. Johnson, Thirty-sixth Regiment, Company K.  
 Charles H. Stearns, Thirty-sixth Regiment, Company K ; died Sept. 10, 1863, at Crab Orchard, Ky.  
 Lewis Pellet, Thirty-sixth Regiment, Company K.  
 Laban F. Rawson, Fortieth Regiment, Company A ; died 29, 1863, at Folly Island, S. C.

MEMBERS OF THE LEGISLATURE.

Thomas White, 1775; Captain Isaac Stone 1780-81, Constitutional Convention, 1779-80; Captain Jonathan Bullard, 1787-89, Convention, 1788; Captain Joseph Chaddock, 1790-92; John Boyd, 1798; Dr. Spencer Field, 1801; Jesse Allen, 1805; Perez Waterman, 1806; Jephtha Ripley, 1808; Abijah Cutler, 1809-10; Joel Jones, 1811-12, '16; William Crawford, Jr., 1813, '23, '35, '41, '46, Senate, 1825-26, Convention, 1820; Washington Allen, 1827, '31-32; James Allen, 1833-34, '38, '58, Senate, 1839, '41-42; Luther Hunter, 1836-37; Alexander Crawford (2d), 1839-40; Isaac H. Jones, 1842; Dr. Horace P. Wakefield, 1843-44; Washington Stone, 1850; James B. Ware, 1851-52; David S. Ross, 1855, Convention, 1853; Nahum Parker Humphrey, 1857; Moses Oliver Ayres, 1861, Senate, 1875-76; James Packard, 1864; Albert Watson Lincoln, 1870; Joseph Fobes, 1875; John B. Fairbank, 1877-78; Jesse Allen, 1886.

The village of Coldbrook Springs, in the north part of the town, has gained quite a notoriety from its mineral springs, the waters of which are successfully used in the treatment of many forms of disease. They are now owned by Mr. Benjamin P. Clark, of Cambridge, who has done a great deal in building up the village. Mr. James C. Bemis has recently built a large and commodious hotel in the place of the one destroyed by fire two years since.

The Central Massachusetts Railroad, recently constructed through this section of the town, proves a great convenience to the people, and, it is hoped, will tend to develop the business industries of the town.

Oakham, like most of the "hill-towns" of the

county, has been on a "gradual decline" for many years. By the census of 1885 her population numbered 749. In beauty of scenery, abundance of fresh air and pleasant drives it has no superior among the towns of the county; and now, being brought so much nearer the cities and larger towns of the State, by the Central Massachusetts and Ware River Railroads, it is hoped that more prosperous days are in store for the good old town of Oakham.

BIOGRAPHICAL.

DANIEL M. PARKER.

The subject of this sketch was born in Lyman, N. H., November 3, 1817. His parents were of the best of New England stock. Moody Parker, his father, was born in Massachusetts February 26, 1784; was an officer in the War of 1812, being present at the battle of Plattsburg; was a farmer and carpenter, and known as a very hard-working man, and very skillful in the use of carpenter's tools. His mother, Millicent Moulton, was born in Massachusetts December 10, 1793. The Moulton family were famous for their industry, frugality and thrift. Moody Parker and his young wife moved to Lyman, N. H., soon after marriage, it being then one of the new settlements. Their house was built out of logs. Two children were born to them there, Daniel being the second child. When he was three years of age his parents moved to Wolcott, N. H., they being among the first settlers of the town. The first school he ever attended was taught in one end of a log barn. Soon after a log school-house was built, in which two short terms were taught annually, and this school was all that he ever attended, graduating at the early age of seven-teen.

His father, having become partially disabled by a very severe accident, Daniel, being the oldest son, had to be kept out of school a good deal to assist in the work of the farm. Never studied arithmetic but a few weeks in the last term that he attended, not getting beyond fractions.

He remained at home till eighteen years of age, when, wishing to "start out into the world," on the 16th of May, 1835, himself, with four other young men, started for Worcester, Mass., one hundred and eighty miles distant, walking the whole distance. He worked for three weeks at chopping in Holden, then for two months for Captain John Barnard, of Worcester, on his farm; then two months for Amos R. Black on the "Northville Pond Dam;" then went back to Holden and chopped till December 16th, when, with his four companions, he walked back to his father's home, in New Hampshire. The next spring he came down to Massachusetts alone, and went to work in Holden at what were known as the

Canada (saw and grist) Mills, where he remained about ten years. Came to Coldbrook, in the north part of Oakham, in the spring of 1846 and went to work for Mr. John Watson, in the mill which has so long been owned by himself. Mr. Watson died the following year. Then Mr. Parker hired the mill from year to year till 1854, when he, in company with William R. Whiting, bought it. They remained in business together till 1861, when Mr. Parker bought out Mr. Whiting's interest in the concern, and since that time has carried on the business alone.

For nearly thirty years "Parker's Mills" have been known in all the region. The water-power is excellent; large quantities of lumber have been sawed by him annually. Soon after going into business for himself he put in a "Planing Machine," and from time to time other wood-working machinery has been purchased, employing many hands for a great part of the year.

Mr. Parker has always been known as an industrious, public-spirited citizen, very kind and accommodating to every one, and generous almost to a fault. For many years he was one of the selectmen of the town (his son, Clarence H., being now chairman of that Board of Officers). He has ever been a stanch friend of temperance; and now, as a result of his industrious and temperate habits, at the ripe age of seventy-one years is hale and hearty, and can yet, with reason, look forward to many years of health and prosperity.

He was married, January 10, 1849, to Miss Mary A. Brigham, daughter of Captain Henry Brigham, of Rutland. She was born January 12, 1829. Their children are: Clarence H., born October 31, 1849; Evander L., born August 28, 1851; Rogene F., born August 30, 1853; D. Mildmay, born July 8, 1855; Maida A., April 5, 1857. Mrs. Parker has been truly a "help-meet" to her husband and has contributed greatly to his success by her industrious and frugal habits. Their children are all pleasantly settled near them, having young families of their own, which are and will be a great comfort to their grandparents in their declining years.

## CHAPTER CXL.

### MILLBURY.

BY JOHN C. CRANE.

**EARLY HISTORY.**—As early as the year 1740<sup>1</sup> a petition was laid before the town of Sutton, for a division of her territory into a new precinct or parish. The following was the petition:

To see if the town will bear the petition of sundry of our northerly inhabitants, with respect to setting off two miles in breadth on the northerly side of the town, joining upon the country gore, and five

miles in length from Oxford line, eastwardly, to join with their neighboring inhabitants, that they may be better accommodated with the word.

This was the first step that finally proved to be the entering wedge, resulting in the formation of the North or Second Parish, and eventually in the birth of the town of Millbury. This petition was unsuccessful, for we find the matter was again brought up in 1742 and the town voted against it.

The same year the petitioners applied to the General Court, the town opposed and chose a committee to remonstrate. The court, notwithstanding, set them off on the 28th of October, 1743. A church was formed, the history of which is given elsewhere. Considerable feeling resulted from the breaking up of the town into two parishes. The subject of the ministry money and other matters arising from the division, having alienated somewhat the people of the North Parish from the mother town, the question was put in town-meeting, November 5, 1798,<sup>2</sup> "To see if the Town would grant the petition of the North Parish to be set off and incorporated into a separate Town."

The vote being taken, it was voted down, but a committee was chosen to talk the matter over with the people of the North Parish. May 6, 1799, the committee reported in favor of the separation, but the town refused to accept the report. In the year 1809 a petition was before the General Court from the inhabitants of the Second or North Parish of Sutton, asking to be set off into a separate town. Sutton voted to remonstrate against it, and appointed a committee of three to oppose the matter.

In 1770 attempts were made to have some of the town-meetings held in the Second Parish, but the town refused to so do. But in 1780 the town did so vote. But if any meetings were held, the custom seems to have been abandoned, for we find that, in 1810, when the matter of a new town was strongly advocated, Sutton endeavored to mollify the people of the North Parish, by consenting that one-third part of the town-meetings should be held in what is now Millbury. The condition was that the petition for a new town should be withdrawn.

In 1813 we find another petition before the General Court for the new town. Sutton again chose a committee to oppose it. It was voted that the committee, consisting of five persons, should prepare a remonstrance, which was done and submitted to the town, when it was voted that their representative should present it to the General Court. All efforts on the part of Sutton to prevent the formation of the town proved futile, and an act was passed incorporating the town of Millbury and received the signature of Governor Strong, June 11, 1813.

At a public meeting of those interested in the proposed new town, held previously to the passage of the act, the question of a name was brought before

<sup>1</sup> Sutton records.

<sup>2</sup> Sutton records.

the meeting. General Caleb Burbank proposed that, owing to the large number of mills in the limits of the proposed town, it be called Millbury. His proposition was received with favor and the name accepted.

**TOPOGRAPHY.**—Millbury is bounded on the north by Worcester, south by Sutton, east by Grafton and west by Auburn and Oxford. The town has an area of ten thousand one hundred and six acres, or fifteen and seventy-nine one-hundredths square miles. In the east part of the town is Dorothy Pond, called in the proprietors' books of Sutton "South Pond." Whitney, the historian in 1793, calls it "Dorret's" Pond. This is a fine sheet of water, and was once used in connection with the Blackstone Canal; from this pond flows a fine stream that is used for manufacturing purposes, which soon after joins the Blackstone River. The town is diversified by hills, valleys and intervals. From the Worcester line, down through Armory Village, is the valley of the Blackstone.

The river winds its serpentine course along, its once pure water defiled and unfit for use. A short distance from the Gowan bridge, Mill Brook or Singletary Stream empties its waters into the Blackstone, pure compared with those with which they unite. A short distance to the northwest Woodchuck Hill rears its rocky sides, its summit crowned with a thick growth of wood. Park Hill, in the north, lifts its crest heavenward, while to the west Wigwam and Burbank Hills stand silent in majesty, overlooking the valley below. In the extreme west Grass Hill towers high above the valley of the Ramshorn. From here old Wachusett seems a silent sentinel, ever on the alert.

In the southwest is Ramshorn Pond, partly in Millbury and partly in Sutton. This pond originally contained about seventy<sup>1</sup> acres, but now contains nearly twice that number. Peter Whitney locates this pond as the chief source of the Blackstone River in his article on Sutton. In his article on rivers in the same work, he also reiterates it. In the hall of the American Antiquarian Society at Worcester is a copy of his history corrected by his own hand up to 1810. In it he makes no correction of the statement originally made in regard to Ramshorn being the main source of the river.

A majority of the historians since his day have confirmed his statement. The writer sees no reason for disagreeing with Whitney's original statement.

The pond takes its name from both the shape of the pond and the stream which issues from it. Its waters are pure and sweet, and an abundance of pickerel, perch, bass and pouts are found beneath. Its sides are crowned with lofty hills, from which a fine view is obtained. The dam to this pond gave way in 1873 and caused a loss of some ten thousand dollars.

A higher dam was afterwards built and the pond increased in size. South from the dam, three-fourths of a mile over the Sutton line, is Potter Hill, between which and the shore of the pond was fought the last battle between the white and red men in this region. A half-mile nearer the dam, a little more to the east, once stood on the hill the old settlers' fort or block-house. The spot has been marked, but none of the foundation remains. The fort stood on the Kenney farm, now owned by Edward Dolan.

The stream from this pond flows north through a part of Auburn, thence to New Worcester and from thence back to Millbury by way of Armory Village, and on to Providence, or to within three miles of its starting-point.

A portion of Singletary Pond is also in the southwestern part of the town, about one mile in a straight line from Ramshorn. This pond originally contained six hundred acres.<sup>2</sup> It is fed chiefly by springs, and is a beautiful sheet of water. It was originally set off by the proprietors of Sutton to Ebenezer Daggett, who was given this immense privilege and a farm in connection therewith on conditions mentioned elsewhere.

The original name of this pond was Crooked Pond.<sup>3</sup> When the name was changed has not yet been found out, nearer than a period of nine years. It was Crooked Pond in 1793. Elijah Waters, who was born and who died in sight of its blue waters, on the hill above to the west, calls it in his diary, which he left, "Singletary," in 1802. A large portion of this pond lies in Sutton.

Garfield Pond is a small body of water near the old Common. Its water is excellent in its quality, and has been talked of in connection with a water supply for the town.

**OLD COMMON.**—What was once the centre of this town is now a quiet dwelling spot. The old church moved away in 1835, and with it went the town-meetings. The old training-ground remains, but the tramp of armed men ceased long ago. Its pristine glory has faded. The old public-house ceased to exist, and the little old store (still standing) where "Old Medford and West India" was sold, became a dwelling-house. A little below, at the foot of the hill, towards Armory Village, was the old "Braman distillery." "The worm of the still" was long ago crushed, but the scars of its bite long remained. To sum it all up, the old Common was left alone in its glory, as the dawn of a new life opened, with the advent of the canal and railroad, together with increasing business at the Armory.

**ANNALS OF THE TOWN, 1813.**—It was provided that upon application to any justice of the peace, he could call a meeting of the inhabitants. Accordingly, on the 12th day of June, 1813, notice was given to Aaron Peirce, Esq., to call such a meeting; this notice

<sup>1</sup> Whitney's History.

<sup>2</sup> Proprietors' records.

<sup>3</sup> Whitney's History.

was signed by Gen. Caleb Burbank, Ezra Lovell, Samuel Bixby, Jacob Chamberlain, Solomon Marble, Asa Waters, Jr., Jonathan Trask, Josiah S. Prentice, Simeon Waters, Stephen Blanchard, Capt. Azor Phelps.

Squire Peirce directed Samuel Waters to call a meeting of the inhabitants on the 1st day of July following, at the Congregational meeting-house, at one o'clock, signed "Aaron Peirce, Justice of the Peace"

At this meeting Capt. Azor Phelps was chosen moderator; Aaron Peirce, town clerk; Lieut. Asa Goodell, Capt. Azor Phelps, Dea. Solomon Marble, Capt. Reuben Barton, Jr., and Lieut. James Greenwood, selectmen; Samuel Waters, treasurer; Aaron Peirce, Simeon Waters, Jonathan Grout, assessors.

"Voted that the taxes be set up to the lowest bidder, with the understanding that whoever bid them off should be chosen constable if he could procure surties." Alfred Hood bid them off at three cents on the dollar and was chosen constable.

The first highway surveyors chosen were Capt. Amasa Wood, Curtis Searles, Jonathan Muzzy, Moses Brigham, Jonathan Gale, Jr., Samuel Waters, Josiah S. Prentice, Josiah Brown and Joel Wesson; Jonathan Richardson was chosen tythingman.

August 23. At a town-meeting, "Voted to raise Millbury's proportion of the one thousand dollars, which had been voted by Sutton for schools previous to the separation." The amount for Millbury was three hundred and sixty-five dollars. The meeting was adjourned to September 13th, when they "Voted to raise for the support of the poor and other town charges, seven hundred dollars." "Four hundred dollars for Rev. Mr. Goffe, the present year, in lieu of the same sum voted by Sutton, at their annual town-meeting."

1814.—March 7. At the town-meeting William Hull was chosen moderator; Aaron Peirce, town clerk. "Voted that horses and cattle should not go at large without a permit from the selectmen."

April 4. At a town-meeting held to choose State officers, Caleb Strong for Governor had one hundred and nineteen votes, and Samuel Dexter, forty-six.

May 2. Lieut. Asa Goodell was chosen the first Representative to the General Court; he had fifty votes.

May 2. General Joseph Farnsworth chosen moderator. "Voted to raise for schooling this year \$370; \$800 for support of poor and other town charges; \$400 for Rev. Joseph Goffe, —"

November 7. "Inhabitants met at the meeting-house and Voted for congressman. All who had a freehold estate of the annual income of ten dollars, or any estate of the value of \$200, and have resided in town the year last past, can vote." Hon. Elijah Brigham had ninety-four votes, and John Spurr sixteen.

"Voted to have the bell tolled at the death of any of the inhabitants."

1815.—March 6. At the town-meeting, General Burbank was chosen moderator. Among the tythingmen chosen was Martin Craw, but it does not appear that he was sworn. Thomas Blanchard was chosen one of the field-drivers, as was also Captain Joseph Bancroft and Aaron Trask. Stephen Blanchard, Dr. Amasa Braman, Dr. William M. Benedict, Samuel Waters, Captain Asa Goodell, Josiah S. Prentice and Josiah Stiles, Esq., were chosen a committee on schools.

1816.—May 6. The town "Voted that Thomas Kendall, Jr., have leave to draw his school-money and carry it to Oxford," where his children probably went to school. Dr. Amasa Braman was chosen representative to the General Court.

August 26. Town "Voted to pay the bill of expenses exhibited by John Goodell and Simon Farnsworth for refreshment found to those persons who searched for Mr. Packard's children, amounting to \$23.26." The children had evidently been lost and were probably the children of Mr. Job Packard, who lived not far from Park Hill.

1817.—March 3. At the annual town-meeting Asa Waters, Esq., was chosen moderator, and Deacon John Peirce, Rufus Barton, Major Josiah Woodward, Captain Daniel Rice and General Caleb Burbank, selectmen; Josiah Stiles, Josiah S. Prentice and Elijah Waters, assessors. John B. Blanchard was chosen tythingman in place of General Burbank.

May 5. Town "Voted to discontinue the road leading from Joshua Wait's, by his saw-mill to Captain Josiah Brown's."

May 5. The town refused to send a representative to the General Court.

1818.—Ithran Harris having received a land warrant for military services in the War of 1812, assigns the same (160 acres in Illinois) to Solomon Dwinell and Seneca Simeon Dwinell for \$115.00. Assigned March 19, 1818.

Squire Harris was a sergeant in Foster's company, Ninth Regiment of Infantry.

May 4. The town again refused to send a representative to General Court.

May 4. "Voted to accept of the meeting-house upon the conditions as recorded in the Proprietors' book."

"Voted to raise \$25.00 for supporting a singing-school."

"Voted that the town will appropriate out of the money due the town from individuals, a sum of money, which, being added to the present school-money, shall amount to \$500.00 for a permanent school-fund."

September 5. Solomon Dwinell, Jr., paper-maker assigns his land in Illinois, which came from Ithran Harris, to Seneca Simeon Dwinell.

August 20. Lyman Peck, of Rehoboth, for the sum of sixty dollars, assigns to Seneca Simeon Dwinell his land warrant received for service as a sergeant in Perry's company, Fortieth Regiment of Infantry.

August 17. At a town-meeting John B. Blanchard was chosen moderator. "Voted to paint the meeting-house the present year."

Two hundred and twenty-five dollars was appropriated for the purpose, "to be assessed upon the Congregational Society, as parochial charges." General Burbank, Deacon John Peirce and Elder Samuel Waters were chosen to superintend the work. The town also chose a committee to ask the people to assist in the work.

1819.—March 1. Town-meeting, General Burbank chosen moderator; Captain Reuben Barton, Jr., constable.

May 3. At this meeting the town "Voted that the money which the town appropriated at their meeting held May 4, 1818, to form a school fund, shall be taken to defray the expenses of the town."

May 3. General Burbank, chosen as Representative to General Court, had fifty votes.

Jury list first published in the town records, General Caleb Burbank heads the list.

1820.—January 3. Town "Voted that the Town consent that there may be a stove or stoves placed in the meeting-house, provided the same are procured by subscription, as mentioned in the warrant." Samuel Waters, Jr., General Caleb Burbank, Stephen Blanchard, Elias Forbes and Reuben Barton, Jr., were chosen a committee to have charge of placing them.

May 1. Town refused to send a Representative to General Court.

May 21. Town voted by eight majority in favor of a State Convention to alter the Constitution.

October 16. Town chose Aaron Peirce, Esq., delegate to the convention to alter and revise the State Constitution.

October 16. Town "Voted that the town give leave that a well may be sunk on the Common, near the Elm Tree, upon the conditions mentioned in the warrant." The conditions there mentioned were, that it should be done free of expense to the town.

1821.—May 7. Town "Voted to instruct the town agent to call upon those who have broken the windows in the meeting-house and compel them to pay for the same."

"Voted to lengthen the intermission on the Sabbath, from one hour to an hour and a quarter."

November 12. "Voted to discontinue the old road leading from Samuel Waters' to Dr. Braman's 'Still-House.'"

1822.—March 4. Josiah Stiles, Esq., chosen town agent, to act in civil and legal capacity.

May 5. Town "Voted to raise \$50.00 for a singing-school."

1823.—May 5. Asa Waters, Esq., chosen Representative. "Voted that \$25.00 of the \$400.00 raised for Mr. Goffe's salary and other parochial charges, be appropriated for the support of the Sabbath-school."

1824.—March 1. "Voted to raise \$15.00 for wood

and building fires for the meeting-house the past and present year."

1825.—May 2. "Voted to raise \$25.00 in addition to the school money, to be put into the hands of the School Committee, to be expended for the use of schools, in rewards and premiums as they shall see fit."

Up to 1825 it had been a custom to require the highway surveyors to expend the road money in the months of June and August; the consequence was after this money was expended the surveyors felt their responsibility gone, and the roads were often in an unsatisfactory condition; this year a committee was chosen to see what improvement could be made. There had been but few surveyors, and the districts were so large that complaints were frequent.

1826.—April 26. The Highway Committee, appointed in 1825, reported that the town be set off into fourteen highway districts, with a surveyor for each district. The town voted to make a three years' trial of the plan, and chose the surveyors.

1827.—April 2. Stephen Blanchard chosen tything-man for Grass Hill.

"Voted to choose six persons as Town School Committee, according to the new law." Chose Dr. William M. Benedict, Joseph Griggs, Oliver Rice, Vernon Stiles, Paul C. Chase and Hervey Peirce.

"Voted that the Prudential School Committee shall be chosen by the town the present year."

August 27. "Voted, that the Town is dissatisfied with the report of the commissioners for estimating damages arising by the location of the Blackstone Canal, so far as it respects the town's maintaining Bridges and Causeway over the canal, and that they direct their agent, with the advice and assistance of the Selectmen, to claim and demand a Jury, or agree upon a reference."

December 10. "The Town thought it expedient to choose a committee to devise the best method in their opinion to support the poor for the year 1828, and report at the next annual March meeting." The committee chosen were Dr. Amasa Braman, Rufus Barton, General Caleb Burbank, Solomon Dwinell and Aaron Peirce, Esq.

1828.—March 3. The committee who were chosen on the support of the poor in December, 1827, reported: "They agree to recommend to the town to appoint a board of Overseers, to consist of three persons, to manage all the concerns relating to the poor of the town." The town voted to accept the report, and chose Aaron Trask, Solomon Dwinell and Hervey Peirce overseers for the year ensuing.

April 7. Town "voted to allow ten cents an hour and eight cents an hour for use of oxen to work on the Highways."

At this date, on the vote for a new county, the vote stood nineteen yeas and twenty nays.

1829.—May 4. The town chose Aaron Peirce, Esq., and Colonel Amos Hill representatives to General Court.

"*Voted* to choose a committee of seven to examine the records and to determine whether the Congregational meeting-house in Millbury is the property of the town or of the individuals who built it, and whether, when it is necessary to repair it, it properly belongs to the town to do it." The committee were Aaron Peirce, Elias Forbes, Samuel Waters, George W. Livermore, Caleb Burbank, Asa Andrews and John Jacobs, "which committee are to report at the next meeting."

May 11. The Committee on Meeting-house reported as follows: "That upon a careful examination of the records of the town and Parish, as well as the proprietors who built said house, they are brought to the conclusion that it is doubtful whether the town, as a corporation, has any legal right in said house. Your committee recommend that all repairs upon the meeting-house aforesaid be made by the Congregational Parish, and that the town allow them a reasonable compensation for the use of said house, as long as they shall occupy the same for the purpose of holding meetings therein." Signed by the committee.

1830.—May 3. "*Voted* to forbid Surveyors of Highways appropriating money for ardent spirits, raised for support of Highways and Bridges the present year."

"*Voted* to discontinue the road from Tyrus March's to Jonathan F. Putnam's."

1831.—March 7. The committee appointed in 1830 to examine schools in town reported. They say: "We were much gratified with the wisdom and economy of the arrangement in the schools on Grass Hill, at the Paper-Mill and Union Districts, in dividing them and placing all under a certain age by themselves, under the instruction of female teachers, thus leaving the master unembarrassed by young children, to pay an undivided attention to the older scholars."

They commend the infant school kept by Miss Hooper in the Paper-Mill District, and say: "This is beginning the work of government and education where it ought to begin—it is laying the axe at the very root of ignorance and insubordination." They say that "four hundred and eighty-five scholars had attended the schools in town the past winter."

April 4. An adjourned town-meeting; an article was in the warrant relating to a petition received from Rev. George W. Campbell and others, who had petitioned to have the town see what could be done to prevent the sale of ardent spirits in town. In this article—which in substance contained the petition—it was voted to adopt the following resolves:

"*Resolved*, that we view with abhorrence the ravages which ardent spirits has made among us, so that we fully approve of the efforts made by temperance societies in suppressing it.

"*Resolved*, that considering the pernicious effects of ardent spirit by increasing pauperism and crime in the community, the public good of this town

does not require the vending and retailing of it within the limits of its jurisdiction.

"*Resolved*, that the Selectmen be requested not to recommend any person or persons to the Court of Sessions for a license for retailing."

"*Voted*, that the law respecting taking fish be carried into effect against all those persons not residing in Millbury who shall take fish from the Ponds and Streams in town."

May 11. *Voted* nine hundred dollars for schools this year.

1832.—March 5. *Voted* to raise one thousand dollars to support public schools this year, and thirteen hundred dollars to support the town's poor and other town charges.

1833.—March 4. "*Voted* that Joseph Goffe, William Whittlesey and James Shepard be a committee to inquire into the causes of pauperism in this town, and also the best method of preventing the same, and report at the next town-meeting."

"*Voted* that the Selectmen be a committee to take into consideration the expediency of procuring a farm for the town for the purpose of supporting the town's poor."

"*Voted* that the Selectmen be required *not* to approbate any person as an Innholder in this town who will not agree (as an express condition of such approbation) to close his bar on the Sabbath, in strict accordance with the Statute in such cases made and provided."

November 11. "*Voted* that the subject of procuring a farm for the town be recommitted."

1834.—March 3. "*Voted* that it is expedient to purchase a farm for the support of the town paupers, and that John Jacobs, Simeon Waters, Aaron Trask and Elisha Jacobs be a committee authorized to purchase a farm for the use of the town."

The town heard the report of the committee chosen to inquire into the causes of pauperism in this town—accepted.

April 7. "*Voted* that the committee on the subject of pauperism be requested to ascertain the amount of money paid by this town since its incorporation for the support of paupers, either directly or indirectly, in consequence of intemperance."

November 11. Committee on buying town farm reported at this meeting, and it was recommitted with two added to the committee, namely, Samuel Waters and Rufus Barton. "*Voted*, that said committee be authorized to purchase a farm when they shall think best; also that the purchase-money shall not exceed \$6,000.00."

1835.—March 2. "*Voted*, to accept the report of the committee chosen to purchase a farm for the town as reported." "*Voted*, this town choose a committee of Three, who shall be called a Board of Overseers of the poor farm and Town poor, and who shall be duly authorized to manage the same in all respects as they in their wisdom shall think most for the interest of

the town, intending by these instructions to make all necessary improvements on the farm, and also to take under their care the paupers of the town, and contract with any person or persons for the carrying on of the farm, and taking care of the paupers as they shall think proper, and in all to do and perform all that is necessary to do and carry into complete effect all the contracts already made in the name and for the town. Simeon Waters, Simon Farnsworth and Samuel D. Torrey were chosen Overseers of Poor and Farm."

March 25. "Voted, that the Selectmen be requested not to appraise any persons in town to sell Wine, Beer or Cider."

1836.—March 8. "Voted, that \$400.00 be raised and appropriated for the purpose of purchasing a Fire Engine and necessary apparatus, provided the same sum be raised by private subscription within ninety days, said Engine to be located by the Selectmen."

"Voted, that the subject of licensing be left discretionary with the Selectmen."

"Voted, the Selectmen be a committee on the part of the town to purchase an Engine."

1837.—Engines were soon purchased, for we find the town, on March 6th, voting money to build houses for Engines Nos. 3 and 4.

March 6. "Voted, that the Treasurer of this town be authorized to issue licenses to all persons owning Dogs, who shall apply and pay the sum of \$2.00, and that no dogs owned in this town be suffered at large without such license having been obtained as aforesaid, said license to continue one year from the 15 of March instant."

May 17. "Voted, that this town agrees to receive from the Treasurer and Receiver-General of the Commonwealth its proportion of the surplus revenue of the United States in deposit, and will comply with the terms and provisions of the several acts passed by the Legislature of said Commonwealth, concerning the deposits of the surplus revenue." William Whittlesey was appointed agent of the town in the matter.

The town "Voted, that \$2,000.00 of the sum received from this Revenue be used towards paying the debt the town owes for the poor farm." The town had previously bought, in 1835, the farm of Aaron Peirce, Esq., now in use as a poor farm, containing at that time one hundred and nine acres and thirty-three rods, with the buildings thereon.

November 13. "Voted, that the Trustees of the Surplus Revenue from the United States be required to appropriate the ballance of this revenue in their hands not appropriated to the payment of the Town Farm Debt."

1838.—March 5. Town voted nine hundred dollars for schools.

1839.—March 4. "Voted to re-commit the report offered by the committee to examine the title to the land occupied as a public common, with instructions

to take such legal advice as they may think proper, provided, the First Congregational Society will share with the town in the expense."

"Voted to allow members of Engine Companies Three Dollars each per year."

1840.—March 2. "Voted that the sum of \$250 be appropriated towards purchasing an Engine with Suction Hose, provided, the same amount be raised by subscription." Chose Asa H. Waters, Dr. Wm. M. Benedict, Stephen Blanchard, School Committee. There seems to have been something remaining of the surplus revenue from the United States, for we find at this meeting the town "Voted that the balance of this revenue be appropriated towards building new roads."

1841.—March 1. "Voted that \$250 be appropriated for Grass Hill Engine, provided the same amount be subscribed in ninety days."

Town also "Voted to appropriate \$250 to build an engine-house on Grass Hill, if an engine is procured."

1842.—This year the town, at the March meeting, voted \$1000 for schools.

1844.—March 4. "Voted that the Selectmen be authorized to purchase three and one-half acres of land near the new cemetery, if it can be purchased for the same sum per acre that was paid for the lot purchased last year (Central Cemetery)."

1845.—March 3. "Voted to appropriate the sum of \$60.00 to repair the fence, and to purchase the right which Elijah Holman has, in the Grass Hill burying-ground."

1846.—March 2. "Voted that the Town raise and appropriate a sum of money, which shall be equal to one-half of the expense of purchasing a Fire-Engine for District No. 3, provided the inhabitants of said district raise and pay into the town treasury the other half of said expense, said Engine not to cost more than \$1000."

March 16. "Voted that the Selectmen be authorized and required to build a receiving Tomb at the new Cemetery."

November 9. The town chose Benjamin Flagg Representative to General Court.

1847.—March 1. Town "Voted not to build a Town House."

Voted one thousand two hundred and fifty dollars for schools this year. The license law seems to have been in force, for the town, at this meeting, voted to prosecute all violators.

1848.—March 6. Town "Voted that the Overseers of the Poor be, and they are hereby, authorized to expend out of the money raised for the support of the poor, such sum or amount as they may deem proper, for the support of ——— in a private family." The name left out above is that of an eminent citizen of the town, who had done much for her prosperity, but who, by successive misfortunes, had become poor. He was kindly cared for to the end of his days in the above manner.

Voted this year, for the support of schools, one

thousand two hundred and fifty dollars. For the poor, one thousand dollars.

1849.—March 5. "*Voted* to accept the road as laid out recently by the Selectmen, leading from the Cemetery in West Millbury to Oxford line, by the house of Aaron Small."

November 12. Chose Asa H. Waters Representative to General Court.

1850.—March 5. "*Voted* that the Selectmen be instructed to examine the rights of the Town in the old Common, also localities of the roads, and lay out necessary roads upon said Common."

April 1. "*Voted* to refer the article 6th, concerning a High School, to a committee, to be chosen one from each School district, and report at next March meeting." Committee were Simeon Waters, Leonard Dwinell, Samuel Waters, C. R. Miles, Josiah L. Woodward, Oliver Rice and Simeon Hayward.

1851.—March 4. "*Voted* that the Town do have a High School. *Voted* that a Committee of seven, one from each school district be chosen, to bring in plans and estimates at the April Meeting, to establish a High School." Committee: J. E. Waters, Horace Waters, A. H. Waters, E. W. Goffe, Josiah L. Woodward, John E. Bacon and Hervey Park.

"*Voted* to raise and appropriate \$100 to purchase Town maps, said maps to be placed in the hands of the Town Clerk and by him to be sold at cost.

April 7. High School committee reported, and it was accepted. "*Voted* to choose a committee of three, and that they be instructed to purchase the Millbury Academy estate, provided, it can be purchased on the conditions as by the report of the High School Committee."

"*Voted* that the committee be appointed by the chair." C. R. Miles, Andrus March and Mowry Farnum, committee. Fifteen hundred dollars was appropriated as part payment of the Academy estate. Selectmen authorized to borrow five hundred dollars to make the first payment. "*Voted* to raise \$500 for the support of the High School the current year."

November 10. J. E. Waters, A. P. Benchley and Henry Waterman appointed envelope distributors under the Secret Ballot Law.

At this meeting, on the question of revising or altering the Constitution of the Commonwealth, the vote stood yeas, 228; nays, 172.

1852.—March 1. *Voted* seven hundred and fifty dollars for High School the current year.

1853.—March 7. Asa H. Waters, moderator; Ira N. Goddard chosen town clerk (Mr. Goddard has filled the office ever since). At this meeting Asa H. Waters was chosen delegate to the Constitutional Convention at Boston.

March 8. *Voted* one thousand dollars for High School. "*Voted* the Prudential committee of school Districts are authorized to hire teachers for the several school Districts."

1854.—March 6. "*Voted* that the Selectmen be

authorized to purchase of Asa H. Waters about three acres of land suitable for an addition to the cemetery (Central.)"

1855.—March 5. "*Voted* to build a receiving tomb in the cemetery on Grass Hill."

"*Voted* on article 5th, to determine the manner of repairing Highways,"—a committee was chosen.

"*Voted* to abolish the Highway Districts."

In article 5th, at the town-meeting March 5th, it was "to determine the manner of repairing the highways, townways and bridges the year ensuing."

March 19. At the meeting, which was an adjourned one, the committee chosen before reported. The report was accepted. They reported that one agent should be appointed for each district, who should make a semi-annual report to the selectmen.

"*Voted* that the name 'Central Cemetery' be applied to the new cemetery, and the part laid out in 1854 be called the West Section, and the other part be called the East Section."

By-laws in regard to dogs accepted.

"*Voted* that dogs shall pay a tax of one Dollar, and be muzzled if they run at large."

May 23. B. C. Sumner appointed liquor agent by the selectmen.

October 23. At a meeting of the selectmen, T. H. Barton was appointed police officer, with all the powers of constables, except the serving and executing any civil process.

October 30. The town collector and treasurer having absconded, the assessors appointed Ira N. Goddard collector.

November 6. Town chose David Atwood treasurer, to fill vacancy.

1856.—March 8. Simon Farnsworth chosen town treasurer. "*Voted* that the highway districts be re-established, and that surveyors be chosen to repair the same as in former years.

March 10. Orra Goodell, Gates Chapman, A. W. Wood and N. H. Jordan appointed police officers.

March 22. David Atwood chosen to a vacancy on the School Committee, caused by the resignation of Rev. N. Beach.

1857.—March 2. "*Voted* to raise and appropriate the sum of one thousand eight hundred dollars for common schools."

"*Voted* to raise the sum of one thousand dollars for High School."

1858.—March 1. David Atwood chosen town treasurer.

"*Voted* to instruct the selectmen to appoint a liquor agent with a salary of one dollar.

"*Voted* that no compensation be allowed the members of the fire department the year ensuing."

1859.—March 7. This year the town voted three dollars per year to each member of the fire department.

"*Voted* that the selectmen be instructed to retain the control of Academy Hall—that they let it for all

proper purposes, and that the town-meetings be held there." This was the last meeting held in the First Congregational Church building.

1860.—March 19. "Voted that the price per hour for labor on the highways for man be twelve and one-half cents, and for ox-team twelve and one-half cents per hour."

1861.—March 18. "Voted that the selectmen be authorized to negotiate with Col. Waters, or some other person, for a room or rooms for a lock-up."

"Voted to raise the sum of one hundred dollars for the purpose of improving the Dwinell burying ground, so-called, provided, the owners convey the same to the town by quit-claim deed."

March 25. D. G. Prentice, Abiel W. Wood, B. D. Humes, David T. March appointed special police officers.

May 7. "Voted that a committee of seven be appointed to furnish such persons who shall enlist, and to those inhabitants who have enlisted, as soldiers, and be accepted as such, in the volunteer militia, with anything which in the opinion of the committee may be necessary for their comfort, and for the support of such of their families as may need, during the absence of said volunteers, and for organizing said volunteers. That said committee shall call for such sums as they may want for the purpose aforesaid, and the selectmen shall draw their orders therefor upon the treasurer, and may borrow upon the credit of the town, such sums as may be needed for that purpose." The committee chosen were: J. E. Waters, Nymphas Longley, C. D. Morse, Hosea Crane, Sylvester Smith, Silas Dunton, David F. Wood.

June 4. Town "voted to hear the report of the committee chosen at the last meeting."

"Voted that the matter of enlisting and organizing a military company in Millbury be re-committed to the committee chosen at the last meeting, and that they be instructed to proceed with the organizing of such a company, when, in their opinion, the state of the country calls for such an effort on the part of the town."

September 24. "Voted that the town raise the sum of \$2500 to defray the expenses already incurred, in fulfilling the encouragement, given by the Town of Millbury, to such of its inhabitants as may have volunteered, or who may volunteer, as members of the militia of this State in the service of the United States, and that the selectmen be directed to continue supplying the families of such volunteers at their discretion."

"Voted that the town fully approve and ratify the doings of the selectmen in furnishing the families of our townsmen, who are defending our country in this unholy and unprovoked Rebellion."

1862.—July 17. "Voted that the town pay each man who shall voluntarily enlist from this town, under the present requisition, the sum of \$100 upon

his being duly mustered into the service of the United States."

"Voted that the town add to the War Committee Horace Armsby, D. T. March, C. R. Miles, J. E. Bacon."

August 19. "Voted that the town pay one hundred dollars bounty in addition to that already voted to those men who enlisted between August 13th and the 15th inclusive, to fill up the quota of the town on the first 300,000 volunteers called for by the President."

"Voted that the Town offer a bounty of \$150 to each man who will voluntarily enlist to fill up the quota of this town, on the last call for 300,000 men for nine months."

"Voted to choose the following persons as an addition to the War Committee: Dr. S. W. Cooke, E. E. Forbes, H. L. Bancroft, V. A. King, A. A. Livermore, George A. Perry, John G. Wood, Rufus Carter, George W. Mallalieu, Davis Guild, William H. Harrington, E. M. Holman." (At this time war-meetings were frequent.)

1863.—March 16. "Voted the selectmen be authorized to assist such families of volunteers as they shall think best, from the treasury of the town."

"Voted to abolish the School Districts."

1864.—March 30. "Voted the town will raise the sum of \$4400, to be assessed at the next annual assessment, for the purpose of refunding money which has been contributed by individuals, in aid of and for the purpose of procuring its proportion of the quota of volunteers called for from the Commonwealth, under the order of the President, dated October 17, 1863, and February 1, 1864, and for the purpose of paying \$100 to each of those persons who have enlisted under said calls."

"Voted that the Town will pay those persons who have or may enlist into the United States service as a part of the quota of the town, under the last call of the President for 200,000 men—bounty as follows, to wit, to those who enlisted from the time the act was passed by the legislature, authorizing towns to raise money for this purpose to this day \$100, to those who have enlisted to-day or who may hereafter enlist \$125."

1864.—A meeting<sup>1</sup> of the Society of Social Friends was held at the Millbury Bank on the 7th of April. They voted

That the library belonging to the Society be offered to the Town, for the purpose of founding a free public library.

WM. H. HARRINGTON.  
SILAS DUNTON.  
D. B. CHASE.

Committee of Society of Social Friends.

April 11. Town "Voted to accept the Library from the Society," and to choose a Board of Trustees to take charge of it. The first Board of Trustees chosen were: David Atwood, O. H. Waters, Hosea Crane. The

<sup>1</sup> Town records.

chairman of the School Committee and principal of the High School were to be members *ex-officio*.

"Voted that we allow the Catholics to open a cemetery, and that we choose a committee of three to make arrangements which shall be satisfactory to Col. Waters, The Catholic Church and the Town, in regard to a right of way to said cemetery."

1865.—March 13. "Voted to raise a sufficient sum of money to pay the old school districts what may be due them for the school-houses, which the town possesses in consequence of having abolished the school districts."

Town voted two hundred dollars for the town library.

Colonel Waters proposed to give the land to make the road leading from the Town Hall to the cemetery, so as to measure at least forty feet in width, provided the town repair the road and fences.

Thanks of the town were voted to William Dickinson, of Worcester, for the gift of a lot of land for the Park Hill School-house.

April 3. "Voted to choose a board of Trustees of Central Cemetery, to consist of three persons"—Chose Hosea Crane, Joseph Robbins and Jason Emerson.

Voted by the town to adopt by-laws in regard to children truant from school.

The School Committee recommended that the overseers of poor provide suitable accommodations for children sentenced under the truant law.

May 30. The town "Voted to reimburse individuals for money paid for filling the quota of the Town during the year 1864."

December 30. "Voted to establish and maintain Schools for the education of persons over fifteen years of age."

1866.—March 19. Voted to adopt the following resolutions:

"WHEREAS the frequent violation of the Sabbath has become a source of great annoyance to law-abiding citizens of this town, therefore Resolved, that we recommend that our Board of Selectmen see that the law relating to the matter be enforced."

November 6. "Voted to appropriate a sum of money, not exceeding \$300, for the purpose of establishing evening Schools."

1867.—March 11. "Voted to abolish the Liquor agency, and that the liquor on hand be turned into the Street."

(This vote was not literally carried out.)

June 5. At a meeting of the selectmen sixteen persons were appointed police officers.

(Probably to execute the liquor law.)

1868.—June 24. "Voted that no license shall be granted in this town, which will authorize the sale of liquor to be drunk on the premises, of either distilled or fermented liquors or both."

1869.—March 15. "Voted that a committee of five be chosen to investigate the matter of Steam Fire

Engines, also to consider the feasibility of providing suitable reservoirs for use in case of fire."

March 29. Committee on Steam Fire Engines reported "That they had visited two establishments for their manufacture, and examined the different machines, and were unanimous in recommending to the town the purchase of two machines of the third class, for \$6000." Report accepted.

November 2. A committee was chosen to investigate matters at the Almshouse, some complaints having been made of the management.

1870.—March 14. Committee of Investigation of the Almshouse affairs reported "That the inmates had been well treated, and that the house had been kept in good order." John Hopkins, of the committee, dissented to some of the views of the majority, and made a minority report.

"Voted, on motion of Col. Waters, that the present master of the Almshouse be discharged as soon as it can be legally done."

"Voted that the Selectmen be instructed to appoint a committee to look after the interests of the Town in matters relating to the proposed Railway to Cutler's Summit."

Voted for support of schools six thousand dollars.

September 6. "Voted to take a vote by Ballot to see if the town will allow the sale of Ale, Porter and Strong Beer in this town."

The ballot being taken, it was voted no.

1871.—January 3. Cattle notice from the selectmen. Cattle to be prohibited from being driven through town without a certificate from a veterinary surgeon that such cattle are not infected by any contagious disease.

March 20. "Voted that the School Committee be instructed to employ a Superintendent of the public schools in town." Fifteen hundred dollars was appropriated for his salary.

The dog-tax money was voted to the town library.

"Voted that the Selectmen be instructed to procure a place, if possible, for a Lock-up."

April 19. "Voted to rescind the vote instructing the School Committee to employ a Superintendent of Schools."

1872.—March 25. "Voted to accept the provisions of the act of legislature to provide for the election of road commissioners.

"Voted to choose a board of road commissioners—one for two, and one for one year."

"Voted that the Selectmen be authorized and empowered to present to Samuel E. Hull a testimonial, not exceeding in value \$100, for his services in rescuing persons from the water near the Hull Saw-mill."

"Voted \$250 for Memorial Day."

"Voted a Piano for the High School."

"Voted in addition to the Dog-tax \$400 for the town Library."

"Voted for the support of schools in town, \$7500."

"Voted to choose a committee of Seven to take measures to get steam-power on the Millbury Branch Rail Road."

1873.—March 17. "Voted that Firemen be paid ten Dollars and the amount of their poll-tax."

"Voted that a committee of three be appointed to collect facts in regard to the part this town had in the late war, and prepare the same for preservation." The committee appointed were: Colonel A. H. Waters, Ira N. Goddard, Jonathan E. Waters.

A committee was appointed by vote of the town to consider the best means of furnishing water supply for use in case of fire.

The committee on procuring steam on the Millbury Branch reported: "Voted that the report be recommended."

1874.—March 16. "Voted that the Selectmen be authorized to toll the Bells in Town this afternoon at 3 o'clock, during the funeral of Hon. Charles Sumner, and that a committee of three be appointed to present resolutions upon the death of our late Senator."

"Voted to accept the report of the committee chosen at the last annual meeting to collect facts in regard to the part the Town had in the late war, as made by Colonel Waters, the chairman, and that with the record of the Soldiers, as prepared in 1866, it be printed with the next annual reports."

"Voted that a committee of three be appointed to take into consideration and report upon the matter of the pollution of the Blackstone river, by the Worcester System of Sewerage. Committee appointed Geo. A. Flagg, C. D. Morse, O. H. Waters."

"Voted that the road commissioners be instructed to construct side-walks, mentioned in Article 26th of the warrant, and that the town appropriate the sum of \$1200 for the same."

Resolutions were reported on the death of Charles Sumner.

"Voted, that a committee of five be appointed to take into consideration the whole subject of a Town Hall, and report to the Town at the next November meeting."

March 23. "Voted, that the Road Commissioners be authorized to Sell the land mentioned in article 25 of warrant (a gravel pit near the house of John Marlboro') if in their opinion the interests of the Town will not be subverted thereby—with the reservation that if intoxicating liquors shall ever be sold upon said premises the title to said land shall revert to the Town."

Committee appointed at annual meeting in 1873 on water supply in case of fire reported, and it was accepted. They say they have caused two routes to be surveyed—one taking the water from Singletary Pond and the other from Hathaway's Pond. "Your committee are of the opinion that the most feasible and reliable plan for furnishing an adequate supply

of water for fire purposes is by taking the water from Singletary Pond."

"Voted, that the committee chosen in 1873 see on what terms Pipes can be laid, etc., to the Armory Village."

"The vote passed on the 16th of March amended so as to consist of seven persons, and that the committee be instructed to select a suitable site for a Town-House."

"Voted, that the Trustees of cemeteries be a committee to ascertain the graves of any soldiers on the roll of Honor of this town which are not marked, and report the cost of procuring and setting such stones."

April 1. The selectmen notify Wm. Ryan that he has been appointed keeper of the lock-up. Salary, fifty dollars per year.

May 7. "Voted, to receive the majority and minority reports of the committee on Town-House."

November 7. "Voted, that the citizens of this Town are opposed to any division of the County of Worcester."

1875.—March 15. "Town revokes the acceptance of the act in regard to Road Commissioners, and abolishes said board."

The old Board of Selectmen to appoint sixteen highway surveyors.

Two hundred dollars was appropriated for head-stones for soldiers' graves.

"Voted, to have the Selectmen put the Town into Highway districts."

1876.—March 20. "Voted, to appropriate \$75.00 to furnish the armory in Aiken's Block."

"Voted, that the Trustees of Cemeteries be instructed to set apart a lot in the Cemetery (Central) on which to erect head-stones for those soldiers who died elsewhere, but who were credited on the quota of this Town."

"Voted, that head-stones be erected to the graves of those soldiers credited elsewhere, but buried in this Town."

1877.—March 19. Committee on extinguishing fires reported, and the matter was postponed. Again taken up, and a committee of three chosen to investigate. Seven thousand dollars voted for schools.

1878.—March 18. Six hundred dollars voted for lighting the streets. "Voted, that the Town prohibit the encampment of Gypsies within its limits."

"Voted, that the selectmen be authorized to take for the Town from the Commissioners of Inland fisheries a lease to the Town of Dorothy Pond." "Voted, that the Town build a Town-Hall," and a committee of nine was appointed to get plans and estimates. C. D. Morse, chairman. They were also to find a suitable location and report. "Voted three thousand dollars for support of Poor."

March 25. Committee on town-house reported recommending the Rhodes or the Torry lot. The committee desired to sit again, and report further

(granted). Town then voted for a location; the majority was in favor of the Rhodes lot—(present site).

April 13. Committee on plans and estimates for town-house reported—"That as the Town had voted for the Rhodes lot, they had prepared their plans and estimates for that lot." Their total estimate of cost was twenty-eight thousand dollars for the building and lot, ready for the fixtures, and recommended the town to adopt the plans.

A minority report was presented; it agreed with the majority report, so far as it related to the plans, but differed in regard to the manner of stating the probable cost of the same. The minority believed the building would cost not less than thirty-five thousand dollars. It was then voted that the plans of the committee be accepted and adopted.

The same committee were then by vote chosen as a building committee, with power to build, but should not do so until the money was appropriated. The committee were David Atwood, H. L. Bancroft, Rufus Carter, John Hopkins, B. B. Howard, C. D. Morse, I. B. Sayles, N. H. Sears, L. L. Whitney.

A motion was made to borrow twenty-eight thousand dollars, and appropriate it for buying a lot and building a Town House. It did not receive a two-thirds vote, and failed to pass. It was then voted to borrow twenty-eight thousand dollars in anticipation of the taxes of 1878 and 1879, for the same purpose, and the vote passed. (This vote was afterwards rescinded.)

Attempts were afterwards made to change the location of the new Town House; but the \$28,000 was finally voted, payable in ten years, and the Rhodes lot retained. But before the matter ended, the building far exceeded in cost the before-mentioned sum. \$2000 was paid for the lot, and later the town bought a small strip of land more. The total cost of the Town House completed was \$40,936.72.

1879.—March 24. "Voted that the Town join with Sutton in taking for both towns a lease of Singletary Pond." It was afterwards stocked with Lake Superior salmon trout.

"Voted \$100 for grading the Common in Armory Village."

1880.—March 22. Town first met in new Town Hall.

"Voted to reduce the number of School Committee from six to three, as provided by law."

"Voted \$1000 for Town Library, to be wholly expended for Books."

"Voted, the Reading-room (so-called) be set apart to be used for the Town Library."

"Voted that the old Town Hall be turned over to the School Committee, to be used for School purposes."

"Voted \$500 for Sidewalks from Crane & Waters to Wheeler's Village."

"Voted that Millbury be a Fair town, and that the

management of Fairs shall be under the control of the Selectmen."

May 5. Tramp officers appointed by the Selectmen this date; they were to arrest all such.

1881.—March 21. "Voted a board of Health be appointed, and that a committee be appointed to present names for such a board."

"Voted, a committee of three be appointed to consider the purchase of Steam Fire Engines."

Committee on Pollution of Blackstone River made a partial report; they were instructed to press the matter as they saw fit.

Committee on Board of Health, chosen to select names for such a board, reported a list of names, when it was "Voted that further consideration of the report be postponed."

November 8. "Voted that the Treasurer be authorized to borrow money to meet the expenses of the committee on pollution of the Blackstone."

1882.—March 20. "Voted the town ask the legislature to extend to women who are citizens the right to hold town offices and to vote in town affairs, on the same terms as male citizens."

In regard to the unfenced part of the Old Common, and the title to it, the town "voted that if a clear title to the land can be obtained, the sum of \$150 be appropriated to fence it."

"Voted to accept the report of the committee on water supply and Fire-Engines."

March 29. A committee was appointed to see about pipes and hydrants in the streets.

1883.—March 19. The committee on steam fire-engines having reported it best to purchase two steamers, the selectmen were instructed to have a trial of machines, and then to purchase the best machines.

A committee was appointed to confer with the towns of Grafton and Northbridge in regard to having a superintendent of schools in conjunction with them.

November 6. "Voted a committee be appointed to provide suitable quarters for Steamer No. 1."

1884.—March 17. "Voted \$800 for lighting the streets." \$9000 was voted for schools.

"Voted the Engineers make arrangements to give alarm at fires, expense not to exceed \$250."

June 27. Registrars of voters appointed by the selectmen.

November 4. Self-registering ballot-box used. The box registered 616 votes and 601 names were checked on the voting list. The ballots were then taken from the box and found to be 601 canceled and one uncanceled.

1885.—March 16. "Voted the committee on pollution of the Blackstone be continued in office and to continue their efforts."

The selectmen were authorized to put the cistern in order near the Baptist Church.

By-laws of the town adopted, and all existing by-laws, except those relating to truants, repealed.

1886.—March 15. "Voted for the support of the Poor \$3,000."

April 7. Nathan J. Streeter appointed police-officer by the selectmen.

1887.—March 21. "Voted, that the town most strongly protests against any amendment nullifying, or in any way changing, the provision of said act, that said Sewerage (Worcester) shall be purified before being anywhere discharged into the Blackstone River." The above referring to petitions presented to the Legislature looking to an amendment to the Sewerage Act before passed in 1886.

"Resolved, that the Town instruct the Selectmen to oppose the granting of any charter to any private corporation for the purpose of supplying the town with water."

"Voted, to appropriate the sum of \$1,200 for Electric Lights."

1888.—March 19. "\$3,500 voted for repairing High-School building. For Schools, \$9,000."

"Voted, that Hon. H. L. Bancroft be a committee to correspond with the proper person in regard to the portraits of Gen. Caleb Burbank and Wife, and that said portraits be obtained, if possible, and placed in the Library Room."

November 6. "Water question indefinitely postponed."

The present Board of Selectmen, 1888, are George F. Chase, James H. Ferguson, I. B. Sayles.

CHURCH HISTORY.—Warrant for the first meeting in Second or North Parish, Sutton :

WORCESTER SS. To Jeremiah Buckman, Jr., of Sutton, in ye county of Worcester, Greeting :

You are hereby required in his majesties name to warn and give notice to ye freeholders and others, inhabitants in ye Second Parish in Sutton aforesaid, qualified to vote in Town affairs, that they must meet at the house of Mr. Richard Singletary, in said Sutton, in said precinct, on Monday, the twenty-sixth Day of December instant, at nine of ye clock in ye forenoon, then and there to act on each of ye particulars expressed in above request.<sup>1</sup> By posting a copy of the request and this warrant at such public place in said Precinct, hearof fail not and make return hearof and of your doings heard in at or before ye said twenty-sixth Day of December instant at nine o'clock in ye morning. Given under my hand and Seal at Oxford this Eighth Day of December, A.D. 1743.

RICHARD MOORE, *Justice of Peace.*

*First Congregational Church.*—Accordingly, on the 26th of December, 1743,<sup>2</sup> the first meeting of the parish was held at the house of Richard Singletary. The first moderator was Capt. Timothy Carter; and Robert Goddard, clerk. The parish continued to hold meetings at the same place until May, 1745. The house was also used for religious meetings for quite a period. April 29, 1745, Rev. Matthew Bridge was called to the ministry, but declined. They next called Rev. Josiah Dunster, and he also refused. The third call was extended to James Wellman. The church was formally organized on the 10th of September, 1747. Mr. Wellman was ordained October 7, 1747. Among those who participated at the or-

dination was the Rev. Thaddeus Maccarty, of the Old South Church, Worcester. The church adopted the Cambridge platform. Ruling elders were chosen by this church, but it has always been carried on under the Congregational system. The first church building was begun in 1744,<sup>3</sup> on the spot now known as the Old Common. It was a barn-like structure, and during the latter part of its use as a church it was known as "The Lord's Barn." It was afterwards removed across the road some four or five rods, and used in connection with a public-house. The next church edifice was begun in 1802, and was dedicated to the service of God November 27, 1804. Soon after the year 1827 the idea was put forth of removing this church to Bramanville. It became a question to be discussed in parish meetings about the year 1832. There were many opinions in regard to the matter. It was finally left to a board of referees, composed of members of churches in different places, who decided that it would be best for the church to have the building removed. The parish accepted their report, and the church was taken down in 1835, and was again consecrated to God January 14, 1836. The pastors who have presided over this church have been as follows: Rev. James Wellman, ordained October 7, 1747, dismissed July 22, 1760; Rev. Ebenezer Chaplin, ordained November 14, 1764, dismissed March 22, 1792; Rev. Joseph Goffe, ordained September 10, 1794, dismissed December 9, 1830; Rev. Osgood Herrick, ordained December 9, 1830, died March 16, 1837; Rev. Nathaniel Beach, ordained November 22, 1837, dismissed May 11, 1857; Rev. Edmund Y. Garrette, installed September 30, 1857, dismissed November 3, 1869; Rev. Geo. A. Putnam, installed April 11, 1872.

Among those who have been deacons in this church we find the name of Asa Waters, the Revolutionary gun-maker. The present ones are David T. March, Osgood H. Waters, Royal Thayer. There have been no ruling elders elected in this church since Jonathan Waters, in 1829. Among the early elders was Amos Singletary, the first male white child born in Sutton. This church has been a power for good in the community, and is still doing a good work. The total number connected with it since its organization is one thousand and ninety-five, according to the records the church has. But it must be remembered that those for the first seventeen years after its organization are lost.

Rev. Mr. Putnam, the present pastor, in 1875, made quite an extended visit to Palestine and the Holy Land, drawing inspiration and knowledge at places sacred for all time. The present superintendent of the Sunday-school is D. Edmund March.

*Second Congregational Church and Society.*—A handful of praying men and women, including among its number Asa Waters, members of the First Church in

<sup>1</sup> Petition for meeting.

<sup>2</sup> Church records.

<sup>3</sup> Church records.

Millbury, may justly be styled the founders of the Second Congregational Church and Society. Mr. Waters, with others, was instrumental in procuring the charter under which it now lives. It contained a wholly original provision to operate as a bar against its ever being subverted or converted to the use of any other sect or denomination, as was often done in those days. Mr. Waters was among the first to move in the matter of colonizing from the parent society. After the separation the infant colony had no fit place for holding meetings. Mr. Waters built and fitted up a hall, lighted and warmed it expressly for their accommodation. Here, free from rent, the infant society was encouraged to grow.

Among those who officiated at this place from Sabbath to Sabbath was Rev. Dr. Austin, of Worcester. Rev. Joseph Goffe, who had keenly felt their removal from his church, had forgiven them so far, that he presided at the evening meetings. At this time a fierce and bitter controversy was raging throughout the State between the Orthodox (so called) and the Unitarians. The latter had gained control of Harvard College, and a powerful wave of Unitarianism was sweeping out of Boston and Cambridge, and overturning the oldest and best established churches in the principal towns throughout the Commonwealth. This was the situation at the time the Second Congregational Church was being formed in 1827.

By law every man was obliged to pay taxes for the support of religion somewhere. The restrictions on voting in most societies was very loose. One had only to hand in his name to the clerk of any society he chose to become a member and to vote.

Mr. Waters was greatly exercised by these events, and wishing to guard the new society against the sectarian wave then raging and rolling over the State, went to consult the Hon. Alfred D. Foster, who, among the eminent lawyers of that day, stood almost alone in his firm adherence to the Orthodox faith.

Mr. Foster drew up the charter and by-laws, and inserted a provision that to become a member the applicant must receive a majority affirmative vote from the present members. This was an original idea, and was afterwards copied into other charters. It proved an effectual barrier against sudden assaults, and on one occasion it undoubtedly saved this society from a like overthrow. The same provision is found in a charter at Lowell and in a charter at Amesbury—each member may cast as many votes as he owns pews.

The charter is dated February 10, 1827, and its first section reads:

Be it enacted, etc., that Asa Waters,<sup>1</sup> Elias Forbes, Joseph Torrey, Ver-non Stiles, David Woodward, Calvin Barker, Simon Farnsworth and Aaron Traek be incorporated into a religious Society.

The Second Congregational Society dates its birth from this act of incorporation February 10, 1827.

<sup>1</sup> Although the first-named in the act of incorporation and a prime mover in the matter of separation, the records show that Mr. Waters was not dismissed from the First Church until January 1, 1838.

It will be noticed that the act of incorporation is dated, some time before a petition was presented to the parent church for any to be dismissed for such a purpose. This proceeding was considered irregular by the First Church, and they complained of it. Their records have considerable to say in regard to the matter.

June 30,<sup>2</sup> 1827, a petition from forty persons living in Armory Village and near by, who were members of the First Church, was presented, asking to be dismissed. On the 16th of July the request was granted, and on the 23d of August they formed themselves into what was known as the Presbyterian Church of Millbury. In 1834 the church was changed from the Presbyterian to the Congregational form of government. The church edifice was completed and dedicated October 2, 1828, and in 1867 a parsonage was completed and first occupied by Rev. Stacy Fowler, the same year. We find that though Rev. Joseph Goffe had, in the beginning, objected to the formation of this church, he became a member of it February 5, 1837.

Among those who have filled the office of deacon in this church may be mentioned: Moses Dunton, Moses L. Morse, John Leland, Henry Mills, Thomas H. Witherby and Nathaniel Goddard, the latter chosen in 1836, and continued until his death, in 1887. The present ones are Amos Armsby and A. W. Lincoln. The superintendent of the Sunday-school is Lyman S. Waters.

In the early part of 1888 the pastor, Rev. John L. Ewell, was on leave of absence for a visit to the Holy Land. He returned with health and spirits renewed for more efficient work. The membership in this church January 1, 1889, was two hundred and twelve. The total number that have joined since its organization has been seven hundred and thirty-two. This church is in a flourishing condition, and is doing a great work for the moral and spiritual welfare of the community.

The following have been pastors of this church: Rev. George W. Campbell, installed January 13, 1830, dismissed in 1833; William A. Larned, ordained May 7, 1834, dismissed October 19, 1835; Samuel G. Buckingham, D.D., ordained May 24, 1837, dismissed May 3, 1847; Leverett Griggs, D.D., installed September 22, 1847, dismissed January 19, 1856; Lewis Jessup, installed April 24, 1856, dismissed March 29, 1860; Charles H. Pierce, installed October 22, 1862, died October 5, 1865; Stacy Fowler, installed December 6, 1866, dismissed March 5, 1878; John L. Ewell, installed April 16, 1878.

*Methodist Episcopal.*—A Methodist class was formed in this town in 1825 by Rev. William Archer, an English preacher. This class flourished a short time and was then discontinued. In 1835 another class was formed by Rev. Erastus Spaulding, still liv-

<sup>2</sup> First Church records.

ing in town and well-known as Father Spaulding. The church was organized the same year under the circuit plan. The preachers on this circuit at that time were Revs. M. P. Alderman and William Heath. The first regular stationed minister with this church was Thomas Tucker. The church building was dedicated to the service of God November 17, 1840; the sermon was by Rev. Orange Scott. Since the advent of Mr. Tucker the church has been regularly supplied by the Conference with ministers who have labored faithfully to advance her interests. This church has been successful in rescuing many from the ways of sin and planting their feet on a sure foundation. The present pastor is Rev. W. C. Townsend, it being his third year among this people. The church is prosperous and a bright future is before it. The Sunday-school is in charge of Mr. F. W. Sawyer and is well attended.

Bishop W. F. Mallalieu, of the Methodist Episcopal Church, was once an active member of this church, and his relatives still reside here. He was president of the Lyceum at Bramanville in 1856, and was greatly interested in literary work.

*Baptist.*—The town records show that as early as 1814 there were in Millbury several people belonging to the Baptist Church at Grafton, and also that as early as 1817 there was a Baptist Society at Millbury. May 10, 1826, a more thorough organization was effected among them, to spread their doctrines among the people. This organization had its ups and downs, Revs. Christopher Hale, Otis Converse, Elder Harrington and others preaching for them. Strong objections were made by a few people in town to these reverend gentlemen coming here for that purpose; anonymous letters were written to them, telling them to "stay at home and mind your own business; when we want you we will send for you."

At the house of Abijah Gleason, in West Millbury, December 23, 1836, the Baptist Church of this town was formed, with eighteen constituent members. The first public meeting was held in the old school-house, the site of the present Union Chapel. The West Congregational Church having been built in 1837, the Baptists joined with them in Union services there. In 1840 this Union arrangement was closed, and the church removed to Armory Village, where distinctively Baptist services were held in the old Academy Hall. The first regularly settled pastor was Rev. Hervey Fitts, in 1841.

Rev. Hervey Fitts remained with the church from 1841 to 1843; Rev. James Upham, D.D., 1843-45; Rev. S. J. Bronson, 1846-53, and again, 1870-74; Rev. Cyrus T. Tucker, 1853-56; Rev. S. A. Thomas, 1858-61; Rev. J. E. Brown, 1863-67; C. A. Skinner, 1867-69; Rev. George B. Gow, D.D., 1874-80; Rev. D. W. Hoyt, 1880-89.

December 26, 1864, their house of worship was occupied for the first time, and since then the church has been in a prosperous condition. The present

deacons are Cyrus White, B. F. McIntyre and Francis R. Herrick, the two latter in active service. This church has connected with it an organization known as the "Gough Temperance Society," in charge of the following committee: John C. Crane, James A. Dike, Henry B. Magoon. The church accepted the resignation of Rev. D. W. Hoyt, January 6, 1889. P. W. Wood superintends the Sunday-school.

*The West Congregational Church.*—Owing to the removal of the First Congregational Church building from the "Old Common" to Bramanville, in 1835, some who were dissatisfied with the change determined upon building a church at West Millbury. April 20, 1837, found the work completed, and twenty-nine members withdrew from the First Church. May 23, 1837, the West Congregational Church was organized with forty-five members. The same articles of faith and covenant used by the First Church were adopted by them. The early Congregational ministers who preached here were Rev. Caleb B. Elliott and Rev. A. Phillips. Mr. Elliott was educated for the ministry by General Burbank. Other ministers in conjunction with these carried on the work until 1840, when, on July 8th, Rev. Sidney Holman was installed as pastor. Previous to this the Congregationalists and Baptists had used it as a union church, the Congregationalists having their pastors three Sundays a month, and the Baptists one—each paying in that proportion. Rev. Mr. Holman was dismissed June 11, 1851. After this services, from time to time, were held until December 28, 1857, when the church disbanded. Some time later the church was again opened, and preachers were supplied by the Methodist Conference. The church building, which stood on land now owned by Mr. Ira Glazier, was sold about 1871, and removed about two years later. The closing history of this building will be found under that of the Union Chapel.

The Baptists, while worshipping here in conjunction with the Congregationalists, were supplied by Rev. Hervey Fitts, Professor Knowles, of Newton, and Jonah G. Warren, all faithful preachers of the Word.

*Protestant Episcopal Mission.*—A few years previous to 1879 Rev. James T. Ellis, then rector of St. John's Church at Wilkinsonville, opened, at the invitation of his parishioners in Millbury, a mission. Meetings were held awhile in the old Town Hall, and for a longer time in the vestry of the Methodist Church. Upon the completion of the present Town Hall the mission met there. Mr. Ellis remained with it until 1882, when he resigned at the parent church. Rev. John Gregson was next in charge, and labored faithfully to advance its interests. But the small number becoming discouraged, the mission was discontinued at the close of 1888.

The year 1884 opens the first chapter of the *First Unitarian Society in Millbury*. The matter of organizing such a society had for some time been

talked about. The first services were held in Blanchard Hall Sunday, March 16, 1884; the preacher was Rev. Austin F. Garver, of Worcester. The society's covenant was adopted June 29, 1884. The provisions were that in this church all seats should be free. The first Sunday-school was organized July 13, 1884.

The society was incorporated under the law of the State March 19, 1885. In that year a lot was purchased and given to the society by John Rhodes, Silas Dunton and Thomas A. Winter. The church building, a unique structure, was completed in August, 1888. The September following, on the 20th, the new edifice was dedicated to the service of God. In 1885 a call was extended to Rev. Julius Blass, who accepted, and still remains beloved by his people.

*Union Chapel (West Millbury).*—As before stated, the West Congregational Church was disbanded in 1857, but soon afterwards the people, feeling the need of religious services, applied to the Methodist Episcopal Conference to be supplied, who sent to the people Rev. Messrs. Hamilton and Abott. Other local preachers followed—Rev. J. J. Woodbury (Methodist) and Rev. Mr. Barber (a Baptist), but not under the Conference. Rev. Edwin S. Snow, while supplying the Methodist Episcopal Church at Millbury, occasionally preached Sunday afternoons.

The church building was sold to John G. Wood about 1871, and converted into a cotton-factory, and burned April 27, 1876; about 1878 religious services began to be holden in the school house, and were continued there for several years, several of the pastors in town supplying in the afternoon.

In 1887 the people began in earnest to talk of having a new chapel. A Ladies' Union Entertainment Society was formed, officers chosen and the society placed on a working basis. A few entertainments were given, and in the fall the following solicitors were chosen to procure subscriptions to build the chapel: Mrs. J. S. Blanchard, Mrs. J. C. Crane, Mrs. E. C. Goulding, Mrs. H. W. Davidson, Lizzie Wheeler, Florence Freeman, Leora Balcom and Florence Crane, who forthwith collected sufficient funds to begin the work. A Building Committee was chosen as follows: Thomas Windle, H. W. Bentley, Ira Glazier, Freeman Vanorman and H. W. Davidson. The building was soon up and finished, and on May 29, 1888, it was dedicated to the service of the Most High. The building and property is to be forever held by a Board of Trustees, for the people of the village. These trustees are to be members of the following churches in town,—Baptist Church, First and Second Congregational Churches and the Methodist Episcopal Church. The number is three. The first board were Ira Glazier, Edwin Hoyle and Theodore B. Sherwood. No regular preachers are settled here, but the pastors of the above-named churches officiate Sunday afternoons, with Mr. John C. Crane, a local preacher of the Baptist Church.

A Sunday-school is maintained throughout the year, and a weekly prayer-meeting is held in the neighborhood. The superintendent of the Sunday-school is J. C. Crane.

The Board of Trustees for 1889 are J. C. Crane, H. W. Davidson and Mrs. H. W. Bentley.

*St. Bridget's (Catholic).*—The first Catholic clergyman to officiate was Rev. James Fitton, the first pastor of St. John's Church in Worcester. Millbury was established as a mission in 1850, when this church was begun and dedicated to God. Several years previous to this, however, services were held in the Town Hall, in the Arcade, and in the house of James Campbell, near Wheeler's Village. Rev. Matthew Gibson succeeded Father Fitton at Worcester, and also in missionary work here. The succeeding pastors in mission work here were Revs. A. L'Eveque and E. J. Sheridan, of Uxbridge, they being succeeded by Rev. J. J. Power. During the pastorate of Father Power the church was enlarged. In 1869 the mission ended, and the church became a regular parish, with Rev. M. J. Doherty as resident priest. This church has a wide-spread influence among our Catholic fellow-citizens.

On the death of Rev. M. J. Doherty, Rev. William H. Goggin—then rector of the cathedral in Springfield—was appointed by Bishop O'Reilly, pastor of St. Bridget's Church, September 1, 1886. Within one year Father Goggin completely remodeled the church so as to make it one of the prettiest in town. The congregation numbers eleven hundred souls. The church has several societies,—Sodalities of the Blessed Virgin and Children of Mary, temperance societies for boys and young men. There is also connected with the church a flourishing literary society of sixty members, with rooms in the Arcade Block, on Elm Street.

*Church of the Assumption (French Catholic).*—This church was dedicated November 14, 1886. The first priest in charge was the Rev. J. A. Charland, who still remains and is highly esteemed by his people. The church is of wood, and has ample grounds connected with it. The regular attendance is about six hundred souls.

A St. Jean Baptiste Society was formed in town in 1872, and ended in 1875.

Again started January 31, 1880, and still continues.

**SCHOOLS.**—The people of Millbury early saw the need of having school accommodations, but the beginning was very small. At the annual meeting of the town of Sutton in 1813, the year of the separation, the parent town had voted one thousand dollars for schools. August 23d of the same year Millbury voted to raise her proportion of this money, which was three hundred and sixty-five dollars, a sum that would about pay the salary of a good teacher at the present time. The above sum was the whole amount paid for schooling in 1813. In 1887 there was paid for the salaries of teachers in town \$7,772.44. For

the year ending March 16, 1888, the total receipts for school purposes was \$10,246.01. The expenditures were the same.

The school-house of early days in Millbury was a different building from that of the present time, but from those early structures have gone forth noble men and women, who have made their mark in the world, whose lives have shed lustre on the town of their birth. But those structures have been removed by the hand of time, and more commodious houses have arisen. The old residence of Gen. Caleb Burbank on Burbank Hill, was bought and remodeled for school purposes. It stands on the hill overlooking the valley of the Blackstone, a reminder of him who did so much for the prosperity of our town.

Private schools were early held in Millbury, an excellent one being kept at Bramanville. September 5, 1836, Mr. Thomas P. Green, from Amherst College, opened what he called a high school at West Millbury. The terms were three dollars per quarter, but for Greek, Latin and French four dollars was charged. The Millbury Academy was incorporated March 5, 1832. Those named in the act were Gen. Caleb Burbank, Asa Waters, Simon Farnsworth, Jonas Sibley, A. G. Randall.

The property was divided into shares, of which many were taken by citizens. They were signed by Gen. C. Burbank, president.

The academy was advertised to commence October 24, 1832.

We find that William Hall was the first principal; in 1834, Mr. Richardson; R. L. Hathaway in 1837; also William H. Wood in 1837; Foster Freeland in 1840; A. P. Stone in 1851. The academy received a gift of land from Asa Waters.

A. H. Waters was secretary of the Board of trustees in 1834.

It was a successful institution, for several years being well patronized by people in and out of town, but we find it advertised to be sold at auction in 1845. It was evidently not sold, for it was continued as an academy for some years after. Among those who graduated from this academy was the Hon. Horace Maynard, a name that afterwards became familiar to the people of this and other countries.

In 1851 the town voted to establish a high school. The same year a committee was chosen to purchase the academy property, and it was done that year, and money appropriated for the support of the high school there. The year following seven hundred and fifty dollars was appropriated for the same purpose.

Ever since that time a high school has been maintained. The school at present is under the charge of Mr. S. J. Blanpied, an excellent teacher. The total number of schools in town is seventeen, and it is believed they will compare favorably with those in other places. The first persons in town authorized as a committee to have charge of schools were Stephen Blanchard, Dr. Amasa Braman, Dr. William M. Bene-

dict, Samuel Waters, Captain Asa Goodell, Josiah S. Prentice and Josiah Stiles, Esq. They were chosen in 1815. About 1827, a new law having come into operation, six persons were chosen as a town School Committee as follows: Dr. William M. Benedict, Joseph Griggs, Oliver Rice, Vernon Stiles, Paul C. Chase and Deacon Hervey Pierce.

In this connection we would not overlook Dr. Leonard Spaulding and Dr. George C. Webber, who for long years served on the School Committee, and faithfully labored with others to advance the cause of education among us.

The present School Committee are Dr. George A. Slocomb, Irving B. Sayles and Deacon David T. March.

Among the former school-teachers at West Millbury was Clara Barton, a lady whose presence is hailed with delight by the people of two continents, and whose name will go down to latest posterity as, "One of the few, the immortal names that were not born to die."

**TOWN LIBRARY.**—In 1851 a society connected with the Millbury Academy existed called "Social Friends." Through their efforts had been collected about six hundred volumes of books. The old academy was about to be merged into the present high school. This society having made so good a beginning in 1864, determined among themselves to offer their library to the town on condition that it be cared for and increased from year to year. The town accepted the offer with a vote of thanks; a board of trustees were chosen to serve each for three years. This was the beginning of the present public library, which is kept in the town building. The librarian is Abby B. Freeman. Present number of volumes, five thousand seven hundred and ninety-four. Trustees, Irving B. Sayles, D. Edmund March, John Hopkins.

**NEWSPAPERS AND PRINTING.**—In the history of the town there have been two or three efforts made to establish a newspaper here; one was the *Millbury Plebeian*, but that, with others, were short-lived. The last was the *Millbury Chronicle*, in 1877. Frederick W. Fletcher was editor and proprietor. It was a fair little sheet and published weekly. The number we have before us is dated July 6, 1877, and contains an account of the 4th of July Studdefunk parade of that year. Several printing-offices have existed. Benjamin T. Albro was a printer here in 1832; he printed at that time the Confession of Faith and Covenant of the First Presbyterian Church (now Second Congregational). Later a Mr. Thompson did small job work. Sewall Goodridge was a printer in Sutton in 1808, but whether he was at that time in what is now the limits of Millbury is unknown. Sermons printed by him for Rev. Joseph Goffe, in 1808, are still in existence. Our town relies chiefly upon Boston and Worcester for its daily newspapers. In 1871 a directory of the town was published by Tyler & Seagrave, of Worcester, and in 1886 another was published by A. E.

Foss & Co., of Needham, Mass. A news-room was formerly kept by Perlin W. Graves, and at the present time by William H. Belcher.

**RAILROADS.**—Millbury is well supplied with railroad communication, the Providence and Worcester line furnishing many trains per day. A branch of the Boston and Albany was early built at a cost of forty-one thousand dollars. The Providence and Worcester station is in charge of F. W. Sawyer, and the Boston and Albany in charge of B. T. Rice. Various lines of stages have from time to time existed, but the last one was taken off in 1888. Great things were expected of the old Blackstone Canal, and, in fact, it did give quite an impetus to the business of the town, but the railroads that soon followed, gave a death-blow to that enterprise. The old upper basin of the canal was close by the residence of the late Nelson Walling, the lower one near the Tourtellotte tavern.

**SOCIETIES.**—May 20, 1812, the Religious Charitable Society of the County of Worcester was formed in the church of the Second Parish of Sutton, then situated on what is now the old Common in Millbury. This society had several objects in view, and gentlemen from several towns in the county were present. The objects were: "1st. To aid indigent young men of piety and talents in the acquisition of a suitable education, with a view to the Christian ministry. 2d. To afford pecuniary aid to the American Board of Commissioners for Foreign Missions. 3d. To assist feeble churches and societies in maintaining among them the preaching and institutions of the Gospel." A committee was chosen to prepare an address to the people, who reported June 16th, of the same year. The first board of officers chosen were to act until the first annual meeting in August following, and were Rev. Dr. John Crane, of Northbridge, president, and Rev. Benjamin Wood, of Upton, secretary. A board of directors were also chosen. At the annual meeting in August, Dr. Crane was again chosen president, the meeting being held at Sutton South Parish. The society, in its day, was productive of much good.

**Temperance Societies.**—Soon after the year 1800, a temperance society was formed in what is now the limits of this town. Its purpose was not total abstinence, only moderation in drinking. Reports were required of its members every Saturday evening. About the year 1820 a total abstinence society was formed here that became a power for good. The good old ministers of those days had not all then come to this point, for we find in the report of the cattle show of 1824 that the Rev. Joseph Goffe, of Millbury, took a premium of six dollars for the best cider, and in the *Spy* of the same year he had a long article on how to make good cider. March 18, 1864, Blackstone Lodge of Good Templars was organized. In 1871 the membership was one hundred and fifty-seven. The presiding officer was P. W. Wood. A Gough temperance society was formed in the Baptist Church in 1886,

which is in charge of a committee of three.<sup>1</sup> Through the influence of this society many have signed the pledge. The Millbury Temperance Union was formed at the Baptist Church in 1886. This society is composed of males only, and represented in it are members of the several churches, and others outside of the church. Among its number are many of the solid men of the town. It has done much for the moral welfare of the place. The first president was L. L. Whitney, and the present one Rev. D. W. Hoyt. The total membership is about one hundred. There is also a lodge of Good Templars still in the field.

**An Anti-Slavery Society** was early formed here, for we find in 1835 an organization effected to resist the aggressions of the slave-power. The society had much to do with changing the sentiment of the people on the question of slavery. Sterry S. Kegwin was secretary, and the executive committee were Samuel Waters, Tyrus March, Alex. Hamilton, John Morse and Joseph Griggs.

**Lyceum.**—It is said that the first Lyceum in the county started in this town. Investigation on this point has confirmed the truth of the above statement, but the date of its origin cannot be given.

**Masonic.**—Olive Branch Lodge, F. and A. M., received its charter September 14, 1797, from the Grand Lodge of Massachusetts. It is signed by Paul Revere, grand master; Isaiah Thomas, senior grand warden; Joseph Laughton, junior grand warden; and Daniel Oliver, secretary. The first communication was held May 1, 1797. The first officers of the lodge were Jonathan Larned, master; D. Fiske, S. W.; J. Davis, J. W.; S. Larned, secretary; S. Town, treasurer; J. Harris, S. D.; J. Kingsbury, J. D.; N. Whitman, S. S.; P. Butler, J. S.; Wm. Robinson, tyler. Among the list of past masters, deceased, are Archibald Campbell, Jonas L. Sibley, Jotham Gale, Dr. Levi Rawson, H. E. Rockwell. Of the masters now living we give N. H. Greenwood, R. N. Holman, I. B. Sayles, N. H. Sears, James Dyson, Jr., S. E. Hull, F. K. Hodgeman, S. N. Rogers, James H. Ferguson, E. J. Humphreys. The officers for the present year are F. A. Lapham, W. M.; C. H. Hakes, S. W.; C. B. Perry, J. D.; T. A. Barrow, treasurer; R. R. Crane, secretary; Rev. Julius Blass, chaplain; John French, marshal; Geo. C. Webber, S. D.; H. F. Rice, J. D.; H. T. Merriam and Fred. Ogden, stewards; A. L. Tolman, I. S.; Geo. Gates, tyler.

Tyrian Royal Arch Chapter, chartered December 9, A. I. 2403, meets the first Tuesday evening of each month. Annual convocation held. Past High Priests—M. E. Irving B. Sayles, M. E. Edward J. Humphreys, M. E. Samuel E. Hall, M. E. George J. Dudley, M. E. George C. Webber, M. D.

The Masonic lodges of the town include among its members many of the leading citizens, who are thoroughly interested in the work of the craft.

<sup>1</sup> Gough's career as a lecturer may be said to have begun in this town.

*Order Easter Star*, Adah Chapter, No. 15, chartered July 10, 1884, organized April 28th, same year, had eighteen charter-members. The order has a board of three trustees and a relief committee, and meets once a month. The first W. M. was Mrs. J. A. Crane; first W. P., Mr. E. J. Humphreys; first Secretary, Mrs. J. C. Goddard. Officers for 1889—W. M., Miss Nellie M. Nye; Secretary, Mrs. Lizzie G. Winter.

*Patrons of Husbandry*, Millbury Grange, No. 107, was organized Feb. 9, 1883. The first Master was N. B. Chase; first Secretary, Lilla Wheelock; first Treasurer, C. H. Maxham; first Chaplain, C. H. Searles. Following is a partial list of present officers: Master, I. E. Howe; Secretary, H. W. Carter; Treasurer, G. J. Dudley; Steward, S. N. Rogers; Chaplain, C. H. Searles. Past Masters—N. B. Chase, Geo. J. Dudley, H. W. Carter, C. R. Brackett. The present membership is ninety-one, and a good interest is maintained in the work.

*Royal Arcanum*.—Millbury Council, chartered March, 1885. It is a fraternal benevolent institution, having an assessment plan of insurance connected with it. Its object is a good one and the council here is in a flourishing condition. The first regent was F. A. Lapham, E. J. Humphreys was first orator and J. Henry Searles the first secretary. Their meetings are held in the Town Hall building. The following are some of the officers: C. F. Gale, regent; A. H. Batchelor, secretary; J. A. Dike, chaplain; E. J. Humphreys, T. A. Winter, H. T. Merriam, trustees.

*Ancient Order of Hibernians*.—Millbury Division, No. 9, meets once a month. The division was organized November, 1871. The first officers were: President, Thomas McCarthy; Vice-President, John Ivory; Recording Secretary, Patrick Kinnery; Financial Secretary, Patrick T. Duggan; Treasurer, Jeremiah Sullivan. Present officers: President, John Clifford; Vice-President, Thomas Brown; Recording Secretary, Patrick Carroll; Financial Secretary, Jeremiah Keleher; Treasurer, Edward J. Dolan. Present membership, seventy-three.

*Bands*.—In 1853 the Millbury Cornet Band existed, of which J. P. Denison was leader.

The Millbury Cadet Band was organized June 10, 1886, with a membership of twenty-four. The first leader was Frank Weidmiller. In September of that year Mr. C. G. Marcy, of Worcester, became teacher and leader. Mr. William C. Gegenheimer is the present leader. The band numbers twenty members.

*Grand Army of the Republic*.—George A. Custer Post 70, G. A. R., was organized August 10, 1876. The following were charter members: Edward E. Howe, A. B. Slocum, Dr. George C. Webber, Edward Holden, George R. Leland, O. N. Carpenter, Daniel Cobb, James Clark, R. E. Bowen, Dr. William H. Lincoln. The first commander was Edward E. Howe; first chaplain, B. F. McIntyre; first adjutant, R. D. Loomis. The present officers are: Commander, R.

D. Loomis; S. V. C., H. F. Hobart; J. V. C., David Herlihey; Surgeon, John G. French; Adjutant, Joseph Packard; S. M., Thomas J. Tourtellotte; Chaplain, M. M. Goodnow; Q. M., S. D. Waters; O. D., S. C. Spooner; O. G., Thomas Donlon; Q. M. S., T. A. Winter. The post meets twice a month, and has within its membership many battle-scarred veterans, who fought that our Union might be preserved. They deserve well of their country; year by year their numbers are growing less as they go to join their comrades who passed on before.

*Independent Order of Odd Fellows*.—Morning Star Lodge, I. O. O. F., No. 130. This lodge was instituted September 25, 1883, with fourteen charter members and sixteen joined on the night of institution. First officers elected were: N. G., D. M. Waterman; V. G., Herbert A. Ryan; R. C., H. W. Carter; Permanent Secretary, Chas. Whitworth. First appointed officers were: R. S. to N. G., C. S. Parker; L. S. to N. G., H. T. Spear; R. S. to V. G., F. W. Sawyer; L. S. to V. G., Lewis L. Richardson; L. G., T. M. Williams; O. G., James Whatley; R. S. S., Orin A. McIntire; L. S. S., Charles A. Gould; Conductor, Joseph Packard; Warden, George E. Frissell; Chaplain, H. B. Magoon. Present membership, one hundred and eleven. Since this lodge was instituted eight have withdrawn to form a lodge at Webster and thirteen to form one at North Grafton. Elective officers at present time: N. G., George F. Chase; V. G., Charles A. Gould; R. S., Dexter Rogers; Perm. Secretary, J. A. Coffin. Appointed officers: R. S. to N. G., Charles Whitworth; L. S. to N. G., F. K. Ogden; R. S. to V. G., Frederick D. Goss; L. S. to V. G., Charles Dursthoff; L. G., A. M. Stone; O. G., Henry F. Hobart; R. S. S., John H. Barron; L. S. S., G. T. Anderson; Conductor, Leon A. Power; Warden, L. H. Bracket; Chaplain, Herbert A. Ryan.

A thief-detecting society was established in this town fifty-eight years ago, which includes among its number many of the prominent men of the town.

**LAWYERS**.—The first lawyer that we have a record of in what is now Millbury was Amos Singletary, who was born near the outlet of Singletary Pond. He was at one time a justice of the peace and quorum, an important position in those days. A bail commissioner with a tender heart, he was often imposed upon by the rascals of those days.

Aaron Peirce, Esq., was another of the old-time lawyers, whose services were often called into requisition. He was prominent in the legal business of the town in early times. Josiah S. Prentice and Josiah Stiles were also, to a certain extent, in law business in the early history of the town. Of Thomas Pope we would speak also, who resided near the old Common in 1813. Among the later disciples of the green bag fraternity may be mentioned Gen. Wm. S. Lincoln, Alex. Hamilton, E. W. Lincoln, who came here from Worcester to get their hand in. Others

were Abraham G. Randall, Geo. W. Livermore, Asa H. Waters, C. R. Miles, Daniel J. Paul and others of lesser note. In the days of the old justice of the peace courts, Millbury was quite a busy place for the scribes, but with the decline of their power the number of lawyers became less. Of the present ones in town, John Hopkins, Esq., came here from Blackstone soon after being admitted to the bar of the county. He has become eminent as a criminal lawyer, and has been very successful also in civil cases. It is generally admitted that as a criminal lawyer he has few equals at the Worcester bar. H. W. Aiken, Esq., is a young and rising lawyer who does much town business. Col. Geo. A. Flagg was formerly in practice here, but his time now is mostly given elsewhere. Charles B. Perry, Esq., has also lately been admitted to practice.

**PHYSICIANS.**—The first physician we can learn of in what is now Millbury was Doctor Boylston, who owned the great Cedar Swamp, and who also owned land near by, on which it was proposed, in 1743, to build the church of the Second Parish of Sutton. The old doctor must go down to posterity comparatively unknown, for but little can be found in regard to him. Another of the early doctors was Azor Phelps, who lived not far from the church on the old Common.

Dr. Phineas Longley will be remembered by the oldest citizens as a gentleman of the old school, whose members are nearly extinct.

It is related of Dr. Green, of Auburn, that many years ago he visited a patient at West Millbury some half-dozen times, for which he charged the enormous sum of thirty-seven cents, the patient being in rather humble circumstances.

Dr. William M. Benedict was another early doctor, quite prominent in business and town affairs also. Contemporary with him was Dr. Amasa Braman, whose time was more given to business than to the practice of his profession.

Dr. Asa Andrews was a young and promising physician, who, in attending a patient, contracted blood-poisoning, which ended what promised to be a useful life.

Dr. William B. Moore was a good physician in his day. Dr. Joseph E. Corlew was a skillful man, and performed some remarkable cures. Dr. D. S. C. H. Smith, of Sutton, also practiced here to a considerable extent.

A generation ago we find practicing here Dr. Leonard Spaulding. He was a man of good education, fine address and universally respected—moderate in his charges, sympathetic in his nature, he made friends with all. He had quite an influence in town affairs, and was much interested in educational matters. He was also well versed in historical matters and antiquarian lore. He was succeeded by Dr. George C. Webber, who has a large practice and has been very successful in the profession, in which he

is still active. Dr. Webber is much interested in natural history, being considered a good authority in such matters. He is also a member of the Worcester Society of Antiquity. He was formerly chairman of the School Committee, and has done much in many ways for the prosperity of the town.

Dr. William H. Lincoln has practiced here for many years, and has had a good share of the cases that have arisen. He has been surgeon of the Grand Army of the Republic post, and is quite active in town affairs.

Dr. R. Booth also has a large practice among both the native and foreign population. He is considered a skillful physician in his school of medicine.

Dr. J. R. Lincoln also began practice here in 1888. He is a son of Dr. William H. Lincoln, and a graduate of the Harvard Medical School.

Dr. Cyrus Carter and Dr. George F. Jordan, located in other places, are both natives of Millbury.

In 1853 Dr. Henry G. Davis was located in Millbury, and made a specialty of curvatures and club-feet.

Mr. Maurice Welch, one of our adopted citizens, a son of an old Irish physician, has long been known as a natural bone-setter. Although not in regular practice, yet his services are often called into requisition by people of all classes.

Of the homeopathic school may be mentioned Dr. Southgate, one of the early ones; also Dr. Underwood and Dr. H. A. Clarke in 1871, who died young. He was succeeded by Dr. C. C. Slocomb, from Rutland, Mass., who was a faithful and conscientious man. In his prime he was stricken down with paralysis, from which he never fully recovered. Dr. B. F. Green also practiced here to some extent.

Dr. George A. Slocomb succeeded to his father's business, and has built up for himself a large practice, in which he takes much interest. He enjoys the distinction of presiding at the birth of the quartette of girls born in 1888 to Mr. and Mrs. Frank De Groote, an opportunity which few physicians of this or any other country can boast of having had. Dr. Slocomb is a member of the School Committee, and a graduate of the Millbury High School.

**FINANCIAL INSTITUTIONS.**—*The Millbury Bank* was founded by Asa Waters in 1825. Mr. Waters procured its charter and was its first president. This bank was in 1843 robbed of nearly \$20,000, but most of the money was recovered. The bank was changed from a State to a national bank in 1864. The present officers are C. D. Morse, president; Amos Armsby, cashier; C. D. Morse, H. S. Warren, John Rhodes, L. L. Whitney, A. Armsby, David Atwood, directors.

The amount of deposits, January 28, 1889, subject to check at sight, was \$148,400. Present capital, \$200,000.

*The Millbury Savings Bank.*—This institution was organized July, 1854, and has proved a well-managed institution. Its deposits amounted in January, 1889,

to \$715,000. Reserve fund, \$21,000. The officers are David Atwood, treasurer; L. L. Whitney, president. Board of Investment, L. L. Whitney, C. D. Morse, Ira N. Goddard, Royal Thayer, John Gegenheimer, D. T. March.

**BUSINESS.**—For three-fourths of a century, Millbury has been quite a manufacturing centre. With natural water-power, her advantages have been great. The business early centred along its water-courses. The first privilege at the outlet of Singletary Pond was the old grist-mill of Ebenezer Daggett, who had this right given him of a pond of six hundred acres and a farm, on condition that he maintain a grist-mill there, which he failed to do, and the privilege was returned to the proprietors of Sutton. We find John Singletary next in possession, and his mill-door became the bulletin-board for the North Parish, at the time of its organization. Why Mr. Daggett returned this privilege to Sutton is not known. A saw-mill was afterwards built, and at one time plaster was here ground. This privilege and the land and water-power from here to the paper-mill afterwards came into the hands of General Caleb Burbank. About 1828 or 1830, the old buildings which stood here were fitted up for the manufacture of cotton-batting under the charge of Deacon Henry Mills.

Just previous to 1835, a Boston company were engaged here in the manufacture of woolen goods. Becoming involved the creditors formed what was known about 1838 as the Singletary Manufacturing Company.

Samuel Marble, the old hand-scythe maker, once had a shop near the old bridle-path that went to the paper-mill; near the old outlet of the pond, traces of this old mill and path can still be seen. Captain Amasa Wood was president of the old Singletary Company, and the president, with Samuel Davis (one of the earliest lessees of Court Mills, Worcester), and A. G. Stiles, Horace Waters and Asa Hunting, directors. The assets of the company were \$52,620.22. This company was formed to secure debts due to its members from the Boston concern, but in this they were disappointed. After a few years this company also went down. We find after them a concern called Boston & Millbury Co., then Pierce, Mills & Wheeler, Farnum & Jenks, then Mowry Farnum, Farnum & Wheeler, next Jonathan D. Wheeler. Later the Wheeler Cotton-Mills Company was formed, an incorporated company—W. H. Wheeler, president; H. F. Wing, treasurer, by whom the mills are now run. Their capital is about \$80,000. The Boston & Millbury Co.'s mill was burnt in 1843. The mill of Farnum & Jenks was burnt the 5th of April, 1846. There have also been other fires at this place.

General Burbank and his father, Abijah, it seems, at one time were the owners of most of the water privileges on Singletary Stream, or Burbank River. Where the Stonemetz Printers' Machinery Company's shop now is was a shop used by the general. About

1828 a machine-shop was built here by Harvey Waters. On this spot, also, Samuel Marble had at one time operated a scythe-shop. Previous to 1837 the Woodward Bros. operated the woolen-mill which was built about that time. It then passed into the hands of Woodward & Gorton, who run it awhile on both woolen and cotton goods until about 1842, they being succeeded by Abijah Larned, then Jonas A. Hovey & Co.; from them it passed to Jonathan A. Pope; from him to James Brierly & Co.; thence again to Pope in 1851, and later to Emerson & Brierly. Some time later Crane & Waters purchased the privilege, which they sold to L. L. Whitney in 1877, who run it on yarns until 1884, when the mill was burnt. In 1886 the present machine-shop was erected and leased to a company from Erie, Penn., known as the Stonemetz Company, who manufacture printers' machinery. This company do quite an extensive business, their products going to all parts of the country.

We next come to the old paper-mill site of Captain Abijah Burbank, established in 1776. It was the first paper-mill in the county, and was chiefly relied upon for paper during the Revolution by the printers of this region. In 1783 it passed into the hands of General Caleb Burbank, son of Abijah, who ran it until 1834, when, becoming involved with his brother Elijah, at Quinsigamond Village, Worcester, he failed, and the business passed from his hands. His successor was Silas Goddard, a former employee. Later the business passed into the hands of Brierly & Co., who run on paper up to about 1857. F. H. Richmond next became the owner of the privilege, who sold to M. A. Lapham, the present owner, in 1863. Mr. Lapham built a fine brick mill, which was burnt in July, 1876. A larger mill was afterwards built about 1879, which is run on fine woolen goods, said to be of pure quality. Additions have been made to the mill from time to time, until it is one of the finest mills in town. The superintendent is Mr. F. A. Lapham.

Just below the Lapham mill is the old privilege of Braman & Benedict. In early times John Waters had a clothier's mill here—wool-carding and the like, for we find that Simeon Waters succeeded him at this place in 1808. The same year the second armory was built. A factory was built here by Braman & Benedict. Smith & Pratt were here in 1845 and as late as 1851, and after that time Sylvester Smith run alone awhile. Various concerns have occupied the mill at different times, namely: Jonathan A. Pope, Braman Cotton-Mill Co., Emerson & Brierly, J. H. Mason & Co., John Rhodes took the mill about 1872, and it is still run by him on cotton warp.

Just below the Braman factory is the old site of the Revolutionary powder-mill,<sup>1</sup> run at one time by

<sup>1</sup> It is said this mill was accidentally blown up by two boys.

Asa Waters the first. From this old mill powder was furnished to the patriots of those days. Some of the foundation can yet be seen. Near by, on the other side of the little pond, where are the ruins of the Iona or Walling mill, an old shop once stood, erected in 1836, and used as late as 1851 by Leland & Sabin as a machine-shop, for the manufacture of looms and other machinery. Here, too, paper of a coarse kind was at one time made by them. After Leland & Sabin came Benchley & Jackson. About 1854 the Walling mill was erected. It was run for a time under the name of J. C. Howe & Co., and for a long time after by Nelson Walling. After Mr. Walling's death another company run the mill some time, when it was burned. It was lately known as the Iona Mill. Mr. Walling, while running the mill, made fancy cassimeres.

In 1793, just below Burbank's paper-mill, was an oil-mill, and between that and the ruins of the old powder-mill was a fulling-mill, probably the site of the factory of Braman & Benedict. At the oil-mill referred to above, Jonathan Holman, Asa Waters and others were at different times interested in the management. In those early days such mills were quite common. On this stream seems to have centred the earliest business of the North Parish.

The next privilege on this stream is that of the Crane & Waters Manufacturing Company. Here a small mill and dam was built in 1825. This was the old Waters & Goodell mill. In 1831 broadcloth was made at this mill of an excellent quality. In 1849 this concern came to an end. Mr. Horace Waters remained at this place, and began the manufacture of hosiery. Soon after Hosea Crane became a partner with him in the business until the death of Mr. Crane. The business was continued under the same firm-name until it was merged into a corporation in 1885. Mr. O. H. Waters and Mr. Royal Thayer are largely interested here. At this place for a long term of years an excellent quality of knit goods have been manufactured.

The last privilege on this stream, which in Revolutionary days was one and the same with the Crane & Waters privilege, is now occupied by John Rhodes as a mill for the manufacture of cotton warp.

Just below the dam was situated the Revolutionary armory of Asa and Andrus Waters. Here guns were made in those stirring times. From here to the old Braman factory seems to have been a territory controlled by the Waters family for a long period of time. The Rhodes or the Stone mill was built in 1828 by Elder Samuel Waters, who put in machinery and manufactured cotton thread. In 1833 Jonathan A. Pope was agent at this mill.<sup>1</sup> Afterwards Briggs & Waters run it. In 1850 a company known as Russell Phelps & Co. was formed for the manufacture of hosiery here. The company had a capital of

twenty thousand dollars, and Horatio Phelps, the old loom manufacturer of Worcester, was a silent partner. In 1851 this mill was located on the map as the hosiery-mill of Orra Goodell, but was probably occupied by Phelps & Co. Quite a business was done by them for a short time. The next concern to occupy this mill was Jonas A. Hovey. It next passed to Rhodes & Merry in 1854, and from them to John Rhodes, the present owner.

This is the last water-power on Mill Brook, a stream that has from the earliest times furnished good power for the mills of this region. About 1827 an old building stood near this privilege, which was used for the manufacture of hoes and scythes, and was run by Timothy Longley. After the close of the Revolutionary armory it was converted into a manufactory for scythes, axes and mill-irons. Their trip-hammers, bellows and grindstones went by water-power. This business was carried on also by Asa Waters, the first, with others.

On the stream coming from Ramshorn Pond, a little above where the present mill of Edwin Hoyle & Son is situated, was the old dam of Follansbee & Trask, who there had a scythe-shop. It next passed into the hands of Noah Crossman, who carried on the same business, which was known as the Upper Trip-hammer Shop. Connected with Follansbee at this place at one time was a Mr. Phelps. At this place, in 1837, Perley Whipple, the old scythe manufacturer, erected a small mill for the carding and spinning business, also for the manufacture of stocking yarn. It was burnt in 1839. Previous to this, however, the building had been used by Bigelow & Mann, who leased it from Whipple. Where the mill of Messrs. Hoyle now stands a mill had been erected, which was used by Amos Eddy and others as a grist-mill. Later the property passed to Elisha Jacobs; from Jacobs to Simeon S. Waters, from him to H. D. Tripp and thence to William and Charles Lumbar. William Lumbar having retired, it was occupied by Charles until the Ramshorn disaster in 1873. After that, in 1877, the privilege was bought by Hoyle & Windle, who repaired the old mill, which had been badly wrecked, and used it for wool-scouring. Mr. Windle retiring in 1879, Mr. Hoyle, in 1880, erected a brick mill, and later a storehouse near by, for his increasing business. In 1888 the mill was enlarged by the addition of another story to manufacture hosiery yarn. A large business is here done in wool. In 1884 Charles E. Hoyle was admitted a partner.

The next privilege, where S. A. Savary's shop is, was the old scythe-shop of Amos Eddy. It later was run by Noah Crossman, and known as the Lower Trip-hammer Shop. Captain Joseph Griggs next occupied the privilege, where he had a fulling-mill for leather and tanned sheepskins. Just across the way he had a shop for striping bindings for shoes, which is now owned by Hiram Kenney. From Griggs the Eddy privilege passed to B. Morris, who

<sup>1</sup> Later Orra Goodell here had a hosiery-mill.

had a wood-working shop. It passed again to the Griggs heirs, from thence to Mr. Savary. He built the present brick shop, the lower story of which is used as a blacksmith-shop and the upper story for woodwork.

The next privilege is what is known as the old Blanchard Shop—the birth-place of the eccentric lathe. It was formerly used by Thomas Blanchard as a machine and wood-work establishment. Mr. Blanchard here brought out one of the first shearing-machines for cloth in this region. After he established his claim to the eccentric lathe he removed from town. This old building was for a long time used by the Elliots (Andrew and Carter) for the grinding of black lead—they being interested in what was called “Elliott’s Worcester Coal Mine.” Later the old shop came into the hands of Abijah Gleason, who also carried on the same business, Mr. Gleason being among the first to put up the lead in packages for stove polish. The Elliots and Mr. Gleason also shipped this material to seaport places for painting the hulls of vessels. The building was next used by Buckley W. Snow, and later by Birney W. Snow, for the manufacture of hubs, spokes, etc. In 1873 the privilege passed to J. A. Dike, who engaged in the turning of chisel handles, etc. He, in 1888, sold to H. W. Glover, who still carries it on.

The next concern on the Ramshorn stream previous to 1800 was the oil-mill of Jonathan Holman. It was connected with the old saw-mill which had existed there from the earliest times, but which was destroyed by the Ramshorn disaster in 1873. Before the year 1800, and up to the time of that disaster, just below this saw and oil-mill, extensive tanning and currying works had existed. Among the earliest tanners here was Joseph Waters. Soon after 1800 a stock company was formed, composed of Mr. Abbot, Benjamin Whitney, Lieutenant John Jacobs, Colonel Fay and other Millbury people. One after another withdrew, and a company was formed as Griggs, Abbott & Whitney. Later, Captain Joseph Griggs carried on the business. Captain Amasa Wood also at one time operated the tannery after 1830. Captain Griggs again assumed the management, and carried on the business many years. It next came into the hands of Salem Griggs, a nephew of the captain. Mr. David Marble was at one time connected with him in the currying department of the business. The tanning works were destroyed in 1873 by the Ramshorn disaster. About 1880 Thomas Windle bought the privilege, including the old saw-mill and the ruins of the tannery, and erected soon after the present mill used for wool-scouring; later, an addition was built for the manufacture of cloth-folding machinery, and occupied by J. E. Windle & Co.; but the business after a year or two was removed to Worcester. The next privilege on this stream was, in former times, a scythe shop, also run by Noah Crossman.

In 1870, or about that year, John G. Wood bought

this privilege, and built a dam, which in 1873 was nearly destroyed by the Ramshorn disaster. It was soon rebuilt, and he removed here the old West Congregational Church, which he had bought about 1871. To it was added the Union Hall building, which formerly stood on the site of the old school-house at West Millbury, which was in fact the old school-house itself remodeled. The two buildings were converted into a cotton factory, and run as such a while, but were burned in 1876. Some time later, John S. Rich bought the privilege and erected a grist-mill, and, a short time after, a shoddy-mill, both of which he now carries on. At this place Mr. Rich’s son, John, was drowned in 1888 by his horse backing off the dam.

At the time Thomas Blanchard was in his shop at West Millbury, Asa Kenney had a brass foundry opposite; he had established on this spot the first brass foundry in Central Massachusetts years before. In connection with it he had a room where he manufactured clocks, gold beads, trusses, silver spoons, surgeons’ lancets, etc. The first brass balls for cattle’s horns used in this region were here made by him. Mr. Kenney contested with Blanchard the right to the patent for the eccentric lathe, but was beaten in the court of arbitration, held on the old Common, in Millbury. At this village, in 1854, T. W. Childs was carrying on the currying business. John G. Wood also at one time carried on the same business. Ephraim Goulding and Silas G. Carlton at one time manufactured shoes here. Near where the farmhouse of Maurice Welch stands, at West Millbury, was formerly a tannery. It was in early times run by Lieut. John Jacobs, Joseph Griggs and a Col. Fay, from Westboro’, Lieut. Jacobs owning it at the time. Some of the buildings were afterwards removed to the old tan-yard privilege, on Ramshorn Brook, in which Mr. Jacobs became interested. A saw-mill existed at one time near the Erastus Davis place, not far from Ramshorn Pond. It was known as Bartlett’s mill.

After the closing up of the brass foundry of Asa Kenney, Hiram Kenney, a son, built a small one on land now owned by him, and did quite a business in brass work, supplying gun shops and other manufactories. He afterwards closed the business and engaged in wood-work. His carts and wheels were considered the best made in the county.

The first privilege on the Blackstone in this town is what was known as the Burling mills. When the old canal closed, Asa Waters bought what then existed. This he created into a valuable water-power. Michael Coogan built a small mill in 1850, and operated it awhile. Later H. H. Chamberlain & Co., of Worcester, became interested with him, and they occupied the privilege for some time. Wm. H. Harrington & Co. were the next owners, and operated the mill until it was burnt down, December 8, 1883. The mill has been run mostly on woolen goods.

The next privilege on the Blackstone was also first put to a practical use by Asa Waters. Near this place, in 1841, was the flannel-mill owned by him. In 1834 we find that Allen & Rice were located in an old, two-story building, not far from where the Providence & Worcester Depot now is. They were succeeded by Allen & Coombs—both of the above firms being engaged in the manufacture of sash and blinds. We find that in 1851, J. Coombs & Co., their successors, were established where the sash and blind shop of C. D. Morse & Co. now is. The latter company was formed in 1852, under the firm-name of Fullam, Morse & Co. The firm consisted of T. S. Fullam, C. D. Morse, E. M. Park, A. P. Small. The same year Mr. Small ceased to be a partner. In 1853 Mr. Fullam retired, selling to Horace Armsby. The firm then became Armsby & Morse. About 1856 Mr. Park retired. In 1871, Mr. Morse purchased Mr. Armsby's interest, and the firm became C. D. Morse & Co., which still continues.

This concern in 1852 employed twenty-five men, and now have on an average sixty. Their products go to all parts of the country. They were burned out July 24, 1872, and in sixty days were again running. They again suffered by fire in 1881, when their works were partially burnt, but were soon rebuilt. They use annually about one million five hundred thousand feet of pine and hard-wood lumber. Mr. Morse is a native of Woodstock, Ct., having been born there November 1, 1827. One of the finest mills ever built in this town was the Stillwater mill, erected by Col. A. H. Waters on this privilege; it was burnt in 1868.

Elijah and Asa Waters (1st) had for several years prior to the building of the armory, in 1808, extensive blacksmith and scythe works in town. On the 25th of March, 1808, Mr. Isaac Stiles was killed at these works by the bursting of a grind-stone. Deacon Elijah and Asa Waters (2d), sons of Asa, were the ones who built what is known as the Second Armory. Asa (1st) died in 1813. The following is found:

SUTTON, August 24, 1801.

Elijah Waters & Co. dissolve.

ELIJAH WATERS,  
JOSEPH FARNSWORTH,  
SALMON WATERS.

Elijah Waters and J. Farnsworth continue.

Mr. Farnsworth seems to have left Elijah not many years after, for he was a manufacturer of scythes alone in 1806.

Again we find, October 11, 1809, that Elijah and Asa Waters (1st) dissolve.

October 11, 1809, we find a company formed as follows: Elijah Waters & Company, to manufacture muskets, mill-saws and scythes. The company were Elijah Waters, Asa Waters, Jr., Nathaniel Whitmore, Joseph Farnsworth, Luther Whitmore.

We now come to the old armory of Asa (2d) and Elijah Waters, built in 1808. The dam at this place was also erected by them. At this time they had

made a contract with the United States Government to manufacture guns. At this time an old grist-mill stood near where the Millbury Cotton-Mills are. This business at the armory was, in fact, the real pushing forward of manufacturing at Armory Village. From that beginning sprung what of manufacturing has since been carried on. Here were erected by the Waters' extensive works in iron, forge-shops, scythe-shops, trip-hammers. They also had a saw and mill-iron factory, a steel furnace and everything necessary for their work. They also had a rolling and slitting-mill in connection with their other business. Upon the death of Elijah, in 1814, Asa Waters took the business, and carried it on until his death, in 1841, having previously taken in company his son, Asa H. After the death of Asa the elder the business was continued by his son until 1845, when the armory business closed. After the close of the armory business, previous to 1850, A. H. Waters & Company built the Millbury Cotton-Mills (now so-called), which was the site of the early grist-mill, and business was carried on under that and other firm-names for several years.

At the breaking out of the War of the Rebellion, in 1861, Col. Waters was requested to again manufacture guns, which he did not do, but took contracts for supplying the government with rods and bayonets, doing a large business. The old armory was at one time rented, or a part of it, to Col. J. D. Green, who made patent rifles for the Russian Government. At the close of the War of the Rebellion Col. Waters, under the firm-name of A. H. Waters & Company,<sup>1</sup> continued to run the extensive cotton-mill opposite the old armory, and later the Atlanta Mill, in the old armory buildings, which was run on woolen goods. Of the latter company he was president. Col. Waters retired from business about 1870. The cotton-mill was continued by Benj. Flagg and Thomas J. Harrington. Cotton machinery was at one time made in the old armory buildings. Here also was at one time in operation the Witherby Tool Company, Thompson, Skinner & Co., Harrington & Heald who made wrenches and tools. The old grist-mill that stood near where are the Millbury Cotton-Mills, opposite the old armory, was an old landmark of this region. At this place, near by, was the old spindle factory of Brown. Shoe nails were also made here. Luke Harrington also stocked guns here for the armory. The Atlanta Mills, that are in the old armory buildings, are run at the present time by Wm. H. Harrington, on satinets. He took the mill about 1871, and turns out about two hundred thousand yards per year. Mr. Harrington has been for a long time a business man in town.

The Millbury Cotton-Mills are now run by J. H. Mason & Company, who do an extensive business.

*Cordis Mills.*—We now come to what at present is

<sup>1</sup> At one time the concern was Flagg & Waters.

known as the above mills. Through the courtesy of John Gegenheimer, the agent of these mills, we are permitted to give copies of old records as follows :

Sept. 21, 1813, one-third of water privilege, Elijah Waters, Asa Waters, Jr., and Joseph Farnsworth, to Aaron Trask, Asa Goodell, Jr., John Goodell and Orra Goodell.

At this time there was a saw-mill at the dam and a rolling-mill at the place where the dye-house now is. The Goodells must have raised the dam, and also built the dam back of the present mill. So Mr. Gegenheimer says :

Feb. 23, 1814, Elijah Waters, Asa Waters, Jr., and Joseph Farnsworth deed one-third of the saw-mill property to the Goodells.

Nov. 26, 1821, Asa Waters to Asa Goodell & Co. (land where present mill stands), and one-third of Dams, canals, ponds, etc., and one-third of the water that runs in aforesaid river—subject to the restriction that a Grist-mill should be built.

Dec. 25, 1822, Asa Waters to Goodell Manufacturing Co. seventy-six hundred and two-thirds of a hundredth part of a Rolling-mill privilege.

Dec. 1, 1835, John B. Blanchard to Goodell M'f'g Co. one-tenth of Rolling-mill property.

Goodell M'f'g Co. to Brown Woolen Mill, Aug. 30, 1836.

Brown Woolen Mills to Cordis Co. April 1, 1844.

Cordis Co. to J. S. Wright & Co. Dec. 28, 1863.

John S. Wright & Co. to Cordis Mills July 1, 1875.

This company has done much for the prosperity of the town. The amount of their business in 1888 was two hundred thousand dollars. They used 1800 bales of cotton and manufactured 1,999,180 yards of bed-ticking, employing 145 hands. The old mill is 185x37; new mill is 167x42; boiler-house is 64x36; picker-house is 68x48. This is the site of the old broadcloth manufactory of the Goodells. In the early days of the town their goods had a reputation that was a national one. This company, under the management of the present agent, John Gegenheimer, Esq., is in a prosperous condition, with improved machinery and tenements for their large number of employes.

The last privilege on the Blackstone was begun about 1828 and finished in 1830 by Shepard & Ridgeway. Next came Edward W. Ridgeway, who ran the mill under his and other names until 1837. Trowbridge & Co. were there at one time. The later ones have been Park & Wright, Bellows, Baker & Co. William Crompton, the inventor of the fancy loom, run the mill for some time on broadcloth. While engaged in running this mill he was still at work perfecting his loom. He was at this place as late as 1847 and 1848. His foundry and loom establishment, at this time, was situated near the Cordis Mills on that privilege. In 1847 Mr. Crompton advertised as follows :

Being about to make woolen and cotton goods entirely, will sell out tools used in the manufacture of machinery at Millbury, the 22d of April, 1848.

He had eight large engines. The machine-shop, foundry and blacksmith-shop was to let, by applying to the agent of the Cordis Company. After Mr. Crompton came David F. Wood, then Merriam, Simpson & Rays. Merriam and Rays finally withdrew, and

since that time the factory has been run by Captain Peter Simpson. At the time Crompton was here the power was said to have been about sixty horse. The Hathaway saw-mill privilege has lately been added, so that now it is about one hundred horse-power.

On Dorothy Pond Brook is the tool-works of R. T. Buck, formerly Buck Brothers. The business was established at the junction shop in Worcester, in 1853. It was removed to this place in 1864. They purchased of Andrus March the privilege where is now the Riverlin Chisel-Works. At this place Deacon Witherby once made chisels, and later skates were made there. Then followed Williams, who also made tools. Later Dennis Fisher manufactured cut nippers. Then came Charles Hale, who pursued the same business as Fisher, to some extent. It was then occupied by Harrington & Heald on tool-work. After this came A. H. Waters, who occupied it awhile. Buck Bros. remained together some time, then Charles withdrew. This privilege has three ponds connected with it,—Dorothy, which was the old canal feeder, another pond built in 1868, and one other.

In 1878 a new factory was built of fine pressed brick, and a tasteful little village has grown up. Mr. R. T. Buck is a native of England, and his chisels have a reputation the world over.

The next privilege on this brook was originally occupied by Chester Hastings, in wood-work. After him it was used by H. H. Ward as a grist-mill. It then passed to G. C. Molt, the patentee of the celebrated indigo blue dye. Later Mr. Molt took in as a partner Jerome Marble, of Worcester. After Mr. Marble retired L. L. Whitney became a partner. Since the death of Mr. G. C. Molt, the business has been continued as Whitney & Molt, Mr. Whitney and the sons of Mr. Molt constituting the firm. An extensive business is here done in this line of manufacture.

The last privilege on this stream is the flock-mill of Peter Simpson. Here was originally a saw-mill. The next occupants were Wilcox & Tuft, who made excelsior for mattresses. It was again used as a grist-mill by Goodell, and later by Marsh for the same purpose. Then came Jabez Ellis, who used it for a carpenter-shop. After that it was occupied by the Ohio Mowing-Machine Company, of which James E. Taylor was at one time agent. This company dissolved in 1867.

Nathaniel Goddard came to this town from Royalston March 19, 1819, six years after the incorporation of Millbury. He immediately began the manufacture of boots and shoes for the local trade. In 1826 his brother, Danforth, became a partner with him, under the style of N. & D. Goddard. This partnership continued until 1834, when Danforth retired from the firm. Deacon Goddard's next partner was Abner Rice, the firm being Goddard & Rice. Their business constantly increased, so they were soon hav-

ing, for those times, quite a large Southern and Western trade. In 1841 George H. Rice became a member of the firm, which then became Goddard, Rice & Co. They next turned their attention to the currying of leather in connection with their boot and shoe business. In 1844 Abner Rice retired. This left the firm as Goddard & Rice, which so continued until 1851. At that time the firm was dissolved. Ira N. Goddard then became a partner with his father, the firm being N. Goddard & Son, which continues to this day. Of late years their business has been confined mostly to the retailing of boots and shoes. Deacon Goddard, the senior member of the firm, continued daily at his place in the store until a short time previous to his death, in 1887, at nearly ninety-one years of age. Deacon Goddard, throughout his long business career in this community, maintained the character of an honest, upright man. His word was as good as his bond at any and all times. His veracity was never questioned. He was ever found on the side of truth, justice and equal rights. A friend of the slave, he ever looked forward to the time when his shackles should fall. Temperate in all things, he labored that the curse of strong drink might be removed from the community. A faithful Christian, he worked in his Master's vineyard until the last. The world is better that he lived, and his memory is blessed. The surviving partner, Mr. I. N. Goddard, is the clerk of the town. He was chosen to that position in 1853, and for over thirty-five years has faithfully performed its duties. Courteous and obliging, he is recognized by all parties as the right man in the right place. He is a notary public, and has connected with his other business an insurance office.

Near where stands the Providence and Worcester Depot, in 1830 stood a two-story wooden shop. In 1834 it was occupied by Allen & Coombs for the manufacture of sash and blinds. About that time Moses L. Morse used some part of the upper story for the manufacture of cutlery. Deacon Morse at one time took the premium at the Worcester cattle show for the best penknives. He later removed to Worcester, where he died. Henry Tower about this time occupied some part of this building for making hoes, tri-squares, etc. The old building was afterwards converted into a dwelling-house.

Extensive scythe-works were formerly carried on at Millbury by Hale, Whipple & Waters and by the Hale's at different times and under different firm-names.

Allen & Harrington have also been engaged in blacksmithing and in carriage-making; also Stoyke & Harrington at blacksmithing.

H. M. Goddard began the ice business in this town in 1880. In 1879 he had erected a building sixty by forty feet, near what was then known as Chamberlin Pond, for the storage of ice. In 1882 he built another at Singletary Pond, which has since been enlarged so that now it is one hundred and twenty by forty feet.

In 1883 he bought the coal business formerly carried on by Eddy & Co., which was begun by Justus Eddy in 1860. In 1884 Mr. Goddard added to his other business a lumber yard. This business, with his other, is constantly increasing, requiring many horses and men. The past year he has built for his use one of the finest and most commodious barns in town, with sleeping-rooms connected with it for his help. He is one of the rising business men of the town. His coal and lumber sheds and office are near the Boston and Albany Railroad Station on Canal Street.

S. R. Parker & Co., carriage manufacturers, came to this town many years ago. In 1858 was erected their present block for their business. Connected with it is also a blacksmith shop. They manufacture all kinds of wagons and carriages. In 1888 was manufactured eighty-eight top-carriages and twenty-five open wagons and buggies. Parker's carriages have a good reputation at home and abroad.

Charles Buck, chisel manufacturer, came to Millbury in 1864, and was a member of the firm of Buck Brothers. Later the partnership was dissolved, and in 1873 Charles built his present mill. It was occupied in 1875. Mr. Buck employs thirteen hands, and makes goods of a superior quality.

Samuel E. Hull is a dealer in cotton, cotton-waste, paper and paper stock. This business was established by J. H. Merry. It next passed into the hands of Briggs & Co., and from them, June 20, 1883, to Mr. Hull, who does quite an extensive business.

*Millbury Machine Co.*—At the close of the iron and gun business of A. H. Waters & Co., they were succeeded by the Millbury Machine Company. In 1866 this company occupied some of the armory buildings until 1872. At that time C. D. Morse erected for them the shop they now use, near the sash and blind shop of Mr. Morse. The members of the company are Charles D. Morse and E. J. Humphreys. Their business is general machine jobbing, and the manufacture of special machinery, used for sash and blind work, flock cutting machines for woolen-mills, shafting, pulleys and the like.

H. W. Hakes manufactures heddle-frames for looms. Started in Morse's sash and blind shop in 1879. The present shop was built in 1881.

A. M. Stone, Armsby's building, began in 1883 to manufacture ticking lug-straps for looms, and also roll-covering. He also has a laundry.

T. A. M. Bennett, merchant tailor, began business in Randall's Block in 1868. Removed to the rooms of the old Millbury Bank in 1884, where he now is.

*Millbury Foundry.*—This foundry was begun by Bradway, Felton & Lathrop. It next passed to John Martin. Then to Martin & Sweetser. Next in possession was Felton again. Then the firm became Felton & Cunningham. Later, Cunningham ran it alone awhile. Then he sold one-half interest to John Martin. Soon Mr. Cunningham retired, leaving Martin in full possession. Then Martin sold to Colvin,

but later it came back into the hands of Martin again, who sold to H. T. Merriam in 1886. This company manufactures wrought-iron bridges, iron fronts and all kinds of constructional iron work.

Moses D. Garfield began the shuttle business here in 1863. The partnership was W. Wilder, F. Searles, M. D. Garfield. In 1865 Wilder bought out the business of the company. Mr. Garfield then began alone the manufacture of porcelain shuttle-eyes and other goods of the same material.

*Present Armory Village.*—Dunton & Winter, dry goods and groceries, began business in Randall's Block in 1871; moved from there in 1875 to the block of Silas Dunton. This is a first-class country store, and a large business is done.

Sweetser & Co. also do a good business in the same line. Their stand is an old one and commands a good trade.

Among the meat and provision dealers are Lyman S. Waters, Joseph Simpson, Desmariez Bros., D. Ducharme. Milliner, Madam E. D. York. A jewelry store is kept by J. F. Dodge. D. Shurn, cigars. Drug stores, N. H. Sears, E. Thompson & Son, E. E. Wood, P. Bellville, B. F. Aiken.

J. J. Power, coal dealer, began business here in 1874, and in 1876 sold to F. E. Powers, who is now engaged in the coal and lumber trade.

The Millbury Grain Company's store was built in 1880 by H. H. Ward, who carried it on two years. It is now known as the above company, with H. Houghton as manager.

John S. Rich also keeps a grain store, at which quite an extensive business is carried on.

In the rear of the Baptist Church D. A. Powers keeps a first-class livery stable, and has many fine turnouts.

John Odum is also engaged in the stable business. The dentists at present are Dr. C. H. Hakes and Dr. Bristol, who are prepared at all times to do good work.

Herbert A. Ryan also keeps a paper-hanging and fancy goods store in connection with his other business.

Silas Undergraves, boots and shoes. N. A. Feehan is also in same business. W. E. Gale, hats and men's furnishing goods. Cronin Bros. are also dealers in groceries, teas and coffees.

J. D. Fairchild and H. E. Newell are here engaged in the furniture business.

Among the livery stables is also that of M. H. Murphy.

*Present Bramanville.*—William E. Horne, dry-goods and groceries, does quite a large business in this line. He also has a meat and provision market. A. S. Winter also keeps a general country store. He has had a long business experience in town and has his share of patronage.

A. B. Lovell has for years kept boots and shoes and a general notion store. Thomas Dolan, at this place, has a provision and meat market.

At West Millbury no store is now kept. Formerly trade was carried on here by Stephen Blanchard, Ephraim Goulding, Henry P. Howe, A. Wood & Sons, D. G. Prentice and Ira D. Bates. The last store was kept by Ira Glazier.

**STOREKEEPERS.**—In town in old times were John Morse, Sterry S. Kegwin, Dr. William M. Benedict, Dr. Braman, Stephen Blanchard, Elias Lovell, Jabez Hull, E. W. Goffe, Abraham G. Randall, Ephraim Goulding, Henry P. Howe, Goddard Rice & Co., Thaniel Cutting, Dana A. Braman, Simon Farnsworth, Wiswall & Co., Daggett, Wright & Co., Lucian S. Larned, Otis Packard & Co. and many others that might be mentioned.

**HOTELS.**—Among the old hotel-keepers of the town may be mentioned Dr. Amasa Braman, Dr. William M. Benedict, Landlord Longley, Elijah A. Johnson, Elias Lovell and Simon Farnsworth. Charles A. Tourtellotte, John M. White, Charles T. Pratt and E. A. Bartlett are among the modern ones. Mr. White at the present time is landlord at the Tourtellotte House and Mr. Bartlett at the St. Charles.

**LANDMARK.**—One of the old landmarks of Millbury is the old homestead built by Asa Waters (2d), and now occupied by the family of the late Colonel A. H. Waters. The house is of the Corinthian order in architecture, which was a novelty in this region, and afforded builders many new designs in house-building, mouldings, stucco, winding-stairs and other work. The architect was Bryant, of Boston. Every part of the work was done by hand in most thorough manner and from best materials. Its broad entryways, arched halls and winding stairways remind the visitor of some old castle of ancient times. This magnificent old structure is not without its historical associations, its lofty halls having echoed to the voices of Henry Clay, Daniel Webster, Levi Lincoln and other distinguished men. On the occasion of a visit of Henry Clay to Massachusetts, the citizens of Millbury formed a cavalcade and received him at the Worcester line, whence he was escorted to the residence of Mr. Waters, who gave a reception to the citizens for an interview with the distinguished visitor. He was given a ride about town to visit its various manufactories, in which, as the champion defender of protective duties, he manifested deep interest. Returning to the house of Mr. Waters, Colonel Shepard, superintendent of the woolen-mills now known as the Cordis Mills, in a graceful speech presented to Mr. Clay an elegant roll of blue broadcloth, to which the orator replied in a happy manner, saying his next suit would show Congress what American manufacturers could do. The mansion was commenced in 1826 and completed in the fall of 1829, being some over three years in building, with an average of ten men employed. On Christmas the completion was celebrated by a thorough house-warming—a general invitation was given, great numbers collected, many being present from neighboring

towns, the house was illuminated throughout, prayers were offered, hallelujah anthems sung by a large choir, with instruments, and also an original ode composed by the host himself. The house sets back from the street, grand and stately, its broad lawns shaded by noble trees, an ornament to the town. The trees were set by the hand of the late Colonel Waters, after his return from college. In 1854 President Sears, then secretary of the Massachusetts Board of Education, came to town with the whole corps of professors, then employed by the State; among the number was Agassiz, Guyot, Colburn, Lowell Mason and others. A week was given to lectures on literary and scientific subjects. During their stay in town they were the guests of Colonel Waters.

**FAMILIES.—Singletary.**—Of this family Amos was the first white male child born in what is now Millbury. He was a member of the Provincial Congress.

**Goffe.**—Rev. Joseph Goffe was the third minister of the town, born at Bedford, N. H., 1776. He preached here thirty-six years—three hundred and thirty-six joined the church during his ministry.

**Pierce.**—This family has ever been prominent in religious and town affairs, several filling the office of deacon—Ebenezer chosen in 1768, John in 1795, Aaron in 1810 and Hervey in 1828.

**Burbank.**—Of this family was Abijah, the paper manufacturer, and General Caleb his son and successor to the business, the latter once the richest man in town, but who died poor.

**Braman.**—Dr. Amasa and Dana A. were once prominent in business circles. None of the name are now living in town.

**Benedict.**—Dr. William M. and William G., his son, were once prominent men. This name is also extinct here.

**Kendall.**—Thomas Kendall, born here, was one of the earliest, if not the first, to make thermometers in the country. He removed to New York State, where he died in 1831.

**Farnsworth.**—General Joseph was a prominent business man in old times. Simon was a wealthy citizen, once president of the bank. His son Simon is postmaster at Armory Village.

**Goodell.**—Asa Goodell was one of the first broadcloth manufacturers of this region. Orra was also an early hosiery manufacturer and also made some broadcloth.

**Holman.**—Colonel Jonathan, of the Sutton Regiment in the Revolution, lies buried at West Millbury. His old homestead is still standing in the same village. A grandson, E. M. Holman, is living at Webster, Mass.

**Jacobs.**—Lieutenant John was fifth John from John born in England in 1079. He, with Elisha, were both at one time in business to considerable extent.

**Wood.**—Captain Amasa came here in 1811 and began the manufacture of shoes. The business extended to Vermont, the South and to California, and

is still carried on in the latter State by the sons—William H., Samuel A. and Charles V.

**Waters.**—Asa Waters the 1st and his brother Andrus were born in what is now West Millbury. Other prominent members of this family have been Horace and Jonathan E. Elder Samuel is spoken of elsewhere. Elijah Waters, of West Millbury, left ten thousand dollars for religious purposes.

**Trask.**—Among these were Captain Samuel, who was in the Revolution. Aaron was an active business man in his day. None of the name are to be found here at present.

**Blanchard.**—(For sketch see page 975.)

**Gale.**—Leonard D. Gale, born in what is now Millbury, was one of the real inventors of the electric telegraph. Dr. Jackson and Prof. Henry are also to be credited with a large share of the honor connected with it. Prof. Morse never would have succeeded as he did without the aid of Prof. Gale, as he himself admitted. Morse brought it out, and that is about all he did do, except inventing the dash and dot alphabet.

**Andrews.**—This family was early identified with town affairs. Asa, the elder, was a small manufacturer. His son, Dr. Asa, is mentioned elsewhere.

**Griggs.**—Capt. Joseph was one of the earliest business men; prominently concerned in religious affairs also. He was born in Sutton, November 3, 1786; died in Worcester, December 6, 1852. The name is extinct in this town.

**Barton.**—This was one of the old families. Rufus Barton's old homestead is still left. Captain Reuben Barton, Jr., was an early town officer. Hon. George S. Barton, of Worcester, came from this family.

**Dwinell.**—This was another of the early families. Among them were Solomon, Seneca, Simeon and Deacon Leonard—all worthy citizens.

**Longley.**—Of this family may be mentioned old Dr. Longley, Landlord Longley and 'Squire Nymphas—all men of the old school.

**Harris.**—Ithran was a soldier in 1812 and a shoe manufacturer in a small way. Harry W. was a prominent agriculturist; George carried on a brickyard formerly, which is now operated by A. J. Harris.

**March.**—An early and much-respected family. Prominent among them were Samuel, Dr. Alden and Deacon Tyrus. Deacon David T. is still living.

**Small.**—The first Small was Stephen, of colonial fame; Capt. Samuel was in the Revolution; Aaron was a farmer, as was also Samuel A., who at his death owned the largest and best farm in town.

**Gleason.**—This family is extinct. Abijah was once one of our prominent men.

**Flagg.**—Benj. Flagg was one of our largest manufacturers; was in the Legislature, and was highly respected. Col. Geo. A., his son, is one of the leading men in town.

**Harrington.**—Thomas J. was another old manufac-

turer, who became wealthy, and died in 1888. Russell, John E. and David B. have all been identified with the prosperity of the town.

*Lovill.*—Of this family may be mentioned Elias, Elias, Jr., Ezra, Russell, Wm. A. Their descendants are still among us.

*Chase.*—Paul C. Chase was once prominent. G. F. Chase, one of our selectmen, is a contractor.

*Stowe.*—Ithamar Stowe came from Grafton, and became one of the useful citizens of the town, was for a while a business man, but later retired to his farm, which is now occupied by his son, George I. Stowe. Numerous descendants are living.

*Armsby.*—Horace Armsby, for fifteen years, was a manufacturer of sash and blinds here. He was a man highly esteemed. His son, Amos Armsby, Esq., is reckoned among the best of financiers, and is a respected member of the community.

*Crane.*—Hon. Hosea Crane was once president of the Millbury Bank, was long a manufacturer, and was elected to the Senate of Massachusetts.

*Atwood.*—David Atwood was long cashier of the Millbury Bank, has served the town as treasurer many years, has served on the School Committee, and in every way has proved a valuable citizen. In 1889 his commission as justice of the peace was renewed.

*Davidson.*—William G. Davidson was formerly a tanner, but now is an extensive farmer at the west part. One son, William E., is a lawyer in Boston; H. W. Davidson, Esq., another son, is a farmer.

*Goulding.*—Ephraim Goulding, Esq., was the first postmaster at West Millbury. He was long identified with trade in the west part of the town. None of the name are living among us.

*Freeman.*—Silas M. Freeman was an old-time stage driver, running from Sturbridge, Mass., east. He has been dead several years.

*Ryan.*—William Ryan was for several years town undertaker. He retired in 1882, and his son, Herbert M. Ryan, succeeded.

*Bancroft.*—Hon. H. L. Bancroft was once in trade here. He was elected to the Massachusetts Senate and has long been connected with religious and town affairs.

*Dunton.*—Silas Dunton has for many years been engaged in trade in this town. He has represented the town in the Legislature, and is a respected and honored citizen.

*Simpson.*—Captain Peter Simpson is a prominent manufacturer of the town. He has done much for its prosperity, and is a liberal giver to every worthy object.

*Sayles.*—Hon. Irving B. Sayles is another citizen of the town who has been honored with a seat in the Massachusetts House and Senate. He has served the town as selectman, School Committee and trustee of the Town Library. He has also been engaged in trade here.

*Benchley.*—Henry W. Benchley, formerly Lieutenant-Governor of the State, was once a citizen of Millbury. He was a man highly respected while here.

Space forbids a more extended mention of the families of the town, but in passing we may name the Parks, Woodwards, Haywards, Pitts, Richardsons, Bonds, Garfields, Glaziers, Rices, Carters, Hulls, Haydens, Tainters, Snows, and others might be mentioned who are or have been active to more or less extent in the affairs of Millbury.

Millbury has been the birth-place of many ingenious and useful inventions, and among others those of Hervey Waters justly deserve mention. Mr. Waters is a native of this town; was a son of Deacon Elijah Waters, of Armory fame; he resided here when making many of his inventions. He later resided in Boston, where he was recognized by the courts as an expert of superior merit in the trial of patent cases. One of his inventions has been thought worthy to be classed with "Babbage's Calculator," which has been pronounced by British critics to be the nearest approach to the human intellect of anything ever created by man.

Pins were formerly made in England by hand process. The manufacture had been repeatedly attempted in this country, but always failed until Hervey Waters invented machines to make them by motive-power. His first machine made them with solid heads. When taken to market, he was told they would not sell because not like the English pin, whose head was formed of a fine wire twisted around one end. When he assured them his style was best, the reply was, "'Tis not in fashion, and 'tis useless to argue or contend against fashion." He then devised and built a machine to make the English pin at one motion from wire of two sizes—a very ingenious contrivance. When he took these to market, he found it flooded with English pins selling far below cost. The English had attempted a game often practiced by them to kill off our infant manufactures, of drowning him out.

He had too much Yankee grit to be put down in this way. Knowing it cost the English much labor to stick them by hand, he determined to stick them by a machine, and then his two machines would defy all competition. Accordingly, he contrived and built such a machine. Into a large hopper at the top the pins were poured, shaken down an opening, marshaled into parallel lines, forty-eight pins in a line, all pointing the same way, and at one motion the whole row was thrust upon paper, in less time than it requires to read this description. Like "Babbage's Calculator," the machine was *taught to count*, and to count rapidly and correctly, and what seems equally marvelous, it arranged the pins in rows with heads all one way and points the other.

By this triumph of American genius the manufacture of pins became permanently established in this country. Mr. Waters sold out his machines to parties

in Derby, Conn., where the business continues to be pursued.

He next turned his attention to the manufacture of scythes. Hitherto the practice had been to draw out the blades under trip-hammers. He conceived the idea of rolling them out between grooved rollers. The curvature of the scythe produced obstacles almost insuperable, but after years of persistent effort and many ingenious contrivances he overcame them all and made scythes cheaper, if not better, than had ever been done before.

When the late war broke out he invented a machine for rolling bayonet blades which did the work so perfectly as to save grinding and only require buffing.

It was adopted at once at the United States Armory, Springfield, by many private contractors and most of the bayonets made during the war—numbering hundreds of thousands—were rolled out on Mr. Waters' machine.

**MILITARY RECORD.**—What is now Millbury did her part in furnishing soldiers as long ago as the French and Indian War—among this number was Jonathan Holman. From this part of Sutton went a goodly quota for those times. At the breaking out of the Revolutionary War the men of the North Parish were not backward in responding to the call of their country. The names of Waters, Tainter, Dwinell, Holman, Lovell, Elliott, Small, Goodell and Pierce stand out on the roll of fame in letters never to be erased. Millbury has been the home of one major-general, one brigadier-general and several colonels. In the days of the old militia this town had her companies of infantry<sup>1</sup> and her annual trainings. But the old captains and the privates (most of them) long ago took their march for that country from which no soldier returns.

In the late conflict with the South the men of Millbury were not backward in the war for equal rights. Her dead lie on many a hard-fought field, the living bear the scars of the battle's fray. Some of her sons became the gaunt victims of a cruel foe. But the strife ceased at last, right triumphed over wrong, but at a fearful cost. As near as can be ascertained, Millbury, in the War of the Rebellion furnished four hundred and three soldiers for the different terms of service. War-meetings were often held and the spirit of patriotism was ever on the alert. The women of the town showed their willingness to serve their country by giving up their husbands, fathers, sons on the altar. The Millbury roll of honor will stand for all coming time a record of what her sons did to exterminate the accursed institution of slavery.

Memorial tablets have been erected to those who died in the service. The living "tell how fields were won." Thirty-two lives were lost in the great struggle.

**STATISTICS.**—In 1840 the population was 1611; in 1850, 3081; 1870, 4397; 1885, 4555. The valuation in 1888 was \$1,954,847. The business of Millbury in 1837 amounted to about \$515,775. In 1870 it had increased to upwards of \$2,500,000.

The census of 1870 showed 2679 natives and 1718 foreigners, all white but nine.

The county tax in 1822, paid by this town, was \$125.31. In 1888 the State tax was \$2700; county, \$1604; town grant, \$31,785; overlayings, \$785.79. Total, \$36,874.79. Tax on each thousand dollars in 1888, \$17.70; poll, male, \$2; female, 50 cents.

No attempts have been successful to obtain the amount of business for the year 1888.

## BIOGRAPHICAL.

### ASA WATERS.<sup>1</sup>

When the American Colonies boldly declared for independence, they were sadly deficient in means of defence against the well-armed troops of Great Britain. They had no public armories; guns were scarce; gun-makers more so, and neither could be readily imported.

Fortunately for the Massachusetts Colony, there dwelt in Sutton a family in which gun-making had been an hereditary pursuit for several generations. Their presence in this locality is thus accounted for:

When Governor Winthrop came, in 1630, to found the Massachusetts Colony, in and around Salem and Boston, he brought a much larger company than the Pilgrim Fathers, who had previously settled at Plymouth, and embracing various trades and professions. Knowing that the country abounded in wild game and Indians, he took the wise precaution to bring two gun-makers, William Plaise and Richard Waters. They settled in Salem, where the town built for them a shop at public expense. Richard Waters married the daughter of Plaise, and it is a noteworthy fact that gun-making became an hereditary pursuit for seven generations.

Nathaniel, a grandson of Richard Waters, was one of the original proprietors of Sutton Township, estimated at 30,000 acres. He selected his part (one-tenth) in North Sutton, now West Millbury.

When the Revolutionary War broke out, two of his descendants, Asa and Andrus, espousing the freedom cause with ardor, proceeded forthwith to build a gun-factory on Singletary Stream, a tributary of the Blackstone River. Guns, previous to this date, had been wrought by hand-labor, and this was the first instance that can be traced by the writer where *water-power* had been brought to its aid. Gun materials were wholly wanting—even bar-iron.

The nearest source of supply they could discover

<sup>1</sup> About ten years ago a company existed in town called the Millbury Guards.

<sup>1</sup> By the late Col. Asa H. Waters.

*And Waters*

lay in the Salisbury Mines, Connecticut, nearly one hundred miles distant. They obtained it there in pigs, carting it, through a new and rough country, to Douglas, where, wood being plenty, a forge was built to refine and hammer the iron into bars. Thence it was carted to their armory, and there wrought into guns.

Andrus Waters lost his life at the Salisbury mines, and, having rare genius for mechanics, his loss at this critical period was regarded as a public calamity, and he was buried with due honors at West Point.

Asa pursued the business with energy, and continued to support the cause with gun-flint arguments, thus proving his loyalty through all the years of the war. In the mean time the State built a powder-mill near his works, placed it under his charge and he was often heard to remark: "Hardly a barn could be found in this region under which I have not bent my back to scrape up salt-petre," thus showing the desperate straits to which the colonies were driven in their struggle for independence, of which the present generation can form but a feeble conception of the cost of success.

When the clouds began to lower, threatening the War of 1812, rightly termed by Henry Clay "The second War of Independence," two of the sons of Asa Waters, Asa (2d)—the subject of this sketch—and Elijah, built a larger gun-factory below, on the Blackstone River, where greater power was obtained, to which industry they added the making of scythes, saw-mill saws, refining iron, cast-steel, etc. During this war Deacon Elijah Waters died, much lamented, leaving his brother Asa alone to pursue the business.

Possessing great physical strength and uncommon energy, inheriting, in a remarkable degree, the mechanical talent characteristic of his family, and being awarded by the government large contracts, he introduced various improvements in gun-making, which wrought great changes, and out of which grew results whose importance can hardly be overestimated. Two only will be referred to.

Gun-barrels were welded and forged, up to this time, entirely by hand-power, the super having two strikers. All this is within the recollection of the writer.

On October 25, 1817, he was granted letters-patent for his invention for welding gun-barrels under trip-hammers, with concave dies, striking four hundred blows a minute, and controlled by a foot-treadle. This patent was signed by James Monroe, President; John Quincy Adams, Secretary of State; and Richard Rush, Attorney-General of the United States.

This invention was copied by all the armories of the United States and Europe, and his claim to originality has never been disputed.

In the following year (1818), observing that the English process of grinding the barrels down before a revolving-stone left the metal of uneven thickness around the calibre, and thus liable to explode, led him to invent a lathe to turn the barrel to uniform thick-

ness. This patent, December 21, 1818, was also signed by James Monroe and John Quincy Adams, and by William Wirt, Attorney-General, and was the first patent ever issued for turning gun-barrels in a lathe, save one, which was a failure. This proved a success, so far as the barrel was round, but to turn the irregular shape of the butt—"hoc opus hic labor est."

As I now approach what may truly be considered an epoch in progressive mechanics, from whence dates an entire revolution in the modes of work in all our large mechanic-shops, I will summon to the stand one who was an eye-witness of its first development, Maj. J. W. Wright, of Michigan, and will quote from a letter recently received from him:

I resided most of the early part of my life near the Armory of Asa Waters in Millbury, and was long employed by him: first by preparing finished work for the United States Inspectors, then as chief clerk, and next as Superintendent of his Armory Works. While in his employ he introduced many improvements, among which was a mode of welding gun-barrels by water-power instead of the English mode by hand-power. Also a machine for turning the barrels in place of grinding them down.

Various machines were got up about the same time at other Armories. They all finally succeeded in turning the barrel so far as it was round, but to turn the irregular shape of the butt baffled all the efforts and defied the ingenuity of all the mechanics in all the Armories.

After laboring long and hard on the problem, Mr. Waters, hearing of a budding genius in a neighboring district, sent for him to come to his Armory and see if he could suggest something. He came, and soon after produced a model for a very peculiar and entirely original "Cam motion," which relieved the difficulty at once.

To reduce the forged butt to proper shape cost, in labor and files, a dollar on each gun, and this motion reduced the expense more than half. One of the stockers, while watching the operation, said to the filer, "Blanchard has robbed you of your job, but he cannot rob us of ours, for he cannot turn a gun-stock." This young man, since famous as Thomas Blanchard, modestly replied: "I'm not so certain of that." His mind being thus directed to this matter, after the study of a year or more, he brought to the Armory of Mr. Waters a wooden model, four feet long, for a machine to turn a gun-stock. The expert mechanics thought favorably of it, and a full-sized machine was built. Some of the United States inspectors, on service at the Armory at the time, wanted it sent to Springfield for examination and trial. Blanchard consenting, it was carted to the Armory there by Horace Waters. It remained long enough to build another similar, was then returned to Mr. Waters' Armory, and there remained in use many years.

While in the employ of Mr. Waters I married the niece of Thomas Blanchard, and was thus brought into close and intimate relations with both. I had frequent conferences with Blanchard upon his various inventions, and was often requested to aid him in his suits for infringements, which were unending.

(Signed)

April 27, 1886.

J. W. WRIGHT,

Kalamazoo, Mich.

In after-years the great inventor declared that it was at this visit to the armory that the idea first flashed into his mind of the "Eccentric Lathe." The "Cam Motion" was the germ from which the "Lathe" sprung, it involving the same principle. From it has grown, by successive improvements, what is now known as the "Uniformity or Interchange System," which has revolutionized the workshops of the world, and forms an epoch in progressive mechanics, the greatest since the introduction of steam-power, and reduced the price of watches, fire-arms and everything made by machinery.

The world is largely indebted to Asa Waters as an instrument in hastening on the day of the "Eccentric

Lathe," in thus calling to his aid the services of Thomas Blanchard, for had he not been called at this time his inventive genius might have been turned in another direction.

By a flash of genius, as by inspiration, here was revealed the discovery of a new principle in mechanics, which has proved one of the greatest labor-saving inventions ever made. By this, a machine driven by motive-power could be made to work out almost any design or pattern—be it round or square, crooked or straight, however irregular—and rapidly reproduce an exact copy every time.

Thomas Blanchard's fame soon reached Washington, and he was invited by the War Department to take the whole charge of stocking guns in the Springfield Armory. He there extended the principle to mortising in the iron parts, until the whole hand-labor of stocking guns was performed by sixteen power machines of his own invention, which did the work with perfect uniformity, and at greatly reduced expense. The machines had exact and perfect uniformity in every part. Here a new difficulty arose. While all his work had perfect uniformity, the locks and other iron parts had not been brought up to this perfection and frequent misfits occurred. This raised loud complaints against the innovators of hand-labor and threatened the whole improvement. Blanchard then made ingenious contrivances to make his work un-uniform, so as to fit the variations of the iron parts. The War Department reported that it was important that after a battle the broken guns could be gathered up and readjusted into perfect arms; and for the model of 1840 they gave directions for all the parts to be so uniform as to be interchangeable.

This was at first pronounced to be impossible, especially of the lock, which parts were lettered or numbered to preserve their identity. It was then at least impracticable, and a legion of contrivances and experiments had to precede before the iron-work could be brought up to the standard of Blanchard's.

Thirteen years elapsed, as appears from Mr. C. H. Fitch's report, before the contrivances Blanchard had made to make his work un-uniform could be dispensed with.

In this part of the interchange system many other inventors and mechanics should share the honors, notably: Hall, of Harper's Ferry; Cyrus Buckland and Thomas Warner, of Springfield. It was under the auspices of the latter, as master armorer in 1842, that the system finally triumphed—and a grievous triumph it was for American mechanics. Individuality of parts was thus merged in numbers, and lettering and other distinguishing marks abandoned forever.

The chief feature in bringing the iron-work up to the standard was the "Milling Machine." This useful machine might well be called the Universal Filer. Such have been the improvements inaugurated by the "Interchange System," that the old-time idea that hand-work was superior to machine-work has become

an exploded notion. No human hand can compete with the sewing-machine in perfect uniformity of stitch, much less in rapidity; none with the micrometer gauge in infinitesimal nicety, nor approach it; none execute the machine engraving on bank-notes and watch-cases.

Great improvements have been made on Blanchard's machines, but the principle that he introduced has never been superseded, and will be found active to-day in factories where breech-loaders, revolvers, watches and other interchangeable work is executed. His inventive genius has rarely been surpassed, and his motto was: "Whatever the human hand can do, a machine can be made to do." He was born June 24, 1788, in North Sutton (now Millbury), and lived here until after he had made this invention, the tack-machine and many others.

It thus appears that Thomas Blanchard's inventions were the primary cause, and are still the indispensable conditions of the interchange system, and that Asa Waters was the pioneer and his armory in Millbury the birthplace of this great improvement. His inventions preceded and were the direct cause of Blanchard's great discovery.

The War Department was very liberal in its contracts with Asa Waters as long as he lived, in consideration of the improvements he introduced. He was born in North Sutton (now Millbury) November 2, 1769. He married, May 19, 1802, Miss Susan Holman, daughter of Col. Jonathan Holman. They had eight children—seven daughters and one son.

He founded the Millbury Bank in 1825, was its first president and largest stockholder. He gave the site for the Millbury Academy. He originated five water privileges in the Blackstone Valley, and was one of the largest real-estate owners in the county. His business was extensive and diversified. In addition to his gun, scythe and forge works, he held the three water privileges now known as the Millbury Cotton-Mills, the sash and blind shop and the Berlin Mills. He also owned the extensive privilege at Wilkinsonville. In 1815 he purchased the Dudley farm, which included the water-power there, and which he afterward sold to David Wilkinson, of Providence, from whom the village received its name.

He owned three farms in Millbury, and numerous houses, a farm of two hundred acres in Grafton, and nearly a thousand acres of woodland in Douglas. His forge furnished the bar-iron for his gun and scythe works, and Douglas woods the coal and timber.

He was a member of the Legislature when the controversy occurred about Amherst College, helped obtain its charter, and with Rev. Joseph Goffe and General Burbank each contributed five hundred dollars towards founding it.

He was one of the founders of the Second Congregational Society, and obtained its charter in 1827.

In 1818 he was granted a patent for the invention

Wm. H. Watson

of an improved method of building paddle-wheels for steamboats, and later he invented further improvements in wheels for boats and water-power; also a rock-drill.

He lived the last twelve years of his life in the homestead which he built, and which was completed in 1829. It was three years in building, and was for many years one of the finest mansions in the county.

He died December 24, 1841, and his last words were: "I am only going from this room to one above."

#### ASA HOLMAN WATERS.<sup>1</sup>

Among the men who came into the colony of the Massachusetts Bay in its early years was Richard Waters, who arrived with Governor Winthrop in 1630 and settled in Salem, where he became a substantial citizen.

In his English home he was by trade a gun-maker, and his wife was the daughter of a gun-maker.

In Salem the family lived and developed itself through three generations. After King Philip's War, and especially after the beginning of the last century, there was a great movement of population from the coast to take possession of the inland territories and form new towns. It was soon after this period that Jonathan and Nathaniel Waters came from Salem and settled on the hills of Sutton. There the family lived on through three generations more. The order from the beginning at Salem down to the present has been: (1) Richard, (2) John, (3) Nathaniel, (4) Jonathan, (5) Asa, (6) Asa. This last was the father of Asa Holman (7) Waters, the subject of this sketch.

In the development of character, it is a great gain when a child can rest back upon a solid and honorable ancestry. Many a child, it is true, has risen to the high places of honor and influence in the world without such advantages. But none will deny that a worthy ancestry bears an important part in the formation of noble manhood or womanhood. At the time of Mr. Waters' birth there was no family-name of more weight and dignity than his own in the town, and it stood connected with its thrift and industry as well as with its best moral and religious interests.

On his mother's side also there was an honorable background. Susan Holman was one of twelve children of Colonel Jonathan Holman, who commanded a regiment in the War of the Revolution, known as the "Sutton Regiment." It was so called partly because he raised it and partly because a large portion of the men were gathered from this ancient town. The people were proud of the services Colonel Holman had rendered the country in that long and trying war for independence, and especially of the high and patriotic spirit with which he encountered labors

and losses that his country might be made free. He also served through the French and Indian Wars.

Asa Holman Waters was born February 8, 1808. He was an only son in a family of eight children.

He prepared for college at Monson Academy, and in 1825, then only seventeen years of age, entered Yale. He graduated in 1829. He subsequently entered upon the study of the law at Harvard, and in 1835 was admitted to the bar.

But hardly had he entered upon his professional life, when it became evident that his father, by reason of advancing years, needed his assistance, and so he turned into the walks of business, and never followed his chosen profession, though his studies in this department added to his general culture, and were of great use to him in his business life. (His father died December 24, 1841, and his mother eight years later.)

In his early life Colonel Waters connected himself with the Democratic party. On the second election of Governor Marcus Morton in 1843 as Democratic Governor of Massachusetts, he chose Mr. Waters on his staff, and it was in this way that he gained his title of "Colonel."

When the great moral questions pertaining to American slavery began to blend themselves strongly with the politics of the country, Colonel Waters passed as a dissenter from the Democratic, through the Free-Soil party, into the Republican, where he remained until his death. In 1848-49 he represented the town of Millbury in the General Court, and in 1853 was a member of the Constitutional Convention in Boston. At various times he held many positions of responsibility and trust, including all the leading offices of his native town. He was united in marriage, June 27, 1849, with Miss Mary Elizabeth Hovey, daughter of Daniel and Susan (Jacobs) Hovey, of Sutton. From this marriage there were three daughters: (1) Isabel Holman, (2) Lilian Hovey, (3) Florence Elizabeth.

Lilian Hovey was united in marriage, October 23, 1873, with Professor Edwin A. Grosvenor, of Robert College, Constantinople. They have three sons: Asa Waters, Edwin Prescott, Gilbert Hovey. Florence Elizabeth married, October 4, 1888, Henry Ayling Phillips, of Worcester, S.B., M.I.T., '73.

In 1845 Colonel Waters associated with himself Messrs. Thomas J. Harrington and Benjamin F. Flagg in establishing and carrying forward the Millbury Cotton Mills, under the firm-name of A. H. Waters & Co. In later years he built the Stillwater Mill, one of the handsomest mills on the Blackstone River, which was afterwards destroyed by fire. This order of things continued until the breaking out of the War of the Rebellion, in 1861. When the gigantic nature of this struggle began to make itself manifest, the Government turned again to find, if possible, the remains of the old private armories, which by its summary action it had ruined in 1845. There were but two which had survived, Waters' of Millbury,

<sup>1</sup> By Rev. I. N. Tarbox, D.D.

and Whitney's of New Haven. It was a work of great labor and expense to equip the old armory with new machinery for resuming the manufacture of fire-arms; but after considering the matter, it was arranged that the works at Millbury should be engaged only in the manufacture of rods and bayonets for the relief of the Springfield Armory, which was greatly overburdened with work.

Millbury was again a scene of stir and activity, in a form of business to which it was thoroughly accustomed in the ancient days, and the enterprise was highly remunerative. The United States spent money with a liberal hand until the Rebellion was completely subdued. When the enterprise was started at Millbury it could not be told how soon it might be brought to an end, and Colonel Waters took upon himself great personal financial risks. After the close of the war the Atlanta Mills Company was formed and Colonel Waters was the first president.

In 1868 Colonel Waters retired from active business with a good property. In the years of leisure which now came on he developed that decided literary taste which was rooted and grounded in him through all the years of his activity, but which he had not found much time to indulge. It is true, through the years of the anti-slavery struggle preceding the war, and also as a member of the Free-Soil party, he took an active part at political meetings as a public speaker in almost every town in the county, where his speech was persuasive and effectual in moving the voters.

But now, in the calm of his advancing years, he found delight in his pen, and did not a little excellent work with it. He had also leisure for entertaining his friends and exercising hospitality. From his youth up he was gifted with fine conversational powers. His sense of humor was keen and comprehensive, and as a story-teller few could surpass him. He was a rare contributor to the delight of social converse. His conversation was always bright, entertaining, instructive.

In 1874, with his wife and two daughters, he made a journey to Europe and the East. They were gone from the country two years. Quite a long portion of this time was passed at Constantinople with his married daughter, but also long periods of time were spent in general traveling through the countries of Europe and the East, including Egypt. Looking over the note-books which he kept through this long journey, one is surprised to notice with what care and accuracy he recorded and described, in his clear, handsome handwriting, the events of the passing days and the notable things with which he came in contact.

He returned to this country, with his family, in 1876, and in the ten years of his life that remained he did no small amount of literary labor which was continued till within a few days of his death. In a sketch like this it would hardly be advisable that we

should go into any extended review of the various writings which occupied his time and thought in this advanced period of his life. Some of them were in a measure controversial, and were designed to correct what he deemed to be grave historical errors and misstatements. He believed that Wendell Phillips' famous lecture on the "Lost Arts" was visionary, not founded on truth and reality, but only on seeming truth, which vanished away when thoroughly examined. He did not believe that the human race had ever lost a single art or mechanical power of any value, which had once been in its keeping. Some arts might be lost that ministered simply to fancy or luxury, but they were always lost if at all, because they were superseded by something better which had displaced them, or were "arts abandoned for better methods."

So, too, he did not believe that Mr. Garrison and his party associates abolished American slavery. The destruction of slavery in this country did not come along that line. The Garrison party had no succession of events leading up to it, or even in any marked way leading toward it. The historical line by which this great result was reached seems to have been as follows: There was a wide-spread anti-slavery sentiment in all the northern portion of the country when Mr. Garrison began his work. What he and his associates did was one outcropping of this growing sentiment. But at the very time when he was beginning his anti-slavery activities you might have gone to the colleges all over the North, and you would have found hundreds of students of decidedly anti-slavery sentiment; but they could never be brought to adopt Mr. Garrison's methods. If you had gone to the farm-houses, to the homes of the people far and wide, you would have found this rising spirit of opposition to slavery, which did not follow in Mr. Garrison's steps, but which, on the other hand, marshaled the voters into the Liberty party, the Free-Soil party, the Republican party. When the anti-slavery voters of the country chose Abraham Lincoln President of the United States the South rose and plunged the nation into civil war. To put down this Rebellion, the government, after long waiting, brought slavery to a summary end by the proclamation of emancipation, January 1, 1863. But the Garrison party was not composed of voters or of soldiers. How, then, can the small band of Garrisonian abolitionists claim that they were the chief instruments in bringing about this result, or that they were anything more than indirect contributors to this end. This was in general the ground maintained by Colonel Waters in his long and spirited controversy on this subject with Mr. Oliver Johnson, of New York.

Still more extended and varied have been his articles on Thomas Blanchard and his remarkable inventions, which brought about the "Uniformity or Interchange System" in mechanics. On this gene-

*John Rhodes*

*Chas. M. Putney,*

ral subject, to which he had given special attention, several articles of his have already been published, and more are yet to appear. He furnished several valuable articles for the "History of Sutton," which was published in 1878. He prepared for it the "Genealogical Record of the Waters Family," the article on "Gun-Making," "Sutton in the Revolution," and other important matter. He was also interested in the "Worcester County History," published in 1879, and lent much aid in the preparation of that work.

After his retirement from business in 1868, and more especially after his return from the Old World in 1876, he was very much at home, busy with his books and his pen. He was thus brought into a daily intimacy and companionship with his family, such as could not naturally exist during his years of active business. His home was the centre of his brightest joys. This constant presence, this daily companionship, made his death even more of a breach in his household, and the more so because it was not preceded by a long illness. He had a rich and varied character, and his family have a blessed memory of devotion, gentleness and goodness.

He was at work with his pen until within a few days before his departure. His breaking down was sudden, not apparently from any positive disease, but by a sudden giving way of all his powers, such as is seen not infrequently in old age. He lingered on for some days without pain, until January 17, 1887, when "he was not, for God took him," a tranquil end to old age. In three weeks more he would have reached his seventy-ninth birthday.

He had a firm, controlling faith in an over-ruling Providence, and his daily motto in his later years was:

*"Trust in God, do your duty, and fear not."*

#### JOHN RHODES.

The subject of this sketch was born at Whitesboro', N. Y., February 5, 1813. His father was a dyer by trade, but at that time followed the occupation of a farmer. Until nineteen years of age Mr. Rhodes followed his father's occupation, attending school a part of the time.

After the close of his school-days Mr. Rhodes went to North Carolina, and with a team, traveled through that State for some time, selling dry-goods at retail. His first connection with mill work was as a dyer, in the State of Connecticut, which was continued at Providence, R. I., until he was about twenty-four years old. Later he was employed at the same business by J. & A. Morse, of Smithville, R. I. In 1846 he removed to Bellingham, Mass., and operated a mill for the manufacture of cotton warp. This mill was run by him until 1851. He then came to Millbury, and, in company with Joseph H. Merry, hired a small mill of the Cordis Company, and continued the manufacture of cotton warp at that place

about three years. In 1854 they bought the stone mill, built by Elder Waters, which is still run by Mr. Rhodes.

Some ten years later Mr. Rhodes leased, at North Oxford, what was known then as the Protective Mill, and a year later bought the property which was afterwards known as the Oxford Cotton-Mill. He associated with him a partner, and the firm was known as Rhodes & Wilmarth. This mill was sold by Mr. Rhodes in 1888.

In 1872 he bought what is known as the Pinafore Mill, situated on the site of the old Braman Mill, and which is now run by him on cotton warp.

1888.—Several years after the death of Alfred Morse, at Farnumville, in company with Wm. Andrews, of Woonsocket, and Capt. Peter Simpson, of Millbury, Mr. Rhodes bought the privilege, tenements, hotel and all the factory property formerly owned by Mr. Morse. The business was continued some two or three years, when Mr. Rhodes withdrew. Two mills in town are at present run by him. He was married, in 1838, to Sarah B. Johnson, of West Woodstock, Conn., by whom he has had two children—Otis W. and Maria, who married Henry M. Wilcox, of Johnson, R. I. Mrs. Rhodes died in 1880. In 1869 Mr. Rhodes was chosen to represent his town and district in the Legislature of 1870, a position which he filled acceptably.

His career as a business man has been successful. Throughout his long business life he has paid one hundred cents on the dollar—at any and all times. By thorough application to all the details of his business a prosperous one has been maintained, which has done much for the growth and prosperity of the community about him.

#### LEVI L. WHITNEY.

Hon. Levi Lincoln Whitney was born in Princeton, Mass., January 20, 1838. His father, Colonel John Whitney, was a farmer, holding at one time a deputy-sheriff's commission in the county. His colonel's commission came from serving in the Massachusetts militia. At the age of thirteen Levi left home to live with his grandfather, Colonel Jacob W. Watson, an old-time tanner and leather manufacturer at Princeton, then one of the leading men in the town. Young Whitney remained with him about three years, during which he attended the common schools.

At the age of sixteen he came to Millbury and entered the employ of A. Wood & Sons, shoe manufacturers, remaining with them a year. He next went to Worcester and attended Worcester Academy one year. He then returned to Millbury and the second time entered the employ of A. Wood & Sons. He remained with them until twenty-one years of age. Previous to this his brother, Charles A. Whitney, and O. E. Thompson, formerly of Millbury, had established at Chicago the first regular boot and shoe

manufactory started in that city. In 1859 Mr. Whitney removed to that city and became a member of the firm of Thompson, Whitney & Co. This firm, with some changes, did a successful business up to the time of the great fire, in 1871, when they were burned out. This was the largest manufactory of the kind in that city up to that time. This closed the affairs of the firm and Mr. Whitney returned to Millbury and associated himself with the firm of Crane & Waters, hosiery manufacturers, continuing with them until 1885, when the concern was merged into a corporation.

In 1875 he was also engaged in the manufacture of indigo blue dye at Millbury, which business he still continues as Whitney & Molt. In 1877 Mr. Whitney bought the old cotton-mill privilege, once owned by General Burbank, and where later Harvey Waters built a machine-shop, which was followed by a woolen-mill, run by the Woodward Brothers, Woodward & Gorton, and later, as a cotton-mill, by the Larneds, Jonas A. Hovey, Jonathan A. Pope, Emerson & Brierly, and others. At this place Mr. Whitney manufactured yarns until 1884, when the mill was burnt.

In 1886 he erected the present brick machine-shop on this site. The building is leased to the Stonmetz Printers' Machinery Company, which came here from Erie, Pa., Mr. Whitney being the president. He is also treasurer of the Pentecost Steam Generator Company at Worcester. He was chosen a director of the Millbury National Bank in 1875, holding that position ever since. He was elected a trustee of the Millbury Savings Bank in 1873, and chosen president of the institution in 1888. He was elected as one of the selectmen of the town in 1877, '78, '79, and again in 1881, and the fifth time in 1887. In 1880 he was chosen to represent the old Fifteenth District in the House of Representatives, composed of the towns of Sutton, Auburn and Millbury. In 1888 he was elected to represent the Third Worcester Senatorial District in the Legislature of 1889. He is also a member of the Worcester County Commandery of Knights Templar.

Mr. Whitney married, in 1862, Annie R., daughter of the late Hon. Hosea Crane, of Millbury, by whom he has had four children,—one son, Walter L., a partner in the Worcester Steam Heating Company, of that city, and three daughters, one being dead. Mr. Whitney is one of the self-made men of the county—a man successful in all his business ventures. He has done much for the interests of his adopted town. A strong opposer of intemperance, he has done much to rid the town of this curse to its growth and prosperity. He is ever found on the side of right and justice—a man in the prime of life respected and honored by his fellow-citizens.

#### MOWRY A. LAPHAM.

Mr. Lapham was born in Burrillville, R. I., in 1819. His father followed the occupation of a carpenter and a mill workman. The subject of this sketch attended school until about sixteen years of age. He then worked with his father at the carpenter's trade, until he reached the age of eighteen. Removing to Waterford, Mass., he followed the same occupation there for the space of two years. He next entered the machine-shop there of W. & D. D. Farnum, with whom he remained two years, after which he entered the machine-shop of Southwick & Brown, at Millville. Here he remained two years, and then removed to Fall River, and entered a machine-shop there, being employed by Hawes, Marvill & Devoll. While at this place he was married to Harriet T. Thayer, of Mendon, of the part which is now Blackstone. After his marriage he remained there about two years. At the age of twenty-six he returned to Millville, and was employed in the machine-shop of Farnum & Harding as superintendent of the iron and wood-working department. His career as a manufacturer may be said to have begun in 1860, when he went to Cherry Valley, Mass., and began the manufacture of kerseymeres under the firm-name of Lapham & Smith. At the end of two years Mr. Smith retired, when Mr. Lapham took the business and run the mill about four years, when it was burnt.

In 1863 he had bought the old paper-mill privilege, formerly owned by General Burbank, at Millbury, purchasing of F. H. Richmond, of Providence. A company was formed as M. & S. Lapham, and a mill built. After the death of Smith Lapham, the business was continued under the name of M. A. Lapham. The mill which had been erected was burnt in 1876. The present fine mill was erected in 1879. An excellent quality of woolen goods are made at this mill, and their reputation is a national one. The mill is one of the largest in town, is lit with electric light, and has all the most improved machinery, and gives employment to a large number of hands. The spot is an historic one, having for more than a century been used for manufacturing purposes. Mr. Lapham has held several offices in the county, having served as selectman and overseer of the poor at Blackstone two years. Of late years his residence has been at Worcester, where he was on the Board of Alderman six years. For the past sixteen years he has been a director of the Manufacturers' Mutual Insurance Company, of that city. He has two children,—Frederick A. Lapham, superintendent of the mill, and Hattie M., wife of Mr. F. A. Leland, of Worcester. The death of Mrs. Lapham took place in 1884.

Mr. Lapham is one of the successful manufacturers of the county. By industry and good management he has established a prosperous business, which has contributed much to the material welfare of the town of Millbury.

*Mr. A. Lapham*

*Joseph Griggs*

*Saml. P. Irwin*

## JOSEPH GRIGGS.

Captain Joseph Griggs was born in Sutton, Mass., November 3, 1786. His early youth was spent upon his father's farm. When the time arrived for him to fit himself for the duties of life, he left home and went to Charlton, Mass., and there learned the tanner's trade of Colonel Bacon, a noted tanner of those times. Having fitted himself by experience, he went to Northampton, Mass., and worked awhile at his trade. After remaining there a short time he returned to Sutton and went to school. Having added to his store of knowledge as best he could, he taught school awhile in the part of Sutton now Millbury.

At the time of the incorporation of this town, in 1813, he was engaged in the tanning business at West Millbury. Previous to this, however, he had worked at his trade in Providence. His first venture at Millbury was in company with Colonel Fay and Lieut. John Jacobs. Later, between 1810 and 1820, he was interested in the tannery on the Ramshorn stream, it being run by a stock company composed of Millbury people. The affairs of this company being wound up, a company was formed as Griggs, Abbot & Whitney. This firm run the tannery awhile, when, meeting with losses, they failed. In the settlement of the debts was shown the integrity of Captain Griggs. He had assumed those owing in the State, which was paid in full, principal and interest. He again resumed business, and was for a time connected with the late Captain Amasa Wood. About 1836 or 1837 he was again involved in business affairs, and the second time failed. About 1848 the captain became involved for the third time through his business connections, but again resumed business and paid his obligations. Captain Griggs was a constituent member of the Baptist Church in Millbury. In religious matters in town he was prominently identified—the church, the Sabbath-school and prayer-meeting.

He was early commissioned a captain in the Massachusetts Militia; and served the town in the Legislature. He was a man respected greatly in the community, having great influence with those about him. He was a liberal-hearted man, ever ready to help the poor and needy. He was prominent in the anti-slavery cause, being an active member of the Millbury Society, engaged in that work. He married a daughter of Lieut. Jonathan Trask, of Millbury, by whom he had several children. Some died in childhood, and one when a young man. Two daughters survive, Almira and Mary T., wife of Jonathan Munyan, Esq., of Worcester. After the death of Lieutenant Trask, Captain Griggs came into possession of his farm, which he occupied many years. After the close of his business life he removed to Worcester, where he died December 6, 1852, respected and honored.

## SAMUEL DAVENPORT TORREY.

Samuel Davenport Torrey was born in Mendon, Worcester County, Massachusetts, on the 14th of April, 1789, and died at his home in Millbury, in the same county, December 23, 1877.

His ancestors came to the Province of Massachusetts Bay in the year 1640, from the parish of Combe, St. Nicholas, in the county of Somerset, England, and settled in the town of Weymouth, Mass.

The genealogical line of descent has been traced from William Torrey, of Combe, St. Nicholas, Somersetshire, whose will was dated in 1556, through Philip, his son, and the second William, and then through the second Philip to the third William, who was born in 1608, and came to America in 1640.

This William Torrey was a conspicuous character in Massachusetts, for many years a member of the House of Deputies, and always chosen clerk; a magistrate, and a captain of militia. He died in 1690. He was a man of affairs, with education, having some knowledge of Latin, and also fair literary ability, which appears through a printed essay on "The Futurities," a quaint production still extant.

He had three brothers who settled severally—Philip in Roxbury, James in Scituate, Plymouth Colony, and Joseph in Newport, Rhode Island. William's oldest son was the distinguished scholar and preacher, Rev. Samuel Torrey, who lived in Weymouth, and died there after a pastorate of fifty years. He was educated at Harvard College, and it is recorded that he subsequently twice declined the presidency of the college. He had also the unusual honor of preaching three "election sermons" before the "Great and General Court of Massachusetts." He left no descendants.

His brothers were William, Micajah, Josiah, Jonathan and Angell, the youngest, who settled in Mendon in 1680, and from whom the line comes down through a fourth William, and through Joseph to a fifth William, the father of Samuel Davenport Torrey, the subject of this sketch. Tradition credits the family with unusual physical proportions, the last William being fabulously reported as six feet and seven inches in height.

His wife was Anna Davenport, daughter of Seth and Chloe (Daniels) Davenport, of Mendon, by whom he had six children—*Samuel*, Joseph, Louisa, Stephen, Benjamin and George.

The oldest son, Samuel Davenport Torrey, established himself early in life in Boston, in the West India trade, at No. 25 South Market Street, near Faneuil Hall, where the business has ever since continued in the family name. In 1831, his health being somewhat impaired, and having acquired what he regarded as a competency, Mr. Torrey retired from business and located himself permanently in Millbury.

For forty-six years he was one of the substantial citizens of the town, bearing an important part in

its affairs, as also of the Congregational Church, of which he was a member. His life was a model of courtesy and uprightness, and his genial and cordial manners were a true index of his rare character.

Mr. Torrey was twice married. His first wife, Delia Chapin, died in 1821, about a year after their marriage. In 1824 he was again married, to Susan Holman Waters, the eldest child of Asa Waters, the founder of Armory Village, and granddaughter of Colonel Jonathan Holman, who raised and commanded a regiment in the Revolution.

Mrs. Torrey was a woman of rare endowments and character. Neglecting none of the varied practical duties of her life, and even attaining unusual success in the performance of them, her highest interest was always in the world of thought. She had an irrepressible desire to know the best that had been written in literature and philosophy, and in her search for this knowledge weariness and weakness were forgotten, and the limits of her strength were often passed. She had the courage to follow the new views of truth, which her active and progressive mind attained, to their conclusions. She died in Millbury, February 3, 1866. Her memory is cherished by her children as a precious legacy.

Five children were the fruit of this marriage—four daughters and one son—the third child, Samuel Davenport, who died in infancy. The daughters are—Delia Chapin, who resided with her father till his death; Louisa Maria, wife of Judge Alphonso Taft, of Cincinnati, Ohio, who was Secretary of War and also Attorney-General under General Grant, afterwards United States Minister to Austria, and later to Russia; Susan Waters, wife of Samuel A. Wood, of San Francisco, Cal.; Anna Davenport, wife of Edward Orton, LL.D., president and professor of geology in Ohio State University at Columbus, and afterwards State geologist of Ohio.

Mr. Torrey will long be remembered as a man of marked individuality, of thorough business methods, of inflexible integrity, with a decision and force of character which left a lasting impression wherever he was known.

In Millbury he devoted his attention to the care of his farm, to his family and his friends, taking also a lively interest in passing events. As he advanced in life his health became so far established that he was spared many of the painful infirmities of old age.

It happened to him to be called upon to assist in the burial of many of his juniors.

In a green old age  
He seemed like an oak, worn but steady,  
Amidst the elements, whilst the younger trees  
Fell fast around him.

Belonging to the heroic age of New England, he never for a moment lost the bearing of a gentleman of the old school.

Without office, or the desire of office, he enjoyed

the respect and confidence of all. To an unusual degree he possessed

That which should accompany old age,  
As honor, love, obedience, troops of friends.

DR. W. H. LINCOLN.

Dr. W. H. Lincoln was born in Dorchester, Mass., August 19, 1825. By the death of his mother, which occurred while he was quite young, the family circle was broken, and the five children, of whom he was the oldest, deprived of the many advantages which result from passing the first few years of life under a mother's influence. His early education was received at the ordinary public schools of fifty years ago, and later at the South Paris Academy, South Paris, Maine.

He began active life as a dentist in Portland, Maine. It was here that Dr. S. B. Chase, a leading physician of that city, suggested to him the idea of studying medicine, and kindly offered him the use of his library and practice. Thus it was that in 1850 he matriculated at Bowdoin Medical School, and passed the next six years of his life practicing dentistry for present needs and studying medicine for future usefulness.

He received the degree of Doctor of Medicine in 1856, and at once began the practice of his profession in Turner, Maine. Here he married Laura Nudd, of Brunswick, Maine, who died one year later. Soon after her death Dr. Lincoln removed to Hubbardstown, Mass., where he married Eunice A. Reid, and where he practiced medicine until May, 1862, when he received a commission as assistant surgeon in the Seventh Regiment Massachusetts Volunteers, then in the field before Richmond, and joined them at once.

In September, 1863, he was promoted to "full" surgeon, and as such served with this regiment until the expiration of its term of service. At the close of the war he became a fellow of the Massachusetts Medical Society, and located at Millbury, Mass., entering at once into a large and laborious practice, which he still continues.

He has three children,—Charles H., Laura B. (Mrs. F. E. Powers, Worcester, Mass.) and Jacob R. (Dr. J. R. Lincoln, Millbury, Mass.).

Dr. Lincoln never courted public opinion or sought public favor. He is a man open to conviction, but outspoken in religion, politics and whatever concerns the public welfare, building his own house and living in it. He has always been an active citizen, and interested in all municipal questions. In professional life his manner is zealous and determined; to him the patient is always of paramount, the friends of secondary importance.

His professional life has been one of unquestioned ability rather than of remarkable popularity, although it has already placed him in a position to enjoy his practice in the years to come.

W. H. Lincoln

## CHAPTER CXLI.

## HARDWICK.

BY WILLIAM T. DAVIS.

HARDWICK is situated on the western border of Worcester County, and is surrounded by the towns of Barre, Dana and New Braintree in that county, and the towns of Enfield, Greenwich and Ware in the county of Hampshire. Its territory measures about twenty-one thousand acres. At a time just preceding the establishment of the province of Massachusetts Bay, in 1692, this territory was little known. The hardy settlers of New England rarely ventured so far into the wilderness, where, in case of hostile Indian attacks, they had no avenues of retreat to the more secure settlements on the seaboard except through paths and trails, with which the natives were more familiar than themselves. In 1687, the date at which this narrative opens, the only western towns which had been settled—Deerfield, Westfield, Hatfield, Hadley and Northampton—were easily accessible by the Connecticut River, and along that stream they could readily escape to the garrisons along the Connecticut shore.

At the date above-mentioned, when every immigrant from the Old World felt that greed for the possession of land which abstinence at home from such a luxury had created, associations were constantly forming in the older towns of Essex and Suffolk Counties to secure grants which might, in time, secure to them abundant means of livelihood, or perhaps even untold wealth. Among these associations was one in the town of Roxbury, consisting of Joshua Lamb, Nathaniel Paige, Andrew Gardener, Benjamin Gamblin, Benjamin Tucker, John Curtis, Richard Draper and Samuel Ruggles. These men secured a deed of land which, with some alterations of boundaries, resulting from recent legislation, included the present township of Hardwick. The text of the deed is as follows :

Know all men by these presents that we, John Magnus, Lawrence Nassowanno, attorneys to Annogomock, Sachem of the tract of land called Wombesscook, James and Simon, sons and heirs of Black James, Sachem of the Nipmug country for divers good causes and considerations as thereunto moving, and more especially for and in consideration of the sum of twenty pounds current money of New England to us in hand paid by Joshua Lambe, Nath. Paige, Andrew Gardener, Benja. Gamblin, Benjamin Tucker, John Curtis, Richard Draper and Samuel Ruggles, of Roxbury, in the county of Suffolk, in New England, the receipt whereof we do hereby acknowledge ourselves therewith to be fully satisfied, contented and paid, have given, granted, bargained, sold, aliened, enfeoffed and confirmed, and by these presents do fully, freely and absolutely give, grant, bargain, sell, aliene, enfeoff and confirm unto the said Lambe, Paige, Gardener, Gambler, Tucker, Curtis, Draper and Ruggles, their heirs and assigns, a certain tract or parcel of land containing, by estimation, twelve miles long north and south and eight miles wide east and west, situate, lying and being near Quabaug, commonly known by the name of Wombesscook, being butted and bounded southerly upon the land of Joseph Dudley, Esq., lately purchased of the Indians, easterly the southermost corner upon a pond called Sasgookapaug, and so by a brook which runneth into the

said pond, and so up northerly unto a place called Nequaes, and so still northerly until it meets with a river Menamesich, and westerly by the river until it comes against Quabaug bounds and joins unto their bounds or however otherwise butted and bounded ; together with all and singular the rights, commodities, liberties, privileges and appurtenances whatsoever to the same belonging or however otherwise appertaining. To have and to hold the said tract or parcel of land situate, containing and being as aforesaid to the said Lamb, Paige, Gardener, Gambler, Tucker, Curtis, Draper and Ruggles, their heirs and assigns, in common tenancy to their only proper use and behoofe forever. And the said John Magnus, Lawrence Nassowanno, attorneys as aforesaid, James and Simon, heirs of Black James, as aforesaid, do covenant, promise and grant for themselves, heirs, executors and administrators, to and with the said Joshua Lamb, Nathaniel Paige, Andrew Gardener, Benjamin Gambler, Benjamin Tucker, Richard Draper and Samuel Ruggles, their heirs and assigns, that they will the above granted and bargained land and every part and parcel thereof, with their and every of their appurtenances, warrant and defend from all and every person and persons whatsoever claiming any right or title thereto or interest thereon, from, by or under us. In witness whereof the said John Magnus, Lawrence Nassowanno, attorneys as aforesaid, James and Simon, have hereunto set their hands and seals, this twenty-seventh day of December, Anno Domini, one thousand six hundred eighty and six, anno R<sup>e</sup> Jacobi, Secundi, Angliæ, &c. Secundo.

JOHN MAGUS,  
LAWRENCE NASOWANNO,  
JAMES,  
SIMON,  
ANNOGOMACK.

Signed, sealed and  
delivered in presence of us.

JOHN GARDENER,  
SAMUEL ANAT.

John Magnus, James and Simon, Indians, subscribers to this instrument personally appearing, acknowledged the same to be their act and deed, June 25th, 1687, before me—

WILLIAM STOUTTON.

There was evidently a doubt on the part of the grantees in this deed whether the title sought to be obtained under it would have any validity in the estimation of the government. It bears date only seven days after the appearance of Andros as Governor of New England, who declared all titles to lands vested in the Crown. At any rate it was not recorded until the 7th of May, 1723, and up to that time at least no steps were taken to take possession under its provisions. Three years or more after the record of the deed, those who were living of the original grantees and the heirs of the others proceeded to find the bounds of the granted lands and to petition the General Court to confirm their title. Their petition, presented June 10, 1727, was unsuccessful. In 1729 another attempt to secure a confirmation of title was unsuccessful, and after other equally unsuccessful efforts to obtain from the court a title to the whole or a part of the purchased lands, on the 17th of June, 1732, it was ordered "that there be and hereby is granted unto the petitioners and their associates a tract of land of the contents of six miles square for a township at the place petitioned for, to be laid out in a regular form by a surveyor and chainman under oath, a plan thereof to be presented to this court at their next session for confirmation ; the said land by them to be settled on the conditions following, viz. : that they within the space of five years settle and have on the spot sixty families (the settlers to be none but such as are natives of New England), each settler

to build a good and convenient dwelling-house of one story high, eighteen feet square at the least, and clear and bring to four acres fit for improvement and three acres more well stocked with English grass, and also lay out three shares throughout the town, each share to be one sixty-third part of the said town, one share for the first settled minister, one for the ministry and the other for the school; and also build a convenient meeting-house and settle a learned and orthodox minister within the time aforesaid." This order was concurred in by the Council June 20, 1732, and became a law on the signature of Governor Belcher being affixed on the 30th of June.

After the confirmation of their title to that portion of their purchase comprising a territory six miles square, the proprietors held meetings, admitted proper associates and voted to lay out the township, reserving ten acres near the centre for a meeting-house, burial-place and training-field. On the 22d of February, 1732-33, it was voted that "the committee shall as soon as may be lay out one hundred and eleven lots for the proprietors and settlers in one hundred acre lots, having respect to the quality of the land, viz.: four lots to each proprietor's share, sixty settlers and the lots for the minister, ministry and school; the minister's lot to be laid out by the committee near the centre of the town, and the rest of the lots to be drawn for both by the proprietors and settlers." It was also voted "that the remaining land belonging to the proprietors be all lotted out by the committee in such quantities as that each proprietor have three lots and so sorted as that in the draft each person may have a just and equal share," and "that each settler pay into the hands of the committee upon his drawing his lot the sum of five pounds towards the defraying the charges of surveying, etc., and the further sum of ten pounds each for the building a meeting-house and settling a minister within the space of three years after his being admitted." It was still further voted "that each proprietor have leave to offer for admission five settlers of such persons according to the court's grant and shall give bonds to the committee for the fulfillment of the orders and conditions of court within three years from their admission, on forfeiture of their lots to be again disposed of; always provided that those who have paid their money and are already admitted be deducted out of the whole in proportion; and whereas the proprietors have each of them a draught of four lots, which makes nine lots, including the settlers, five of any of the nine being settled by them shall be sufficient."

In 1733 an enlargement of the lands of the proprietors was granted by the General Court as compensation for certain lands in the six miles square which it was found belonged to other parties. This enlargement began "at the east bank of Ware river, at the northwest corner of a tract of land laid out to James Hovey; from thence running southerly as that line

runs to Brookfield bounds; and from thence easterly as Brookfield bounds run to the southwesterly corner of Braintree six thousand acres; and from thence extending northwesterly, bounding northeasterly on said six thousand acres till the line comes to Ware river; and then bounding on Ware river to the first bounds in lieu of four hundred acres taken off by Braintree grant and the three hundred acres taken off by land of John Read, Esq., and the ponds, etc., as aforesaid, provided it interferes with no former grant."

In 1736 the territory was incorporated as a district, and the proprietors were authorized to choose town officers. At this time it appears to have borne the name of Lambstown. On the 27th of January, 1739, the following act was passed incorporating the town under the name of Hardwick:

An act for erecting a plantation in the County of Worcester, called Lambstown, into a township by the name of Hardwick.

Whereas the plantation of Lambstown, so-called, in the County of Worcester, is competently filled with inhabitants who labor under divers inconveniences and difficulties for want of a power of enjoying and exercising town privileges among them, and have addressed this Court, setting forth the same and praying for relief therein;

Be it enacted by His Excellency, the Governor, Council and Representatives, in General Court assembled, and by authority of the same.

SECT. 1. That the said plantation of Lambstown, inclusive of the additional grant, lying and being on both sides of Ware river, as the same is hereafter bounded and described, be and hereby is constituted and erected into a separate and distinct township by the name of Hardwicke, the bounds of said township being as follows, viz.: beginning at the East Bank of Ware river, at the Northwest corner of a tract of land laid out to James Hovey; from thence, extending southerly, as that line runs to Brookfield bounds; and from thence Easterly, as Brookfield bounds run to the Southwesterly corner of Braintree six thousand acres; and from thence extending Northwesterly, bounding Northeasterly on said six thousand acres till the line comes to Ware river, and so over the river, the same course, till it comes to the corner of Braintree grant, and there strikes on Rutland line; thence running North thirty-nine degrees West seventeen hundred and sixty perch; thence South forty degrees West eighteen hundred perch; thence South one degree thirty minutes West ten hundred and thirty perch; thence East two degrees thirty minutes North ten hundred and five perch to Ware river.

SECT. 2. And that the inhabitants thereof be and hereby are vested and endowed with equal powers, privileges and immunities which any of the inhabitants of any of the other towns in this province are, or by law ought to be, vested with.

Provided nevertheless,

SECT. 3. That the inhabitants of said town do within three years from the publication of this act erect and finish a suitable and convenient meeting-house for the public worship of God among them, they having already an orthodox minister settled among them.

On the 5th of March, 1738-39, a meeting was held, called by Christopher Paige, who was duly authorized by law, at which town officers were chosen for the year. Christopher Paige was moderator, Cornelius Cannon was chosen town clerk, John Wells treasurer, and a Board of Selectmen was chosen, consisting of Eleazer Warner, John Wells, Benjamin Smith, William Thomas and Constant Merrick.

Before the incorporation of the town, as the act states, a minister had been either settled or employed. Rev. Ephraim Keith began to preach on the plantation as early as 1734. Rev. David White succeeded him November 17, 1736, and on the same day a church was organized. The pastorate of Mr. White continued until his death, January 6, 1784. In

1736-37 a meeting-house was erected on the ten acres originally reserved for that purpose, but in 1741 a new house was built on the Common, which was not completely finished for several years. By the year 1750 the meeting-house was completed, but not before serious troubles had risen in the church, which it was found difficult to allay. After their final settlement the remainder of the ministry of Mr. White, which closed with his death, in 1784, was peaceful and prosperous. Mr. White was descended from John White, who came to New England in 1632. He was born at Hatfield, July 1, 1710, and graduated at Yale College in 1730.

The successor of Mr. White was Rev. Thomas Holt, who was ordained June 25, 1789. At the ordination of Mr. Holt, Rev. Charles Backus, of Somers, Conn., made the introductory prayer; Rev. Benjamin Trumbull, of North Haven, Conn., preached the sermon; Rev. Josiah Dana, of Barre, made the consecrating prayer; Rev. Nathan Fiske, of Brookfield, gave the charge; Rev. Daniel Foster, of New Braintree, the right hand of fellowship; and Rev. Joseph Appleton, of Brookfield, made the concluding prayer. Mr. Holt's pastorate continued until March 27, 1805, when he was dismissed at his own request.

Rev. William Brigham Wesson, a graduate of Williams College in 1802, followed Mr. Holt and was ordained October 20, 1805. During the ministry of Mr. Wesson the division of parishes and churches in account of the growing prevalence of Unitarianism, was felt in Hardwick, and in consequence of the non-committal stand taken by him some dissatisfaction in the church resulted, and though sustained by a majority of the society, he asked and received his dismissal, June 14, 1824.

After the dismissal of Mr. Wesson the differences between the church and the parish prevented an agreement as to the settlement of a new minister. The church held to its Trinitarian doctrines; the parish had crossed the threshold into the new theology. The result of the differences was the secession, in 1827, of the old orthodox Congregationalists, who were a majority of the church, with the old church records leaving the Congregational Society, with a minority of the church in possession of the meeting-house and property of the parish. The old society invited Rev. John M. Merrick to settle as their pastor and he was ordained August 27, 1828. Mr. Merrick continued in the pastorate until March 5, 1832, when he resigned and not long after settled in Walpole, where he remained many years. In 1869 he was settled in Charlestown, New Hampshire, and there died March 20, 1871.

Rev. John Goldsbury followed Mr. Merrick and was installed July 4, 1832, and remained until 1839. Mr. Goldsbury was a native of Warwick and graduated at Brown University in 1820. Aside from his duties as pastor he was deeply interested in the cause of education and in various places was engaged in

the duties of teacher. Under his instruction, among others, his son, John Goldsbury, was fitted for Harvard and graduated with the writer of this sketch, in 1842. A daughter of Mr. Goldsbury married the late Amos B. Merrill, an attorney-at-law, in Boston, of high character and considerable practice.

In 1841 a new meeting-house was erected under an arrangement with the Universalist Society, by which the two societies were practically united, and dedicated January 25, 1842. Rev. Rufus S. Pope, who had been preaching to the Universalists, was engaged for a year and was followed by Rev. Norwood Daman, Unitarian, who remained two years. On the 2d of July, 1845, Rev. Benton Smith, Universalist, was ordained, who continued his pastorate until 1850.

After various supplies Rev. George J. Sanger, a Universalist, was installed May 7, 1856, and served eight years. During the war he served as lieutenant and chaplain in the army, and not long after his return resigned his pastorate, June 1, 1864.

Rev. John Harvey Moore, Universalist, followed, and preached until 1874. In 1875 Rev. Henry Jewell, also Universalist, took charge of the pulpit, and served until his resignation, in 1878. Since the resignation of Mr. Moore the pastorates of the society have been held by Rev. Lucian S. Crosley, who was ordained November 13, 1879, and Rev. Benjamin V. Stevenson, who began his services April 1, 1882.

The seceding church, on the 13th of November, 1827, organized the "First Calvinistic Society in Hardwick," and built a meeting-house, which was dedicated September 9, 1829. Rev. Martyn Tupper was ordained pastor April 16, 1828, and resigned April 29, 1835. His successor was Rev. Edward J. Fuller, a native of Plainfield, who was ordained November 3, 1835, and dismissed March 21, 1837. Rev. William Eaton followed September 6, 1837, and resigned March 26, 1840. Mr. Eaton was followed by Rev. Barnabas M. Fay, who was ordained May 20, 1840, and served until August 23, 1843. The next pastor was the Rev. Asa Mann, a native of Randolph, Vt., and a graduate of Amherst in 1838. He was ordained June 19, 1844, and resigned October 14, 1851. Rev. Martyn Tupper began a new pastorate at Hardwick June 23, 1852, and resigned September 1, 1870. Rev. Eldridge W. Merritt served from June 5, 1873, the date of his installation, until October 1, 1876, and since that time the pulpit has been occupied by Rev. Augustus C. Swain, Rev. Gilbert B. Richardson and the present pastor, Rev. Charles A. Peirce.

The Universalist Society, to which reference has been already made, was incorporated June 12, 1824. For many years previous to that time there had existed in Hardwick more or less of those holding to the Universalist faith, who held public service as opportunity offered, but there was no organized society until the date above mentioned. And even after the act of incorporation no uninterrupted services were held until 1836 or '37, when Rev. John Pierce was

ordained, on the 27th of September in the latter year. Rev. Gilman Noyes, a native of Atkinson, N. H., and a graduate at Dartmouth College in 1830, succeeded Mr. Pierce, and was followed by Rev. Rufus S. Pope, who was pastor of the society at the time of its union with the Unitarian Society already described. After the union the society gradually fell into the Universalist ranks, and is now reckoned one of the societies of that organization.

A Baptist Society, which was incorporated in Hardwick in 1816, built a meeting-house in 1801, and a larger one in 1832. In 1846 the society removed its place of worship to Ware, and sold the meeting-house in Hardwick. During the life of this society in Hardwick its pastors were: Rev. Ebenezer Burt, ordained June 20, 1798, and dismissed November 19, 1827; Rev. Joseph Glazier, Rev. Nelson B. Jones, Rev. William Brown and Rev. Joseph Glazier, for the second time, who resigned in 1846, not long before the removal of the society to Ware.

A Methodist and a Catholic Society are also in operation, the former at the Furnace Village, where a meeting-house was erected in 1845, and the latter at Gilbertville, where a church was erected in 1872.

A Congregational Society was organized at Gilbertville about 1860, and held its services in a hall, built by Mr. George H. Gilbert, until the dedication of their stone church, September 10, 1874. Towards the construction of this church Mr. George H. Gilbert, who died in 1869, bequeathed the sum of twenty thousand dollars, the George H. Gilbert Manufacturing Company gave twenty thousand dollars and a piece of land with the foundation for the structure, Mrs. Gilbert presented the society with an organ and her children with the furniture and a window as a memorial of a beloved sister. The various pastors and supplying ministers of this society have been Rev. William H. Beecher, Rev. Rufus P. Wells, Rev. Willard D. Brown and the present pastor, Rev. Arthur Titcomb.

After the incorporation of New Braintree, in 1751, which diminished to a small extent the territory of the town, no change was made in its boundaries until the passage of the act incorporating the town of Dana February 18, 1801. That act described the new township as follows:

Beginning at the southwest corner of Petersham, on the east line of New Salem, and running on said line three miles and sixty rods to the southeast corner of said New Salem; thence east seventy-four rods; thence south two hundred and thirty rods; thence east thirty rods; thence south one mile and one hundred and thirty rods; thence east fourteen degrees south two hundred and sixty rods to Hardwick west line; thence south thirty-seven degrees west on said Hardwick line one hundred and twenty rods; thence east thirty-two degrees south two hundred and forty rods to the middle of Swift river; thence by a line drawn on the middle of said Swift river to the confluence of Pantapaug Pond; thence north thirty-eight degrees east one mile through said Pond to the northeast corner thereof at a stump and stones on land of Luther Page; thence north fifteen degrees east two hundred rods to the centre of the bridge across said Swift river on the country road; thence east twenty-one degrees north one hundred rods to the southeast corner of land of Stephen White; thence north twenty-two degrees east

eighty rods; thence north six degrees east two hundred and eighty rods; thence north five degrees west one mile and eighty rods to the eastern declivity of Three-penny Morris Hill (so-called); thence west ten degrees east to the northeast corner of land of Seth Williams one mile and eighty rods; thence west fourteen degrees north one hundred and thirty rods; thence west twenty-five degrees south two hundred rods; thence west nineteen degrees north to the first-mentioned bounds.

Another slight change in the boundaries was made by an act passed June 10, 1814, providing that Joseph Robinson, of New Braintree, with his family and so much of his farm as now lies in New Braintree and west of Ware River, should be set off from New Braintree to Hardwick.

On the 7th of February, 1831, a gore of unincorporated land was annexed to Hardwick, described as beginning at the northwest corner of Hardwick, and running north seventy degrees east five rods to the southerly corner of Petersham, thence south forty-one and one-quarter degrees east one hundred and eighty-four rods on the line of Petersham to the southeast corner thereof, and thence north thirty-seven and one-half degrees west one hundred and eighty-six rods on line of Hardwick to the bounds first mentioned.

On the 6th of February, 1833, a gore of land lying at "the southeasterly part of Hardwick and adjoining said town, called Hardwick gore, containing about two hundred acres, beginning at a monument in the pond above Anderson's mill, at a place where the westerly line of New Braintree leaves Ware River; thence on the said westerly line of New Braintree south fourteen degrees east one hundred and twenty-two rods to a stone monument; thence south thirty-seven degrees west two hundred and eighty-nine rods to another stone monument, at the southwest corner of New Braintree and northeast corner of Ware; thence north eighty-seven degrees west thirty-six rods to said Ware River; thence on the said river northerly four hundred and twenty-one rods to the southeast corner of Hardwick; thence sixty-one rods to the place of beginning, together with the inhabitants thereof," was annexed to Hardwick. This last annexation furnished the territory on which the village of Gilbertville is chiefly built, and on which a large part of the population of the town have their residences.

As a partial compensation paid by the town for these additions to its territory, by an act passed February 4, 1842, a tract of land described as "beginning at the southwest corner of Silas N. Johnson's land, on the line of said Hardwick and Dana; thence running south forty-nine degrees east two hundred and four rods to the corner of Stephen Hillman's land; thence north thirty-one and one-half degrees east five hundred and forty-three rods to Barre, Hardwick and Petersham corner, together with a part of Petersham," was taken from Hardwick and annexed to Dana.

It was not long after the incorporation of the town and after the complete operation of its municipal machinery had been put in motion before the prosperous career of its little community was disturbed by the French and Indian Wars. During the second war the

following Hardwick men were engaged in military service:

Samuel Atwood.  
David Allen.  
David Aiken.  
Timothy Abbot.  
Solomon Aiken.  
Edward Blair, corp.  
Thomas Burns.  
John Blunt, sergt.  
Simeon Bacou.  
Jason Badcock.  
Nathan Billings.  
Daniel Billings.  
Samuel Billings.  
Abel Benjamin.  
Silas Bowker, sergt.  
Elisha Billings, corp.  
James Bacon.  
David Barr.  
Edward Blair.  
Samuel Bridge.  
Jotham Bruce.  
Jonas Butterfield.  
Oliver Cobleigh.  
Samuel Church.  
Elisha Church.  
Richard Church.  
Timothy Church.  
Elisha Cobb, corp.  
John Cobb.  
Lemuel Cobb.  
Ebenezer Cox, capt.  
Isaac Clark, corp.  
Henry Chase, corp.  
Isaiah Carpenter.  
Ebenezer Cummings.  
Elijah Cummings.  
Ebenezer Curtis.  
Joseph Chamberlain.  
David Doane, sergt.  
Samuel Dexter.  
James Doane.  
Zurishaddais Doty.  
Richard Ellis.  
Joshua Elwell.  
Thomas Elwell.  
Jonas Fay.  
Daniel Fay.  
James Fay.  
John Fay.  
Stephen Fay.  
Joshua Farr.  
Jonathan Farr.  
Edward Foster.  
Thomas Freeman.  
Watson Freeman.  
Aaron Forbush.  
Isaac Gibbs, corp.  
Joseph Gilbert.  
John Green.  
Larkin Green.  
Caleb Green.  
David Gitchell, sergt.  
Benjamin Goddard.  
David Glazier.  
Isaiah Glazier.  
Stephen Gorbham.  
Solomon Gilbert.  
Daniel Hastings, corp.  
Jacob Hastings.  
Samuel Hedge, corp.  
John Haskell.  
Zachariah Haskell.  
Elisha Hedge.  
Richard Hatch.  
Simeon Hazeltine.  
Samuel Hunt.  
Joseph Higgins, corp.  
Samuel Harrington.  
Elisha Hedge, Jr.  
Joseph Hinds.  
Seth Hinckley.  
Sylvanus Howe.  
Thomas Johnson.  
Edmund Johnson.  
John Jordan.  
Dudley Jordan.  
Edmund Jordan.  
Jacob Knowlton.  
Ebenezer Lawrence.  
Ezra Leonard, ens.  
Amos Marsh.  
John McSwain.  
Benjamin Mann.  
Wm. Merrick.  
Paul Mandell, capt.  
Noah Mandell, ens.  
Nathaniel Merrick, corp.  
David Marble.  
Nathan Marble.  
Joseph Nichols.  
Caleb Nye.  
Timothy Newton, clerk.  
Silas Newton, clerk.  
Benjamin Negus.  
Wm. Paige, capt.  
Phineas Powers.  
Ezekiel Pratt, ens.  
Isaiah Pratt.  
Jonas Paige.  
John Paige.  
John Paige, Jr.  
Joseph Petrell.  
Daniel Parkhurst.  
Timothy Pike.  
Abraham Powers.  
Wm. Powers.  
Timothy Ruggles, Brig.-Gen.  
Samuel Robinson, capt.  
Samuel Robinson, Jr.  
James Robinson, Jr.  
Leonard Robinson.  
Eliaser Rice, ens.  
John Roberts.  
Benjamin Raymond.  
John Raymond.  
Ephraim Rice.  
Oliver Rice.  
Whitney Ruggles.  
Joseph Ruggles, lieutenant.  
Solomon Rice.  
Moses Seaver.  
Job Smith.  
Nathaniel Sprout.  
Daniel Stearns.  
Thomas Stevens.  
Elkanah Stewart.  
Seth Stewart.  
Samuel Stewart.  
Wm. Stone.  
Phillip Safford, drum.  
Joel Simonds.  
Challis Safford, surg.  
Ebenezer Safford, sergt.  
Timothy Sage.  
Nathan Stone, lieutenant.  
Samuel Steele, corp.  
Bartholomew Taylor.  
James Taylor.

John Train.  
Ebenezer Whipple, sergt.  
James Whipple.  
Benjamin Whipple, sergt.  
Paul Whipple.  
Wm. Wood, corp.  
Pelatiah Ware.  
Nathaniel Winslow.  
Seth Winslow, Jr.  
Shubael Winslow.  
James Winslow.  
Samuel Winslow, sergt.  
David Weeks.  
Holland Weeks.  
Thomas Weeks.  
Nathaniel Whitcomb.  
James Whitcomb.  
Asa Whitcomb.  
Nathaniel Whitcomb, Jr.  
Thomas White.  
Daniel Warner.  
Elijah Warner.

Brigadier-General Ruggles, who entered the service from Hardwick as colonel and soon rose to the rank and title here given to him, was a man whose distinction deserves some special reference. He was descended from Thomas Ruggles, who appeared in Roxbury as early as 1637. Rev. Timothy Ruggles, father of the general, graduated at Harvard at 1707, and was settled in Rochester, Mass., November 22, 1710. He was in many ways helpful in the early settlement of Hardwick, his father, Samuel Ruggles, having been one of the original purchasers of the territory from the Indians in 1686. Among his classmates was Rev. Thomas Prince, the annalist, and pastor of the Old South Church in Boston. His pastorate continued in Rochester until his death, in 1768. The general was born in Rochester October 11, 1711, and graduated at Harvard in 1732. After practicing law for a time in Sandwich, where he also kept a tavern, he settled in Hardwick, which town he represented in the General Court in 1736. At the battle of Lake George in 1755 he was brigadier-general and second in command. He was appointed judge of the Inferior Court of Common Pleas in 1756, and was the chief justice of that court from 1762 until the Revolution. He was president of the Stamp Act Congress of the Nine Colonies in New York in 1765, but, refusing to concur in its measures, was reprimanded by the Legislature. He adhered to the King at the beginning of the Revolution, was a Mandamus Councilor, and on the evacuation of Boston went with the British troops to Halifax. He returned to Long and Staten Islands and organized a body of loyal militia. His property was confiscated by the act of 1779, and at the close of the war or earlier he settled in Nova Scotia, and died at Wilmot August 4, 1795.

Nor was the town of Hardwick less active in its efforts to carry the Revolutionary War to a successful conclusion. In the archives of the State the names of the following persons are found, who at various times and for various periods of service took part in the struggles either as a part of the militia or of the Continental army:

Atwood Aiken, corp.  
Solomon Aiken, sergt.  
John Aiken.  
Nathaniel Aiken.  
Israel Aiken.  
Philip Amidon.  
Seth Babbitt.  
John Butler.  
Samuel Billings, Jr., capt.  
Adnah Bangs, corp.  
Elisha Bangs, lieutenant.  
Nathan Bangs.  
John Bangs.  
Jonathan Belding.  
Phineas Blood.  
Joseph Boynton.  
Joseph Byram.  
Ebenezer Barlow.  
Joseph Barlow.  
James Byram.

Samuel Beals, sergt.  
 Oliver Bailey, corp.  
 Jedediah Barrett.  
 John Batchelder.  
 Joshua Boyden.  
 Silas Bowker, sergt.  
 Nathan Carpenter.  
 Edward Chaloner.  
 Isaac Clark.  
 Uriah Converse.  
 Jabez Cobb.  
 Abraham Chamberlin, sergt.  
 Moses Chamberlin.  
 Edward Church.  
 James Crossman.  
 Jonathan Childs.  
 Nathan Crosby.  
 Paul Crowell.  
 Thomas Crowell.  
 William Chamberlin.  
 Elijah Carpenter.  
 Isaac Cummings.  
 Barnabas Cushman.  
 David Chamberlin.  
 Nathaniel Crowell.

The loyal sentiment, which existed to a marked degree in many of the towns on the seaboard, found slender foothold in the inland towns. It is a little singular that in the towns where the old Pilgrim blood coursed most abundantly in the veins of the people adherence to the crown should have been the most pronounced. No communities in the Massachusetts Province held within their limits so many descendants from the original settlers of New England in 1620 as Plymouth and Marshfield, and in those towns the loyal sentiment was strong. In the latter town, at the beginning of the war, the loyalists were in the majority and were suppressed only by the most active measures. In the interior towns, among the farming population, on the contrary, the current of feeling was strongly in one direction and that towards resistance and independence. Of Timothy Ruggles, the leading loyalist in Hardwick, mention has already been made. As far as the writer knows, there were but three others sufficiently pronounced in

their views to be publicly classed among the friends of the crown. John Ruggles, son of Timothy, was proscribed and banished in 1778, and afterwards lived in Nova Scotia until his death.

Daniel Oliver, a graduate of Harvard in the class of 1762, settled as a lawyer in Hardwick, and, leaving the country, took up his residence in England, and died at Ashted, Warwickshire, May 6, 1826. Sabine, in his sketches of loyalists, calls him the son of Chief Justice Peter Oliver, who was a noted loyalist, and died at Birmingham, England, October 13, 1791. It is more probable that he was the son of Andrew Oliver, a brother of Peter, who succeeded Hutchinson as Lieutenant-Governor, and who, as the distributor of stamps, was hung in effigy on the Liberty Tree in Boston.

Jonathan Danforth was imprisoned, but finally released by order of the General Court, and continued to live in Hardwick many years afterwards, a suspected, though not a proved, loyalist.

After the War of the Revolution the excitement attending the causes of Shays' Rebellion disturbed for a time the peace of the town, but was soon allayed. The annoyances of the French War, which caused trouble in the towns on the coast engaged in foreign commerce, caused no commotion in the inland communities, and the War of 1812 was little felt. The town went on in a peaceable career, first putting its financial affairs in a satisfactory condition, and then enlarging and extending its municipal machinery. More attention was paid to the establishment of schools, roads and bridges were built, stage lines were put in operation, a town-house was built, libraries were organized, and on the 15th of November, 1832, the town, with heartfelt congratulations, celebrated the one hundredth anniversary of its incorporation. On the occasion of this celebration the exercises were held in the old meeting-house, and consisted of music, prayers by Rev. John Goldsburly and an address by Rev. Lucius R. Paige.

In the War of the Rebellion, as in the French and Indian War and in the Revolution, the people of Hardwick were not behind other towns in the Commonwealth in the display of patriotic sentiment and in their efforts to do their share of work and bear their share of burdens in carrying it to a successful conclusion. The following is a list of the soldiers furnished by the town at different times and for different terms of service, some of whom enlisted more than once:

Joseph Atwood.	Newell A. Bacon.
Henry P. Aiken.	Alonzo P. Brewer.
Wm. F. Alden, corp.	Warren J. Barnes.
Sanforth Botham.	Wilder C. Barnes.
Augustus T. Barnes.	Frederick W. Burgess.
Lauriston Barnes.	Charles G. Bartholomew.
Barnes Brigham, sergt.	Norman H. Butterfield.
John Bante.	Robert Bailey.
Henry Bigelow.	Michael Cameron.
Sanforth Botham.	Anson S. Comee, sergt.
William Brown.	Frank H. Cleveland.

James B. Conkey.	Benjamin F. Pease.
Frederick A. Cobb.	David Pickett.
Dwight Cleveland.	John W. Parker.
Charles H. Chandler.	Samuel D. Peck.
Wm. H. Cleveland.	Wm. A. Perry.
Henry J. Coburn.	Thomas Perry.
George W. Campbell.	George W. Parks.
George W. Davis.	Leverett Pierce.
Edward Dunn.	John M. Ramsdell.
John Devlin.	Timothy G. Redfield.
Calvin C. Deane.	Richard Roland.
Samuel S. Dennis.	David D. Rogers, corp.
Hiram B. Douglass.	Alden Rawson.
Robert W. Davis, sergt.	George W. Richardson.
Cheron J. Elwell.	Joseph D. Richmond.
Charles Edmunds.	George W. Robinson.
Marcus A. Emmons.	Alfred D. Ruggles.
August Ernst.	George H. Ralston.
Peter Greb, sergt.	Carl Rammelsburg.
Henry H. Granger, lieut.	Thomas M. Stanton.
Ebenezer W. Gleason.	Henry M. Sherman.
James H. Gleason.	Thomas Shannon.
John L. Gore.	Eugene Southworth.
Clark Hill.	Francis Spooner.
Thomas Hunt.	George J. Sanger, lieut.
Edwin W. Hammond.	Harmar C. Spooner, sergt.
Rodolphus W. Homer.	Henry A. Spooner, corp.
John Harper.	Sardius J. Sibley.
George C. Howe, mus.	James M. Smith.
Wm. H. Hunter.	Joseph P. Snow.
James Higgins.	Stuart M. Stafford.

The industries of Hardwick, aside from agriculture, are chiefly confined to the Page Paper Company, which is in successful operation, and the George H. Gilbert Manufacturing Company, engaged in the manufacture of flannels. Until within a few years other paper-mills were in operation, and in earlier times there were forges and furnaces doing profitable work, and employing a considerable number of hands. The George H. Gilbert Manufacturing Company is the successor of George H. Gilbert & Co., and was incorporated May 27, 1867, with an authorized capital of \$600,000. On the 1st of April, 1868, it was organized with a capital of \$250,000, and George H. Gilbert and Lewis N. Gilbert were chosen president and treasurer. The company operates five mills—one granite mill on the Ware side of the river, where the office of the company is situated, and four of brick,

on the Hardwick side of the river, in what is called Gilbertville. They own besides three or four hundred acres of land and about two hundred tenements, which constitute, with the factories, the most extensive plant for the manufacture of flannels in the United States. George H. Gilbert was born in Brooklyn, Conn., February 15, 1806, and removed to Pomfret, where he lived until he was eighteen years of age. He then went to Sutton, in Massachusetts, and learned the carpenter's trade. From 1827 to 1832 he lived in Worcester, and was engaged in the occupation of a machinist. In 1832 he removed to North Andover, and was employed as a journeyman in a machine-shop until, as a partner in the firm of Barnes, Gilbert & Richardson, he began the business of manufacturing woolen machinery, to which, finally, Davis & Furber succeeded. In August, 1841, he removed to Ware, and, in connection with Charles A. Stevens, of North Andover, bought the property of the Hampshire Manufacturing Company, on the south side of Ware River, including land and woolen-mill, for the sum of \$35,000. The business of the mill, carried on by its owners under the firm-name of Gilbert & Stevens, was at first confined to the manufacture of broadcloth and cloakings, with five sets of machinery, but was soon changed to the manufacture of flannels. In 1846 the firm built a granite-mill in Ware, on the privilege next below the other mill, which was taken by Mr. Gilbert on the dissolution of the partnership, in 1851. On the 1st of July, 1857, Mr. Gilbert formed a partnership with his nephew, Lewis N. Gilbert, under the title of George H. Gilbert & Co. Lewis N. Gilbert was a native of Pomfret, and entered his uncle's office in 1851, at the age of fifteen years, and consequently became a partner at the early age of twenty-one. In May, 1860, the firm bought a water privilege in Hardwick, on the same stream, with a spoke-shop and twenty acres of land, on which several tenements stood, and erected a brick mill. This was the birth of Gilbertville, which has since become so important a part of the old town. In 1863 a second mill was built, in 1864, a third, and in 1867, a fourth. After the death of Mr. George H. Gilbert, which occurred May 6, 1869, Lewis N. Gilbert became president, and Charles D. Gilbert, son of the deceased president, born in Ware in 1846, became treasurer.

It is not necessary, in the limited space awarded to this sketch, to trace the history of the school system of the town. It is sufficient to say that it has kept pace with that of other small towns, and during the last year a high school house has been built on land presented to the town by Miss Mary R. Mixter. Successful efforts have been made in earlier times in the direction of a higher education than the common schools afford. During the pastorate of Rev. John Goldsbury he opened an advanced school, and after the erection of the town-house, in 1838, its use was granted to Mr. Goldsbury for what was called a High School. There are now fifteen schools in the town,

with an average membership of four hundred and seventeen. For the maintenance of these schools, according to the last annual report of the selectmen, the sum of four thousand seven hundred dollars was appropriated at the annual meeting in 1887. The following list of expenditures by the town for the year ending February 18, 1888, will throw some light on the condition of the town and its municipal management:

For High School building, on account . . . . .	\$2,744.57
" repairs of school-houses . . . . .	58.52
" county tax . . . . .	1,003.00
" State tax . . . . .	1,687.50
" State aid . . . . .	240.00
" contingent expenses . . . . .	3,200.42
" snow bills . . . . .	359.28
" highways . . . . .	3,106.93
" new roads . . . . .	798.58
" schools . . . . .	4,566.23
" poor . . . . .	1,414.14
" town debt . . . . .	36,978.61
" taxes abated . . . . .	482.38
" town farm . . . . .	1,060.90
" setting stone at Gilbertville . . . . .	48.60
" sidewalk . . . . .	261.10
Total . . . . .	\$58,010.78

The treasurer states in his report that the sum of two thousand one hundred dollars was due on the High School house, making the entire cost of the building, including the cost of plan and specifications, \$4844.57.

Some idea of the representative men of the town in the different generations since its incorporation may be derived from the following lists of persons who have, since the incorporation of the town, served on the Board of Selectmen and represented the town or representative district of which the town has formed a part in the General Court:

The twenty-first article of amendments to the Constitution, making the House of Representatives consist of two hundred and forty members, and making provision for the creation of Representative districts, was adopted by the Legislatures of 1856 and '57, and ratified by the people in 1857. Under the apportionment of 1857, based on the census of that year, Hardwick and Barre constituted the Tenth Representative District of Worcester County, and were represented until the next apportionment as follows:

Charles Bremblecom, of Barre.....	1858-59
Forester B. Aiken, of Hardwick.....	1860
Orin Trow, of Hardwick.....	1861
J. Henry Goddard, of Barre.....	1862-63
Albert E. Knight, of Hardwick .....	1864
Amasa Gibson, of Barre.....	1865
Samuel S. Dennis, of Hardwick.....	1866

Under the apportionment of 1866, based on the census of 1865, Petersham, Dana, Phillipston, Hubbardston, Barre, Hardwick and New Braintree constituted the Fourth Representative District of Worcester County, and were represented until the next apportionment as follows:

Addison H. Holland, of Barre.....	1867
Lyman Woodward, of Hubbardston.....	1867
Wm. Mixter, of Hardwick.....	1868
J. Otis Hale, of Hubbardston .....	1868
Stephen D. Goddard, of Petersham.....	1869
Charles Wilcox, of New Braintree.....	1869
James W. Jenkins, of Barre.....	1870
Jubal C. Gleason, of Hardwick.....	1870
James G. Smith, of Phillipston.....	1871
N. L. Johnson, of Dana.....	1871
Lyman Woodward, of Hubbardston.....	1872
Harding Woods, of Barre.....	1872
Stephen D. Goddard, of Petersham.....	1873
Charles A. Gleason, of New Braintree.....	1873
Almond M. Orcutt, of Hardwick.....	1874
John W. Rice, of Barre .....	1874
Henry S. Miner, of Phillipston.....	1875
Albert E. Rice, of Barre.....	1875
Henry S. Miner, of Phillipston.....	1876
S. S. Gleason, of Hubbardston.....	1876

Under the apportionment of 1876, based on the census of 1875, Dana, Hardwick, Barre, Oakham and New Braintree constituted the Tenth Representative District of Worcester County, and were represented until the next apportionment as follows:

John B. Fairbank, of Oakham.....	1877-78
Chauncey Loring, of Barre.....	1879
Thomas P. Root, of Barre.....	1880-81
James H. Walker, of Hardwick.....	1882
Allen W. Goodman, of Dana.....	1883
George K. Tufts, of New Braintree .....	1884
George Manly, of Hardwick.....	1885
Jesse Allen, of Oakham.....	1886

Under the apportionment of 1886, based on the census of 1885, Barre, Dana, Petersham, Hardwick

and Rutland constitute the Third Representative District of Worcester County, and have been represented as follows:

James F. Davis, of Barre.....	1887
Albert L. Wiley, of Hardwick.....	1888
George Ayres, of Petersham .....	1889

With reference to the agricultural industry of Hardwick, the following extracts from the census of 1885 will give some idea of its extent and importance:

The animal products of the town are laid down as valued at \$11,367, including beeswax, calfskins, hides, honey, manure, pelts and wool; the clothing and needlework at \$511, including hats and mittens; the dairy products at \$57,795, including butter, cheese and milk; the food products at \$2,339, including canned fruit, catsup, dried fruit, horse-radish, ice, maple syrup, maple sugar, pickles and vinegar; liquors and beverages at \$3,097, including cider and wine; poultry products at \$5,260, including eggs, feathers and poultry; wood products at \$14,375, including ashes, rails, fuel, lumber, posts and sleepers; cereals at \$11,755, including barley, buckwheat, corn, oats, rye, wheat; fruits, etc., at \$15,121, including apples, barberries, cherries, cranberries, grapes, strawberries, melons, quinces, etc.; hay, straw and fodder at \$66,312; meats and game at \$14,432; vegetables at \$10,754.

Since the establishment of the mills at Gilbertville and the opening of the Massachusetts Central and Ware River Railroads, Hardwick has been steadily gaining in population and wealth. In 1875 the population was 1992; in 1880, 2233; and in 1885, 3145. The valuation of the town in 1885 was \$1,333,258. With the advantages of good water-power, of well-established and successful manufacturing industries, and an easy access to markets, the future of Hardwick can be no other than one of promise.

The space allotted to the writer having been filled, this imperfect sketch must close. For more thorough information than these few pages can furnish the reader is referred to the "History of Hardwick," written by Rev. Lucius Robinson Paige, a native of the town, and published in 1883. Mr. Paige has brought to the preparation of his work not only an affection for the place of his birth, but the instincts of an historian and the ability of a scholar. His "History" is marked by that accuracy of statement and thoroughness of research which have characterized all his labors in the antiquarian and historic field. To the reader it is an abundant fountain of knowledge; to the writer it is a model which he may well follow in any historical work in which he may be engaged.

## BIOGRAPHICAL.

CHARLES F. HITCHCOCK.

Says an old philosopher: "All men, whatever their condition, who have done anything of value, ought to record the history of their lives." Eventful periods occur at rare intervals in the lives of men the most distinguished; but even in their more retired walks of private life there are few whose lives are not marked by some vicissitudes of fortune, which, however trivial they may seem, are yet sufficient to excite great interest. The events which give the highest interest to biography are of a volatile and evanescent nature, and are soon forgotten. It is the part of the biographer to collect these passing events and fix them indelibly on the page of history, that succeeding generations may know how their predecessors lived, what ideas governed them, what trials and difficulties they encountered, and how they overcame them, and even their domestic relations; for all these teach a lesson that will be serviceable by pointing out what paths lead to success and what roads are to be avoided as leading to failure. There is none so humble that his life can fail to be an object of interest when viewed in the right light. How much more will this interest be enhanced when we contemplate the life of a man who, by his own heroic struggles, has hewn out his own pathway to success and compelled the fates to grant him his reward. Most certainly one who, entirely by his own efforts, has attained affluence and social position, and, through all the changing events of life, has preserved his integrity unimpaired, is well deserving of the pen of the historian.

Such a man is the subject of this sketch. Charles Foster, son of Abner and Susan Hitchcock, was born in Brimfield, Mass., July 3, 1831. His boy life, spent with his parents, differed in no material respect from that of the average boy of his time. In winter he attended the country school, and in summer assisted his father upon the farm, thus early learning the need and importance of industry. The limited means of his parents necessitated economy, and the lessons here learned of activity, prudence and unswerving honesty were the foundation walls upon which the superstructure of his upright and successful life has been erected.

In 1844 his parents removed to Ware, and the next year he found employment in the store of A. & J. H. Peters, continuing with them until the termination of their business in 1845. The next four years he remained with his father at work upon the farm, until, in the autumn of 1849, with the restless curiosity of an energetic young man wishing to see something of the world and to accomplish something for himself, he went to Enfield, Mass., to work in the store of Field & Leland. This firm carried on the palm-leaf and hat business, and their employes knew nothing of the eight-hour law of to-day.

Young Hitchcock's duties began with the rising of the sun, and when late at night the last story had been told by the "oldest inhabitant" to the ever-listening group at "the store," his thrifty employers sent him with his associates to the loft to "sort hate," this employment frequently lasting until midnight. As compensation for these arduous services he received for four years' labor with this house the princely sum of four hundred dollars, from which his board for the last year was deducted, and as the minimum price for board in that town at that time was two dollars and fifty cents per week, but two hundred and seventy dollars remained as the salary for this long and efficient term of service. In October, 1853, he returned to Ware and obtained employment in the general store of David P. Billings, with whom he remained till March of 1855, when he purchased the McClintock farm, and for the next eight years was a tiller of the soil; here he produced milk, with which he supplied the people of Ware. His tastes were for mercantile life, and in 1863 he sold the farm and removed to Gilbertsville, which has since been his home.

Here he established a general store—the first one in the place. For several years, with the assistance of his young wife, who proved herself to be in very deed a "helpmeet" to him, he was enabled to carry on the whole business. As time passed on and prosperity came to him, and the needs of the community demanded, he increased and extended his business.

In 1879 he associated his only son, Fred. A., with him in business, and in 1885 they opened the Central Market, thereby supplying a long-felt want in this section of the town. At present the business of the firm gives employment to twelve persons and necessitates the service of four teams. In a town of the size of this the development of a business of these proportions can only be accomplished by untiring effort and strict integrity. A rule of business adopted by him in early life and firmly adhered to through all his career, was to "count one man's money as good as another's, have but one price for a given article, and allow no bartering or controversy over it."

Upon the son's admission to membership in the firm, Mr. Hitchcock, feeling the need of some relaxation from the activity and confinement of his business, purchased a farm one mile from the village, and in 1884 erected a substantial and attractive home thereon and removed his family thereto, where he has since resided.

Stock-farming having attractive features for him, he took this means of obtaining recreation, and his herd of Jerseys are his delight.

November 17, 1853, he was united in marriage with Hannah M. McClintock, of Ware, daughter of Levans and Plythina McClintock. Six children have blessed this union. They are: Susan P., born at Ware, April 23, 1855; she is now the wife of W. E. Brown, M.D., and with him resides in Gilbertsville. Fred. A., born in Ware, May 26, 1857, married Clara M. Packard,

*Chas F Hitchcock*

*Joseph Stone.*

daughter of Otis and Melita Packard, April 19, 1882 (and to them have been born two sons, viz.: Chas. Frederick, born August 30, 1884, and Ralph Packard, born August 24, 1888); May E., born in Ware, May 30, 1860; Claribel, born in Ware, July 8, 1863,—these two daughters now reside with their parents. Wm. K., born in Gilbertsville, July 27, 1866, died August 11, 1866. Anna M., also born in this town, June 6, 1870, died January 25, 1879.

Mrs. Hitchcock proved a true help-meet to her husband.

Charles F. Hitchcock has a generous, charitable disposition, free from any miserly taint. His hand is ever ready, and his purse is ever open to assist any one in suffering or in want. He is never a hard creditor, but always ready to extend to the deserving all possible leniency. His manners are kind and affable. He has never sought or accepted any official position, although repeatedly urged to do so by his fellow-townsmen, preferring to give his whole time to the interests of his constantly increasing business.

In politics a positive Republican—reliable and true to his party, not the blind partisan, but the well-read, thinking man, able to defend and “give a reason for the faith which is within him.”

He enjoys the confidence and respect of the community in which he dwells, and is recognized as a representative business man, and an important factor in the growth and prosperity of the village in which he resides.

#### JOSEPH STONE, M.D.<sup>1</sup>

Dr. Joseph Stone was born in Shrewsbury, Worcester County, Mass., Nov. 12, 1789, and died in Hardwick, Worcester County, June 27, 1849, in the sixtieth year of his age.

His father, Joseph Stone, was long a respectable and influential citizen of Shrewsbury; lived to a good old age and died in the autumn of 1825.

Dr. Stone was the eldest of five children by a second marriage both of his father and mother. His mother's maiden-name was Mary Keyes, of Western (now Warren), Worcester County. She was the daughter of Colonel Keyes, who was a colonel in the American army of the Revolution, and lived long afterwards a prominent citizen of the county.

Dr. Stone passed his minority principally with his father upon a farm in his native town. His opportunities for early education, therefore, were only such as was afforded at that time in the village common school, which usually kept about six or seven months in the year, and the instruction of his parents, who were both intelligent, exemplary and religious persons.

During his youthful days he possessed an inquisitive and thoughtful turn of mind, and manifested a strong desire for the acquisition of knowledge. Even

when quite young most of his leisure hours were devoted to reading or study.

“When he was a boy he always had a book in his hand,” was the remark of one of his near relatives. He was in the habit of reading all the books he could obtain, often borrowing from the clergymen and others who had larger libraries than he found at home. At the age of eighteen or nineteen he commenced the study of Latin at Leicester Academy.

After passing a year or two in preparatory studies at Leicester, he entered upon the study of medicine in the office of the late Dr. Joseph H. Flint, then a resident of Shrewsbury. Dr. Flint soon afterward removed to Petersham, whither his pupil accompanied him, and remained through the term of his pupilage.

In the winter of 1812-13 he attended a course of lectures in the Medical College at Boston. In the summer of 1813, having then completed the prescribed course of study, Dr. Stone went to Hardwick with a view of establishing himself in business, but not meeting with sufficient encouragement, he left in the autumn and went to Newfane, Vt., where he spent the winter in teaching school.

In the following year, 1814, soon after the death of the established physician in Hardwick, Dr. Beckwith, some of the inhabitants invited Dr. Stone to return, which he accordingly did, and here his professional labors commenced, and continued to the end of his life. In 1816 he was married to Miss Patty Maynard, of Shrewsbury, with whom he lived in perfect harmony till the day of his death. They had six children, the only son dying in infancy.

During his long residence in Hardwick, Dr. Stone, besides attending to a laborious medical practice, engaged at times in public business, and was an active friend of the benevolent enterprises of the day. He was often selected by his fellow-citizens to fill public offices of honor and high responsibility, and he always discharged those trusts to the acceptance of his constituents. He was elected to various town offices, and among others he held the office of town clerk for twenty years in succession, and, it is said, “the town records will remain a perpetual memorial of his fidelity and correctness.” For many years before his death he held a commission of justice of the peace.

He was a member of the memorable convention of 1820 for revising the Constitution of Massachusetts, and in 1823 he was elected and served as a member of the House of Representatives in the State Legislature. In 1844 and 1845 he was chosen by the electors of Worcester County a member of the State Senate.

As a man, Dr. Stone was alike distinguished for physical, mental and moral energy, resulting from a sound constitution, a well-balanced mind, and from judicious early moral and religious training. He was a man of quiet, retiring habits, yet (in the language

<sup>1</sup> By Almon Orcutt, M.D.

of one of his neighbors) "No man's opinion on public affairs was listened to with more respect, and no man's advice more sought in private matters between man and man. The poor and unfortunate found in him a firm friend and adviser upon whom they could rely with safety."

He was an ardent friend of the cause of temperance, and practically illustrated in his own life the precepts which he endeavored to impress upon others.

He was a patron and promoter of the cause of education, labored earnestly to elevate the character of the common schools, contributed to the advancement of the higher institutions of learning, and was an efficient supporter of the institutions of religion.

But the favorite and engrossing object of pursuit was his profession. This he ardently loved, and to it he bent the energies of his mind with a diligence that never wearied. He shrank from no duty that was required of him, and whatever he undertook was always faithfully performed.

Dr. Stone was a member of the Massachusetts Medical Society, also of the Worcester District Medical.

In 1844 and '45 he was unanimously chosen president of the last-named society, and he discharged the duties of the office with dignity and impartiality. He declined a re-election in 1846, and when urgently solicited by the members to continue in the office he had filled so acceptably to all, with his accustomed modesty he replied that "He had already held the office two years, and knowing, as he did, there were many other members better qualified than himself to perform its duties, he could no longer consent to deprive the society of their services."

He was, probably, for some years before his death, more than any other, *the* consulting physician in his neighborhood.

In his intercourse with his medical brethren he was kind, conciliating, open, frank and liberal, ready to listen to their suggestions and adopt their opinions so far as consistent with truth, but would never yield his own convictions when he was satisfied of their truth, or the welfare of the sick required them to be maintained. He literally spent his life in going about doing good: his whole earthly existence was a free-will offering upon the shrine of benevolence and humanity.

## CHAPTER CXLII.

### WESTMINSTER.

BY REV. WILLIAM S. HEYWOOD.

*Origin—Settlement—Early Annals—Incorporation.*

**KING PHILIP'S WAR.**—The history of Westminster, which properly includes the causes that led to its original settlement, began in the year 1675, at the opening of that tragic episode in early New England

life known as the Narragansett or King Philip's War. More than half a century had passed away since the landing of the Pilgrim Fathers, and more than forty years since the founding of the Colony of Massachusetts Bay, and peace and good-will had prevailed for the most part between the new-comers to these shores and their aboriginal occupants. This state of tranquillity and kindly intercourse had been secured and perpetuated largely through the influence of Massasoit, the benignant, just, magnanimous chief of the Wampanoags, an important Indian tribe occupying the territory lying along the eastern borders of Narragansett Bay.

But Massasoit was no more, and his son, Pometacon, otherwise called Philip, a man of very different spirit from that of his father, had succeeded him. Jealous in his disposition and faithless to his promises of friendship and peace, the new chieftain, encouraged and supported by some of his hot-blooded warriors, entered upon a course of conduct well calculated to engender hostility and violence on the part of his subjects and to fill the colonists with anxiety and fear. Nor was it long before the purpose that lay back of all his actions was revealed.

A series of horrid massacres, beginning in the early summer of 1675 and continuing through several succeeding months, told all too plainly not only that war had begun between the red and white men, but that, so far as the former were concerned, it was designed to be a war of extermination. The terrible tragedies at Swansey, Mendon, Brookfield, Hadley and other places dispelled all doubts in this regard. Thoroughly alarmed, the imperiled colonists rose to meet the crisis so unhappily forced upon them.

Commissioners of the Plymouth, Massachusetts and Connecticut settlements met in November and decided to raise an army of a thousand men and equip them for service under the command of Governor Josiah Winslow of Plymouth, on or before the 10th of December following. The men were enrolled accordingly. The Massachusetts troops mustered on Dedham plain at the date named, ready for an advance into the country of the enemy. Before taking up the line of march, as directed by General Winslow, proclamation was made, in the name of the Colonial Government, to the assembled soldiers that, in addition to the regular pay for services rendered, they, or their heirs and representatives after them, should have a special grant of land, provided that "they played the man, captured the fort where the great body of the enemy was intrenched and drove him out of the country." These troops thereupon proceeded from Dedham, being soon after joined by those from Plymouth, and still later by the quota from Connecticut, when all went on together to the territory of the Narragansetts, on the westerly borders of Narragansett Bay. Thither the various marauding parties, that had been roaming abroad through the summer and autumn, committing depredations, burn-

ing towns and savagely butchering whomsoever they could, betook themselves, as the cold season came on, and with others, to the number of several thousand in the aggregate, went into winter-quarters on a rising swell of land, some acres in extent, in the centre of a large swamp, in what is now South Kingston, R. I. There they had built a village of six hundred wigwams and surrounded it with an invulnerable stockade, through which there were but two small entrances, protected on the outside by a strong guard. This was the objective point towards which the approaching army was slowly making its way. It had reached a point fifteen miles distant on the 18th of December, where the night was spent. Early the following morning the line of march was resumed in the midst of a snow-storm, which continued through the day. Weary with the journey, the swamp was not reached till about two o'clock P.M., when an attack was at once made upon the fort. The guards outside were slain, entrance was gained and a terrible battle was fought, resulting in the complete overthrow of the Indians, of whom, it is said, a thousand were slain or taken captive. The English also suffered severely, losing six of their bravest captains and about eighty men, while one hundred and fifty more were wounded.

This was the great battle of the war and virtually its turning-point, though hostilities and massacres continued in a desultory form, after the Indian fashion, till the following summer. The escaping warriors formed themselves into squads or bands, who went roaming through the country, attacking and destroying settlements and doing all possible harm to the population. New recruits were called into the field by the Colonies and soldiers were sent in all directions to meet and destroy or thwart the purpose of the enemy wherever he could be found. In spite of all that could be done, however, in this way, the Indians were continually perpetrating outrages and barbarities in widely-divided and most unexpected localities, eluding the search of their pursuers and sedulously avoiding an open fight. Lancaster, Medfield and Groton were surprised and burned before the winter was over, and Northampton, Seekonk, Marlboro', Sudbury, Turner's Falls and other places, later in the season. Many persons were slain or taken captive. But the power of the Indians was broken and fast ebbing away. Where Philip was all this time is not known. His men were not only greatly reduced in numbers, but were losing heart and hope. Some had deserted and surrendered to the whites. Others had left the neighborhood and joined other tribes not involved in the conflict. The family of Philip was taken captive. At length he himself once more appeared upon the scene, but discredited and despairing, as a refugee, seeking safety with a few followers at Mt. Hope, R. I. But the place of retreat was known, and a detachment of soldiery under Captain Church surrounded it, sure of their

prey. As the investing troops drew nearer and nearer to each other, Philip sprung from his hiding-place, and seeking to rush through an opening in the ranks of his foes, was shot by one of his own men who had gone over to the side of the colonists. The death of Philip took place August 12, 1676, which was the virtual ending of the war. The whites had suffered fearfully in the conflict, but they had gained the victory, and the power of the red man in New England had gone forever.

LAND GRANTS.—In 1685, nearly ten years after the termination of the war briefly outlined above, William Basset, of Lynn, and some forty others in that and neighboring towns, petitioned the General Court of the province of Massachusetts Bay for a grant of land to the Narragansett soldiers, as those engaged in the conflict were designated, in fulfillment of the promise made to them at Dedham. On the 4th of June the court granted "a tract of land eight miles square in the Nipmug country" "to the petitioners and others that were serviceable in the late Indian War." Of this action on the part of the Provincial Government nothing came, so far as can be ascertained from the records, the tract having never been located and the parties to whom it was assigned never taking measures to secure what had been given them.

The subject seems to have received no further attention from any one for more than forty years or until a large percentage of those actually engaged in the Narragansett service had gone to their graves, when, in the month of June, 1727, Samuel Chandler and Jacob Wright, "in behalf of themselves and of many others who were personally present at the fort and fight at Narragansett, or descendants of those who were there or in strictest alliance with them," petitioned the General Court for lands substantially as before, "under such restrictions and limitations as the Court shall judge fit." The petition was favorably received and action was taken looking to the granting of the prayer of the petitioners and also to the ascertaining of the names of all persons having claims under the pledge of the government designated. The matter did not come to a definite conclusion, however, until the 15th of June in the following year, when a committee was chosen to survey and lay out two tracts of land of the contents of six miles square in some of the unappropriated territory of the province for the officers and soldiers who served their country in the Narragansett War, to whom said tracts were to be granted and assigned on condition that the grantees shall "settle sixty families at least in each township, with a learned Orthodox minister, within the space of seven years from the date of the grant." On the 18th of the next December this committee reported "the plan of a town of the contents of six miles square exclusive of the pond near Rutland and Lunenburg." This was the original plan of what was afterward the town of Westminster, and is still preserved in the Archives of the State of Massachu-

setts. On the same day a plan of a second township of the same size was reported situated on Souhegan River, which subsequently became Amherst, N. H. Time went on, but no steps were taken in regard to the settlement of these grants. Indeed, the grantees of them were not definitely determined for several years after they were made. The number of claimants for lands under the pledge given to the Narragansett soldiers increased slowly until it reached the aggregate of eight hundred and forty, whereupon it was maintained that the grants made were much too small to give each person a sufficient amount to satisfy him and answer the demands of justice and honor in the case. Consequently the whole body of claimants, who had duly organized and were holding meetings from time to time in Boston and vicinity for the purpose of conserving their interests in the matter, through a committee chosen for the purpose, asked the court for further appropriations. After a long delay it was finally decided to grant a township of the contents of six miles square to every one hundred and twenty soldiers who had proved their claims satisfactorily to the court, and a grant of five additional towns—making seven in all—was ordered and duly approved by the Governor April 26, 1733. It was not, however, till February 26, 1734, that the last of the plans of these five townships was submitted by the committee chosen to survey and lay them out and finally approved by the General Court and confirmed to the grantees.

**THE NARRAGANSETT TOWNSHIPS.**—The several tracts of land granted as before stated were called the Narragansett Townships, being so designated for reasons sufficiently indicated already. They were passed over by the Provincial authorities to the ownership and control of the eight hundred and forty grantees as a body, to be allotted and assigned among them as they might judge best, and to be finally settled by them or through their instrumentality according to the conditions specified in the votes of the General Court appropriating them to the parties receiving them. To prepare the way for the just and proper distribution of them among those to whom they belonged, and for the final disposal and occupancy of them, the grantees in a meeting held at Boston June 6, 1733, made a division of their number into seven distinct societies consisting of one hundred and twenty grantees each, among which the townships were to be distributed by some plan of assignment agreed upon by those concerned. In making this division, regard was paid to the location of the members, those residing near together being included in the same society in order to render it convenient for them to meet together for the transaction of necessary business. Moreover, a committee of each society was chosen by the whole body to represent said society, to have charge of its affairs and to act in its behalf. These several committees were given authority and instructed to assign the different towns to the societies at their convenience.

Pursuant thereto, due notice having been given, they met on the 17th of the next October, at the public-house of Luke Verdy, in Charlestown, for that purpose. The townships were distinguished from each other by number, and were called Narragansett No. 1, Narragansett No. 2, etc., which names they severally bore until they were made a part of the body politic by an act of incorporation from the Legislature, when they assumed those by which they have since been designated and known. In the distribution of the several grants among the different societies of grantees, Narragansett No. 1, on Saco River, which afterwards became Buxton, Me., was assigned to Philemon Dane and company from Ipswich and vicinity, by general consent and approval. It was then decided to dispose of the six remaining townships by lot, but before proceeding to the drawing in accordance with that decision, it was "voted and agreed upon that the Society that should happen to Draw the Town called No. 2, at Watchusett, should lay out and assign to his Excelency Jonathan Belcher, Esq., five Hundred acres of land in s'd Towne for his Honored Father's wright." This was the township now under notice, and in the allotment which at once took place it fell to Mr. James Lowden and company from Cambridge and vicinity. In this company there were seventeen grantees from Cambridge, thirty-three from Charlestown, twenty-six from Watertown, five from Weston eleven from Sudbury, seven from Newton, three from Medford, six from Malden and ten from Reading, making one hundred and eighteen in all. Of these only twenty had served personally in the Narragansett War; the others being the legal representatives of those who had been slain in the service or subsequently passed away. The remaining townships were allotted in regular order as follows: No. 3, afterwards Amherst, N. H., to Richard Moore, of Lynn and company; No. 4, which was at first Goffstown, N. H., but subsequently Greenwich, Mass., to Edward Shove and company from Northampton and vicinity; No. 5, incorporated as Bedford, N. H., to Thomas Tileston and company of the neighborhood of Boston; No. 6, Templeton, Mass., to Saml. Chandler, of Concord, and company; No. 7, known as Gorham, Me., to Shubael Gorham and company belonging to Plymouth and vicinity. With the assignment of the several townships to the societies of grantees, who thereby became sole proprietors of them respectively, to hold in their own right and manage according to their own pleasure, the responsibility of the whole body of grantees acting together ceased, and the care and control of each township separately passed over to the particular society to which it had been allotted.

**NARRAGANSETT No. 2.**—Immediately after the townships had been duly assigned, the committee of the grantees living in and about Cambridge who had drawn No. 2 "at Watchusett," called a meeting of those whom they represented, to be held at the house of Mr. Samuel Smith, of Cambridge, "in order to

choose a Clerk and Committee or Committees, if they see cause, and to do and transact such things as shall be needful for the furtherance of the settlement of said town." Joseph Bowman, of Watertown, was chosen moderator of this meeting, and William Willis, of Medford, clerk of the society. A standing committee was also chosen to have charge of the prudential affairs of the society, and a special committee was appointed to divide the township and lay out the lots as the grantees should direct. At an adjourned meeting this committee was instructed to lay the lands out in farm lots of not less than sixty acres each, and when there was an inferior quality of land, to increase the quantity, so as to equalize the value of the lots as they should judge right. All meadows were to be excluded from the division, and all cedar swamps, if any were found. The standing committee was authorized to superintend the dividing committee in laying out the town, to levy taxes on the grantees, if they saw fit, to petition the General Court in any respect deemed advantageous to the society, and to call future meetings of the grantees. In the exercise of the power thus conferred upon them, the standing committee established the following order in laying out the several classes of lots in the first division of the town, to wit: 1. A farm containing five hundred acres for His Excellency, the Governor; 2. A place for a meeting-house, with sufficient land adjoining for a training-field and burying-place, not to exceed ten acres; 3. A lot for the minister, of the usual size; 4. A lot for the ministry; 5. A lot for schooling; 6. And lastly, a lot for each of the grantees, agreeably to the vote of the whole body.

The original form of the territory of Narragansett No. 2 was that of an irregular quadrilateral, its eastern and southwestern sides being about six miles long, its northern side nearly nine miles and its southeastern some two and a half or three miles. It measured by estimate of the committee of the General Court, by whom it was first surveyed, twenty-three thousand and forty acres, exclusive of the pond, though actually considerably exceeding that amount. It was a point considerably to the southeast of the actual centre of this large area that was fixed upon by the committee on the first division of the town for the site of the meeting-house, contiguous to which they laid out lands, to the extent of about six acres, in a square form, for a training-field and burial-place, as directed. This was an eligible situation on what has always been known as Meeting-house Hill, the general location bearing in later years the familiar name of "the old Common." It is elevated considerably above the general level of the surrounding country, and commands fine views of the whole neighboring region, the prospect to the northward, eastward and southward being especially picturesque and delightful. From this area of common land a street four rods wide was laid in a nearly northwest and southeast direction, extending a mile or more each way, on each side of

which ranges of lots sixty rods wide and one hundred and sixty long, with some variations, were arranged, the ends of those of the first range bounding on the street. Beside the lots included in these ranges, there was a series lying along the eastern side of the town, varying in form somewhat from the others and from the general plan of division. Southwest of the Common, and beyond the second tier of lots, was the Governor's farm, which included what is now called South Westminister and most of the lands to the westward of it as far as Cedar Swamp. This first division of lands covered territory lying in the southeast part of the township, extending northward and westward only about a mile and a half from the present central village, and comprised only about three-tenths of the entire township, the remainder being subject to future divisions, as will be hereafter noted.

The committee on laying out the town attended to their duties early in 1734. Before entering upon it, however, Mr. Zachariah Smith, of Watertown, and Mr. Edward Jackson, of Newton, two of the grantees, had contracted with the standing committee "to erect a house in the township twenty-two feet long, sixteen feet wide and seven feet studs, to be built of square timber, framed roof covered with long shingles and having a good stone chimney," for twenty-seven pounds (about ninety dollars). The contract was fulfilled early in the season and the house was occupied by the dividing committee while engaged in doing the work assigned them. This building was retained for the use of the grantees and their successors for seven years, when, by vote of those concerned, it passed over to the owner of the lot on which it was found to stand. It was an old-fashioned log house, and was located on the swell of land at the northeastern extremity of the pond, whence, after an opening was made in the forest, the almost entire surface of that body of water could be seen.

On the 21st of May the dividing committee reported that they had completed the first division of the lands of the township as ordered, and on the 9th of July the grantees met at the house of Mrs. Mary Larned, in Watertown, for the purpose of distributing the lots among them and transacting other important business. Before proceeding to such distribution, however, it was voted that Lot No. 8, which lay to the southward of the "Common," and bordered on the pond, should be assigned to the first settled minister, and that No. 95, which was located on the slope of the hill northwest of the Cowee place, now owned by Mr. Newell Smith, should be devoted to the support of the ministry and known as the Ministerial Lot. Later, No. 94, which was the lot occupied for many years by Deacon Merari Spaulding, where the late Mr. Lyman Seaver resided, was set apart for the support of schools, and was therefore called the School Lot. The remaining lots were then drawn by the grantees, to whose sole and sepa-

rate ownership and control they were assigned and confirmed. A few persons who were dissatisfied with the lands falling to them were allowed to give them up and select equal tracts in the undivided sections of the town.

The lots having now come into the full and permanent possession of the grantees as separate individuals, soon began to have a change of ownership, each one having a right to dispose of his right and title as he saw fit, and thenceforward the number of grantees was continually diminishing, while the number of others holding lands in the township was increasing proportionally. This changed condition of things necessitated a change in the name given to the owners of lots, and they were thereafter called proprietors, which would include those coming into possession of their estates by purchase as well as those receiving them by grant of the General Court. And correspondingly the whole body of proprietors was called the propriety, as duly appears in the records.

The township was now in a proper condition for settlement and steps were at once taken looking to that result. The time named in the original grant within which sixty families were to be located in the place—seven years—was rapidly passing away with no prospect of fulfilling the conditions specified, and permission was obtained from the court to reckon the period from June 1, 1734, which was about the date when the grantees came into actual possession of the lands assigned them. The original proprietors themselves seemed little inclined to exchange their homes in more thickly-settled neighborhoods, where they were sharing many of the advantages and comforts of civilized life, for a residence in the wilderness, with all the privations, hardships and disadvantages attending it, but it was for their interest to induce others less happily situated or more adventurous and fearless than they were to locate in the newly-acquired territory and help to establish there a compact and orderly community. As an inducement to this end, they voted, at a meeting held in May, 1735, to offer a bounty of twelve pounds, or forty dollars, to each of the first fifteen families which should locate in the township before the last day of September, 1736, erect a house not less than eighteen feet long by sixteen feet wide, with seven feet studing, to be well boarded and covered, and also to clear and fence three acres of land fit for mowing or plowing within the same time. At the same meeting arrangements were made with Major William Brattle, of Cambridge, who had drawn Lot No. 112, at the head of what is now Wachusettville, on which was a good water privilege, to build a saw-mill on or before the 1st of March, 1736, and keep it in repair twenty years, for which he was to receive twelve acres of undivided meadow land in his own right and the right to flow all the meadows above the said mill from the last of September to the 10th of April each

year indefinitely. No doubt this was designed as an additional inducement to the early settlement of the place, and unquestionably had considerable influence in that behalf at a later date.

It was some time before any practical response was made to the repeated efforts to obtain settlers in the new township. The year 1735 went by and also 1736, and the silence of the primeval forest was unbroken by any resident's voice or axe. An as yet unbroken wilderness covered all the hills and valleys of the region, stretching miles and miles away on every hand. But the eventful year at length arrived, and a settlement was made. Early in the spring of 1737, Mr. Fairbanks Moor, from Lancaster, came to the place with a view of establishing for himself and family a home. He was joined not long after by Mr. Joseph Holden, from Watertown, and the two working side by side for a time made a beginning. How these men reached the place—whether on foot or with some kind of teams, bringing with them food and such implements and utensils as they might need for immediate use—cannot be known. Nor whether they had any previous acquaintance with each other and a mutual understanding in the matter. These and a thousand other things it would be pleasant to be informed about must be left to conjecture. How they lived at first may be imagined, but not definitely described. They occupied for awhile the house of the proprietors, without doubt, and possibly the wife of Mr. Moor came up from Lancaster, not many miles distant, after a little time, to attend to domestic affairs and lend some cheer and show of home life to the scene. Wild game must have been the chief article of diet at the outset, diversified by occasional drafts upon the finny denizens of the waters near at hand—flesh and fish alternating to lengthen out the bill of fare and satisfy the not fastidious appetite.

Neither Mr. Moor nor Mr. Holden was a grantee of the township, though the latter had an interest through both his mother and his wife, who were heirs-at-law of Narragansett soldiers, and through whom he afterwards received two lots by right of inheritance. Mr. Moor the previous year had bought No. 19, where Mr. Hobart Raymond now resides, and Mr. Holden No. 1, on which the proprietors' house stood,—the two lying side by side and so convenient to each other. Sites for dwellings were fixed upon and a clearing made at once by the men, and preparations for building at the earliest practicable date were soon begun and pushed forward to completion. Work upon the houses seems to have been carried on simultaneously and with equal rapidity, both having been raised, it is understood, the same day in the month of June. They were framed houses, covered probably with boards from the saw-mill of Major Brattle, about a mile and a half distant. That of Mr. Moor was on or near the site of the present dwelling of Hobart Raymond, of which it forms a part, now one hundred and fifty-two years old. That of Mr. Holden

stood scarcely fifty rods distant, near where a small cottage is now located, but it long since disappeared.

Before the season was over, the families of the two men were established in their respective homes, facing the fortunes awaiting them in the years ahead. Mr. Moor had a wife and five sons, and Mr. Holden a wife, three sons and two daughters, making a total of fourteen,—the population of Narragansett No. 2 in the autumn of 1737. An existing tradition makes the number fifteen; but the preserved records of the families give but fourteen, though there may have been some temporary resident in the place which would make the aggregate what it is, on the uncertain authority referred to, supposed to be.

These first settlers in Narragansett No. 2 (Westminster) occupy too important a place in the history of the town to be passed by without a more extended notice than has yet been given them. They were men to be remembered and honored for their works' sake by the sons and daughters of the town they founded as long as that town shall have a place in the annals of Worcester County and of the Commonwealth of Massachusetts. And so a brief biographical sketch of each of them respectively is introduced at this point of the narrative in hand.

Fairbanks Moor was a lineal descendant of John Moor, who came from England to this country at an early date, locating first at Cambridge, but afterwards at Sudbury, where he took the oath of allegiance in 1640, soon after its first settlement. This first John had a son bearing the same name, and known as Ensign John, who took up his abode in Lancaster and became a somewhat prominent man in public affairs. One of *his* sons, a third John in regular succession, married Hezadiah Fairbanks, of whom the subject of this notice was born about the year 1700, receiving the family name of his mother for a Christian name. Fairbanks Moor married Judith Bellows, daughter of Benjamin Bellows, of Lunenburg, and sister of Benjamin Bellows, also an early settler in Narragansett No. 2; afterwards the founder of Walpole, N. H., and the giver of a name to Bellows Falls in the Connecticut River. Fairbanks and Judith Moor had five sons before moving to Narragansett, and one while a resident there, who probably died in 1742, and became the first occupant of the first burying-ground in the place. Mr. Moor was somewhat of an adventurer and speculator in landed property. He owned, at different times, some ten or twelve farm-lots in the township; was an original proprietor of Templeton, and also had possessions in Brattleboro', Walpole and probably other localities in that vicinity. He was a resident of Narragansett No. 2 only about seven years consecutively, though dwelling there at times for several years afterward. He went finally to the valley of the Connecticut, leaving traces of himself at Walpole, N. H., where his son, Fairbanks, Jr., resided, and also at Brattleboro', the home of his son Ben-

jamin. Both he and this last-named son were slain by the Indians in a midnight attack and massacre at Brattleboro', March 6, 1758. Of the descendants of Mr. Moor no traces have been found, though great pains have been taken to discover them, and it is presumed the family has become extinct.

Joseph Holden was the son of Justinian Holden, the immigrant ancestor of the family, who was a proprietor of Watertown in 1634, and Mary (Rutter) Holden, born September 6, 1683. He married Abigail, daughter of William Shattuck, and had seven children before removing to Narragansett, two of whom died in infancy and a third before his own decease, November 30, 1768. He was one of the most active, influential and highly esteemed of the earlier residents of the township, being deeply interested in the prosperity and right ordering of the new settlement, and holding many places of trust and service, to which he was called by the suffrages of his fellow-citizens. He was elected the first deacon of the church, which was instituted in 1742, and has always been known by the title thus conferred upon him. His sons after him became highly honored and much respected in their day, as did others of his descendants in later generations. He stands at the head of a numerous posterity, the members of which are scattered far and wide through the land, though a goodly number of them are still to be found in the town of which he, more than any other person, was the founder, as he was the first permanent resident within its borders.

A settlement having been begun in the new township, the way was open for accessions to the little company that spent the winter of 1737-38 in the wilds of Narragansett No. 2, but they came slowly. Only two families, so far as can be ascertained, were added to the original number in the year 1738—that of Philip Bemis, consisting of nine persons; himself, wife and seven children, of whom one was not his own, but a child of mystery, named Daniel Mountjoy (who lived to be more than a hundred years old), and Thomas Bemis, brother of Philip, who had at the time only a wife. There are no proofs that there were any additions to these four families in 1739. In 1740 Seth Walker and Justinian Holden, from Groton; Daniel Hoar, from Concord; Joseph Miller, from Newton; John and Thomas Stearns, from Watertown, were in the place, and, if not actually settled as residents, were yet clearing up lots, building houses and making preparations for becoming permanently located within its borders.

One of the great needs of these pioneer settlers of this new township was a mill for grinding the corn and other grain which they were beginning to produce. Several attempts had been made to obtain proposals for the erection of such a mill, but for a time none of them proved effectual. At length, at a meeting held September 10, 1740, a proposition from Mr. Seth Walker, who had located on lot 22, at the outlet of

the pond, was favorably received, and finally accepted. It was to be completed before the 1st of the next July, to be kept in good order for twenty years, and there was to be paid for it "one hundred pounds in the old tenor." This was another important adjunct to the new settlement, and no doubt removed a serious objection to joining it, which would find a place in many minds. The mill stood on the more easterly of the two streams flowing out of the pond, some thirty or forty rods west of the residence of the late John K. Learned. It served the community in its original capacity for nearly a century, its foundations remaining in a good state of preservation to this day.

During the two following years some eighteen or twenty new families were added to the settlement, making nearly thirty in the aggregate. Among these new comers was Eleazer Bigelow, of Watertown, who was accompanied by his aged father, Joshua Bigelow, the only resident of the place that actually rendered service in the Narragansett War. He died February 21, 1745, in the ninetieth year of his age.

For several years subsequently to 1742 the population of the township increased but slowly, if at all. Very few new families came in, while some previously there moved away. This was, no doubt, owing chiefly to the breaking out of the war between England and France, known as King George's War. The French, as before and afterward, made friends of the Indians of the back country, and sent or led them forth to deeds of darkness and horror well calculated to revive the long-slumbering memories of the conflict with King Philip. The little settlements that had for several years been springing up in the wilderness became thoroughly alarmed some time before a formal declaration of war had taken place, and the more exposed of them had petitioned the General Court for protection, the inhabitants of Narragansett No. 2 among the rest. A grant of £100 was made to put the township in a condition whereby its people could be easily protected, and a committee was appointed to expend the same. Ten dwellings were converted into fortifications for the common safety. These were distributed throughout the settled districts, so that all the inhabitants of the place could resort to them at their discretion and feel secure against any hostile attack. The same thing was done elsewhere. Moreover, a line of defences, extending from settlement to settlement, through a wide section of country, was established, and a series of alarms devised, whereby the whole population of the inland districts could be aroused, if need be, and made ready to meet and repel an invading foe. No harm was done to the Narragansett settlers during the continuance of the war. Twice were there Indians seen lurking about the place, but the sounding of the alarm, assuring them that they were discovered, and enabling the people to prepare to receive them, caused them silently to withdraw. One of these discoveries was made by Mr. Bowman, while mowing

somewhere on the farm of the late George Miles, which he owned, and the other by Mrs. Philip Bemis, while passing through or near the burying-ground one Sunday on her way home from meeting. Very likely these or similar occurrences, of which no report is preserved, moved the inhabitants to petition the General Court for a town scout, to keep watch and guard over the young colony, which resulted in the appointment of Thomas Stearns, David Dunster, Joseph Holden, Jr., Stephen Holden and Elisha Bigelow to serve in that capacity till the peril was past. According to the muster-roll of Capt. Edward Hartwell's company, dated December 22, 1748, there were enlisted from the place as soldiers in this war Fairbanks Moor, Jr., Abner Holden, William Bemis, Ephraim Dutton, Nicholas Dyke, Ephraim Stevens, Thomas Stearns and several others whose names are not given. The peace of Aix la-Chapelle put an end to hostilities, and relieved the infant settlement from further anxiety or concern on that account.

Another cause that may have had an influence in retarding the growth of the township was the inharmoniousness existing between the resident and non-resident proprietors and the unwillingness of the latter, who for a long time were in the majority, to make the improvements necessary to satisfy those who had already located on the territory, or to induce outsiders to take up their abode there. For ten years this strife was going on. The advantage was all on the side of the non-residents. The meetings of the proprietors, to begin with, were held in and about Cambridge, at points readily accessible to those dwelling in that vicinity. Soon after the settlement was begun an attempt was made by the resident members of the propriety to have them held in the township, but it failed. The same thing was done repeatedly, with the same result. As a consequence, the non-resident members could have everything their own way. And many of the propositions deemed necessary to the comfort and welfare of those living in the township, as well as to its growth and prosperity, were either promptly voted down or granted with reluctant will. This was especially the case with regard to highways, of which due mention will be made hereafter. At length an appeal was sent to the Legislature by the resident proprietors, for redress of grievances in this regard, and it was granted. Meetings were ordered to be held in the township, the first occurring September 12, 1750. Thereafter things were managed more favorably for the settlers.

Though not yet numerically in the majority of the entire number of proprietors, still, so few of those living in the lower towns could or did attend the meetings after they were held in the township, that the residents were in the majority there and could do what they pleased for the common good. From that time forward most of the officers of the propriety were inhabitants of the place, as they were not before, and

public improvements were multiplied rapidly. As a consequence, the settlement was greatly enlarged as time went on. New families came in, and the population, which was not more than one hundred and thirty in 1750, must have been about three hundred and fifty in 1760.

With the increase of inhabitants arose the desire on their part to be free from their relationship to the non-resident proprietors, and to obtain an independent and corporate existence, with authority and power to manage their own affairs, and to exercise all the rights and prerogatives usually belonging to the towns of the province. A petition was accordingly drawn up and signed by Joseph Holden and thirty-one others and forwarded to the General Court, which resulted in the passage of an act of incorporation October 20, 1759, erecting Narragansett No. 2 into a district, under the name of Westminster. This conferred upon the people all the rights and immunities of a town, except that of being represented in the Legislature of the province, and this was granted by an additional act passed April 26, 1770.

It may be proper to state here that a second division of the lands of the township was made in 1743, the size of the lots being sixty acres, as in the first division. These lots were distributed among the proprietors of the place as before. They were located mostly in the north and northwesterly sections of the town, extending along the boundary in that direction as far as what is now the centre of Gardner. The division of the meadows took place about the same date, giving the proprietors about five acres each. A third division took place in 1755, the size of the lots being the same as before, and a fourth and final division in 1767, each lot containing twenty acres. The last two divisions were of territory lying in the west part of the town—mostly in what is now Gardner.

At the time of the incorporation of Westminster the American colonies were in the midst of what is called the French and Indian War, which grew out of the alleged encroachments of the French, who had located along the St. Lawrence and elsewhere, upon the frontier English settlements. Hostilities began as early as 1754, although a formal declaration of war was not made till two years later, and continued in active operation till 1760, when Montreal and all other French possessions in Canada were surrendered to the British Crown. The treaty of Paris, making a definite and final settlement of the questions at issue between the two nations, was not signed, however, till 1763. In this conflict the township in review bore an important part. The names of thirty-eight of its residents appear upon the muster-rolls of the different military companies that went into the service. Of three of these—Richard Baker, Thomas Dunster and William Edgell—the following well-authenticated story is told: At the expiration of their term of service, the officer in command, for some unknown reason, refused to discharge them. Deeming themselves

under no obligations to remain, they decided to take the matter in their own hands, and return home regardless of the military authorities. They were in the neighborhood of Lake George, and their only way to their families and friends was over the Green Mountain range, when there were but few roads, and these they resolved to avoid, lest they be captured and made to suffer a deserter's doom. It was in mid-winter, when much snow was on the ground, and the proposed journey across a trackless waste was most perilous. But they were determined to take it, and, providing themselves with two pairs of snow-shoes—all that they could secure—and two boards, which were to serve for a third pair, together with such provisions as they could obtain, they started on their adventurous course. They lost their way among the mountains, wandering about for days without reaching any settlement—or any track leading to a settlement—as they had hoped. Their provisions, meanwhile, gave out, and they came near starving. In their extremity they decided that one of their number should be sacrificed, and his flesh taken to save the lives of the other two. The unfortunate one was designated by lot; but, before putting their awful resolve into execution, the barking of a dog assured them of their nearness to some settlement, and they were spared the tragic deed, reaching safely at last their place of destination. There is a tradition involving a whole company in this affair, but it probably grew out of what is here narrated, which is better fortified than the other.

It is also related that during one of the campaigns of this war Nicholas Dyke, a leading citizen of the town, afterwards a colonel in the Revolution, with a squad of twelve men under him detailed to procure wood for the camp, were surprised and captured by a detachment of French soldiery. On their way to headquarters they stopped to partake of the contents of their knapsacks. In the midst of the meal, when the captors seemed to have relaxed their watchfulness somewhat, the prisoners, who had been partially unbound, upon a preconcerted signal from Captain Dyke, released themselves still further, sprang to their feet, seized the weapons near at hand, overpowered their foes, secured them captives and brought them prisoners to the English camp.

The number of resident tax-payers in the township when it was incorporated was 76; of polls, 80; the number of oxen, 53; cows, 170; horses, 52; swine, 35; sheep, 176. The estimated population was 300.

## CHAPTER CXLIII.

### WESTMINSTER—(Continued.)

*Name—Location—Physical Characteristics—Roads—Industries.*

AT whose suggestion the name Westminster was given to the township originally called Narragansett

No. 2 does not appear in any records that have come to hand. No name whatever is mentioned in the petition of the inhabitants praying for an act of incorporation, and no name appears in connection with the passage of the bill through the two branches of the Legislature. In the engrossed copy of the bill furnished the Governor for his signature, there was evidently a blank left by the transcriber where the name should properly appear, and that blank was subsequently filled with the word Westminster in the same handwriting as that of Thomas Pownall, who was then filling the executive chair of the Province. It seems probable, therefore, that to the Governor himself the citizens of the town are indebted for the name by which their municipality is designated and known,—a royal name it is, taken, no doubt, from that part of the capital of the British Empire which represents, more than any other, the greatness and glory of the country whence the early yeomanry and leading spirits of New England chiefly sprang.

Westminster is situated in the northerly part of Worcester County, and is bounded on the north by Ashburnham, on the east by Fitchburg and Leominster, on the south by Princeton and Hubbardston and on the west by Hubbardston and Gardner. Its latitude is  $42^{\circ} 32'$  north of the equator and  $71^{\circ} 54'$  west from Greenwich or  $5^{\circ} 1'$  east from Washington. Its central village is about twenty miles in a direct line a little west of north from Worcester and about forty-nine miles west-northwest from Boston and fifty-seven by railroad. Its superficial contents are somewhat more than twenty-two thousand acres, or about thirty-five square miles.

Being largely a farming town, its inhabitants are distributed very considerably over its entire territory. It has, however, a village of respectable size and attractive appearance at what is called the Centre, containing nearly a hundred dwelling-houses, three stores, three churches, a town hall, a large chair manufactory, an extensive bakery, a bank, several shops and numerous subordinate buildings; a small village two miles east of this, called Wachusettville, where there are paper-mills and about twenty dwellings, and one a mile and a half south of the Centre, of about the same size, in which is a large chair-making establishment, called South Westminster.

Lying upon the range of highlands which separate the waters flowing into the Merrimac from those flowing into the Connecticut River, its elevated and exposed situation, while detracting somewhat from its value for agricultural purposes, gives freshness and salubrity to the air and quick movement to its waters, which conduce to vigor and strength of both body and mind, and consequent length of days. Its surface is somewhat broken and greatly diversified. Numerous elevations of considerable altitude are scattered throughout its territory, from which delightful views may be had of the surrounding country. Some of these representations are exceed-

ingly picturesque and beautiful. A pleasing variety of hill and dale, forest and field is displayed on every hand. There are charming drives in all directions, and few towns can offer more attractions to the pleasure seeker and lover of nature in this regard than can here be enjoyed.

The geological basis of the township is a form of primitive metamorphic rock, somewhat like granite, called gneiss, with an element of iron distributed through it. In some parts a tendency to slate formations appears, constituting what is denominated Merrimac schist. Among the later deposits of sand, gravel and the like there are veins of clay found, which have been utilized in various localities. The soil proper cannot be regarded as specially fertile or desirable for purposes of agriculture, though in some sections it may be made very productive under a judicious system of cultivation. In many places it is deep and strong, but needs to be enriched by outside agencies. The elevated position of the place renders the agricultural season comparatively short, and subjects whatever is raised to high winds, both of which are prejudicial to the interests of the tiller of the soil.

There is considerable difference, however, between the eastern and western portions in these respects, the advantage being on the side of the former. And yet, on the whole, the town may be regarded as quite up to the level of the average of the county, agriculturally considered. It has many fine farms, from which abundant harvests of the more hardy and staple products of this section of country are gathered. Apples and pears are raised without much trouble, but the tenderer and more delicate fruits, if grown at all, require watchful attention and constant care.

The forests abound in birch, beech, maple, oak, pine, hemlock and chestnut trees, with some hickory, yielding ample supplies of fuel for home consumption, with quite a surplus for the outside market, as well as considerable lumber for manufacturing purposes.

The usual wild animals indigenous to the region are found here, and exist in about the same proportion and to the same extent as in neighboring localities. The ponds and streams were formerly well-stored with native fish, which have been much reduced in numbers in these later days. The experiment of introducing new varieties has resulted in depleting the original supply without making good the deficiency.

The pastures are generally fruitful of various kinds of wild berries, and large quantities of them are gathered year by year for the ready market, which is found, if not at home and in manufacturing localities near by, yet at Boston and other large places farther away. In many instances these spontaneous products of the earth, not many years since deemed common to everybody, and, wherever found, free to all

who might be pleased to gather them, are now regarded as actual individual property, subject to all the conditions of other items of personal estate, and are oftentimes made the sources of very considerable income to those possessing them.

Although the surface of the town is generally high and considerably varied, yet there are no very marked or noteworthy elevations. Several of them, however, are designated by certain names which they have borne, for the most part, for a long time. The reason why they were respectively called by the titles given them is apparent in some instances and may be imagined in others, but not demonstrated. The hill that stands eastward from the centre village, on which the Common is located, was for obvious reasons called Meeting-house Hill. Two miles north of the centre, near to Gardner line, is Beech Hill. More northeasterly and three miles from the centre is Bragg Hill, rising quite to the boundary of Ashburnham, the eastern extremity of which, towards Fitchburg, is known as Bean Porridge Hill. A bleak, rocky ridge in the southern part of the town is named Graves' Hill, while a still more rocky and desolate eminence in the southeast is Crow Hill. Still farther to the southeast, near to the Leominster line, is Ball's Hill. The commanding height upon which the well-known Winship buildings are located has been sometimes appropriately denominated Prospect Hill, the view from it being more extensive, varied and lovely than from any other point in town.

There are but three natural bodies of water in Westminster. The most important of these is Meeting-house Pond, a mile southeast of the centre, in recent years more frequently named Westminster Pond or Lake, which contains one hundred and fifty-two acres and one hundred rods. Wachusett Pond or Lake is a beautiful sheet of water, larger in size, lying under the shadow of Wachusett Mountain, partly in Princeton, but mostly in Westminister, on the northern and western borders of which several summer houses (private and public) have been erected, while ample and attractive picnic-grounds have been laid out and fitted up as a resort for pleasure-parties and temporary sojourners in the summer season. Mud Pond is in the northern section of the town. A large tract of meadow land in the east, lying along the banks of the streams flowing out of the first two bodies of water mentioned, has during the last twenty years been kept under water and made serviceable as a reservoir for the benefit of the manufacturing interests below. The same is true of what used to be termed the town meadows, three-fourths of a mile east of the central village, while two or three similar changes have been made in the western portion of the territory. A few small mill-ponds fill out the number of bodies of water which at present exist in the place.

Several streams of water, affording privileges for manufacturing and other purposes, are to be found

within the limits of Westminister. Phillips' Brook comes from Ashburnham, and runs through the extreme north part of the town; a stream in the same direction, formerly called North River and sometimes Whitman's River, also comes from Ashburnham, and by a longer course passes into Fitchburg; a stream rising in Cedar Swamp and flowing just north of the central village empties into the town meadow reservoir named above; and the two streams already referred to from the principal ponds of the town uniting in the Wachusettville reservoir,—these all unite at last within the borders of the city of Fitchburg and constitute the northern branch of the Nashua River, which is the chief tributary of the Merrimac. A small stream in the western section of the town, intercepted in its course by several reservoirs in that locality, flows into Gardner and becomes a branch of the Otter River, whose waters passing through Miller's River reach the Connecticut at Greenfield. Two or three small streams in the southern part of the town, taking their way through Hubbardston, become sources of supply to Ware River, and at length pass into the Connecticut at Chicopee. An interesting fact connected with Cedar Swamp, already spoken of, is, that out of it three brooks flow in three different directions, constituting the head-waters of three important rivers in the State,—the Nashua River, Miller's River and Chicopee River.

A few special names have in former days been used to designate given localities, some of which have passed or are passing into forgetfulness. Aside from those already noted a few others are worthy of mention. The east village of the town, now known as Wachusettville, was for many years called "the Narrows." The valley a mile and a half north of the centre, through which Whitman's River flows and especially the part of it in the vicinity of Lombard's chair factory, was designated as "Scrabble Hollow," while the large tract of brushy, tangled, wet land, half a mile west of the centre, bears the unsavory name of "Tophet." The original location of the Universalist Church, a mile and a half northeast of the centre, is known as "the North Common."

ROADS.—It is generally believed that the pioneer settlers of Narragansett No. 2 were obliged to make their way from Lancaster, the nearest settlement, through the intervening wilderness by marked trees, there being no distinctive path or thoroughfare for them to follow. Such, however, was not the case. Four years before the coming of Messrs. Moor and Holden to the place the Provincial Government had caused a road to be laid out and opened for travel from Lancaster to the valley of the Connecticut, near Deerfield, which ran through the south part of the town, entering its borders east of the school-house in what was formerly District No. 7, and passing thence across the northerly end of Wachusett Lake, and up over the hills westward, not far from the residences of the late Cephas Bush and Betsey Bacon, and on in

the same general direction to the Hubbardston line, south of the dwelling of Mr. Joel Newton, and so through Templeton, Petersham, etc., to its farthest terminus at Sunderland, which gave it the name of the "Sunderland road." Along this thoroughfare, no doubt, the early settlers for several years came to the township, branching off from it at such points as would be convenient for them in reaching the various lots on which they had located or proposed to locate. That a way was opened from this road at a point a little east of where it crossed the line of the township to the old Common very soon after the settlement took place is evident from the fact that at a proprietors' meeting held October 31, 1739, it was an item of business to see if they would clear the road from Crow Hill to the meeting-house. This road was in part the one laid out by the committee who made the first division of the lands of the township, and was, in fact, an extension of the present Main Street of the central village southeastwardly until it struck the so-called Sunderland Road. For a dozen years from the time of the settlement of the place no public roads except this one were made—each man probably opening his own path to his building site when and where he pleased. But in 1750, at the first meeting of the proprietors held, by order of the General Court, in the township, several highways were laid out in different directions, the principal one running from the meeting-house to Lunenburg, which then joined the township on the east, and which had already become quite a settlement. In the year following thirteen additional roads were opened, which furnished the inhabitants at the time all needed facilities for communication with each other, and for reaching the older and larger settlements to the eastward of them. In 1753, a county road was laid from Ipswich Canada (Winchendon) to Lunenburg, running through the extreme north part of the township, and in 1754 another from Lancaster to Quopaige (Athol). This road crossed the town boundary near Everettville, and ran substantially where the highway now is to the old Common, thence southwesterly by the residence of Mr. Thomas Damon to the old Bigelow homestead, and on in a northwesterly direction through what are now pastures and woodlands to the village of South Gardner. Several other roads of importance were opened in the township before the year 1759, so that at the date of incorporation the foundation and framework of that more complete system of highways which has in later days served the public convenience and need were fully established. As time has gone on, such additions, modifications and discontinuances have been made as seemed, in the judgment of the citizens of the town or of the county authorities, conducive to the common welfare.

In or about the year 1800 the "Fifth Massachusetts Turnpike," extending from Lancaster to Athol, through Westminster, was built by a company operating under a charter granted them by the Legisla-

ture of the Commonwealth. It was substantially a new route, and opened very direct communication between the central village and Leominster on the east and South Gardner and Templeton on the west. Five years later a "North Branch" of this turnpike was opened from a point near Fitchburg line, through Scrabble Hollow, to South Ashburnham and Winchendon. In 1829 this "North Branch" was converted into a county road, and in 1832 the main line shared the same fate.

VERMONT AND MASSACHUSETTS RAILROAD.—When the project of building a railroad westward from Fitchburg was first agitated in the community, it was hoped by the citizens of Westminster that it would run through or near the central village and conduce materially to the future growth and prosperity of the town. Considerable money was put into the stock of the corporation, under the impression that such would be the case. But the influences which vainly endeavored to turn the main line of the road from the neighboring town of Gardner were more successful in their plans regarding Westminster, depriving it of the facilities so much desired by its people and so necessary to its continued advancement along the lines pursued from the beginning. The result was the location of the road through the eastern and northern parts of its territory, where it has contributed little or nothing to the development of the industrial interests of the community, for which it might have accomplished so much under other, though nowise impossible, circumstances. Numerous attempts have been made in later years to obtain greater advantages of transportation by through lines or spurs of already existing roads, but nothing as yet has been attained in this behalf. The station on the Vermont and Massachusetts (now Fitchburg) Railroad, two miles from the Centre, affords all the accommodations which, under existing conditions, can reasonably be expected.

INDUSTRIES.—Westminster must be regarded as an agricultural town when considered in a general way, and yet there have been many kinds of manufacturing carried on within its borders at different periods of its history. The conditions under which the early settlers took up their abode on its territory made them necessarily tillers of the soil. Established in the wilderness, far away from thickly populated communities, their only means of subsistence were derived directly from the earth, and to the culture of the earth they at once addressed themselves with diligence and resolute good will, employing such agencies in the prosecution of their work as were at their command. They generally had enough mechanical ingenuity and a sufficient supply of the ruder and more common wood-working implements to enable them to erect for themselves the simple structures which served for temporary dwelling-places, although persons trained to the various callings requisite to the construction of more elaborate

and better finished buildings soon appeared among their number. Carpenters, masons, painters, blacksmiths, shoemakers, and workers at other trades came in to supply the demand which a growing population created, so that there was at an early day no lack in any of these regards, and this class of artisans has never died out. Provision, as has been stated, was made, even before a single person appeared in the township as a permanent resident, for the supply of lumber suitable for building purposes, as was also the case soon after with regard to the grinding of grain for domestic and other uses. The need of various kinds of wooden-ware was a stimulus to the introduction of the business of coopering before many years had passed away, and this was followed, sometimes as incidental and subsidiary to the regular work of farming, in the way of furnishing pails, tubs, barrels, etc., for home uses, and sometimes as a distinct and constant vocation and means of livelihood by supplying goods for the general market. With a growing demand from outside for this kind of production, the industry increased until cooper-shops were scattered plentifully throughout the town, some persons carrying on extensive operations in this line of manufacture.

The presence of clay in various localities already alluded to rendered the making of brick feasible, and that business was prosecuted at several different points at different dates, chiefly, however, in the southern section, on the place now owned by Mr. Calvin Baker, where his father had a yard not many years since, and on the two farms east and south contiguous thereto. The manufacture of potash was once an industry in the town, four potash works having been definitely located, while others no doubt existed of which nothing is at present known. As a matter of course, cider-mills were once very numerous, but have mostly disappeared. Not less than five tanneries have been in successful operation, but these have all passed away. The making of hats, carried on to a considerable extent at one time, is now a thing of the past. This is also the case with the production of straw braid for ladies' bonnets, which, for many years, gave employment to a large proportion of the women and children of the community, and was a source of considerable income. The braiding of straw was superseded among the portion of population named by "chair-seating," as it is termed, an industry which came in with the manufacture of cane-seat chairs in the vicinity and which has proved to be of great value in many ways to the community. Though not as remunerative as formerly, it yet is quite extensively pursued and fills an important place among the money-making activities of the town.

About the year 1778 Mr. Edmund Barnard, an enterprising citizen, bought the water privilege in Wachusettville, where now stands the principal paper-mill of Mr. Wyman, with lands adjoining, and,

associating others with him, built a dam and erected works for the production of various kinds of iron goods—nails, scythes, hoes, etc. Mr. Barnard soon sold out and put up similar works on the stream flowing out of Westminster Pond, nearly opposite the present residence of Mr. Kilgore. These works were carried on under varying auspices for a generation or more, but were finally superseded by other industries. At a privilege above the first of those just named, purchased by Mr. Thomas Rand, of Weston, in 1782, a fulling-mill was built, which was subsequently sold to David Wyman, who carried on the business for more than half a century. A similar mill stood for many years a little below the town meadows, in the rear of the residence of the late Abijah Raymond. This was started by one Elisha Hall, who operated it for a while, and was succeeded by several other parties before it was finally abandoned. Mr. Rand, who erected the clothier's shop at Wachusettville, having also purchased considerable property on the stream above, including the Brattle saw-mill, also erected a shop for carding wool and a grist-mill, which served the public in their respective ways until supplanted by other and more important interests, some forty or fifty years ago.

In or about the year 1810 Nathan Corey, of Bolton, bought the iron-works, or forge, as the establishment was called, with land attached thereto, and, at the lower end of the property, erected a factory for the manufacture of woolen goods. This business was carried on for several years, when the building, after remaining unoccupied for some time, was used for the production of chair stock and other purposes connected with the chair manufacture. An oil-mill, erected by Ebenezer Jones, once stood on the north branch of the stream running north of the central village, near where the highway leading to Mr. Albert Howard's leaves the old county road to Ashburnham. Mr. Silas Perry began cabinet-making in the west part of the central village about the year 1787, and was succeeded by Edward Kendall, Esq., who was clerk of the town for more than thirty years, and he, in turn, by his sons, Edward and George Kendall. A similar establishment was carried on by the Cutting Brothers for many years in the same village, and also one with water-power attachment by Mr. Ira Brooks in the extreme north part of the town. Mr. Joseph Minott acquired a somewhat wide reputation as maker of bass-voils. Several individuals followed the wheelwright's trade at different periods, as also that of the millwright. Harness-making was an industry of the town for a long series of years. Card-boards were produced in considerable quantities some seventy or eighty years ago. Combs were for awhile, at a later date, articles of manufacture. One distillery only, so far as is known, ever had a place on the territory, and this was not of long continuance. Happy had it been if the products of no other had ever crossed its boundaries.

Of the thirty-eight mill privileges which have been utilized within the borders of the town from the beginning, some fifteen have been wholly or chiefly employed in the production of lumber for building or other general purposes, and commanded in their day the service of a considerable number of men. But these have all been given up or made subservient to other interests hereafter to be noticed. Of the half-dozen grist-mills that have been erected to supply the needs of the community in that particular, only one remains, that of Mr. Eli Merriam, who has built up an extensive flour and grain business in connection with the production of meal. The building occupied by him was erected in 1856 by his father, Mr. Caleb S. Merriam, for a chair shop, but was subsequently changed to its present uses, and later passed over to the son, who has improved very much the facilities for operating in his line, and greatly extended his trade.

About the year 1845, Mr. Alfred Wyman, now of Worcester, commenced the manufacture of bread in the centre of the town, having erected a shop for the purpose and furnished it with the appliances commonly in use at the time. By careful and conscientious attention to his special work, the introduction of the most approved kinds of machinery, the employment of skilled workmen and the adoption of methods suggested to his inquiring mind by study and experience, he built up a business which has proved to be not only a great success in itself, but an important part of the industry of the place. He produced an article of general consumption which rose at once to almost universal favor, and was in great demand not only at home, but in all the surrounding country for a dozen or twenty miles away—in all localities indeed where the "Westminster Bread" was known. His several successors, by making improvements of their own and taking advantage of what has been gained to the art elsewhere, have been able to keep up the reputation of the goods manufactured and their labors have been crowned with almost unexceptional success. E. L. Burnham & Son are the present proprietors of the large and prosperous establishment.

Somewhere about forty years ago Mr. Franklin Wyman, brother of Alfred named above, having come into possession of most of the water-power located in what is now Wachusettville, began there the business of paper manufacturing. The undertaking proving successful, he enlarged these facilities in various particulars to meet the demands of increasing business until he built up one of the most prosperous establishments in the vicinity. Having continued for some years with satisfactory results, he sold out the entire property to other parties and retired in good degree from active life. But after some changes the plant and all its accessories came back to him, when he resumed the manufacture as before. After a few years he retired again, giving up his business to his

sons, one of whom subsequently withdrew, leaving it in the hands of the other, who is now prosecuting it advantageously on his own account. He employs about thirty men.

The principal manufacturing interest of the town at this present time, as for more than half a century past, is that of chair-making. At what date, where and by whom this industry was introduced to the attention of the community has not been definitely ascertained. Fifty or sixty years ago there was a considerable number of small chair shops scattered in different localities over the territory, the work being then done wholly by hand. It was not long, however, before some twelve or fifteen factories with water-power attachment were erected, mainly for the purpose of getting out chair stock, though many of them were afterwards used for the manufacture of chairs. These flourished for a time with varying degrees of success, employing a large number of men, until the tendency to concentrate prevalent in later days gradually reduced their numbers to the verge of extinction, leaving in their place the more imposing establishments which now represent the industry in the community, and which it is proper to notice in their separate capacity and character.

In 1857 two of the older sons of the late Edmund Nichols, associating with themselves two other persons, bought the property where the extensive factory of the Nichols Brothers now stands and lands adjoining, and, after erecting a small shop and duly furnishing it, commenced operations in chair-making. They went on for some years making such additions and improvements as the growing enterprise demanded and their means would allow. After several changes the entire property passed into the hands of Charles and Marcus M. Nichols, the youngest sons of the said Edmond Nichols, who are still in possession and doing a large and successful business. They were burned out in 1881, but immediately rebuilt larger than before, to meet the increasing demand for their goods. By their enterprise and thrift they contribute largely to the life and prosperity of the town. They have a small shop in a lumber region in Princeton, which is an adjunct to their main factory, and employ, in all, about seventy-five men.

Mr. Artemas Merriam and his brother-in-law, Mr. George Holden, began chair-making in what is now South Westminster in 1848. An old cooper shop somewhat enlarged and a very small water-power furnished them a starting-point for what has proved to be a large and important undertaking. A new shop, with a steam-engine, became a necessity in 1853. Four years later another enlargement of both room and power took place. Business increased and new facilities were introduced. In 1858 Joel Merriam, brother of Artemas, came into the firm. All went on well until 1869, when the factory and its contents were destroyed by fire. Mr. Daniel C. Miles was then admitted to the partnership and a new factory was at

once erected, furnished and put into operation. Early in 1873 Mr. Miles retired, and before midsummer both Joel Merriam and George Holden died. Since that time Mr. Artemas Merriam has been sole owner and manager. Increasing prosperity has attended the establishment, its capacity for business having doubled under the present administration. Seventy-five men are employed and a business is done of from sixty to eighty thousand dollars a year.

Mr. Franklin Lombard came to Westminster in 1839, and located in the north part of the town, near the Forbush Hotel. Purchasing a chair-shop and saw-mill, he began to get out chair-stock, but gradually worked into the manufacture of chairs, which he has continued to the present date. He has done a moderate business with satisfactory results and has the honor of running the oldest chair-making establishment in town.

Of the number of persons engaged in trade in Westminster since the beginning, it is impossible to speak with assurance. Stores for miscellaneous traffic have, at different times, been opened at no less than thirteen different localities, though several of them were in operation but a short period. For fifty years three in the central village and one temporarily in Wachusettville have been sufficient to supply the needs of the community, the larger places near by attracting considerable custom from the general public. There are fourteen hotel sites within the town's boundaries, only one of which, however, has been used as a public-house for a quarter of a century. This is the old stand at the Centre, now under the efficient management of Mr. Emerson N. Goddard.

At the head of a line of twenty-five physicians who have practiced in the town stands Dr. Jeremiah Everett, a descendant of Richard Everett, of Dedham, the common ancestor of a family of wide and honorable repute in the State and nation. The first lawyer in the place was Solomon Strong, from Athol, afterward Judge Strong, of Leominster, who was also a member of Congress. His successor was Alexander Dustin, who traced his descent from the celebrated Hannah Dustin, of Indian warfare memory. For thirty years the town has been without a member of the legal profession.

## CHAPTER CXLIV.

### WESTMINSTER—(Continued.)

*Education—Religion—Military Affairs—Miscellaneous.*

**EDUCATION.**—Nothing seems to have been done for the public instruction of the children of Narragansett No. 2 before its incorporation as the district of Westminster. Several attempts were made to establish schools, but they proved ineffectual. The principal

reason of this was, no doubt, that for twenty or more years after the settlement of the township there were very few children in it of a school-going age, and they were so widely scattered as to render it difficult, if not impossible, to bring them together for any common purpose, and hence whatever instruction was given to those needing it in those days was given in the home, probably by the parents or older members of the household. The first effective action of the citizens upon this subject was taken December 24, 1759, when they "voted that they will have a Reading and Riting School for three months in the middle of the town," and also "that £6 (twenty dollars) be assessed and levied on the inhabitants of the District of Westminster for the use of the Schoole in s<sup>d</sup> District." In March, 1761, £8 (twenty-six dollars) was appropriated for the same purpose. In January, 1762, the same amount was granted, and, instead of having a single school in the middle of the town, it was voted "to have a moving school," and "that the school be kept at Mr. Nathan Parker's house, and Mr. Philip Bemis's, and at Capt. Daniel Hoar's and at Lieut. Thomas Stearns'," "an equal part of the time at each place." The appropriations increased from year to year, slowly, and the schools continued to be "kept" in different localities at private houses. In 1765 the District was fined for not maintaining schools, as required by the statutes of the Province; hence in 1766 it was, among other things, voted "to keep a school five months in the middle of the town *according to law*." At the same time it was also voted "to build one school-house and to build it at the pound,"—that is, near the Fenno corner, opposite where the barn of Hobart Raymond now stands. The site was afterward changed "to the Northeast corner of the Meeting-house lot," and it was accordingly erected there, and remained till within the memory of some now living. October 15, 1767, the district voted "to keep school in the School-House till the first of March next." At the same meeting the citizens "allowed Abigail Whitney £1 3s. 4p. for keeping school eight weeks, lacking four days." About the same time Moses Stearns was paid £1 18s. 7p. "for keeping school." In the treasurer's records is the following item: "Feb. y<sup>e</sup> 1, 1768, Payed two pounds eight shillings for Mr. Samuel Hoar keeping school hear." This Samuel Hoar was the grandfather of Senator Hoar, and a son of John Hoar, one of the early proprietors of the township and a sometime resident within its borders.

In 1768 the District was divided into four squadrons for promoting educational interests, and in 1772 a re-division was made whereby five "squadrons" were established, to wit: one at the Centre and one at each of the four parts of the outlying territory, indicated by the four cardinal points of the compass. During the same year houses were ordered to be erected in these outlying squadrons, and the order was duly executed. The five school-houses accom-

modated the greater part of the population, but a few families in the extreme north and a few in the extreme west part of the District being still far distant from any school building, were allowed for some years to draw their proportion of the school money and expend it as they saw fit. Various re-districtings of the town took place from time to time as the increase of the scholars and the general convenience seemed to require, until there were twelve in number in 1848, when they reached their maximum.

As the town increased in wealth and population the yearly appropriation for educational purposes increased proportionally, only a few items of which can be noted. In 1775 it was £40, or about \$133.33; in 1800, \$400; in 1810, \$520; in 1820, \$520; in 1830, \$800; in 1840, \$1,000; in 1850, \$1,200; in 1860, \$1,500; in 1870, \$2,700; in 1880, \$2,750.

Up to the year 1806 the schools of the town had been under the charge of no special superintending committee, only as the Constitution of the State made it the duty of the ministers of religion to visit them from time to time and exercise advisory power over them in the interest of good morals and the general welfare. The selectmen and prudential committee of each district together managed the more external affairs pertaining to their operation. But a law had been passed by the Legislature requiring towns to elect annually a committee of inspection for the public schools, and they were first chosen in the year mentioned. In 1871 the town purchased the old academy building on the westerly brow of Meeting-house Hill, in which the older children had enjoyed the privileges of a select school for a number of years, and fitted it up for high school purposes, to which it was afterward devoted as a part of the equipment of the public school system until it was burned, in the early part of 1888. The schools of Westminster have always maintained a good standing in the general community, and have sent a creditable number of those receiving their earlier tuition in them to higher institutions of learning and to useful and honorable callings and positions in life.

The Westminster Academy was established in 1829, when the structure just referred to was erected and furnished with facilities for a more advanced and wider range of studies than was at that date supplied by the common schools. It had a successful run for some thirty years, being especially prosperous during the decade of 1840-50, and was a valuable accessory to the cause of education in the town and vicinity. Owing to the increase of high schools in neighboring towns, interest in it after a time declined, and it was finally given up, the building being disposed of as just now stated. A reunion of its old students was held in the summer of 1884, when over six hundred of them gathered from all parts of the country to exchange kindly greetings, indulge in reminiscences, revive old associations beneath the

shades and in honor of their *alma mater*. It was an occasion of rare and memorable enjoyment.

A Social Library was established in Westminster near the close of the last century, which had a wide patronage, and exerted a healthy intellectual and moral influence upon the community for more than a generation. After it was abandoned, and its books were sold, other similar means of culture were instituted, with more or less successful results. At length a collection of books, purchased by the Farmers' Club, and one belonging to a Young People's Literary Society, were united to form the nucleus and foundation for a Free Public Library, which has been in existence for some years, and is a means of great usefulness. It contains a choice selection of the best literature of the times, is well patronized and promises well for coming years. There are in it about 2500 volumes, and the yearly circulation is some 5000 volumes. Mrs. S. E. Warner is the accomplished and efficient librarian.

RELIGION.—One of the first things to engage the attention of the proprietors of Narragansett No. 2 after the actual settlement within its borders, as required by the original grant of the Provincial Legislature, was the erection of a suitable house of worship and the employment of an Orthodox minister of the Gospel, to lead in its service and have charge of the spiritual interests of the people. On the 23d of November, 1737, less than nine months subsequent to the coming of Fairbanks Moor and Joseph Holden to the place, when only fifteen persons were residents there, the proprietors voted "to proceed as soon as they conveniently can to build a Meeting-House," and "to have it suitable for occupancy June 1, 1739." At the same meeting a committee was chosen to carry these votes into effect. In September, 1738, when there were but three families on the territory, £30 were appropriated "to secure some suitable person to preach the Gospel to the 1st of June next." Later an equal sum was added, and £60 (\$200) a year, was appropriated thereafter till a minister was permanently settled. On the 6th of June, 1738, the meeting-house, which had been enclosed and shingled, was formally dedicated to God. It was a plain structure, forty-five feet long and thirty-five wide, with twenty feet posts, having no architectural or other ornamentation whatever. It was located on Meeting-house Hill, on the north side of the street, a little eastward of the centre of the plateau. On the 4th of August, 1742, the proprietors extended a call to Mr. Elisha Marsh, of Cambridge, a native of Hadley, Mass., and a recent graduate of the college, to become minister of the township. He accepted, and was ordained on the 20th of October. At the close of the services a church was instituted, with Joseph Holden and Joseph Miller deacons. Mr. Marsh was to have £300 *old tenor* for a settlement, a house-lot of sixty acres and a salary of £45 (\$150) annually. The relation between

Mr. Marsh and the people did not prove to be a very harmonious and happy one. He was troubled about their payment of his salary. They were troubled about the quality of his preaching. They were slack and inconstant in meeting their obligations. He was un-Orthodox and latitudinarian in matters of doctrine. After fifteen years, during most of which time there was friction and mutual discontent breaking out in two or three lawsuits, the connection was dissolved, to the relief, no doubt, of both parties.

The successor of Mr. Marsh was Rev. Asaph Rice, a returned Oneida Indian missionary, who was installed, after an interregnum in the pastorate of about seven years, October 16, 1765. The distracted state of the church and township, caused by the troubles that existed between Mr. Marsh and the people, rendered it difficult to obtain a new minister until time had softened somewhat the existing asperities and healed the alienations that had been created between the members of the church and congregation. Mr. Rice proved to be a satisfactory pastor and a worthy and highly-esteemed citizen. He remained in his office, faithfully discharging its duties, till obliged to suspend them by failing health, which resulted in his death, in March, 1816. He was in active service nearly fifty years.

During the ministry of Mr. Rice the meeting-house, built by the proprietors in 1738, becoming dilapidated and insufficient to accommodate the increasing population of the town, was superseded by a new one, located a little to the west of the one whose place it was to fill. The new structure was sixty feet long by forty-five wide, in the usual rectangular form, with fourteen feet porches at the two ends. It was two stories in height, with ample galleries, large square pews, after the fashion of the times, and a high pulpit, over which hung a large sounding-board, always a wonder to the youthful mind. The work of building was done in 1788, and the dedication took place January 1, 1789. In 1807 a belfry was erected, at the west end of the house, of respectable proportions and reasonable height, adding much to the external comeliness of the structure, and giving to it a more imposing, as well as a more ecclesiastical, appearance. In 1820 this house of worship passed from the ownership of the town to that of the First Congregational Society, by whom it was occupied till the erection of their present neat and commodious edifice on Main Street in 1837, soon after which it was taken down.

The Rev. Cyrus Mann was installed as colleague of Rev. Mr. Rice in 1815, and continued his labors till 1841, when he gave place to Rev. Stephen S. Smith. For five years Mr. Mann was minister of the town, but afterward of the First Congregational Church and Society, which was organized at the time of the abandonment of the control of religious affairs by the citizens-at-large and the adoption of the voluntary system in 1820. Since Mr. Mann there have been ten

pastors, settled and acting, of this church and society, including the present incumbent, Rev. Charles M. Palmer. The changed condition of things in regard to the tenure of the ministerial office is shown by the fact that three pastorates filled up the almost entire period of the first hundred years of the town's history, while there have been ten during the past forty-eight years.

About the year 1812 a number of individuals, mostly in the northern part of the town, interested in the doctrines and polity of the Methodist denomination, united with others in adjoining towns in the formation of a society representing that form of Christian faith. A small house of worship was erected on the road to South Ashburnham, near the town line, in 1817, which stood till 1832, when it was sold, the proceeds going into a new church at Ashburnham Centre, where the Westminster Methodists have since worshipped. It does not appear that any regular Methodist minister was ever stationed in the place, the pulpit being supplied by itinerant clergyman and local lay preachers.

In 1816 a society of Universal Restorationists was established, although they had no regular minister and no house of worship for some years. They built a church on the North Common, a mile and a half from the Centre, in 1820, and Rev. Levi Briggs was installed as pastor two years later. He was succeeded by Rev. Charles Hudson in 1824, who continued in the ministerial office till 1842, when he exchanged the clerical for political life. The meeting-house of this society was moved to the central village in 1835. Since the retirement of Mr. Hudson fourteen ministers have been regularly employed in rendering pastoral service to this society and the church connected with it, though there have been intervals when no religious service has been maintained.

A Baptist Society was organized in 1827 and a church of a corresponding faith three years afterward. A plain brick meeting-house was erected in 1829, being located, for obvious reasons, on a rise of land near the foot of the pond. In 1863 this building was abandoned, and the present more conveniently located and attractive one in the Centre took its place. Rev. Appleton Morse was the first minister, serving in both Westminster and Princeton at the same time. He has had fourteen successors, the Rev. Lyman Partridge being now the pastor.

During the years 1842 and 1843 considerable interest was awakened among certain classes of the population in the views promulgated by one William Miller respecting what was denominated the Second Coming of Christ and the end of the World, which was represented as being then near at hand. Meetings were held; converts were made; much excitement prevailed, and for a brief period more religious zeal and activity seemed to be manifested in connection with the acceptance and promulgation of those views than in any other direction. But time passed

on; the world still kept up its accustomed movements, showing no signs of age or decay; the excitement died out, and the religious concerns of the community received due care and consideration by the established societies and churches, as before, and so continue to this day.

**PHILANTHROPY AND REFORM.**—While the people of Westminster have given due consideration to the general interests of the community, and have been willing and ready to foster and promote whatever in the ordinary trend of things seemed calculated to advance the common welfare and happiness, they have not been indifferent to the great reform movements which have characterized the last fifty years of American life, and to those causes inaugurated and carried forward either for the purpose of resisting and overthrowing some of the existing evils of society or of ameliorating the condition, in some positive, effectual way, of their needy, unfortunate and suffering fellow-men. The cry of outraged, sorrowing humanity has not been sounded among them in vain. When the appeal of the Southern bondman went forth through the land, there was a goodly number, representing both the radical and conservative types of anti-slavery activity, who boldly and openly "stood up and were counted" on the side of those who sought to circumvent the designs of the oppressor and secure the enfranchisement of the oppressed. And so it has been in respect to the mighty evil of intemperance. Suffering as the town has done with all others by reason of this devastating scourge, yet have its ravages and threatenings been met with an earnest and vigorous opposition, expressed both in personal influence and by organized efforts which have been productive of striking and gratifying results. The use of intoxicating liquors as a beverage is essentially abandoned among all the better classes of its population, and the traffic in such liquors, which in bygone times brought so much death and woe into the community, has, for many years, been placed under the ban of public opinion by the vote of the citizens, and thereby also under the ban of the statutes of the Commonwealth. It has been, and still is, the same proportionately with other good causes and enterprises having in their keeping the improvement and progress of mankind.

**CARE OF THE POOR.**—The town under review has never been indifferent to the condition and righteous claims of the unfortunate and needy among its population. Early in its corporate history Jonas Winship and others were paid for keeping Hannah Mead and supplying her with the necessities of life, at the rate of "three shillings per week when she was well, and six shillings when she was ill." At the annual March meeting in 1765 twenty pounds were voted for the support of the poor, the first appropriation made for this purpose. Agreeably to both provincial and State law, most new-comers were "warned

out" or "cautioned," as the process was sometimes called, whereby the persons involved were cut off from all claims upon the town for support or help, provided they should ever become dependent or destitute. For many years the public poor were let out for keeping and care to the lowest bidder, but subsequently the selectmen or overseers of the poor were authorized to arrange for their proper sustenance in a more reasonable, Christian way. In 1803 an effort was made to induce the town to purchase a farm, with suitable buildings and furnishings for the care of the poor, but it failed, as did several others in succeeding years. In 1829, however, a farm was procured, and properly fitted up at an expense of about three thousand five hundred dollars. It was on Beach Hill, two miles from the central village. After using it for about forty years it was exchanged for the Abner Whitney place, near the North Common, where ample accommodations have since been provided for the unfortunate class of people under notice, and where every reasonable provision is made for their need, their comfort and their happiness.

**RELATIONS TO THE REVOLUTION.**—The founders and early residents of the town of Westminster were thoroughly imbued with the spirit that animated the New England fathers in coming to these shores, and fully established in those principles of civil and religious liberty upon which they sought to build the new civilization that was to realize to them their long-cherished dream. They were jealous of their inborn rights, and watched with tireless eye and resolute heart the encroachments of the mother-country upon her dependent colonies from the beginning. At the very first indications of trouble between the two they planted themselves squarely in opposition to all attempts of the parent government to impose unjust and oppressive burdens upon its subjects this side of the sea. And they were prepared, when the proper time came, to join with Boston and other towns in protesting against, and finally in openly resisting the tyrannical measures by which England undertook to enforce her demands against those who, for freedom's sake and for conscience' sake, had established themselves at great sacrifice and peril in the new world. The chapter in the "History of Westminster," covering the entire Revolutionary period, including the preliminary steps leading thereto, is rich in incident and accomplishment, and exceedingly interesting. Only a few facts detailed from it can be given in this review. When Great Britain laid heavy imposts on goods sent to this country for consumption, Westminster, with other towns, voted not to use imported articles any further than was absolutely necessary, and to encourage, in every possible way, home industry and home manufactures. When the Provincial Governor dissolved the General Court because it would not co-operate with the British ministry in the execution of unjust enactments, but sought to parry the blow with which the Crown

would smite the colonists by counter-legislation, the inhabitants of Westminster chose its leading citizen to represent it in a convention called by Samuel Adams, James Otis, Joseph Warren and others, to meet in Faneuil Hall to consider and take action with reference to the usurpation. This was in 1768. In 1772 a Committee of Correspondence was chosen to encourage and support the town of Boston and the popular branch of the Legislature in their conflict with the royal Governor Hutchinson, whose rule in the interests of the King and his court was most obnoxious to the patriotic and liberty-loving portion of the people. As the difficulties deepened and the probability of an open rupture between England and the colonies increased, the citizens of the town almost without exception signed a compact, still preserved, pledging their fortunes and their lives to the maintenance of the cause of the colonies against the crown. When Governor Gage cancelled the order convening the General Court, and refused to issue a new one, Westminster was represented in the House of Representatives, which met in spite of the Governor's action, and which resolved itself into a Provincial Congress, claiming to act, not in the name of the Crown and Court of England, but in the name of the people, whose agents they were, thereby inaugurating the new era in American history. When the Provincial Congress recommended the enrollment of twelve thousand soldiers as minute-men, ready to respond without delay when in any possible emergency a call might be made for their service, the inhabitants of the town immediately formed three companies in accordance therewith. And these men, nearly a hundred and twenty in number, under their respective captains, Elisha Jackson, John Estabrook, and John Miles, upon hearing of the battles of Concord and Lexington, April 19, 1775, marched at once to Cambridge to engage in any service where they might be needed. No further outbreak occurring, they were discharged at the expiration of seven days, though twenty-seven of the men enlisted immediately for further duty, and were probably among the reserve forces at the battle of Bunker Hill. Subsequently a company of fifty-four men was raised by Captain Bemis, and took part in the siege of Boston.

When the war was fully inaugurated and the people saw the nature and magnitude of the conflict, the citizens of Westminster rallied, with great courage and unanimity, to the support of the cause of the Colonies. For a time there were voluntary enlistments sufficient to meet the exigencies of the case, and when the town was called upon to act in its corporate capacity it did so with promptness, liberality and patriotic devotion. Westminster men were to be found in nearly every campaign of the war and in many of its important battles. By a careful and extensive search through the military rolls preserved at the State House in Boston and elsewhere, it appears that during the entire struggle two hundred

and four Westminster men enlisted in the service, while sixty-two served as minute-men and went to Cambridge at the time of the Concord and Lexington alarm, making two hundred and sixty-six men in all who were engaged in the Revolution—a goodly proportion of the inhabitants, when it is remembered that the entire population of the town at the time was only about eight hundred. Besides these, to make out a certain quota at a certain date, the town hired eight men, which would make her full representation in the conflict two hundred and seventy-four men. Two of the citizens of the place rose to the office of colonel—John Rand, who had command of a regiment in New York at the time of Burgoyne's invasion, and Nicholas Dike, who was stationed with the men under him at Dorchester Heights, for the protection of the city of Boston.

During the uncertain period which followed the Revolution, when the responsibility of laying the foundations and shaping the features of a new government for the emancipated Colonies weighed heavily upon the patriotic mind and heart, and taxed to the utmost the wisdom, the patience and the statesmanship of the leaders in political affairs, the people of Westminster evinced not only a sublime devotion to the truths enunciated in the Declaration of Independence, and an enthusiastic spirit of self-sacrifice for the public welfare, but a sagacity and practical judgment in the consideration of questions of public policy that seems truly surprising. They were ready to do their full share to aid in establishing the National Government upon a sound and permanent basis; and when the first draft of the Federal Constitution was submitted to them for consideration they discussed its several features with an understanding of fundamental principles, a clearness of political vision and a force of argument which must have contributed in due degree to the final and satisfactory results which were at length achieved in this regard. All honor to the fathers for their wisdom, constancy and loyalty in "the times that tried men's souls."

**IN THE REBELLION.**—When the slave power, in order to maintain its supremacy in the national councils and to perpetuate its cherished system of injustice and oppression in the land, inaugurated the reign of civil war, the town, true to its ancient record of loyalty to the principles of liberty and to the national banner, rose to meet the emergency with commendable alacrity and zeal. Its citizens proved that "as were the sires so were the sons," and that they believed that what their fathers had secured of freedom and independence in the former days at immense cost of blood and treasure was worthy of being preserved at still further cost, and to its preservation they were ready to pledge "their lives, their fortunes and their sacred honor." On the 29th day of April, 1861, in response to the call of President Lincoln for seventy-five thousand men, to suppress the insurrection which had arisen in the Southern

States, issued two weeks before, the town, at a meeting convened for the purpose of considering what it would do for the defence of the country, voted to raise a company of volunteers and uniform them for the public service and also pay each man a dollar a day in addition to what he received from the government. At the same meeting money was appropriated wherewith to make good the promise which those votes implied. This is but a specimen of the town's action in this behalf while the conflict lasted. It sent more than a hundred and thirty of its sons into the conflict, encouraging and supporting them with hearty financial and moral backing to the last. Of these, thirty-four never returned, some being slain in battle, some dying of wounds or of disease contracted in the service and several of starvation and ill-treatment while incarcerated as prisoners of war in Libby Prison and Andersonville. A granite monument, with marble tablets, on which the names of these departed heroes are inscribed, attached to the four sides of its main shaft, occupying a conspicuous position in the central village, commemorates their patriotic services and sacrifices. In addition to those who were properly enlisted as Westminster soldiers, there were many others, natives or former residents of the town, who, though joining the ranks elsewhere, were yet in a measure proper representatives of its loyalty and heroism in the great crisis of the Republic. And it is but fitting that mention be made in this connection of one son of Westminster, who, moved by patriotic enthusiasm, enlisted in the service at an early period of the war and rose rapidly through the various grades of promotion until he attained the high position and distinguished honor of Major-General of the Federal Army. Since the termination of hostilities Gen. Nelson A. Miles has honored himself and his native town by displaying in his intercourse with and treatment of the Indian wards of the nation as a military commander, a degree of common sense, practical wisdom and Christian principle rarely found among his contemporaries, for which he deserves the heartfelt gratitude of every generous, patriotic, high-minded citizen of the Republic and friend of humanity.

The military spirit has prevailed somewhat extensively in the town independently of those special manifestations displayed in connection with the great crises in the history of the country to which reference has been made. As early as 1761 a company of soldiery had been organized, of which Nicholas Dike was commissioned captain and Benjamin Butterfield lieutenant. Ten years later there were two such companies—one in the north part, with John Rand, captain, and one in the south part under the command of Captain Nathan Whitney. The territory seems to have been divided into two military districts by the first county road from Lancaster to Athol, which division was practically continued some years into the present century, the companies enlisting from the

different sides of that road taking the name of the North and South Companies respectively. In the year 1816 the North Company, which had belonged to the infantry, was reorganized as a rifle company and continued in that capacity for some twenty-five years. It attained a high standing in military circles, and was the pride of those people in town interested in the profession of arms. After the formation of the Rifle Company the South Company disbanded and thenceforward the former had the whole field to itself. Subsequently to the dissolution of that organization an infantry company called the Westminster Guards was chartered, but it had only a brief existence. In 1868 the "Wachusett Rifles" was enrolled as a part of the Massachusetts Volunteer Militia and continued for ten years, being thrown out when the State forces were reduced in 1878. A company of cavalry, composed of men from Westminster and neighboring towns, existed for many years after the Revolution.

MISCELLANEOUS ITEMS.—In passing from these reminiscences copied from the military annals of the town it may be of some interest to mention the fact that after the battle of Bennington, in August, 1777, a detachment of sixteen Hessian officers and their servants, taken prisoners at that time, were sent, under parole, to the selectmen by the Provincial Government at Boston, and were quartered at various dwelling-houses in different neighborhoods. They remained only a few months, however, but a few memorials and traditions of them are still found in some of the families with which they had a temporary home. One of the number was so well pleased with the locality that he remained after his companions left, married and settled in a neighboring town and has descendants now living in the vicinity.

In noting the changes that have been going on during the present century it may be stated that nearly a hundred homesteads existing ninety years ago in the outlying districts of Westminster have been abandoned, of which only empty but expressive cellar-holes are the reminders at the present time. The multiplication and growth of the villages of the town constitute a corresponding fact, indicating a marked tendency of the age.

There have been three commemorative occasions of special interest in the history of Westminster. One was the celebration of the centennial of its incorporation, held October 6, 1859, at which Hon. Charles Hudson, of Lexington, for twenty-five years a prominent citizen of the town and familiar with its annals, gave a historical address; Rev. William S. Heywood, then of Hopedale, a poem, while other appropriate exercises filled out the day. The proceedings were published in full and widely distributed. The one hundredth anniversary of the Declaration of Independence was duly commemorated July 4, 1876, when Rev. Mr. Heywood, then of Holyoke, delivered an address, dealing largely with national affairs, with

*L. C. Miles*

special reference to the causes of the Rebellion, its development, progress and final overthrow. On the 22d of June, 1887, the one hundred and fiftieth anniversary of the original settlement of the town was appropriately observed, at which time an address was given by the last-named gentleman, accompanied by other exercises suited to the occasion. The several churches have, from time to time, held special services in honor of some marked event in their history.

There are three cemeteries in Westminster: one a mile east of the Centre, the oldest portion of which was laid out soon after the settlement, while two other portions have been annexed to the original as the needs of the town required; one in Scrabble Hollow, near the dwelling of the late Mr. James Puffer; and one half a mile southwest of the Centre on the rise of land sometimes called Mount Pleasant. The first two belong to the town, the last to private individuals.

There is a Post of the Grand Army of the Republic in town, composed of twenty-four members, with Mr. Lyman M. Drury, commandant. It is named the Joseph P. Rice Post, No. 69, in honor of the lieutenant-colonel of the Twenty-first Massachusetts Regiment, who was a native of Westminster. The town has a well-equipped Fire Department, with two engines at the central village and one at South Westminster. A Farmers' Club has been in existence for many years and has done good service in keeping up an interest on the subject of agriculture, the leading industry of the community. Its annual fairs in the autumn have an excellent reputation in all the neighboring region.

The Westminster Bank was chartered in the year 1875, chiefly through the influence of Mr. Daniel C. Miles, who has been its president from the outset. Its capital is one hundred thousand dollars. Mr. William Mayo was the first cashier, who was succeeded, in 1887, by the present incumbent, Mr. Frank W. Fenno.

There are at present three post-offices in town—one at the central village, one at South Westminster and one near the railroad station. For some years there was one at Wachusettville, but it has recently been given up.

The number of persons assessed for property in the year 1888 was five hundred and thirty-eight; for polls, one hundred and fifty-six, making a total tax-list of six hundred and ninety-four persons. The amount of personal estate taxed in the same year was \$178,672; of real estate, \$577,584. Entire property taxed, \$756,256. The number of acres of land subject to taxation was twenty-two thousand four hundred and eighty-four. Number of horses, 392; cows, 599; sheep, 36; neat cattle, exclusive of cows, 283; swine, 98; houses, 272½. The total amount of tax for 1888 was \$11,884.96. The appropriations for the same year were: Highways, \$2500; schools, \$3000; contingent expenses,

\$4500; Decoration Day, \$55; cemeteries, \$50; total, \$10,105. Tax on a thousand dollars, \$14.50.

The town officers for 1888-89 were: Clerk, Edward S. Kendall; Selectmen, J. Hervey Miller, Charles C. Dawley, A. Jackson Bolton, who are also overseers of the poor; Assessors, J. Hervey Miller, Hobart Raymond, Stephen F. Lamb; Treasurer, David W. Hill; School Committee, Rev. C. M. Palmer, Rev. Lyman Partridge, Daniel E. Hurd. With his present official term, Mr. David W. Hill completes thirty years of service as custodian of the town's finances.

As a matter of general information, the population of Westminster at each decennial period from the first settlement to the year 1885 is herewith presented. The first five numbers are only approximately correct, there being no official and authoritative census tables previous to 1790 extant, and the figures are therefore only estimates from collateral records: 1740, 30; 1750, 120; 1760, 325; 1770, 675; 1780, 990; 1790, 1176; 1800, 1369; 1810, 1419; 1820, 1634; 1830, 1696; 1840, 1645; 1850, 1914; 1860, 1840; 1870, 1770; 1880, 1650; 1885, 1556.

The agricultural interests of the town in 1880 are represented as follows: Land, \$340,917; buildings, \$267,813; machines, tools, etc., \$34,264; animals, \$60,751; fruit trees, \$28,156; total, \$731,901. Value of farm products for the same year, \$193,931.

Westminster has not the honor of having given birth to any considerable number of distinguished personages in any calling or sphere of life, yet it has contributed its share, perhaps, of members to the learned and honorable professions and to high and responsible positions in the various circles of human society. Twenty-five of its sons are known to have been graduates of the different New England colleges, and several of its daughters of some of the higher institutions of female education. It has given about twenty of its native-born children to the pulpit, half as many to the study and practice of medicine and a smaller number to the bar. In each of these callings there have been some who have gained distinction and earned wide and well-sustained reputations. Two sons of the town have had a place in Congress, and three of its daughters devoted themselves to the work of missions in foreign lands, in that spirit of Christian consecration and self-sacrifice which adorns and glorifies human nature and is worthy of all commendation.

A large number of persons, both male and female, have gone out from this goodly town to fill the place of teachers in the work of popular education, and have rendered efficient and honorable service in that most important field of human effort and responsibility. Of General Nelson A. Miles mention is made in another connection. The town may justly claim some special interest in the renown and glory which are indissolubly linked with the name and memory of the lamented President Garfield, inasmuch as his grandfather, Thomas Garfield, son of Solomon, first

opened his eyes to the light of time in a dwelling still standing within its borders, on the 19th of March, 1773.

But not only has Westminster honored herself and blessed the world through those to whom special attention has been directed as having attained some high rank or place of distinction among men, but quite as much perhaps through that much greater number of its children, who, wearing no badge of office or station, in humbler walks and more inconspicuous ways, have served their Maker and their fellow-men by their simple virtues and unpretending piety, by acting well their part, by honesty and integrity, by pureness and love unfeigned, by the word of truth and righteousness on the right hand and left, by all the graces and powers of a noble Christian character and life. These, no less than the others, are children in whom the good old mother-town may take a just and laudable pride, and for whom she may appropriately weave some of her choicest chaplets. They all alike are a credit to her and give unfading lustre to her name and memory.

A complete history of Westminster is now in process of preparation by the author of this sketch, and will be issued at no very distant day. It is designed to be thorough and comprehensive, including extended annals of families and biographical notices, with maps and other illustrations, making a good-sized octavo volume of about eight hundred pages.

#### BIOGRAPHICAL.

##### DANIEL C. MILES.

Daniel Curtis Miles, son of Daniel Miles and Mary Curtis Miles, and a brother of General N. A. Miles, U.S.A., was born June 1, 1827, in the eastern part of Westminster, Mass. His early education was obtained partly in the public schools and partly in private schools. Later he attended the academy at Westminster Centre. This period of school training was supplemented by the not less valuable discipline of teaching, in which Mr. Miles engaged for twelve terms in Lancaster, Westminster and Gardner.

Beginning his active business life upon a farm, Mr. Miles extended his interests to the lumber trade, and also became proprietor of a saw and grist-mill and a factory for the production of chair-stock. Later he took an active part in erecting the chair-factory and connected buildings at South Westminster, and for three and a half years he was a partner with Merriam & Holden in the manufacture of chairs and settees. He also owned and operated the Westminster and Winchendon bakeries for three years. Prospering in these enterprises, Mr. Miles went into partnership in the manufacture of cane-seat chairs at North Westminster, under the firm-name of Miles & Lombard, afterwards changed to Miles & Son. This soon be-

came an important industry in that section of the town, giving employment to seventy-five persons.

In the spring of 1875 Mr. Miles became the chief mover in establishing the Westminster National Bank, of which he has ever since been the president. For the past few years he has operated extensively in land, both in Southern California and elsewhere, besides holding an interest in a large cattle-ranch near Miles City, Montana. This city was founded by his son, George M. Miles, and was named in honor of General N. A. Miles.

On the 22d of May, 1851, Mr. Miles married Miss Lucy Ann Puffer, daughter of James Puffer and Lucy Jones Puffer, and of this union there have been five children—Mary Josephine, George M., Herbert J., Arthur W. and Martha G.

In addition to the numerous and successful business enterprises which have identified him with the progress and prosperity of the town, Mr. Miles has held many offices of trust and responsibility. He has been auditor of the town's accounts, assessor, member of the School Board, president of the Worcester North Agricultural Society two years and trustee fifteen years, superintendent of the Baptist Sunday-school for twenty years and clerk of the Baptist Society twenty-six years, president of the Wachusett Baptist Association, and justice of the peace for many years.

During the past ten years Mr. Miles has gratified his taste for the acquisition of knowledge by traveling widely, both in the United States and in Europe. These tours of observation include, in this country, besides nearly all the large cities, California, Wyoming Territory, Oregon and Colorado; and, in Europe, Italy, Switzerland, France and the British Isles.

##### ARTEMAS MERRIAM.

This gentleman, who is one of the leading citizens, as he is the most successful manufacturer of Westminster, was born in that town on the 21st day of July, 1818. He was the son of Joel Merriam, the well-known and honored deacon of the Baptist Church for many years, and Polly (Farnsworth) Merriam, and a descendant in the seventh generation of Joseph Merriam, the immigrant ancestor of the family, who was an early settler of Concord, Mass. His education was limited to the meagre advantages of the common district school, supplemented by the tuition of a single term at the Westminster Academy. When eighteen years of age he went to work in the cooper-shop of Mr. Franklin Wyman, at the lower part of "the Narrows" (now Wachusettville), where he remained six years, acquiring skill in the use of tools and that practical knowledge of business which have been of invaluable service to him in his later life.

After closing his engagement with Mr. Wyman he spent a few months at Gardner and then began chair and settee-making in a small shop fitted up for his

*Artemus Merriam*

*Geo. Curtis*

*Reuben Burton*

use at the place now owned by Mr. Hobert Raymond, where he then resided. There he remained about five years, doing all his work at first by hand, but afterward introducing foot-power for boring and other purposes. In 1848 he entered into partnership with his brother-in-law, Mr. George Holden, moved to the head of the pond and commenced business under the firm-name of Merriam & Holden, thereby laying the foundations of that constantly increasing and highly prosperous enterprise with which his name has since been identified. The details of the history of the business, from its very humble beginnings in a little old cooper-shop, enlarged somewhat to adapt it to the use for which it was designed, with an insignificant water-power, through the various stages of its development to its present commanding proportions, have been given in connection with the general industries of the town and need not be repeated. It is sufficient to note the fact that the establishment, as it now stands, consists of a main building one hundred and fifty feet long by forty-five wide, four stories high, with two attached portions, forty-five by twenty feet and sixty by thirty-six feet respectively, three stories high, and also three drying-rooms and a bending-room, while near by is a paint-shop sixty by fifty feet, three stories high, in which is a counting-room and a United States post-office. In the different departments of this establishment there are employed about seventy-five men, who turn out work amounting to seventy thousand or eighty thousand dollars annually, its capacity of production having more than doubled since it came under the sole control and management of Mr. Merriam, sixteen years ago. Around it and through its influence has grown up the village of South Westminster, consisting of twenty dwelling-houses and a population of about one hundred.

Mr. Merriam is a notable example of an enterprising, wide-awake, self-made man. Whatever he is and whatever he has accomplished are due to his own native energy and persevering effort. It has been chiefly through his agency that the undertaking with which he has been connected for the past forty years has attained its grand and meritorious success. Of strong bodily constitution and a vigorous, active mind, combined with good common-sense and practical judgment, he has made a wise use of the powers and capacities with which nature and Providence at the outset endowed him. Moreover, his integrity and sense of justice have secured for him general respect and confidence in business circles as well as in the community where he resides, while his social qualities, his kindness and genuine good humor have won him friends wherever he is known and made him a genial, welcome companion among all classes with whom he associates. Domestic in his feelings and tastes, truly democratic in spirit, of benevolent and obliging disposition, a friend to temperance and all good causes, interested in whatever promotes the general well-

being, frank, open-hearted and genial withal, he may be deemed one of the foremost of the sons of Westminster, not only as a successful business manager, but as an honest, high-minded, honorable man.

Mr. Merriam has been several times elected to the office of selectman as a token of the esteem and confidence with which he is regarded by his fellow-citizens, and was a representative to the General Court of the State of Massachusetts from the district of which his town forms a part, in 1878. In his religious views and affiliations he is a Baptist, both by early training and by personal conviction, though liberal in his interpretation and application of religious truth, and has been for many years connected with the church and society of that faith in town, to the various activities of which he is now, as heretofore, a willing and generous contributor.

---

#### GEORGE CURTIS.

George Curtis was born in Westminster, Mass., September 3, 1817. His mother was Lydia Gilbert, of Sharon, Mass. His father, Francis Curtis, was a native of Walpole, Mass., and was fifth in descent from the ancestor William Curtis, who came from England September 16, 1632. George was educated in the common schools and academy of his native town. At the age of seventeen he left his home to learn the carpenter trade of William T. Merrifield, of Worcester, Mass. He remained there until twenty years of age, when he went to Boston and commenced working at his trade. He continued (with intervals of teaching school) until the age of twenty-eight, when he engaged in business for himself, in Roxbury, Mass. Several of the large buildings destroyed by the fire of 1872 were built by him, as were also fine private residences in the towns of Milton, Canton, Stoneham, Waltham, and mills in Malden. He served as an alderman four years before the annexation of Roxbury to Boston; also as overseer of the poor in Roxbury and Boston nearly a score of years. In 1854, in consequence of an injury received by sunstroke, he left the building business and entered into the lumber trade, wholesale and retail. During the years of 1861 and 1862 he was a Representative to the General Court of Massachusetts and was connected with several military organizations, and was actively engaged in enlisting soldiers for the war. In the year of 1883 he retired from the lumber business and was succeeded by Curtis & Pope. He served the city of Boston as an alderman in the years of 1881, 1883 and 1884, and was again a Representative to the General Court in 1885.

---

#### NELSON CURTIS.

The subject of this sketch was born in 1809, and left this town a poor and almost penniless boy and went to East Bridgewater, Mass., to learn the trade of a mason. He remained here but a short time and

then went to Boston. He soon evinced extraordinary shrewdness, business capacity and enterprise, and at eighteen years of age he left other people of less natural ability to carry the bricks and lay the mortar, and with assistance from a prominent person who appreciated his energetic qualities he undertook a big and profitable contract; this was the initial step to a very successful business career. Mr. Curtis became one of the largest contractors in this part of the country. In some sections of Boston, especially in the direction of what is known as the Highlands, he erected great clusters of buildings. He contracted for the building of the Boston Museum, the Fitchburg Depot, United States Hotel and many of the Catholic churches of Boston.

His immense possessions of real estate were of the best-paying class; in the latter part of his life he became heavily interested in valuable stocks, particularly in the Boston and Albany Railroad and Roxbury Gas Company.

He was for many years an alderman in Roxbury and director in the People's Bank. Mr. Curtis was always a friend to the deserving poor, and has been the means of many men securing homes for themselves and families. He died September 16, 1882, at his home in Jamaica Plain, Mass. His widow, Mary S., still survives him.

## CHAPTER CXLV.

### HARVARD.

THE town of Harvard is located in the eastern part of the county and is bounded as follows: on the north by Ayer; on the east by Littleton, Boxborough and Stow; on the south by Bolton; and on the west by Lancaster and Shirley. This town was originally a portion of Lancaster,<sup>1</sup> and was incorporated January 29, 1732, and named in honor of John Harvard, founder of Harvard University. Portions of Groton and Stow were subsequently added to the town.

Among the early settlers were the names of Houghton, Willard, Sawyer, Hutchins, Atherton, Whitcomb and Priest. There were two garrisons here in 1704—one at Bear Hill, for the families of John Priest (Sr. and Jr.), John Walker, Caleb Sawyer, James Atherton (Sr. and Jr.); and the other probably on Pine Hill, for the Willards, Athertons, Houghtons, Hutchinses, Smiths and Hapgoods. After the white settlements the Indians roamed throughout the town, but committed no depredations and had no homes here.

Like other New England towns, one of the first movements of the people, after they had secured a habitation and a name, was to provide for religious

worship. The first preacher was Rev. John Secombe, who settled here in 1733. He remained until 1757. The church divided in 1821, and what is now known as the Orthodox Church was formed.

The Baptist Church was organized as early as 1776, and doubtless services of this denomination had been held previous to that time. The first pastor was Rev. Isaiah Parker, D.D.

The "Shakers" have a large property in the north-eastern part of the town. They are an industrious, frugal and enterprising people. "They have a neat village and a tract of finely-cultivated and productive land."

As early as 1724 the town of Lancaster voted that there should be school at "Still River or Bear Hill eighty-two days."

The town has always manifested a deep interest in schools. The Bromfield School was founded in 1877 by Mrs. Margaret Bromfield Blanchard, widow of Ira Blanchard, former pastor of the Unitarian Church. The school was organized September 17, 1878, with Charles W. Stickney as principal. Mrs. Blanchard left about one hundred thousand dollars for the founding of this school. The school has several thousand dollars' worth of apparatus, which, besides the large endowment fund, affords facilities for the best instruction.

The Public Library building and library owe their existence to the same spirit of benevolence that founded the Bromfield School. The library building was erected at a cost of about ten thousand dollars, all of which, except thirty-nine hundred dollars, raised by the town, was given by former citizens of Harvard. The largest amount was a legacy left by Mrs. Hannah W. C. Sawyer, principally from the estate of her husband, A. J. Sawyer, a citizen of Harvard. Warren Hapgood, Esq., of Boston, generously contributed twenty-six hundred dollars, and W. Channing Whitney, of Minneapolis, architect, presented the plans and specifications.

Mr. Edward Lawrence, of Boston, also left a legacy of five thousand dollars to the library. Mr. Lawrence was a native of Harvard.

The library building was dedicated June 22, 1887.

The keys were delivered by Warren H. Fairbank, chairman of the Building Committee, and accepted by Alfred A. Sawyer, chairman of the selectmen. Addresses were delivered by Warren Hapgood, Esq., and Rev. A. A. Miner, D.D., of Boston, and Rev. A. H. Barber, of Meadville, Pa.

In the French and Indian Wars and the Revolution the town did noble service. During the War of the Rebellion it responded nobly in men and means, and its record is one of old-time loyalty and patriotism. As early as April 29, 1861, it was "voted to appropriate four thousand dollars for equipping and paying a bounty to soldiers who may volunteer their services to suppress the present rebellion."

<sup>1</sup> See page 11.

This meeting voiced the sentiment of the town as follows :

*"Resolved, That it is the duty of all good citizens to frown indignantly upon, and to follow with uncompromising hostility every individual among us, if any there be, who shall express sentiments disloyal to the Government of the United States, or who shall sympathize with the plotters of treason and bloodshed."*

The selectmen during the war were E. A. Holman, John Blanchard, Wm. K. Harlow, Caleb S. Gerry and Andrew Fairbank. The town furnished 125 men and expended \$17,009.15 for war purposes. The State paid \$5,174.09 to families of soldiers, and over \$1800 was raised by private subscriptions, making a total of \$23,983.24, certainly good for a "hill town."

Fifty years ago there was some manufacturing carried on in Harvard, but this has now subsided, and it is a quiet agricultural community.

## CHAPTER CXLVI.

### BOLTON.

THE town of Bolton is located in the eastern part of the county and is bounded as follows: on the north by Harvard, on the east by the towns of Hudson and Stow, on the south by Berlin and Hudson, and on the west by Clinton and Lancaster. Bolton originally formed a portion of Berlin, and was incorporated as a district of Berlin in March, 1738. It was incorporated as a town February 6, 1812, and named in honor of Charles Powlet, third Duke of Bolton.

The first town-meeting was held August 14, 1738, and the following officers elected: Town Clerk, Jacob Houghton; Selectmen, Jacob Houghton, James Keys, Henry Houghton, John Priest and Captain Jonas Houghton; Constable, David Whitcomb; Surveyors of Highways, Josiah Richardson and William Keys.

The town retained its original boundaries until 1868, when about two square miles of the most populous portion of Bolton was annexed to the town of Hudson, in Middlesex County. The inhabitants of the annexed portion continued to vote in this town in State and national elections until 1876.

Bolton was early settled by a sterling class of people, who have left the impress of the strong New England character upon their posterity. Among the early settlers are the names of:

Atherton, Amsden, Babcock, Ball, Baker, Bacon, Barrett, a once large and influential family that settled on Long Hill, from which is descended Roswell Barrett, Esq.; Barnard, Bayley, Bigelow, Brooks, Bruce, Butler, Burnam, Carter, Caswell, Cooledge, Chaplin, Chase, Clark, Danforth, Davis, Divoll, Daikin, Edwards, Ellis, Ellinwood, Fairbanks, Farnsworth, Faulkner, Farwell, Fife, Fuller, Fosket, Foster, Fry,

a once numerous family, principally among the "Friends" or "Quakers"; Fletcher, Gardner, a name which did not come in with the first settlement, but which belonged, at a comparatively early period, to one of the most influential men the town has ever had, Stephen P. Gardner; Gates, Gibbs, Goss, Goddard, Greenleaf, Goodnow, Gould, Hale, Haven, Harris, Hemenway, Hastings, Holder, Howe, Houghton, a numerous represented family in all periods of the town's history, and associated with some of Bolton's most valued institutions; Holman, a family which has produced individuals who have exercised a most marked influence in all the affairs of the place, among whom were General Silas and his son, General Amory; Howard, Jacobs, Jewett, Johnson, Jones, Keys, Knight, Kimmens, Larned, Lawrence, Longley, a family which produced several highly useful citizens among whom were three of our town clerks, grandfather, father and son, who held office successively after each other; Maynard, Marble, Meriam, MacBride, MacWain, Moore, a name largely represented in several families, remotely, if at all, connected with each other, which has been borne by three of our town treasurers, a father and two sons, one of whom was C. C. Moore, treasurer for more than thirty years; Newton, two or three distinct families; Nicholls, Nurse, modernized into Nourse; Oaks, Osborn, Pierce, Parker, Pratt, Pollard, Rice, Richardson, Reed, Russell, Ross, Robins, Sawyer, Stearns, Sawtell, Stiles, Swan, Stone, Stratton, Tinney, Townsend and Tombs; Whitcomb, of whom were Colonel John, his son Jonathan, and his grandson, 'Squire Edwin A., and many more; Wolcott, Whitney, White, Welsh, Wheeler, Woodbury, Wood, Wetherbee and Wheeler.

**ECCLESIASTICAL HISTORY.**—The attention of the people was early given to ecclesiastical affairs, and even after the inauguration of the town a meeting-house was built, which stood until about 1790. A new church was erected in 1793 and remodeled in 1844. The calling of the first minister was a matter of much import, in which the whole town generally participated. The first minister called to the Bolton Church was Rev. Thomas Goss. May 19, 1741, it was voted to raise the sum of one hundred and twenty pounds "for a minister's rate," and on June 7, 1741, at a town-meeting then held, at which Mr. Jacob Houghton was moderator, it was put to vote whether "the town would choose by lott for a minister." It passed in the negative; and then it was voted "that Mr. Thos. Goss should be the minister of the town by 44 votes qualified by law." Four hundred pounds in bills of old tenor were then voted to him for his "encouragement and settlement;" and one hundred and eighty pounds in bills of old tenor or passable bills of credit for "stated salary." September 1, 1741, finds the town again in town-meeting to hear Mr. Thomas Goss, his answer, and for other business. After prayers the business proceeded, and Mr. Goss' answer was read and put on file, a committee chosen

to wait on Mr. Goss to "know his mind, when he inclines to have his ordination," and who should be sent for to assist, etc., etc.

Mr. Goss remained pastor until 1770, "when," in the language of Rev. Richard G. Edes,<sup>1</sup> "the minister whose coming was prepared for with so much elaboration, with such taking of counsel, with prayers and fastings, and who was received with such large cordiality, had lost his hold upon the good will and support of most of his people; lost it, said his enemies, because the spiritual influence by which he was moved was supposed to come more from the still than from the heavenly spheres; lost it, said his friends, because the views he took and maintained of ministerial, as well as of royal, prerogative, were entirely unsuited to the temper of the times, and the great movement which was everywhere in the air. What measure of truth they either of them had in the allegations made on either side, we will not now take upon us to decide. Sufficient to say the minister was jealously watched; occasions of offence and stones of stumbling, and enough of them were speedily discovered (as at such times they generally are); and then commenced a quarrel and a controversy which lasted for years, and left its impress on the affairs of the town, on the generations born and to be born. Meeting after meeting was held, council after council called, pamphlet written in answer to pamphlet, lawsuits instituted, committees chosen to defend, moneys to pay expenses voted; feelings became deeply embittered, fathers against sons, mothers-in-law against daughters-in-law, families separated from families. But after a while the dismissal of the minister, so obnoxious to a majority of the society, is procured, and another minister, Rev. John Walley, duly installed in his place. This event, so far from pouring oil on the troubled waters, rather stirred them to redoubled commotion. The town was divided into Gossites and Walleyites. The latter hold the church, have preaching there, and consider themselves the legal parish; while the former—the Gossites—adhering to the old minister, meet at a private house—that now occupied by the Holman family—and have preaching there. From 1770, alongside with political affairs, mixed up with them continually, cropping out every now and then, in the most unexpected manner, the contest continued till 1782, when Mr. Goss is dead and Mr. Walley has taken a dismissal, left the town and removed to Roxbury, the home of his family.

"The effects of this controversy, which for the day of it was one of the most important in New England, were long felt, not only here in this, but in all the neighboring towns.

"When Mr. Goss died his friends, among whom were the neighboring ministers, almost to a man, erected to his memory a monument, still standing in

our South burying-ground, inscribed in classical Latin and laudatory terms, with their sense of 'the many virtues both private and public' with which they supposed him 'adorned.' When Mr. Walley died at Roxbury, a little while afterwards, he left to the Bolton parish to which he had ministered a small legacy, the good effects of which we still receive in Bibles and other good books, throwing light on the sacred word. The divided sections of the town, the Gossites and the Walleyites, came together and signed their old covenant and became anew one church and society."

Mr. Goss was dismissed in 1771. After the dismissal, Mr. Longley, the constable, was instructed to prohibit him from going into the meeting-house; and "on the succeeding Lord's day, by violence, did prevent him from entering the desk." This done, Mr. Goss then said that "he should continue his labors in the gospel as usual, that those of his friends who wished to hear him might proceed to his house; that he should keep on preaching as heretofore." After the dismissal, and being forbidden the use of the desk at the meeting-house, he held forth, Sunday after Sunday, in his own house; a considerable minority following him thither, while the major part of the old congregation occupied the meeting-house, and listened to the ministrations of the Rev. Mr. Walley.

"Bolton Church was the first to withstand the power supposed to be vested in the clergy; thus did triumph the true principles of liberty in ecclesiastical affairs."

The movement was altogether in advance of the times, and was too audacious and high-handed a measure to be passed over lightly and without signal marks of reprobation. Accordingly, the neighboring ministers, sympathizing with Mr. Goss, refused Bolton Church members permission to come to the communion table in their churches; and in every way, so far as their power extended, and it was not very limited in those days, sought to excommunicate them. The controversy, for its day, was a noted one, and several pamphlets, advocating the views of one side or the other, were published.

The lawsuits for the recovery of Mr. Goss' salary, protracted year after year, lasted, carried on by his executors and heirs, till some time after his death.

The following is the inscription on Mr. Goss' tombstone:

Sacred to the memory of Rev. Thomas Goss, A.M., pastor of the church among the Boltonians, who, for upwards of thirty-nine years, having exercised the sacred office, departed this life January 17, 1780, in the sixty-third year of his age. A man adorned with piety, hospitality, friendliness and other virtues, both public and private; somewhat broken in body, but endowed with wonderful fortitude; he was the first among the clergy in these unhappy times to be grievously persecuted for boldly opposing those who were striving to overturn the prosperity of the churches, and for heroically struggling to maintain the ecclesiastical polity which was handed down by our ancestors. Friends erected this monument.

The pastors of the church since Rev. John Walley, who was settled here from 1773 to 1783, are as follows:

<sup>1</sup> Historical address delivered at Bolton, July 4, 1876.

Rev. Phineas Wright, Isaac Allen (who left the whole of his property, amounting to about \$20,000, excepting one or two small gifts, to the parish "of which he had so long been a minister"), Richard S. Edes, Thomas T. Stone, Nathaniel O. Chaffee, Edwin C. L. Brown, Ezekiel Fitzgerald, Nicholas P. Gilman, Cyrus A. Roys and Isaac F. Porter.

*The Baptist Church* was organized in 1832, and has had the following pastors: Elder Goddard, Levi M. Powers, Isaac C. Carpenter, John Walker, P. S. Whitman, Asaph Meriam, W. K. Davey, B. U.; J. H. Giles, from England; J. H. Learned, Kilburn Holt, Colby University; Joseph Barber, Benj. A. Edwards, George B. Fitz and Andrew Read.

*The Hillside Church* was organized in April, 1830, with thirty-six members. It was organized under the special auspices of S. V. S. Wilder, an influential and wealthy citizen, exercising a princely hospitality, and who entertained at his elegant abode the beloved Lafayette when on his visit, about that time, to the United States. Mainly by the instrumentality of our fellow-citizen just referred to, a spacious and handsome church was built on the hillside within his estate, near the Lancaster line, a congregation of goodly size from this and neighboring towns gathered, and a succession of pastors settled. After a few years, during which the following officiated as pastors,—J. W. Chickering, D.D., Mr. Peabody, Mr. Davenport and Henry Adams, it was abandoned.

*A Methodist Society* was formed here in about 1860 or '61, with Rev. W. C. Brown pastor. It soon disbanded.

The Quakers also have a society and church here.

The Bolton society was organized, having a meeting-house and school-house near it, was erected into a "Monthly Meeting" in April, 1799. Their first acknowledged ministers were Thomas Holder, Sarah Holder, Thomas Watson and Abel Houghton; their elders, John Frye, Lydia Gates.

THE HOUGHTON SCHOOL was established through the liberality of Joseph Houghton, who died November 7, 1847, having bequeathed to the town of Bolton twelve thousand dollars to establish a school "to be kept near the centre of said Bolton, in which such academical instruction shall be given as said town shall decide to be most useful," and also "eighty rods of land" (described) on which to build a school-house; and the town having accepted the legacy, and built the school-house as required to do, a school of the character above indicated, and named after its founder Houghton School, went into operation in October, 1849, first in the town hall, and soon after in the school-house itself.

THE REVOLUTION.—The first reference in the town records to the War of the Revolution appears under date of May 21, 1770, as follows: "The freeholders and other inhabitants of the town of Bolton are required, in his Majesty's name, to meet at the meeting-house on Monday, 21st of May, 1770," to see

(among other questions, one of which relates to the Goss difficulties) whether they will "abstain from tea and other British goods imported contrary to the agreement of the merchants of the town of Boston; and to pass such vote or votes rel. thereto as the town shall think proper."

Accordingly, when at the date mentioned a town-meeting was held, John Whitcomb, Esq., moderator, and on the second article the vote was put, "would they abstain from tea and other British goods?" it passed in the affirmative very unanimously; and Mr. Caleb Richardson, Col. John Whitcomb and Capt. Samuel Nourse were chosen a committee to prepare a written vote to that effect—doubtless to be transmitted to Boston.

Among those who went into the army from Bolton are the following: Lieut. Oliver Barrett, Benjamin Bailey, William Bigelow, Benjamin Hastings, Abraham Houghton, Jonas Houghton, Jonathan Houghton, Joseph Houghton, Carter Knight, Nathaniel Longley (captain), Dr. Abraham Moore (surgeon), Sewell Moore, Haven Newton, David Nourse (captain), Benjamin Sawyer, William Sawyer, Jonas Welsh, John Whitcomb (colonel), Israel Woodbury.

"The Men that I was called to pay money to in May, 1777 (not signed or dated, but in Capt. Nourse's handwriting): Amos Meriam, Abijah Pratt, Joshua Johnson, David Rice, Samuel Rice, Nathan Jones, Isaiah Coolidge, Isaiah Bruce, Elijah Foster, Ammezia Knight, John Nurse, Jonathan Nurse, John Powers, Silas Howe, Silas Houghton, Barnabus Bayley, Samuel Stanhope, Jonathan Moore, Thomas Pollard, Thadeus Russell, Eleazer Johnson, Timothy Bailey, Hezekiah Gibbs, Jr., Jabez Fairbank, Nathan Johnson, Benjamin Bruce, Joshua Heminway, Samuel Jones, Jr., James Townsend, Jonathan Meriam, David Rice, Fortunatus Barnes, James Fife, Jr."

"Jos. How and Eliakim Atherton received £30, lawful money, for negro servant named York, enlisted and passed before James Barrot, of Concord, for three years in Capt. Ashley's company in Col. Badeson's regiment, Continental army—said York to do a turn for Bolton in Continental army. Waltham, May 2d, 1777."

THE WAR OF 1812 was unpopular in all this region. Few were willing to volunteer. There was, however, a draft made; and the result was that Mr. Elbridge Sawyer and Asa Houghton were drafted, and afterwards served several months as soldiers in one of the forts of Boston harbor.

WAR OF THE REBELLION.—Bolton responded promptly to the call for troops during the War of the Rebellion.

The following is a list of soldiers. Those marked with a star (\*) lost their lives:

*Thirteenth Regiment*, in which were those who first went out.—Ezekiel W. Choate, Ledra A. Cooledge, Silas A. Cooledge, Samuel M.

Haynes,<sup>1</sup> Edward A. Houghton, Francis M. Kimmens, Charles McQuil-  
lan, Enoch C. Pierce, sergeant; William A. Newhall, Nolla Nicholas,\*  
Henry Whitcomb, captain; John Thos. Whittier, orderly sergeant.

*Second Regiment.*—Henry Learned.

*Fifteenth Regiment.*—John Fahce, Thomas Hastings,\* Nelson Pratt,  
Thos. Sherwin, Jr. (captain of a company, but company disbanded; he  
went into Twenty-second as adjutant; teacher of Houghton School on  
breaking out of war), John S. Williams, afterwards in Fourth Cavalry;  
John Wood.

*Sixteenth Regiment.*—George A. Barnes, Albert C. Houghton,\* Oliver  
L. Nourse, sergeant.

*Nineteenth Regiment.*—William Stone, major.

*Twentieth Regiment.*—Thomas Whitman.\*

*Twenty-first Regiment.*—Willard A. Bowers, George E. Burgess, Charles  
R. Haven, James Kennedy, Luke Ollis\* (claimed and held by Lancaster,  
his name on Lancaster tablet).

*Twenty-second Regiment.*—George B. Cook,\* Charles A. Fry,\* Joseph  
S. Hildreth, Rufus H. Williams\* (claimed and held by Berlin, name on  
Berlin tablets).

*Twenty-third Regiment.*—Amos B. Jarvis.

*Thirty-second Regiment.*—Windsor H. Bigelow, assistant surgeon.

*Thirty-third Regiment.*—Edward L. Edes.\*

*Thirty-sixth Regiment.*—Henry H. Bartlett, Theodore H. Bartlett, Ed-  
win Barnes, Hiram P. Beane, Reuben Clapp, Ezra Crocker,\* Franklin  
Farnsworth,\* Andrew J. Houghton, Josiah Houghton,\* Walter Kenne-  
dy, John Lake, George H. Patrick, George F. Sawyer, Joseph H. Sawyer,<sup>2</sup>  
orderly sergeant; George H. Thomas, Asabel C. Wetherbee, Henry M.  
Wetherbee, Reuben L. Wetherbee, George S. Willis, Elijah H. Wood-  
bury.\*

*Thirty-eighth Regiment.*—George H. Stone.\*

*Forty-seventh Regiment.*—Burgess Taylor.

*Fifty-seventh Regiment.*—James J. McVey, George Willis.

*Fifth Regiment, Company I (Nine Months' Men).*—Edmund B. Bab-  
cock,<sup>3</sup> F. R. Bennet, George A. Corser,\*<sup>4</sup> James F. Despeau, Lynnan  
Gibbs, Wm. Gibbs, Amory S. Haynes,<sup>5</sup> James D. Hurlbut, James Jill-  
son, William H. Larabee, Charles B. Newton, captain; Francis M. New-  
ton,<sup>3</sup> Andrew L. Nourse, William D. Pierce, Andrew A. Powers,<sup>5</sup> lieu-  
tenant; John H. Sawyer,<sup>5</sup> sergeant; Isaac C. Stratton, Augustus H.  
Trowbridge, Charles H. White, Henry Wood, Henry A. Woodbury.

*Tenth Regiment, Company I (hundred days' men).*—Additional names:  
Joseph A. Bryant, Lyman B. Gates, Christopher C. M. Newton, Amos  
P. Powers, Stephen F. Smith.

*Nin's Battery.*—Francis Murphy.

*First Heavy Artillery.*—Edwin J. Brown, Charles F. Getchell, Edwin  
Kilburn Holt,\* Baldwin Houghton, Warren Houghton, Stephen H.  
Hunting,\* Charles W. Nourse, George W. Pratt, Eugene Smith, Francis  
H. Whitcomb, William W. Wheeler.

*Second Heavy Artillery.*—Abel James Collins,\* Edward E. Houghton,  
Charles B. Newton, George E. Sargent, Charles G. Wheeler.

*Third Cavalry, McGee's.*—Francis E. Howard.

*Fourth Cavalry.*—Besides names already mentioned, Waldo E. Kim-  
mens, Joseph L. Marston, Abner M. Nutting, William L. Osgood.

*Fifth Cavalry.*—Thornton Hayden,\* colored.

*Fifth Cavalry, Regular United States Army.*—John B. Stanley.

*Signal Service.*—George Edwin Woodbury, previously in First Cavalry,  
for Leominster.

*Provisional Guards.*—Ira A. Dutton.

Thomas Grassie, chaplain, with One Hundred and Eighth New York  
Volunteers; Reuben M. Whitcomb and Charles A. Wheelock, settlers,  
with the Thirty-sixth; Hall Davis, surgeon, Thirty-eighth United States  
Colored Troops, Ambrose Eames, Fifty-first Regiment, both physicians in  
Bolton after the war; Mary Eliz. Haynes, nurse in hospitals.

*Regular United States Navy.*—Robert T. Edes, assistant surgeon in  
Farragut's fleet at New Orleans, in the flag-ship "Black Hawk," Com.  
Porter, on the Mississippi, and passed assistant surgeon on the "Col-  
orado;" John Henry Hapgood, seaman, in the "North Carolina," the  
"Potomac" and the gunboat "Union."

*Volunteer Navy.*—Henry Rockwood, assistant surgeon with Farragut's  
fleet at Mobile, in the "Itasca," the "Monongahela" and the "Poca-  
hontas." After the war physician in Bolton.

John C. Haynes,\* Thirty-sixth; Luke Ollis,\* Twenty-first; claimed  
by Lancaster, and their names on Lancaster tablet. Charles Wood, Jr.,  
claimed by Harvard.

The memorial tablets erected in the town hall to  
the memory of deceased soldiers were dedicated on  
the evening of December 20, 1866, with appropriate  
observances. Solomon H. Howe, Esq., was president  
of the evening. Prayer was offered by Thomas T.  
Stone, D.D. Biographical notices read by R. S.  
Edes. An oration delivered by Dr. Geo. B. Loring.  
A poem, written by Amos W. Collins, was read by  
Addison G. Smith, teacher of the Houghton School.

THE PUBLIC LIBRARY was organized in 1856.

Bolton celebrated the centennial anniversary of  
American Independence July 4, 1876. The pro-  
ceedings were also in observance of the one hundred  
and thirty-eighth anniversary of the incorporation of  
the town. The address was delivered by Rev. Richard  
S. Edes. The services were held in the First Congre-  
gational Church.

The following is the financial statement of the town  
March 1, 1888:

State aid due town from Jan. 1, 1887, to Jan. 1, 1888...	\$288.00
" " " Jan. 1, 1888, to Mar. 1, 1888...	54.00
Military aid due town from Jan. 1, 1887, to Jan. 1, '88.	48.00
" " " " Jan. 1, 1888, to Mar. 1, '88.	16.00
Amount due from Houghton School Fund.....	2,108.43
" in collector's hands for 1885.....	77.97
" " " " 1887.....	256.46
" of H. H. school money in treasury.....	250.00
Cash in treasury.....	1,160.73
	\$4,259.59
Amount of 14 mortgage notes secured by real estate, Houghton Fund.....	\$11,750.00
Amount of Barry Fund.....	200.00
Interest due on Houghton School Fund.....	44.68
Interest accrued.....	179.86

We are indebted to Roswell Barrett, Esq., for in-  
formation.

## CHAPTER CXLVII.

### PHILLIPSTON.

THE town of Phillipston is located in the north-  
western part of the county and is bounded as follows:  
On the north by Royalston; east by Templeton; south  
by Petersham, and west by Petersham and Athol.

The precinct was incorporated February 15, 1774,  
and March 22d of the same year the first meeting  
was held, and the following officers elected:

Precinct Committee, Charles Baker, Ephraim Stock-  
well, Joseph White, Henry Sawtell and Samuel Tay-  
lor; Clerk, Charles Baker; Assessors, Charles Baker,  
John Wheeler and Simon Goddard; Treasurer, Jona-  
than Jones.

The little municipality remained a precinct until  
October 20, 1786, when it was incorporated as a town,  
receiving the name of "Gerry," in honor of Hon.

<sup>1</sup> Subsequently soldier from Berlin.

<sup>2</sup> Died a year or two after the war ended.

<sup>3</sup> Re-enlisted in Fourth Cavalry, sergeant.

<sup>4</sup> Re-enlisted in Second Heavy Artillery.

<sup>5</sup> Re-enlisted in hundred days' men.

Elbridge Gerry, a member of Congress from Massachusetts.

The first town-meeting was held January 16, 1787, and the following officers were chosen: Town Clerk, Charles Baker; Selectmen, Charles Baker, Joel Grout, Simon Goddard; Wardens, John Wheeler and Joseph White; Tithing-men, Jotham Bigelow and Ezra Hudson.

The town was formed from portions of Athol and Templeton. It retained the name of Gerry until 1814, when it was changed to Phillipston, in honor of Lieutenant-Governor William Phillips. This town was strong in its opposition to the War of 1812, and the Hon. Elbridge Gerry having incurred the ill will of the people in Gerry in consequence of his political action, a town-meeting was held January 18, 1814, and a petition sent to the General Court, asking that the name of the town might be changed. In this petition the policy of the government was called a "mad policy," and Mr. Gerry came in for a full share of denunciation. He was styled as one "who is reputedly hostile to the ministers and ordinances of religion." Furthermore, "they were never admirers of the moral or political character of the Gentleman whose name they bear;" "they were under no obligation to that Gentleman for any favor," and they asked that they might "be exonerated from the name." Ignatius Goulding was moderator of this town-meeting and Nahum Ward clerk.

The War of the Revolution found the precinct small in population, but generous in its support of the colonial cause. The following were in the service from this town:

Thomas Johnson, Jos. Fairbank, Jonathan Willington, Isaac Ball, Samuel Lamb, John Brigham, John Wheeler, Berzeliel Maynard, Enoch Sawtell, Moses Gray, Simon Goddard, Jotham Bigelow, Sam. Miner, Jno. Train, Reuben Cummings, John Shattuck, Benj. Jones, Ezra Hudson, Jos. Cummings, Joshua Whitcomb, Jonas Baker, Gardner Maynard, Noah Bates, Richard Sawtell, James Wheeler, Jos. White, Abel Grout, Thos. Drury, Jno. Bowker, Jno. Gates, Maltiah Eaton, Abner Sawyer, Thos. White, Stephen Smith, Asa Bowker, Chas. Baker, Jr., Silas Baker, Samuel Gray, Jno. Jones, Jonas Gibbs, Jos. Mixer, Moses Taylor, Henry Sawtell, Jos. Newton, Daniel Knight, Ithamer Bowker, Ephraim Shattuck, John Shattuck, Levi Baker, David Train, Samuel Taylor, Jr., Chas. Whitney, Ebenezer Duntton, Samuel Phillips, Jos. Cummings, Jr., Thaddeus Brown, Capt. Stockwell, John Colman, Silas Conant, Jos. Newton, Jr., Joshua Lamb, Abner Ward, Daniel Shattuck, Paul Church, Benj. White, Jr., Joel Grout, Benj. Jones, Moses Miner, David Holman, Jesse Stockwell, Gardner Maynard and others.

The Jones family was prominently identified with the early history of the town, James Jones being one of the original proprietors. Jonathan Jones, father of Nahum, settled here in 1770, and was a leading

man in the town. He died in 1803. Nahum Jones was also a leading citizen. He died in 1807.

Ithamar Ward was also a prominent and highly respected citizen. He was a son of Gen. Artemas Ward, of the Revolution. He came to the town in 1778, and remained here until his death, in 1828.

The town early manifested an interest in religious matters, and at a meeting held March 11, 1777, it was voted to raise ten pounds to be laid out in preaching, and also voted that preaching should be half at Capt. Baker's and half at Mr. Berzeliel Maynard's. May 27, 1778, a committee was chosen "to look out a convenient spot for to set a meeting-house on."

Enoch Sawtell gave the ground for the first meeting-house, and at a meeting held January 18, 1779, it was voted to build a meeting-house fifty feet long and forty feet wide, and six hundred dollars was voted for the purpose. March 8th of the same year it was voted to raise one hundred pounds for preaching, and in the following June two hundred pounds more were voted for the same purpose, but it was not until November 16, 1785, that a church was formed. This was the Congregational Church, and the first pastor was Rev. Ebenezer Tucker, ordained November 5, 1788. The meeting-house was remodeled in 1838.

The Methodists commenced holding meetings in this town in about 1830. A church was subsequently organized, and a building erected in 1849. The first minister was Rev. G. Brown.

In about 1833 the Independent Religious Universalist Society was organized, and preaching was continued for several years.

As early as 1790 the town took action in regard to schools, and in that year it was voted to build three school-houses and to raise £40 for school purposes.

Among the college graduates from Phillipston are mentioned,—John M. Cheney, Oliver P. Powers, Jeremiah L. Newton, Edward P. Baker, Frederick Sanderson, Julius Sanderson, W. H. Bowker and Artemas Z. Brown.

*The Phillips Public Library* was founded in 1860 through the liberality of Jonathan Phillips, of Boston, who bequeathed five thousand dollars. For this purpose Silas Starr also left a legacy to the town, consisting of twenty shares in the Elliot Bank of Boston and twenty shares in the Rollstone Bank of Fitchburg.

Upon the breaking out of the War of the Rebellion, Phillipston responded promptly to the call for troops, and during the war furnished sixty-eight men. Of this number, nine lost their lives in the service, and a monument has been erected to their memory bearing the following names: V. Piper, Twenty-first Massachusetts Regiment, Company A; Thomas H. Carruth, Fourteenth New Hampshire Regiment, Company A; J. H. Lamb, Fifty-third Massachusetts Regiment, Company H; C. M. Buxton, Thirty-sixth Massachusetts Regiment, Company H; J. M. Newton, Thirtieth Massachusetts Regi-

ment, Company E; J. Rich, Thirty-sixth Massachusetts Regiment, Company H; G. A. Martin, Twenty-seventh Massachusetts Regiment, Company B; D. Hare, Thirty-sixth Massachusetts Regiment, Company D; A. P. Searles, Thirtieth Massachusetts Regiment, Company D.

The first action of the town relative to the war was under date of May 2, 1861, when it was,—“*Resolved*, 1. That although our town is small in territory and population, . . . yet we will make every effort to raise volunteers, and will furnish to each volunteer being a citizen of Phillipston a suitable uniform, not exceeding in cost \$25.”

It was also voted to pay each volunteer enough in addition to amount paid by the government to make the sum of one dollar per day, and also to pay each volunteer fifty cents for every half day that they may drill under the authorities legally constituted for that purpose, etc. Two thousand dollars was voted for this purpose.

Other votes of the town for furnishing men and money show that the patriotic people of Phillipston were in the front rank among her sister towns in their efforts to crush out rebellion. Her record is an honorable one.

Among the men who have been prominently identified with the town in the present century may be mentioned Hon. Jason Goulding, son of Colonel Ignatius Goulding, Edward Powers, Courtland Sanderson and others. Jason Goulding was Senator in 1846 and 1847, and member of the Constitutional Convention in 1853.

Colonel Ignatius Goulding, mentioned above, was a prominent citizen and a manufacturer. In company with Samuel Damon, of Holden, he carried on the manufacture of cotton and woolen goods in the eastern part of the town.

Harris Lodge, F. & A. M., was removed from Athol to this town in 1811, and for several years meetings of the lodge were held here.

## CHAPTER CXLVIII.

### HUBBARDSTON.

*Settlement—The Pioneers—“Old Eph. Grimes”—Families in 1800.<sup>1</sup>*

THIS town was originally a part of Lancaster, and was first settled in 1737. The pioneer was Eleazer Brown, who came from Rutland with his family in 1737, and for nine years following was the only settler in the town. Sixty acres of land were given him on condition “that he or his heirs dwell and keep

a house thereon for the entertainment of travelers, for the space of seven years.” In the proprietors’ records, June, 1743, appears the following: “Whereas Eleazer Brown, for securing travellers from being lost in storms, was settled in the N. E. Quarter of Rutland, and has dwelt there for six years past, and has undergone considerable difficulty in so doing, therefore, voted, that for the encouragement of said Brown, Mr. John Caldwell be desired to purchase a good milch-cow for the use of said Brown, and notify said Brown thereof, and that he shall be paid therefor out of the proprietors’ stock.” In September of the same year, the record adds: “Mr. Caldwell informs that he is ready to deliver Mrs. Brown either of his own cows which she may choose, for sixteen pounds (old tenor), pursuant to the vote passed at our last meeting.” This shows human nature to have been the same among the early settlers as in some of their descendants. Mr. Caldwell improved the opportunity to make a good sale of one of his own cows, and Mrs. Brown appears as chief manager of the firm of Brown & Co., innholders.

From all we can gather, we judge that Mrs. Brown was well fitted for her pioneer life—hardy, resolute and masculine in character. Mr. Read, in his “History of Rutland,” says: “Mrs. Brown had the resolution and fortitude to remain in the settlement for several years after her husband’s death, before there was any other inhabitant, and for a number of years it was called ‘Widow Brown’s Farm.’ Mr. Brown used to take cattle from the lower towns in the summer season, let them run in the woods, yard and salt them. After his death Mrs. Brown would take her gun, mount her horse, and ride along the cattle-paths, if necessary pass over Ware River to Rutland, and, by the sound of a conch-bell, call the cattle together.” We have no account of there being children or any other person in her family, and infer that for several years she was sole inhabitant of the town. How she displayed herself as polite landlady will be best told in the substance of a story which comes to us by tradition. She sometimes had distinguished guests from Boston, and on one occasion, when several such gentlemen came to dine with her, she prepared the best dinner in her power. She was both cook and table waiter. They ate pudding first—which was the fashion till within sixty years—and one of them, more fastidious than the rest, wanted a clean plate for his meat. As she could not furnish another, she quickly took his aside, washed it, and returned it dripping to its place. Observing that he was not quite suited, she reached over his shoulder, took it again, wiped it with the bottom of her short gown and returned it once more. Not having seen this operation, her guest now relished his dinner, and those on the other side of the table who did see it did not describe the dish till dinner was over. If we are shocked by such rudeness, we must not forget that she was the smartest, the handsomest and the

<sup>1</sup> The writer is indebted to the “History of Hubbardston,” by Rev. J. M. Stowe, and to Horace Underwood, Esq., for valuable information, which has greatly lessened his labor in the preparation of this work.

most accomplished lady in town, the very *elite* of the place. And we are not sure but she possessed those elements of true politeness that, with the opportunities and the culture of modern ladies, would have made her their equal. It was her evident purpose to fulfill faithfully the conditions on which the grant of land was made; and this she did to the evident satisfaction of the proprietors, for in December, 1749, they declared that these conditions had been fully complied with, and confirmed the title of the land to the heirs of said Brown and their assigns forever.

It has always been said that Mr. Brown was killed by a deer, but all that is known about it is that on the 25th of November, 1746, he left his home to hunt in the woods. As he did not return, search was made for him, and on the 17th of January, fifty-three days after he left home, his dead body was found about three miles from home, near the Barre line. His gun stood by the side of a tree, and a large buck lay dead by his side. All else is conjecture. Of the death of Mrs. Brown there is no record. No stone marks her resting-place. The last mention of her is in the proprietors' records of December, 1749.

Whether the town was left without an inhabitant after her departure or decease we do not know, but there is no evidence that any one else came to live here before 1749. Probably one thing that prevented settlers from occupying these farms sooner was the fear of the Indians, who often disturbed the people of Rutland and other places near. As late as 1725 Capt. Brintnall was ordered to surround and protect with his company the meadows in Rutland, while the farmers gathered their hay. Then, as Barre and some of the other adjoining towns were previously settled, those who came from a distance would naturally locate where they would have nearer neighbors.

Molly Green, daughter of Israel Green, has always been reported to be the first child born in town. She died in 1826, supposed to be seventy-seven years old. If so, Mr. Green must have settled here as early as 1749. He lived on great farm No. 26. He was elected chairman of the first Board of Selectmen and Assessors. In 1770 he moved to Winchendon, that part of it now within the limits of Gardner. His four sons, who served in the Revolutionary War, were probably born here. His daughter, Susannah, became the second wife of Josiah Baldwin, another early settler, who moved from this town to Gardner. Many of their descendants are now living in Gardner.

Early in the settlement of the town, Charles Parmeter, Joseph Rist and Joseph Eveleth resided here.

Other early settlers were Charles Parmeter, Joseph Rist, Joseph Eveleth (who was the first one who united with the church after its formation, and was one of the first deacons), Joseph Grimes and four sons, one of whom was Ephraim Grimes, better known as "Old Eph Grimes," an eccentric character; Ben-

jamin Hoyt, Stephen Heald, Isaac Bellows, John Woods and Nathan Muzzey.

The following families were here prior to 1800: Elijah Adams, Medway, 1774; Issachar, brother of Elijah, Medway, 1778; Reuben, brother of Elijah, Medway, 1786; Philemon Adams, 1780; Ralph Adams, 1780; Simeon Allen, 1776; Ephraim Allen, Rutland, 1788; John Ames, Rutland, 1769; Jonathan, son of John, 1795; Thomas Atwood, 1783; Isaac Balcom, 1795; Josiah Baldwin, 1768; Andrew Barber, 1777; Samuel Bartlett, 1795; Isaac Bellows, Rutland, 1772; Amasa, son of Isaac, 1790; Asaph, son of Isaac, 1796; David Bennett, Princeton, 1789; Abner Benson, 1790; Hugh Blair, 1773; Elijah Boyden, 1775; David Boynton, 1767; Ebenezer Boynton, 1767; Caleb Boynton, 1774; Isaac Bridges, 1773; Hosea Brigham, 1782; Asa Brigham, 1791; Samuel Britton, 1774; Eleazer Brown, Rutland, 1737; Ebenezer Brown, Sutton, 1788; Oliver, son of Ebenezer, 1798; Asa Brown, Rutland, 1787; John Browning, Rutland, 1785; Jesse Burditt, Marlboro', 1775; Thomas Caryl, 1773; Jonathan Caryl, 1773; Joseph Caryl, 1773; Stephen Church, Rutland, 1774; Asa, brother of Stephen, Rutland, 1776; Ephraim, brother of Stephen, Rutland, 1782; Reuben Clapp, 1791; John Clark, Hopkinton, 1774; John, son of John, Hopkinton, 1774; William, son of John, 1776; Moses, son of John, 1778; Isaac, son of John, 1784; Joseph, son of John, 1784; Ezra, son of John, 179-; Luther, son of John, Jr., 17-; John, son of John, Jr., 179-; Oliver, son of John, Jr., 1798; Ephraim, brother of John, Hopkinton, 1782; Samuel, brother of John, Hopkinton, 1796; Ely Clark, Barre, 1770; Benjamin Clark, 1782; Anthony Clark, Rutland, 1768; Peter, son of Anthony, 1788; Amos, son of Anthony, 1789; Jonathan Clifford, Southboro', 1778; Robert Converse, 1767; Abraham Cutting, 1795; Israel Asahel Davis, Holden, 1793; Asahel Davis, 1776; Davis, 1792; Bela Davis, 1777; David Davis, 1790; Oliver Davis, 1781; Benjamin Davis, Holden, 1798; Joel Earle, Leicester, 1783; Joseph Eveleth, Princeton, 1770; David, son of Joseph, 1790; Oliver Fairbanks, 1777; John H. Falis, Germany, 1785; Stephen Farrington, 1773; Elijah Farrington, 1773; William Follett, Attleboro', 1766; Samuel Follett, Attleboro', 1775; Stephen Frost, Rutland, 1794; Daniel Gage, 1778; Jonathan Gates, Rutland, 1770; Henry Gates, Framingham, 1787; Benjamin Gates, 1793; Abner Gay, Dedham, 1797; Bezaleel Gleason, 1790; Thomas Gleason, 1793; Clark Gleason, 1797; Seth Gleason, 1787; Peter Goodnough, 1773; Isaac Goodspeed, Barnstable, 1782; Isaac, son of Isaac, Barnstable, 1782; Luther, son of Isaac, Barnstable, 1794; Heman, son of Isaac, Barnstable, 1793; Elijah, son of Isaac, Barnstable, 1793; Israel Green, 1749; Joseph Green, Lexington, 1773; Abijah Greenwood, Holden, 1770; Moses, brother of Abijah, Holden, 1770; Levi, brother of Abijah, Holden, 1770; Joseph Grimes, Tewkesbury, 1761; Bill, son of Joseph, Tewksbury, 1767; Joseph, son of Joseph, Tewksbury,

1771; Ephraim, son of Joseph, Tewksbury, 1791; Calvin Hale, Leominster, 1788; Luther Hale, Leominster, 1788; Thomas Hapgood, Shrewsbury, Vt., 1795; Caleb Harrington, 1771; Abel Harrington, 1782; Ephraim Harrington, 1789; Stephen Heald, Rutland, 1762; Timothy, son of Stephen, 1785; Howard Hinds, Barre, 1778; Cornelius, brother of Howard, Barre, 1789; Eli, son of Cornelius, 1789; Nathan Holden, 1781; Ephraim Holt, Holden, 1797; Jonathan How, 1771; Daniel How (d. 1776), 1775; Israel How, Sudbury, 1770; Buckley, brother of Israel, Sudbury, 1770; Micah Howe, Rutland, 1781; Daniel How (d. 1810), 1799; Benjamin Hoyt, Rutland, 1767; Francis, son of Benjamin, Rutland, 1774; Asa, son of Benjamin, Rutland, 1776; Alexander Hunting, Marlboro', 1795; Stephen Hunting, Needham, 1779; William, son of Stephen, Needham, 1779; Stephen, son of Stephen, Needham, 1790; Converse, son of Stephen, Needham, 1788; Moses, son of Stephen, Needham, 1792; John Jones, 1778; Silas Jones, 1788; Ebenezer Joslin, Marlboro', 1770; William, son of Ebenezer, 1797; Silas, son of Ebenezer, 1789; Daniel Kinsman, 1770; Samuel, son of Daniel, 1793; James Lamb, Spencer, 1796; James Lake, 1790; John LeBourveau, 1767; Joseph Lovewell, Needham, 1798; Bezaleel Lyon, Barre, 1771; Asa, son of Bezaleel, 1799; Ebenezer Mann, Wrentham, 1777; William Marean, Barre, 1768; Timothy P., son of William, 1797; Paul, Matthews, 1787; John W. McClenathan, Rutland, 1774; Israel Mead, 1768; John Mead, 1768; Levi Mead, 1768; David Merriam, Westminster, 1782; Asa Metcalf, Wrentham, 1758; George Metcalf, Wrentham, 1768; Phineas G. Miller, 1790; Paul Mirick, 1790; John Morse, 1768; Samuel Morse, Medfield, 1782; Samuel, son of Samuel, 1785; William son of Samuel, 1791; Alpheus Morse, Marlboro', 1775; Robert Murdock, Newton, 1776; Abiel, brother of Robert, Brookfield, 1791; Joshua Murdock, Newton, 1790; William Muzzy, Lexington, 1773; Timothy Newton, Shrewsbury, 1766; Joel, son of Timothy, 1793; Timothy, son of Timothy, 1799; Jonas Newton, 1785; Josiah Newton, 1797; John E. Newton, 1789; Joseph Newton, Northboro', 1777; Ebenezer, son of Joseph, 1798; Jonathan Nichols, Athens, Vt., 1780; William Nightingale, 1771; William, son of William, 1788; Nehemiah Parker, 1768; Thomas H., son of Nehemiah, 1799; Hollis Parker, 1774; Levi Parker, 1786; Amos Parker, Shrewsbury, 1781; Daniel Parkhurst, 1782; Charles Parmenter, Rutland, 1767; Levi, son of Charles, 1792; Joseph Parmenter, 1774; Thomas Pierce, 1778; Moses H., son of Thomas, 1792; Eliab Pierce, Chester, 1789; John Phelps, Rutland, —; Moses, son of John, Rutland, 1776; Joshua Phillips, Smithfield, R. I., 1764; James, son of Joshua, Smithfield, R. I., 1767; Richard, son of Joshua, Smithfield, R. I., 1779; Gideon, son of Joshua, Smithfield, R. I., 1786; Joel Pollard, Rut-

land, 1770; Ezra Pond, Wrentham, 1768; Levi, son of Ezra, 1785; Joseph, son of Ezra, 1778; James Potter, Holden, 1787; Josiah Procter, 1778; Edward Rice, Rutland, 1767; Ephraim Rice, Holden, 1766; Silas Rice, Holden, 1775; Ebenezer Rice, Holden, 1784; Edmond Rice, Marlboro', 1782; Abel Rice, Barre, 1791; Job Richardson, 1788; Solomon Rolph, Princeton, 1782; Thomas Sargent, Leicester, 1773; Samuel, son of Thomas, Leicester, 1774; John, son of Thomas, Leicester, 1776; Ebenezer, son of Thomas, Leicester, 1785; John, son of John, 1797; Edward Selfridge, Rutland, 1788; Joseph Shattuck, 1772; David Slarrow, Rutland, 1767; Samuel Slocumb, Medway, 1779; James, son of Samuel, 1786; Peleg, son of Samuel, 1797; John Smith, 1774; Jonathan W. Smith, Boylston, 1782; Elisha Snell, 1779; Samuel Spring, Newton, 1785; John Spring, 1790; Nathan Stone, Rutland, 1768; Jeduthan, son of Nathan, 1790; William Stone, Watertown, 1774; Ebenezer Stowe, Concord, 1796; Joseph Taor, 1799; Joseph Tame, 1785; Abel Tenney, Northboro', 1778; James Thompson, Holden, 1773; Samuel Thompson, Holden, 1791; Timothy Underwood, Holliston, 1771; Israel Underwood, Princeton, 1770; Nathaniel Upham, Leicester, 1776; Calvin, son of Nathaniel, 1797; Nathaniel Waite, Leicester, 1766; Nathaniel, son of Nathaniel, 1792; Jacob, son of Nathaniel, 1797; Joseph Waite, Marlboro', 1782; Benjamin Warren, 1774; Ebenezer Warren, Rutland, 1781; Luke Warren, Northboro', 1798; Adam Wheeler, Rutland, 1766; Silas, son of Adam, 1786; Asa, son of Adam, 1791; Stephen Wheelock, 1781; John Whipple, 1781; Isaac Whittemore, N. H., 1797; Oliver Wight, 1793; Joshua Williard, Winchendon, 1785; John Williams, Lancaster, 1783; Jude, brother of John, Lancaster, 1783; David Winch, 1770; Zenas Winslow, 1793; Oliver Witt, Paxton, 1787; Daniel, son of Oliver, Paxton, 1788; Oliver, son of Oliver, Paxton, —; John Woods, Marlboro', 1771; Edward, son of John, 1795; Elisha Woodward, Newton, 1774; Daniel Woodward, Newton, 1776; Plilemon Woodward, Newton, 1776; Joseph Wright, Woburn, 1773.

## CHAPTER CXLIX.

### HUBBARDSTON—(Continued.)

*Petition for Incorporation—Act of Incorporation—First Town-Meeting—Officers Elected—Various Votes.*

THE petition for an incorporation of Hubbardston was under date of January 28, 1767, and in the following June the territory was incorporated as a district. The following is a copy of the act of incorporation:

## ANNO REGNI REGIS GEORGII TERTII SEPTIMO.

*An Act for Incorporating the north East Quarter of the Township of Rutland, in the County of Worcester into a District By the Name of Hubbardston.*

Whereas the Inhabitants of the north-east Quarter of the Township of Rutland, in the County of Worcester Labour under Many and great Difficulties, By Reason of their not Being Erected into a Distinct and Separate District, wherefore

Be it Enacted By the Governor, Council and the House of Representatives, that the Said north-east Quarter of Rutland, as hereafter Described, viz. :

Bounded Southerly on the town of Rutland, Easterly on Princetown, Northerly on Templeton, and Westerly on Rutland District, Be, and is hereby Incorporated into a District By the name of Hubbardston, and that the Said District Be, and hereby is Invested with all the powers, privileges and Immunities that towns in this Province By Law Do or May Enjoy, that of Sending a Representative To the General Court only Excepted, and that the Inhabitants of Said District Shall have Liberty, from time to time, to join with the Town of Rutland in Chusing a Representative, and Shall Be Notified By the Selectmen of Said Town of Rutland of the time and place of Election By Giving Seasonable notice to the Clerk of Said District for the time Being of the time and place of the Said Meeting, to the end that the Said District may join them therein, and the Clerk of Said District Shall Set up in Some public place in Said District a Notification thereof, accordingly, which Representative may Be Chosen Indifferently from Said Town or District, the pay and allowance of Such Representative to be Borne By Said Town and District, in proportion as they Shall, from time to time, pay to the province Tax.

Provided, Nevertheless, and be it further Enacted, that the Said District Shall pay their proportion of all Town, County and province Taxes, already Set on, or Granted to Be Raised By the Town of Rutland in Like Manner, as if this act had not Been Made.

And Be it further Enacted, that there Be Laid a Tax of one penny per acre upon all the Lands Lying in Said District for one year only to Enable the Inhabitants of Said District to Make and Repair Roads.

And Be it further Enacted, that John Murray, Esq., of Said Rutland, Be, and hereby is Directed and Impowered to issue his warrant Directed to some principal Inhabitant within Said District Requiring him to warn the Inhabitants of Said District qualified to vote in towns affairs to assemble at Some Suitable time and place in Said District to chuse all Such officers as are necessary to Manage the affairs of Said District.

And Be it further Enacted that the Town Clerk of the town of Rutland Before the first Meeting of the Said District of Hubbardston Shall Deliver to Said John Murray, Esq., Copies of the Last List of Valuations of the Real and personal Estates of the Inhabitants of said District of Hubbardston in order to Determine the qualifications of Voters at Said Meeting, and that the Inhabitants who Shall appear by Said Lists to be Voters according to Law Shall Be allowed to vote.

1767, June 12th, Passed By the Representatives to be Enacted.

June 12th, Passed By the Council to be Enacted.

June 13th, Signed By the Governor.

Exam'd A. OLIVER, Sec'y.

In accordance with the above act, John Murray, Esq., issued his warrant June 25, 1767, directed to Edward Rice, a principal inhabitant of the district for a meeting for the choice of all necessary officers. This meeting was held on the 3d day of July following, at the house of Edward Rice, and the following officers were chosen : John Murray, moderator ; Israel Green, Benjamin Nurse, Benjamin Hoyt, selectmen and assessors ; Nathaniel Upham, Stephen Heald, William Pain, surveyors of highways ; David Slarrow, Ebenezer Boynton, Robert Converse, fence-viewers ; David Slarrow, sealer of weights and measures ; Robert Converse, field-driver ; Timothy Newton, hog-reeve ; William Follett, Adam Wheeler, deer-reeves ; John Lebourveau, clerk ; Ezekiel Newton, treasurer ; Joseph Grimes, constable ; Nathaniel Upham, warden ; Ephraim Rice, tithing-man ; Joseph Grimes, sealer of boards and shingles.

This place was never incorporated as a town, but became such by a general act of the Legislature, passed March 23, 1786, by which all places incorporated as districts before January 1, 1777, were declared "to be towns to every intent and purpose whatever."

1767. "Voted to procure a plain of the town."

"Voted to choose a committee to collect the penny text."

1768. "Voted to allow Benj. Nurs 3s. for making the rats (rates) of the town."

"Voted to pay Adam Wheeler for Bording ye Rev. Nehemiah Parker Four Sabbaths 6s. 8d."

"For bording ye Rev. Nehemiah Parker from April ye 1, 1770, to June ye 13 following, 13s. 4d."

December, 1775. "Voted to pay W<sup>m</sup>. Muzzy for attending Provincial Congress thirteen days, and expenses, 1£ 5s. 7d." (about fifty cents a day.)

1779. "Voted to choose a committee to prevent monopolizing, agreeably to act of General Court." Which we understand to mean to prevent speculation in the sale of provisions and other necessities of life, by fixing the prices of those articles. This the towns were authorized to do once in three months, by the act referred to above.

September 30, 1776. One article in the town-meeting warrant was, "To see if it be the mind of the town that John Woolson, Esq., should set up a hospital for inoculating the small pox, according to the order of the Court of General Sessions of the peace of the county." "Passed in the negative."

October 12, 1796. "Voted to allow Dr. C. Wilson and Dr. Reuben Walker to inoculate for the small pox."

March 1797. "Voted not to have a pest-house."

## CHAPTER CL.

## HUBBARDSTON—(Continued.)

## WAR OF THE REVOLUTION.

*Response to Circular from Boston—Committee of Correspondence—Votes—Bunker Hill—Bounties—Depreciation of Currency—Names of Soldiers.*

THE first act of the town in relation to the Revolution was under date of December 30, 1772, when a meeting was called and a committee appointed, with John Woods as chairman, to prepare an answer to the circular from Boston, calling for an expression of opinion upon public affairs, January 20, 1773 ; this reported as follows :

1ly. We are of opinion that Rulers first Derive their Power from the Ruled by Certain Laws and Ruls agreed upon by Ruler and Ruled, and when a Ruler Breaks over Such Laws and Rules as agreed to by Ruler and Ruled, and makes new ones, that then the Ruled have a Right to Refuse Such new Laws, and that the Ruled have a Right to Judge for themselves when Rulers Transgress.

2ly. We think the Parliament of Great Britton have Taxed us Contrary to our Charter Right, they have made our governor independent of the people by appointing him a Salary from home, and the Judges of the Superior Court, we hear, have a Salary appointed from home, and have reason to believe it, which appears to us so big with Slavery that we think it enough to arouse Every Individual (that has any Ideas of arbitrary Power above the Brutal Creation) to use his utmost endeavors in a lawful way to Seek Redress for our Injured Rights and Privileges.

3ly. We think we ought immediately, vigorously and unanimously, to exert our Selves in the most firm, but most peaceable manner, for obtaining Relief. The Cause of liberty is a cause of too much dignity to be Sullied by Turbulence and Tumult. It ought to be maintained in a manner suitable to her Nature; those who engage in it should breathe a Sedate yet Fervent spirit animating us to actions of Justice and Bravery; a free people Cant be too Quick in observing, nor too firm in opposing the beginnings of alterations in a Constitution.

Signed,

Committee-Men	{	JOHN WOODS,	JOSEPH SLARROW,
	{	GEORGE METCALF,	JOSEPH EVELETH,
	{	EZEKIEL NEWTON,	NATHANIEL UPHAM,
	{	WILLIAM MAREAN,	EZRA POND,
		STEPHEN HEALD.	

The record continues :—

After being Twice Read the vote was called for and passed in the affirmative.

Voted to put this Draught on the Town Book of Records. Voted the Clerk Transmit a Copy of the Proceedings of the District of Hubbards-ton to the Selectmen of the Town of Boston.

Atts. JOHN WOODS, *District Clerk.*

Atts. GEORGE METCALF, *Moderator.*

The first Committee of Correspondence, chosen August 22; 1774, consisted of William Muzzy, John Woods, Stephen Heald, Joseph Eveleth and John Clark. Two years later Joseph Shattuck and William Stone were added to this committee. September 23d they voted to send John Clark to represent them in a convention to be held at Concord, in the month of October following.

December 24, 1774, the following article was considered: "To see if the District will Chuse one person to represent them in the Provential Congress to set the first of February next, at Cambridge, and to be Dissolved the Tuesday before the last Wednesday in May, 1775, and to give him Such Instructions as they Think proper."

The following is the copy of another article and the action thereon: "Art. 6. To see if the District will Chuse a com<sup>tee</sup> to Draw up a Covenant for the Inhabitants to sign, in order to put in force the Resolves of the Continental Congress."

The Com<sup>tee</sup> that was Chose agreeably to the Sixth Article at the adjournment, presented the Association Drawed up by the Continental Congress, with the additional Resolve of the provential Congress, that is, not to by any thing that is Imported from Great Britton after the first of October Next, let it be Imported when it would, it being put to Vote and voted in the affirmative.

March 7, 1775, voted "To make void the Worcester Covenant signed last fall."

In March, 1775, the town voted to raise thirty minute-men, and if they should be called out they were to have two dollars bounty when they should march. Some of these men were called out at the time of the Lexington massacre, which so soon followed.

On the 14th of June, 1776, a meeting was held "to

see if it be the minds of the Town that Continental Congress should Declare Independence of the Colonies to Great Britain, and whether the Town will stand by the above said Congress in So Doing."

The Question being put whether it be the minds of this Town that the Hon. Continental Congress should declare the Colonies Independent of Great Britain, it passed unanimously in the Affirmative,—then voted, Should the Hon. Congress Declare the Colonies Independent of Great Britain, as above Said, we, the Said Town, Solemnly Engage with our Lives and fortunes to Support them in the measures.

This action was taken in response to the General Court, which body had assured Congress of the support of the people of this Colony. The question was sent out for each town to act upon individually, and thus this town was enabled to record its Declaration of Independence nearly three weeks before it was declared by the Continental Congress.

We are unable to learn the names of all the men who first enlisted in the Continental Army, or to what extent they were in active service. But to a call that was made before the battle of Bunker Hill, thirty men responded, one of the first of whom was Isaac Bellows. Other prominent men soon followed.

In the engagement at Bunker Hill, Henry Gates received a wound in the face, by which he was so disfigured that he was afterwards known as "Twist-mouth Gates."

In February, 1777, the town voted to send two delegates, John Woods and John Clark, to a convention to be held in Worcester, agreeably to a call from the town of Sutton, to form a County Congress.

At this period large sums of money were needed to meet public expenses, which were voted and assessed upon the inhabitants, and the tax-bills committed to the collectors, but nearly one-tenth part of the people were totally unable to pay, and long lists of taxes were abated every year. The treasury was without funds, and the selectmen were obliged to borrow from abroad, whenever they could do so, on the credit of the town. So great were their burdens that the minute-men, to whom had been promised two dollars bounty, were not paid till nearly three years after they were called out, although in January, 1776, the selectmen were directed to give them orders upon the treasury for their money. March 2, 1778, we find the following record: "2ly. Paid to the minute-men that marcht after Lexington fite, Israel Skinner, Joseph Shattuck, Abijah Greenwood, Asa Hoyt, Hugh Blair, Joseph Write, Stephen Farrington, John Ames, Isaac Bellows, Joseph Caryl, Asa Metcalf, Daniel Kinsman, Stephen Church, Silas Rice, Nathan Stone, Bezaleel Lyon, Enoch Devenport, Seventeen in Number, at Twelve Shillings each man. — — — — — 10£ — 4s — 0d."

There is no evidence that the thirteen others of the thirty were called out at that time, and the probability is that those who went found they were not needed then and returned.

When it became evident that the war must con-

tinue for a long time, calls were made for men to enlist for three years; then larger bounties were required. On the 11th of May, 1778, a meeting was called to see what bounty the town would give to the men who were then to be raised. Voted "To give 30 pounds to each man. Then voted to adjourn the meeting to Moses Clark's, Inholder's, to seven o'clock this day, and there the meeting Died a natural death." Very likely the reason for such a record is that they did not succeed in getting the men to volunteer, for on the 25th of the same month another meeting was held, at which they voted to raise three Continental men, and also voted that the men who should be called into the service in the future should be hired, and the town taxed for the same. Then adjourned to seven o'clock, when it was voted to give a bounty of one hundred and forty pounds to each of the three men. At an adjourned meeting, on the next Wednesday, this vote was reconsidered, and one hundred pounds was voted, "and no more," and a committee was chosen to hire the men, and borrow the money. Then adjourned to June 5th. But probably this committee did not find it easy to get either the men or the money, for June 5th they reconsidered the last vote, and voted one hundred and twenty pounds. Then adjourned to June 15th, when they voted to raise eight hundred pounds, to be assessed on the town, to hire men as needed. These records indicate that they were in straits in regard to those calls for men. At the meeting May 25th it was voted "To make an Everidge of what has been Done by the Inhabitants of the Town Since the Continental men have been Raised—then voted to Chuse a Com<sup>tee</sup> of five men to make an Everidge, then voted John Woods, Thomas Sergeant, Joseph Eveleth, Ezra Pond, Capt. John Clark, be a Com<sup>tee</sup> for the above said purpose to make ye Everidge and hire men into ye service."

This committee made their report in August of the same year, which was not accepted. But on the 15th of October their report was adopted in substance, and is inserted here because it shows in what kind of service the men from this town had been engaged.

"2ly. Voted six pounds p<sup>r</sup> month for the two months to Rhode Island, May and June 1777—then voted Ten pounds p<sup>r</sup> month for the men that went to Bennington, gon five weeks July 20th then voted fifteen Shillings p<sup>r</sup> Day to the men that went over ye Mountain on horseback—then Voted Twenty pounds for the Three months' Service Sept. 2<sup>d</sup>—then Voted Ten pounds p<sup>r</sup> man that went for thirty Days to Take Gen<sup>l</sup>. Burgoyne—then Voted Twenty pounds p<sup>r</sup> man that went for three months under Capt. Marean to gard Burgoynes men to Cambridge—then Voted four pounds p<sup>r</sup> month for ye Six months Service at ye Barracks in Rutland—then Voted three pounds p<sup>r</sup> month for the Turn to Brookfield to Keep Stores—then Voted Twelve Shillings p<sup>r</sup> Day for ye twenty Days' men that went with Leut Muzzy."

It is probable these sums were for special service rendered by men who were not soldiers, and who had gone without any bounty stipulated by the town. At the same meeting they also voted "To chuse a Com<sup>tee</sup> whose business Shall be (when there is orders comes for men) to Set the price they will give for men to go that turn if men will Turn out and go for said price then to hire them if they will turn out, then to Draft ye highest payers, and to Draft in proposion to what a man possesses."

October 26, 1778, the town voted to exempt several men from paying taxes, for bounties, because they had hired men for the army, and also voted to give credit to all those who had done more than their part. In June, 1780, four men—Ezekiel Pond, Thos. Durant and William and Timothy Nightingale—were hired for the army, and the sum of ten thousand pounds was raised to aid them and others who might be called for. Then voted "To give ten dollars per month, the old way, to the militia men who enlisted for six months, to be stated in Rye, Indian Corn, Beef, and Sole Leather, and also voted to add \$500 in paper to each of the militia now hired." And those who enlisted for three years or for the war were to have "twenty head of three years old cattle, Heifers and Steers, of average value."<sup>1</sup> This was done because the currency had so far depreciated that they found it difficult to fix upon any definite sums. Up to this time the several quotas had been filled without a draft. But the summer of 1781 was probably the darkest in the whole history of the town. Calls for men had been so often made that probably nearly three-fourths of all who were fit for soldiers had been or were then in the service. There seemed to be no men who could be spared and their means had become almost exhausted in paying the war taxes. Every measure was resorted to which offered any hope of escaping a draft. April 30, 1781, they voted "To divide the town into two parts by the Templeton and Rutland road, and each part shall furnish a man for the army for three years." Whether these men were raised does not appear, but it is evident that they failed to furnish all the men called for, as the order soon came to Captain Slocomb, commander of the militia, for a draft. The selectmen and militia officers made every possible effort to obtain the men, but failed. Another town-meeting was called, the 2d of July, to decide what measures should be adopted. They then chose a committee to consult as to the best means to be adopted. After conferring together for an hour, they reported that in their opinion it was best to "class the town." This report was accepted, and it was voted "To class the town into four classes." Then voted "That Capt. Slocomb

<sup>1</sup> The following record shows the value of stock as estimated December 19, 1777: Voted "That a yoke of oxen five or six years old that measure six foot be Set at 13£ and all other cattle in proportion. Voted a good horse five years old at 12£ and all others in proportion. Voted Store Sheep at 6s. Voted Swine one year old at one pound and all others in proportion."

postpone the draft till next Monday, and the town clear him of all damage in so doing." All their efforts were fruitless, and when they came together on Monday it was voted "That Capt. Slocomb draft for six months into the Continental Army." The names of the drafted men are not recorded.

On the 16th of the same month a meeting was held "to see what bounties the town will give to the men that are detailed from the militia for six months, five months, and three months, into the service, and what means the town will adopt to furnish the men with spending money." Voted "To give the three months men nine pounds the old way, stated in beef and Indian corn." After an adjournment of two hours it was voted "That the treasurer give his security to the six months', five months' and three months' men, and that Lieut. Nathan Stone give his security to such of the men as choose it."

There is nothing in all the records that more clearly shows the exigencies of the times than this. All they attempted to do was to furnish spending money for the men, and to do this, required the assembled wisdom of the town. And the fact that they thought indemnity from Nathan Stone was better than from the town, as such, shows how low their credit had fallen. It is probable that only one other call for men was made. At the meeting held February 11, 1782, "to see if the town will raise the remainder of the men for the three years' service, and procure money for marching the same," it was voted "to accept of four men which Lieut. Jones, of Carlton, has offered at seventy-five pounds per man." Then voted "to set off to Lieut. Eli Clark, one-seventh part of the town to pay Levi Parmenter, as a soldier, to serve three years in the Continental Army." It is probable that the remainder of the men volunteered.

Occasionally an individual presented a claim for services in the army, which the town would not recognize. November 19, 1781, there was an article in a warrant for town-meeting "To see if the town will make any consideration to Oliver Fairbanks for the service he has Don in the army, extraordinary as he may make it appear." Voted "in the negative."

During all these years the families of soldiers were faithfully provided for at the expense of the town. They received no State aid, as in the War of the Rebellion. As early as 1777 a committee was appointed to provide for these families, and one hundred pounds raised for the purpose. Each succeeding year, during the war, some action was taken in relation to this matter, and several appropriations were made, but such was the state of the treasury that few of the bills were presented before 1782. A few specimens of these accounts are inserted here to show the names of some of the soldiers, and how their families were taken care of.

*Town of Hubbardston indebted to me for supplying the women whose husbands were in the service of the U. S. for 1778.*

Delivered to the wife of Asa Church five  $\frac{1}{2}$  Bushels of Indian corn, eight bushels of Rie 117lb. of fresh pork and 100lb of Beef.

Delivered to the wife of Israel mead Seven Bushels Indian corn four  $\frac{1}{2}$  Bushels Rie 38lb. cheese 83lb. Beef one pair Shoes half Bushel malt one peck salt five Bushels Potatoes.

Delivered to the wife of Andrew Barber two Bushels Indian Corn one Bushel Rie 7 $\frac{1}{2}$ lb. cheese which I delivered in behalf of the town, for which I now pray for allowance for the same.

WILLIAM MAREAN.

Hubbardston, October 8th, 1781.

"The above account was voted as it stands, without any price anext to s<sup>d</sup> articles."

At the same meeting it was voted to allow "Captain Adam Wheeler for getting three Beriels of Sider by the Desire of the Selectmen for Mr. Stephen Churchs wife, at 3s. per Beriel——9s. For transport of sd Sider from Rutland—— ———4s."

Besides the calls for men, as stated above, and the expense of providing for their families, frequent demands were made upon the town to furnish beef for the army. In 1780 the General Court sent an order for 3420 pounds. The town voted to comply with the request, and the currency had so far depreciated that they raised £5130 to pay for it, which would make the cost over seven dollars per pound. On the 1st of January, 1781, another committee was chosen to purchase beef, and £10,000 was raised to pay for it. This would make more than \$60,000 raised in less than a year, for the purchase of beef. In estimating the sacrifices of those times, we must remember that this money had cost them as much as good money costs in ordinary times. Several other calls were made for beef, and were met, and accounts were allowed for driving cattle to Rutland for the army. Some of the men who took these contracts for beef, and received pay in Continental money, were totally ruined. The currency continued so to depreciate in value that at one time the town voted to allow one silver dollar for seventy-five dollars paper-money. Then it decreased so that ninety dollars would pay only one dollar taxes, and finally the town voted not to receive any more paper-money. The following extract from an old memorandum-book of Captain John Woods will illustrate still further the worth of money at that time:—

For doing some writing (probably a deed).....	\$30 00
For flip (drank, perhaps, while doing it).....	8 00
For an almanac.....	6 00

One year the town voted to pay fifty dollars per day for work on the highways.

In 1782 a vote was passed to hear the report of Daniel Sumner in regard to the paper-money his son took of the town for his services in the army. The same year an article was inserted in the town-meeting warrant, "To see what the town will do with the old average tax that was to raise bounties for the men levied in 1777." Voted "All persons behind in s<sup>d</sup> average pay up." The same year it was also voted "To set off one-seventh part of the town to John Woods to pay Thomas Durant for three years' service in the army." Also voted "To set off one-seventh to Abijah Greenwood to pay Caleb Newton for three years' service in the army." That was the third

seventh of the town set off for this purpose. Just what is meant we do not know.

The following are the names of some of the Hubbardston men who served in the army in the War of the Revolution. Those whose names are in *italics* are known to have been in the army, but it is not known whether they were residents of this town at that time or came here after the war:

Elijah Adams.	Asa Metcalf.
Issachar Adams.	<i>Timothy Metcalf.</i>
Ephraim Allen.	<i>Samuel Morse.</i>
John Ames.	<i>John Moulton.</i>
Andrew Barber.	Robert Murdock.
Isaac Bellows.	<i>Joshua Murdock.</i>
Isaac Bellows, Jr.	William Muzzy.
David Bennett. <sup>1</sup>	William Nightingale.
Hugh Blair.	<i>Joseph Norcross.</i>
Thomas Brintnall.	Charles Parmenter.
Ebenezer Brown. <sup>2</sup>	Joseph Parmenter.
Joseph Caryl.	Levi Parmenter.
Asa Church.	Richard Phillips.
Stephen Church.	Joshua Phillips. <sup>4</sup>
Isaac Clark.	Gideon Phillips. <sup>4</sup>
William Clark.	Paine Phillips. <sup>4</sup>
Robert Converse.	Ezekiel Pond.
Enoch Davenport.	Ezra Pond.
Stephen Farrington.	Joseph Pond.
<i>Henry Gates.</i>	Silas Rice.
Abijah Greenwood.	Joseph Shattuck.
<i>Thomas Haggood.</i>	Israel Skinner.
Stephen Heald.	Jonathan W. Smith.
<i>Ephraim Holt.</i>	Nathan Stone.
Daniel How.	Nathaniel Upham.
Asa Hoyt.	<i>Joseph Waite.</i>
Converse Hunting. <sup>3</sup>	Nathaniel Waite.
Moses Hunting. <sup>3</sup>	Adam Wheeler.
Daniel Kiusman.	John Williams. <sup>5</sup>
Bezaleel Lyon.	Daniel Witt. <sup>6</sup>
Ebenezer Mann.	Daniel Woodward.
William Marean.	Joseph Wright.
Israel Mead.	

## CHAPTER CLI.

### HUBBARDSTON—(Continued.)

*Shays' Rebellion—War of 1812—War of the Rebellion—Amount expended by Town—Number of Men—Names of Soldiers.*

**SHAYS' REBELLION.**—It is not the writer's purpose to here enter into a detailed history of this outbreak, as it is fully treated elsewhere in this work. It is proper, however, to state that Hubbardston men were prominent in this movement. Among these were William Muzzy, John Woods, Elisha Woodward, Joseph Weight and Captain Adam Wheeler. Captain Wheeler ranked next to Daniel Shays in position, and was a leading citizen of the town. He served in the French and Indian War, and was a brave officer in the War of the Revolution, displaying much heroism in the battle of Bunker Hill. He raised and commanded a company of nearly a hun-

dred men, mostly from this town, in the interests of Shays' Rebellion. Early in September, 1786, with eighty men, he marched to Worcester, and took possession of the court-house.<sup>7</sup>

He finally fled to Canada, and remained there four years, till a proclamation of amnesty was issued by the Governor. In 1791 we find the following record:

Art. 2. To see if the town will grant the petition of Adam Wheeler, which is as follows, viz.: The petition of Adam Wheeler to the town of Hubbardston. Humbly sheweth that your said petitioner was at Pelham about four years ago, in the unhappy disturbance that happened in this county; and that Dr. Hinds has commenced an action against me which is gone to execution, which is not in my power to discharge. Gentlemen, friends, fellow-citizens and neighbors; your petitioner prays for help to discharge said debt and cost, which is £9 4s. 9d., and your petitioner as in duty bound will ever pray. ADAM WHEELER.

Voted that the selectmen settle the debt of Capt. Wheeler, in the best and easiest manner possible.

Hubbardston's citizens took an active part in this rebellion, probably for the reason that they were poorer than other towns and their misfortunes greater.

**WAR OF 1812.**—The people of Hubbardston were probably not in sympathy with this war. Men did not volunteer, and at one time a draft was made.

In November, 1814, they voted "To make up the sum of \$18 per month, with what the Government allows, to those soldiers who had been detached into the service, viz.: Otis Hale, Lowell Leland, Asa Lyon, Daniel Thompson and Bildad Wright." These are the names of all that appear in the records as having served in the army during this war, though we know that others went.

At the time the draft was ordered the men liable to do military duty were organized in two companies. These companies were called out, meeting at the old meeting-house, which was the headquarters of the town, in almost all respects. Plenty of grog was distributed among them, and when they had "well drunk" earnest appeals were made to them to volunteer. The fife and drum struck up stirring strains, and the men marched in double file through the aisles of the meeting-house, and any who were willing to volunteer were requested to fall into a certain pew. Only one or two could be found to go, and the remainder of the quota was raised by draft. These men were ordered to Fort Warren, in Boston harbor, and guard duty was probably the only service they rendered. Some others, who were afterwards citizens of this town, or who enlisted from other places, were in the service. Abijah Clark, going from Rhode Island, was out a few months; Luther Goodspeed was in some of the most bloody battles of the war. He was with Com. McDonough at Plattsburgh and Lake Champlain.

**WAR OF THE REBELLION.**—Hubbardston promptly responded to the call for troops, and was represented in the first regiment that went from the State.

The town expended eight thousand six hundred and twenty-five dollars for bounties, and two thousand

<sup>1</sup> Went from Princeton.

<sup>2</sup> Went from Sutton.

<sup>3</sup> Went from Needham.

<sup>4</sup> Went from Rutland.

<sup>5</sup> Went from Lancaster.

<sup>6</sup> Went from Paxton.

<sup>7</sup> See History of Worcester.

four hundred and five dollars was raised by private subscription.

*List of Soldiers.*—The following is a list of soldiers from the town :

- Calvin Allen, enl. Sept. 3, 1862, in 53d Regt., Co. H ; died Aug. 14, 1863, transport "St. Mary's," on the way home.
- George Allen, enl. July 26, 1862, in 25th Regt., Co. G ; disch. Aug. 20, 1864 ; wounded.
- Prentiss J. Banks, enl. July 19, 1861, in 21st Regt., Co. K ; trans. to 36th Regt., Co. K, Jan. 2, 1864 ; died Feb. 11, 1865.
- Francis Barnes, enl. Oct. 8, 1861, in 25th Regt., Co. I ; disch. Oct. 20, 1864, expiration of service.
- George H. Barnes, enl. Aug. 11, 1862, in 25th Regt., Co. I ; killed at battle of Cold Harbor June 3, 1864.
- Charles A. Bartlett, enl. May 18, 1861, in 12th Regt., Co. B ; killed May 8, 1864.
- George S. Bates, enl. Sept. 2, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863 ; corporal.
- George W. Blood, enl. Sept. 30, 1861, in 25th Regt., Co. I ; captured at Cold Harbor June 1, 1864 ; re-enl. Feb. 7, 1864, in 25th Regt., Co. I ; died in the hands of the enemy.
- Joseph W. Blood, enl. Aug. 4, 1862, in 25th Regt., Co. I ; disch. June 21, 1865, expiration of service.
- William A. Brizzee, enl. Aug. 4, 1862, in 27th Regt., Co. B ; disch. Sept. 20, 1864 ; wounded at Cold Harbor June 2, 1864.
- Welcome E. Brown, enl. May 16, 1861, in navy, ship "Brooklyn," re-enl. for 9 months, Aug. 15, 1862, in 46th Regt., Co. A ; re-enl. for 100 days ; July 9, 1864, in 8th Regt., Co. A ; disch. Nov. 11, 1864, expiration of service.
- Asa B. Browning, enl. Sept. 3, 1862, in 53d Regt., Co. H ; died Aug. 8, 1863, near mouth of Mississippi River on the way home.
- James Browning, enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863 ; corp. of Color Guard.
- Eli H. Butler, enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863 ; sergt. ; captured at Thibodeaux, La., in the summer of 1863, but at once paroled ; re-enl. summer of 1864 in 4th H. A. ; disch. June 17, 1865.
- Addison Childs, enl. July 30, 1862, in 25th Regt., Co. G ; disch. Oct. 20, 1864, expiration of service.
- Walter Childs, enl. July 30, 1862, in 25th Regt., Co. I ; disch. May 9, 1863, for disability.
- Eber F. Churchill, enl. May 25, 1861, in 2d Regt., Co. F ; died May 25, 1862, of wounds at Winchester, Va.
- Almond W. Clark, enl. July 30, 1862, in 25th Regt., Co. I ; died Sept. 17, 1862, of fever at Newbern, N. C.
- Alson W. Clark, enl. Sept. 21, 1861, in 25th Regt., Co. K ; corp. ; wounded at Drury's Bluff May 9, 1864 ; re-enl. Oct. 4, 1864, in 25th Regt., Co. K ; disch. July 13, 1865 ; died April 18, 1868.
- Asa G. Clark, enl. July 30, 1862, in 25th Regt., Co. I ; disch. May 9, 1863, for disability ; died March 20, 1870.
- Eli E. Clark, enl. Sept. 21, 1861, in 25th Regt., Co. K ; trans. to Co. C ; died at Andersonville prison Sept. 12, 1864.
- Alvin A. Cleveland, enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863, expiration of service.
- Josephus Clifford, Jr., enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863, expiration of service.
- Stephen T. Cole, enl. May 18, 1861, in 12th Regt., Co. B ; disch. Feb. 1, 1863, for disability ; re-enl. Jan. 27, 1864, in 4th Cav., Co. E ; disch. Nov. 14, 1865, expiration of service.
- Oliver B. Coleman, enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863 ; re-enl. in Frontier Cavalry and served on borders of Ca., Vt. and N. Y.
- Levi W. Conant, enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863 ; captured in the summer of '63 at Thibodeaux, La., but immediately paroled.
- Darius Coleman, enl. July 31, 1862, in 34th Regt., Co. C ; disch. Dec. 27, 1862, for disability.
- Myron W. Davis, enl. Sept. 17, 1861, in 25th Regt., Co. K ; disch. July 13, 1865 ; wounded at Cold Harbor, June 3, 1864.
- Leonard S. Day, enl. Sept. 22, 1862, in 53d Regt., Co. C ; disch. Sept. 2, 1863 ; died Oct. 7, 1863.
- John H. Devereaux, enl. Sept. 10, 1861, in 25th Regt., Co. K ; died of wounds at Petersburg, Va., July 22, 1864.
- James Earle, enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863 ; wounded at Donaldsonville, July 1863.
- John H. Eaton, enl. Dec. 10, 1863, in 25th Regt., Co. I.
- George W. Felton, enl. Dec. 10, 1863, in 4th Mass. Cav., Co. G ; disch. Nov. 14, 1865, expiration of service.
- Addison W. Fisk, enl. July 30, 1862, in 25th Regt., Co. I ; disch. Oct. 15, 1864, expiration of service.
- Joel S. Flagg, enl. Aug. 7, 1862, in 25th Regt., Co. I ; disch. Oct. 20, 1864 ; trans. to Co. G, Jan. 20, 1863.
- Levi Flagg, enl. Sept. 27, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863, died at Lunenburg, Sept. 8, 1863.
- Silas Flagg, enl. Aug. 7, 1862, in 25th Regt., Co. I ; wounded and captured at Drury's Bluff ; died in Libby Prison, June 16, 1864.
- Sumner Frost, enl. Sept. 20, 1861, in 25th Regt., Co. I ; disch. Oct. 20, 1864 ; captured at Drury's Bluff, May 16, 1864 ; paroled and died at Annapolis, Md., Dec. 28, 1864.
- Rev. Rodney Gage, chaplain at Washington.
- Irving C. Gates, enl. Oct. 10, 1861, in 11th Regt., Co. C ; disch. June 10, 1862, for disability.
- William Gates, enl. Sept. 3, 1862, in 53d Regt., Co. H ; died at Baton Rouge, La., April 18, 1863.
- A. Hobart Greenwood, enl. June 29, 1861, in 13th Regt., Co. D ; disch. Feb. 14, 1863 ; wounded at Antietam, Sept. 17, 1862 ; died at Alexandria, Va., Feb. 27, 1863.
- Chester Greenwood, enl. Feb. 25, 1864, in 25th Regt., Co. D ; disch. July 8, 1865 ; wounded June 3, '64, and March 10, '65.
- Edson A. Greenwood, enl. Sept. 3, 1862, in 53d Regt., Co. H ; disch. Sept. 2, 1863 ; died Sept. 28, 1863, after reaching home.
- George Greenwood, enl. Aug. 7, 1862, in 25th Regt., Co. I ; died May 10, '64, of wounds received at Point of Rocks, Va.
- Morrill A. Greenwood, enl. July 9, 1864, in 42d Regt., Co. G ; disch. Nov. 11, 1864, expiration of service.
- Thomas E. Greenwood, enl. May 7, 1862, in 25th Regt., Co. I ; disch. Oct. 20, 1864, expiration of service.
- Hobart L. Hale, enl. Sept. 3, 1862, in 53d Regt., Co. H ; died at Cleveland, O., Sept. 12, '63, on the way home.
- Seth P. H. Hale, enl. Jan. 4, 1864, in 4th Regt., Co. G ; disch. June 7, 1865, from the hospital.
- Charles O. Hallett, enl. May 25, 1861, in 2d Regt., Co. F ; sergeant ; re-enl. Dec. 30, 1863, in 55th Regt. ; promoted to 1st lieutenant March 20, 1864.
- Cyrus W. Hartwell, enl. Oct. 14, 1862, in 42d Regt., Co. K ; disch. Aug. 20, 1863, expiration of service.
- James Harty, 55th Regt.
- Samuel H. Hastings, enl. Sept. 3, 1862, in 53d Regt., Co. H ; died at Baton Rouge, July 23, 1863.
- T. Sibley Heald, enl. Sept. 24, 1861, in 25th Regt., Co. I ; disch. Oct. 20, 1864 ; 2d lieut. ; wounded in the face.
- Wm. H. Heald, enl. May 25, 1861, in 2d Regt., Co. F ; died at Baltimore, Dec. 17, 1861.
- James W. Herrick, enl. Sept. 30, 1861, in 25th Regt., Co. I ; disch. Dec. 1, 1863, to re-enl. ; promoted to corporal Sept. 6, '62 ; re-enl. Dec. 2, 1863, in 25th Regt., Co. I ; died in hospital at Fort Schuyler, N. Y., Aug. 6, 1864.

Samner C. Young, enl. Nov. 4, 1861, in Ft. Warren Bat.; disch. June 19, 1865; trans. to 32d Regt., Co. B.

The following are the names of those who were drafted or furnished substitutes, and their substitutes:

John C. Clark.	John R. Green, substitute.
William C. Hale.	James Smithers, substitute.
Milton Stone.	Wm. G. Rowelson, substitute.

The following were hired from abroad to fill the quotas of the town, most of whom re-enlisted from the regular army:

Barnes, Willard G.	Jenkins, Michael.
Signall, Henry.	Kelley, Thomas.
Brooks, William H.	McCabe, John.
Corey, John.	McCarrick, John.
Crandell, George M.	McCormick, John.
Cunningham, Paul.	McGuly, Patrick.
Dawson, Jeremiah.	Oakler, Frederick.
Denovan, Lloyd S.	O'Brien, Michael.
Denton, George.	O'Brien, William.
Eagan, Eugene.	O'Toole, Francis.
Eberle, Frank.	Pevel, Leon.
Foster, John K.	Reiser, Andreas.
Gibson, George W.	Sullivan, Patrick.
Gilbertson, James.	Tracy, James.
Gleaves, John W.	Ucher, William.
Gribben, Daniel.	Walker, David.
	Witzman, William.

Eight went into the navy, viz.:

Atkins, Firth B.	Snow, Fred. C.
Hogan, Dennis.	Williams, John.
Watson, Alexander.	Wilson, John.
Smith, George.	Woodward, Thomas F.

<sup>1</sup> Unattached Company.

<sup>2</sup> Wounded at Gettysburg July 2, 1863; died May 14, 1865.

## SUMMARY.

Number of Hubbardston men.....	120
Whole number furnished by the town, besides the twenty who re-enlisted and were counted twice.....	164
Excess above all the number required to fill all the quotas ..	10
Volunteers .....	120
Died in the service or very soon after (of the 120 residents) 44	

## CHAPTER CLII.

HUBBARDSTON—(*Continued.*)

*The First Congregational Church—The Evangelical Congregational—Methodist Church—The Williamsville Society—Schools—Libraries—Fire Company—Prominent Persons—Centennial—Copperas Mines—Physicians—The Militia—G. A. R.—Soldiers' Monument—Post-Office—Manufacturing—Hubbardston Grange, P. of H.—Civil History—Town Officers.*

THE FIRST CONGREGATIONAL (UNITARIAN) CHURCH was organized February 14, 1770, with the following male members: Rev. Nehemiah Parker, Adam Wheeler, Nathaniel Upham, Joseph Grimes, Nathaniel Waite and Ephraim Rice. Jos. Eveleth's name also appears in the covenant, but Rev. Mr. Stowe states that he did not join the church until January 13, 1771.

The next settled pastor was Rev. David Kendall, who was ordained October 20, 1802, and remained until April, 1809.

October 17, 1810, Rev. Samuel Gay became pastor. During the pastorate of Mr. Gay the church divided.

It is evident that public worship was held in town two or three years before there was a church. October 24, 1767, the town voted "to hire one month's preaching," and two days later Benjamin Hoyt was chosen "to provide a minister, and to provide for the minister." February 29, 1768, £5 6s. 8d. was voted "for Mr. Parker's preaching," which shows he was here at the beginning of 1768. In June of the same year it was voted "to pay Mr. Parker's salary out of the land tax granted at March meeting," but it would seem he preached here only a part of the time. Another vote, February, 1769, was "to raise five and one-half pounds for one month's preaching."

August 15, 1769, a formal call was voted to Mr. Parker, with the offer of a salary of forty pounds a year for the first three years, fifty pounds a year for the next three years, and after that sixty pounds yearly.

Mr. Parker was ordained June 13, 1770, under a large oak on the south side of the Common.

He was a graduate of Harvard College, in the class of 1763.

His ministry was one of sore trials, on account of the newness of the place, and the distracted state of the country. November 19, 1781, the town voted "to get Mr. Parker's wood the present year, in consideration of his having suffered by the depreciation of the old continental money, on his giving a receipt for

his salary for 1781." "Then voted to Squadron into five squadrons, according to their pay, to get Mr. Parker's wood."

When the town was embarrassed for want of funds, he waited long for the payment of his small salary. During these years he sold the 150 acres of land near Comet Pond, and nearly one-half of his farm, and had spent the proceeds in living, and still found himself in debt. In 1792 he made known his circumstances to the town, and asked for aid. They very coldly added fifteen pounds to his salary "for that year." The next May he was obliged to ask further aid, and offered to sell his place for a parsonage, or give them security for money on his real estate. After discussing many propositions, the meeting was dissolved without action, showing that the feeling toward him had changed. His friends now moved for another meeting, at which it was voted "to add fifteen pounds to Mr. Parker's salary, annually." Subsequently the attention of the town was twice called to this subject, but no aid was granted. According to the expressed desire of Mr. Parker, a town-meeting was held June 5, 1800, and a committee, consisting of Robert Murdock, John Clark and Edward Selfridge, was appointed to wait on Mr. Parker and ask him to be present. He complied with the request and made the following communication:

*To the Inhabitants of Hubbardston Assembled in Town Meeting.*

Gentlemen: Considering the many infirmities of my body, and other important reasons, I think it most for the glory of God that I be dismissed, and give up my ministerial office. I therefore request that you vote my dismissal, and that the pastoral relation be dissolved.

NEH. PARKER.

His request was granted, and so far as appears, this action was regarded as ultimate, no mention being made of a council.

Thus was dissolved that connection between Rev. Nehemiah Parker and the inhabitants of Hubbardston which was formed in the open air, under the spreading branches of a lofty oak tree, on the 13th of June, 1770; that connection which so happily continued for more than twenty-two years, when each party seemed ready to lay down its life for the other, to spend and be spent for their mutual benefit and happiness. But when the prime and vigor of manhood was beginning to depart from that faithful servant, and other troubles, over which he had no control, were pressing heavily upon him, that sympathy which he had formerly received, and now more than ever needed, was beginning to be withheld, and so continued by slow degrees, till he was forced to believe his usefulness had departed. Now in the evening of life, with ruined health and poverty before him, he felt willing, "for the glory of God," to relinquish that small salary, which, for the last few years, had been so grudgingly paid him, and cast himself entirely upon the mercy of that Heavenly Friend and Master whom he had so faithfully served, and who, he no doubt trusted, would soon take him home.

We would, in charity to our ancestors, withhold this narrative from the people of the present day, but as faithful historians we feel bound to make it public. No truer illustration of the fable of "the old Hound and his Master" was ever acted out in real life.<sup>1</sup>

Mr. Parker died August 20, 1801, aged fifty-nine. The expenses of his funeral—\$18.58—were paid by the town, and the town also placed a stone over his grave.

<sup>1</sup> William Bennett, as quoted in Centennial Address.

The next pastor was Rev. David Kendall, ordained October 20, 1802, and remained until April 26, 1809. He was succeeded by Rev. Samuel Gay, who was ordained October 17, 1810. He officiated as pastor until May 1, 1827, when the pastorate ended. The church divided and Mr. Gay became pastor of those who left the old church.

The pastors from this division of the church have been as follows: Revs. Abner D. Jones, Ebenezer Robinson, Wm. H. Kinsley, Claudius Bradford, S. H. Loyd, Geo. T. Hill, Stillman Barton, A. S. Ryder, B. F. McDaniel, A. P. Willard, J. R. Johnson, H. W. Morse, A. C. Nickerson, D. W. Morehouse, N. A. Haskell and George F. Clark, the present pastor, who was settled in 1883.

The frame of the first meeting-house was raised in 1773, but it was not until 1794 that the building was completed, and not until 1806 were the porch and belfry added. The bell was put in in 1805, the clock in 1808 and stoves in 1830. The building was remodeled in 1842 and again in 1869.

THE EVANGELICAL CONGREGATIONAL CHURCH was organized in 1827, being composed of seceders from the old church. Ninety-four members of the old church went with the new society, and thirty remained with the town. The society was organized as "The Calvinistic Church of Hubbardston," but subsequently took its present name. The pastors since Rev. Mr. Gay, who retired in 1841, have been as follows: Oliver B. Bidwell, D. B. Bradford, C. W. Allen, Henry B. Fay, John M. Stowe, J. F. Norton and M. H. Hitchcock, the present pastor, who was settled in 1883.

The church edifice was erected in 1827 and enlarged a few years later. It was moved in 1886 and rededicated Nov. 1, 1887.

THE METHODIST CHURCH was organized in 1839, and a church building erected in 1846. Among those who have served this church as pastors are Joseph Whitman, Stephen Cushing, Willard Smith, George W. Bates, Wm. Gordon, Samuel Tupper, George Q. Poole, Moses P. Webster, Burtis Judd, F. Q. Burrows, Charles Baker, Mr. Atkinson, N. H. Martin, H. R. Parmeter, C. H. Newall, C. H. Vinton, I. B. Bigelow, P. M. Vinton, J. S. Day, T. B. Treadwell, O. W. Adams, W. R. Trisdale, J. J. Woodbury, W. E. Dwight, William Silverthorn, Lorenzo White, L. A. Frost, and J. C. Smith, present pastor.

THE WILLIAMSVILLE UNION SUNDAY-SCHOOL SOCIETY was incorporated August 29, 1888, by Charles E. Brown, of Springfield, Mass., M. H. Hitchcock, of Hubbardston, Sarah E. Hemmenway, of Barre, Ellen M. Williams, Susan M. Jewett, Minerva F. Hale and H. B. Jencks, of Hubbardston. Its object is "to interest all the residents of Williamsville and vicinity in maintaining public worship and a Sunday-school on the Sabbath, and such other religious and social meetings and other assemblies on week-days as the public interests may re-

quire." Officers,—President, M. H. Hitchcock; Clerk, M. F. Hale; Treasurer, H. B. Jencks. Its constitution is well fitted to carry out the idea of union meetings in a little village four miles from churches. A neat and tasty building has been erected, costing eighteen hundred dollars, and the society is out of debt, owing to the liberality of former residents and friends.

There is a beautiful grove here on the borders of a large pond, in which annual reunion picnics of present and former residents of three old school districts is held in August.

SCHOOLS.—In the first division of land among the proprietors, a lot, No. 30, was set apart for school purposes, and in 1796 this lot was sold for twelve hundred and seventy-six dollars. In 1767 the first school was held, one month at the house of Joseph Slarrow, and one month at the house of Edward Rice.

After 1768, appropriations for schools were made annually, except for two or three years during the darkest period of the Revolution, the sums ranging from £5 to £1000. The latter amount was in 1780, when the currency had become of little value. For several years after 1784 the amount raised was £60. From 1792 to the close of the century it was £100. In 1800 it was \$300; in 1810, \$500; 1820, \$800; 1830, \$700; 1840, \$1200; 1850, 1200; 1860, \$1600; 1870, \$2500; 1880, 2000. Nine times the amount reached \$2500, but fell in 1879 to \$2000.

In 1770 the town voted to build a school-house twenty-six feet by twenty. This was the first in town, and stood near the southwest corner of the old burial ground, and was for some time used also as a town-house and church. Prior to this the schools and town-meetings had all been held in private houses.

In 1771 the town chose a committee to "squadron out the school places;" that is, provide places for schools in other parts of the town. Before 1781 nothing had been done to build other school-houses. At their March meeting that year a committee of seven was chosen "To squadron out the town for schooling, and to see how many school-houses to build." The next year this committee made their report, dividing the town into seven squadrons, and recommended building a school-house in each squadron. The report was accepted; but no further action was taken till March, 1784, when it was voted to build the seven school-houses, to be completed by the 1st of June, 1785. The sum of £105 was raised to pay expenses, and a building committee appointed in each squadron; but it was from three to five years before these houses were all completed. In 1786 there was an article in the town-meeting warrant, "To see if the town will reconsider the vote formerly passed, granting £105 to build school-houses." The vote to reconsider was in the negative; a new committee was appointed, and fifty dollars additional appropri-

ated to each squadron to complete its school-house. It is probable that most of them were finished during the next two years.

**LIBRARIES.**—The Hubbardston Library Association was formed prior to 1825. It was a private enterprise, and after a few years was abandoned. For almost twenty years prior to 1870 a library association was sustained in the village, and in 1871 the Farmers' Library, which was organized about 1861, was united with it. Various donations of books were received from various sources, and in 1872 the library numbered one thousand one hundred and fifty-nine. The largest donation was made by Jonas G. Clark. The library was moved to the library building in 1875. The first librarian was Miss Sarah E. Marean. The library now contains sixteen thousand volumes.

**FIRE COMPANIES.**—The first fire-engine was purchased in 1830, and a fire company formed soon after. Later a hook-and-ladder company was formed.

**PROMINENT PERSONS.**—Hon. Ethan A. Greenwood was a successful portrait painter, and was for many years justice of the peace; was also a representative to the General Court and State Senator.

William Bennett gave much of his time to collecting material for a town history of Hubbardston, and all later historians of this town owe him a debt of gratitude for his invaluable labors in this field of literature. He died in 1881.

Jonas G. Clark has been generous in his donations to his native town, and the town is indebted to him for its fine library building.

The following were Hubbardston men, viz.: Drs. William Parkhurst, John Browning, Stephen Clark, Nelson P. Clark, Jubal C. Gleason and S. E. Greenwood.

Samuel Swan and his son George were the only lawyers who have practiced law here. Others who were born here were Ethan A. Greenwood, Thomas O. Selfridge, William A. Williams and Edward B. Savage.

**CENTENNIAL.**—The town celebrated its centennial June 13, 1867.

The following were the officers of the day: President, Levi Pierce; Vice-Presidents, Col. Moses Waite, Dr. Moses Phelps, Capt. Ebenezer Stowe, Moses C. Wheeler, Oren Marean, Abel Howe; Chief Marshal, Lyman Woodward; Assistant Marshals, Wm. H. Whittemore, F. P. Morse, Rockwell H. Waite, Asa H. Church; Toast Master, J. C. Gleason; Chaplain, Rev. I. B. Bigelow.

The address was delivered by Rev. J. M. Stowe, and a poem read by Horace Underwood. The town also celebrated the Centennial of American Independence, July 4, 1876. The following hymn, written by Horace Underwood, was sung on that occasion:

Great God of nations, Mighty One,  
Before whom centuries pass as days,  
Since first Thou spake, and it was done,  
How wonderful have been Thy ways!  
Thy sovereign power extends to all,  
A nation's rise, a sparrow's fall.

We trace Thy providential hand  
Through all these many centuries past;  
Especially in this, our land,  
We clearly see it, through the last:  
When perils come, and fears arose,  
Thine arm gave victory o'er our foes.

One hundred years ago to-day,  
Our fathers, with strong faith in Thee—  
Believing Thou would'st lead the way,  
Did then declare this nation free:  
But oh! what trials they endured,  
Before their freedom was secured.

And now we've come to celebrate  
Our glorious Independence won,  
We've come—yes, to commemorate  
Those deeds, by our brave fathers done;  
We've come, O Father, to thank Thee,  
That we, to-day, are truly free.

On all this land, from east to west,  
On all who are assembled here,  
O let Thy richest blessings rest,  
Through all this glad centennial year;  
And may our hearts, through coming days,  
Be filled with gratitude and praise.

Through all the centuries yet to come,  
May this fair land—as time still flies,  
Be blest of Thee, as freedom's home;  
May this, Star of the West, still rise  
And shine, with more effulgent ray,  
Till lost in the millennial day.

**COPPERAS MINE.**—When the new county road to Templeton was built, in 1828, in cutting through a ledge, ore was discovered which was supposed to be of great value. It proved to be copperas. The mine was worked on a large scale for many years, but though the copperas was of good quality, the cost of its manufacture was so great the enterprise was at length abandoned, and all the buildings of the settlement have now disappeared. This ledge is very extensive, though it comes to the surface in but few places.

**PHYSICIANS.**—The first practicing physician in town was Dr. Moses Phelps, who came here in 1776, and for more than half a century visited his patients on horseback with his huge saddle-bags of medicine. His son, Moses Phelps, studied and practiced with him, except for four years spent in Barre; after more than fifty years of active service, he continued to be consulted till his death, in 1873; the father and son thus covering almost a century of practice.

Others have been Drs. Goodnow, George Hoyt, Brown, Holmes, Taylor, Alexander, Billings, Bemis, Pillsbury, Scribner, Freeland, Lincoln, Sylvester, Ruggles, Ames, Joseph M. Tenney, H. O. Palmer and Amory Jewett.

**THE MILITIA.**—Prior to 1791 there was but one military company in this town. It then numbered one hundred and forty men, and was rapidly increasing, and the town voted to divide it into two companies, to be called the East Company and the West Company, and to choose officers for the two, which shows that military officers at that time were elected in town-meeting. The officers of the West Company were: Ebenezer Mann, captain; Daniel Parkis (af-

terwards spelled Parkhurst), lieutenant; John Browning, ensign. Of the East Company: Moses Greenwood, captain; Asa Church, lieutenant; Paul Matthews, ensign.

*Rifle Company.*—In 1816 an independent company was chartered, called the Hubbardston Rifle Company. The first officers were: James H. Wheeler, captain; Ephraim Mason, lieutenant; Brigham Davis, ensign.

In 1829, after the active militia was so reduced as to include only able-bodied men between the ages of eighteen and thirty, the West Company was disbanded. The officers—Asa Underwood, captain; Makepeace Clark, lieutenant, and Samuel A. Knox, ensign—were discharged, and the non-commissioned officers and privates were enrolled in the East Company.

*Light Infantry.*—In 1843 another independent company was chartered, called the Hubbardston Light Infantry. The first officers of the Infantry Company which followed were: George Williams, Jr., captain; Henry Chase, first lieutenant; Daniel Witt, second lieutenant; Joseph Russell, third lieutenant, and Harvey Brown, fourth lieutenant.

GRAND ARMY OF THE REPUBLIC.—*Post 109* was organized in 1868, but finally, the number of members dropping below the number called for by charter, it was abandoned.

SOLDIERS' MONUMENT.—The town erected a monument to the memory of her soldiers, in 1885. It was dedicated June 17th of that year, the address upon the occasion being delivered by Hon. W. W. Rice.

POST-OFFICE.—A post-office was established in Hubbardston in 1810, and the following have been postmasters: Reuben Wheeler, Clark Witt, John Church, Levi Pierce, Dana Braun, Appleton Clark, Abijah S. Clark, John Phelps, John F. Clark, William Bennett, Jr., William H. Whittemore, Lyman Woodward and J. B. Flynn.

The manufacture of woolen goods was commenced in 1888 by Arthur McWilliams on the old Parker mill site.

HUBBARDSTON GRANGE, No. 126, P. OF H., was chartered November 26, 1885. Master, Alson J. Greenwood; Secretary, George E. Morse. Past Masters: Darius Parsons, Chester E. Bennett, Elwin C. Wheeler.

It is now in a flourishing condition, with sixty-seven members.

CIVIL HISTORY.—The following is a list of the town officers, Representatives, Senators, etc:

*Selectmen.*—Israel Green, 1767; Benjamin Nurse, 1767; Benjamin Hoyt, 1767-69; Stephen Heald, 1768, '70, '71, '73, '75, '79, '86; Adam Wheeler, 1768, '79, '83; William Pain, 1769; Ezekiel Newton, 1770, '72-74; William Marean, 1770, '71, '75, '82, '92-1800, '01, '02, '06, '09; Joseph Eveleth, 1771, '73, '85; Joseph Slarrow, 1772; John Woods, 1772, '76, '87, 1807, '08; Ezra Pond, 1774, '80, '81, '87; William Muzzy, 1774, '75, '79, '82, '95, '96; Jonathan Gates, 1776, '80,

'84, '86, '88, '89; Robert Murdock, 1776, '85, '86, '90, '91, '98, '99, 1800, '01; John Clark, 1777, '79; Isaac Bellows,<sup>1</sup> 1777, '83; George Metcalf, 1777; Thomas Caryl, 1778; Elisha Woodward, 1778, '79, 1802; William Stone, 1778; Joseph Shattuck, 1780, '86; Nathaniel Waite, 1780, '92-94; Abijah Greenwood, 1780, '83, '87, '92-94; Samuel Slocomb, 1781-83; Joel Pollard, 1781; Reuben Totman, 1883; James Thompson, 1784, '92, '93; Eli Clark, 1784; Joseph Wright, 1784, '86, '92-94; Hollis Parker, 1785; Nathan Stone, 1785; John McClenathan, 1785, '94, '97, 1807, '08; Edward Selfridge, 1788, '89; Buckley Howe, 1788, '89; Moses Greenwood, 1790, '91, '95-97; Moses Clark, 1790, '91, 1805, '06; Joshua Murdock, 1790, '91, 1807, '08; Samuel Follett, 1790, '91; Thomas Hapgood, 1795-97; John Browning, 1797, 1803-05; Daniel Parkhurst, 1798, '99, 1800, '01; Ephraim Allen, 1798-1800, '09, '10, '12, '13; Ebenezer Warren, 1798-1800, '01, '03-05, '16, '17; Israel Davis, 1801, '02, '06, '09, '12-15, '21, '22; Ebenezer Stowe, 1802; Abraham Cutting, 1802; Levi Greenwood, 1803-05, '16; Jonathan Cutting, 1803-05; William Morse, 1804, '05, '10-12, '20; Asa Wheeler, 1806, '10-12, '15; Daniel Woodward, 1806, '09, '14, '15, '18, '19, '21-23; Samuel Morse, 1806, '13; Otis Parker, 1807, '08, '12, '15, '19, '22; Aaron Gates, 1807, '08, '18-20, '24, '25, '31, '32; Luke Warren, 1809, '20; Asa Lyon, 1810; Delphos Gates, 1810, '11; Moses Phelps, 1811; Levi Conant, 1811; Robert Murdock, Jr., 1813; Daniel Barnes, 1813; Moses Waite, 1814, '15, '19, '20, '24, '26-29, '30, '34, '36-39, '42; Aaron Wright, 1814, '17; Joel Pollard, Jr., 1814; Ebenezer Mann, 1816; Timothy P. Marean, 1816, '17, '21; Ephraim Mason, 1816; Nathan Wright, 1817; James H. Wheeler, 1817, '18; Moses Phelps, Jr., 1818; Jotham Stone, 1818, '19; Isaac Follett, 1820; James Browning, 1821, '24; Ebenezer Stowe, Jr., 1821; Silas Greenwood, 1822, '23, '26-29, '30-32, '34, '36, '39, '40; Sewell Mirick, 1822, '23, '26; Warner Hinds, 1823, '24, '26; John Church, 1823; Samuel Swan, 1824-27; Henry Prentiss, 1825; George Williams, 1825; Abijah Clark, 1825, '27-29, '31, '32; Jonas Heald, 1827, '28, '43; Nathan Warren, 1828; Asa Marean, 1829, '30, '31, '33, '35, '40, '41, '43-45; Rowland Woodward, 1829, '33-35; Justus Ellinwood, 1830; David Bennett, 1830; Elisha Woodward, 1831-33; Ethan A. Greenwood, 1833; Dana Brown, 1833, '35-38, '44, '45; Stillman Morse, 1834; Lyman Greenwood, 1834, '36-38, '46-49, '52-54, '59, '60, '62, '64; William S. Clark, 1835; William Joslin, 1835, '41, '43, '59, '70; Levi Allery, 1836, '37; Sewell Wheeler, 1837, '38, '44, '45; Crusoe Kendall, 1838-40, '42, '43; Henry Prentiss, Jr., 1739, '40, '52-54, '61; Levi Joslin, 1839, '42, '44-46, '50, '51, '60; Ephraim Stowe, 1840, '41, '43-48; Aaron Greenwood, 1841, '42, '46, '55-58; James A. Waite, 1841; Luke Williams, 1842; John F. Woodward, 1846-49, '50, '51, 57-59, '60, '62-64; Caleb

<sup>1</sup> Resigned to enlist in the army, and Ebenezer Joslin was elected May 22, 1777, to serve for the remainder of that year.

Underwood, 1849-51; Sylvanus Dunton, 1852-54, '57, '58; Levi Miles, 1855, '56; Augustus Morse, 1855, '56; T. Sibley Heald,<sup>1</sup> 1861; Horace Underwood, 1861, '65, '69; Moses C. Wheeler, 1862-65, '67, '68; Andrew Gleason, 1863, '65, '66, '71; John G. Allen, 1866, '83-86; Isaac Hallock, 1866; Oren Marean, 1867, '68; Abel Howe, 1867-69; Spencer Prentiss, 1869; Ebenezer Tilton, 1870, '71; David Pollard, 1870; Lyman Woodward, 1871, '72; William J. Eveleth, 1872, '73; Alson J. Greenwood, 1872, '73, '76-80, '85; Danford Clark, 1873; Samuel S. Gleason, 1874-81, '82; Silas Wheeler, 1874-82; Anson B. Clark, 1874, '75; Warren Clark, 1881; Edwin H. Clark, 1883, '84; Herbert W. Howe, 1886-88; Charles E. Pollard, 1887, '88; William H. Wheeler, 1887, '88.

*Assessors.*—Israel Green, 1767; Benjamin Nurse, 1767; Benjamin Hoyt, 1767-69, '72; Stephen Heald, 1768, '70; Adam Wheeler, 1768, '69, '71; William Pain, 1769; Ezekiel Newton, 1770; William Marean, 1770, '71, '92; Joseph Eveleth, 1771-73, '75, '77; Nathaniel Waite, 1772; John Woods, 1773-76, '78, '79; George Metcalf, 1773; Isaac Bellows, 1774, '75, '77, '79, '81, '87; William Muzzy, 1774, '77, '79, '86, '92, '98; Jonathan Gates, 1776, '80, '83, '84, '88-90, 1802, '03; Robert Murdock, 1776; Joel Pollard, 1779-82; Elisha Woodward, 1780, '82-84; Joseph Shattuck, 1780, '82, '85, '86; Ebenezer Mann, 1780, '97; Alpheus Morse, 1781, '85; Moses Phelps, 1783, '84; Ebenezer Joslin, 1785; Philemon Woodward, 1786, '88-98, 1800, '04-06, '09, '12-15; Samuel Morse,<sup>2</sup> 1787; Moses Greenwood, 1787, '90; John McClenathan, 1791, '93-96; Asa Church, 1791, '93-97; Daniel Woodward, 1798-1801, '17; Abijah Greenwood, 1799; James Thompson, 1799; Edward Selfridge, 1800; Jacob Waite, 1801, '03-08, '10, '11; Abner Gay, 1802, '03, '13, '16; Abraham Cutting, 1802; Israel Davis, 1804, '05; Levi Greenwood, 1806, '18; Asa Wheeler, 1807, '08; Luke Warren, 1807-09, '12, '14, '15, '20; Timothy P. Marean, 1809; Aaron Gates, 1810, '11, '16-22, '25-30; Nathaniel Waite, Jr., 1810; Luther Hale, 1811-15, '21; William Rice, 1816; Nathan Wright, 1817; Joel Pollard, Jr., 1818, '19, '22-24, '30, '39, '40; William Hobbs, 1819; Sewell Mirick, 1820, '22-24, '26, '27, '30; James H. Wheeler, 1821; Justus Ellinwood, 1823, '24; George Williams, 1825; Abijah Clark, 1825; Russell Brown, 1826, '28, '29, '31, '33-35; Ephraim Stowe, 1827; Silas Davis, 1828, '29, '31, '32; John Church, 1831, '32; William Young, 1832, '33; Shepherd Clark, 1833; John D. Pierce, 1834, '35; Elisha Woodward, 1834-42, '44-49, '51, '58-60, '63, '64; William Bennett, 1836-40; James H. Pierce, 1836, '37; Henry Prentiss, Jr., 1838, '41, '42, '44-49, '51; Lyman Greenwood, 1841-43; Dana Brown, 1843, '54; Rowland Woodward, 1843; William Bennett, Jr., 1844-48, '50,

'51; Sylvanus Dunton, 1849, '59; Levi Miles, 1852, '53; Simpson C. Heald, 1850; Joseph Raymond, 1852-54; Israel Davis, 1852-54; Almer Gay, 1855-57, '59, '60-63, '65-68, '70, '74-77; Horace Underwood, 1855-68; Leonard Clark, 1855, '68; William Joslin, 1856, '57, '61-69; Abijah H. Greenwood, 1856, '57; Levi Joslin, 1858; Albert Bennett, 1858, '60, '73, '74, '80; Lyman Woodward, 1861, '62, '64, '69, '70, '71; Oren Marean, 1865, '66, '73; Nathan H. Felton, 1867; Danford Clark, 1869-73, '83; Samuel S. Gleason, 1871, '72, '78, '80, '81, '86; Albert H. Waite, 1872; Asa Bennett, 1874, '76, '79, '80, '81, '82; Warren Clark, 1875; Alson J. Greenwood, 1875, '78, '81-88; Luke S. Moore, 1876, '77; Edwin Bennett, 1877, '78; George H. Davis, 1879, '86-88; Joseph Jewett, 1879; Saxton J. Arnold, 1882; Harlan P. Smart, 1883, '84; William H. Wheeler, 1884, '85; Edmund S. Bennett, 1885, '87, '88.

*Town Clerks.*—John Le Bourveau, 1767-69; William Marean, 1770; Joseph Eveleth, 1771; John Woods, 1772-84, '95, '96; Stephen Church,<sup>3</sup> 1785, '86; Elisha Woodward, 1786-94; Abner Gay, 1797-1802, '16-18; Jonathan Cutting, 1803-06; Jacob Waite, 1807, '10, '11; Daniel Woodward, 1808, '09, '12, '13; Samuel Swan, 1814, '15, '20-35; William Bennett, Jr., 1836-64; Lyman Woodward, 1865-89, present incumbent.

*Town Treasurers.*—Ezekiel Newton, 1767, '68, '72, '75, '76; Adam Wheeler, 1769-71; William Marean, 1773, '74; John Woods, 1778-81; Joel Pollard, 1782-84; Elisha Woodward, 1785-90, '99; Jonathan Gates, 1791-98; Abijah Greenwood, 1800-03, '09; Daniel Woodward, 1804-06; Ebenezer Warren, 1807, '08; Otis Parker, 1810, '11; Ebenezer Stowe, 1812; Levi Greenwood, 1813-16; Israel Davis, 1817-19; Justus Ellinwood, 1820, '21; Samuel Swan, 1822, '23; Clark Witt, 1824-27; John Church, 1827-30; Levi Peirce, 1831-34, '46, '48, '49, '56-58; Shepherd Clark, 1835-37, '40, '41; Moses Phelps, 1838; Appleton Clark, 1842-45; Luther A. May, 1850-63; John Phelps, 1849; William Bennett, Jr., 1854, '63, '64; Benjamin D. Phelps, 1855, '59-62; Moses Greenwood, 1865; Lyman Woodward, 1866-81.

*Representatives to the General Court.*—William Muzzy, 1786, '87, '96, '98; John Woods, 1788; William Marean, 1791, '92, '94, 1800, '01; Jonathan Gates, 1803; John McClenathan, 1804-07; Jacob Waite, 1809, '10; Ephraim Allen, 1812, '13; Levi Greenwood, 1814, '16; Daniel Woodward, 1818, '21; Samuel Swan, 1824; Henry Prentiss, 1827, '29, '31, '32, '36; Moses Phelps, 1828; Moses Waite, 1830-34, '37; Ethan A. Greenwood, 1833, '34; Silas Greenwood, 1835; Asa Marean, 1835-38, '41, '42; Micajah Reed, 1839, '40; George Williams, 1839, '40; Sylvanus Dunton, 1843; William Bennett, Jr., 1846, '48-52, the district, 1861, '64; Leonard Clark, 1855; Levi

<sup>1</sup> Resigned to enlist in the army, and John F. Woodward was elected to serve the rest of the year.

<sup>2</sup> Died April 20, 1877, and John Woods was elected to fill the vacancy.

<sup>3</sup> Died July 11, 1786, and Elisha Woodward served the rest of the year.

Miles, 1856; Henry Prentiss, 1857; Aaron Greenwood, the district, 1859; Horace Underwood, 1863, '78; Lyman Woodward, the district, 1865, '67, '72, '73; Otis Hale, the district, 1868; Samuel S. Gleason, the district, 1876; William J. Eveleth, 1882; Herbert W. Howe, 1889.

From 1831 to 1837, and in 1839 and 1840 the town sent two representatives.

For the years not mentioned above, prior to 1858, the town was not represented.

From 1858 to 1866 Templeton and Hubbardston comprised one district.

From 1866 to 1877 Barre, Dana, Hardwick, Hubbardston, Petersham, Phillipston and New Braintree made one district.

Since 1877 Petersham, Phillipston, Templeton and Hubbardston compose this district.

*Senators.*—Henry Prentiss, 1835; Ethan A. Greenwood, 1836, '37.

*Delegates to the Several Conventions held in Massachusetts.*—John Clark, delegate to convention held at Concord, 1774; William Muzzy, representative to Provisional Congress, Watertown, 1775; William Muzzy, representative to General Court, held at Watertown, 1775; John Woods, delegate to Constitutional Convention held at Cambridge, 1779; William Marean, delegate to convention held at Concord, 1779; John Woods, delegate to convention held at Boston to adopt the United States Constitution, 1787; Ephraim Allen, delegate to convention held at Boston to revise the Constitution, 1820; William Bennett, Jr., delegate to convention held at Boston to revise the Constitution, 1853.

*POPULATION.*—1767, about 150; 1776, 488; 1790, 933; 1800, 1113; 1810, 1127; 1820, 1367; 1830, 1674; 1840, 1784; 1850, 1825; 1855, 1744; 1860, 1621; 1865, 1546; 1870, 1654; 1875, 1440; 1880, 1385; 1885, 1309; 1889, about 1300.

*VALUATION.*—1831, \$314,467; 1841, \$411,458; 1851, \$643,503; 1861, \$609,054; 1865, \$741,433; 1870, \$904,457; 1875, \$903,176; 1880, \$789,238; 1885, \$699,965.

## CHAPTER CLIII.

### WARREN.

BY WILLIAM T. DAVIS.

It is not proposed, in this sketch of Warren, to go into any details of the history of the territory of which it is composed before its incorporation as a town. Unlike many of the towns in Worcester County, the township was not founded on a grant to proprietors, which gradually developed into a condition which made an act of incorporation necessary for its progress. The simple statement of the case is that certain inhabitants of the towns of Brookfield and

Brimfield, and of the plantation of Kingsfield, which was, in 1752, incorporated as the town of Palmer, became dissatisfied with the inconveniences to which they were subjected by reason of their distance from the churches, and other privileges of the communities to which they belonged, and petitioned the General Court to be incorporated as a separate and distinct town. In response to their petition the following act of incorporation was passed January 16, 1741-42:

An act for erecting a parcel of the lands belonging to the inhabitants of the westerly part of the town of Brookfield and the northerly part of the town of Brimfield and easterly part of Kingsfield, so-called, viz.: those parts of the said lands that adjoin to said Brookfield, into a township by the name of Western.

*Whereas*, divers inhabitants of the towns of Brookfield and Brimfield, and of Kingsfield, so-called, labor under difficulties by reason of their not being incorporated into a township;

*Be it enacted by His Excellency*, the Governor, Council and Representatives, in General Court assembled, and by the authority of the same,

Sec. 1. That the lands hereafter bounded and described be, and hereby are, erected into a separate and distinct township by the name of Western, viz.:

Sec. 2. Beginning at Brookfield southwest corner; then running half a mile north on said Brookfield line; then west thirty-four degrees north three miles and eighty rods to the river, and bounded with a small walnut staddle standing in the split of a rock; thence running up the river to an elm-tree marked; thence crossing the river and running north forty-four degrees east about three miles and a half to Brookfield west line to a heap of stones near a chestnut-tree marked; and running east eleven degrees and thirty minutes south one mile and an hundred and fifty rods to a heap of stones on a rock, at the end of a meadow or mill-pond; then bounding on Cornelius White's land till it come to mill brook, so-called; then bounded with the mill brook to the river as the brook runs; then crossing the river and extending southeasterly to a white oak-tree, known by the name of the northeast corner of the mile square; thence extending southeasterly to Brookfield south line, intersecting that line two miles and three-quarters from said first-mentioned southwest corner bounds.

Sec. 3. And that the inhabitants of the said lands be, and hereby are, vested with all the powers, privileges and immunities that the inhabitants of other towns within this province are, or by right ought to be, vested with; and that the said town of Western belong to the County of Worcester,

Provided,—

*And be it further enacted by the authority aforesaid:*

Sec. 4. That nothing in the act contained shall be construed or intended to hinder, alter or prejudice the right and interest of all or any person whatsoever in any of the common or undivided lands in the said townships of Brookfield, Brimfield and the plantation called Kingsfield, but the same shall remain as heretofore, and the inhabitants of the respective towns and plantation aforesaid shall have their full vote in the ordering, improving or disposing of such common and undivided lands as by law they have, or ought to have, before the enacting hereof.

Provided also,—

*And be it further enacted:*

Sec. 5. That the inhabitants of the said town of Western shall be liable and subject, notwithstanding their being set off and constituted a township, as aforesaid, to pay their proportion of all province, county and town rates for this year, in the said town of Brookfield, Brimfield and Kingsfield, respectively, and shall be accordingly assessed thereto in the same manner as they would have been if this act had never been made; anything herein before contained to the contrary notwithstanding.

To prevent confusion, it will be proper to state here that the town bore the name of Western until 1834, when, by an act of the Legislature, the name was changed to Warren. The town of Weston, in Middlesex County, was incorporated in 1712, and the similarity in the names led to a confusion which made the change necessary. The name of Warren will be exclusively used in this narrative.

The first town-meeting was held March 8, 1741-42, according to the old style of the calendar or, on the 19th of March, 1742, according to the new style. At that meeting Noah Ashley was chosen moderator, and Mathew Beal, town clerk. The selectmen chosen were Solomon Keys, Noah Ashley, Peter Rice and Nathaniel Reed. On the 15th of March, at a town-meeting at which Thomas Parsons acted as moderator, it was voted "to strengthen the covenant adopted, that it shall be strong and good." On the 5th of June, 1742, it was voted to locate the meeting-house on Comey Hill and to have three months' preaching. On the 14th of October, 1742, it was voted to have the meeting-house forty feet square, and to locate it on Comey Hill. On the 18th of April, 1743, a town-meeting was held at the house of Widow Howard, and Solomon Keys was chosen moderator. The meeting was "adjourned to the place called Comey Hill, and at the place above mentioned on the west side, near the place called the Staddle on a napp of ground adjoining to Comey Hill; the particular spot is known by one chestnut tree on the west side of the napp, and a little east of said chestnut tree there is two black oak saddles, marked, and the same spot at said meeting, by adjournment from the Widow Howard's house to this place, and on this spot of ground and at the time noted, the particular spot is, and shall be, the place for the meeting-house to be built upon and here to remain." On the 2d of May, 1743, at a town-meeting at which Solomon Keys acted as moderator, it was voted to build the meeting-house forty-five feet long, thirty-five feet wide and twenty and one-half feet between sill and plate, and the sum of three hundred pounds was appropriated to pay the expenses. Noah Ashley, Solomon Keys and David Blair were chosen a building committee, and it was also voted that Mr. Thomas Strong should do the preaching for three months. On the 16th of January, 1743, it was voted to settle John Martin with a settlement of eighty-seven pounds and ten shillings and a salary of forty pounds, to be increased fifty shillings annually after the first year. It is probable that Mr. Martin declined, or if he came to Warren that his settlement was short. It is also probable that the first settled minister was Rev. Isaac Jones, who was notified on the 20th of July, 1744, by Samuel Bliss, Gershom Makepeace, Noah Ashley, Thomas Rich and Peter Rice, "that the free-holders of Western had selected him for their minister, and they prayed for his speedy and serious consideration of the premises." Mr. Jones accepted the invitation, and was ordained in January, 1744-45. He continued in his pastorate more than forty years, when he was released only by his death. Mr. Jones was succeeded by Rev. Stephen Baxter, a graduate of Harvard, in 1788, who was ordained March 9, 1791. During the pastorate of Mr. Baxter in 1798, a movement towards the erection of a new meeting-house began to be agitated, and, as was the case in most towns, the location of the

old structure was found to be inconvenient to the greater part of the population, and it was decided to build it on the lower part of the Common. On the Common it was built in 1804, and there it remained until 1837, when desired improvements of the Common rendered it necessary to remove it to the site of the present house. In April, 1874, it was burned, and the present meeting-house was at once erected on the old site. In 1806 Mr. Baxter was succeeded by Rev. Sylvester Burt, and in 1816 by Rev. Munson C. Gaylord. Rev. Orin Catlin followed in 1829, and Rev. Charles Fitch in 1832. Rev. George Trask was ordained in 1836, a gentleman who has been somewhat notorious in a crusade against the use of tobacco. Mr. Trask remained ten years, and has been followed by Rev. Charles Smith, Rev. J. H. Northrop, Rev. S. S. Smith, Rev. E. L. Jagger, Rev. S. J. Austin and the present pastor, Rev. D. O. Clark.

In 1815 a Universalist Society was organized, and a meeting-house built at Hodge's Corner, in South Warren, in 1821. In 1833 this organization was abandoned. In 1830 the present Universalist Society was organized and for several years held services in one of the school-houses. In 1837 they built their present church on the hill between the south and central villages. Rev. J. W. Talbot was installed over the society in 1839, and has been succeeded, among others, by Rev. Messrs. Lane, Webster, Plum, Bradley, Moore and the present efficient pastor, Rev. Olney I. Darling.

A Methodist Society was organized in 1852, and for more than ten years held religious services in Union Hall. In 1863 the society bought a church in that part of Ludlow called Jencksville and removed it to Warren. Among the pastors of this society have been Rev. Mr. Parkhurst, Rev. Messrs. George, Satchwell, Locke, Godfrey and Tisdale. The present pastor is Rev. J. F. Means. There is also at the present time a Methodist Church at West Warren, of which Rev. B. F. Kingsley is pastor.

A Congregational Society was organized at West Warren, July 25, 1865. Rev. A. H. Simes was installed over this society in 1866, and was succeeded after his resignation, in 1869, by Rev. C. G. Weeks. During its early years the society worshipped in Crossman's Hall, but in 1869, during the pastorate of Mr. Simes, the present meeting-house was erected. The present pastor of this society is Rev. G. H. Morss.

In 1872 Catholic churches were erected both in the central village and at West Warren, and these are presided over by Rev. David Moyer and his assistant, Father Martel.

It was not long after the incorporation of the town before its peace was disturbed by the French and Indian Wars. In the first of these wars it is not probable that Warren, just starting in her municipal career, took a very active part. In the war of 1753 she sent her soldiers into the field, and bore her

ample share of its burdens. Solomon Keys and his son both joined in the expedition to Lake George in 1755, and both were killed. In 1759 Lord Amherst with ten thousand men encamped within the township on his way to Crown Point, and little opportunity was afforded to the inhabitants to pursue with regularity and profit their useful occupations until the peace of 1763. But even then the declaration of peace was mingled with mutterings and complaints which foreboded a more severe and more protracted conflict than that from which they had happily been relieved. It is not proposed to note the steps taken by Warren in conjunction with other towns to uphold the arms of those who, in Boston and elsewhere, were resisting the aggressions of the crown. At a town-meeting held January 17, 1774, it was declared "that the plan of importing tea into America subject to a tax by commissioners of the East India Company was a very great infringement on their rights, and threatened them with bondage and slavery." It was also declared by the town that "loyalty and true allegiance to His Majesty King George the third we heartily and sincerely profess, and will yield a cheerful and ready obedience to all just laws; and a hearty friendship with our mother country we wish may be continued until time shall be no more; but our just rights and privileges, for which our forefathers endured the greatest hardships, and many of them sacrificed their lives, we cannot give up and submit to be bondmen and slaves; but are determined to defend with the greatest vigor and resolution; which is, as we apprehend, almost the universal sentiment of every freeman in America."

It is probable that the following lists, copied from the muster and pay-rolls at the State House, include most of the soldiers furnished by Warren for Revolutionary service:

The following men belonging to the company commanded by Capt. Reuben Read, and attached to Col. Jonathan Warner's regiment of militia, marched from Warren to Roxbury, April 20, 1775, on the receipt of the news of the battle of Lexington, on the day before:

Reuben Read, captain.	John Wood.
Cyrus Rich, lieutenant.	Luther Rich.
Isaac Wood, lieutenant.	Ebenezer Cutler.
Matthew Gray, sergeant.	Joseph Cutler.
Jonathan Danforth, sergeant.	Scotaway Whitcomb.
William Corvee, sergeant.	Seth Lincoln, Jr.
Henry Wallbridge, sergeant.	Joseph Davis.
Jason Wright, corporal.	Jonas Lamson.
Moses Bascom, corporal.	John Danforth.
Ebenezer Field, corporal.	Caleb Brooks.
Simeon Rich, corporal.	Davis Burrus.
William Brown.	Gideon Davis.
Jonathan Barrus.	Joseph Gleason.
James Blair, Jr.	Barnabas Blackmer.
Samuel Blair.	Isaac Patrick.
James Craigie.	Nathan Wood.
Joseph Smith.	Henry Rogers.
Aaron Bliss.	Samuel Gray.
John Davis.	Ellet Makepeace.
Solomon Chandler.	Thomas Lincoln.
John Brooks.	Rice Wheeler.
Edward Brooks.	

The following men belonged to the company of militia commanded by Capt. Josiah Putnam, and attached to Col. Jedediah Foster's regiment, which marched to Roxbury from Warren, April 21, 1775:

Josiah Putnam, captain.	Simeon Dwight, Jr.
Samuel Bascom, lieutenant.	Isaac Crane.
Timothy Rice, corporal.	Jonathan Flint.
Peter Damon, corporal.	Henry White, Jr.
Benjamin Thompson.	John Conly.
Solomon Blackmer.	Ebenezer Temple.
Elias Holbrook.	Mathew Kalligan.
John Crabtree.	Samuel Bliss.
John Chandler.	Jude Foster.
Samuel Bascom, Jr.	Henry Switcher.
Thomas Chandler.	Reuben Bliss.
Joseph Tidd.	Samuel McAllister.
William Marr.	Josiah Putnam, Jr.
James Mills.	

The following were miscellaneous enlistments in 1775, some of which were re-enlistments:

Jonathan Danforth, captain.	Jonas Lamson.
Asa Putnam, captain.	Nathan Wood.
Jason Allen.	Mathew Kalligan.
Edmund Washburn.	Abel Fairbanks.
Henry White.	Daniel Forward.
Solomon Gilbert.	Martin Kellogg.
Joseph Chandler.	John Wood.
Daniel Keys, lieutenant-col.	Samuel Bliss.
Joshua Danforth, corporal.	Jude Foster.
Nathan Allen.	Medad Kellogg.
Thomas Whipple.	Sylvanus Brooks.
Ebenezer Field, corporal.	James Stone.
Henry Rogers, sergeant.	Converse Cutler.
Seth Lincoln, corporal.	James Blackmer.
Joseph Davis.	

The following men belonged to the company of militia commanded by Capt. Joseph Cutler, which marched to join General Gates, September 24, 1777:

Joseph Cutler, captain.	Jesse Allen.
Alexander Bothwell, lieutenant.	Barnabas Blackmer.
Matthew Gray, lieutenant.	Rice Wheeler.
Henry Wallbridge, sergeant.	Josiah Austin.
Alexander Wilson, sergeant.	Joseph Chandler.
William Morse, sergeant.	Samuel Patrick.
— French, sergeant.	John Pattrell.
James Blair, corporal.	Isaac Crane.
Joshua Crossman, corporal.	Samuel Andrews.
Jonathan Flint, corporal.	Solomon Bliss.
James Hunter.	Aaron Bliss.
Ebenezer Cutler.	Silas Ballard.
Henry Chadwick.	John Bothwell.
Solomon Rich.	Aaron Crawford.
Thomas White.	Simeon Dwight.
Edward Larnand.	William Vergin.
William Blair.	John McAllister.
Eli Putnam.	John Chandler.
Reuben Read.	Duty Partridge.
Nehemiah Reter.	Asa Putnam.
Reuben Bliss.	David Barrows.
Moses Bliss.	John Demon.
Isaac Patrick.	Robert Forbes.

The following enlisted in the Continental Army in 1778:

Joseph Cutler.	Tower Humphrey.
Solomon Chandler.	Pomp Loring.
Alexander Thomas.	Ebenezer Luce.
Samuel Davis.	Jason Allen.
Martin Kellogg.	Samuel Wood.
Noble Spencer.	Jeremiah Mason.
Joshua Danforth.	

The following were drafted for nine months' service in 1778:

Samuel Bascom, Jr.	Sherebiab Ballard.
John Potterell.	Nathaniel Chickering.
John Nevens.	Amos Hodgman.

The following enlisted in the Continental Army in 1779:

Daniel Newport.	Dennis McSwaney.
Pomp Peters.	Jephtha Putnam.

The following men belonged to the company commanded by Capt. Joseph Richardson, attached to the regiment of Col. Samuel Denny, which went to Claverack on the Hudson for three months' service:

John Calister, sergt.	Elijah Barnes.
Wm. Hamilton, sergt.	Richardson Dunham.
James Boyden, corp.	Jesse Dunham.
Ezra Tucker, corp.	Eliab Dyer.
Elijah Carpenter.	Silas Dean.
Jude Adams.	Ellis Doty.
Simon Rice, drum.	Alexander Dunn.
Andrew Banister, fifer.	Thaddeus Dodge.
Lemuel Andrews.	John Earle.
Israel Aiken.	Moses Fay.
Isaac Abbot.	Oliver Gilbert.
James Bigelow.	Thomas Hanikin.
Isaiah Bacon.	Joseph Hamilton.
John Bigelow.	Noah Hatch.
Joseph Brown.	Benjamin Hodges.
Joel Blair.	George Hayes.
Benjamin Jennings.	Thomas White.
Lemuel Johnson.	John Hixon.
Thomas Lamson.	Jupiter Hall.
Simon Bacon.	John Pattrell.

The following enlisted in the Continental Army in 1780:

Jacob White.	Joel Blair.
Eli Hitchcock.	Oliver Gilbert.
John Crawford.	Richard Packard.
John Calister.	Jesse Teague.
James Calister.	John Poterell.
Jonathan Hitchcock.	Mathew Galligan.
Eleazer Desmarque.	Samuel Dale.
Joseph Davis.	Job Blair.
John Luce.	James Clifford.
John Smith.	Vassal White.

The following Warren men joined Capt. John Cutler's company, attached to the regiment of Col. Luke Drury, in 1781 for six months' service:

John Calister, corp.	Wm. Parkhurst.
James Blackmer.	John White.
Simeon Blackmer.	Thomas Fuller.
Joshua Nichols.	Jacob Kellogg.

The following enlisted in the Continental Army in 1781:

Dominick Finn.	Lemuel Fuller.
John Danforth, sergeant.	James Humphrey.
Nathan Lamson, drummer.	Jason Makepeace, corporal.
Dan Newport.	Joseph Clifford.

Having entered on the military career of the town, it may be as well to complete it at this point in the narrative. In 1786, as is well known, Daniel Shays, who was first a private and afterwards a captain in the Revolutionary War, initiated his rebellion in the town of Pelham, in Hampshire County, and the town

of Warren became more or less involved in the excitement attending it. No prominent persons, however, in the town were connected with it, and after prudent concessions on the part of the Government had, to a certain extent, removed the cause of the trouble, the rebellion was speedily suppressed.

In the War of 1812 a military company marched to Boston, but was sent back by the order of Governor Strong, and little was known or felt, so far from the seaboard, of its inconveniences. In fact, it is probable that the hostilities served as a sort of protection to our infant industries from the importation of foreign merchandise, and enabled our manufacturers to lay the foundations of enterprises which otherwise would have struggled in vain against foreign competition.

In the War of the Rebellion the town of Warren performed her full share. The following list includes the names of those who entered the service or, on being drafted, paid commutation. Some of these were credited to other towns and some enlisted more than once. The list only refers to their first enlistments:

*Second Regiment.*

Ephraim Carey.  
George B. Crouch.  
Wm. L. Cowles.  
Wm. H. Laffin.  
Allen A. Marsh.  
Albert M. Powers, lieutenant.  
Chauncy Peck.  
Philo H. Peck.  
Alfred Stephens.  
Owen Tiffany.

*Eleventh Regiment.*

Henry Allen.  
Wm. Hamilton.  
Milton Watkins.

*Fifteenth Regiment.*

John Carmady.  
Edward Smith.

*Nineteenth Regiment.*

James Hart.

*Twentieth Regiment.*

John Dress.

*Twenty-first Regiment.*

Ira Thompson.  
Charles L. Chapin, sergeant.  
George Walsh.  
Otis E. Nelson.  
Horatio Tower.  
Calvin Cutler.  
Enoch C. Morgan.  
Joseph C. Griggs.

*Twenty-second Regiment.*

Amos Bliss.

*Twenty-fourth Regiment.*

George Bliss.  
Daniel Carr.  
Charles H. Harback.  
Isaac H. Gilbert.  
Hugh Costello.  
John Sweeney.

*Twenty-fifth Regiment.*

Albert Peck.  
Oliver B. Rumwell.  
Lewis Wright.  
Hosea Merriam.

*Twenty-sixth Regiment.*

James Flynn.

*Twenty-seventh Regiment.*

Patrick Burk.  
Wm. Sibley.  
Edwin P. Hale.  
Wm. H. Washburn.  
Wm. W. Cummings.

*Twenty-eighth Regiment.*

Robert Allison.  
Frank Griffin.  
Elijah Jones.  
Henry G. Mahlen.  
John Wilcox.  
John W. Forbush.

*Thirty-first Regiment.*

Emory W. Johnson.  
Horace W. Strickland.

*Thirty-second Regiment.*

Darling Brownell, drafted.

*Thirty-third Regiment.*

Joseph W. Hastings, surgeon.

*Thirty-fourth Regiment.*

Wm. P. Butterworth.  
Wilbur M. Fay.  
Lucien W. Gilbert.  
John H. Wiswell.  
Albert A. Aldrich.  
Theodore Dodge.  
William Foley.  
Lewis Gravell.  
Oscar Marsh.  
Marcus Hartwell.  
Eleazer May.  
James O'Neil.  
John O'Neil.  
Frank Sherman.  
Austin F. Wilson.  
Edward J. Wright.  
Charles J. Bemis.  
Daniel Bliss.  
Charles H. Bliss.  
Almon R. Caswell.  
Harvey B. Stone.  
Joseph R. Brooks.

*Thirty-fifth Regiment.*

James Keleher.  
Leverett L. Butler.

*Thirty-sixth Regiment.*

George H. Jennings.  
Charles Chickering.

*Thirty-ninth Regiment.*

Daniel W. Blanding, drafted.  
Charles Damon, drafted.  
Thomas B. Shaw, drafted.

*Forty-second Regiment.*

Wm. H. Shepard, lieutenant.  
Thomas Bryant.  
Giles Blodgett.  
Albert N. Bliss.  
Amos D. Boud.  
Charles F. Bosworth.  
Samuel J. McIntosh.  
Elias H. Cutler.  
Edwin Bycroft.  
George H. Shepard.  
John W. Shepard.  
Wm. E. Lovegrove.  
Wm. C. Hitchcock.

*Forty-third Regiment.*

James P. Johnson.  
Charles H. Durant.  
Andrew Taft.  
Fitzhenry Moore.  
Hervey Jones.  
James McCullough.  
Charles S. Robinson.  
George W. Nichols.  
Joseph C. Marshall.  
Joseph S. Tidd.  
Warren Bliss.  
Ebenezer Cole, Jr.  
Albert Walker.  
Shepard Dunbar.  
Elijah H. S. Wilson.

*Fifty-fourth Regiment.*

Charles H. Johnson.  
Fitzhenry Newport.

*Fifty-seventh Regiment.*

George Kinnerney.  
Silas W. Cooke.

*Fifty-eighth Regiment.*

Harman Wisner.

*Sixtieth Regiment.*

Alonzo A. Brooks.  
Nelson C. Burbank.  
Charles H. Crossman.  
Proctor L. Ward.

*First Cavalry.*

Sherlock H. Lincoln.  
Almon L. Sweetser.  
Charles Barr.  
Adelbert Packard.

*Second Cavalry.*

James Smith.  
Wm. W. Smith.  
Henry A. Kelly.  
John E. Elliot.

*Second Regiment of Heavy Artillery.*

Timothy Mahoney.  
Wm. Dunn.  
Wm. Smith.  
Charles F. Cutler.  
Obed J. Carroll.  
Andrew Barney.  
Thomas W. Fagan.  
Henry Ball.  
Edward Sullivan.  
Charles H. Barratt.  
Wm. Carter.

*Veteran Reserve Corps.*

John Byron.  
Thomas Davis.  
James Devine.  
Thomas Finnegan.  
John O. Gaffney.  
Fletcher B. Goldsmith.  
George C. Harford.  
Patrick Lane.  
John Morris.  
Philip Mulhaven.  
John O'Brien.  
Thomas O'Brien.  
Enoch J. O'Shea.  
John Patterson.  
Samuel Fauslet.

*Regular Army.*

Peter McGuire.  
Henry M. King.

John H. Wiswell.....died at Wilmington, N. C., March 23, 1865  
Wm. Foley.....killed at New Market, Va., May 15, 1864  
Harvey B. Stone.....died at Petersburg April 2, 1865  
Albert N. Bliss.....died at New Orleans March 31, 1863  
Elias H. Cutler.....died at Brashear City, La., May 28, 1863  
George H. Shepard.....died at Berwick City, La., May 3, 1863  
Chas. H. Johnson.....died of w'nds at Beaufort, S. C., Sep. 18, 1863  
Charles F. Cutler.....died at Andersonville October 1, 1864  
Obed J. Carroll.....died in prison July 3, 1864  
Andrew Barney.....died at Fort Monroe, June 2, 1864  
Oscar Marsh.....died at Wilmington, N. C., March 13, 1865

After the incorporation of the town educational, as well as religious, affairs began to interest the people. In November, 1745, it was voted to build a school-house, twenty feet long and seventeen feet broad, and the sum of eight pounds was appropriated for the board of the schoolmaster eight weeks. As in other towns during the provincial period, the schools were few in number and kept only a few months in the year. They were, moreover, confined exclusively to boys. The introduction of girls into the public schools is well remembered by many now living, not beyond middle age. In 1795 the town was divided into eight districts, each district having the exclusive management of school affairs within its limits. In 1846 one district was added, and the district system so continued until it was abolished in 1869. In 1842 Mrs. T. Lombard gave land on Furnace Hill for educational purposes, and a joint stock company was formed, which established the Quaboag Seminary. At its dedication Daniel Powers, a native of the town, and a graduate of Yale in the class of 1837, delivered an address. Its first principal was Joshua Pearl. Owing to some privileges which the youth of the town received from the seminary, an appropriation of five hundred dollars was made for its benefit in 1850. In 1856 the property of the seminary was bought by the town, and has since been devoted to the use of the high and other schools. The meetings of the town, which had for the most part been previously held in the Congregational Church and a hired hall, were held in the seminary building after its purchase until the erection of the present town-house in 1878. There are now twenty-two schools in the town, one high, three grammar, two intermediate, two intermediate and primary, four first primary, five second primary and five ungraded. These are under the direction of a School Committee and a superintendent.

According to the last annual report of the committee, for the year ending March 1, 1888, there were ten hundred and fourteen enrolled scholars, an average membership of seven hundred and sixty-two, and an average attendance of seven hundred and fifteen.

Connected with the schools is the Agassiz Association, which, though managed by private individuals, is composed of scholars in the high and grammar schools, and is so far recognized by the School Committee as to occupy with their consent a room in one of the school-houses of the town. An evening-school has also been established, and is performing useful work. According

The following persons were drafted in July, 1863, and paid three hundred dollars commutation money:

Samuel E. Tidd.  
Benjamin A. Tripp.  
George T. Lincoln.  
Edward P. Clark.  
John L. Moore.  
Thomas H. Jones.  
Edwin L. Jaggard.

George A. Walker.  
Wm. H. H. Shepard.  
John W. Tyler.  
George Wright.  
Ebridge C. Bliss.  
James L. Weeks.

The following persons were either killed or died in the service during the war:

Alfred Stephens.....died March 30, 1862, at Frederick, Md.  
Chauncey Peck.....killed May 25, 1862, at Barnestown, Va.  
Philo H. Peck.....killed at Gettysburg July 3, 1863  
Wm. M. Cowles.....re-enl. in the navy; was lost in the "Junia." Ira Thompson.....died at Arlington, Va., July 31, 1864  
Horatio Tower.....died at Newport News June 2, 1862  
Lewis Wright.....killed at Cold Harbor June 3, 1864  
Edwin P. Hale.....died at Newbern, N. C., December 9, 1863

to the report above referred to, the sums credited to the school department for the year 1887-88 were,—appropriation for schools, \$9500; appropriation for evening-schools, \$100; appropriation for repairs, \$500; appropriation for books and supplies, \$500; State school fund, \$200.65; books and supplies sold, \$23.65; tuition received, \$86.65. Total, \$10,910.95.

The expenses for the year were,—for salaries of school teachers, \$7,770.80; for salaries of evening-school teachers, \$143.50; for care of evening-schools, \$51.50; for oil, lamps and fixtures, \$20.06; for fuel, \$819.30; for care of buildings, \$867.40; for repairs, \$476.32; for school-books and supplies, \$598.53; for incidentals, \$611.47. Total, \$11,358.88.

As supplementing the work of the public schools, it will be proper here to make some allusion to the Public Library. The library is owned by an association incorporated January 17, 1876, and is managed by a board of trustees. It was put in operation about the time of the erection of the town-house, in 1879, and occupies, by permission of the town, a convenient room on the ground-floor of that building. It receives also an annual appropriation of \$500 and the amount of the dog fund from the town, which, in 1887-88, amounted to \$245.67. The treasurer's last report, dated March 17, 1888, showed cash on hand at the beginning of the year, \$174.48; cash from reading-room, \$125; cash from town, \$500; dog-fund, \$245.67; cash from George F. Blake, Manufacturing Company, \$100; fines, \$42.01; cards, \$9.18; catalogues, \$4.52; total, \$1200.86. It showed payments as follows: For books, \$317.09; for binding, \$48.60; for printing, \$4.67; for librarian, \$300; for cleaning room, \$10.90; for delivering books at West Warren, \$26; for bag for same, \$3; for gas bills, \$82.75; for supplies, \$3.86; for freight and express, \$2.07; cash on hand, \$395.92; total, \$1200.86.

The reading-room, which, though connected with the library, is so far distinct as not to be free, received during the year a contribution of one hundred dollars from the George F. Blake Manufacturing Company, and \$79.50 from other subscriptions, which left, after paying \$54.51 for papers and magazines, the sum of \$125 credited to the library account. In 1884 Lucius J. Knowles, of Worcester, for many years a resident of the town, gave by his will five thousand dollars to the town, the income to be used for the support of the library. The legacy was paid in 1887, and the library is now reaping its benefit. The number of books in the library March 1, 1888, was five thousand two hundred and sixty-four. During the year previous the number of books given out was seventeen thousand and thirty-four. The establishment of this library reminds the writer of the impression he has received from a survey of many of the towns in Worcester County, that probably no other county in the Commonwealth has done and is doing so much to build up these auxiliaries to the public schools. To a considerable portion of the people of the county they are

more important than the schools themselves. Its large and increasing number of immigrant families, drawn to it by its extensive and flourishing industries, are many of them too old to reap the advantages of a school education, but are enabled by these library associations to breathe a purer atmosphere and absorb at least the elements of an education, which otherwise they could not have received.

After the foundations of religion and education had been laid, the attention of the people of the town was directed more particularly to the special purposes of their settlement and the business relations of life. At first agriculture was the almost universal employment, with here and there on favorable streams a saw-mill to provide lumber for their houses and a grist-mill to provide food for their cattle and themselves. Of course the development of manufacturing industries has enticed many from the plough and the furrow, while the growth of agriculture in the West, with facilities for obtaining Western grain at a cost less than that of raising it at home, has aided in the depreciation of an industry which a century ago was the source from which all the comforts of life were secured. But Warren still holds its own with other towns in obtaining from the soil what it will yield with ease and profit. It will not be out of place to include in this narrative a schedule of the agricultural products and property of the town taken from the census of 1885:

<i>Animal Products.</i>		<i>Wood Products.</i>	
Calf skins.....	\$100	Ashes.....	\$123
Candles.....	13	Rails.....	20
Hides.....	61	Fuel.....	3,673

		<b>Total.....</b>	<b>\$11,911</b>

It was not long after the usefulness of the Quaboag River and Wigwam Brook was proved in connection with grist-mills and saw-mills before it was discovered that these streams could be put to more profitable uses. In 1793 there were in operation on Quaboag River, within the town limits, two grist-mills, one saw-mill, one scythe-mill, one fulling-mill and one forge.

In 1800 iron works were established by Joseph Field and Isaac Moore, and in 1812 powder-mills were built on the present site of the steam pump works. These last were exploded in 1826 and never rebuilt. Among the natives of Warren who were inspired by the inventive spirit of the age in the early

part of the present century was Nathan Read. He was the son of Major Reuben Read, who won some distinction in the Revolutionary War, and was born in Western (now Warren), July 2, 1759. He graduated at Harvard in 1781, in the class with John Davis, for many years judge of the United States Court, and Samuel Dexter and Dudley Atkins Tyng. In 1795 he settled in Danvers and engaged in the manufacture of anchors and chain cables, and removed to Belfast, Maine, in 1807. From 1800 to 1803 he represented the Essex South District in Congress, and in the year of his removal to Belfast was made chief justice of the Court of Common Pleas in Hancock County. He was the first petitioner for a patent before the patent law was enacted. He invented the machine for manufacturing nails and was the first to apply steam to locomotives. He died in Belfast January 20, 1849. In 1812 the manufacture of scythes was begun at West Warren and carried on many years, but has long since been abandoned. In 1815 the manufacture of cotton cloth was begun in the mill now used for the manufacture of cotton warp; but when the mill went into the hands of Lucius J. Knowles the manufacture of its present product was introduced. The present industries of the town are the cassimere factory, conducted with eight sets of machinery, by Sayles & Jenks; the Warren Cotton-Mills, at West Warren; an ink and blueing factory, owned by G. J. & I. E. Moore; two edge-tool factories, one of which is at West Warren; a cheese factory, another cotton-mill on the Quaboag River, the warp-mill, conducted by Moses K. Whipple, and the Knowles' steam pump works. The works last mentioned are situated on Wigwam Brook in the central village, and are very extensive and successful. They were established by Lucius J. Knowles, who, with growing success, carried them on some years with Simon K. Sibley, and sold them in 1879 to the George F. Blake Manufacturing Company, under whose management they are now carried on, with E. F. Strickland, a most competent and intelligent superintendent. The steam pumps of this company have the best reputation, and find their way to England, France, South America, Japan, and indeed to all parts of the world. Recently the Emperor of Japan has ordered and received one for the irrigation of his garden and other private grounds. A pump made at these works is now in use in Chicago pumping eight millions of gallons of water daily.

The cotton-mills at West Warren, owned by Bliss & Fabyan, of Boston, include a large plant and employ a large number of hands. The plant includes four mills with an aggregate of seven hundred and thirty-two looms, and forty-four houses containing one hundred and nineteen tenements. These establishments furnish an amount of employment which has constantly added to the population, prosperity and wealth of the town. In 1791 the population was estimated at 900; in 1838, 1196; in 1865, 2180; in

1870, 2623; in 1875, 3260; in 1880, 3889; and in 1885, 4032. The valuation of the town in the last census, in 1885, \$2,373,757.

The town is not supplied, in its corporate capacity, with water. For private supply reliance is had exclusively on wells and pumps, and small aqueducts owned by individuals. Pipes, however, are laid in the streets by the town, and in case of fire, supplied with water by the Knowles Steam Pump Works and the Warren Cotton-Mills. The streets are lighted by gas furnished by the Warren Cotton-Mills and the Globe Gas-Light Company, and a small Fire Department, in the possession of one engine and two hose carriages with hose, is supported by the town. The following estimate of expenses for the year 1888-89, reported to the town by the selectmen, will give some idea to the reader of the scope of the municipal operations of the town:

Contingencies.....	\$1,200 00
Town officers.....	1,600 00
Roads and bridges.....	3,500 00
Sidewalks.....	500 00
School-teachers and fuel.....	10,500 00
Evening schools.....	200 00
Books and supplies.....	800 00
Repairs of school buildings.....	500 00
Support of poor.....	2,000 00
Fire Department.....	1,500 00
Cemetery.....	200 00
Street lights.....	800 00
Military and State aid.....	200 00
Abatement of taxes.....	300 00
Reduction of school-house debt.....	2,700 00
Old town debt.....	1,000 00
Interest on town debts.....	1,500 00
Public Library.....	500 00
County tax.....	1,725 00
State tax.....	2,902 50
Total.....	\$34,127 50

Among the institutions and societies in the town are the Quaboag Lodge and the King Solomon R. A. Chapter of Masons; the Arcturus Lodge 187, I. O. O. F.; the Clara Barton Post, No. 65, G. A. R.; the Calvin Cutter, Sons of Veterans, No. 51; the Crescent Division, No. 24, Sons of Temperance; the Knowles Council, No. 809, Royal Arcanum; the Northern Mutual Relief Association; and the Warren Savings Bank, of which John W. Chadsey is president, Joseph B. Lombard, vice-president, and Samuel E. Blair, treasurer.

In order that some idea may be obtained of the representative men of Warren in the different generations since its incorporation, it will be well to present lists of those persons who have represented it in the Legislature and filled offices of trust by the suffrage of their fellow-citizens.

The following is a list of the selectmen from 1741 to 1889, with the exception of those in one or two years, concerning whom the records are either silent or from their defacement can throw no light:

1741. Solomon Keys.	Nathaniel Read.
Noah Ashley.	1742. Noah Ashley.
Peter Rice.	Peter Rice.

Blair.	Thomas Rice.
Samuel Bliss.	Thomas Cutler.
1743. Noah Ashley.	John Blair.
Peter Rice.	1760. Simeon Dwight.
Gershom Makepeace.	Gershom Makepeace.
Thomas Rich.	James Whitcomb.
Solomon Keys, Jr.	Nathaniel Read.
1744. Noah Ashley.	1761. Gershom Makepeace.
Solomon Keys.	John Patrick.
Samuel Bliss.	James Stone.
Peter Rice.	Thomas Rice.
Thomas Rich.	Simeon Dwight.
1745. Solomon Keys.	1762. Gershom Makepeace.
Peter Rice.	Simeon Dwight.
John Cheney.	John Damon.
Thomas Rich.	John Blair.
David Blair.	Nathaniel Read.
1746. ———	1763. Simeon Dwight.
1747. Solomon Keys.	Gershom Makepeace.
Noah Ashley.	James Stone.
Thomas Rich.	Nathaniel Read.
James Whitcomb.	Solomon Rich.
Nathaniel Read.	1764. Simeon Dwight.
1748. Noah Ashley.	Gershom Makepeace.
Peter Rice.	Nathaniel Read.
Gershom Makepeace.	James Stone.
James Whitcomb.	Solomon Rich.
Josiah Putnam.	1765. Simeon Dwight.
1749. Solomon Keys.	James Brown.
Peter Rice.	John Damon.
Ephraim Hayward.	Isaac Tyler.
Nathaniel Read.	James Stone.
Thomas Rice.	1766. Simeon Dwight.
1750. Solomon Keys.	Gershom Makepeace.
Peter Rice.	James Brown.
Thomas Rice.	Nathaniel Read.
John Damon.	Solomon Rich.
Ephraim Hayward.	1767. Simeon Dwight.
1751. ———	Gershom Makepeace.
1752. Solomon Keys.	James Stone.
Simeon Dwight.	James Brown.
Nathaniel Read.	Solomon Rich.
Wm. Virgin.	1768. Simeon Dwight.
John Blair.	Gershom Makepeace.
1753. Simeon Dwight.	James Stone.
Solomon Keys.	James Brown.
Thomas Rich.	Solomon Rich.
Peter Rice.	1769. Simeon Dwight.
Wm. Virgin.	James Stone.
1754. Simeon Dwight.	Josiah Putnam.
John Tyler.	Nathaniel Read.
Gershom Makepeace.	Solomon Rich.
Nathaniel Read.	1770. Simeon Dwight.
John Patrick.	Gershom Makepeace.
1755. Solomon Keys.	James Stone.
Simeon Dwight.	Nathaniel Read.
Peter Rice.	Solomon Rich.
Thomas Rice.	1771. Simeon Dwight.
David Blair.	James Stone.
1756. Gershom Makepeace.	Solomon Rich.
James Whitcomb.	John Patrick.
John Tyler.	Reuben Read.
Thomas Cutler.	1772. Simeon Dwight.
James Brown.	James Stone.
1757. Gershom Makepeace.	Solomon Rich.
Simeon Dwight.	Nathaniel Read.
James Whitcomb.	Joseph Cutler.
John Damon.	1773. Simeon Dwight.
Nathaniel Read.	James Stone.
1758. Simeon Dwight.	John Patrick.
Gershom Makepeace.	Reuben Read.
James Stevens.	Abner Tyler.
Thomas Cutler.	1774. Josiah Putnam.
Robert Gray.	John Blair.
1759. Gershom Makepeace.	Isaac Tyler.
Simeon Dwight.	Danforth Keys.

Nathan Foster.	Joseph Cutler.	Daniel Hodges.	1823. Oliver Bliss.
1775. Simeon Dwight.	Abner Tyler.	Wm. Cowee.	Isaac Patrick.
John Patrick.	Eleazer Cook.	Augustus Phillips.	Joseph Ramsdell.
Isaac Gleason.	Cyrus Rich.	Jonathan Bridges.	Levi Brown.
Reuben Read.	1791. Reuben Read.	1807. Same.	Pardon Keys.
Josiah Putnam.	Abner Tyler.	1808. Joseph Field.	1824. Gershom Makepeace.
1776. John Patrick.	Isaac Moore.	Daniel Hodges.	Linus Hoar.
Josiah Putnam.	Joseph Jones.	Samuel Knight.	Pardon Allen.
Danforth Keys.	Cyrus Rich.	Jonathan Bridges.	Isaac Gleason.
Isaac Gleason.	1792. Danforth Keys.	Joshua Read.	David Batcheller.
Reuben Read.	Reuben Read.	1809. Joseph Field.	1825. Isaac Tyler.
1777. Simeon Dwight.	Josiah Putnam, Jr.	Daniel Hodges.	Isaac Patrick.
James Stone.	Joseph Jones.	Jonathan Bridges.	Linus Hoar.
Danforth Keys.	James Brown, Jr.	Abijah Mills.	Pardon Allen.
Isaac Tyler.	1793. Reuben Read.	Joseph Ramsdell.	John Patrick, Jr.
Isaac Bliss.	Joseph Field.	1810. Same.	1826. Pardon Allen.
1778. Isaac Gleason.	Joseph Jones.	1811. Joseph Field.	John Patrick.
Duty Partridge.	Abner Tyler.	Daniel Hodges.	Thomas Damon.
William Blair.	James Brown, Jr.	Daniel Tyler.	John Patrick, Jr.
Samuel Bliss.	1794. Reuben Read.	Abijah Mills.	Daniel Holt.
1779. Sam. Bascom.	Matthew Patrick.	Joseph Ramsdell.	1827. Pardon Allen.
Isaac Gleason.	Joseph Field.	1812. Joseph Field.	Thomas Damon.
William Blair.	Eleazer Cook.	Daniel Hodges.	Daniel Holt.
Isaac Bliss.	Aaron Bliss.	James Blair.	Dady Blodgett.
John Barrus.	1795. Matthew Patrick.	Joseph Ramsdell.	James Blair.
1780. Danforth Keys.	Reuben Read.	John Hill.	1828. Pardon Allen.
Solomon Rich.	Joseph Field.	1813. Samuel Knight.	Daniel Holt.
John Barrus.	Aaron Bliss.	Isaac Tyler.	Pardon Keys.
Samuel McAllister.	Samuel Blair.	Timothy P. Bridges.	James Blair.
William Brown.	1796. Ebenezer Cutler.	Hervey Bascom.	Alvan Blair.
1781. John Barrus, Jr.	James Brown, Jr.	Levi Read.	1829. Pardon Allen.
Isaac Gleason.	David Burroughs.	1814. Samuel Blair.	Pardon Keys.
Josiah Putnam, Jr.	James Blair.	Isaac Tyler.	Aaron Bliss.
Barnabas Blackmer.	Seth Blair.	Timothy P. Bridges.	Warner Lincoln.
Jason Wright.	1797. Aaron Bliss.	Hervey Sessions.	Thomas Damon.
1782. Danforth Keys.	James Blair.	Joshua Read.	1830. Thomas Damon.
Isaac Gleason.	Seth Blair.	1815. Isaac Tyler.	Warner Lincoln.
John Hamilton.	Nathan Read.	Timothy P. Bridges.	Timothy Jones.
Joseph Cutler.	Moses Tyler.	Hervey Sessions.	Stephen Gleason.
Reuben Read.	1798. ————	Oliver Bliss.	Joseph Ramsdell.
1783. James Stone.	1797. Danforth Keys.	Ezekiel Bliss.	1831. Thomas Damon.
Isaac Bliss.	Joseph Fields.	1816. Hervey Sessions.	Warner Lincoln.

The moderators of annual town-meetings have been as follows :

1741. Noah Ashley.	1749. Joseph Lovel.
1742. Solomon Keys.	1750-52. Solomon Keys.
1743. Noah Ashley.	1753. Thomas Rich.
1744-48. Solomon Keys.	1754. Simeon Dwight.

The following have been the town clerks :

1741-42. Matthew Beal.	1811-15. Seth Lincoln.
1743. Noah Ashley.	1816-18. Pardon Keys.
1744. Matthew Beal.	1819. Asa Putnam.
1745-47. James Whitcomb.	182-25. Reuben Cutler.
1748-49. Noah Ashley.	1826-30. Daniel Hitchcock.
1750-52. Solomon Keys.	1831-34. Joseph Field.
1753-75. Simeon Dwight.	1834-38. John Moore.
1776-80. Josiah Putnam.	1839-41. James S. Davis.
1781-82. John Barrus.	1842. Royal Knight.
1783-86. Danforth Keys.	1843-44. James S. Davis.
1787. Duty Partridge.	1845-48. Lorenzo Mariner.
1788-1808. Danforth Keys.	1849-54. Joseph F. Hitchcock.
1809-10. Joseph Field.	1855-89. Samuel E. Blair.

The following have been town treasurers :

1741. ————	1801-2. Isaac Moore.
1742-46. Solomon Keys.	1803-5. Joseph Field.
1747-52. James Whitcomb.	1806-10. Daniel Hodges.
1753-62. Josiah Putnam.	1811. James Blair.
1763. Samuel Bascom.	1812. Joseph Ramsdell.
1764-65. Josiah Putnam.	1813-15. Samuel Blair.
1766-68. James Stone.	1816-18. Isaac Tyler.
1769-72. Joseph Cutler.	1819-21. Reuben Cutler.
1773-76. Danforth Keys.	1822-24. Oliver Bliss.
1777-79. Samuel Bascom.	1825-26. Edmund Mayo.
1780-81. Major Beal.	1827-29. James Blair.
1782-84. Ebenezer Cutler.	1830. Daniel Hitchcock.
1785-86. Abner Tyler.	1831-35. Joseph Field.
1787-89. Cyrus Rich.	1836-38. John Moore.
1790-92. Matthew Patrick.	1839-41. James S. Davis.
1793. Josiah Putnam.	1842. Royal Knight.
1794-96. David Burroughs.	1843-44. James S. Davis.
1797-98. Seth Lincoln.	1845-48. Lorenzo Mariner.
1799. Danforth Keys.	1849-54. Joseph F. Hitchcock.
1800. Solomon Cummings.	1855-89. Samuel E. Blair.

The following have been the Representatives in the General Court since the adoption of the State Constitution in 1780, either representing the town or the representative district of which the town has formed a part :

1780. Col. James Stone.	1819. Hervey Sessions.
1781. None.	1820. Samuel Blair.
1782. James Stone.	1821. Oliver Bliss.
1783. None.	1822. None.
1784. James Stone.	1823. None.
1785. None.	1824. None.
1786. Isaac Gleason.	1825. Hervey Sessions.
1787. Same.	1826. Isaac Patrick.
1788. None.	1827. Isaac Patrick.
1789. Matthew Patrick.	1828. Pardon Keys.
1790. None.	1829. Pardon Allen.
1791. None.	1830. Pardon Allen.
1792. Danforth Keys.	1831. Pardon Allen.
1793. None.	1832. Pardon Allen.
1794. None.	1833. Joseph Field.
1795. Reuben Read.	1834. Joseph Field.
1796. None.	1835. None.
1797. None.	1836. Chester Powers.
1798. Reuben Read.	1837. Pardon Allen.
1799. Reuben Read.	1838. Pardon Allen.
1800. Joseph Field.	1839. John Moore.
1801. Joseph Field.	1840. Thomas Damon.
1802. None.	1841. John Tyler.
1803. None.	1842. Aaron Bliss.
1804. Danforth Keys.	1843. Daniel A. Hathaway.
1805. None.	1844. Daniel A. Hathaway.
1806. Joseph Field.	1845. Franklin Drury.
1807. Joseph Field.	1846. Sullivan Cowee.
1808. None.	1847. None.
1809. Joseph Field.	1848. Lewis Moore.
1810. Joseph Field.	1849. None.
1811. Daniel Hodges.	1850. None.
1812. Joseph Field.	1851. None.
1813. Samuel Blair, Jr.	1852. Levi Merritt.
1814. Josiah Putnam.	1853. None.
1815. Hervey Sessions.	1854. None.
1816. Hervey Sessions.	1855. Joseph Ramsdell, Jr.
1817. None.	1856. Samuel E. Blair.
1818. None.	1857. Joseph B. Lombard.

The 21st article of amendments to the Constitution was adopted by the Legislatures of 1856 and 1857, and ratified by the people in 1857. The amendment provided for a House of Representatives of two hundred and forty members, and a census of legal voters in 1857, upon which an apportionment of Representatives should be made in the manner specified in the amendment, which should continue until the apportionment based on a census to be taken in 1865. It was further provided that a census should be taken in 1865, and every tenth year thereafter, as a basis of future apportionments. Under the apportionment of 1857 the towns of New Braintree, Warren and West Brookfield constituted the 11th Representative District of Worcester County, and were represented until the next apportionment as follows :

Samuel E. Blair, of Warren.....	1858
Nelson Carpenter, of Warren.....	1859
George Crowell, of West Brookfield.....	1860
Joseph Rawson, of West Brookfield.....	1861
Lucius J. Knowles, of Warren.....	1862
Saxton P. Martin, of New Braintree.....	1863
John M. Fales, of West Brookfield.....	1864
Lucius J. Knowles, of Warren.....	1865
Nathan Richardson, of Warren.....	1866

Under the apportionment of 1866, based on the census of 1865, the towns of Brookfield, North Brookfield, Sturbridge, Warren and West Brookfield constituted the 18th Representative District of Worcester County, and, until the next apportionment, were represented as follows :

James S. Montague, of Brookfield.....	1867
Charles E. Smith, of West Brookfield.....	1867
Amasa C. Morse, of Sturbridge.....	1868
Joseph B. Lombard, of Warren.....	1868
Ezra Batcheller, of North Brookfield.....	1869
Daniel W. Knight, of Brookfield.....	1869
Benjamin A. Tripp, of Warren.....	1870
John Harvey Moore, of Warren.....	1870
Martin L. Richardson, of Sturbridge.....	1871
George S. Duell, of Brookfield.....	1871
Daniel W. Knight, of North Brookfield.....	1872
Simon H. Sibley, of Warren.....	1873
Noah D. Ladd, of Sturbridge.....	1873
Wm. B. Stone, of West Brookfield.....	1873
Warren Tyler, of North Brookfield.....	1874
Stillman Butterworth, of Brookfield.....	1874
Charles B. Sanford, of West Brookfield.....	1875
George T. Lincoln, of Sturbridge.....	1875
Charles Fuller, of Sturbridge.....	1876
John Wetherbee, of Warren.....	1876

Under the apportionment of 1876, based on the census of 1875, the towns of Brookfield, North Brookfield, Sturbridge, Warren and West Brookfield constituted the 12th Representative District of Worcester County, and were represented until the next apportionment as follows :

Wm. H. Montague, of North Brookfield.....	1877
George W. Johnson, of Brookfield.....	1877
George C. Lincoln, of North Brookfield.....	1878
Alvin B. Chamberlain, of Sturbridge.....	1878
Theodore C. Bates, of North Brookfield.....	1879
Joseph Smith, of Warren.....	1879
George W. Johnson, of Brookfield.....	1880
George N. Bacon, of Sturbridge.....	1880
George A. Parratt, of West Brookfield.....	1881
George M. Newton (died), of Warren.....	1881
Lucian M. Gilbert (vacancy), of Warren.....	1881
Hiram Knight, of North Brookfield.....	1882
David W. Hodgkins, of Brookfield.....	1882
Emory L. Bates, of Sturbridge.....	1883
Horace W. Bush, of West Brookfield.....	1883
Alden Batcheller, of North Brookfield.....	1884
Joseph W. Hastings, of Warren.....	1884
Edwin D. Goodell, of Brookfield.....	1885
David B. Wight, of Sturbridge.....	1885
Edwin Wilbur, of West Brookfield.....	1886
Marcus Burroughs, of Warren.....	1886

Under the apportionment of 1886, based on the census of 1885, the towns of Brookfield, New Braintree, North Brookfield, Oakham, Sturbridge, Warren and West Brookfield constitute the Fifth Worcester Representative District, and have been represented as follows :

Edwin D. Goodell, of Brookfield.....	1887
Samuel Clark, of North Brookfield.....	1887
George H. Coolidge, of West Brookfield.....	1888
Henry D. Haynes, of Sturbridge.....	1888
George Bliss, of Warren.....	1889
John B. Gould, of Warren.....	1889

These lists show who, in the career of the town, have had its management in their hands. So far as town officers were concerned, it seems to have been

the policy of the town to make frequent changes. This policy was partly due to the feeling that the offices belonged to the people, and that both their honors and burdens should be distributed. In later years it is evident that a belief has prevailed that office is a trust, that an officer is a servant and that a faithful man should be retained in the town's employ. Mr. Samuel E. Blair, the present town clerk and treasurer, has been continued in office thirty-three years. His repeated re-elections have been as creditable to the town as to himself. Among the names on the lists are many who have distinguished themselves in various walks of life. There are Captain Josiah Putnam, Major Reuben Read, Captain John Cutler, Captain Joseph Cutler, Lieutenant Samuel Bascom, Lieutenant Cyrus Rich, Corporal James Blair, Private Solomon Rich and others, who took part in the War of the Revolution. There are Nathan Read, the jurist and inventor; Joseph Field, one of the early manufacturers of the town, and Lucius J. Knowles, recently deceased, who established permanent and flourishing industries, and at his death, at Worcester, in 1884, made himself, by his will, a benefactor of the town.

Mr. Knowles, of whom it is proper to take more than a passing notice, was a man of more than usual attainments, and in his long and industrious career won not only distinction, but ample rewards of his labors. He was born in Hardwick, July 2, 1819, and received his education from the public schools of his native town and at Leicester Academy. At the age of seventeen he entered a store at Shrewsbury, and soon entered into partnership with his employer. In 1844 he began the manufacture of thread at New Worcester, in which he used a spooling-machine of his own invention. In 1847, in company with Harrison H. Sibley, he began the manufacture of cotton warp, at Spencer, and at the end of two years removed to Warren, where, for several years, he and Mr. Sibley continued the same business. In 1853 Knowles & Sibley also engaged in the manufacture of woolen goods in a mill erected by them on the Quaboag River, a little distance below the warp-mill. Possessing practical inventive power, he had devoted himself more or less to improvements on machinery, for the manufacture of which, in 1862, he erected a mill on Wigwam Brook, a branch of the Quaboag, which after a short time was confined in its operations to the manufacture of a steam pump, which, through successive steps of improvement, he had perfected.

In 1879, having previously bought the interest of Mr. Sibley, he sold his pump-works to the George F. Blake Manufacturing Company, and removed to Worcester, where he devoted himself until his death to the manufacture of looms. In his will he gave "the sum of five thousand dollars to the Inhabitants of the Town of Warren for the support and maintenance of the Free Public Library of said town." This legacy is held in trust by the Board of Selectmen and

its income paid to the library trustees. He also gave to the town in trust one thousand dollars, "the income thereof to be devoted to the embellishment of my lot in the cemetery in said Warren and to taking care of the same and keeping it in complete and perfect order forever."

The town of Warren deserves a more thorough investigation into its history and a more exhaustive record of its career than the limited space allotted to this sketch would permit. Mrs. Dr. Cutter and Rev. O. I. Darling are both familiar with its present and its past, and both have placed the people of the town under an obligation, the weight of which it is hoped that one or both will increase by expanding into a full history the works of which they have been the authors. That part especially of Warren which once belonged to Brookfield has an early history of interest, and the picturesque situation of the town on the banks of the Quaboag, with its surrounding hills, from which Graylock and Monadnock and Wachusett come within the horizon, should inspire some loving son, either native or adopted, to present to its people a worthy and lasting memorial.

---

#### BIOGRAPHICAL.

---

CALVIN CUTTER, A.M., M.D.

The oldest child of John Cutter was born in Jaffrey, N. H., 1807, and died in Warren, Mass., 1872. His ancestors came from Newcastle-upon-Tyne, having a Danish origin. Dr. Calvin Cutter married (first) Caroline, daughter of Nathan Hall, of Milford, N. H.; married (second) Eunice N., daughter of Captain Chester Powers, of Warren, Mass. The Powers family is of Norman origin, one of the name having commanded troops at the battle of Hastings, under William the Conqueror. Captain Chester Powers possessed a sound mind in a sound body; he died at a ripe old age. Mrs. E. P. Cutter being a child when her mother died, an older brother (Daniel) was requested to have especial charge of her education; from his assiduous care and particular instruction, she was enabled in early girlhood to instruct others. This brother had a fine physique, was an accomplished scholar and a true, exemplary Christian; he was a graduate of Yale's famed class of '37, and took a high degree. At the time of his early-death he was senior tutor in his *alma mater*.

In 1829 Calvin Cutter began the study of medicine, and took his medical degree from Dartmouth. Subsequently, at different periods, for proficiency in some particular department of medicine, he attended lectures in Bowdoin and Harvard Medical Colleges; also took private lessons in surgery of Dr. George McClellan and the eminent surgeon, Dr. Valentine Mott.

Dr. Cutter inherited from his father quickness of

*Calvin Cutler*

John Brown

perception, acute investigation and a retentive memory. These qualities of the intellect were effective aids in his profession; he had but few peers in discriminating quickly and, at the same time, accurately diseases. In his practice he sought to know "the limit of his art." In surgery he was skillful. One of the many successful operations which he performed was the removal of a large tumor from over the carotid artery in the neck, where a mere film interposed between the life here and the life beyond.

From the year 1842 to 1856, inclusive, Dr. Cutter visited thirty States of the Union delivering professional lectures upon anatomy, physiology and hygiene before schools, colleges and public audiences, illustrating his subject with manikins and other apposite apparatus. The first school edition of "Cutter's Anatomy, Physiology and Hygiene," so universally known, was published in 1850, and in 1852 the revised stereotype edition appeared. It has had great success; six hundred thousand copies have been printed. Dr. Cutter regarded the introduction of physiology into schools and colleges as the great work of his life, and he spent a fortune in its accomplishment.

Dr. Cutter was an original thinker and reformer. Before he left his mountain home he was an advocate of total abstinence, and a few years later he became a staunch abolitionist. His activity in favoring just and equal rights was unbounded. In the winter of 1886, also in the summer following, he went to Kansas, where the contest between freedom and slavery was met by other than moral arguments. In the June trip, Mrs. Cutter accompanied her husband and shared the privations and unusual perils with him and the first Worcester Armed Company, which did effective service in protecting the Free State settlers from the Missourian ruffians and thus aiding the freedom of Kansas.

In 1861 a nephew of Mrs. Cutter, Capt. A. W. Powers, was the first young man to enlist from Warren in the War of the Rebellion. In August following, Dr. Cutter was mustered into the Union Army as regimental surgeon of the Twenty-first Massachusetts Infantry, afterward became brigade, division, and later acting director of the Ninth Army Corps. He had the "high regard of the superior officers, as Generals Burnside and Reno," and possessed great influence over the "boys" whom they commanded. June, 1863, near Mt. Sterling, Ky., he suffered a severe sunstroke, which ultimately caused his death. He left the army after the battle at Spottsylvania, on account of inability for service, and lingered uncomplainingly eight years within an inch of time.

But few men were better adapted to lead a forlorn hope in a crisis when right was overpowered by might that sought personal or party aggrandizement. No favor swayed, no fear awed, when his clear, strong intellect discerned the path of justice, of duty. No one had more contempt for chicanery or trickery

which leaves an indelible stain on the character. When the oppressed or honest poor man needed lifting up, kindness of heart was not wanting. If a humane cause languished for want of funds, his purse was freely opened. Money with Dr. Cutter was a means to raise the people to a higher plane of thought and activities; he preferred the profits arising from brain stock, that elevates, ennobles mankind, to the profits of bank stock, that pampers to arrogance and idleness.

CARRIE E., young, educated, patriotic, sailed with her father in the Burnside expedition to North Carolina as nurse. She was probably the first female that entered her country's service in the War of the Rebellion, and the first to fall (March, 1862) at her post of duty. She sleeps where the magnolia blooms, and overhanging vines bend down and kiss her Southern grave.

Dr. Cutter's surviving child, JOHN CLARENCE, graduated from the Agricultural College, Amherst, in 1872. Studied medicine at Dartmouth and graduated from Harvard Medical College in 1877. He gained the post of house surgeon in the City Hospital, Boston, before receiving his diploma. In 1878 he went to Japan, as professor of physiology and comparative anatomy in the College of Agriculture, at Sapporo, Yezo, and as consulting physician to the Imperial Colonial Department. Dr. Cutter's first contract with the Imperial Government was for two years, but he remained nine years in the Island Empire. In recognition of meritorious service in the college, and for professional services rendered in the department of the Hokkaido, the Emperor of Japan conferred on him (1887) the "Decoration of the Fourth Class of the Order of the Rising Sun" (Kunsho no Kunshito, Order of Meiji, IV. Class).

There are eight classes of this order. While in Japan, Dr. J. C. Cutter wrote two school Physiologies, one of which has been translated into Japanese. Since his return from the Orient, *via* India, Egypt and Europe, he has re-cast and supplemented topics to the "First Book" on anatomy, physiology and hygiene, prepared in 1854 by his father, Calvin Cutter. This "First Book" has had unprecedented sale in the United States and Canada. It has been translated and published in ten languages and in raised letters for the blind. Dr. John C. Cutter is now (1889) in Europe pursuing special medical studies.

#### JOHN MOORE.

John Moore was born in Warren, Mass., October 27, 1802. He was the youngest of eight children of Isaac and Hannah (Studley) Moore, who were married Mar. 18, 1782, and resided in Warren. His father was born April 18, 1752, and his mother July 6, 1759. Previous to her marriage she lived in Hanover, Plymouth County, Mass. She was a descendant of the Studleys of Yorkshire and Kent Counties, England—

well-known business man. He was one of the few who could afford to purchase land in Warren and vicinity, some of which is in the same condition as when originally purchased by him, more than a hundred years ago. He must have been an enterprising citizen, for he had many occupations. He manufactured and sold a variety of goods, including iron, steel, and tinware. He was also a merchant, and his business was extensive. He was a member of the town council, and his influence was felt in many ways. He was a man of great energy and determination, and his success was well-deserved.

Isaac Moore (father of John) became the owner of a large tract of land in Warren and vicinity, some of which is in the same condition as when originally purchased by him, more than a hundred years ago. He must have been an enterprising citizen, for he had many occupations. He manufactured and sold a variety of goods, including iron, steel, and tinware. He was also a merchant, and his business was extensive. He was a member of the town council, and his influence was felt in many ways. He was a man of great energy and determination, and his success was well-deserved.

When John Moore came to Warren, he found a town on the verge of the Kennebec. He seems to have managed his business with excellent judgment, and met with more than an average success. In July, 1827, when he was twenty years of age, he made a journey to England, and returned with a large fortune. He then returned to Warren, and began his business career. He received from his father, urging him to sell out his business and return to Warren, where it is presumed he assumed the charge of his father's business affairs. Very soon after his return he built a store, and began his business career in Warren on a scale that attracted customers from all parts of Worcester, Franklin and Hampden Counties, and even from Connecticut.

In 1836 he was appointed town clerk of Warren, which he held for three years. He was also the postmaster for a considerable time. In 1838 he was chosen as Representative to the General Court. In all of these responsible positions he gave general satisfaction. It will be remembered that in 1837, and

of the whole country became disturbed, and failures and financial disasters were universal. John Moore did not escape. He had many losses and discouragements, but he never lost heart, and continued in business until 1840, when he was forced to change.

He and his son Isaac began the manufacture of the "Excelsior School Writing Ink," which was put up in a small bottle of bottle. The ink met with a good reception from the public, and their ink business became one of the industries of the town. From a small beginning it has assumed considerable importance, and the reputation of "Moore's Ink" stands high in the mercantile community.

Joseph F. Hitchcock, son of Daniel and Mary (Marsh) Hitchcock, was born in Warren July 27, 1815. The first of that name are believed to have emigrated to this country from England about the year 1635, landing in Boston, and locating shortly afterwards in New Haven, Conn., from whence their descendants spread northward into Massachusetts and elsewhere. His father, Daniel Hitchcock, born in Palmer in 1787, came to Warren when a boy, and entering the store of Joseph Field, Esq., a prominent citizen, as a clerk, became a merchant.

He served his town in various capacities, including the offices of town clerk, member of the Board of School Committee, justice of the peace, etc.

The subject of this sketch laid the foundation of his education in the common schools of his native town, the one in his district being unusually good, owing to the efforts and interest of his father and others living in that part of the town. Afterward he had the benefit of the training of Leicester and Westfield Academies for short periods of time. The delicate state of his health prevented him from obtaining a collegiate education—a fact which he regretted, as the law was what he would have chosen for a profession. Leaving school, he went to work for his father, and although trade was not to his taste, he continued in it for many years.

Appointed justice of the peace, trial justice, and to kindred offices, he honored them all by a conscientious discharge of all the duties appertaining thereto. The accurate and minute accounts returned to Probate Court bear sufficient testimony to his faithful-

ness. He was a man of great energy and determination, and his success was well-deserved. He was a member of the town council, and his influence was felt in many ways. He was a man of great energy and determination, and his success was well-deserved.

He was a man of great energy and determination, and his success was well-deserved. He was a member of the town council, and his influence was felt in many ways. He was a man of great energy and determination, and his success was well-deserved.

*J. F. Winchell*

ness. He settled estates of both rich and poor, and for the latter class he was glad to have been helpful without pay. He wrote wills, drew up deeds and other papers with a thoroughness and exactness that were especially noteworthy, inasmuch as his training as a lawyer was outside the schools. His practical sagacity in canvassing every necessary point made his work in these directions superior to that of many with better theoretical education, and his services were constantly in demand as a legal adviser. No matter how much people differed with him, when in trouble they were always found coming to him for help and advice, depending upon his rare judgment, which overlooked no contingencies. Whenever possible he aided in the settlement of difficulties without resort to the courts.

Politically he was a Whig, but was among the first to aid in the formation of the Republican party, of which he was a conspicuous and enthusiastic supporter and leader.

Appointed postmaster under Abraham Lincoln's administration in 1861, he continued to hold the office, which meanwhile became a Presidential appointment in 1872, under U. S. Grant, until the day of his death, in 1880. He had also previously held the office from 1841 to 1845, as a Whig, under Harrison. In 1857 he represented the First Worcester District in the State Senate, and in 1865 and 1866 was a member of the Executive Council.

Always interested in the growth and prosperity of his own town, he furthered every project of public improvement—such as the establishment of Quaboag Seminary; the securing and laying out of the pretty park which is still the ornament of the village; the opening of the Western Railroad; the establishment of the Warren Public Library, etc. He was clerk and treasurer of the (Trinitarian) Congregational Church and Society for years, and when their church building was burned, he devoted time and work, as well as money, to secure the present handsome and attractive edifice. He was the prime mover in securing courses of lectures, which it was only practicable to have in a small town during the winter by previous sale of a large number of season tickets, and with his usual energy he was accustomed to ride about town and call at every house, obtaining a subscription list sufficient to afford the people an opportunity of hearing a number of first-class lectures at a moderate price. No one who was unfamiliar with the multifarious matters of minor importance with which he filled up the chinks of his busy career could form an idea of his extraordinary and varied capacity for practical work. Among these was acting as agent for two or three insurance companies, one of which was the old Worcester Mutual, and for Thompson & Co.'s express and its successor, the American Express Co.

A temperance man early in life, he gave up the sale of liquors when it was the fashion to sell them in all country stores. A generous contributor to religious

and educational purposes, he could readily interest others in the same objects, and consequently undertook the task, not always a pleasant one, of carrying a subscription paper. Being universally recognized as the one best fitted to win financial support from others, it was expected that a project would succeed if he took hold of it, and it always did.

In 1837 he married Mary, daughter of Oliver and Betsy Bliss, of Warren, who died in 1848. They had two children, a son who died at the age of seven years and a daughter who died in infancy. He married, in 1850, Mary, daughter of Dr. Daniel and Elizabeth Emerson Green, of Auburn, Mass. Their only child, Daniel Green Hitchcock, lives in Warren at the present time.

A complication of physical ailments culminated in enlargement of the heart, and on December 20, 1880, he died at the age of sixty-five. A plain stone marks his grave in the village cemetery. In person Mr. Hitchcock was full five feet ten inches in height and of a manly form. His marked characteristic, which struck all those who came in contact with him, was a strongly individualized nature, never, however, degenerating into eccentricity, but leaving the impression of a steady will, combined in a remarkable manner with a rare judgment and love of exact discrimination—the whole tempered by a genial and affectionate nature. His word was his bond and stood unquestioned, and his name was a synonym for the strictest honesty and business integrity.

A fine crayon portrait hangs upon the walls of the Public Library and a memorial granite drinking fountain, erected by his widow, stands upon the park which he laid out.

#### WILLIAM BARKER RAMSDELL.

William Barker Ramsdell was born in Warren, June, 1825. He is descended in the fifth generation from Joseph Ramsdell. Their remote ancestry is believed to be Scandinavian. Joseph (1st) was in Plymouth, Mass., in 1643. Joseph (3d) married Elizabeth Barker. Homer (the family name of his grandmother), the son of Joseph (3d), was born November, 1780; married Betsey Stockbridge October, 1816. She was the daughter of David and Ruth (Bailey) Stockbridge. At that time Mr. Stockbridge was the largest landholder in Hanover, Mass.

William Barker, son of Homer and Betsey S. Ramsdell, married Mary A. Makepeace, daughter of Augustus and Nancy M. (Gleason) Makepeace, of West Brookfield, October, 1859.

In 1800 the brothers, Joseph and Homer Ramsdell, came to reside in Warren (then Western), on a large farm, consisting of between two and three hundred acres, bought of Nathaniel Reed. They were yeomen of the early New England type. Their improved acres attested to their sound judgment and untiring industry. Both brothers left a handsome competency. A characteristic of Mr. Homer Ramsdell was his

sterling integrity. Mrs. Betsey S. Ramsdell's eloquence of manner revealed the high English culture of her ancestry. She inherited the ready wit and the social qualities of her father; an added accomplishment was a voice of rare sweetness and of great compass. It was soul-inspiring to hear her sing the church psalmody of by-gone years.

The brothers Ramsdell located their buildings on "historic" Reed Street, which commands a view of hill, valley and stream, also the distant mountains in their haze of blue. If locality, home surroundings have a marked influence on childhood and youth, then, emphatically, William Barker must have instilled into his mind loyal manhood, combined with a taste for the beautiful in perception, which was exemplified in his farm buildings and appointments, and is now seen in the several structures in the village where he resides. Mr. Ramsdell's indefatigable perseverance, industry and determined energy of purpose has nerved him to encounter and overcome obstacles that would have dismayed most men.

The commodious brick block, with an architectural effect both pleasing and substantial, at the corner of Main and River Streets, is a fitting memorial to his eldest son, Homer Augustus, who passed to his spirit home soon after he attained his majority, before he had fully entered the business arena of life. Homer's ability and commendable traits of character, aided by his father's experience in the manufacture of boots and shoes, with ample means, gave rich promise of laudable usefulness, not only in business, but in society and in church. He is missed and mourned beyond the home circle.

Willie Barker, the youngest loved, the sunbeam of the family and a child of promise, was brought home one winter's morning drowned.

A daughter is at home, a solace to her heart-stricken parents; another daughter is a student in Smith College.

William B. Ramsdell, in the early organization of the Warren Savings Bank, was vice-president. He has held various offices in the gift of his townsmen. The number of somewhat ornate buildings he has erected is a public benefaction to his native town.

## CHAPTER CLIV.

### LEOMINSTER.

BY J. D. MILLER.

#### EARLY HISTORY.

WHILE the early history of Leominster is closely connected in many ways with that of Sterling and Lancaster, it must not be confounded with either. Presumably it is a pleasant thing for a town to have an early history, which is also an ancient history; but many towns are forced, from the nature of the case, to

omit the *also*. In this number is Leominster. She was incorporated too late for much colonial history of any kind, and by far too late for any effective Indian history.

The connection of Leominster with Sterling and Lancaster can be stated both clearly and briefly. Lancaster was incorporated May 18, 1653 (O. S.). At the time, and for more than twenty years after, the Indians in all this section were peaceable and even helpful. Matters moved quietly in the new town and the feeling of security and the prosperity of the community stimulated settlement, so that a large part of the town was occupied before 1675, the year which marks the beginning of what is known as King Philip's War. In this war Lancaster suffered severely. Many of the inhabitants were killed, and all but two of the houses were destroyed. In consequence of these Indian attacks the town was wholly without inhabitants from the early part of 1676 to about 1680, or for more than three years. This is *her* first chapter of Indian history, and the only one which affects Leominster. But for these Indian outrages and the resulting depopulation, it may be doubted if Leominster would ever have been made a part of Lancaster. There is evidence to show that a grant of the then unoccupied lands on the west and north of Lancaster, in the form of a promise or an intimation, was part of the inducement held out to the early settlers of Lancaster who had escaped, and their children, as well as to others, to influence the question of re-settling the old town. This "new grant," when obtained in the manner to be described, constituted what is now Leominster and Sterling. It had not, up to this time, nor did it for the next thirty years, make part of any town or, so far as can be learned, of any grant.

Those who re-settled Lancaster petitioned the "Great and General Court" for this "new grant" of land before February 5, 1711. The exact date is wanting. But that the opportunity to acquire and the right to hold these new lands was part of the inducement of settling appears in this, that the land when purchased of the Indians was bought by individuals and not by the town of Lancaster, and that the town itself, before the "grant" was made, voted that if it should be made, the title should rest with those who joined in the purchase.

Two things were done to secure this "new grant:" First, it was purchased of the Indians as of its lawful owners. The Hon. David Wilder declares, "That it must be a source of satisfaction to the owners of real estate, to know that they have acquired it honorably, paid for it honestly, and obtained a good and sufficient title to it." This satisfaction the first owners of Leominster surely had. It is a source of equal satisfaction to every lover of this beautiful town, to remember that its comely hills and fertile acres were not stolen from some poor Indian tribe, but honorably and fairly bought and paid for as it became men.

The deed of purchase should appear here as a voucher for these statements. It was first taken from the *Worcester Magazine* of 1826, but is now a part of several printed documents:

#### INDIAN DEED OF THE NEW GRANT.

"Know all men by these presents, That I, George Tahanto, Indian Sagamore, for and in consideration of what money, namely, twelve pounds, was formerly paid to Sholan, my uncle, sometime Sagamore, of Nashuah, for the purchase of said township, and also forty-six shillings formerly paid by Ensign, John Moore and John Houghton, of said Nashuah, to James Wiser, alias Quenepennett, now deceased, but especially, for and in consideration of eighteen pounds, paid part, and the rest secured to be paid, by John Houghton and Nathaniel Wilder, their heirs, executors and assigns forever, a certain tract of land on the west side of the westward line of Nashuah township, adjoining to said line, and butts southerly for the most part on Nashuah River, bearing westerly towards Wachusett Hills and runs northerly as far as Nashuah township, and which lands and meadows, be it more or less, to be to the said Insigne, John Moore, John Houghton and Nathaniel Wilder, their heirs and assigns, to have and to hold forever, and I, the said George Tahanto, do hereby promise and engage to procure an order from the honored General Court for their allowance and confirmation of the sale of said lands as aforesaid, and also that I will show and mark out the bounds of said land in convenient time, not exceeding four months, and also to make such deeds and conveyances as may be necessary for the confirmation of the premises, and that also I, the said George Tahanto, do by these presents, fully notify and confirm, all and every, the said township of Nashuah, alias Lancaster, to the Inhabitants and proprietors thereof, according as it was formerly granted to them, or their ancestors, by my uncle Sholan, and laid out to them by Ensign Thomas Noyes and confirmed by the Hon. General Court. For the performance of all the above said, I, George Tahanto, have set my hand and seal this twenty-sixth day of June, in the thirteenth year of the reign of our Sovereign Lord, William the Third, over England, &c., King. Anno Domini, 1701.

Signed and sealed in the presence of

JOHN WONSQON,	PETER PUCKATAUGH,
his  mark,	his  mark,
JOHN ACQUITTUS,	JONATHAN WILDER,
his  mark,	
GEORGE TAHANTO,	MARY AUNSOAMOG,
his  mark,	her  mark,
JOHN GUILD.	

This deed bears the date of 1701; but it seems that the purchase was not considered complete in 1711; for it is said in another document, executed in that year, that considerable money had been paid to George Tahanto for the purchase of said lands, though not yet consummated. We may understand that part of the money was not due until the "General Court" should approve the possession to Lancaster.

The next public action in regard to the "New Grant" was at a town-meeting held in Lancaster, February 5, 1711. By vote of this meeting the inhabitants of Lancaster secured the right to join in the purchase of this Indian land by subscribing to the following contract:

Know all men by these presents that we, ye subscribers, being desirous to joine in ye purchasing of a tract of land which lyeth on the west side of the township of Lancaster, which lands have been formerly petitioned for to the General Court which the Inhabitants of said Lancaster are still in pursuance of, and their petition is now with ye Court for granting the same, and considerable money hath already been paid to George Tahanto and other Indians towards the purchasing of said land, though not as yet consummated. Wee, the subscribers, do hereby bind ourselves, our heirs, executors and administrators firmly by these presents each one his and their equal share of the purchase of said land and of all charges that have or shall be necessarily expended about the same; and to run equal hazard of obtaining ye said land,

Provided that if the said land be obtained we shall have each one an equal share of it, considered as to quantity and quality; and the whole of the money to be paid unto such person of the town as shall be appointed by them to receive the same: at or before ye fifth day of March next; and shall subscribe hereto at or before the 15th day of February current: or else to lay no claim to the said land.

Dated February ye fifth, 1710-11.

Some of ye persons subscribed ye same day; and others had their names entered afterwards, the whole being ninety-eight that were the purchasers of said land.

It is to be noticed that in this document the petition for the "new grant" is referred to as being with "the General Court;" but it appears from the records of the confirmation, and would seem evident, also, from the fact that Thomas Wilder and John Houghton were appointed to manage this petition, that the "General Court" had hastened very slowly in the matter. The survey was not made till November, and the confirmation nearly three years later.

Upon the petition of the inhabitants of Lancaster, the General Court appointed a committee to survey the land and report. This report was received May 27, 1713, and was as follows:

In Concil:—The report of the Committee upon the surveys of land prayed for by Lancaster, Nov. 21 and 22, 1711.

Whereas, we, the subscribers, viz., Jonathan Prescott, John Farnsworth and Samuel Jones, are a committee appointed to view a tract of land, petitioned for by the Inhabitants of Lancaster, and to make report to the General Court for their consideration, we have accordingly been upon the spot the days above dated and proceeded thereupon as follows:—*Inprimis*. We began at the proper bounds of the Lancaster plantation, and thence ran our line upon a Northwest point or thereabouts, along by the Southwest side of Mauhapange and Unkachenalwick Ponds, extending said line three miles; from thence we made an angle running near upon a S. W. point, crossing a river called the North River, and so running over hills called Monnoosuck Hills, said line being about six miles in length, till it meets with the middle branch of Lancaster river, at or near a little hill on which the Indians had marked a tree for a corner of said land, being near five miles wide. At the southward end bounded partly by Capt. Davenport's farm, to the S. W. corner of Lancaster Old bounds. The land included within these bounds is rocky and mountainous and very poorly accommodated with meadow.

JONATHAN PRESCOTT.  
JOHN FARNSWORTH.  
SAMUEL JONES.

This action is endorsed upon the report:

Read and ordered that the tract of land above described be added and confirmed to the town of Lancaster as part of the township, not prejudicing any former grants.

Concurred by the Representatives,

Consented to,

JOSEPH DUDLEY.

ISAAC ADDINGTON, Sec'y.

From the foregoing records it appears that while Leominster was a part of Lancaster from 1713 to 1740, the connection was only nominal. The land was owned by certain of the inhabitants, who as proprietors laid out and disposed of it as they saw fit, and no doubt from the first proposed to make it a separate town. More than this, there were no settlements there earlier than 1725, and so soon as such settlements were numerous enough to make a community, a movement was started to divide from Lancaster.

Mr. Wilder says that the Beamans, the Sawyers, the Houghtons, the Osgoods, the Carters, the Joslins, the Whites, the Whitcombs and the Wilders were the principal proprietors. Not many, if any, of the

ninety-eight who purchased the land, however, settled any part of this territory. It was taken by their children and others. But the occupation was slow and late. It appears that when the southwestern half of the grant was so far settled as to ask to be incorporated as the town of Sterling, in 1733, there were scarcely more than five families in that part which finally became Leominster. The first beginnings of this settlement are described in the following quotation:

"In 1725, Gershom Houghton and James Boutell ventured a few miles farther north than Sterling, and erected houses in what is now the south and south-westerly part of Leominster. Seven years afterwards Jonathan White fixed himself in the north part. And in two years more Thomas Wilder and Nathaniel Carter became permanent settlers. And soon afterwards settlements were commenced in different parts of the northern half of the grant (for it is yet all Lancaster) by Benjamin Whitcomb, Jonathan Wilson, Jonathan Carter, William Divoll, Gardner Wilder, Ebenezer Polley, Oliver Carter, Josiah Carter, Thomas Houghton, Thomas Davenport and others." This would bring the record to 1734. It is evident that the new movement was now fairly inaugurated and sure of success, and that the number of settlers increased rapidly; for the people within three years—1737—conceived the idea that they could well manage their own affairs, and were able to maintain a godly minister. Mr. Wilder declares that these early settlers were just the men to conduct the new enterprise with success,—intelligent, clear-headed farmers; men of resolute purpose and with a definite policy. To this no one will enter any objection who is at all acquainted with the work which they accomplished. They may have been less brilliant than others, as the Hon. C. H. Merriam suggests, but they evidently had what was and is far better: a very liberal endowment of muscle, honesty, brains and common sense.

After three years of effort the new town of Leominster was incorporated July 4, 1740. It included territory equal to sixteen thousand six hundred and two acres, or about twenty-six square miles. Notwithstanding the statement of the committee, "that the land was mountainous and meadows few," the northern half of the "new grant" was "a goodly territory and well worth possessing." Its meadows may not be broad, but they are fertile; its mountains existed only in the wearied imaginations of these surveyors, as they dragged their chain along the borders of the "new grant" in the chilly air of November, 1711. To the better-rested eye of the early settlers these same mountains subsided into *hills*, rich and strong of soil to their very summits. To-day they stand out so gracefully against the sky as to seem the very embodiment of strength and beauty, making Leominster a delight to all who know her.

A general description of the surface and soil of the newly incorporated town is not necessary. It is

enough for the purpose of this sketch to say that it proved a tract well adapted to tillage and grazing; attractive as a home and offering sufficient inducements for manufacturing and business.

The area of the town remained as at first until the year 1838, when by an act of the Legislature some 2,000 acres of what is called No Town were added. No Town was a tract of unincorporated land which was located between Leominster, Westminster and Princeton. It is supposed that it was in part, or all, granted to the town of Sudbury as a return for losses in the Indian Wars, as the "new grant" had been ceded to Lancaster. This conjecture is aided by the fact that the few who did settle here came from the town of Sudbury, and that others of that town, who were not settlers, owned land here. If the territory was granted in consequence of loss and suffering for Indian depredations, the general character of the tract would indicate that the receivers were not materially enriched by the grant. The whole section is extremely rocky, the surface being thickly covered with boulders, dropped here by the glaciers of the past, and the greater part of the tract unfit for cultivation. Excellent pastures are found, however, in some parts of No Town, and, indeed, the whole tract seems better adapted to grazing than for tillage. There is here and there much good soil, but the rocks make it too difficult of cultivation and too hard to reach to make farming profitable. This whole section is excellent wood-land and this, no doubt, would be the most profitable crop to raise. The first growth of oak, birch, ash and maple, with a liberal supply of pine, hemlock and chestnut, which half a century ago covered these rough acres, wooded so heavily those swamps and turned the whole into a dense forest, have disappeared, and a strong second or third growth takes its place. Many parts of this tract could in this way be made profitable, which are good neither for pasturage nor cultivation.

There are, in No Town, two prominent and interesting hills,—Bald Hill in the centre, on whose sides are many acres of pasturage, most of it of excellent quality; and Crow Hill, which is nearer the Westminster line and which is *not* good for pasturage. This last hill is, however, exceedingly picturesque, with its abrupt sides and almost perpendicular cliffs. It may be that the surveyors of the "new grant" wandered away to climb its toilsome sides, and in the resulting weariness reported to the "General Court" that Leominster was a mountainous country. In this section are found the head-waters of several brooks whose waters are used in manufacturing, and a part of the land is covered by the Leominster reservoir, the reserved force of some of the mills of this busy town.

Several early settlements were made in this section. Robert Legate built a house on Bald Hill, and a few years ago—possibly still—many apple trees of his planting remained about the place. In the east-

ern part, near the Leominster line, Silas Parmenter had a farm, and Elijah Rice settled near Rocky Pond. There were also three houses built on the north side of Bald Hill, which were still standing within the memory of this generation, although it is not possible to ascertain who were the original owners. The last occupants were Joseph Palmer, one Munjoy and Peter Parmenter. At an early date several log-houses were built in different parts of this tract, some of which remained till within a few years.

With the addition of this tract, Leominster received all her territory. The matter stands a little out of the order of time, but wholly in the order of subjects. Returning for a moment to 1740, we have the town ready for its civil and ecclesiastical life. It could, in the nature of the case, have no long period of early history, and it took its Indian knowledge from tradition rather than experience. Nor can its history hold much remembrance of the kings; for the great Revolution was only a quarter of a century away, and the Colonies were fast acquiring the knowledge and discipline which made it a success, when Leominster was incorporated. It was, as we shall see, only in the last of these great ante-Revolutionary struggles that she could bear a part. But if the early history is brief, it is honorable.

## CHAPTER CLV.

### LEOMINSTER—(*Continued.*)

#### ECCLESIASTICAL.

THE FIRST PARISH, NOW THE FIRST CONGREGATIONAL (UNITARIAN) PARISH.—The early religious affairs of Leominster, so far at least as the First Parish is concerned, are very fully stated by Hon. David Wilder and others. Free use of this material is made in the present sketch.

Poverty is sure to be the first harvest gathered by the men and women who settle any new country. The early inhabitants of Leominster found no exception, in their favor, to this law. They *were* poor, but did not suffer their poverty to plead against an early and liberal provision for the educational and religious wants of the community. So important, indeed, in those early days, did the moral and religious training of the people seem, that by the act of incorporation the town was required to erect a suitable meeting-house and maintain a godly minister. There was no needless delay in this matter. The town was incorporated June 23 (old style), 1740, and within the year, as the following record shows, this matter was considered, and in the expressive language of the time it was decided that "God's Tabernacle should be erected here."

At a town meeting (the third after the incorporation of the town) held at the house of Benjamin

Whitcomb, "Inholder within said Town, on Monday, y<sup>e</sup> fifteenth day of December, *Annoque Domini* 1740," of which meeting Thomas Davenport was moderator, the records show the following business: "*First. Voted*, that they would build a Meeting-House in the year forty-one. *Second. Voted* to build y<sup>e</sup> Meeting-House fifty feet in length, and forty feet in breadth, & twenty-three feet in height."

Land now included within the limits of the "new cemetery" was presented to the town by Ebenezer Wilder as a site for this building; but the people preferred a different location, and the first church was erected on land purchased of Ebenezer Houghton, in the northwest corner of the old burying-ground. The committee to see that the work be done were Jonathan White, Joseph Wheelock and Nathaniel Carter. The frame was raised the following summer; presumably, all appeared to help under the following vote: "That the committee should have a Carpenter to hew and Frame said House, allowing all the Inhabitants a liberty to work his proportion if he come to work when he is notified by said committee, and shall be allowed six shillings a day, and three shillings a day for a yooke of oxen, and they are to begin work the last of March next."

To this early and emphatic action, Leominster may owe much of that peace at home and honor abroad which have marked her history.

The following description of this old First Church by Mr. Wilder is of decided interest:

"This house answered the purpose for the humble Christians of those times; but the people of the present time (1850) would not think it a suitable place in which to worship God in public. It was rough-boarded on the outside, with but few or no glass windows, and within only a loose floor and movable seats. For several years there were no pews and the outside was not finished and painted until 1753. But it served the purpose for which it had been erected. Not only did our forefathers stately meet in that house for public worship and for the transaction of their parochial business, but the common town-meetings were also held in it for one-third of a century. And then, viz., in October, 1775, it was sold at public auction and purchased by the Baptist Society in Harvard, taken down and carried to 'Still River' and for a long period was the place of worship of that society. But some years ago, when they were about to build a larger house the old one was moved across the way and fitted up for a parsonage house."

Of course we shall be wholly unable to appreciate the sacrifice necessary to build even this rude structure unless we can put ourselves in the place of these early settlers. We must, in imagination, visit their homes, realize how they lived and dressed and worked, feel, so far as we may, the difficulties and privations of their pioneer life; call to mind the danger of the wilderness, the cold welcome of the climate,

the heavy labor and slow return, where a forest must be cut, the ground cleared and the soil broken before the seed can be planted or the first harvest be gathered, if we would realize what such a structure cost its builders. Taking all this into consideration, we are forced to concede, that it must have been an heroic company—men and women who had fed their resolution on principle—who gathered in this rude building, with little light and no heat, of a Sabbath, when, in 1742, the town voted to have preaching in this new church. In such places we are to look for New England and the beginnings of a nation.

Still this people, so poor, but resolute, were not wholly without the luxuries of a well-appointed modern church, for we read: "That they heard several *candidates* before settling Mr. John Rogers." We are further informed that the action which resulted in the call of Mr. Rogers was "according to the advice of the neighboring ministers." It is pleasant to notice that "*advice*" is no new invention and to reflect that an individual, a church or a town can enjoy all its advantages even in the wilderness. So Mr. Rogers was called, and Mr. Wilder notes that he was a lineal descendant of the martyr of that name. Of this there is no reasonable doubt, still the fact is not fully established. This is the succession as given by Mr. Slebbins in his discourse. "He was a son of Rev. John Rogers, of Boxford, who was a son of Jeremiah Rogers, of Salem, who was the grandson, as is supposed, of Nathaniel Rogers, of Ipswich,—of this last there is only traditional proof,—who came from England in 1636, and who was the second son of John Rogers of Dedham, England, who was the son of one of the ten children of John, the martyr." Those who are curious to see the full record are referred to the notes appended to the above discourse.

Mr. Rogers was installed by a council of the neighboring churches and ministers, September 14, 1743 (O. S.). On the same day a church of sixteen male members was constituted. We are unable to learn whether any women were admitted to this early church or not. Possibly, as the women could not vote in town affairs, and might not be enrolled for war, it was supposed that they would neither miss the way to heaven nor be of service in the church militant. At all events, their names, if any belonged, do not appear.

The salary of Rev. Mr. Rogers was fixed at forty-five pounds a year, which was to be increased to fifty-five pounds, when the town should contain sixty families. He was also entitled to a deed of the minister's lot of forty acres. This lot is said to have been located near the "old poor farm," although Mr. Rogers never actually lived there. It is clear, however, that the men of those times did not consider it necessary to have the minister's lot as near the church as the minister's pew was to the pulpit.

As an example of what the covenants of that day were, and as evidence of the earnest character of the

people, the covenant of this First Church is given in full, with the names of those who signed it:

**COVENANT.**—Being persuaded that we are now called of God to come into the state of a Gospel Church, we do it, therefore, freely, in a solemn and religious manner, reflecting on our own unworthiness, admiring the mercy and condescension of God and trusting in his promised grace. Accordingly, in the presence of God and man, we make these solemn declarations respecting our faith and practice.

Declaring our hearty belief of the Christian religion comprised in the Holy Scriptures, we firmly promise that (studying and meditating in the word of God day and night) we will thereunto habitually conform our lives.

We dedicate ourselves to the Lord Jehovah (to the Father, Son & Holy Spirit) and take him for our eternal portion. We give up ourselves to the Lord Jesus Christ, the Head of the Church, as our Prophet, Priest & King.

We promise constantly and in an exemplary manner to observe all the duties of the Moral Law, to live soberly, righteously and piously, keeping consciences void of offence towards God and man. We resolve to walk together as becomes a church of our Lord Jesus Christ in the faith and order of the Gospel, according to the best light we can obtain, diligently attending the public worship of God, the sacraments of the New Testament and all his sacred institutions, watching over one another in meekness and tenderness.

We promise likewise, if any children shall be committed to our care, to educate them in the nurture and admonition of the Lord.

We promise to be sincerely and regularly concerned for our neighbor's welfare, both temporal and spiritual, to do no injury, to give no offence, but to do what in us lies to promote the happiness of all (with whom we shall be concerned) in every respect, and not to confine this caution and benevolence to our friends, but to extend them even to our enemies.

More particularly, we promise inviolably to practice all relative duties both to superiors, inferiors and equals, to show them all that honor, love, condescension and beneficence which shall be due from us. We promise never to revenge any injury we may suppose ourselves to have received of our neighbors. We will never promote or countenance any obscenity or impurity by word or deed. We will never wrong our neighbors' worldly estate, but endeavor to advance it, conscientiously observing the rules of justness and honesty, and, as far as we shall be able, make full reparation of any injuries which we may have done. Moreover, we solemnly promise that we will never allow ourselves in the practice of calumny or slander, but will strictly regard such Christian rules as these. (Titus 3, 2) Speak evil of no man, (James 4, 11) Speak not evil one of another, (2 Cor. 12, 20) lest there be stripes, backbitings, whisperings; and will exercise that charity which covereth the multitude of faults, and thinketh no evil. And in all our affairs whatever we will religiously avoid (as well as prudently discourage) indiscreet anger, contention and a selfish and party spirit. And, in sum, we solemnly engage that we will invariably seek the public weal, and govern ourselves by the peaceful, charitable and generous principles of our holy religion, fixedly adhering to that most reasonable precept of our Blessed Lord and Pattern, "Whatsoever ye would that men should do to you, do ye even the same unto them."

Anon, now sensible of our own corruption and weakness and of the power and vigilance of our spiritual enemies, we implore and trust in the grace of God, through Jesus Christ, to preserve us from dissimulation and instability, with reference to these our sacred vows and resolutions, to which, in the presence and fear of our all seeing Judge, we subscribe our names.

John Rogers,	Thos Houghton,
Benj. Whitcomb,	Nathaniel Carter,
Jona. White,	Simon Butler,
Oliver Carter,	Gardner Wilder,
Ebenezer Polly,	James Boutell,
Thomas Wilder,	Jos. Wheelock,
Ephraim Stone,	David Johnson,
Thomas White,	Phillip Sweetser.

The tree thus planted yielded, for some years, only pleasant fruit. Pastor and people dwelt together in harmony, prosecuting, no doubt, with zeal and success the legitimate work of a Christian Church. But in time there began to be discontent, whisperings of error, the gathering of the people in groups, of a Sunday, to discuss the sayings and doings of the

pastor, until, some fourteen years after its organization, this feeble church was in the midst of what is known as the Rogers Controversy. It was a matter of the greatest importance, in the thought of the men and women of that day, but is remembered *now* chiefly as another example of the folly, on the one hand, of a premature discussion of religious themes, and on the other, of attempting to make all men think and believe alike. The history of this once famous controversy may be briefly stated. Mr. Rogers had, in the course of his studies, come to an honest change of views upon many of the important questions embodied in the covenant of the church. On the other hand, the men to whom he ministered had little time to consider such matters. They were accustomed to a certain familiar sound in the truth which they heard; a form of words it may be, and the life they lived precluded close thought. Under these circumstances it would seem that Mr. Rogers gave utterance to his new views with more clearness than discretion, and the people rebelled. They were not prepared. In time many did come to believe exactly as he did; but it could not be done in a day. The result was that matters reached such a point that a council was called, July 26, 1757, to meet and consider the case. Mr. Rogers was accused, before this council, of not believing in the divinity of Christ, in the doctrine of original sin and of being mixed on question of conversion. Of the general truth of these charges there is now, as there was then, probably, no doubt, except that he seems to have held very clear, although unusual, ideas of conversion; at least for that time. The finding of the council was against Mr. Rogers, but his opponents were advised to wait for three months in the hope that he would modify his views—a course to which the council strongly urged him. If no improvement was noticed, the council was to be called together at the end of that time. Of course there was no change. The parties had already taken sides; Mr. Rogers had, wisely or unwisely, refused to be a party to this council; his opponents already had the sanction of the neighboring churches; both parties were fully convinced that they were doing battle for essential righteousness. Why should a change be expected?

The Rev. Mr. Rogers was, from all accounts, an able man, very decided, if not obstinate in his views, independent in his opinions and little likely to accept advice, especially of men who, he believed, held opinions similar to his own; and the men with whom he had to deal were equally determined in their course. No good could come of waiting. Mr. Rogers was, no doubt, a most sincere and worthy Christian man, a Unitarian born out of due time; but to make him a martyr is simply absurd.

It is not clear whether the council was called together again at the end of three months, or a new one convened, or neither. The records are very meagre in regard to the whole matter. At all events

the church voted, November 26, 1757, to accept the "result of the venerable council," and the same day it was voted in town-meeting "that the Rev. John Rogers desist from his pastoral office for the space of three months next ensuing, and that the selectmen be a committee to supply the pulpit during that time."

With commendable zeal and strong, if mistaken, pertinacity, Mr. Rogers went to the meeting-house for three successive Sabbaths after this for the purpose of preaching, but being excluded from the house on one occasion and from the pulpit on the others, he preached in his own house. There is no record that he made any further attempts to exercise the functions of his office, or that either party sought grounds for reconciliation. At all events, by vote of both church and town, passed January 28, 1758, Mr. Rogers was dismissed from his office. The following letter written by Mr. Rogers to his people at the time is worthy of permanent record:

#### CHRISTIAN FRIENDS AND BRETHREN:

I lament that we must be separated. I suffered and toiled with you to establish this church. Most of those who laid the foundation of this altar of God in the wilderness will stand by me. My enemies are mostly those who came among us as strangers, whom we welcomed with a Christian affection to our table of communion and house of worship; but who have now ungratefully, like the serpent in the fable, bitten their benefactor. The council, too, which have advised you to this course are not free from guilt. Some of them, and not a few, think as I do on those very doctrines which they pronounce so fatal, and which they call upon me, in the pitiful tones of children, to renounce. I forgive them their sin. May God forgive them. Posterity will revise their decision and judge their characters. I do not understand why I should be singled out from the other ministers around me to be made a victim.

I differ from them in nothing, without it is in frankly declaring what I do believe. Their opinions are like mine. I confess that, on some points, I have modified my opinions since I came among you; and I am grieved to think that any are so simple as to suppose it an indication of mental weakness, or perfidy of heart, or treachery to duty, to grow wiser as one grows older, and studies longer. John Robinson warned his church to beware of thinking that no more light would beam out of the Word of God, expressly warning them not to stick fast, as some did, where Calvin left the truth, but to follow on after truth. Our covenant, it is true, implies the doctrine of the Trinity, but it does not require any one always to believe it; it expressly exhorts us to study the Word of God both day and night, and to conform ourselves thereunto. I have done so. Am I guilty of a crime? I am willing to be classed with Newton and Milton and Locke and other good and great men, in the opinion which I hold. No one need be ashamed in their company. As for recanting my opinions, Christian friends, I cannot do it. God and my conscience would both condemn me. I could not think of myself but with shame. My ancestor suffered the torture of fire and death at the stake, rather than recant or conceal his opinions. Could I meet him in Heaven without a blush, if I should deny what I believe to be God's truth? Could I answer to my Master, Christ? Judge ye. I lament to be cut off from you. I am poor and know not where to go. My little ones cry around me for bread. Still I will trust in God, who has never yet forsaken me.

He will care for me and mine. I hope, if you do expel me from the office of pastor, that you will pay me what you owe me. For ten years I have been willing to share in your poverty by not calling for a portion of my salary, which is justly due me. Now, I am to be cast abroad upon the world, I feel as if I must be permitted to receive what is necessary for my very existence. But no more of this. The extremest want alone could have compelled me to mention it in this connection. Brethren, pause before you act. Consider, I pray you, what will be the end of these things; what will be thought of this after we are all in our graves? God give you wisdom to act in this matter, as you will all wish you had, when you stand in His presence to answer for this deed. And may the great Head of the Church keep you and build you up in truth and holiness evermore. Your devoted, yet aggrieved Pastor, JOHN ROGERS.

After he was dismissed from the pastorate Rev. Mr. Rogers brought action against the town to recover that part of his salary which, by general consent, appears to have been justly his due, and which his enemies loved him too well to pay. His adherents also made unsuccessful efforts to be set off in a precinct by themselves. The whole matter was finally referred to the Superior Court with this result: Each party shall pay its own costs; the friends of Mr. Rogers shall be allowed to form a Second Parish; the first parish shall pay to the new precinct when organized the sum of £45 within the year, and £45 more with interest after the first year, within ten years after the Second Parish is incorporated, and Mr. Rogers shall give up all claim on this town.

The Second Parish was at once formed, and Mr. Rogers preached to the little company of his faithful and affectionate friends for many years, at first in private houses, and then by permission of the town in a school-house on the north side of the river until, in 1788, the increasing infirmities of age forced him to ask for a dissolution of the relations between him and his people. This was granted, and the First and Second Precincts were at once united. These men and women, who had adhered to Mr. Rogers with so much constancy and affection all these years, voted to pay for three years longer his salary of fifteen pounds a year. It is a sad and, in many ways, a pathetic story, but must stand as marking the beginning of a division in religious thought and conviction which was sure to come, which no forbearance could prevent and no peace-making heal. It is only saying of them what will be said of us if we add, that greater wisdom on both sides might have delayed this division till the times were ripe for the change.

Rev. Francis Gardner was ordained as the successor of Mr. Rogers, December 22, 1762, and continued to serve the church until removed by death, June 4, 1814. He came to the office in a time of much excitement, but appears to have been a man of great skill and discretion, a prudent and wise pastor. Great changes occurred in the parish during his long ministry. Chief of these was the building of the second house of worship. The subject of building was first agitated in 1767, but so great was the difficulty of agreeing upon a location that six years passed before there was a vote to build. This vote was passed May 3, 1773, and it was determined to raise the frame June 1, 1774. The following is Mr. Wilder's description of this house:

"A site containing rather more than an acre was purchased of Rufus Houghton, at the rate of eight pounds per acre, being what is now the common in front of the First Congregational Meeting-House. The precise dimensions of the house are not known, but probably it was sixty feet in length and fifty in width. It fronted to the east, and at each end there was a porch, and in each of these porches were two flights of stairs to the gallery. On the lower floor

there were eighteen square pews in the body of the house and thirty round on the walls. The pulpit was on the west side of the house, and in front and underneath that was the deacon's seat, and over the pulpit was suspended a very large sounding-board. From the double doors in front to the pulpit was a broad aisle, a wide one all round by the wall-pews and a narrow one from one porch to the other. In front of the pulpit, on either side, were three rows of seats for aged people. The singers occupied seats in the east side. It was well furnished, both outside and inside, and, for the times, was considered 'a large and an elegant meeting-house.' The expense is not known. The pews were sold before the house was built, and probably for enough to defray the whole expense." This house was built by the united efforts of both precincts, and was town property. The town-meetings were held in it for nearly fifty years, and it was made into a town hall in 1824, and as such used till 1851.

Rev. Mr. Stebbins makes the following reference to this house: "The memory of some (1843) is familiar with this house, its congregation, its minister and service. The clapping of the seats after prayers, the old square pews, in the centre the grandfather's chair, the body-seats before the pulpit, and the deacon's seat under it; the gallery carefully adapted to accommodate the purposes of the young, and the 'negro-pews,' placed high in two corners; the deacons in their wigs, seated under the pulpit, the reading and lining of the hymns by these officers of the church, the wig, the three-cornered hat, the bands, the small clothes and high-topped boots of the pastor, the chills and shiverings of winter,—all these some of you have seen and heard and felt."

Other changes are also recorded. April 14, 1765, the reading of the Scriptures was introduced as part of the exercises on Sunday. Dr. Stebbins declares that there is no record or tradition that this innovation caused either excitement or opposition. During the ministry of Mr. Gardner a change was made in the manner of reading the hymns. Before this the deacons had "lined" the hymns, now the minister read them. This tremendous change did not pass without criticism; one of the deacons, Israel Nichols, expressed his opinion of the change by walking out of church when the minister began the reading. Another deacon, of different views, refused to "line" the hymn when requested to do so by Rev. Mr. Adams, of Lunenburg. Instrumental music was also made a part of the service during this ministry, and at the sound of the violin the first-named deacon took a second walk from the church. The violin remained, however, and it is presumed that the deacon returned. So much for successful change. But when, in 1791, it was proposed to put a stove in the church, the limit was reached, and the thing was persistently refused. No means were ever adopted for heating the second meeting-house, although the cold was so severe in 1808 that the town voted to

hold but one service each Sunday from December to April. A sermon one hour long, with other services in proportion, the thermometer at zero and no fire in the church, the congregation could not have enjoyed unmixed luxury.

Rev. Wm. Bascom, who had been settled in Fitchburg, was the successor of Mr. Gardner. He was installed here May 10, 1815, on a salary of \$600 per year, and dismissed March 2, 1820. It is not necessary to discuss the facts which led to Mr. Bascom's dismissal. His views were too conservative for a majority of his church and parish. For this reason they desired his removal. Dr. Stebbins regards Mr. Rogers as a martyr, and more than intimates that Mr. Bascom was let off easy; but, in the absence of the least proof that Mr. Bascom ever attempted to conceal his views, historically they occupy the same position.

January 24, 1821, Mr. Abel Conant was ordained as the successor of Mr. Bascom. "He was a thorough Greek scholar, a sound reasoner, a quick and ready writer, a worthy and useful man and a most excellent pastor." Mr. Conant died while pastor of this church, December 6, 1836. The two most important events of his ministry were the building of the house of worship now used by the society and the formation of "The First Congregational Society of Leominster," May 4, 1835, which marks the time when the town ceased to manage parish affairs.

The present church edifice was ordered by vote of the town December 8, 1821, and finished early in the fall of 1823. The church cost \$8,000 and the pews sold for \$1,600 more than the entire expense. It has been twice remodeled—once in 1850 and again by the addition of a chapel and other rooms during the ministry of Rev. E. A. Horten. It is an exceedingly comfortable and convenient house of worship. This society has always been strong and prosperous, and is so still. The following ministers have served the society since the death of Rev. Mr. Conant: Rev. Rufus P. Stebbins, 1837-44; Rev. Hiram Withington, 1844-48; Rev. Amos Smith, 1848-56; Rev. T. B. Forbush and Rev. Stephen Barker, 1856-60; Rev. Eli Fay, 1861-64; Rev. John B. Green, 1864-67; Rev. E. A. Horten, 1868-75; Rev. Wm. H. Savage, 1876-86. Rev. Edward B. Payne was installed pastor Feb. 2, 1887, and is now serving this people.

**ORTHODOX CONGREGATIONAL CHURCH.**—The division of the Town Church during the ministry of Rev. Mr. Rogers was certainly premature. Personal feeling ran very high. Men, it is said, would not recognize each other when they met on the street. Back of this there was, no doubt, some real difference of opinion and of faith. But personal feeling is likely to die with the men and women directly concerned and great changes in religious thought require time to ripen. The First and Second Precincts were *of course* united after Mr. Rogers' death. It was a failure to recognize the element of *time* in all religious movements, which was the source of Mr. Rogers' dif-

ficulty with his parish. A minister whose time is wholly devoted to study, whose disciplined mind is capable of seeing the relations of truth, may well go further in religious investigation than plain men and women, largely occupied with the ever-recurring question, "What shall we eat and how shall we be clothed?" can well follow him. Indeed, it would be a misfortune to submit to their decision many of these questions. While a minister is bound to preach that and only that which he fully believes, it is a great mistake to suppose that so soon as a new idea comes to him he must make public proclamation of the fact. Many of a man's opinions only "tent" with him,—they never take up a permanent residence. They hold him; he does not hold them. It was this mistake which caused the trouble described.

But the close of Mr. Bascom's ministry brought the community to a very different relation to religious questions. The Rev. Thomas Gardner, during his long ministry, presented his views with great discrimination. These views were much the same as those which Mr. Rogers expressed, but he had greater wisdom in his work. During the long rest and harmony of these years there was time for men to come, by a kind of natural selection, to those views of truth and duty which would, in the nature of the case, be permanent. The case was made up before Mr. Gardner's death. It only waited for an occasion to find expression. So when Rev. Mr. Bascom was found to be more conservative than was expected (and this was the ground for dissatisfaction and removal), the occasion came. Men divided, not, as before, on personal grounds, but because it was the necessary outcome of religious thought. That the old church should recognize and welcome these new forces was of course not to be expected. Still, soon after Rev. Mr. Conant was settled over the old parish, a new church was formed,—the first of several,—and which is now legally known as "The Orthodox Congregational Church and Society of Leominster."

Of the feeling at the time Rev. Rufus P. Stebbins, in his centennial discourse, says: "That there was nothing wrong done on either side I suppose, that those who were actors in the events, who are now living, would not now claim. That there a little ill feeling excited, and as little injustice done as ever were under such circumstances, is more perhaps than it would be best to say or believe. But one thing may be said with undoubted confidence: The ill feelings which were awakened at that time have been buried in the graves of those who have died and in the memories of those who are living." If this could be said nearly half a century ago, the mutual respect and good feeling of to-day needs no mention.

The object of organizing this new church was thus expressed at the time: "For their mutual edification, improvement in divine knowledge, for the better maintaining Gospel ordinances and public worship among themselves, as well as for the general promo-

tion of vital religion and the extension of Christ's kingdom." An *ex-parte* council was called and a church organized at the home of Captain Ephraim Lincoln, December 25, 1822. This house still stands, and is owned and occupied by Henry J. Johnson.

The following persons constituted that church: John Perkins, James Wood, James Boutelle, Joel Hale, Thomas Boutelle, Hiel Coolidge, Jerusha Thurston, Mary Lincoln, Betsy Stuart and Dorothy Boutelle. On the day following, December 26th, Caleb Wood, Eunice Wood, Benjamin Perkins, Ephraim Lincoln, Samuel Hale, Hepsibah Hale, Abel Wood, Eleanor Nichols, Dolly Johnson, Susan Lincoln, Martha R. Lincoln, Julia Boutelle, Betsy Boutelle and Sally Hale were received into membership, making a total of twenty-four.

The fourteen last named had been members of the First Congregational Church (Unitarian), and were received into the new church on the recommendation of an *ex-parte* council convened at their call. Of the ten original members, four remained in this communion until death. Of these, Dorothy Boutelle died in 1827; Betsy Stuart in 1836; James Wood in 1856, and James Boutelle, September 28, 1870. The latter was deacon of the church for more than forty years.

The church thus formed worshipped in the house where it was organized for nearly two years, during which time the number of members was more than doubled.

Their first meeting-house was erected in 1824, on the east side of Main Street, at a cost of \$1600. This they continued to occupy until 1837, when it was sold to the Methodist Society for \$800. It was enlarged and repaired in 1849, and sold to the Catholic Society in 1871. A second house, built on the site occupied by the present church edifice, was dedicated February 8, 1837. In May, 1850, it was struck by lightning and much damaged. In the same year it was remodeled and repaired, and re-dedicated January 8, 1851. This house continued to be used as a place of worship down to February, 1872. In the early part of 1871 the society took action looking to the erection of a new house of worship. The vote to begin operations was passed in the month of September; the plans were fully matured in January, 1872, and the old building sold at auction February 13th, to be removed before April 1st; but on February 27th it took fire and was wholly consumed. The corner-stone of the present church building was laid August 1, 1872. The chapel was finished February 27, 1873, and the whole building dedicated August 19th of the same year. Rev. Charles H. Payson delivered the address at the laying of the corner-stone; Rev. A. A. Wood, D.D., preached the dedication sermon and the Rev. I. W. Backus offered the prayer.

This church building is one of the finest in Worcester County. In architectural beauty and general adaptation to its purpose it is unsurpassed. Still, it may well be supposed that such a structure cost

something of effort and self-denial. When the church was finally freed from debt the following statement of facts was made by the writer. It is reproduced here as of permanent interest in connection with the growth of this society.

"The new and beautiful church was dedicated, but with a debt of *over thirty thousand dollars!* This was a heavy load under the most favorable conditions; but when a large number of our members withdrew to form a new church organization at North Leominster, the financial strength of the society was greatly weakened, and the load of debt became oppressive and even menacing. Toward the close of Mr. Wales' ministry the church and society were brought squarely to the alternative of reducing the debt or giving up their house of worship. The debt had increased to *over thirty-six thousand dollars!* It was simply impossible to live under such a burden. In the fall of 1875 it was decided to make an earnest effort to reduce the debt by at least *ten thousand dollars*, and to pay all sums due for interest, etc. The effort was begun at once, but a year passed before the task was finished. It would not be possible to give any adequate description of the toil, the anxiety, the near approach to defeat and the final success of this effort. It was, by far, the most trying time this church and society have ever known. But it should be made matter of lasting record here that the ladies, both as individuals (for they started a subscription by themselves) and in their society, gave freely and lovingly of time, strength and money; that those who had little gave much, and those who had more gave, and then increased their gifts, till at last the work was done.

"So the first woe was past. Everything was settled. The church had cost \$65,432.62, and the debt was now a little over twenty-one thousand. After meeting its expenses it was hoped that the society could provide for the interest on this amount, especially as the Ladies' Charitable Society was to provide for the interest of \$3,000 of this sum. It was not a 'good hope.' There was an increasing deficit. The burden was too heavy. About fifteen months later, January 16, 1878, the old veterans and the new recruits gathered for another battle. Thirteen thousand dollars would pay all out-standing claims and reduce the debt to less than \$10,000. The memory of the former success helped in the present case. The work was carried on more rapidly and hopefully. The subscription paper was dated January 16, 1878, and by March of the same year, \$13,082.00 were pledged. It may be added here, that *every dollar* of this sum was collected. March 14, 1878, the debt upon which the society was paying interest had been reduced to \$9,900.00, and before July 1st the balance of subscription had been collected and arrears of interest, etc., paid. This had not been accomplished without hard work and self-denial. One brother, W. B. Frissell, should be remembered with honor as giv-

ing freely of his time and effort to this work. In July, those who remembered the debt at \$36,000.00, held a jubilee over the result.

"During the ministry of Rev. Mr. De Bevoise, and largely through his efforts, the last of the old debt disappeared. For years it had hindered the growth and the joy of the church. It died on a certain memorable Sunday morning, being unfit to live. Church and congregation breathed in freedom and hope. They had not taken back that which they had dedicated to the Lord, and they could hope for His blessing. These years of debt-paying often seemed almost hopeless, but they held the seeds of a century of growth."

The first pastor of the church was Rev. Phillips Payson, of Rindge, N. H. He was ordained November 17, 1825, and dismissed April 17, 1832. The number belonging to the church at the beginning was fifty-seven, and sixty-five were added during his pastorate. After much faithful service in this State, Connecticut and elsewhere, Mr. Payson died at his home in Fayetteville N. Y., February 16, 1866.

The following is a list of the other ministers who have served this church in the order of their service: Rev. O. G. Hubbard, May 23, 1833, to June 17, 1851; Rev. Joel S. Bingham, December 17, 1851, to June 1, 1857; Rev. Joseph W. Backus, January 14, 1858, to August 13, 1862; Rev. Horace Parker, March 21, 1863, to May 1, 1865; Rev. Wm. J. Batt, October 17, 1865, to July 15, 1874; Rev. Henry A. Wales, September, 1874, to September, 1877; Rev. Sylvanus C. Kendall, May 1, 1878, to May 1, 1879; Rev. Gabriel H. De Bevoise, March 3, 1880, to July 18, 1883; Rev. Richard Meredith, March 6, 1884, present pastor.

To this account may be added some things of interest and valuable as matters of reference:

*Original Constitution of Society Connected with this Church.*

We, the subscribers, for our own edification and improvement in Divine knowledge, and for the better maintaining of Gospel ordinances and public worship among ourselves, as well as for the general promotion of vital religion and the extension of the Redeemer's kingdom, do hereby agree to form ourselves into a Society, to be called and known by the name of "THE CALVINISTIC SOCIETY IN LEOMINSTER," and hereafter to meet together and adopt such rules and regulations and pass such votes, not contrary to law, as may, by a majority present at any legal meeting, be deemed proper and expedient, relating to the objects and purposes aforesaid; and we do hereby agree to abide by such votes, rules and regulations as may be thus adopted from time to time; and especially to pay our respective proportions of all such expenses as may arise for the support of public worship, whether for the purpose of paying a preacher or preachers or erecting or providing a building for meeting and worship, or for incidental or any necessary expenses connected with the object aforesaid; the manner of notifying meetings, of employing preachers, of levying taxes, &c., to be hereafter agreed upon. The first meeting of the Society for transacting business, relating to the objects aforesaid, shall be holden at the dwelling-house of Capt. Ephraim Lincoln in Leominster, notice of the time to be given by said Lincoln.

Jacob Rugg.	Paul Otis.
John L. Divoll.	John Perkins.

**FIRST MEETING-HOUSE.**—At a meeting of the Calvinistic Society held November 5, 1823, it was voted that Deacon Abel Kendall, Capt. Ephraim Lincoln and Abel Wood be a committee to report the form and expense of building a meeting-house. This committee having duly reported, at a meeting of the society December 22, 1823, it was voted "to build a meeting-house forty feet square, and thirteen feet posts." Abel Kendall, Ephraim Lincoln and Abel Wood were appointed a committee to contract for the building. January 2, 1824, this committee was authorized to make the contract "if the expense should not exceed one thousand dollars." April 2, 1824 it was voted to open a subscription paper for the purpose of raising three hundred dollars to make the meeting-house two stories high. At an adjourned meeting it was voted that each man pay for this purpose "what he shall voluntarily put to his name." The expense of the land and building the house was paid by the following persons, members of the Calvinistic Society in Leominster:

Ephraim Lincoln .....	\$250
Benjamin Perkins.....	125
John Perkins.....	85
Abel Kendall.....	100
Alfred Smith.....	60
James Wood.....	80
Samuel Hale.....	225
Charles Hale.....	100
Abel Wood.....	105
James Boutelle.....	100
Leonard Litchfield.....	60
Paul Otis.....	70
Dolly Johnson.....	100
Widow Nichols.....	5
Betsy Boutelle.....	50
Relief Boutelle.....	5
Total.....	\$1520

**Legal Organization.**—At a meeting of the society, April 12, 1824, it was voted that the members meet on Thursday, April 29th, for the purpose of organizing this society according to law. The following document was prepared and forwarded:

To William Perry Esq., one of the Justices of the Peace within and for the County of Worcester:

We, the undersigned members of the Calvinistic Church and Society in Leominster, do hereby request you to issue a warrant to some one of us for calling a meeting of Said Society, to be holden at the dwelling-house of Captain Ephraim Lincoln in said Leominster on Thursday, the twenty-ninth day of April inst., at 4 o'clock P. M., to act on the following articles, viz.:

Article 1. To choose a Moderator to govern said meeting.

Article 2. To choose a Clerk, Assessors, Treasurer, Collector, and such other officers as may be deemed proper for organizing said Society conformable to the law of the Commonwealth.

Signed, Samuel Hale, Alfred Smith, Benjamin Perkins, Charles Hale, Leonard Litchfield, James Wood, Paul Otis, John Perkins, Abel Kendall, Ephraim Lincoln, Abel Wood, James Boutelle.

In pursuance of this action the following warrant was issued :

[L. S.]

COMMONWEALTH OF MASSACHUSETTS.

To Deacon Abel Kendall, a member of the Calvinistic Church and Society in the town of Leominster, Worcester County, greeting :

In the name of the Commonwealth aforesaid, and by virtue of a law thereof passed the sixteenth day of February, A.D. 1824, entitled "An Act in addition to an Act respecting Public Worship and Religious Freedom," you are hereby directed, by giving personal notice seven days at least before the time herein set for the meeting, to notify and warn the members of said Calvinistic Church and Society, qualified to vote in town affairs, and particularly the within named applicants, to meet at the dwelling-house of Capt. Ephraim Lincoln in said Leominster, on Thursday, the 29th day of April inst., at 4 o'clock P. M., for the purpose of organizing said Society into a Parish by acting upon the articles specified in application.

WILLIAM PERRY, *Justice of the Peace.*

Under this warrant the society was duly organized. The church and society has enjoyed different names at different periods of its history. At first it was the Calvinistic Church and Society; in 1835 this was changed to the Evangelical Church and Society; again in 1874 the name was changed to the Orthodox Congregational Church and Society, since which time we have heard of no church in town trying to secure a longer name.

The society is free from debt. The church has a resident membership of three hundred and forty-three and a Sabbath-school of over four hundred.

THE CENTRAL BAPTIST CHURCH.—In matters of religious faith one division is very likely to be followed by others. The formation of the Orthodox, Baptist and Methodist Churches were only parts of the same general movement; they were sub-divisions, according to individual choice, of the conservative element of the old Church.

In the centennial discourse of Rev. Rufus P. Stebbins we find this statement: "As early as the ministry of Mr. Bascom we find in the church records some intimations of the existence of Baptist views in the Church. At a meeting of the church in 1817 a brother stated his scruples about the validity of his infant baptism, expressing his doubts of his privilege to sit at the communion table under such circumstances, and desired to be excused from so doing for a short time. His request was cordially granted. About a month afterwards the same brother desired 'to receive a dismission from the church and recommendation.' The church took the subject into consideration, and two months after voted, 'that as the brother had, as they believed, conscientiously connected himself with another denomination of Christians (Baptists), they should consider him no longer under the special watch and care of this church.' The reference in this extract is to Samuel Crocker, father of Dea. S. S. Crocker, of this town. The story

of his conversion to Baptist views is thus told. While reading the Bible at family worship he came to one of the accounts of baptism in the New Testament. His wife interrupted with: 'There, husband, the Baptists are right!' This led to a careful consideration of the subject and a change of belief. He walked to Harvard, applied for admission to the Baptist Church of that town, and was received after a short delay."

The further history of the Baptist Church here is largely a condensation of the admirable historical discourse of Rev. A. F. Mason, delivered at the semi-centennial of the church.

In November of 1818, a year later, there were more converts to the views of Mr. Crocker, and the pastor of the church in Holden visited Leominster and administered the rite of baptism. Great interest was manifested in the ceremony. Men and women came from all parts of the town and lined the banks of the river to witness what was then a most unusual service. In the following year seven more were baptized, and these, ten in all, remained members of the Baptist Church in Holden until June 31, 1822, when, with others to the number of sixty-five, they formed a church of their own faith in Princeton. This is the historical beginning of the Leominster Baptist Church, for the members of Leominster were organized into a branch church, with the privilege of sustaining the ministry of the gospel among themselves, observing the ordinances and of receiving believers to their fellowship. Sometimes with settled pastors, sometimes with transient supplies, and, when neither could be had, with the "demonstration" of Deacon Samuel Crocker, this "Branch" maintained a really independent existence for fifteen years, although not at this time recognized as a separate church.

The parish history begins with 1824. On the 21st of April of that year David Allen, Jonah Rice, Oliver Haskell, Peter Wilder, Willard Parker, Samuel Crocker, Thomas Wilder, Tyler Coolidge, Joseph Smith and Thomas A. Warner petitioned William Perry, justice of the peace for the county of Worcester, "to issue a warrant to all members of the Baptist Society in the Town of Leominster, qualified to vote in town affairs, to meet for the purpose of organizing said Society into a parish." This warrant was issued on the 23d and the society met on the 30th, "in the building owned by widow Eunice Richardson, in said town, where said Society usually assembles for public worship." This house then stood on Main Street, but has been removed and is now occupied by Mr. George M. Kendall, on North Main Street. Here the parish was organized.

The first pastor of the church was Rev. Elisha Andrews. There is no record of the date of his settlement or the length of his service. It is another case of faulty records. At the time everybody knew and it seemed of no consequence; now, no one knows or can discover. April 30th, however, the society voted

to collect money for his salary, so that he evidently began his labors before the parish was organized.

In 1826, Rev. Asaph Merriam was chosen pastor and served the church at a salary of four dollars a week.

From 1824 to 1830 meetings were held in the tailor-shop of John Richardson, which had been furnished with a desk and benches for that purpose. The brethren and sisters occupied different sides of this primitive church. As they were not permitted to adorn their half of the sanctuary with specimens of manly beauty, the sisters concluded to paper the walls; thus forming a "corner" in beauty. During this time the church was supplied, in addition to those already named, by Revs. John Walker, Nicholas Branch and Elias McGregary.

This first meeting-house of this society was built in 1830. It was located on land given for the purpose on North Main Street, where the house of Mr. Stilman Meads now stands, and the building itself is still in use near its original site. The cost, as it appears from a receipt in full given by Daniel Allen, to whom the contract for building was given, was \$834.35.

The next pastor was Rev. Samuel Glover, but it does not seem that the society proposed to take much risk in the matter, for they "voted to employ Elder Samuel Glover to preach to such amount as funds may be raised to pay the expense consequent on Elder Glover's labor." Whether the *amount* of preaching refers to the number or the length of the sermons the record does not say. Appleton Belknap, George Waters, Luther Stoddard and Messrs. Stearns, Merriam and Bradbury—first names not known—served the church after the resignation of Rev. Mr. Glover, in 1833. In 1834 we learn that David Allen obtained the *contract* for the care, the heating and the lighting of the church for \$4.50. The next year the society went to the extent of furnishing four feet of green wood and two feet of dry wood, and paid Henry Perry five dollars for the same work. These are picture facts in which we may see both the history and the spirit of the times.

The next pastor was the Rev. Moses Harrington. In the first part of his ministry (June 28, 1837) the "branch" was organized as an independent church. Twenty-eight persons constituted this infant church. The ministry of Mr. Harrington continued until 1840, and his successor, David Goddard, Jr., was ordained on June 3d of that year. He continued in the office here until Feb. 4, 1843. Of Mr. Goddard the Rev. Mr. Mason says: "He was a reformer, taking high ground against slavery, intemperance and worldly amusements. He led the church as a body to pledge themselves to total abstinence and the dis-fellowshipping of slave-holders. He also framed the following clause which was inserted in the church covenant: 'We will also carefully refrain from spending our time idly at *taverns*, in parties of worldly

pleasure, or in trifling company.' He preached a sermon, which is represented as a powerful discourse, against the wearing by the sisters of roses in their bonnets; and such was the effect that every sister immediately dismantled her head-gear of all ornaments, and put them back again within three weeks." His grave is in Leominster.

The other pastors of this church were David Goddard, Sr., William S. Wilder, Isaiah C. Carpenter, David Taylor and B. H. Clifts. With the end of this last pastorate the Leominster Baptist Church ceased to be; the last entry in its records bearing date October 27, 1849, three weeks after the resignation of Rev. B. H. Clifts. The difficulties were too many and the burdens too heavy for their strength. The people refused to contribute longer to the repairs of a church so badly located and to the support of preaching in a house not fit for public worship. The church was disbanded. At this distance of time and under our changed circumstances it would not be well to pass judgment on the wisdom of this action; but it does not seem wholly clear why it was necessary to disband the old church and lose all its associations if a new church of the same faith was to be organized within six months. Perhaps it was a matter of local necessity.

March 5, 1850, twenty-five persons, assembled at the house of Jonathan Burrage, began the new movement; on the following Sunday these, with seven others, declared themselves the Leominster Central Baptist Church and were recognized as such by council August 23d of the same year. Before the end of the year the house now occupied by the society was built and dedicated. The list of pastors is as follows: Rev. Aurora M. Sawin, 1850-54; Rev. A. C. Bronson, brother of the librarian of the Town Library, 1854-57; Rev. Isaac Woodbury, 1857-58; Rev. A. M. Higgins, 1859, who was pastor thirteen months. For a year after this Joseph Barber, then a student in the Worcester Academy, supplied; Rev. W. H. Watson, 1862, was pastor for three and one-half years; Rev. Abijah Hall, 1866-68; Rev. Thomas Clarkson Russell, 1868-74; Rev. A. F. Mason, 1874-76; Rev. O. D. Kimball, 1876-83; Rev. A. L. Freeman, 1884-86; Rev. Julius B. Robinson, 1886-88.

**THE METHODIST EPISCOPAL CHURCH.**—The real beginnings of this church date from nearly the same time as of the other churches named, but it was not legally constituted until March 10, 1828. The Strattons then, as afterwards, were prominent in this movement, as the first meeting was held at the house of Nathan Stratton and John Stratton was the first clerk. This society dedicated its first house of worship December, 1829. This house continued to meet the wants of the society for ten years, when it was converted into a dwelling-house and the society moved to the church building on Main Street, which had been purchased of the present Orthodox Church. Ten years later, in 1849, this building was repaired

and enlarged. Here the society continued to worship till 1871, when it was sold to the Catholic Bishop and the present beautiful church building on Main Street was dedicated. This edifice cost sixty-five thousand dollars. In beauty and symmetry it ranks second among the public buildings of the town.

This society has had many preachers. At first it formed part of a circuit and was also a mission station. It followed that, after the manner of the Methodists of that time, the society often had more than one minister at a time. The itinerancy itself will also help account for this extended list. These names are as given by members of the society and are as accurate as is now possible.

In 1823 the first society was formed by Erastus Otis, who, with George Fairbanks, were stationed on the Needham Circuit, with which it is supposed Leominster was connected until 1834, when it was probably connected with the Marlboro' Circuit. In 1831 Leominster was probably connected with Lunenburg, in 1836 with Fitchburg, and from 1836 to 1839 with Lunenburg and Marlboro', when it was probably again connected with Lunenburg; in 1840 with Marlboro' and Fitchburg mission. In 1841 it was Leominster and Lunenburg, in 1842 Lunenburg and Leominster, in 1843 Leominster and Sterling missions, in 1844-45 it was a missionary station by itself, and after that a regular station. The list of ministers is as follows: 1823, Erastus Otis and George E. Fairbanks; 1824, Benjamin Hazelton, John C. Risley and Ira M. Bidwell; 1825, John Lindsay, Jared Perkins and H. S. Ramsdell; 1826, Joel Steele, Jared Perkins and Leonard B. Griffin; 1827, Abraham D. Merrill, Giles Campbell and Thomas W. Tucker, supernumerary; 1828, Ephraim K. Avery, Thomas W. Tucker and Lewis Johnson; 1829, Daniel Fillmore, Isaac Jennison and A. B. Kinsman; 1830, Daniel Fillmore, and Isaac Jennison; 1831, Jacob Sanborn and Sanford Benton; 1832, Abraham D. Merrill and Samuel Cogshall; 1833, Isaac Jennison; 1834, Charles Virgin; 1835, Thomas W. Tucker and Joel Knight; 1836, J. S. Ellis; 1837, Charles Virgin, William P. White and Ebenezer F. F. Newell, supernumerary; 1838, Horace Moulton and Ephraim Culver, Jr.; 1839, Willard Smith; 1840, Benjamin Paine and Willard Smith; 1841, Benjamin Paine and Samuel Heath; 1842, Samuel Heath and William A. Clapp; 1843, Horace Moulton; 1844-45, Thomas H. Mudge; 1846, John C. Ingalls; 1847-48, Z. B. C. Dunham; 1849-50, Samuel Tupper; 1851-52, Daniel Steele; 1853-54, Zachariah A. Mudge; 1855, Nathan Soule; 1856-57, Cyrus L. Eastman; 1858-59, John Middleton; 1860, Charles Miller; 1861, Jabez W. P. Jordan; 1862, Jabez W. P. Jordan and H. M. Loud; 1863, M. M. Parkhurst; 1864, Jonas M. Bailey; 1865-66, Thomas J. Abbott; 1867-68, Converse L. Macurdy; 1869-71, John Peterson; 1872-73, Joseph H. Mansfield; 1874-76, Alfred A. Wright; 1877, M. Emory Wright; 1878-

80, Ebenezer A. Smith; 1881-83, Wm. B. Tolman; 1884, M. H. A. Evans; 1885, Henry Lummis; 1886-87, Charles W. Wilder; 1888, Charles F. Rice.

This church is now a strong and vigorous body, doing its full share of the religious work of Leominster.

**SAINT LEO'S CATHOLIC CHURCH.**—This church comes next in the order of time in the religious movements of Leominster. Much indirect work was done for the Catholic faith here before Leominster was made an independent parish in 1872. The first work in this direction was begun in 1849. At that time Rev. Father M. F. Gibson, a Catholic minister of Worcester, Mass., came here and performed the services of his church at the homes of some of the resident Catholic families. The numbers who desired to avail themselves of the benefit and pleasure of his monthly visits increased so rapidly that the selectmen permitted the use of the Town Hall and then of Gardner Hall for his services. From this time his visits were weekly instead of monthly, as at first. In the history of the Baptist Church, mention has been made of their first house of worship, located on the plane between the Centre and North Leominster. In 1857 the Catholic Bishop purchased this and it was fitted up as a place of worship. Before this time, however, Rev. M. F. Gibson was made resident pastor at Fitchburg, and Leominster was still a part of his charge. Other pastors from Fitchburg served the church until it was made a separate parish, and Rev. Father Daniel Shiel, the present able pastor, was appointed.

As already stated, the present Catholic Church was purchased of the Methodist Episcopal Society in 1871. In 1876, it had become much too small for the needs of the people and it was enlarged and wholly remodeled. Its seating capacity was greatly increased and its general appearance improved. A new and attractive parsonage house now occupies the site of the old building, bought with the church, of the Methodist Society. This house was built in 1882.

The church is dedicated to Almighty God under the patronage of St. Leo. It is an important and influential parish.

**CONGREGATIONAL CHURCH OF CHRIST, NORTH LEOMINSTER.**—Prior to May 6, 1874, there was no permanent religious organization of any kind at North Leominster. At different times, for some years, meetings were held in Kendall Hall and elsewhere. Sometimes these meetings were social and in charge of members from the centre, and at other times there was a preaching service by resident pastors. There had been little fixed thought, however, of a separate work for this part of the town before the first half of the year above named. It was true that some feeling had found expression earlier, that the religious needs of North Leominster could not be much longer neglected, and that, as the Orthodox Congregational Church had more members resident there

than any other church at the centre, it might be the duty of these persons to organize a local church. But the matter was wholly indefinite and uncertain until March 24, 1874. At that time those most interested met at the house of Geo. S. Burrage, to consider the "expediency of forming a Congregational Church in North Leominster." There were, at that time, some forty members of the Orthodox Church at the centre resident there, and after mature deliberation these members called a council to meet in Kendall Hall, May 6, 1874, by which they were constituted and recognized as a church of Christ. The society connected with this church was organized April 17, 1875.

From its organization until April, 1880, the church held its public services in Kendall Hall; but on the 7th of that month its present beautiful and convenient house of worship was dedicated. For its size, it is one of the pleasanter churches in town and a great addition to North Leominster. By the liberality of the late Captain Leonard Burrage the society now has a fine parsonage, and from the estates of Mr. Augustus Whitman and Captain Burrage a fund of eleven thousand dollars.

The first pastor of the church was Rev. Henry E. Cooley, installed November 10, 1874, and died February 17, 1877. The other pastors in the order of service have been: Rev. E. G. Smith, from June, 1877, to June, 1881; Rev. Henry P. Cutting, from November, 1881, to September, 1884; Rev. Newton I. Jones, from March, 1885, to March, 1887; Rev. Fred-eric A. Balcon, the present pastor, who began his labors with the church July 1, 1887.

## CHAPTER CLVI.

### LEOMINSTER—(Continued.)

#### EDUCATIONAL.

**THE PUBLIC SCHOOLS.**—The following historical sketch of the schools of Leominster up to the year 1876 was prepared by the late Dr. C. C. Field, for more than forty years a member of the School Board. It is reproduced in this connection for these reasons:

1st. For the years which it covers nothing better is needed, or perhaps possible. For a full generation Dr. Field was a part of that which he describes, and knew in his own person the history of those years.

2d. Dr. Field, by his long service and unusual ability, contributed more than any other man to the progress and development of the schools of Leominster, and to their present efficiency and value. If it is possible, as under the circumstances it is, he should have the honor of recording their history. To his record will be added what is necessary to make it complete to the present date.

At this distant period it is difficult to conceive how great must have been the undertaking for them<sup>1</sup> to provide Christian ministrations and secular education for themselves and their children, while they were subduing the forests and cultivating the newly-cleared fields for the maintenance of their families. Neither can we easily comprehend how much the present prosperity of our schools may depend upon the excellent school system, which, with unusual wisdom and foresight, they established from the beginning. Leominster is one of the few towns in the State that was never divided into legal "School Districts." The town always managed its school affairs in its corporate capacity, built and located all the school-houses, and divided the money raised for the support of schools among the several schools as equally as circumstances would allow, after the subject had been considered and reported upon by a committee chosen for that purpose. In 1789 the following act was passed by the Legislature: "That the several towns and districts in the commonwealth be, and they are hereby authorized and empowered in town-meetings, called for that purpose, to determine and define the limits of school districts within the towns and districts respectively." The term "districts," in the statute applied to sections of the State which, at that time and previously, were incorporated communities precisely similar to towns in regard to territory, rights, privileges and powers excepting the right of being represented in the General Court. This act gave the districts no powers to exercise and no duties to perform, but was simply a provision for dividing the towns into such convenient portions as would facilitate attendance at school; but in 1800 another law was enacted, by which the selectmen were authorized to issue warrants for district meetings, the voters were empowered to choose a clerk, and to raise money for the erection and repairing of school-houses, and for the purchase of necessary "utensils" for the school-rooms, and the assessors were required to assess such sums of money as were voted by the respective districts. By a law enacted in 1817, school districts were made corporations in name, were authorized to sue and be sued, and to hold in fee simple, or otherwise, real and personal property for the use of schools. And finally in 1827 a law was enacted as follows: "School districts are authorized to choose prudential committees, whose duty it shall be to take care of the school-houses, and to select and contract with the teachers."

These laws making provision for territorial division of the town into school districts, making them bodies corporate, authorizing them to raise money to build school-houses and to contract with teachers, were characterized by Horace Mann, the distinguished first secretary of the Board of Education, as most pernicious in their tendency. The same opinion has

<sup>1</sup> The early inhabitants.

been entertained by all his successors. In regard to this matter, the present able incumbent of that office, Hon. Joseph White, expresses himself as follows in his report to the board in 1866: "It is no part of my purpose to refer to, much less to recapitulate the objections to the district system, that have been urged with great force and energy by my distinguished predecessors in office. I fully sympathize with all they felt and said on this topic. I have seen and experienced, as they did, its unfortunate and depressing influence; and I content myself with saying that every day's observation gives strength to my conviction of its utter incompatibility with any high degree of success in the management of school affairs. Indeed, I have ceased to look for further progress where its influence is unbroken." The native town of the chairman of your School Committee was divided into legal "school districts," and, worse than that, in his school-days, though now it is different, the money raised for the support of schools was divided among the several districts, according to the valuation of the property within the respective districts. He was fortunate enough to live and to attend school in one of the most wealthy parts of the town, where the inhabitants, without much effort, could erect a fine school-house, having a hall over the school-room surmounted by a belfry and bell. With their share of the school money, they could continue their school three or four months both summer and winter, while in the poorer districts in the outskirts of the town the inhabitants were obliged to make great sacrifices to build even a very inferior school-house, and their share of the school money would scarcely suffice to maintain a school six or eight weeks during each season. The inequality of such a system was very manifest, even to the comprehension of a boy. How much greater then must the injustice have appeared to his mind, when, in maturer years, he took up his residence in this town, where the municipal system has always existed. The comparison of course could but intensify his dislike of the "district system." Yet, at that time, the district system of managing school affairs prevailed very generally among the towns throughout the Commonwealth. Probably not more than a dozen towns in the whole State used the municipal system.

The Hon. David Wilder, in his "History of Leominster," writes as follows: "It (the town) has never been divided into those little corporate bodies called school districts, in any legal sense of the word. But during a period of more than a hundred years the school system has been administered upon the plan so highly recommended by the late secretary of the Board of Education. The town, in its corporate capacity, has erected all the school-houses, raised all the money, hired the teachers by their selectmen or a committee, and paid them. There has never existed in any one portion of the town any legal authority, except what has been temporarily conferred by the whole town, to take one single step or to per-

form one single act in relation to the public schools." Not only did the town repeatedly refuse to divide its territory into school districts, thus avoiding the evils of district corporations, but also, in several instances, anticipated the action of the General Court in requiring and making provision for a more systematic supervision of the public schools. For more than half a century—from 1747 to 1803—the schools were examined once a year, at the close of the winter term, by the clergyman and the selectmen. During that period the school-books were few, the Bible, Psalter and Dilworth's Spelling-Book being the principal ones. But soon afterwards the books used in the schools became too numerous, since almost every teacher would introduce new ones; the result was that scarcely any two schools in town had the same books. To remedy this evil and to provide for a better inspection of the schools, the town early in 1803 chose a School Committee, whose duty it should be to visit the winter schools at the beginning as well as the close of the term, to take the books into their own hands, to select the lessons and make a thorough examination of the several classes. The School Committee were also authorized to prescribe what books should be used in the several schools; hence they became uniform throughout the town. About the same time, registers, somewhat similar to those now required by law, were introduced. Thus the town anticipated, by nearly a quarter of a century, the action of the State in making provision for a better supervision of the public schools; for it was not till 1826 that the law was enacted making it obligatory on towns to choose a committee to superintend the schools. Such was the system established by the fathers for the management of their schools. And in the same just, equal and republican spirit have the school affairs of the town been administered to the present time, with such modifications as have been made necessary by the increasing population in the Centre and at the North Village during the last quarter of a century.

For a period of fifty-seven years—from 1791 to 1848—the money raised for the support of schools was divided equally, or nearly so, among the schools in different parts of the town. Sometimes this equal division was made of all but seventy-five or one hundred dollars, and the balance was distributed at the discretion of the selectmen, or of a committee chosen for that purpose, or of the School Committee. And this equal division was just and equitable; for all the schools were what are now called "mixed schools," and the circumstances of all were very similar.

But in 1850 the number of families in town had increased to five hundred or more, and in order to meet the requisitions of the law it became necessary to establish a High School. Since that time the number of scholars in the Centre and North Village has increased so rapidly that, at the present time,

besides the High School, with its two departments, three teachers and more than a hundred pupils, it requires the maintenance of three grammar and eight intermediate or primary schools to accommodate them all, where formerly there were but two mixed schools. This concentration of the population and school children in the Centre Village made it practicable to make a proper and desirable classification of the scholars.

This grading of the schools constituted the first important innovation upon the old-time custom of supporting separate mixed schools in different parts of the town. In all schools where it is practicable, a proper classification of the scholars has now, for such a length of time, been proved to be so manifestly beneficial in its results; that it requires no argument to be offered in its favor. Its exemplification can be witnessed any day by all who will take the trouble to visit the graded schools. Of course, the establishment of the high and graded schools, in the Centre and North Village, rendered imperative some modification of the former method of distributing the school money. Still, the same principle is acted upon in giving, as far as practicable, an equal amount of money to all the common schools, with the intent that all shall enjoy equal school privileges.

The most important departure from the ancient method of managing school affairs lies in this, that since 1869 the town has entrusted the care of the school-houses and the selection of the teachers entirely to the School Committee, instead of another committee chosen for that purpose. In all towns not divided into school districts these duties devolved by law upon the School Committee; and not a single vote of the town, for the forty-four years subsequent to 1826, authorizing any other committee to select and hire the teachers, had any sanction of law, but was acquiesced in from deference to a long established custom.

Another innovation of recent origin consists in designating the several schools by means of numbers, which is equally as definite as the former method and avoids the use of the word "districts" as inapplicable to towns not legally so divided, and also the word "wards," as not legitimate in the meaning for which it was used. But this change is not material. The spirit and animus of the ancient system remains; for the town, in its corporate capacity, still builds all the school-houses, takes care of and keeps them in repair, divides the school money as equally as circumstances allow among the several schools, and hires and contracts with all the teachers by a committee chosen for that purpose. And though that committee may be the School Committee, they are none the less chosen officers of the town, and their continuance in office depends upon the will of its citizens.

The wisdom and excellence of the school system is

abundantly manifested by the prosperity of our schools, and is further illustrated by the capability of expansion to any extent to meet the wants of an increasing population. And our reverent gratitude is due the fathers for the inheritance of a school system so nearly perfect in itself and so eminently adapted to our wants.

A brief review of the labors and sacrifices of the early inhabitants, in their endeavor to educate their children, may at least gratify curiosity if it does not excite admiration; it may also serve to stimulate and guide to continued exertion and, by comparison, help to make our present burdens, though seeming grievous to some, appear after all not so very heavy.

The town was incorporated in 1740, having less than twenty families within its limits; these were scattered from Bee Hill to Chualoom Pond, and from Monoosnock Hills to Massapog Pond, there being only two houses in the Centre, with scarcely a carriage road to help the settlers through the almost unbroken forest in their communication with each other. Yet these hardy and devout men, before the year expired, voted to build a meeting-house, on which during the next year (1741) work was far advanced, that thereafter it was used on Sunday for divine service, though in a very unfinished state, having rough boards for an outside covering, loose planks for a floor, and no pews; and in it were held all town and parish meetings. This meeting-house, located at the northwest corner of the old cemetery, was not completed till 1753, twelve years after its foundations were laid.

In December 1747, the first money was raised "for schooling," and it was voted "that it should be schooled out, one-half on the north side of the river and the other half on the south side of the river." Of course the school must have been kept in private houses. The sum raised was about £10 or \$40. In those days and until the Revolution £1 sterling was of about the same value as \$4 in silver. In 1748 and 1749 the same sum (£10) was raised for schools. 1748 the town, at the March meeting, also voted "*to build a school-house and set it at ye meeting-house in said town, 24 feet long, 18 feet wide and 7 feet stud.*" £20 was raised to pay the expense, but probably it was not built till the next year, 1749, because in December of the latter year the town raised £35 (\$140) to pay for the school-house. So here, as elsewhere, the descendants of the Pilgrims planted the school-house hard by the meeting-house. First the church was organized and then schools were established for the formation of a religious and educated community. Some idea may be conceived of the difficulties in the way of the accomplishment of this undertaking, when it is borne in mind that the early settlers raised \$40 for the support of a school and \$140 for building a school-house; some years before they were able to finally complete their meeting-house by clap-boarding and painting it, and by constructing pews inside. In 1750 the town paid Jacob

Peabody £6 2s. 6d. for keeping school at the school-house till the first of March. In 1751 and 1752 £10 were raised for schools each year and the town voted to choose a committee of three "*to provid sum meat persons for winter and summer schooling, six weeks for a writing-school and the rest to be laide out for school dames.*" In 1753 it was voted to keep school three months, for what sum the record does not state, as the money for schools and town charges was raised in one sum together.

In 1754, £14 were raised for schools, of which sum £5 6s. 3d. were appropriated "to hire school dames and the remainder to be schooled out in the winter."

In 1755, £8 were raised for a writing-school to begin October 1st.

In 1756, £13 6s. 8d. were voted for the support of schools, to be expended for paying a master to keep a writing-school three months during the winter and the balance for "hiring school dames" as the selectmen should direct. The schools taught by women were kept, one at the Centre in the school-house, the others in private houses, one at the northern, the other at southern part of the town. The amount of money raised for schools during the first ten years, 1747-57, varied from £10 to £13 6s. 8d., or from about \$40 to \$56.

In 1757, £15 or \$60 were raised, to be expended in three places at the discretion of the selectmen.

In 1758 no money was voted for schools.

In 1759, £16 were raised and it was voted "*that all of it should be schooled out at the school-house*" in the Centre.

During the second decade, 1757-67, the sum raised for schools gradually increased from £15 to £40, from \$60 to \$160; some years this amount was all expended at the school-house, in other years at three places, as the selectmen should think proper.

In 1765 one-half of the £40 was voted "*to be schooled out*" in keeping a grammar school at the school-house near the meeting-house, the other half "*to be schooled out for a woman's school, as the selectmen shall think proper.*" All scholars who could read *by spelling out the words* had the right to attend the grammar-school.

In 1766 it was voted that two-thirds of the £40 should be "schooled out" by a master and the remaining one-third by "school dames in 3 places, as the selectmen should think proper."

Thus we see that for the first twenty years after the first money was raised for the support of schools, in 1747, there was but one school-house in town, and that was in the Centre, near the meeting-house. For some years there was but one school kept, either winter or summer, and this was at the school-house; at other times, particularly in the latter half of the period, there were three schools during the summer taught by women, one in the school-house at the Centre, one in the northern, the third in the southern part of the town in private houses. Truly the chil-

dren of that age were obliged to "seek knowledge under difficulties." Imagine, if you can, the boys in the winter, starting for school through the woods from Bee Hill, Carter Hill and Chualoom Pond, forcing their way through snowdrifts, with poor roads or no roads at all, to reach the school-house at the Centre two or three miles away. For the girls, living in remote parts of the town, it would seem impossible to attend school at all in the winter. Surely the opportunities for acquiring knowledge, enjoyed by the children of the town for the first forty or fifty years after its incorporation, must seem extremely meagre to the present generation, with all their abundant facilities. With truth may the youth of the present time say "our lines are cast in pleasant places."

In 1767 it was "*voted to divide the town into three parts for schooling.*" It was also "*voted that the town should pay the charge of building three new school-houses, one in each part of the town;*" and the town chose a committee of three in each third part of the town, to superintend the work, and raised £66 13s. 4d. to pay the expense of their construction. The town also raised £40 "*to be schooled out this year,*" and "*voted and chose Mr. Josiah Swan to be the school-master for the town for the ensuing year, and chose the selectmen a committee to agree with him.*" These school-houses afforded all the accommodations for attending school that the children enjoyed for the next twenty-four years, or till 1792, though the population of the town in 1790 had reached the number of 1197, consisting of about two hundred families.

From 1768 to 1774, inclusive, the sum annually raised for schools varied from £33 6s. 8d. to £40, or from \$133 to \$160, except that in 1772 no provision at all was made for schools. Two-thirds of the school money were expended in paying for a master to keep a grammar school in the Centre, and the other one-third in hiring "school dames" to teach in the summer. In those days Josiah Swan was a famous teacher of the grammar school and for several years was chosen in open town-meeting. Hon. David Wilder, in his "History of Leominster," says that "so heavy were the burdens of the inhabitants during the Revolution, that for several years they raised no money for schools." But the town records show that from 1774 to 1783 there was but one year, 1777, when there was no money raised for that purpose, though the amount in some years was small. In 1775, only £12 was raised, and the manner of its expenditure was defined by the following vote: "*That all the money be laid out in women's schools and that the school dames EMPLOY THER HOOL TIME in teaching the children to READ, RIGHT AND SIFER AND NOTHING ELSE.*" Whether the prohibition was aimed at the teaching of needlework or orthography the record does not state. The town also voted "*to choose a committee of three in each third part of the town to plase the schools and provide school-dames.*"

In 1776 £55 were voted "*for twelve months schooling, four months in the several parts of the town.*"

In 1778 it was voted that the £100 raised for schools "*should be schooled out by men.*"

In 1779 £400 were raised, and it was voted "*to have a grammar school six months and a woman's school six months.*"

In 1780 it was voted "*to raise £2000 for schooling, the one-half to be schooled out by a man school, and the other half by a woman school.*"

The sums raised for schools during the last three years show the rapid depreciation of the old Continental money.

In 1780 £40 (in silver money) was raised for schools, and from that year to 1790 the school money was gradually increased to £100 or about \$333.33; as after the Revolution and until the use of Federal money, in 1799, £1 (Provincial) was equal to about \$3.33 $\frac{1}{3}$ . During that period two-thirds of the money were usually expended for a "man school," sometimes called a Grammar School, and one-third for a "woman school," in the three different portions of the town. A part of the time the people residing in that part of the town (now called No. 7) received their proportional part of the money and spent it among themselves.

In 1791 £10 were raised for schools, and it was voted that three-fourths of it should be laid out in men's schools and one-fourth in women's schools. It was also voted to divide the town into seven different parts, to be called "wards," and to build seven school-houses, to be finished during the next year. For that purpose £210 at first, and afterwards £105 additional were raised. A joint committee, consisting of the selectmen and one man from each ward, were chosen to provide teachers.

From 1791 to 1796 the sum raised for schools was gradually increased from £100 to £165, and the amount was equally divided among the seven wards.

From 1797 to 1803, inclusive, the sum of \$666 67 was raised, \$600 being equally divided among six wards, No. 7 receiving \$66.67.

In 1804 and 1805 \$700 were raised each year, and were equally divided between the seven schools.

In 1806 a new ward, called No. 8, was established, and \$250 were appropriated to build a new school-house.

From 1806 to 1836, a period of thirty years, a sum varying from \$800 to \$900 was appropriated for schools, \$800 being equally divided among the eight wards, and the amount exceeding \$800 being allotted to the different schools at the discretion of the selectmen.

From 1837 to 1848, inclusive, \$1200 were annually raised for schools. During this period the population in the Centre had increased so much that two or three schools were required to accommodate the children; and another ward, No. 10, was established, comprising a part of Wards 3 and 4, and in 1845 a new

school-house was erected for the convenience of the increasing number of scholars at the North Village. The money raised during this time was divided as equally as practicable, generally at the recommendation of a committee consisting of the School Committee, or some member thereof, and one citizen from each school ward, who was nominated by the inhabitants of the same and approved by the town. And this method of dividing the school money was continued till 1853, since which time it has been distributed according to the recommendation of the School Committee in their annual report, or expended, as of late years, at their sole discretion.

In 1849 \$1500 were raised for schools; in 1850, \$1900; in 1851 and 1852, \$2150. On account of the establishment of the High School in 1850, and of the rapid increase of the town in population and wealth during the last twenty-five years, the sum of money voted for schools has greatly increased. In 1855 the amount was \$2976.36; in 1860, \$3323.67; in 1865, \$3979.96; in 1870, \$6600; and in 1875, \$8750. Of this last sum, \$350 were expended for teaching vocal music, \$300 for a free evening school, and \$200 for a free school for industrial drawing.

The following table will show the population, valuation, amount of money raised for schools, and its percentage of the whole valuation of the taxable property of the town, expressed as so many mills and hundredths of mills on a dollar for the years named in the first column:

Year.	Population.	Valuation.	Amount raised for schools.	Per cent. of valuation. <sup>1</sup>
1763	743	.....	.....	.....
1776	990	.....	.....	.....
1790	1197	\$103,698	\$333.33	\$ .03-21
1800	1495	119,223	666.67	.005-67
1810	1584	137,299	800.00	.005-82
1820	1791	414,895	900.00	.002-17
1830	1861	449,247	900.00	.002-00
1840	2069	836,061	1200.00	.001-43
1850	3121	1,495,155	1900.00	.001-27
1860	3522	1,728,997	3323.67	.001-92
1870	3894	2,749,594	6600.00	.002-40
1875	5201	3,938,507	8750.00	.002-22
1880	5776	3,747,885	9350.00	.002-49
1885	5297	3,797,471	13,003.00	.002-18

The table explains itself. It appears from it that we are not expending more for school purposes, according to our means, than our predecessors. It shows that for the last fifty years the percentage which the school money bears to the whole taxable property of the town has varied but little. And from the history of the town we have learned that for fifty years previous to the beginning of the present century the inhabitants were obliged to sacrifice all the luxuries and many of the comforts of life to pay their taxes at all. The wonder is how they could raise money enough to pay their minister and school-teachers even the small pittance which the latter received.

<sup>1</sup> Equivalent to mills and hundredths of mills.

From the time when the foregoing sketch closes (March, 1876) to the spring of 1883 there was very little change more than usually comes in the regular course of school work, where both committee and teachers are anxious for the best results. It was the habit of the committee to invite the leading educators of the State to visit the town, examine the schools and address the teachers. In this way, and by frequent attendance at educational meetings elsewhere, a full knowledge of the best methods was in the possession of the teachers. At no time was there lack of energy or life in the work.

During all the last part of his service, as chairman of the School Board, it was the custom of Dr. Field to include in his annual report a discussion of some interesting and timely educational topic. Many of these papers show the most careful study and thought. They are of permanent value, and, no doubt, had much influence in keeping up the general feeling of interest in matters of education. The following is interesting as a sample of what these papers contained. He was writing of the general subject of education:

"The need of a good education being universally conceded, it becomes at once the duty of parents, teachers and supervisors of schools to consider the best means of securing that amount of knowledge which the public good ought to require of each individual and the most efficient methods of acquiring that knowledge. It is a subject of vital interest to the Commonwealth."

This expresses well and forcefully the idea of general responsibility for the success of school work:

"The whole system of Public instruction should engage the earnest attention of every citizen. None are so ignorant as not to be able to help onward the good cause, and none are too wise and learned to be exonerated from the duty of bestowing freely of their means and fostering care, each according to his ability. The danger of the age is an increasing indifference to public instruction. Through the desire for sectarian schools on the part of some, the preference for private schools by many, and the desire for schools of higher culture by others, the public common school, on which the great majority of the children of the State must rely, for the acquirement of the elements and first principles of knowledge, in fact, for all the education they will ever receive at school, is in danger of being neglected. *The common school, supported at the public expense, is worthy of increasing interest, generous support and careful supervision.*" The last sentence is made emphatic here, as it not only expresses an important truth, but shows the spirit which controlled the school management for so long a period.

At the annual town-meeting in 1883 the town, after a most thorough discussion and consideration of the subject, voted to employ a superintendent of schools. This change required an increased appro-

priation, and the town added \$1500 to the amount recommended by the committee, or \$12,909.62 in all. The time had fully come for such action on the part of the town, and the result has vindicated its wisdom. There is no danger that the town will now go back to the old way.

The action above referred to was in April, and before the end of the term the committee elected Mr. William E. Pulsifer, principal of the High School in Stoughton, Mass., as superintendent of schools for Leominster. He entered upon his duties the 1st of September, 1883, and continued in office until April, 1885. At that time he resigned to take a more profitable position with a publishing house in Boston. His administration of the schools was marked with a good degree of wisdom and success: all that ought to have been expected, where the office was new and the incumbent without previous experience, was accomplished. The committee would gladly have retained Mr. Pulsifer in the service, and to that end proposed a larger salary, but he preferred his present work.

The present superintendent, Mr. I. Freeman Hall, was elected to fill the vacancy. He had seen successful service in the same kind of work at Dedham, Mass., and came to Leominster with both experience and skill as a superintendent. He is especially familiar with primary work, and has made a valuable record, both here and in Dedham, in this department. His administration of the schools has been and is successful. He is, also, a most acceptable speaker upon educational subjects, and a superior teacher of Normal Classes and Institutes.

The closing words of Mr. Hall's last annual report may be added, as expressing the present condition and temper of the town in regard to school matters: "It has been pleasant to labor in a community where there is such a good degree of intelligence and appreciation, and where committee, teachers, parents and citizens are so fully in sympathy and work together so harmoniously to secure the highest and best results."

**THE HIGH SCHOOL.**—The Leominster High School, now the Field High School, was established in 1850, but it was not until 1868 that a regular course of study was arranged and diplomas granted to those who finished this course. Since that time there have been one hundred and seventy-nine graduates. The history of these is given by the superintendent in his last annual report. "Five of the graduates," he said, "cannot be accounted for. Eight are dead. Three died soon after graduation; five after they had given promise of great success. Of the remaining one hundred and fifty-six" (the last class of ten was not included in the percentage, of course, but is now included in the whole number of graduates given above), forty-five, or more than twenty-eight per cent., are teaching in the common schools of Leominster, Watertown, Concord, Mass., and of Vermont, New Hampshire, North Carolina and other Southern and Western States, or in Normal Schools, colleges and

universities. Thirty-three, or nearly twenty-two per cent., are now studying in colleges, Normal Schools, scientific and professional schools.

"Twenty-eight, or eighteen per cent., are in business or following some scientific pursuit.

"Sixteen, or nearly seven per cent., are lawyers, doctors or ministers.

"Twenty, or more than twelve per cent., have married men successful in business or professional life. Twenty, or more than twelve per cent., have been kept at home by duty or ill-health, or have remained there from choice."

The above is surely a favorable showing for the graduates of this school. It is the record and stands for all who wish to read.

The following list contains the names of all who have served as principals of the High School: Josiah S. Phillips, of Georgetown, May, 1850; Andrew F. Willard, of Lancaster, June, 1854; Jasper Fish, of Middleton, Conn., March, 1855; D. H. Goodell, of Antrim, N. H., June, 1856; Caleb Blodgett, Jr., September, 1856; Halsey J. Boardman, June, 1858; George R. Marble, of Fitchburg, July, 1859; D. B. Hubbard, April, 1862; Samuel H. Virgin, of Chelsea, March, 1864; M. P. Stafford, of Cambridge, March, 1866; G. G. Pratt, of Cambridge, August, 1866; O. H. Stearns, of Lunenburg, December, 1866; Joel D. Miller, of Athol, April, 1867, who has charge of the school at the present writing. The names of the assistant teachers need not be given. It is enough to say that Miss Sarah E. Richards was elected to the place in 1876—a position which she has filled and still fills with entire acceptance to all concerned. The name of one other teacher, Mrs. Ella M. Wilder, should receive honorable mention in this connection. After three years' service in other schools she was, in 1868, elected principal of the second department of the High School. This position she filled with eminent ability and success until the summer of 1886, when she resigned to engage in business.

**SCHOOL BUILDINGS.**—So far as there is any record or tradition in the matter, Leominster has always provided liberally for her schools in the way of buildings and supplies. In this respect to-day she is more than the equal of similar towns throughout the State. It is true there is but one costly school building in town, and, in this case, the cost has been accumulated by continued alterations and additions, in part, at least, the result of a faulty construction at first. Still, Leominster has some of the best school buildings in the State, if regard to use be the point. The Field High and Grammar School, while as poor in some ways as any, is still well adapted for school work, and some of the best and pleasantest of rooms. The Field Primary and the Bennett School, both constructed on the same general plan, are model school buildings. It is not easy to see how, with moderate outlay, better results could be obtained. The first was built about 1870, at a cost of \$8000, or about

that, and has been remodeled so as to accommodate four in place of two schools. The Bennett School building was built in 1874 and remodeled last year. These buildings as they now stand cost about \$11,000 each. A new school building was erected at North Leominster in 1888. It is one of the best and most complete for the cost to be found anywhere. It is convenient, substantial, handsome in finish, has the best heating and ventilating arrangement in the country, and provides thoroughly for the comfort and health of the scholars. The cost was about \$12,000. Leominster has no reason to be ashamed of her school buildings.

The results in education are, after all, often as much in men as in buildings and town votes. It is proper to make, therefore, some reference to the men who have had most to do with the educational affairs of the town.

**JONAS HENRY KENDALL.**—No historic sketch of the school system and school affairs of the town can be complete that does not record the name of Jonas Henry Kendall among the generous benefactors of the town. He died in 1862, a descendant of an ancient and honorable family of the town. By his will, besides mirror bequests to individuals and a gift to the town of a fine bell for the Town-House, and \$5000 for a hall and school-room at North Leominster, he bequeathed to the town \$5000 for a free Public Library, the income of \$10,000 for the support of the High School, and the income of \$3000 for the benefit of the school at the North Village. It is particularly for his benefactions to the cause of education that his name should be held in grateful remembrance for all time by all lovers of sound learning and generous culture.

**DR. CALEB CLESSON FIELD.**—To write adequately of the schools of Leominster and not give some account of the life and work of Dr. C. C. Field would be impossible. It would be equally unjust, for to his sustained interest, watchful care and excellent judgment the town is very largely indebted for her superior schools, and especially for those progressive ideas of school management and instruction for which Leominster has so long been noted. Of this the writer can speak with confidence. For fourteen years he taught under Dr. Field's direct supervision, during which time two of the doctor's own children were members of the school and graduated under the writer's personal instruction. Dr. Field's work for the Leominster schools, his general estimate of the public school system, his ideas of management, instruction and progress, his temper towards the new and the old in education, are all matters of familiar knowledge. There is lasting advantage in placing a system of schools in the right attitude, in leading parents and teachers to cherish the right spirit towards educational topics; a mind at once hospitable to progress and conservative of the real gold in possession, and in keeping a town up to the point where it is willing

to honor, cherish and keep its public schools. All this and more Dr. Field did for Leominster, and of this mention should be made to his lasting honor.

Caleb Clesson Field was born in Northfield, Mass., May 27, 1810; he graduated with honors at Amherst College in the summer of 1833. His first public work was as a teacher in the old town of Concord, Mass., where, as a young graduate, he achieved marked success. Teaching was not, however, his chosen profession, and in the year 1835 he began the study of medicine at a private school in Boston. He remained here until June of the next year, when he was compelled to leave on account of failing health. He remained at his home in Northfield until 1837, studying medicine with Dr. Dean, of Greenfield. After this he spent five months with the then celebrated Dr. Twitchell, of Keene, N. H. At the close of his studies there he attended a course of lectures at Dartmouth Medical School and received the degree of M.D. from that institution in 1837. In the same year Dr. Field came to Leominster and settled in the work of his profession, continuing its practice with the growing favor of the community until his death, in 1881.

In 1838 Dr. Field was elected a member of the Leominster School Board and served without interruption from that time until his death. At the time when he became a member of the board, the educational pulse of the State was showing increasing strength. New blood had been infused into the system by Horace Mann and others. The State Board of Education caused broader and juster ideas of education to take strong foot-hold in all parts of the State; with these ideas Dr. Field was fully in sympathy. During a long and active life he kept himself well posted on all educational topics, was a close observer of methods and a clear and forcible reasoner upon the principles of teaching. He was ready to advocate any change for Leominster schools which gave reasonable promise of greater efficiency in school work, but was not willing to throw away an actual good for what was only an imaginary gain. He was the friend of any earnest and faithful teacher, a safe counselor, a decided helper in the line of direct suggestion. The schools of Leominster will always bear the marks of his wise care, faithful oversight and unflinching interest. As our modern life makes larger and larger demands upon the time of the individual, and the system of public instruction becomes more comprehensive, special supervision by men who can devote all their time to the work must take the place of the old way. But in the years before this was possible, any town was most fortunate if among her citizens there was one who had the will and the ability to do for her public schools what Dr. Field did for the schools of Leominster. He labored with unflinching interest and zeal, with rare wisdom and success, for the wise and permanent development of our system of schools, and after a service of over forty-three years left the schools among the best in the State. On the

anniversary of his death the teachers and scholars have been accustomed to cover his grave with flowers.

As a physician Dr. Field was held in high esteem by members of the profession, and served the town with skill and success. He was twice chosen by the people to represent them at the General Court, and did most honorable and efficient service there, especially as a member of the Committee on Education.

As a man Dr. Field was highly esteemed by the community. His character grew in breadth and strength to the end. He left a lasting impression for good upon the community.

In May, 1881, Dr. Field, reduced in strength by the severe work of the winter and early spring, took a sudden cold which developed into pneumonia, of which he died after a brief illness of five days. He was three times married, but only one of his children is now living.

JAMES BENNETT, ESQ.—This is an honorable name in Leominster, and especially in connection with her public schools. Mr. Bennett was for a long time an active and influential member of the School Board, and to the end of life an earnest, devoted friend of education. His time, his influence, his help in every way, was freely given to the public schools. In this field, as well as others, he did excellent and lasting work. In many ways Mr. Bennett was exceptionally well-fitted to work for the schools. His interest was constant. So far as he was able—and his ability exceeded that of most men not actually engaged in teaching—he gave direct help in this work. His service was honorable to himself and helpful to the cause.

In other ways Mr. Bennett served the town faithfully. He was for many years a member of the Library Committee, and one of the most potent factors in its growth. Of his work there it is sufficient to say, that when he became a member of the committee he found the library a *small* collection of books of *small* value; when he left the committee, in 1880, on account of age and health, the library numbered eight thousand volumes, had a home of its own, and a fine reading-room department. Of the work needed to bring all this about Mr. Bennett bore his full share. He was a wise and efficient member of the committee, serving much of the time as its treasurer.

Mr. Bennett also served the town as its Representative at the General Court. In this, as in other places, he honored himself and the town.

Writing in 1853, Mr. Wilder, in his "History of Leominster," said: "Although there have been some failures on the part of the teachers, yet, at least for the sixty-five years past, the town has been peculiarly fortunate in this particular." Not now including the High School, to which there is reference elsewhere, it may be noticed that not a few of the teachers in the grammar and primary grades have been for many years in the service of the town, and have *shown rare ability in teaching and rare fidelity in work*. Of this

the writer has personal knowledge, and it would be neither just nor honest to end this article without saying, that in all the grades to which reference is now made at least, while there may have been some failures, it is still true, as it was in 1853, that Leominster has been *peculiarly fortunate in her teachers*. When it is remembered that it is, after all, neither the building, nor the text-book, nor the committee, nor the superintendent, but the *teacher* who determines the character and influence of the school, there should be no more honored names in connection with our school history than of those teachers who, in these least-noticed places, with unflinching patience, zeal and devotion, have given the strength of their best and truest life for the success of the Leominster schools.

The following persons have served the town as members of the School Committee:

1803.—Dr. Daniel Adams, Abijah Bigelow, Esq., and Jonas Kendall, Esq.

1804.—D. Adams, A. Bigelow and J. Kendall.

1805.—A. Bigelow, Asa Johnson, Esq., Rev. Francis Gardner, David Wilder and J. Kendall.

1806.—Rev. F. Gardner, A. Johnson and D. Wilder.

1807.—Rev. F. Gardner, A. Johnson and D. Wilder.

1808.—A. Johnson, D. Wilder and A. Bigelow.

1809.—F. Gardner, A. Johnson, Josiah Richardson, D. Wilder and Bezaleel Lawrence, Esq.

1810.—F. Gardner, A. Bigelow, J. Kendall, D. Wilder and Joshua Chase.

1811.—J. Kendall, D. Wilder, J. Crosby, J. Richardson and William Perry, Esq.

1812.—D. Wilder, J. Richardson and William Perry.

1813.—D. Wilder, Caleb Barton and William Perry.

1814.—William Perry, J. Crosby and J. Kendall.

1815.—William Perry, Daniel Fuller and Joshua Chase.

1816.—Rev. William Bascom, A. Bigelow and J. J. Richardson.

1817.—William Bascom, D. Wilder, Dr. A. Haskell, Daniel Gates and Horace Richardson.

1818.—W. Bascom, Dr. C. W. Wilder, Joseph G. Kendall, D. Wilder and D. Gates.

1819.—William Bascom, D. Wilder, C. W. Wilder, William Perry and D. Gates.

1820.—D. Wilder, C. W. Wilder, William Perry, Jonas H. Kendall and Leonard Burrage.

1821.—Rev. Abel Conant, D. Wilder, Levi Nichols, J. H. Kendall and L. Burrage.

1822.—A. Conant, D. Wilder, Levi Nichols, J. H. Kendall and H. Richardson.

1823.—A. Conant, D. Wilder, L. Nichols, J. H. Kendall and H. Richardson.

1824.—A. Conant, William Perry, Dr. A. Haskell, Jr., J. H. Kendall and H. Richardson.

1825.—A. Conant, J. G. Kendall, Dr. Thos. R. Boutelle, J. H. Kendall and L. Burrage.

1826.—A. Conant, Philip Payson, T. R. Boutelle, J. H. Kendall and J. G. Kendall.

1827.—A. Conant, T. R. Boutelle, Solon Carter, J. H. Kendall and J. G. Kendall.

1828.—A. Conant, Solon Carter and T. R. Boutelle.

1829.—A. Conant, David Wilder and Charles W. Wilder.

1830.—A. Conant, J. J. Taylor and Alanson J. Whitcomb.

1831.—A. Conant, A. J. Whitcomb, T. R. Boutelle, Solon Carter and J. H. Kendall.

1832.—A. Conant, S. Glover, J. H. Kendall, S. Carter and A. J. Whitcomb.

1833.—A. Conant, S. Glover, J. G. Kendall, S. Carter and D. Wilder.

1834.—A. Conant, C. W. Wilder, S. Carter, A. J. Whitcomb and Albert Smith.

1835.—A. Conant, C. W. Wilder, S. Carter, Rev. O. G. Hubbard and Dr. Albert Smith.

1836.—A. Conant, C. W. Wilder, S. Carter, O. G. Hubbard and A. Smith.

1837.—O. G. Hubbard, C. W. Wilder, S. Carter, A. Smith and Sumner L. Carter.

1838.—Rev. R. P. Stebbins, O. G. Hubbard, Rev. Moses Harrington, C. W. Wilder and Dr. C. C. Field.

1839.—R. P. Stebbins, O. G. Hubbard, M. Harrington, C. W. Wilder and Dr. C. C. Field.

1840.—O. G. Hubbard, M. Harrington, C. W. Wilder, C. C. Field and Rev. John C. Goodridge.

1841.—O. G. Hubbard, R. P. Stebbins, C. C. Field, Solon Carter and C. W. Wilder.

1842.—O. G. Hubbard, R. P. Stebbins, C. W. Wilder, C. C. Field and S. Carter.

1843.—O. G. Hubbard, R. P. Stebbins, C. W. Wilder, C. C. Field and S. Carter.

1844.—R. P. Stebbins, O. G. Hubbard, C. W. Wilder, C. C. Field and S. Carter.

1845.—O. G. Hubbard, Rev. Hiram Withington, C. C. Field, A. J. Whitcomb and Joel W. Fletcher.

1846.—O. G. Hubbard, H. Withington, Rev. J. C. Carpenter, J. M. Burrage and Alanson Richardson.

1847.—O. G. Hubbard, H. Withington, C. W. Wilder, C. C. Field and S. Carter.

1848.—O. G. Hubbard, H. Withington, C. W. Wilder, C. C. Field and S. Carter.

1849.—O. G. Hubbard, Rev. Amos Smith and C. C. Field.

1850.—O. G. Hubbard, A. Smith, Rev. S. Tupper, C. C. Field and Dr. G. W. Pierce.

1851.—O. G. Hubbard, A. Smith, Rev. A. M. Swain, C. C. Field and G. W. Pierce.

1852.—A. Smith, A. M. Swain, C. C. Field, G. W. Pierce and Charles H. Merriam, Esq.

1853.—Amos Smith, A. M. Swain, J. S. Brigham, C. C. Field and John Hurd.

1854.—C. C. Field, Amos Smith, J. S. Brigham, A. M. Swain and ——— Mudge.

1855.—C. C. Field, Amos Smith, J. S. Brigham, I. Smith and J. W. Fletcher.

1856.—C. C. Field, Solon Carter, Charles H. Merriam and James Bennett.

1857.—C. C. Field, Solon Carter, Charles H. Merriam, James Bennett and James T. Joslin.

1858.—C. C. Field, Solon Carter, Stephen Barker, Charles H. Merriam, C. C. Field, Henry Shaw and James Bennett.

1859.—James Bennett, Henry Shaw, C. C. Field, Solon Carter and Stephen Barker.

1860.—Charles H. Merriam, Solon Carter, C. C. Field and James Bennett.

1861.—Solon Carter, C. C. Field, Charles H. Merriam and James Bennett.

1862.—James Bennett, C. C. Field and Charles H. Merriam.

1863.—Charles H. Merriam, C. C. Field and James Bennett.

1864.—C. C. Field, James Bennett and C. H. Merriam.

1865.—James Bennett, C. C. Field and Charles H. Merriam.

1866.—Alfred L. Burditt, James Bennett and C. C. Field.

1867.—C. C. Field, A. L. Burditt and James Bennett.

1868.—James Bennett, C. A. Wheeler and C. C. Field.

1869.—James Bennett, C. C. Field and H. A. Boyden.

1870.—C. C. Field, H. A. Boyden and James Bennett.

1871.—John H. Rice, H. A. Boyden and C. C. Field.

1872.—Henry A. Boyden, C. C. Field and John Rice.

1873.—C. C. Field, H. A. Boyden and John H. Rice.

1874.—John H. Rice, H. A. Boyden and C. C. Field.

1875.—C. C. Field, John H. Rice and Mrs. Ella M. Wilder.

1876.—C. C. Field, John H. Rice and Ella M. Wilder.

1877.—C. C. Field, Hamilton Mayo and Ella M. Wilder.

1878.—C. C. Field, Hamilton Mayo and Ella M. Wilder.

1879.—C. C. Field, Hamilton Mayo and Ella M. Wilder.

1880.—C. C. Field, Hamilton Mayo and Ella M. Wilder.

1881.—C. C. Field, Hamilton Mayo, Henry R. Smith, Joel D. Miller, Joel C. Allen and John H. Rice.

1882.—Dr. C. A. Wheeler, Henrietta M. Gates, Hamilton Mayo, Henry R. Smith, Joel D. Miller, Joel C. Allen and John Rice.

1883.—Charles C. Foster, George M. Powers, Henry R. Smith, C. A. Wheeler, J. D. Miller and Mrs. Henrietta M. Gates.

1884.—E. M. Rockwell, Charles C. Foster, George M. Powers, Henry R. Smith, C. A. Wheeler and Henrietta M. Gates.

1885.—E. M. Rockwell, C. C. Foster, George M. Powers, Henrietta M. Gates, J. D. Miller and Henry R. Smith.

1886.—E. M. Rockwell, C. C. Foster, George M. Powers, J. D. Miller, Henrietta M. Gates and F. C. Bowen.

1887.—E. M. Rockwell, C. C. Foster, George M. Powers, J. D. Miller, Henrietta M. Gates and F. C. Bowen.

1888.—E. M. Rockwell, C. C. Foster, George M. Powers, J. D. Miller, Henrietta M. Gates and F. C. Bowen.

THE FREE PUBLIC LIBRARY.—In writing of the educational facilities which Leominster affords, some mention should be made of the different departments of her Free Public Library. There is a close connection between these and the schools. Many of the books purchased are such as will aid, both directly and indirectly, the work of teaching. In this way the library becomes a direct and most efficient educational force. By offering a large and well-selected collection of the best books, many of them beyond the means of a majority of its patrons, the library must be, in any community, a persistent power in the education of the people. But the library may be, and in Leominster it is, in direct sympathy with the schools, takes an active and helpful part in their work, gives opportunity for improvement and invites to better methods. Leominster has reason to take pride in her library. The books are, in the main, well-selected; they are free to all, and sufficiently varied in character and subject to meet the reasonable requirements of this community.

The first Public Library in the town of Leominster was gathered in 1763, and numbered about one hundred volumes, and was known as the Leominster Social Library. For fifty-two years this library was kept in the study of Rev. Francis Gardner. The case which held it is in the possession of the library committee. This book-case is about thirty-four and one-half inches square, and contains three shelves.

About the time the Rev. Abel Conant was settled here the books of this old Social Library were sold, and the proceeds invested in a new collection. To this new library there were about one hundred subscribers. This library was removed from place to place, as one and another served as librarian; but it seems to have rested for the longest time with Miss E. G. Gardner, a niece of Rev. Francis Gardner, above-named. It was kept in her house seven years. In 1848 this Social Library was given to the Leominster Lyceum.

In about the year 1826 a literary society, known as the Leominster Institute, was organized. Through the efforts of this society another library was gathered, and in December, 1847, contained about two hundred

volumes. It was then given to the Leominster Lyceum. The Leominster Lyceum, which received these two libraries, was organized in December, 1847. The last entry on the record-books is for 1853; but the Lyceum retained its library till 1856, when it was presented to the town, on condition that the town would establish a Public Library.

The first effort made to establish a free town library, of which there is any record, was in 1853. In the warrant for the March meeting of that year, the 22d article read as follows: "To see if the town will establish and maintain a Public Library and provide suitable rooms therefor; and if so, to raise and appropriate a sum of money for the above purpose." In the records of the meeting held under this warrant we find the entry, "Voted to dismiss article 22d." Here the matter rested, so far as the action of the town is concerned, till April, 1856. The subject was then taken up in the form of an article "To see if the town will accept of the Lyceum Library, and make it the basis of a Public Library." When this article came up in town-meeting it was referred to a committee consisting of the following gentlemen, viz.: Luke Lincoln, Abel C. Wilder, C. C. Field, D. R. Haynes and J. C. Allen, with instructions to report at the adjourned meeting. In accordance with the recommendation of this committee, made in their report May 5, 1856, the town voted to accept the library offered by the Leominster Lyceum, and establish a Town Library of the same, according to law. The same gentlemen were chosen to receive and have charge of the library. The town raised and appropriated the sum of seventy-five dollars to support the library the first year. The first meeting of the first library committee was held at the office of J. C. Allen, May 21, 1856. J. C. Allen was the first secretary, and D. R. Haynes the first treasurer. In 1857 the same committee were re-elected, and an appropriation of one hundred and fifty dollars made.

At the May meeting in 1858 the town voted to empower the Library Committee to collect certain libraries owned by the town, but kept in the different school wards, and as the books of these several libraries were many of them alike, to put two copies of each book in the Town Library, and exchange the rest for other books. This was to be done only where no objection was made. The libraries of Wards Nos. 2, 3, 4 and 7 were thus collected. Objections being made in Wards No. 1 and 6, the matter was dropped. Francis Tinker served as librarian from the formation of the Public Library till the end of 1862, receiving for the most part fifty dollars a year for his services. During this time the library was kept in his store, in Union Block, next door to what is now H. L. Williams & Co.'s grocery store.

For the year 1863, C. W. Carter was librarian, and the library was kept in a small building which then stood where Wood's brick block now is. The first part of 1864 the library dwelt in boxes. At the end

of 1863 the Town Library, having absorbed the three old libraries mentioned above and a part of the school libraries, had increased to about nine hundred volumes, and had cost the town \$1,072.98. In 1876, the town received a fund of five thousand dollars from the estate of J. Henry Kendall, given, as stated in a codicil to his will, "for the formation of a Public Library," on condition that the town would provide a room for this Library satisfactory to the trustees of the Kendall Fund. To comply with this condition the Town Hall was raised and the present library-room was fitted up below. The library took possession of this new room about April, 1864. The same month James M. Bronson, the present librarian, was appointed. At this time also it was voted to purchase for the town the Leominster Agricultural Library, at one dollar a share. This library was obtained in the following manner: An agent from Boston visited the town in 1857, having a list of books for an Agricultural Library, which he promised to furnish if he could get eighty-three subscribers at \$2.50 each. The required number was obtained and the library sent; it was kept at the store of J. C. Allen. This Library was purchased in accordance with the above-mentioned vote. This fact accounts for the large number of old agricultural works in the library at the present time.

The Kendall Fund has been expended in the purchase of books in accordance with the terms of the will, and the library now numbers about eleven thousand volumes. The reading-room is a most valuable department of the library. Its influence increases from year to year.

The present committee is as follows: President, J. D. Miller; James A. Stowell, H. M. Gates, secretary and treasurer; E. M. Wilder, I. F. Hall, C. C. Foster.

From this record it appears that the town has dealt quite liberally with its library. That the library would not have reached anything like its present size or value, except for the bequest of Mr. Kendall, does not, in the least, detract from the truth of this statement. The town has done its part well and the library is firmly intrenched in public favor.

THE LEOMINSTER MUSEUM, now a part of the library, owes its origin to the zealous efforts of Rev. Wm. J. Batt, with the co-operation of James Bennett, Esq., and Dr. G. W. Pierce, whose interest in geological and antiquarian research caused them to render valuable aid.

Sunday, October 29th, Mr. Batt read an article from the pulpit of the Orthodox church, "desiring all persons interested in such a movement to meet at the town-hall building, October 30th," 1871. In response to this call a meeting was held in the library-room October 30, 1871, at which meeting a committee was chosen, consisting of Rev. W. J. Batt, Dr. G. W. Pierce, James Bennett, F. A. Whitney, Sumner L. Carter and Fred. R. Hill, to prepare and report a plan of procedure.

December 18th the friends of the measure again met at the room of the library. A report was presented by Rev. Mr. Batt, chairman of the committee, advising the choice of five trustees, who, together with the library committee, for the time being, shall be known as the "Leominster Museum Board." The report was accepted, and Rev. W. J. Batt, Dr. C. C. Field, Joel Smith, J. C. Allen and T. A. Hills were chosen trustees. The library committee consisted of Dr. G. W. Pierce, Rev. E. A. Horton, S. L. White, Rev. J. D. Miller and W. H. Reed. At a subsequent meeting J. D. Miller was chosen treasurer, and Joel Smith, W. J. Batt and J. C. Allen, committee on finance.

About five hundred dollars were contributed by public-spirited citizens, and mostly expended in cases and material forming the nucleus of the present collection, by a committee consisting of Joel Smith, James Bennett and N. C. Boutelle.

At a meeting of the museum board, September 23, 1874, Mr. Batt presented his resignation as chairman of the board, and James Bennett was chosen to fill the vacancy.

April 5, 1880, with the consent of the trustees, the town "voted to accept of the museum as a part of the public library, and provide for its care."

May 19th, the library committee appointed E. G. Davis curator of the museum, and he still holds that position. The following partial catalogue prepared by him is of historical value:

*The Mineralogical Department.*—This department now contains about four hundred specimens, the nucleus of which was a private collection presented by Miss E. J. Fessenden, of Fitchburg. Among the other contributions are, a series of one hundred and forty-seven specimens, illustrating the geological formation of the Alps, presented by Rev. E. A. Horton; numerous contributions from Colorado, by Col. Ivers Phillips; many others by Mr. C. H. Vanderwarker, of Fitchburg, and a profusion of local specimens by Messrs. James Bennett, Blanchard Hosmer, Charles Nixon, Roscoe Frost, Russell Damon, Willie Freeman and others. The collection consists of rocks, fossils, shells, birds, mammals, war relics, antiquities, Indian relics, colonial and miscellaneous relics, manuscripts, newspapers and books, the "International Scientists' Directory," etc., etc.

This museum, which at one time seemed little more than a pleasant dream, but which is now a permanent monument of the energy and enthusiasm of Rev. Mr. Batt, and adds very materially to the educational facilities of Leominster, will increase in interest and value with every year of its history. If by public vote or private beneficence, suitable buildings are provided for the different departments of the library, Leominster may challenge comparison with other towns of her size in these respects.

Looking at the educational facilities of Leominster as a whole—her system of public schools, born in

weakness, out of the much poverty of the early times, but cherished then; strengthened and established with the growth and development of the town; kept by those in charge fully up to the standard of education in the State and Nation; provided now with ample material and competent supervision; aided in the work by the accessories already named—looking at this whole field, we say, that Leominster has no need to apologize for what she has done, is doing, or promises to do for the education of her people.

## CHAPTER CLVII.

### LEOMINSTER—(Continued.)

#### INDUSTRIAL.

How to obtain a livelihood, and how to secure for one's children some better chance than their parents possessed, are two of the most pressing questions of life. Other questions come and go; these remain and keep the house. When men are looking for a home, then, their choice must depend very largely upon the business enterprise of a town and the educational advantages which it offers. The question of *how to live* is so constantly with us, and the desire to *better life* for our children is so vital a part of our thought, that mere beauty of natural scenery, or even more weighty matters, will be neglected or forgotten in answering these: Does the town promise constant work at living wages? What advantages of education—social, intellectual and religious—can my children enjoy? Hence the importance of the present topic.

Probably few towns in the Commonwealth surpass Leominster either in the number and variety of industrial pursuits or in the skill and energy with which these are conducted. In regard to these industries two general facts are worthy of notice. First: An important part of the manufacturing requires only a limited amount of capital; but there are several corporations of large resources and extensive business, whose goods are familiarly known in all parts of the country and even sold in foreign markets. There is thus larger opportunity for individual enterprise and less danger in many ways. Second: An unusually large proportion of these industries require skilled workmen, and so ensure to the town a very large class of intelligent and thinking citizens. From the first Leominster has been noted for the general intelligence and good character of its inhabitants. One reason for this is found in the nature and variety of her industrial pursuits. There is less danger that men will lack employment, less opportunity for labor troubles, a greater tendency to acquire and hold property, a more general feeling of security, which of itself does much for the growth and development

of any town. As a glance at the other chapters of this sketch will show that, in regard to educational advantages and opportunities for moral and religious training, Leominster offers unusual attractions, so a review of our business interests will prove that the chances for constant labor at remunerative wages are better in Leominster than in most other towns of this State.

The different industrial enterprises of the town have been arranged in what seems a natural order of topics.

**AGRICULTURE.**—In any enumeration of business interests, agriculture would, naturally, stand first. It was first in the order of time. For the first twenty-five years very little, if any, manufacturing was done in town not directly connected with the farming interest; and for the first half-century Leominster was to all intents an agricultural community. The following quotation gives a good description of the soil. "This town probably contains as great a variety of soils as are to be found in any other town in the Commonwealth. Hence the natural growth of the wood and timber, as well as the agricultural and horticultural products, are also various. While the high, coarse, gravelly plains produce only the small pitch-pines, the lower and richer planes were thickly covered the larger white, pitch and yellow pines for timber. On the deep alluvial plains were the white and sugar maples, the birch, the beech and the elm, while the rich soils of the uplands were thickly covered with the different species of oak, chestnut and walnut." All this presupposes a great variety of soil, and that the inhabitants would find their first wealth in cultivating the land. "There were, in these years, only a sufficient number of mechanics to dress the cloth, home-spun and made in the family, to do the blacksmithing, construct the ploughs, carts and other implements of husbandry, to make and mend the custom shoes," etc.

The migratory habits of the shoe-maker in those early days, when he packed up his tools, and even his bench, and traveled from house to house to make up the shoes for the year, illustrates the condition of all manufacturing, when the farmers were all the mechanics which the community boasted. Leominster has always been a town of small farms. The land was allotted in plots of forty acres at first, and no proprietor was permitted to hold, in his own right, more than one of these lots, unless the land was poor, when the number of acres was increased. Mr. Wilder notes that, in 1853, some of these farms were still in the possession, either in whole or part, of the lineal descendants of the first owners. He names Samuel M. Carter, Abel Wilder, Levi Smith and Charles F. Carter as of the fourth generation of the first owners, and Joseph Colburn, Solon Carter, William Carter, David Houghton, Shepherd C. Wilder, Luke and Ephriam Buss as of the third generation. A few of these places are still in the same family line as in 1853;

but, for the most part, they have passed into other hands. It is also true that some farms, now as then, are held in a single line of possession for several generations, although the first owner was not one of the original settlers of the town.

Of the farming interests of Leominster, what was true at first is still true. "The farmers are industrious and the land is productive." It cannot be rightly said that farming is a losing business here. The owners of land do not, it is presumed, make as much money, or make it so rapidly, as the successful manufacturer or merchant; but they enjoy a large degree of comfort and prosperity. The unusually large acreage of excellent pasture land within the town limits, make butter and milk among the most valuable of our farm products. This has always been and is the fact, although the traffic is much more in milk now than in former years. Large quantities are shipped by the farmers to outside markets. Fruit of different kinds is another product for which Leominster is, and has been, noted. Not only are there many excellent orchards and a large annual production of the apple, but the smaller fruits are grown with success. Even the small garden plots in the thickly-settled parts of the town have a full supply of the pear, grape and the different kinds of sub-acid fruits. The annual exhibition of fruit at the Farmers and Mechanics' Fair easily surpasses that of any other town or county fair in this part of the State. Of late Mr. George M. Kendall has made market gardening a decided success. Indeed, it would seem that nature produced him, and experience has trained him, for this special business. Others have engaged in it to some extent, but not with equal success. The soil of Leominster produces, also, all kinds of grain native to this climate, and the value of these and the hay crop is many thousand dollars annually.

In order to promote the interests of agriculture and mechanical pursuits, the Farmers and Mechanics' Association was organized in the autumn of 1852. The following is the preamble to the constitution of that society:
